EXECUTIVE SUMMARY

Paterson Group was retained by Taggart Realty Management to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 359 Kent Street, 436 and 444 MacLaren Street, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

According to the historical research, the subject site was first developed with residential dwellings in the mid 1890s. A portion of the subject site (359 Kent Street) was redeveloped for commercial use in approximately 1955, with the demolition of residential buildings on the Phase I property and subsequent construction of a six-storey commercial use building, presently on site. Imported fill material used as part of the redevelopment process at this time is considered to represent an APEC on the subject site.

The 359 Kent Street building was identified to have a historical UST, located near the northeast building corner of 359 Kent Street on the Phase I property. The presence of the former UST is considered to represent an APEC on the Phase I property. A Phase II ESA was conducted in 2005 to assess the soil and groundwater in the vicinity of the former UST location. Based on the analytical results, petroleum hydrocarbon impacted soil (PHC fractions F2 and F3) was identified. As a result, PHCs are considered to be a known contaminant of concern (COC) on the subject site.

Residential buildings on the Phase I property, 436 and 444 MacLaren Street, were repurposed as commercial offices in the early 1960s.

Neighbouring lands in the vicinity of the subject site have historically been used for residential and commercial purposes. Potentially contaminating activities within the Phase I study area include former and/or current: retail fuel outlets, commercial cleaners, commercial dry cleaners, commercial print shops, automotive repair garages, and commercial car rentals. Based on their separation distance from the subject site, downgradient or cross-gradient orientation, and previous environmental assessments relating to site redevelopment, many of these off-site PCAs are not considered to represent APECs on the Phase I property.

Following the historical review, a site inspection was conducted to assess the present-day environmental conditions of the subject site. The property addressed 359 Kent Street, located in the southern portion of the site, contains a six-storey multi-tenant commercial building, as well as a small concrete block waste storage shed. An interior transformer, located in a vault in the basement of the 359 Kent Street building, is considered to represent an APEC on the Phase I property. The building is presently heated with natural

gas, however, a capped vent pipe from a former AST and associated former oil furnace was identified in the boiler room. No significant concerns were noted with respect to the former AST and oil furnace.

The properties addressed 436 and 44 MacLaren Street, located in the northern portion of the subject site, contain residential dwellings which have since been repurposed and converted into commercial offices. The buildings are currently natural gas heated. No evidence of contamination was identified with respect to former heating methods.

The neighbouring lands within the vicinity of the subject site were generally observed to be used for residential and commercial purposes. Several properties to the northwest of the subject site were historically used as retail fuel outlets, however, based on their separation distances, down-gradient orientation, and previous environmental assessments related to site redevelopment, these properties are not considered to pose an environmental concern to the subject site.

Based on the findings of this Phase I ESA, it is our opinion that **a Phase II – Environmental Site Assessment will be required for the subject site in order to support the filing of a Record of Site Condition.**

Recommendations

359 Kent Street

A Designated Substances and Hazardous Building Materials Assessment report was conducted for the 359 Kent Street building in 2005 by Jacques Whitford, which identified asbestos containing materials, lead-based paints and PCB containing fluorescent light ballasts. This report should be referred to prior to any demolition or renovation activities.

436 and 444 MacLaren Street

Based on the age of the buildings at 436 and 444 MacLaren Street (mid 1890s), asbestos containing building materials (ACMs) and lead-based paints may be present within the structures. Potential ACMs identified at time of the site inspection include vinyl floor tiles, plaster walls and ceilings, dry-wall joint compound and suspended ceiling tiles. These building materials were generally observed to be in good condition at the time of the site inspection and do not pose any immediate concern to the occupants of the buildings. An asbestos survey of these buildings should be conducted in accordance with O.Reg. 278/05, under the Occupational Health and Safety Act, prior to any renovation or demolition activities, if one has not already been conducted.

Lead-based paints may be present, on any original or older painted surfaces. The painted surfaces within these buildings were generally observed to be in good to fair condition, and do not pose any immediate concern to the occupants of the buildings. Major work involving lead-based paint or other lead containing products must be done in accordance with O.Reg. 843, under the Occupational Health and Safety Act.

1.0 INTRODUCTION

At the request of Taggart Realty Management, Paterson Group (Paterson) conducted a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 359 Kent Street, 436 and 444 MacLaren Street, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

Paterson was engaged to conduct this Phase I ESA by Mr. Derek Howe of Taggart Group of Companies. Their office is located at 225 Metcalfe Street, Suite 708, in the City of Ottawa. Mr. Howe can be reached by phone at 613-883-2059.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared in general accordance with Ontario Regulation 153/04, as amended under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

2.0 PROPERTY INFORMATION

Addresses: 359 Kent Street, Ottawa, Ontario;
436 MacLaren Street, Ottawa, Ontario;
444 MacLaren Street, Ottawa, Ontario;

Legal Description: Lots 32, 33 South MacLaren Street and Lots 32, 33, 34, 35 North Gilmour Street, Registered Plan 27292, City of Ottawa, Ontario.

Property Identification
Numbers: 04119-0075
04119-0302
04119-0303

Location: The subject property is located east of Kent Street, between MacLaren Street and Gilmour Street, in the City of Ottawa, Ontario. Refer to Figure 1 - Key Plan for the site location.

Latitude and Longitude: 45° 24' 49" N, 75° 41' 51" W

Site Description:

Configuration: Irregular

Site Area: 3603 m² (approximate)

Zoning: R4UD - Residential

Current Uses: The subject site is currently occupied by a six storey commercial office building (359 Kent Street), a two storey commercial office building (444 MacLaren Street) and a three storey commercial office building (436 MacLaren Street).

Services: The subject site is located within a municipally serviced area.

3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject property and, if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of Ontario Regulation 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01;
- Provide a preliminary environmental site evaluation based on our findings;

- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

4.0 RECORDS REVIEW

4.1 General

Phase I ESA Study Area Determination

A radius of approximately 250 m was determined to be appropriate as a Phase I study area for this assignment. Properties located outside of this radius are not considered to have had the potential to impact the subject site, based on their significant distances.

First Developed Use Determination

Based on a review of available historical information, the subject site was first developed for residential purposes in approximately the mid 1890s.

Current Ownership

The properties addressed 359 Kent Street, 436 MacLaren Street, and 444 MacLaren Street, comprising the Phase I property, are presently owned by Taggart Realty Management (Taggart).

Fire Insurance Plans

Fire Insurance Plans (FIPs) were reviewed for the area of the subject site and surrounding properties.

The site was shown on Sheet 56, Volume 1 of the 1888 FIPs (revised to 1901), as occupied by seven residential dwellings addressed 443, 449, 455, 459 and 467 Gilmour Street, and 436 and 444 MacLaren Street. In 1901, immediately adjacent properties were occupied by residential dwellings.

The 1912 FIPs show the subject site on Sheet 56, Volume 1, in a similar configuration, with seven residential buildings occupying the subject site. In 1912, immediately adjacent properties were occupied by residential dwellings.

The site was also shown on Sheet 130, Volume 1 of the 1956 FIPs. The property addressed 436 MacLaren Street was occupied by a residential apartment building (labelled Apartments) and two detached garages. The property addressed 444 MacLaren Street was occupied by a residential/office building (labelled offices) with

one detached garage. The current 359 Kent Street property was occupied by the present-day structure, listed as the New Legion House, as well as two residential dwellings on the eastern portion, addressed 443 and 449 Gilmour Street. Adjacent properties were occupied by residential dwellings.

Table 1 below lists the PCAs identified within the Phase I study area during this review.

TABLE 1: Potentially Contaminating Activities Fire Insurance Plans Review Summary			
Address	Year of FIP	Listed Activity	Approximate Distance / Orientation from Site
Bank Street			
273	1888	Paint shop	210m North
286	1912	Photography station	170m North
297	1948, 1956	Printers	160m Northeast
298	1912	Paint shop	130m Northeast
301	1912	Paint shop	150m Northeast
302	1912	Paint shop	120m Northeast
374	1912	Painting	110m Southeast
378-380	1948, 1956	Electrical Works	110m Southeast
384	1948	Glass Works	115m Southeast
394-396	1948, 1956	Retail Fuel Outlet with 2 USTs	120m Southeast
370	1956	Photographs	110m East
Cooper Street			
420-438	1948, 1956	Borden Dairy Co. (trucks and storage), paints, 1 UST and truck repairs	120m North
448	1956	Cleaning and pressing	140m North
Gilmour Street			
384	1948, 1956	Automotive repair garage	140m East
Florence Street			
7	1956	Automotive repair garage	170m Southeast
Kent Street			
298	1948, 1956	Imperial oil service station with 4 USTs	100m Northwest
328	1948, 1956	Service station, oiling and automotive repair garage with 4 USTs	55m Northwest
Maclaren Street			
387	1948, 1956	Automotive garage and repairs	120m Northeast
389	1956	Dry Cleaning	120m Northeast
Somerset Street			
429	1948, 1956	Service station with 4 USTs and oiling	100m Northwest

Sheet 126, Volume 1 of the 1956 FIPs displayed three retail fuel outlets (RFOs), located northwest, northeast, and southeast of the intersection of Kent Street and Somerset Street West. These RFOs were addressed 298 Kent Street, 328 Kent Street (also labelled as an automotive repair garage) and 429 Somerset Street West.

The former RFOs addressed 298 Kent Street and 429 Somerset Street West are both approximately 100 metres northwest of the Phase I property. Due to the separation distance from the subject property, as well as previous environmental work completed on the properties, these RFOs are not considered to represent APECs on the subject site.

The former RFO and automotive repair garage addressed 328 Kent Street, approximately 55 metres northwest of the Phase I property, is considered to represent an APEC on the subject site.

Former automotive repair garages were identified in the 1956 FIPs at: 387 ½ MacLaren Street, approximately 120 metres northeast of the subject site; 384 Gilmour Street, approximately 140 metres east of the subject site; and 7 Florence Street, approximately 170 metres southeast of the subject site. Based on the separation distance from the subject site, the presence of these historical PCAs are not considered to represent areas of potential environmental concern (APECs) on the subject site.

A former RFO was identified in the 1956 FIPs at 394-396 Bank Street, approximately 120 metres southeast of the subject site. Based on the separation distance from the subject site, the former RFO is not considered to represent an area of potential environmental concern (APECs) on the subject site.

Remaining PCAs identified in Table I within the Phase I study area are not considered to represent APECs on the subject site due to their separation distance and/or downgradient or cross-gradient orientation to the subject site, with respect to the anticipated regional northern groundwater flow direction.

City of Ottawa Street Directories

City directories for the area of the subject site were reviewed from 1890 to 2011 at approximate 10-year intervals.

The properties addressed 436 and 444 MacLaren Street (part of the Phase I property) have been listed as residential up to 1961, when they were used for commercial purposes (436 MacLaren is listed in 1961 as residential and commercial use, and 444 MacLaren is listed as Canadian Teachers Federation). According to the city directories, these properties were first developed between 1897 and 1898 with the present day structures.

The property now addressed 359 Kent Street (part of the Phase I property) was listed in 1961 as the Canadian Legion Building (formerly addressed 465 Gilmour Street). Commercial tenants identified in the directory search include Sunlight Oil Ltd. (first floor, 1961) and Legionary the Publication (second floor, 1961), Legion Magazine / Canvet Publication (1961, 1990, 2000), and Gml Actuarial Services (2011).

In 1990, 465 Gilmour Street was now addressed 359 Kent Street (current property address). Historically, the multi-storey commercial building has been used as office space by various commercial tenants. The previous magazine publication identified in the directory search (in conjunction with the related former on-site print shop) is considered to represent an APEC on the Phase I property. Although Sunlight Oil Ltd. was listed as a tenant of the subject building, it is considered to be for office purposes only, and not the distribution or sale of petroleum products.

A summary of potentially contaminating activities located in the Phase I study area is provided below in Table 2.

TABLE 2: Potentially Contaminating Activities City Directories Review Summary			
Address	Listed Activity	Years Listed	Approximate Distance / Orientation from Site
Bank Street			
287	Parkers cleaners and dryers	1960	200m Northeast
305	Tyrell Printers	1959	140m Northeast
310	Brookshire / Parkers / Blackwell Lyle: cleaners and dyers	1949-1970	100m Northeast
316	Alexandra cleaners and tailors	1940-1950	80m Northeast
366	Koffman Harry Sign Printer	1960	80m East
394-396	Service station (under various names)	1922-1970	125m Southeast
Kent Street			
290	Long Wing Laundry	1967	145m Northwest
Somerset Street			
396	Henri's Service Station	1957	80m Northeast
429	Car rental and John Browns' service station	1937-1987	100m Northwest
430	Neil and Ken's Service Station	1967	50m North
443	McDonald's service station and Imperial Oil	1947-1957	100m Northwest

Two (2) additional historical RFOs (retail fuel outlets) were identified at 396 and 430 Somerset Street West. The RFO at 396 Somerset Street West is not considered to represent an APEC on the subject site due to the separation distance (80 metres) and downgradient orientation with respect to the anticipated groundwater flow direction. Although the RFO at 430 Somerset Street West is considered to be downgradient, based on the proximity to the subject site (50 metres), the former RFO is considered to represent an APEC on the subject site.

Remaining PCAs identified in Table 2 within the Phase I study area are not considered to represent APECs on the subject site due to their separation distance and/or downgradient or cross-gradient orientation to the subject site.

4.2 Environmental Source Information

National Pollutant Release Inventory

A search of the National Pollutant Release Inventory (NPRI) was conducted as part of this assessment. The search did not identify any records of pollutant releases for the subject site or for any properties situated within the Phase I study area.

PCB Waste Storage Site Inventory

A search of the national PCB waste storage site inventory was conducted as part of this assessment. The search did not identify any current or former PCB waste storage sites situated within the Phase I study area.

MECP Coal Gasification Plant Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, *"Municipal Coal Gasification Plant Site Inventory, 1991"* was reviewed as part of this assessment. This document provides a reference to the locations of former plants with respect to the subject site. A review of this document did not identify any former coal gasification plants located on the subject site or within the Phase I study area.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, *"Waste Disposal Site Inventory in Ontario, 1991"* was reviewed as part of this assessment. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario. A review of this document did not identify any relevant records pertaining to the subject site or for properties located within the Phase I study area.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry was conducted for the subject and neighbouring properties, as well as the general area of the site. No Records of Site Condition (RSCs) were filed for the subject property. Three (3) RSCs were filed for nearby properties, as presented in Table 3.

Table 3: Records of Site Condition within Phase I Study Area				
RSC No.	Filing Owner	Site Address	Distance	Filing Date, Municipality
46025	Avraham Holdings Inc.	443 Somerset Street West, Ottawa, ON, K1R 5J7	100m	Jan 22, 2009 Ottawa
2091	Youth Services Bureau of Ottawa	433 Cooper Street/366 Lisgar Street, Ottawa	200m	Nov 14, 2005 Ottawa
90917	176929 Canada Inc.	390 Bank Street, Ottawa, ON, K2P 1Y5	150m	Apr 14, 2011 Ottawa

The RSC properties range between 100m and 200m from the subject site. Based on the distance from the subject site, the three properties listed in the MECP Brownfields environmental site registry are not considered to pose an environmental concern to the subject site.

OMNRF Areas of Natural Significance

A search for areas of natural and scientific interest situated within the Phase I study area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website. The search did not identify any natural features or areas of natural significance within the Phase I study area.

City of Ottawa Old Landfill Sites

The document prepared by Golder Associates entitled, *“Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa”*, was reviewed as part of this assessment. No former landfill sites were identified on the subject site or within the Phase I study area.

City of Ottawa Historical Land Use Inventory (HLUI) Database

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City’s Historical Land Use Inventory (HLUI 2005) database for any environmental records pertaining to the subject site as well as any properties situated within the Phase I study area.

A response from the City had not been received prior to the issuance of this report. A copy of the response will be forwarded to the client should it contain any pertinent information. A copy of the submission request has been included in Appendix 2.

ERIS Database Report

An ERIS (Environmental Risk Information Service) Report was obtained for the Phase I Property and properties within the Phase I Study Area.

Based on the ERIS search, there are nine records identified for the Phase I Property, including seven waste generation records, one Scott's Manufacturing Directory record, and one ERIS historical search record. Waste generation records include photoprocessing wastes (waste class 264) and petroleum distillates (waste class 213) from the former 359 Kent Street Print Shop (Dominion Command Royal Canadian Legion, and later Canvet Publications Ltd.), previously located on the Phase I Property (359 Kent Street building) from approximately the mid 1980s to early 2000s. The ERIS search also lists waste generation records for PCBs and aliphatic solvents in the late 2000s (Taggart Corporation) for the 359 Kent Street building.

A total of 290 off-site records from various databases were identified in the ERIS search within the 250 m search radius, which included fuel storage tank records, Certificates of Approval (CAs), Environmental Compliance Approvals (ECAs), Ontario Waste Generators, Ontario Well Records, and Ontario Spills Registry.

Certificates of Approval (CA) and Environmental Compliance Approval (ECA) records were limited to sewer, water and air works applications and are not considered to pose a concern to the Phase I property.

Fuel tank records within the search area were limited to previously identified historical RFOs (298 Kent Street, 328 Kent Street, and 429 Somerset Street West). As previously noted, the former retail fuel outlet addressed 328 Kent Street is considered to represent an APEC with respect to the Phase I property due to its relative proximity (55 metres northwest).

Historical spills in the Phase I study area were limited to previously identified RFO sites and off-site gaseous emissions with one exception. A UST was discovered in 2009 at 50 James Street, and soil contamination was encountered at that time. Due to the separation distance from the subject site (approximately 105 metres southeast), this off-site spill is not considered to represent an APEC on the Phase I Property.

The ERIS search identified one additional commercial dry cleaner at 272 Bank Street, approximately 235 metres northeast of the subject site. Due to the separation distance from the subject site this dry cleaner is not considered to represent an APEC on the Phase I Property.

The remainder of the items identified in the ERIS report were previously identified or are not considered to pose an environmental risk to the Phase I Property.

A copy of the ERIS report is included in Appendix 2.

Previous Engineering Reports

A review of previous Paterson reports in the Phase I study area of the did not identify any additional potential environmental concerns for the subject property.

- 'Phase I/II – Environmental Site Assessment, 359 Kent Street, Legion House' dated September 2005, conducted by Jacques Whitford.

A Phase I/II-ESA was conducted for the subject site in 2005 by Jacques Whitford. Historical information collected as part of the report indicated that a UST was located near the northeast corner of the building. Nine boreholes were drilled, seven of which were fitted with groundwater monitoring wells in the immediately surrounding area of the former UST, as part of the Phase II-ESA for 359 Kent Street.

Analytical testing in 2005 showed that two soil samples from directly under the former UST location fail the current MECP environmental site standards (MECP Table 3) for petroleum hydrocarbons (PHC - F2 and F3 fractions). A comparison of 2005 MECP Table 3 standards to present-day standards indicate that one soil sample identified as having an exceedance in PHC F3 fractions in 2005 also exceeded present day PHC F2 fractions. The remainder of the results are in compliance with present-day standards.

Monitoring wells installed to the immediate north, south, east, and west of the former UST location were analyzed for benzene, toluene, ethylbenzene, xylenes (BTEX) and PHC (fractions F1 to F4) concentrations. A comparison to present-day MECP Table 3 standards for residential use showed that groundwater samples are in compliance with site standards.

Jacques Whitford estimated in 2005 that between 10 and 20 cubic metres of PHC contaminated soil remained on site. It was recommended that the soil be excavated and removed during future redevelopment or construction activities on the site.

As part of this investigation, it was recommended that groundwater in the vicinity of the former UST be resampled, however, the seven (7) monitoring wells were decommissioned. As such, the former presence of the UST represents an APEC on the Phase I property.

- ❑ 'Designated Substances and Hazardous Building Materials Assessment Report, 359 Kent Street, Legion House' dated December 2005, conducted by Jacques Whitford.

A Designated Substances and Hazardous Building Materials Assessment report was conducted for the subject site in 2005 by Jacques Whitford. Several designated substances and hazardous building materials were identified within the subject structure. This report should be referred to prior to any demolition or renovation activities.

- ❑ Phase I – Environmental Site Assessment, 436 and 444 MacLaren Street, Ottawa, Ontario' dated October 20, 2017, conducted by Paterson Group.
- ❑ Phase I – Environmental Site Assessment, 359 Kent Street, Ottawa, Ontario' dated December 11, 2017, conducted by Paterson Group.

Paterson Group conducted Phase I ESAs for 359 Kent Street, and 436 and 444 MacLaren Street in 2017. These reports were reviewed during the 2021 investigation, and no additional PCAs or concerns were identified on the site or in the Phase I study area.

Geotechnical Investigation

A geotechnical investigation was performed by Paterson Group in April 2021, concurrently with the Phase I ESA investigation. The geotechnical investigation advanced five boreholes placed on the Phase I property, four of which involved coring bedrock, and three of which were instrumented with groundwater monitoring wells. In general, the observed strata consisted of 0.60 metres to 2.84 metres of fill, overlying native silty clay and glacial till, with an overburden thickness of 8.81 metres to 11.81 metres. No visual or olfactory evidence of contamination was noted at the time of the investigation.

4.3 Physical Setting Sources

Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals, commencing with the earliest available photograph. Based on the review, the following observations have been made:

- 1928 The subject site is occupied by seven residential buildings, two along MacLaren Street and five along Gilmour Street. The buildings along

MacLaren Street appear to be in their present orientation. Kent Street, MacLaren Street, and Gilmour Street are present in their current orientation.

- 1958 *(City of Ottawa Website)* Four residential buildings along Gilmour Street have been demolished on the subject site, and a multistorey commercial building consistent with the building present today, has been constructed in their place, with associated parking lot to the east of the structure. The properties to the northwest, northeast and southwest of the Kent Street and Somerset Street West intersection appears to be used as retail fuel outlets, approximately 80 to 110 metres northwest of the subject site.
- 1969 No significant changes have been made to the subject property or neighbouring properties.
- 1976 A residential building on the subject site has been demolished and converted into additional asphalt parking area. A residential apartment tower has been constructed approximately 30 metres northeast of the subject site, across MacLaren Street. Seven residential buildings, immediately across Gilmour Street to the south of the subject site, have been demolished and a commercial building and associated parking has been constructed in their place.
- 1984 A residential and commercial mixed-use building has been constructed directly north, across MacLaren Street from the subject property. The building on the corner of Gilmour Street and Bank Street, approximately 80 metres east of the subject site, has been demolished, and is being used for parking. No significant changes have been made to the subject property.
- 1993 A residential apartment building has been constructed directly south of the 359 Kent Street building parking lot, across Gilmour Street. A mixed-use commercial and residential building has been constructed on the corner of Gilmour Street and Bank Street, approximately 80 metres east of the subject site. No significant changes have been made to the subject property.
- 2007 The properties northeast and southeast (both previous RFOs) and southwest of the Kent Street and Somerset Street West intersection have been developed with residential buildings. No significant changes have been made to the subject property.

2019 No significant changes have been made to the subject property or neighbouring properties.

Copies of selected aerial photographs reviewed are included in Appendix 1.

Geological Maps

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock beneath the site area consists of Paleozoic shale of the Billings Formation. Surficial soils consist of till and offshore marine sediments (clay and silt), with a drift thickness of 10 to 15 metres. This appears to be consistent with the findings of the 2021 geotechnical investigation.

Topographic Maps

Topographic information was reviewed from the City of Ottawa “Geo Ottawa” website and Natural Resources Canada – The Atlas of Canada website. The topographic maps indicate that the elevation of the subject site is approximately 75 m ASL, and that the regional topography in the general area of the site slopes downward to the north towards the Ottawa River. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Survey Plan

A survey plan prepared for the subject site was reviewed as part of this assessment. The plan, prepared by Annis, O’Sullivan, Vollebekk Ltd. on April 16, 2021, shows the site in its current configuration. The survey plan is included in Appendix 1.

Physiographic Maps

A physiographic map was reviewed from the Natural Resources Canada – The Atlas of Canada website, as a part of this assessment. According to the publication and mapping information, the subject site is situated within the St. Lawrence Lowlands. According to the description provided: *“The lowlands are plain-like areas that were affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.”* The subject site is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

Water Bodies

No water bodies are present on the subject site. The nearest water body with respect to the subject site is The Rideau Canal, located approximately one kilometre east.

MECP Water Well Records

A search of the MECPs website for all drilled well records within a 250 m radius of the subject site was conducted as part of this assessment. No well records were located for the subject property. The search identified 55 well records within the Phase I study area. The majority of the well records pertained to observation monitoring wells and test holes in the vicinity of the former retail fuel outlets (located near the intersection of Kent Street and Somerset Street West), as well as some locally targeting other previously identified off-site PCAs for development purposes.

No new environmental concerns were identified in the well record review. Copies of the aforementioned well records have been included in Appendix 2.

5.0 PERSONAL INTERVIEWS

Mr. Chris Brennan, a representative of the current property owner, was available at the time of the site inspection to respond to questions about the environmental history of the subject site.

Mr. Brennan stated that Taggart Realty Management (Taggart) had acquired the two properties addressed 436 and 444 MacLaren in the past few years and was unaware of any historical environmental concerns. He also stated that he was unaware of any new environmental concerns for the 359 Kent Street property since the Phase I/II ESA and DSS was completed by Jacques Whitford in 2005.

Previous interviews, conducted in 2017, were also reviewed as part of this assessment, detailed below.

Mr. David Brouse a representative of Taggart Realty Management (Taggart) responded to questions pertaining to 359 Kent Street in 2017. Mr. Brouse indicated that Taggart purchased the subject site in 2006 from the Royal Canadian Legion. Paterson was informed by Mr. Brouse that the perimeter of the building was excavated, and that the foundation was resealed in the fall of 2017. Mr. Brouse indicated that the previously identified asbestos containing 9x9 vinyl floor tiles have been removed from the site. Mr. Brouse informed Paterson that the hydraulic elevator located in the main lobby was installed in 2006. Paterson was told by Mr.

Brouse that he was not aware of any environmental concerns with regards to the subject site, with the exception of the previously addressed findings of the 2005 Phase I/II-ESA and Designated Substances and Hazardous Building Materials Assessment reports.

Mr. Gary Milani, a representative of Taggart Realty Management (Taggart) responded to questions pertaining to the subject site in 2017. Mr. Milani indicated that Taggart purchased the property addressed 444 MacLaren Street from 1270450 Ontario Inc. in September 2017, and intends to purchase 436 MacLaren Street in the near future from 1633717 Ontario Inc (which has since been acquired). Mr. Milani informed Paterson that the Teachers' Federation had fully converted the subject structure from residential to commercial office use in the early 1960s. Paterson was informed by Mr. Milani that the tenants of 444 MacLaren had recently vacated the building. Paterson was told by Mr. Milani that he was not aware of any environmental concerns with regards to the subject site.

Mr. Gilles Charlebois, the former property owner of 436 MacLaren Street (2017), responded to questions pertaining to the subject site in 2017. Paterson was informed by Mr. Charlebois that the boiler was replaced approximately a decade ago at that time. Mr. Charlebois told Paterson that the roof had been renovated approximately five (5) years ago at that time. Mr. Charlebois informed Paterson that the building was built in 1896 and has a cobble and stone foundation. Mr. Charlebois showed Paterson where he believed vent and fill pipes had previously been located. Mr. Charlebois told Paterson that he was not aware of any environmental concerns with regards to the subject site.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

A site inspection was conducted on March 30, 2021, between 10:00 AM and 12:00 PM. Weather conditions were cloudy, with a temperature of approximately 12°C.

Mr. Jesse Andrechek, from the Environmental Department of Paterson Group, conducted the inspection. In addition to the subject site, the uses of neighbouring properties within the Phase I study area were also assessed from publicly accessible roadways, at the time of the site inspection.

6.2 Site Inspection Observations

Site Description

The subject site consists of three commercial use buildings and associated asphalt parking areas. The properties addressed 436 and 444 MacLaren, located in the northern portion of the subject site, contain residential dwellings which have since been repurposed into commercial offices in the early 1960s. The property addressed 359 Kent Street, located in the southern portion of the subject site, contains a multi-tenant six-storey commercial building.

The ground surface throughout the subject site consists primarily of asphaltic concrete, with some grass and landscaped areas. The site topography is relatively flat, with a slight increase in grade on the MacLaren Street properties (436 and 444), whereas the regional topography slopes gradually down to the north.

Water drainage occurs by infiltration within landscaped areas on the northern portion of the property and sheet drainage to catch basins. No ponded water, stressed vegetation, surficial staining, or any other indications of potential sub-surface contamination were observed on the subject site at time of the site inspection.

A depiction of the subject site is illustrated on Drawing PE5204-1 – Site Plan, in the Figures section of this report.

Existing Buildings and Structures

359 Kent Street

The property addressed 359 Kent Street is occupied by a six-storey brick and stone block clad commercial office building. Based on the historical information, the building was constructed in approximately 1955. The building has a flat membrane roof and a concrete foundation. The building is heated with natural gas fired boilers located in the basement and cooled with rooftop air conditioning units, as well as supplemental air conditioning units located on the ground floor.

436 MacLaren Street

The property addressed 436 MacLaren Street is occupied by a three-storey brick and block exterior office building. The building features a stone foundation, and a primarily sloped and shingled roof, with a small flat bitumen style portion. Based on the previous property owner (2017), the building was built in 1896 for residential

purposes, and has since been repurposed for commercial office use. The building is heated with a natural gas fired boiler.

444 MacLaren Street

The property addressed 444 MacLaren Street is occupied by a two-storey cement parking clad office building. The building features a stone foundation, and a sloped and shingled roof. Based on the historical data, the building was built in the mid 1890s for residential purposes, and has since been repurposed for commercial office use. The building is heated with a natural gas fired boiler.

Underground Utilities

Public and private underground service locates were completed as part of a geotechnical and Phase II ESA investigation conducted for the subject site in tandem with this assessment. According to the locates, underground gas is present to the north of the property running east-west and connecting south to 436 and 444 MacLaren, as well as extending north from Gilmour Street along the east side of the 359 Kent Street building. Hydro is present extending south from MacLaren Street and running east-west on the southern portion of the property. Underground wires and conduits are also present running south of MacLaren Street and north-south on the east side of the subject site. Storm sewers are also present beneath the 359 Kent Street parking area, connecting to the municipal system to the south.

Potential Environmental Concerns

Fuels and Chemical Storage

359 Kent Street

Based on previous environmental reports conducted by Jacques Whitford, a 19,000L underground storage tank (UST) containing heating oil was formerly located near the northeast corner of the 359 Kent Street building. Sealed boreholes and monitoring wells were observed in the asphalt in the vicinity of the former UST from the 2005 Phase II investigation. As previously mentioned, impacted soil was identified during the 2005 investigation directly below the former UST location. The presence of the former heating oil UST represents an APEC on the subject site.

436 and 444 MacLaren Street

No concerns with respect to fuels or chemical storage were noted on the exterior of the buildings.

Polychlorinated Biphenyls (PCBs) and Transformer Oil

Several pole-mounted transformers were located near the subject site perimeter along Gilmour Street, Kent Street, and MacLaren Street. No signs of leaks or staining were observed on the transformer units or poles at the time of the site visit. No concerns were identified with respect to PCBs or transformer oil on the exterior of the subject site.

Waste Management

359 Kent Street

Solid non-hazardous waste produced by the building tenants of 359 Kent Street is stored in a concrete block shed located on the northern portion of the parking area. Waste is removed by the City of Ottawa on a weekly basis. No concerns were identified with waste management at the time of the site visit.

436 and 444 MacLaren Street

No waste storage was observed for the buildings at the time of the site visit (unoccupied due to COVID-19) but non-hazardous waste generated by the tenants is expected to be removed by the City of Ottawa on a weekly basis (curbside). No concerns were identified with waste management at the time of the site visit.

Interior Assessment

A general description of the interiors of the buildings on-site are described as follows:

359 Kent Street

- The floors throughout the building consisted of marble and ceramic tile, carpet, poured concrete, and terrazzo;
- Wall materials consisted of plaster over parging, granite tiles, drywall, wood panelling, brick and stone block.

- The ceilings consisted of plaster, suspended ceiling tiles, parging and concrete.
- Lighting throughout the building was observed to be a mix of incandescent and fluorescent fixtures.

The building is heated with natural gas fired boilers located in the basement. A drain was observed in the basement, which was observed to be in good condition, and contained generally clear water with no unusual odours at the time of the inspection.

436 MacLaren Street

- The floors throughout the building consist of granite tiles and hardwood. The floors in the basement were a combination of poured concrete and cobblestone;
- Wall materials consisted of plaster and stone blocks;
- The ceilings consisted of plaster and suspended ceiling tiles, with an unfinished basement ceiling;
- Lighting throughout the building was observed to be a mix of incandescent and fluorescent fixtures.

The building is heated with a natural gas fired boiler located in the basement. Floor drains were observed in the basement, and found to be dry and in good condition at the time of the site visit.

444 MacLaren Street

- The floors throughout the building consisted of carpet, ceramic tiles and vinyl floor tiles, with some unfinished poured concrete areas in the basement;
- Wall materials consisted of brick, concrete block, wood panelling, and drywall in the basement, and plaster throughout the remainder of the building.
- The ceilings consisted of plaster and suspended ceiling tiles;
- Lighting throughout the building was observed to be a mix of incandescent and fluorescent fixtures.

The building is heated with a natural gas fired boiler located in the basement.

Potentially Hazardous Building Products

Asbestos-Containing Materials (ACMs)

359 Kent Street

As previously mentioned, a Designated Substances and Hazardous Building Materials Assessment report was conducted for 359 Kent Street in 2005 by Jacques Whitford. Please refer to this report prior to renovation or demolition activities. The majority of previously identified ACMs were observed to be in good condition, however, some exposed paring cement was observed on a pipe fitting in an air exchanger room.

436 and 444 MacLaren Street

Based on the age of the buildings, ACMs may be present within both structures. Potential ACMS include vinyl floor tiles, plaster walls and ceilings, dry-wall joint compound and suspended ceiling tiles.

Lead-Based Paint

359 Kent Street

Based on the Designated Substances and Hazardous Building Materials Assessment report conducted for the subject building in 2005 by Jacques Whitford, lead-containing paints (lead concentration above 600 ppm) are present on painted surfaces throughout the structures. At the time of the assessment, painted surfaces were observed to be in good to fair condition.

436 and 444 MacLaren Street

Based on the date of construction of the subject buildings (mid 1890s), lead-based paints are potentially present on painted surfaces throughout the structures. At the time of the assessment, painted surfaces were observed to be in good condition.

Polychlorinated Biphenyls (PCBs) and Transformer Oil

359 Kent Street

Based on the 2005 Designated Substances and Hazardous Building Materials Assessment report, six PCB containing light-ballasts were identified in the subject structure. During the 2021 assessment, light-ballasts were not inspected, however, based on recent renovations (after

2006) within the subject building, it is considered likely that any PCB containing ballasts have since been replaced with non-PCB containing ballasts.

An interior transformer, owned and maintained by Hydro Ottawa and located in a vault in the building basement, was confirmed to be on site. Although inaccessible at the time of the site visit, photos obtained from Hydro Ottawa depict several oil-containing transformers. As a result, the interior transformer in the 359 Kent Street building is considered to represent a potentially contaminating activity (PCA) as well as an area of potential environmental concern (APEC) on the subject site.

436 and 444 MacLaren Street

Some fluorescent lighting fixtures were observed in the basement of the buildings. Ballasts installed prior to 1980 may contain PCBs.

Urea Formaldehyde Foam Insulation (UFFI)

No signs indicating the presence of UFFI were observed within the structures during our inspection. However, wall cavities were not inspected for insulation type.

Other Potential Environmental Concerns

Interior Fuel and Chemical Storage

Cleaning products, lubricants and paints were observed in several storage rooms throughout the buildings during the assessment. These chemicals were properly stored and are not considered to pose an environmental risk to the subject site.

359 Kent Street

The 359 Kent Street building was originally heated with an oil-fired furnace, and was converted to natural-gas in the late 1970s (based on the 2005 Phase I-ESA report by Jacques Whitford). A capped vent pipe and patched fill pipe hole on the foundation wall were present in the boiler room located in the basement at the time of the site visit. According to the 2005 Phase I-ESA, a former AST and associated oil furnace were historically present in this location, and were removed in approximately 1976 to 1978 following conversion to natural gas. Some staining was noted at the time of the site visit on the concrete floor near the former oil-fired furnace location, as well as minor cracking in the concrete slab in the vicinity of the former AST and

oil furnace location. A drain in the boiler room was observed to contain generally clear and odourless water.

Based on observed staining and the presence of a capped vent pipe, the former presence of the heating oil AST and oil furnace is considered to represent an APEC on the subject site.

436 MacLaren Street

No signs of fuel storage tanks were noted. No staining or suspected contamination related to fuel storage tanks was observed at the time of the site visit.

444 MacLaren Street

Potential former vent and fill pipe holes were identified on the west face of the building, directly south of the natural gas meter location. No staining or suspected contamination related to fuel storage tanks was observed. However, it should be noted that the basement of the 444 MacLaren Street building was finished, and the wall cavities were not inspected.

Hydraulic Equipment and Elevators

The 2005 Phase I-ESA report identified the former presence of a hydraulic lift in the basement of the building. No stains were observed in the former location of this equipment at the time of the site visit.

A hydraulic elevator was observed in the lobby of the building. The hydraulic elevator room was not accessed during the site visit. According to a representative from Taggart, the elevator was purchased in 2006 and is maintained regularly by a licenced contractor. Based on observations made during the site visit and the age of the equipment, the former and current presence of hydraulic and elevator equipment does not represent a potential environmental concern to the subject site.

Two (2) cable style elevators were also observed within the building. No stains or leaks were observed in vicinity of this equipment. No concerns were identified with respect to these elevators.

Wastewater Discharges

Wastewater from the subject buildings (wash water and sewage) is discharged into the City of Ottawa sanitary sewer system. Roof drainage is discharged into asphaltic concrete areas of the subject site via infiltration or

into the City of Ottawa storm water system via surface runoff. No concerns were noted with respect to wastewater discharge on the subject site.

Sump Pits and Floor Drains

359 Kent Street

A floor drain was inspected in the basement boiler room, and found to contain generally clear water with no visual or olfactory evidence of groundwater impact. No sump pits were observed in the building during the interior assessment.

436 and 444 MacLaren Street

Floor drains observed in the buildings, which discharge into the City of Ottawa sewer system, were found to be in good condition and dry at the time of the site visit. No sump pits were observed in the buildings during the interior assessment. No concerns were noted with respect to drainage.

Ozone Depleting Substances (ODSs)

Potential sources of ODSs observed on site include fire extinguishers, refrigerators, and air conditioner units. These appliances appeared to be in good condition at the time of the site inspection, and are not considered to represent potential environmental concerns on the Phase I property. These potential sources should be regularly serviced by a licensed contractor.

Neighbouring Properties

Land use adjacent to the subject site was observed as follows:

- North MacLaren Street followed by residential and commercial buildings;
- South Gilmour Street, followed by residential and commercial buildings;
- East Residential buildings, converted for commercial office use;
- West Kent Street, followed by residential dwellings.

No concerns were identified with respect to the adjacent properties.

Current land use adjacent to the subject site is illustrated on Drawing PE5204-2 – Surrounding Land Use Plan, in the Figures section following this report.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Land Use History

Based on a review of available historical information, the subject site was first developed for residential purposes in the mid 1890s.

Potentially Contaminating Activities (PCAs)

Based on the findings of this Phase I ESA, six on-site PCAs, resulting in APECs, were identified as pertaining to the subject site. These APECs include:

- A former fuel oil UST, located on the Phase I property near the northeast corner of the 359 Kent Street commercial building;
- An interior transformer, located on the Phase I property in the basement against the north wall of the 359 Kent Street commercial building;
- Fill material of unknown quality, located across the 359 Kent Street property (part of the Phase I property);
- A former commercial print shop and publication, located on the Phase I property in the 359 Kent Street commercial building;
- A former fuel oil AST and oil furnace, with associated oil staining, located on the Phase I property against the north building face of the 359 Kent Street commercial building;
- The use of road salt on the 359 Kent Street commercial parking area.

Two off-site PCAs, resulting in APECs on the Phase I property, were identified during the historical review. These off-site APECs include:

- The former retail fuel outlet and automotive service garage located at 328 Kent Street (55 metres northwest of the Phase I property).
- The former retail fuel outlet and automotive service garage located at 430 Somerset Street West (50 metres north of the Phase I property).

Other off-site PCAs were identified within the Phase I study area but are not considered to represent APECs based on their separation distances and/or down-gradient or cross-gradient orientations.

Areas of Potential Environmental Concern (APECs)

The areas of potential environmental concern identified in this Phase I ESA are summarized below in Table 4.

Table 4					
Areas of Potential Environmental Concern					
APEC	Location of APEC	PCA (O. Reg. 153/04 – Table 2)	Location of PCA	Contaminants of Potential Concern	Media Potentially Impacted
APEC #1 Former Fuel Oil UST	Central portion of subject site	<i>"Item 28: Gasoline and associated product storage in fixed tanks"</i>	On-Site	BTEX PHCs (F ₁ -F ₄)	Soil and Groundwater
APEC #2 Interior Transformer	Western-Central portion of subject site	<i>"Item 55: Transformer Manufacturing, Processing, and Use"</i>	On-Site	PCBs	Soil and Groundwater
APEC #3 Fill Material of Unknown Quality	Eastern and northern portion of subject site	<i>"Item 30: Importation of Fill Material of Unknown Quality"</i>	On-Site	Metals EC SAR	Soil
APEC #4 Former Print Shop and Publication	Southwest corner of subject site	<i>"Item 31: Ink Manufacturing, Processing and Bulk Storage"</i>	On-Site	VOCs	Soil and Groundwater
APEC #5 Former Aboveground Storage Tank and Oil Furnace	Western-Central portion of subject site	<i>"Item 28: Gasoline and associated product storage in fixed tanks"</i>	On-Site	BTEX PHCs (F ₁ -F ₄)	Soil and Groundwater
APEC #6 Use of Road Salt on Commercial Parking Area	Southeast portion of subject site	<i>N/A: Use of a substance applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both</i>	On-Site	EC SAR Sodium Chlorides	Soil
APEC #7A Former Retail Fuel Outlet	Northwest portion of subject site	<i>"Item 28: Gasoline and associated product storage in fixed tanks"</i>	55 metres northwest of the Phase I Property	BTEX PHCs (F ₁ -F ₄)	Soil and Groundwater
APEC #7B Automotive Service Garage	Northwest portion of subject site	<i>"Item 27: Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles."</i>	55 metres northwest of the Phase I Property	BTEX PHCs (F ₁ -F ₄)	Soil and Groundwater

Table 4 Areas of Potential Environmental Concern					
APEC	Location of APEC	PCA (O. Reg. 153/04 – Table 2)	Location of PCA	Contaminants of Potential Concern	Media Potentially Impacted
APEC #8 Former Retail Fuel Outlet	Northwest portion of subject site	<i>“Item 28: Gasoline and associated product storage in fixed tanks”</i>	50 metres north of the Phase I Property	BTEX PHCs (F ₁ -F ₄)	Soil and Groundwater

Contaminants of Potential Concern (CPCs)

Based on the APECs identified above, the contaminants of potential concern (CPCs) in the soil and/or groundwater include volatile organic compounds (VOCs, including BTEX), polychlorinated biphenyls (PCBs), metals (including mercury and hexavalent chromium) general inorganics (EC, SAR, sodium, chlorides), and petroleum hydrocarbons (PHCs, Fractions F₁-F₄).

7.2 Conceptual Site Model

Geological and Hydrogeological Setting

Based on the available information, the bedrock in the area of the subject site consists of Paleozoic shale of the Billings Formation, whereas the surficial geology consists of till and offshore marine sediments (clay and silt), with an overburden thickness ranging from 10 to 15 metres.

Groundwater is anticipated to be encountered within the overburden, and flow in a northerly direction.

Water Bodies

No water bodies are present on the subject site. The nearest named water body with respect to the subject site is The Rideau Canal, located approximately one kilometre east.

Areas of Natural Significance

No areas of natural significance were identified on the subject site or within the Phase I study area.

Existing Buildings and Structures

The subject site is current occupied with a six-storey commercial building (359 Kent Street), a three-storey commercial office building (436 MacLaren Street), and

a two-storey commercial office building (444 MacLaren Street). A small concrete block waste storage shed is also present to the east of the 359 Kent Street building.

Drinking Water Wells

Based on a review of available well records, no drinking water wells are expected to be present within the Phase I study area.

Neighbouring Land Use

Neighbouring land use within the Phase I study area consists mainly of residential and commercial properties. Several properties to the northwest of the subject site contained former retail fuel outlets; however, based on their separation distances and previous assessments related to redevelopment, these properties are not considered to pose an environmental concern to the subject site.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

Based on the findings of this Phase I ESA, six on-site PCAs, resulting in APECs, were identified as pertaining to the subject site. These APECs include:

- A former fuel oil UST, located on the Phase I property near the northeast corner of the 359 Kent Street commercial building;
- An interior transformer, located on the Phase I property in the basement against the north wall of the 359 Kent Street commercial building;
- Fill material of unknown quality, located across the 359 Kent Street property (part of the Phase I property);
- A former commercial print shop and publication, located on the Phase I property in the 359 Kent Street commercial building;
- A former fuel oil AST and oil furnace, with associated oil staining, located on the Phase I property against the north building face of the 359 Kent Street commercial building;
- The use of road salt on the 359 Kent Street commercial parking area.

Two off-site PCAs, resulting in APECs on the Phase I property, were identified during the historical review. These off-site APECs include:

- The former retail fuel outlet and automotive service garage located at 328 Kent Street (55 metres northwest of the Phase I property).

- The former retail fuel outlet and automotive service garage located at 430 Somerset Street West (50 metres north of the Phase I property).

Other off-site PCAs were identified within the Phase I study area but were deemed not to be of concern based on their separation distances and/or down-gradient or cross-gradient orientations.

Contaminants of Potential Concern

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX);
- Volatile Organic Compounds (VOCs)
- Petroleum Hydrocarbons, fractions 1 - 4 (PHCs F₁-F₄);
- Polychlorinated Biphenyls (PCBs);
- Metals (including Mercury and Hexavalent Chromium);

These CPCs have the potential to be present in the soil matrix and/or the groundwater situated beneath the subject site.

Contaminants of Concern

- Petroleum Hydrocarbons, fractions 2 and 3 (PHCs F₂ and F₃);

Based on a previous Phase II investigation by Jacques Whitford, conducted in 2005, petroleum hydrocarbon concentrations in excess of MECP Table 3 Standards were identified in the soil directly below the former UST location. As such, PHCs are considered to be a known contaminant of concern on the subject site.

Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that there are PCAs and APECs associated with the subject site. The presence of these PCAs were confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

8.0 CONCLUSION

8.1 Assessment

Paterson Group was retained by Taggart Realty Management to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 359 Kent Street, 436 and 444 MacLaren Street, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

According to the historical research, the subject site was first developed with residential dwellings in the mid 1890s. A portion of the subject site (359 Kent Street) was redeveloped for commercial use in approximately 1955, with the demolition of residential buildings on the Phase I property and subsequent construction of a six-storey commercial use building, presently on site. Imported fill material used as part of the redevelopment process at this time is considered to represent an APEC on the subject site.

The 359 Kent Street building was identified to have a historical UST, located near the northeast building corner of 359 Kent Street on the Phase I property. The presence of the former UST is considered to represent an APEC on the Phase I property. A Phase II ESA was conducted in 2005 to assess the soil and groundwater in the vicinity of the former UST location. Based on the analytical results, petroleum hydrocarbon impacted soil (PHC fractions F2 and F3) was identified. As a result, PHCs are considered to be a known contaminant of concern (COC) on the subject site.

Residential buildings on the Phase I property, 436 and 444 MacLaren Street, were repurposed as commercial offices in the early 1960s.

Neighbouring lands in the vicinity of the subject site have historically been used for residential and commercial purposes. Potentially contaminating activities within the Phase I study area include former and/or current: retail fuel outlets, commercial cleaners, commercial dry cleaners, commercial print shops, automotive repair garages, and commercial car rentals. Based on their separation distance from the subject site, downgradient or cross-gradient orientation, and previous environmental assessments relating to site redevelopment, many of these off-site PCAs are not considered to represent APECs on the Phase I property.

Following the historical review, a site inspection was conducted to assess the present-day environmental conditions of the subject site. The property addressed

359 Kent Street, located in the southern portion of the site, contains a six-storey multi-tenant commercial building, as well as a small concrete block waste storage shed. An interior transformer, located in a vault in the basement of the 359 Kent Street building, is considered to represent an APEC on the Phase I property. The building is presently heated with natural gas, however, a capped vent pipe from a former AST and associated former oil furnace was identified in the boiler room. No significant concerns were noted with respect to the former AST and oil furnace.

The properties addressed 436 and 44 MacLaren Street, located in the northern portion of the subject site, contain residential dwellings which have since been repurposed and converted into commercial offices. The buildings are currently natural gas heated. No evidence of contamination was identified with respect to former heating methods.

The neighbouring lands within the vicinity of the subject site were generally observed to be used for residential and commercial purposes. Several properties to the northwest of the subject site were historically used as retail fuel outlets, however, based on their separation distances, down-gradient orientation, and previous environmental assessments related to site redevelopment, these properties are not considered to pose an environmental concern to the subject site.

Based on the findings of this Phase I ESA, it is our opinion that **a Phase II – Environmental Site Assessment will be required for the subject site in order to support the filing of a Record of Site Condition.**

8.2 Recommendations

Hazardous Building Materials

359 Kent Street

A Designated Substances and Hazardous Building Materials Assessment report was conducted for the 359 Kent Street building in 2005 by Jacques Whitford, which identified asbestos containing materials, lead-based paints and PCB containing fluorescent light ballasts. This report should be referred to prior to any demolition or renovation activities.

436 and 444 MacLaren Street

Based on the age of the buildings at 436 and 444 MacLaren Street (mid 1890s), asbestos containing building materials (ACMs) and lead-based paints may be present within the structures.

Potential ACMs identified at time of the site inspection include vinyl floor tiles, plaster walls and ceilings, dry-wall joint compound and suspended ceiling tiles.

These building materials were generally observed to be in good condition at the time of the site inspection and do not pose any immediate concern to the occupants of the buildings. An asbestos survey of these buildings should be conducted in accordance with O.Reg. 278/05, under the Occupational Health and Safety Act, prior to any renovation or demolition activities, if one has not already been conducted.

Lead-based paints may be present, on any original or older painted surfaces. The painted surfaces within these buildings were generally observed to be in good to fair condition, and do not pose any immediate concern to the occupants of the buildings. Major work involving lead-based paint or other lead containing products must be done in accordance with O.Reg. 843, under the Occupational Health and Safety Act.

9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Taggart Realty Management. Permission and notification from Taggart Realty Management and Paterson Group will be required prior to the release of this report to any other party.

Bearings are grid, derived from Can-Net 2016 Real Time Network
 GPS observations, MTM Zone 9 (78°30' West Longitude) NAD-83
 (original).

For bearing comparisons, a rotation of 1° 18' 10" counter-clockwise
 was applied to bearings on plans P1, P2, P3, P7.

ELEVATION NOTES

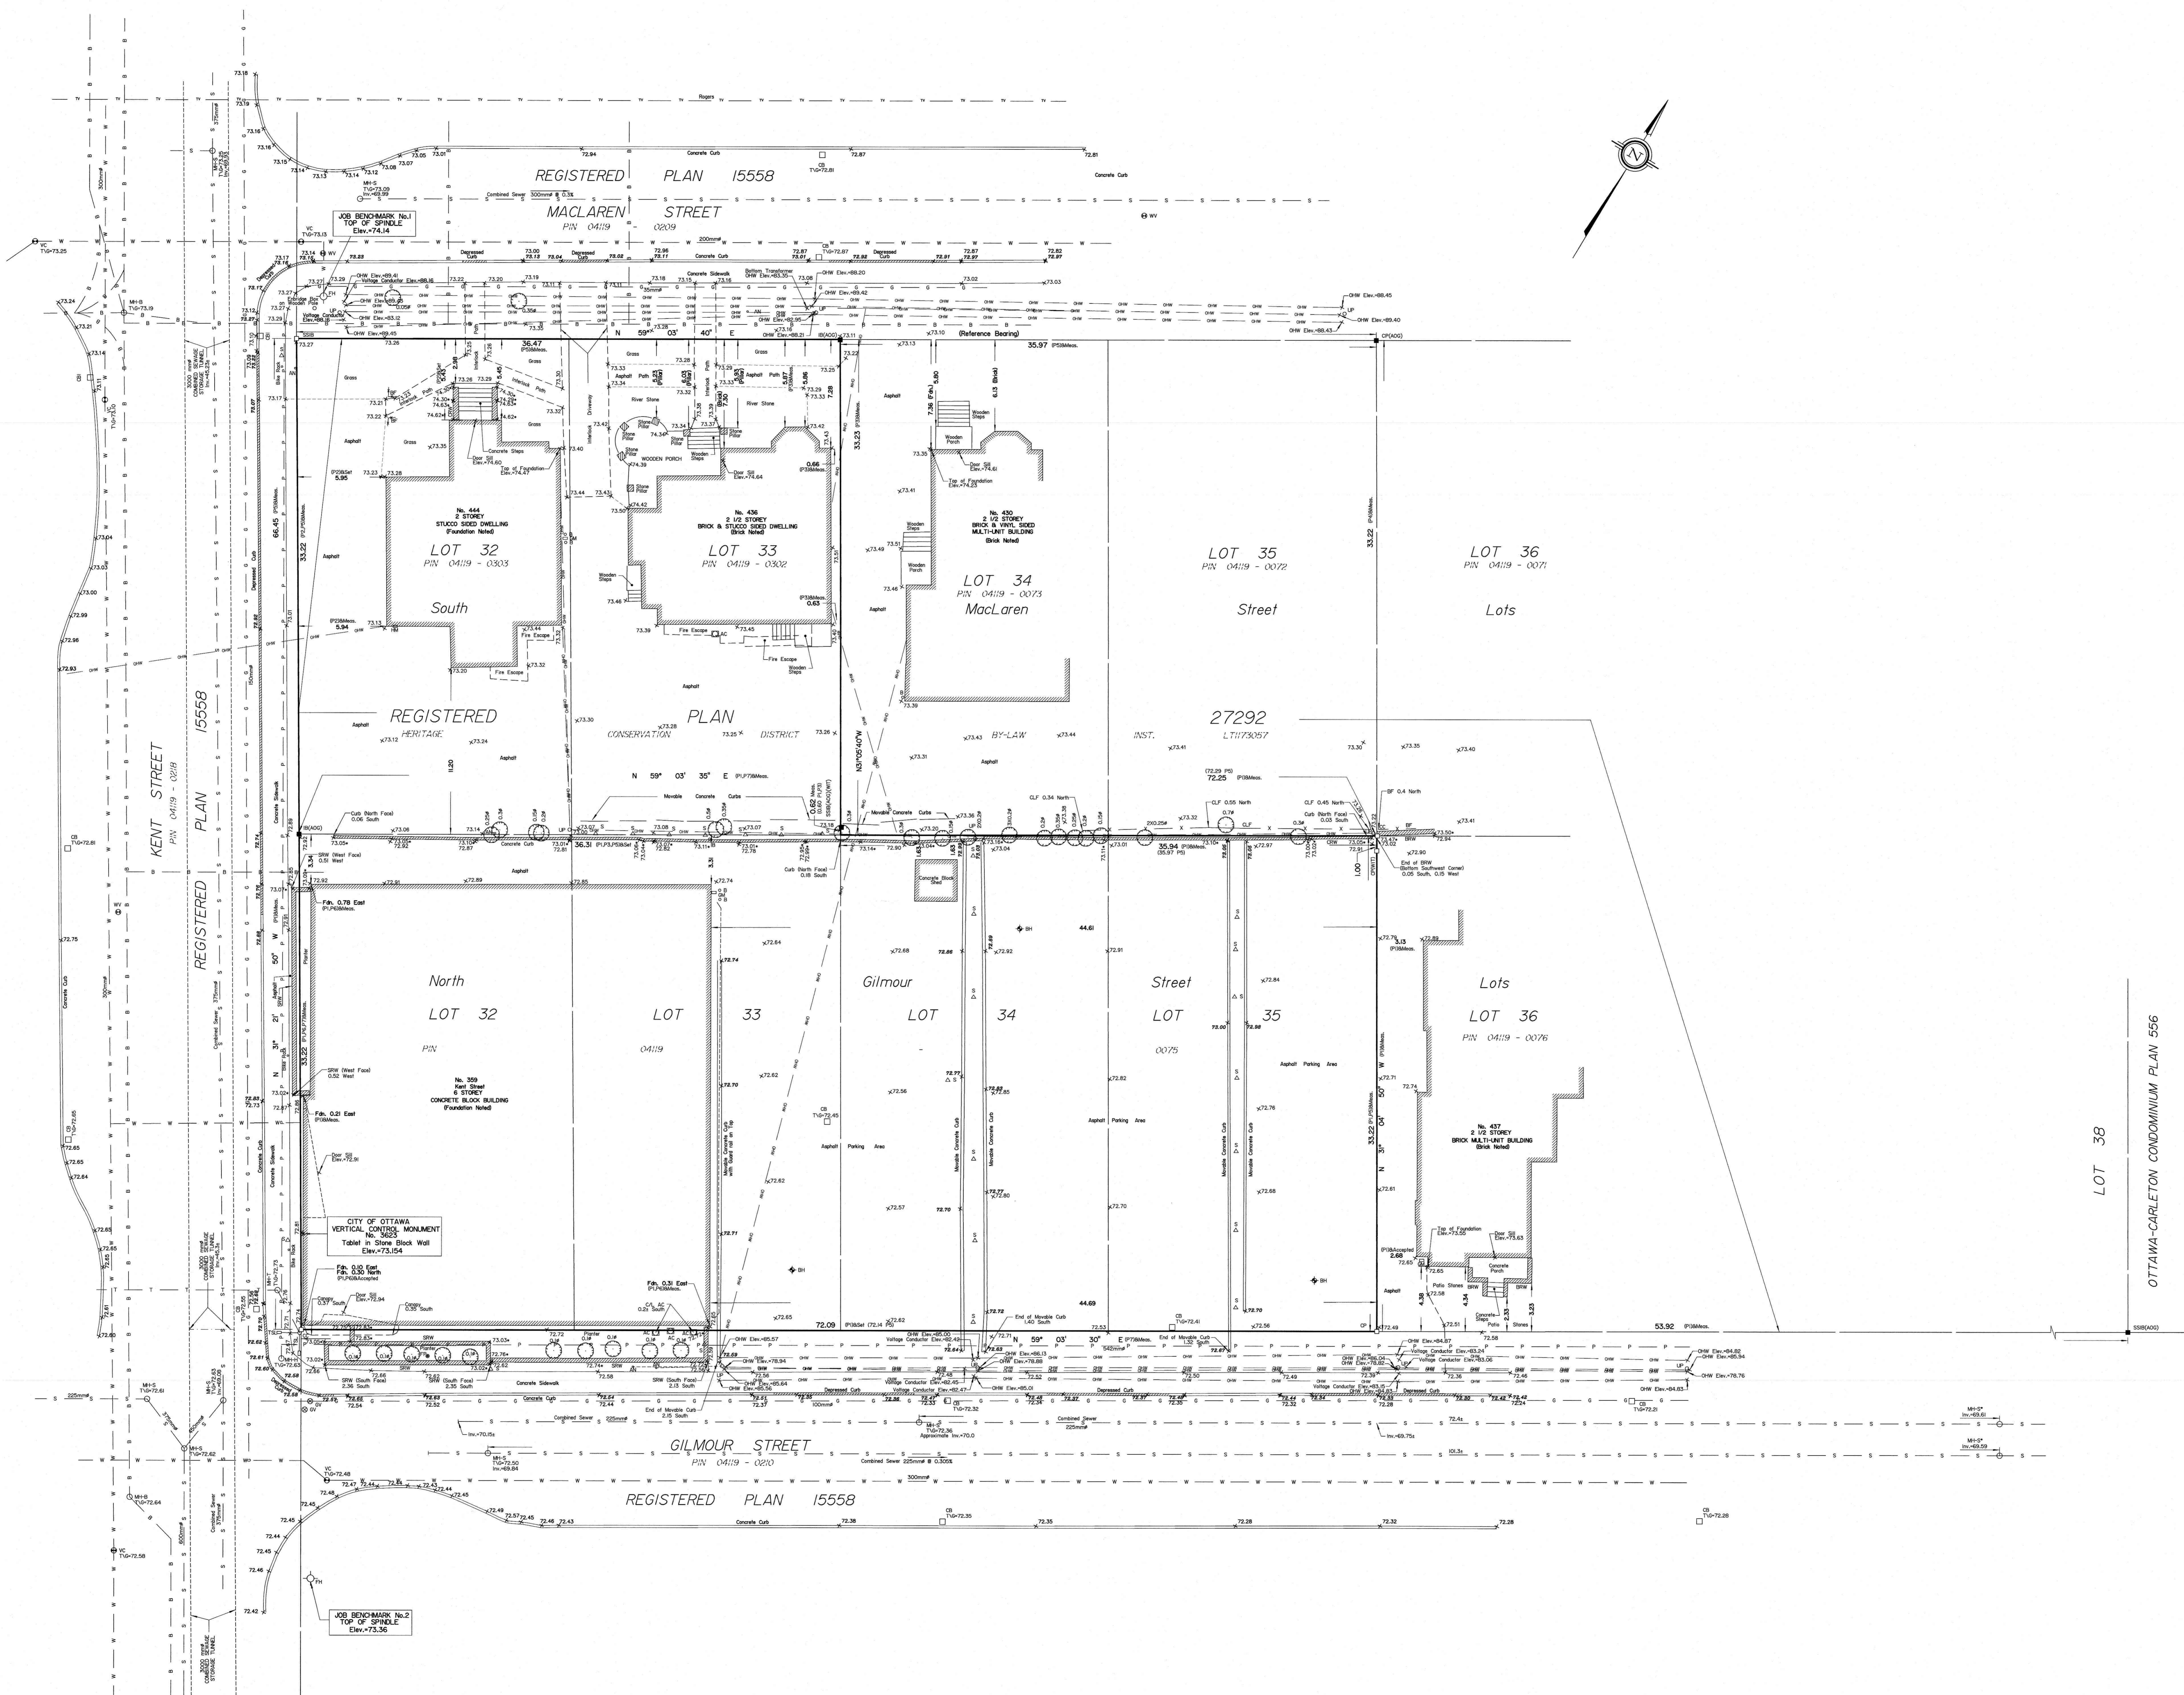

1. Elevations shown are geoidic and are referred to the CGVD28 geoidic datum derived from vertical control monument No. 3623 having an elevation of 73.154 metres.
2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

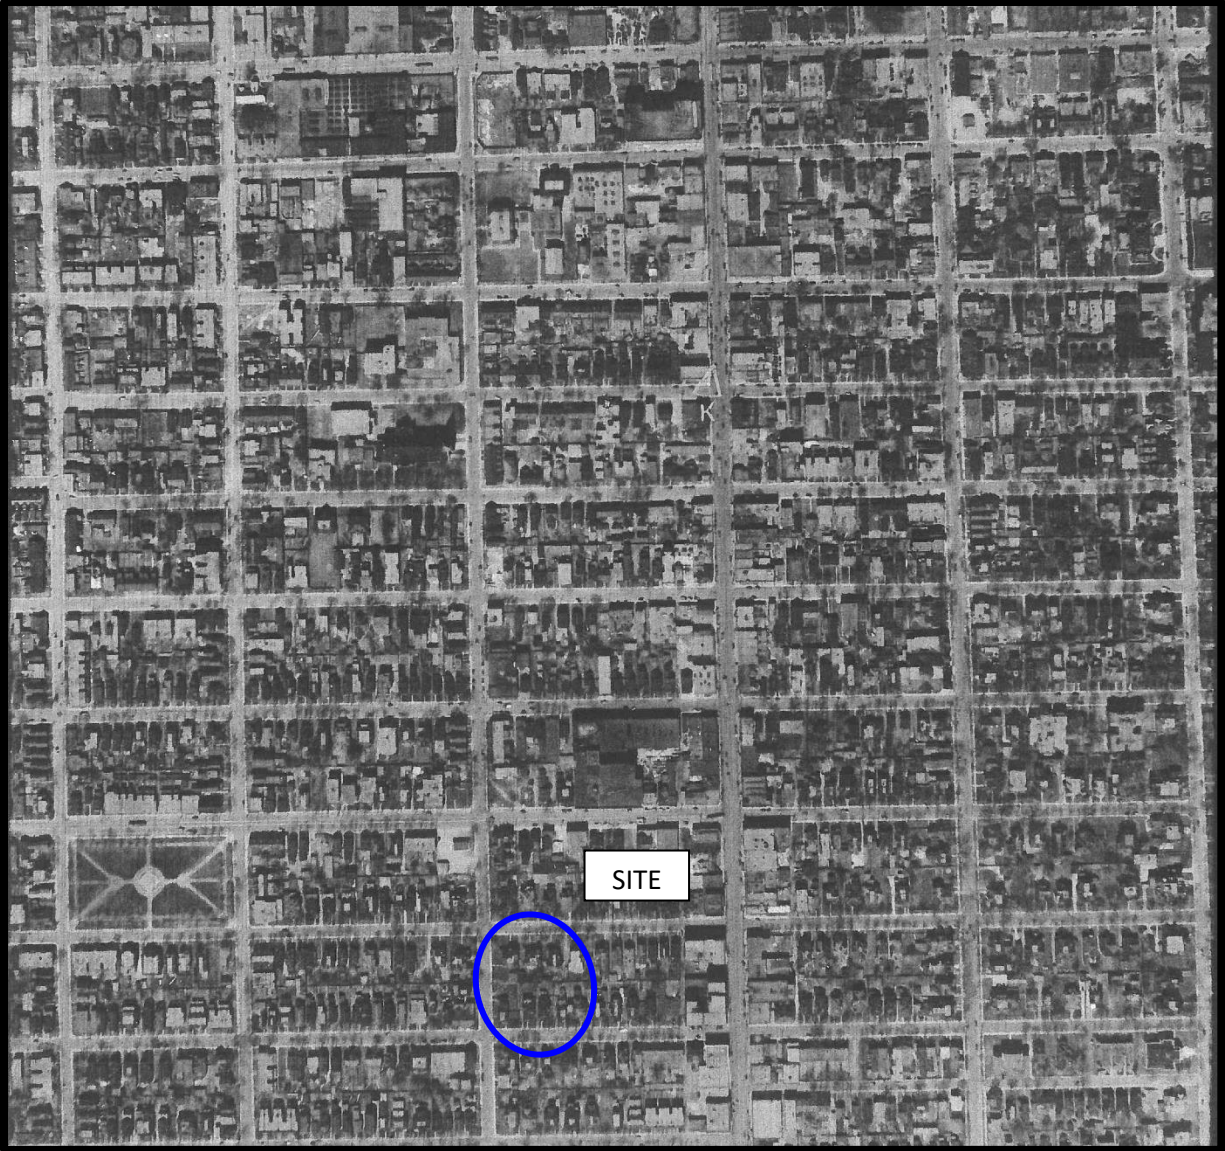

UTILITY NOTES

1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
2. Only visible surface utilities were located.
3. A field location of underground utility by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating, etc.
4. Maintenance Holes s marked by " ". Underground services and inverts are taken from the City of Ottawa Engineering Plans E-12-17, E-12-22, Dwg. No. P921 (Corrected 10/14/2008), Plan No. 1651 (Sheet 2 of 3), Plan No. 2061 (Sheets 1 of 6), Plan No. 2062 (Sheets 2 of 6), Plan H11B-2.

MECP FREEDOM OF INFORMATION

MECP WELL RECORDS

TSSA CORRESPONDENCE

HLUI RESPONSE

ERIS DATABASE REPORT

Freedom of Information and Protection of Privacy Office
40 St. Clair Avenue West, 12th Floor
Toronto ON M4V 1M2
Telephone 416 314-4075

Instructions

Use this form to request records that are in the Ministry's files on environmental concerns related to properties. Our fax number is 416 314-4285.

For Ministry Use Only

Form section for Ministry Use Only containing fields for FOI Request Number, Date Request Received, Fee Paid, and various checkboxes for request types (CNR, ER, NOR, etc.).

1. Requester Data

Form section for Requester Data containing fields for Last Name (Andrechek), First Name (Jesse), Middle Initial (J), Title (Environmental Technician), and Company Name (Paterson Group).

Mailing Address

Mailing Address section containing fields for Unit Number, Street Number (154), Street Name (Colonnade Road South), PO Box, City/Town (Ottawa), Province (Ontario), Postal Code (K2E 7J5), Email Address (jandrechek@patersongroup.ca), Telephone Number (613 226-7381), Fax Number, Project/Reference Number (PE 5204), and Signature of Requester.

2. Request Parameters

Municipal Address (Municipal address mandatory for cities, towns or regions)

Municipal Address section containing fields for Unit Number, Street Number, Street Name (359 Kent Street, 436 and 444 MacLaren Street), PO Box, Lot Number (E), Concession (C), Geographic Township (Nepean), City/Town/Village (Ottawa), Province (ON), and Postal Code (K2P 0M8).

Present Property

Present Property section containing field 1. Owner (Taggart Realty Management) and Date of Ownership.

Previous Property

Previous Property section containing field 1. Owner and Date of Ownership.

3. Search Parameters

Search Parameters	Specify Year(s) Requested
Environmental concerns (General correspondence, occurrence reports, abatement)	All
Orders	All
Spills	All
Investigations/prosecutions ► Owner and tenant information must be provided	2003-Present
Waste Generator number/classes	All
Files older than 2 years may require \$60.00 retrieval cost. There is no guarantee that records responsive to your request will be located.	

4. Environmental Compliance Approvals/Certificates of Approval

Environmental Compliance Approvals/Certificates of Approval	SD	Specify Year(s) Requested
air - emissions	<input checked="" type="checkbox"/>	1986- Present
renewable energy	<input checked="" type="checkbox"/>	1986- Present
water - mains, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster)	<input checked="" type="checkbox"/>	1986- Present
sewage - sanitary, storm, treatment, stormwater, leachate & leachate treatment & sewage pump stations	<input checked="" type="checkbox"/>	1986- Present
waste water - industrial discharge	<input checked="" type="checkbox"/>	1986- Present
waste sites - disposal, landfill sites, transfer stations, processing sites, incinerator sites	<input checked="" type="checkbox"/>	1986- Present
waste systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, PCB destruction	<input checked="" type="checkbox"/>	1986- Present

Proponent information must be provided and Environmental Compliance Approval/Certificate of Approval number(s) (if known). 1985 and prior records are searched manually. Search fees in excess of \$300.00 may be incurred, depending on the types and years to be searched. Specify Approval number(s) (if known). If supporting documents are also required, mark SD box and specify type e.g. maps, plans, reports, etc.

From: Public Information Services <publicinformationsservices@tssa.org>
Sent: March 11, 2021 3:45 PM
To: Jesse Andrechek
Subject: RE: Search Records Request: PE5204

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

NO RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationsservices@tssa.org along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Sherees

Planning Fee

\$128.00

Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Infrastructure and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

Disclaimer
For use with HLUI Database

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Paterson Group ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requester indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

Subject: **Authorization Letter, HLUI Search
Phase I-Environmental Site Assessment
359 Kent Street, 436 and 444 MacLaren Street
Ottawa, Ontario**

Dear Sir or Madame,

Please consider this letter as confirmation that Paterson Group has been retained to conduct a Phase I-Environmental Site Assessment at the aforementioned property.

With this letter, the property owner authorizes the City of Ottawa and other regulatory bodies to release, to Paterson Group, information requested for the purpose of completing an environmental assessment of the property.

Name of Company/Property Owner: Kent MacLaren Co-Tenancy

Name of Representative: Derek Howe

Authorization of Representative: 

Date: March 18, 2021

DATABASE REPORT

Project Property: *PE5204 - Phase I ESA
359 Kent Street, 436 and 444 MacLaren
Street
Ottawa ON K2P 2M8*

Project No: *PE5204*

Report Type: *Standard Report*

Order No: *21031600063*

Requested by: *Paterson Group Inc.*

Date Completed: *March 19, 2021*

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the

Description:

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

Description:

Location:
Region:
Ministry District:

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to pay the fine.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Dec 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jan 31, 2020

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Dec 31, 2020

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jan 31, 2020

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Dec 31, 2020

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Oct 31, 2020

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Sep 2020

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2018

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2020

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2020

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jan 31, 2020

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Dec 31, 2020

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jan 31, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Mar 2020; Jul 2020 - Aug 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Dec 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Adrian Menyhart P.Eng, ing., QP_{esa}

Adrian received his Bachelor of Engineering from Carleton University in 2011, with a specialization in environmental engineering, and joined Paterson Group shortly after graduation. Over the next seven years, Adrian gained significant experience in all aspects of environmental engineering beginning with field work and later, with reporting and project management. In 2018, Adrian joined the National Research Council as an environmental officer, working in the field of polyfluoroalkyl substances (PFAS) at the National Fire Laboratory. Following the National Research Council, Adrian returned to consulting at WSP Canada Inc. At WSP, Adrian assisted the Ottawa environmental group as a project manager, managing large and small federal environmental projects such as the investigations for the proposed Alexandra interprovincial bridge. Finally, after two years away, Adrian returned to Paterson Group as a senior project manager within the environmental department.

Over the course of his career, Adrian has become well versed with environmental site assessments and remediation programs, in both Ontario and Quebec, designated substance surveys, mould assessments and indoor air quality assessments. Adrian has filed multiple Records of Site Condition with the Ontario Ministry of the Environment, Conservation and Parks. Fluently bilingual, Adrian holds engineering licenses in both Ontario and Quebec, as well as being a Qualified Person in the Province of Ontario.
