1.0 EXECUTIVE SUMMARY

Golder Associates Ltd. (“Golder”) was retained by Fengate Development Holdings LP (“Fengate”) to conduct a Phase One Environmental Site Assessment (“Phase One ESA”) of the property located at 1047 Richmond Road, in Ottawa, (the “Phase One Property”).

At the time of the site reconnaissance, conducted on September 13, 2021, the Phase One Property consisted of a 1.0 hectare parcel of commercial land with a Chrysler dealership building situated in the middle of the lot. It is understood that the Phase One Property may be re-developed for residential purposes.

The Phase One ESA was completed in accordance with O.Reg. 153/04 and included a review of available current and historical information, a site visit, an interview, evaluation of readily available information, and reporting, subject to the limitations outlined in Section 9.0 of this report. The Phase One Property is considered an enhanced investigation property as defined by O.Reg. 153/04. The date of last work on the Phase One ESA is September 13, 2021.

Based on the information obtained and reviewed as part of this Phase One ESA, multiple potentially contaminating activities (“PCA”) or areas of potential environmental concern (“APEC”) were identified. Accordingly, a Phase Two ESA is required for the submission of a Record of Site Condition (“RSC”).

A search was conducted using the Access Environment database of the Ministry of the Environment, Parks and Conservation (“MECP”) to locate registrations on the Environmental Activity and Sector Registry, Renewable Energy Approvals and Environmental Compliance Approvals issues from December 1999 onwards. No notable findings were found on the Phase One Property.

2.0 INTRODUCTION

2.1 Phase One Property Information

Golder Associates Ltd. (“Golder”) was retained by Fengate Development Holding LP (“Fengate”) to conduct a Phase One Environmental Site Assessment (“Phase One ESA”) of the following property:

Municipal Address	None
Property Identification Number	03970-0109 (LT)
Legal Description	Part Lots 24 & 25, Concession 1 (OF) Nepean as in N545545, Except Part 1 5R-3653

The location of the Phase One Property is provided in Figure 1. A plan describing the Phase One Property is provided in Figure 2. A plan of survey for the Phase One Property is provided in Appendix A.

The contact information for the Phase One Property owner is:

Owner / Client	Address	Contact Information
Client: Fengate Development Holdings LP	2275 Upper Middle Road East Suite 700, Oakville, Ontario L6H 0C3	Mr. Andrew Konev Office: (905) 491-691-6596 Email: andrew.konev@fengate.com
Phase One Property Owner: Ms. Michelle Pears	1047 Richmond Road Ottawa, Ontario K2B 6R1	Cell: 613 327 5153

3.0 SCOPE OF INVESTIGATION

A Phase One ESA is a preliminary qualitative assessment of the environmental condition of a property, based on a review of current activities and historical information for the Phase One Property and a review of relevant and readily available environmental information for the surrounding properties located within a 250 metre (“m”) radius of the boundary of the Phase One Property (collectively referred to as the “Phase One Study Area”). The boundary of the Phase One Study Area is presented in Figure 2A.

According to Ontario Regulation (“O.Reg.”) 153/04 *Records of Site Condition*, the objectives of a Phase One ESA are to:

- 1) Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property;
- 2) Determine the need for a Phase Two Environment Site Assessment (“ESA”);
- 3) Provide a basis for carrying out a Phase Two ESA;
- 4) Provide adequate preliminary information about environmental conditions in the land or water on, in or under the Site for the conduct of a risk assessment following completion of a Phase Two ESA; and,
- 5) Identify and report on evidence of actual and/or potential contamination on the Phase One Property from current and historical activities at the Phase One Property or the surrounding area.

4.0 RECORDS REVIEW

4.1 General

4.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Phase One Property. Based on Golder’s review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the site visit, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA.

4.1.2 First Developed Use Determination

Based on the Chain of Title, the land was originally transferred from the crown to a private individual in 1804. Between 1804 to present various private owners or entities have owned the land. Based on Fire Insurance Plans,

Chain of Title and the Site Representative Interview, the site use was residential until 1959 which point a car dealership was developed. Accordingly, the first developed use was in 1959 as an automotive dealership.

The date of first developed use of the Phase One Property was determined based on review of the chain of title information, aerial photographs, city directories, EcoLog ERIS Report and information provided by the Site representative.

Based on the Chain of Title, the land was originally transferred from the crown to a private individual in 1804. Between 1804 to present various private owners or entities have owned the land. Based on Fire Insurance Plans, Chain of Title and the Site Representative Interview, the site use was residential until 1959, at which point a car dealership was developed. Accordingly, the first developed use was in 1959 as an automotive dealership.

4.1.3 Insurance Records

Golder asked ERIS EcoLog to provide Opta Information Intelligence report (“Opta”) about any fire insurance plans (“FIPs”), property underwriters’ reports (“PURs”) and property underwriters’ plans (“PUPs”) related to the Site and surrounding properties. Golder was informed by Opta that the following records were available.

Year/Record	Phase One Property	Surrounding Properties
1956 FIP	Rental accommodations (twelve tourist cabins)	North: Canadian Pacific Railway followed by the Ottawa River. East: Commercial and Residential Properties. South: Richmond Road followed by Residential Properties. West: New Orchard Avenue followed by Commercial and Residential Properties.

4.1.4 Chain of Title

Chain of title information for the Phase One Property was obtained from EcoLog ERIS. Previous owners of the Phase One Property have included:

Owner’s Name	Dates of Ownership
Crown	Prior to March 8, 1804
Joseph Boisseau	March 8, 1804 to July 18, 1829
Robert Hallowell	July 18, 1829 to January 31, 1833
George Baker	January 31, 1833 to August 24, 1866
Godfrey Baker	August 24, 1866 to May 26, 1888
George Aiken	May 26, 1888 to December 27, 1889
John B. Ullett	December 27, 1889 to November 17, 1940
Robert L. Ullett	November 17, 1940 to July 3, 1952
Nick Boosamra	July 3, 1952 to October 15, 1956

Owner's Name	Dates of Ownership
Brownlee & McKeown Limited	October 15, 1956 to September 19, 1957
Charles A. Brownlee & Patrick McKeown	September 19, 1957 to August 15, 1958
Northern Garage and Holding Limited	August 15, 1958 to October 9, 1959
Chrysler Corporation of Canada	October 9, 1959 to December 3, 1971
Parkway Chrysler Plymouth Ltd.	December 3, 1971 to April 2, 1982
505432 Ontario Limited (Marinter (Ontario) Ltd.)	Since April 2, 1982

4.1.5 City Directories

Golder asked ERIS EcoLog ("ERIS") to search city directories for the Site and surrounding properties. Relevant findings from the city directory listings are presented below.

Site

- The Phase One Property was not listed between 1925 and 1961.
- The Phase One Property was listed in 1965 to 1982 as Parkway Plymouth Chrysler.
- The Phase One Property was listed in 1984 to 1997 as Metro Plymouth Chrysler.
- The Phase One Property was not listed between 2000 to 2002.
- The Phase One Property was listed in 2005 to 2007 as Metro Chrysler Dodge Jeep.
- The Phase One Property was listed in 2011 at Metro Chrysler Dodge Jeep.

Surrounding Area

- 955 Richmond Road was listed in 1995 to 1997, 2000 to 2002, 2005 to 2007 and 2011 as Ottawa Honda.
- 979 Richmond Road was listed in 1990 to 1992, 1995 to 1997, 2000 to 2002, 2005 to 2007 and 2011 as Tops Car Wash.

A review of the City of Ottawa Historical Land Use Inventory (HLUI) was completed (refer to Appendix E) which included a street directory review.

The HLUI report included the following noteworthy listings for the properties located within the APU Study Area:

- Unnamed Gasoline Service Station (_679F6H) was listed as Gasoline Service Stations in 1956. The business was located at 1051 Richmond Road. Based the FIPs as well as the road orientation of the area, 1051 Richmond Road was located approximately 125 m south-southwest of the Phase One Property.
- Palmer Cleaners (_670HBH) was listed as Laundries and Cleaners in 1980. The business was located at 993 Richmond Road, 101 m northeast of the Phase One Property.
- Booth Collision Centre (_679FFI) was listed as Motor Vehicle Repair Shops from 1998 to 2005. The business was located at 1075 Richmond Road, 116 m southwest of the Phase One Property.

- Tops Car Wash Co. Limited (_679B6X) was listed as Motor Vehicle Repair Shops in 2005. The business was located at 979 Richmond Road, 129 m northeast of the Phase One Property.

4.1.6 Environmental Reports

Golder was not provided with any previous environmental reports for the Phase One Property or neighbouring properties.

4.2 Environmental Source Information

Golder contracted EcoLog Environmental Risk Information Services Ltd. (“EcoLog ERIS”) to conduct a search of environmental sources, including federal, provincial and private sector databases, for information on the Phase One Property and Phase One Study Area. The EcoLog ERIS report is provided in Appendix B. Noteworthy findings of the EcoLog ERIS report are summarized in the following sections.

Site:

The EcoLog ERIS report included the following noteworthy listings for the Site (1047 Richmond Road):

- Metro Plymouth Chrysler Ltd. was registered in 1997 for a Waste Oil Furnace (Model CB-5000);
- It was listed with approval for discharge into the natural environment other than water (i.e. air) in 1997;
- It was registered in 2012 as an Automotive Refinishing Facility and;
- It was listed under hazardous waste generator number ON3489345 as of April 2021 for the generation of waste oil/sludges (petroleum based).

Surrounding Properties:

The EcoLog ERIS report included the following noteworthy listings for 99 New Orchard Ave (30 m northwest):

- Extendicare Canada Inc. was listed under hazardous waste generator number ON9366274 in 2006 for the generation of light fuels and inorganic laboratory chemicals and;
- It was listed under hazardous waste generator number ON3960850 in 2010 for the generation of waste oils & lubricants and oil skimmings & sludges.

The EcoLog ERIS report included the following noteworthy listings for 1162 Byron Ave (60 m east):

- A 200 L spill of furnace oil was reported draining to the floor drain due to a valve failure in 1988.

The EcoLog ERIS report included the following noteworthy listings for 1075 Richmond Road (117 m southwest):

- 715137 Ontario Ltd. was listed with approval for discharge into the natural environment other than water (i.e. air) in 2003; and
- 1866688 Ontario Ltd. was registered in 2012 as an Automotive Refinishing Facility.

The EcoLog ERIS report included the following noteworthy listings for 979 Richmond Road (129 m northeast):

- Tops Car Wash Ltd. was listed under hazardous waste generator number ON8940840 in 2002, 2003 and 2004 for the generation of light fuels and;

- There was an expired license for an underground FS liquid fuel tank from 1992, instance numbers 10906064, 10906049 and 10906031.

4.2.1 Ministry of the Environment

A search was conducted in the Access Environment database of the Ministry of the Environment, Parks and Conservation (“MECP”) to locate registrations on the Environmental Activity and Sector Registry, Renewable Energy Approvals and Environmental Compliance Approvals issues from December 1999 onwards. Notable findings are shown below:

- No registrations or approvals were located within the Site.

4.2.2 Technical Standards and Safety Authority, Fuel Safety Division Records

The Technical Standards and Safety Authority (“TSSA”) maintains records related to registered underground storage tanks (“USTs”) for petroleum-related products. The TSSA was contacted to establish the status of the Phase One Property and to identify outstanding instructions, incident reports, fuel oil spills or contamination records. On September 9, 2021, TSSA reported via e-mail that there were no records on file pertaining to the Phase One Property.

4.3 Physical Setting Sources

4.3.1 Aerial Imagery

Aerial imagery for the Phase One Property and the surrounding area was reviewed by Golder. Information obtained from the review of the aerial photographs is summarized in the following table.

Year	Phase One Property	Surrounding Area
1946	The Site appears to be fully forested land, undeveloped.	North: Forested land followed by railway tracks and the Ottawa River. East: Forested land followed by residential homes. South: Forested land followed by residential homes. West: Residential homes followed by forested land.
1959	Generally as per the 1946 aerial photograph.	Generally as per the 1946 aerial photograph, except for the development of a residential community south of the Site. Residential homes to the west of the site have been removed and the soil has been disturbed.
1965	A large building with parking stalls all around it has been built in the center of the Site.	North: Empty land followed by railway tracks and the Ottawa River. East: Empty land followed by residential homes. South: Residential homes. West: High rise apartment building has been built. There are also two commercial properties.
1976	Generally as per the 1965 aerial photograph.	North: Apartment buildings have been constructed, followed by a highway and Ottawa River. East: Residential homes. South: Residential homes. West: Multiple high rise apartment buildings and commercial properties.

Year	Phase One Property	Surrounding Area
1980	Generally as per the 1976 aerial photograph.	Generally as per the 1976 aerial photograph.
1999	Generally as per the 1980 aerial photograph.	Generally as per the 1980 aerial photograph.
2004-2021	Google Earth Image generally as per the 1999 aerial photograph.	Google Earth Image generally as per the 1999 aerial photograph.

Based on the aerial photographs, the Phase One Property appears to have included a building since at least 1965. Prior to 1965 the Phase one Property was undeveloped. The surrounding properties were being developed since at least 1976 with commercial and residential buildings being constructed. When comparing the aerial photographs to the google images, the google images are generally as per the 1999 aerial photograph from 2004 to 2021. There was no indication that the fill was imported to the Phase One Property.

4.3.2 Topography, Hydrology and Geology

The following records were reviewed to identify topographic, geologic and hydrogeological conditions at the Phase One Property. A topographic map (Ontario Base Map) showing the Phase One Property and the location of any water bodies is provided in Appendix C. Additional information on site features, as observed at the time of the site visit, is provided in Section 6.

Topic	Conditions	Comment / Source
Topography of Site and Surrounding Area	The topography of the Site and surrounding areas was generally flat.	Site and surrounding area observations
Overburden Soils	Till, Plain with local relief <5 m	Surficial Geology of Southern Ontario provided to Golder by LIO
Type of Bedrock	Rockcliffe Formation (Sandstone, Shale, Limestone and Dolostone)	Bedrock Geology of Ontario Map provided to Golder by LIO
Depth to Bedrock	5 to 10 m	LIO
Inferred Near Surface Groundwater Flow	Regional groundwater flow in the underlying aquifers is typically to the north-northwest toward the Ottawa River. Local groundwater flow is also inferred to be to the north-northwest given that the Ottawa River is located 250 m northwest of the Phase One Property. Based on the Site topography, the inferred direction of shallow groundwater flow is to the north-northwest. Buried utilities and other underground structures can affect local (shallow) groundwater flow conditions. Inferred groundwater flow directions are subject to confirmation with field measurements.	Ontario Base Map provided to Golder by LIO

Topic	Conditions	Comment / Source
	At the time of this Phase One ESA, an open cut tunnel for the Ottawa Light Rail Tunnel was located approximately 20 metres south east of the Site. As such, local groundwater flow is may also be influenced by the open cut.	
Site Grade Relative to the Adjoining Properties	The Site appears to follow the topography of the area and is at grade with respect to properties located adjacent to the Phase One Property.	Site observations
Depth to Groundwater	Not identified.	EcoLog ERIS Report

4.3.3 Fill Materials

Topic	Conditions	Comment / Source
Fill Materials	Not identified during Site visit, but fill materials are expected given the age of the site and elevated topography, compared to the adjoining buildings and structures.	Site observations, Site representative

4.3.4 Water Bodies, Areas of Natural Significance, and Groundwater Information

Topic	Conditions	Comment / Source
Nearest Open Water Body	The Ottawa River is located 250 m northwest of the Phase One Property.	Ontario Base Map, Site visit
Areas of Natural Significance (“ANS”)	None identified within the Phase One Study Area.	Ministry of Natural Resources Natural Heritage Information Centre on-line database. Areas of Natural & Scientific Interest Map
Wellhead Protection Areas	The Phase One Study Area is not located within a well-head protection area or other area identified by a municipality in its official plan for the protection of ground water.	MECP Source Protection Atlas, Official Plans
Municipal Drinking Water Distribution Systems	Fire hydrants were observed along Richmond Road and New Orchard Ave, respectively east and south of the Phase One Property. Accordingly, the Phase One Property and other properties within the Phase One Study Area are likely served by a municipal drinking water system, as defined in the Safe Drinking Water Act, 2002.	Google Streetview, Site visit

4.3.5 Well Records

Topic	Conditions	Comment / Source
Water Wells on Site (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling date, use)	Based on the review of well records, there are no wells on the phase one property or within the phase one study area that supply water used for human consumption or an agricultural use.	EcoLog ERIS Report and Site observations
Water Wells on the Neighbouring Properties (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling rate, use)	EcoLog ERIS reported a total of 22 domestic water wells recorded within the Phase One Study Area. The wells were constructed in between 1948 and 1954. Stratigraphy of the wells consisted primarily of clay/medium sand followed by limestone. Groundwater was reported at a depth of between 1.83 to 9.14 mbgs.	EcoLog ERIS Report

4.4 Site Operating Records

At the time of the site visit, the Phase One Property was developed. No Site operating records were provided to Golder for review.

Topic	Title of the information or document	Information Relevant to the Phase One ESA
Regulatory Permits and Records	None	None
Materials Safety Data Sheets (MSDS)	None	None
Underground utility drawings	Building Drawings	Possible service island and a tank farm with unknown number of tanks on the Southeast side of the building.
Inventory of ASTs and USTs	Site Visit	Four ASTs located on the northwest building wall and one removed UST on the northeast exterior building wall.
Environmental monitoring data, including data created in response to an order or request of the Ministry	Not available	None
Waste management records, including current and historical waste storage location and waste receiver information maintained by the Ministry	EcoLog ERIS	<u>Ontario Regulation 347 Waste Generators Summary</u> : This document indicated that waste oil/sludges (petroleum based) are generated at the Phase One Property. The Phase One Property is a registered waste generator under waste generator number ON3489345.

Topic	Title of the information or document	Information Relevant to the Phase One ESA
Process, production and maintenance documents related to APECs	Not available	Not available
Records of spills and records of discharges of contaminants, including records of spills and records of discharges of contaminants of which notice is required to be given to the Ministry under the Act and records of such spills and discharges required to be kept pursuant to O.Reg. 675/98	Not available	None
Emergency response and contingency plans, including spill prevention and contingency plans prepared pursuant to section 91.1 of the Act, and O.Reg. 224/07	Not available	None
Environmental audit reports	Not available	None
A Site plan of the facility	Not available	None

5.0 INTERVIEWS

Mrs. Michele Pears and Mr. Peter Pears of Metro Chrysler (hereinafter referred to as the “Site Representative”), responded to a detailed environmental questionnaire on September 13, 2021. Pursuant to the requirements O.Reg. 153/04, the Site Representative was interviewed as the “current owner” with knowledge of current Site operations.

Relevant information obtained during the interview and site visit is provided in the Section 6.0.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

Mr. Gopesh Sharma (Environmental Scientist) of Golder visited the Phase One Property for three hours on September 13, 2021 at 6:00 pm. Mr. Sharma has a B.Sc. (Geology) from the University of Calgary and has two years of consulting experience. The site visit consisted of a walk-around of the developed areas of the Phase One Property along with a cursory inspection of surrounding properties from the Phase One Property and publicly accessible areas. The weather conditions were clear and sunny and the temperature was 21°C. The Phase One Property is a Chrysler new and used car dealership with an associated garage, body shop and paint booth. It was used to sell and service vehicles at the time of the site visit.

Photographs of relevant features noted during the site visit are provided in Appendix D.

6.2 Specific Observations at Phase One Property

The specific observations made during the Site visit are presented in the following sections.

Topic	Observations	Source
Structures Number and Age of Buildings on the Site	A single large building was located at the center of the Phase One Property. The building was built in 1964 according to the Site Representative.	Site observations
General Descriptions of Each Building (including improvements)	The building was used as an office, showroom, mechanical shop/garage, body shop, paint booth and vehicle storage.	Site observations
Building Areas	Approximately 1600 square meters.	Site observations
Number of Floors (include all levels, whether above or below ground)	Two floors.	Site observations
Number, Age, and Depth of Levels Below Ground Level	There are no levels below ground.	Site observations
Number and Details of all Aboveground Storage Tanks (“ASTs”)	Four ASTs were observed on the Phase One Property.	Site observations, Site representative
Number and Details of all Underground Storage Tanks (“USTs”)	One UST was reported on the Phase One Property. However, it was removed in the late 1980’s according to the Site Representative. Unknown USTs might be present on the southeast side of the building along Richmond Rd.	Site observations, Site representative, Site buildings plans
Underground Utilities Potable and Non-Potable Water Sources	The Project Area is underlain by a full suite of municipal services including sewer, water, gas and communication.	Site representative
Utility Lines Present (i.e. Electrical, Natural Gas, other)	The Project Area presents municipal services including sewer, water, gas and communication. Along the west entrance into the parking lot there are four transformers suspended 6 m in the air on a wooden platform. They are attached to the municipal electrical system.	Site observation, Site representative
Sanitary/Process Wastewater Receptor	The Project Area presents municipal services including sewer, water, gas and communication. Building drawings shows a possible OWS, not located during site visit.	Site observations
Sanitary Sewer Connection	The Project Area presents municipal services including sewer, water, gas and communication.	Site observations, Site representative

Topic	Observations	Source
Septic Systems	None identified.	Site observations, Site representative
Storm Water Flow	Storm water drains are located throughout the Phase One Property.	Site observations
Storm Sewer Connection	The Project Area presents municipal services including sewer, water, gas and communication.	Site observations, Site representative
<u>Interior of Structures</u> Entry and Exit Points for Site Buildings	There are entry and exit points located along each side of the building.	Site observations
Existing and Former Heating System(s) (include fuel type / source)	The office and showroom of the building is heated by a gas furnace. The mechanic shop/garage is heated by a gas radiant heat system.	Site observations, Site representative
Existing and Former Cooling System(s) (include fuel type / source)	There is a forced air A/C system used to cool the building.	Site observations, Site representative
Drains, Pits, and Sumps (include current use, if any, and former use)	There are catch basins running along the length of the garage floor, connecting with the municipal sewage/stormwater systems.	Site observations, Site representative
Unidentified Substances	None identified.	Site observations
Floor Stains or Corrosion Located near a Potential Discharge Location	Floor stains were observed throughout the garage floor. Floor stains were also observed along the northwest exterior side of the building.	Site observations
<u>Miscellaneous Exterior</u> Location of any Current and Former Wells	None identified.	Site observations
Ground Cover (i.e. grass, gravel, soil, or pavement, etc.)	The majority of the Phase One Property was covered with pavement. Storm and sewer drains scattered throughout the site.	Site observations
Current or Former Railway Lines or Spurs	None observed or reported.	Site observations.
Presence of Stained Soil, Vegetation, or Pavement	Stained pavement, northwest exterior of the building.	Site observations
Presence of Stressed Vegetation	None observed.	Site observations
Areas Where Fill and/or Debris Materials Appear to Have Been Placed	None observed.	Site observations, Site representative

Topic	Observations	Source
Issues of Potential Environmental Concern	Oil stains on the pavement, hydraulic lifts, paint booth and mixing station, former USTs locations, four ASTs, one UST and transformers in parking lot	Site observations
Unidentified Substances	None identified.	Site observations

6.2.1 Enhanced Investigation Property

The Site is considered to be an enhanced investigation property; therefore, the investigation was conducted in a manner consistent with the requirements for enhanced investigation properties as described in subsection 13(3) of O.Reg. 153/04. Relevant information is reported in the following table:

Topic	Observations	Source
Operations at the property, including processing or manufacturing	The Phase One Property is used solely as a car dealership. No processing or manufacturing processes were observed or reported.	Site observations and interview
Hazardous materials used or stored at the Phase one property	Engine oil and other lubricants associated with vehicle maintenance. Asbestos ceiling tiles, adhesive and plaster were observed throughout the building.	Site observations and interview
Products manufactured at the Phase one property;	None observed or reported.	Site observations and interview
By-products and wastes at the Phase one property	One AST holding waste oil.	Site observations and interview
Raw materials handling and storage locations at the Phase one property	None observed or reported.	Site observations and interview
Location and contents of drums, totes and bins at the Phase one property	One AST is located outside the building along the northwest corner, it contains the waste oil. Three ASTs are located inside the building on the northwest side, they contain engine oil. A tote is suspended from the ceiling and is located inside the building on the northwest side, it contains windshield washer fluid.	Site observations and interview
The location, installation date, source of incoming liquid and effluent discharge location for all oil-water separators	None observed or reported. Building drawings show a OWS, but it was not identified during the Site visit.	Site observations, interview and building drawings

Topic	Observations	Source
All vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas	The main mechanic shop/garage is located along the east side of the building. It runs southeast to northwest, the full length of the building. Within the shop there are fifteen hoists including one hydraulic lift, a paint booth, a paint mixing room, and a washing bay. One AST is located outside the building along the northwest corner, it contains the waste oil. Three ASTs are located inside the building on the northwest side, they contain engine oil. A tote is suspended from the ceiling and is located inside the building on the northwest side, it contains windshield washer fluid.	Site observations and interview
Details of all spills including the dates, locations, materials involved, and volumes of material spilled;	None observed or reported.	Site observations and interview
Details of liquid discharge points such as water and French drains, including their locations	None observed or reported.	Site observations and interview
Details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks	There is a single hydraulic lift used as the alignment rack located inside the mechanic shop/garage with no hydraulic piston (not in-ground). Two decommissioned hydraulic pistons were observed in other two service bays. No other in-ground hydraulic pistons were observed.	Site observations and interview

6.3 Surrounding Land Use

During the Site visit, a visual reconnaissance of the outdoor operations in the Phase One Study Area was carried out from the Site and publicly accessible areas.

The surrounding properties include residential and commercial land uses, as illustrated in Figure 2.

- **North (downgradient):** Residential dwellings followed by green space and the Ottawa River.
- **East (cross-gradient):** Residential dwellings.
- **West (cross gradient):** Residential dwellings.
- **South (upgradient):** Commercial properties followed by residential dwellings.

6.4 Written Description of Investigation

At the time of the Site reconnaissance, conducted on September 13, 2021, the Phase One Property consisted of a 0.97 hectare parcel of developed land. One large building that was used as an office, showroom, mechanical shop/garage, and storage for a car dealership was centered in the parcel and was noted on the Phase One

Property. The surrounding properties within the Phase One Study Area included residential and commercial land uses.

Please see section 7.2 for a detailed list of all the identified PCAs found in the Phase One Study Area.

No water wells were identified within the Phase One Study Area.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses of the Site

The following summarizes the current and past uses of the Phase One Property:

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to March 8, 1804	Crown	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
March 8, 1804 to July 18, 1829	Joseph Boisseau	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
July 18, 1829 to January 31, 1833	Robert Hallowell	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
January 31, 1833 to August 24, 1866	George Baker	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
August 24, 1866 to May 26, 1888	Godfrey Baker	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
May 26, 1888 to December 27, 1889	George Aiken	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
December 27, 1889 to November 17, 1940	John B. Ullett	Undeveloped	Agriculture or Other	No aerial photograph coverage available prior to 1946.
November 17, 1940 to July 3, 1952	Robert L. Ullett	Undeveloped	Agriculture or Other	The aerial photograph from 1946 indicates that the Site comprised primarily of undeveloped commercial land.
July 3, 1952 to October 15, 1956	Nick Boosamra	Undeveloped	Agriculture or Other	The aerial photograph from 1946 indicates that the Site comprised primarily of undeveloped commercial land.
October 15, 1956 to September 19, 1957	Brownlee & McKeown Limited	Undeveloped	Agriculture or Other	The aerial photograph from 1946 indicates that the Site comprised primarily of undeveloped commercial land.
September 19, 1957 to August 15, 1958	Charles A. Brownlee & Patrick McKeown	Undeveloped	Agriculture or Other	The aerial photograph from 1946 indicates that the Site comprised primarily of undeveloped commercial land.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
August 15, 1958 to October 9, 1959	Northern Garage and Holding Limited	Undeveloped	Agriculture or Other	The aerial photograph from 1959 indicates that the Site comprised primarily of undeveloped commercial land.
October 9, 1959 to December 3, 1971	Chrysler Corporation of Canada	Developed	Commercial	The aerial photograph from 1965 indicates a large commercial building has been built on the Site.
December 3, 1971 to April 2, 1982	Parkway Chrysler Plymouth Ltd.	Developed	Commercial	The aerial photograph from 1965, 1971 and 1980 indicates a large commercial building has been built on the Site.
Since April 2, 1982	505432 Ontario Limited (Marinter (Ontario) Ltd.)	Developed	Commercial	The aerial photograph from 1980 indicates a large commercial building has been built on the Site.

The Phase One Property was previously used for commercial or other use since prior to 1946 to the present. The Phase One Property is currently an active car dealership.

7.2 Potentially Contaminating Activity

Any PCA on the Phase One Property or in the Phase One Study Area may require the identification of an area of potential environmental concern (“APEC”) and trigger the need for a Phase Two ESA to support the filing of a Record of Site Condition. The PCAs identified at the Phase One Property and in the Phase One Study Area are provided in the following table. The PCA locations are presented in Figure 2A.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Phase One Property	PCA A: #10 Commercial Autobody Shops – The Site is currently used as a car dealership and has an automotive garage and associated equipment present	Site observations	The PCA is located on the Phase One Property and must be identified as an APEC.
Phase One Property	PCA B: #28 Gasoline and Associated Products Storage in Fixed Tanks – Former UST areas identified on the Site.	Site observations, Site representative and building drawings	The PCA is located on the Phase One Property and must be identified as an APEC.
Phase One Property	PCA C: #28 Gasoline and Associated Products Storage in Fixed Tanks – Presence of one AST used waste lubricant oil, three motor lubricant oil ASTs and oil-stained asphalt	Site observations	The PCA is located on the Phase One Property and must be identified as an APEC.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Phase One Property	PCA D: #39 Paints Manufacturing, Processing and Bulk Storage – Presence of painting operations (paint booth)	Site observations	The PCA is located on the Phase One Property and must be identified as an APEC.
Phase One Property	PCA E: #30 Importation of Fill Material of Unknown Quality – Due to the age of the Site, inferred fill materials to be present site-wide	Site observations	The PCA is located on the Phase One Property and must be identified as an APEC.
Phase One Property	PCA F: #55 Transformer Manufacturing, Processing and Use – Pole mounted transformer and fuse box	Site observations	The PCA is located on the Phase One Property and must be identified as an APEC.
Phase One Study Area (excluding the Phase One Property)	PCA G: #46 Railyards, Tracks and Spurs – A Canadian National Railway corridor was located 350 m north of the Phase One Property	Aerial photographs 1946, 1959 and 1965	The nature of impacts associated with this PCA typically do not migrate through groundwater and are not anticipated to impact the Phase One Property. The tracks are also located downstream of the Phase One Property.
	PCA H: #28 Gasoline and Associated Products Storage in Fixed Tanks – A former gas station was reported at 1051 Richmond Road (130 m southwest)	HLUI – 1956 FIPs - 1956	Based on the cross-gradient location of this PCA to the Site and the distance from the Site, the presence of this PCA is unlikely to impact the Phase One Property
	PCA I: #37 Operation of Dry-Cleaning Equipment (where chemicals are used) – A former Laundry cleaning facility was reported at 993 Richmond Road, 101 m northeast of the Phase one Property	HLUI – 1980's	Based on the cross-gradient location of this PCA to the Site, the distance from the Site, and the nature of the impacts associated with this PCA, the presence of this PCA is unlikely to impact the Phase One Property
	PCA J: #10 Commercial Autobody Shops – A automotive repair shop is located at 1075 Richmond Road, 116 m southwest of the Phase One Property	HLUI – Since at least 1998	Based on the cross-gradient location of this PCA to the Site, the distance from the Site, and the nature of the impacts associated with this PCA, the presence of this PCA is unlikely to impact the Phase One Property
	PCA K: #28 Gasoline and Associated Products Storage in Fixed Tanks – Extencicare, located at 99 New Orchard Ave 30 m northwest of the Phase One Property, was a waste generator in 2006 and 2010 for light fuels & inorganic laboratory chemicals, waste oils & lubricants and oil skimmings & sludges.	EcoLog ERIS report	Based on the cross-gradient location of this PCA to the Site, and the nature of the impacts associated with this PCA, the presence of this PCA is unlikely to impact the Phase One Property

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
	PCA L: #55 Transformer Manufacturing, Processing and Use – Transformer located approximately 125 m northwest of the Phase One Property, along New Orchard Ave.	FIPs, 1956	Based on the down gradient location of this PCA to the Site and the distance from the Site, this PCA is unlikely to impact the Phase one Property
	PCA M: #10 Commercial Autobody Shops – Tops Car Wash Co. Limited is located at 979 Richmond Road, 129 m northeast of the Phase One Property. It was listed as a motor vehicle repair shop in 2005, had a UST associated with it till at least 1992 and was a waste generator for light fuels from 2002-2004.	EcoLog ERIS report	Based on the cross-gradient location of this PCA to the Site, the distance from the Site and the nature of the impacts associated with this PCA, the presence of this PCA is unlikely to impact the Phase One Property

7.3 Areas of Potential Environmental Concern

The APECs identified at the Phase One Property are provided in the following table. The APEC locations are presented in Figure 2B.

Area of Potential Environmental Concern ¹	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern ³	Media Potentially Impacted (Groundwater, soil and/or Sediment)
APEC 1 – On-site automotive garage	Centre of the Site	<i>#10. Commercial Autobody Shops</i>	On-Site	PHCs F1-F4, BTEX and VOCs	Soil and groundwater
APEC 2A – Former UST location	Northeast portion of the Site building	<i>#28. Gasoline and Associated Products Storage in Fixed Tanks</i>	On-Site	PHCs F1-F4 and BTEX	Soil and groundwater
APEC 2B – Former UST location	Southeast portion of the Site building				Soil
APEC 3 – Presence of an AST used waste lubricant oil and oil-stained asphalt	Northeast portion of the Site building	<i>#28. Gasoline and Associated Products Storage in Fixed Tanks</i>	On-Site	PHCs F1-F4 and BTEX	Soil and groundwater
APEC 4 – Presence of painting operations (paint booth)	Northeast and Northwest of the Site building	<i>#39. Paints Manufacturing, Processing and Bulk Storage</i>	On-Site	Metals, Hydride-Forming Metals, ORP, VOCs and PHCs	Soil and groundwater

Area of Potential Environmental Concern ¹	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern ³	Media Potentially Impacted (Groundwater, soil and/or Sediment)
APEC 5 – Inferred fill materials to be present site-wide	Entire Site	# 30. Importation of Fill Material of Unknown Quality	On-Site	Metals, Hydride-Forming Metals, ORP and PHCs	Soil
APEC 6 – Pole mounted transformer and fuse box	Four pole-mounted transformers were observed on the driveway of New Orchard Ave.	#55. Transformer Manufacturing, Processing and Use	On-Site	PCBs, PHCs	Soil

Notes

- 1 Area of potential environmental concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through, •(a) identification of past or present uses on, in or under the phase one property, and •(b) identification of potentially contaminating activity
- 2 Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
- 3 Contaminants of potential concern specified using the method groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011

7.4 Conceptual Site Model

The following key features (as required by O.Reg. 153/04) are presented in Figures 1, 2, 3, and 4:

- Existing buildings and structures;
- Water bodies and areas of natural significance located in the Phase One Study Area;
- Drinking water wells on the Phase One Property;
- Roads (including names) within the Phase One Study Area;
- Uses of properties adjacent to the Phase One Property; and,
- Location of identified PCAs in the Phase One Study Area (including any storage tanks).

The following describes the Phase One ESA CSM based on the information obtained and reviewed as part of this Phase One ESA:

- The Phase One Property consisted of one parcels of land that is 0.97 hectares in area. One large building was present, centered on the parcel;
- No water bodies or areas of natural significance were identified on or within 30 m of the Phase One Property;
- Potable water in the vicinity of the Phase One Property is provided by the Regional Municipality of Ottawa. No potable water wells were identified on the Phase One Property. No active domestic wells were reported on or near the Phase One Property;

- At the time of the Phase One ESA, the Phase One Property was developed and used as a car dealership. Historically, the Phase One Property had been undeveloped since at least 1959. Between 1960 and 1965 the Phase One Property was developed for the purpose of a car dealership;
- At the time of the Phase One ESA, the neighbouring properties within the Phase One Study Area consisted of residential and commercial land uses. There are indications of a potentially contaminating activity but none that would warrant an area of potential environmental concern in association with this use;
- The following PCAs requiring the identification of an APEC and the associated contaminants of concern were identified:

Area of Potential Environmental Concern ¹	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern ³	Media Potentially Impacted (Groundwater, soil and/or Sediment)
APEC 1 – On-site automotive garage	Centre of the Site	<i>#10. Commercial Autobody Shops</i>	On-Site	PHCs F1-F4, BTEX and VOCs	Soil and groundwater
APEC 2A – Former UST location	Northeast portion of the Site building exterior	<i>#28. Gasoline and Associated Products Storage in Fixed Tanks</i>	On-Site	PHCs F1-F4 and BTEX	Soil and groundwater
APEC 2B – Former UST location	Southeast portion of the Site building exterior				
APEC 3 – Presence of an AST used waste lubricant oil and oil-stained asphalt	Northeast portion of the Site building exterior	<i>#28. Gasoline and Associated Products Storage in Fixed Tanks</i>	On-Site	PHCs F1-F4 and BTEX	Soil and groundwater
APEC 4 – Presence of painting operations (paint booth)	Northeast and Northwest of the Site building	<i>#39. Paints Manufacturing, Processing and Bulk Storage</i>	On-Site	Metals, Hydride-Forming Metals, ORP, VOCs and PHCs	Soil and groundwater
APEC 5 – Inferred fill materials to be present site-wide	Entire Site	<i># 30. Importation of Fill Material of Unknown Quality</i>	On-Site	Metals, Hydride-Forming Metals, ORP and PHCs	Soil
APEC 6 – Pole mounted transformer and fuse box	Four pole-mounted transformers were observed on the driveway of New Orchard Ave.	<i>#55. Transformer Manufacturing, Processing and Use</i>	On-Site	PCBs, PHCs	Soil

- Underground utilities are known to be present at the Phase One Property;

- Based on well records from ERIS EcoLog, soil at the Phase One Property consists primarily of clay and medium grained sand followed by limestone; and
- Regional groundwater is anticipated to flow in a north-northwest direction towards the Ottawa River (300 m northwest). Local groundwater is anticipated to flow in a similar direction towards the Ottawa River.

Responses to Golder's requests for information from the MOECC, MNR, Region, and Town were not available at the time of writing this report.

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

8.0 CONCLUSIONS

8.1 Need for a Phase Two ESA

Based on the information obtained and reviewed as part of this Phase One ESA, six APECs were identified at the Phase One Property. Accordingly, a Phase Two ESA is required to support the submission of an RSC.

10.0 LIMITATIONS AND USE OF REPORT

This report (the “Report”) was prepared for the exclusive use of Fengate Developments Holdings LP for the express purpose of providing advice with respect to the environmental condition of the Site. In evaluating the Site, Golder Associates Ltd. (“Golder”) has relied in good faith on information provided by others as noted in the Report. We have assumed that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatement or inaccuracy contained in this Report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or incomplete or inaccurate historical information from the various agencies. Any use which a third party makes of this Report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third party. If a third party requires reliance on this Report, prior written authorization from Golder is required. Golder disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of Golder’s assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within Golder’s proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. Golder did not perform a complete assessment of all possible conditions or circumstances that may exist at the site referenced in the Report. Conditions may therefore exist which were not detected given the limited nature of the assessment Golder was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the Report. Golder’s opinions are based upon information available to Golder as of the date of the Site visit. It is understood that the services provided for in the scope of work allowed Golder to form no more than an opinion of the actual conditions at the Site at the time of the site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. Consult with a natural heritage specialist to confirm whether an area of natural significance may be present. If a service is not expressly indicated, do not assume it has been provided.

The results of an assessment of this nature should in no way be construed as a warranty that the Site is free from any and all contamination from past or current practices.

11.0 CLOSURE

The Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust that the information presented in this report meets your current requirements. Should you have any questions or concerns, please do not hesitate to contact the undersigned.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994- Jul 31, 2021

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jun 30, 2021**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994- Jul 31, 2021**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jun 30, 2021**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jun 30, 2021**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jul 31, 2021

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jun 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994- Jul 31, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jun 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Opta Historical Environmental Services EnviroscanTM Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

NOTE: The sole purpose of this report is to provide insurance pricing and underwriting information about the particular insured and location named. Only the person requesting this survey will receive a copy of the report, and IAO asks that it be kept strictly confidential. This report does not guarantee compliance with any standards or with any federal, provincial or municipal codes, ordinances or regulations. Tests of fire and other protection equipment have not been conducted or witnessed during this survey.

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from a survey of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications, referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any loss or damages, whether consequential or other, however caused, incurred or suffered, as a result of the services being provided.

METRO PLYMOUTH CHRYSLER 1047 RD RICHMOND; OTTAWA, ONTARIO

- * Heating appliances - All enclosed in a separate room
- * Combustible materials - Not stored in this room at time of survey
- * Fuel Tanks/Supply:
 - Supply - UG Natural Gas Connection
- * Chimneys:
 - Type B Gas Vent, ULC Labelled - Standard

ELECTRICAL:

- * Condition - Good and appeared safe at the time of the survey.
- * Wiring - Conduit, BX
- * Overcurrent protection - Circuit Breakers.
- * Electrical system - Original installation.

PLUMBING:

- * Condition - Good at the time of the survey.
- * Piping is Copper
- * Plumbing - Original installation.

EXPOSURES: (within 15m of the risk):

- * FRONT: OPEN
- * REAR: OPEN
- * LEFT: OPEN
- * RIGHT: OPEN

MUNICIPAL PROTECTION:

- * The FUS Public Fire Protection Classification is 3
- * Responding (career) fire department Ottawa
- * Distance from risk Less than 2.5 km
- * Access via Paved roads. Year-round.
- * The building itself is easily accesible to the fire department.
- * Two hydrants within 155m (standard)

M U L T I R I S K - B A S I C C R I M E

NEIGHBOURHOOD:

- * Predominantly commercial, residential
- * Stable
- * Best described as having a moderate crime rate

BUSINESS:

- * Description - Automobile dealership with repairs and body shop
- * Hours of Operation - 7:30 am. - 9:00 pm. Mon. - Fri. 9:00 am. - 6:00 pm. Sat.
- * Typical Stock - New and used vehicles (new vehicles are not owned) auto parts
- * Target Stock Details - As above
- * Smash and Grab exposure is moderate
- * There is a safe on the premises

GENERAL PROTECTION at the time of this survey:

- * The following appeared to be SATISFACTORY:
 - Exterior Lighting, Interior Lighting, Roof Accessability, Police Patrols
- * The following were found to be UNSATISFACTORY, (refere to the Remarks and Recommendations for further details):
 - Permisses fully fenced, Outdoor stock protection, Target stock protection
- * Security Alarm System - None

PHYSICAL PROTECTION (TENANT or OWNER/OCCUPANT):

- * The exterior locks at this location are deadbolt, motor locks
- * The windows are not barred

This report section is designed to provide basic crime information only. More detailed crime information can be obtained by ordering an Expanded Crime Supplement.

M U L T I R I S K - S P R A Y A P P L I C A T I O N S

OCCUPANCY:

Principal occupancy at this location is Auto dealer

- * Product(s) Applied: - Paint, Primer
- * Applied in: - Booth
- * Construction: - Prefabricated
- * Floor Construction: - Concrete
- * Spray area: - Standard
- * Frequency of use: - High
- * Work done: - Only in intended area

EQUIPMENT:

- * Compressed air spray gun

VENTILATION:

- * Ventilation - suitable for this installation
- * Filtering system - Dry filter
- * Filtering system - Well maintained.
- * Ventilation motor - Non-sparking and labelled
- * Exhaust duct - Suitable

ELECTRICAL:

- * Electrical equipment located inside the spray area - None
- * Electrical equipment located outside the spray area - Standard
- * Lighting fixtures are not labelled
- * At time of survey, lighting fixtures appeared to be in good repair
- * Lighting deficiencies - None

DRYER INSTALLATION:

- * No dryers were found

HAZARDS:

- * Storage of flammable and combustible liquid is non-standard
- * Flammable and combustible liquids storage
 - In the open, ordinary metal cabinets
 - In spray area, Outside spray area
- * Labelled safety cans not used
- * Handling - Safe
- * Quantity in spray area - 24 litres.
- * Quantity outside spray area - 250 litres.
- * As a result of survey, the following were found to be satisfactory:

Storage of dirty rags in safety containers; Restriction of smoking; Posting of no smoking signs; Welding/cutting a sufficient distance from spray area; Heating equipment a sufficient distance from spray area; Spray area is not highly congested
- * As a result of survey the following were found needing attention, please refer to the remarks and recommendations for further details:
- * Maintenance - Good

PROTECTION:

- * Portable fire extinguishers - Suitable
 - Well located
- * Automatic fixed extinguishing system - None
- * Automatic sprinklers - None

M U L T I R I S K
R E M A R K S / R E C O M M E N D A T I O N S

REMARKS:

* Fire, Liability & Basic Crime - The insured operates a successful business building and is well maintained. Waste oil is kept outside in an above ground double walled tank which is picked up by Safety Kleen. Some of the parts wash tanks do not have fusible links (recommendation made). There is no alarm system present (recommendation made); Note that the security guard is a private individual and may only be utilized for certain periods. The safe is unacceptable burglar protection (UL Class 350 fire safe) (recommendation made). Fencing should be considered on all sides of the dealership.

AIS Ref No.: 10681262

Page: 10

METRO PLYMOUTH CHRYSLER 1047 RD RICHMOND; OTTAWA, ONTARIO

1994

This document is owned by Opta Information Intelligence Inc. and is subject to copyright protection. Please see the full Terms and Conditions at the front of this document.

RECOMMENDATIONS:

- * 94-01 Fire, Liability & Basic Crime - The parts wash tanks missing fusible links should be replaced with tanks equipped with same.
- * 94-02 Fire, Liability & Basic Crime - A burglar alarm system should be considered for the occupancy with alarms terminating at a recognized monitoring service.
- * 94-03 Fire, Liability & Basic Crime - The safe provided should be replaced with a burglar resistant safe having a minimum ULC rating of TL 30. The safe should be alarmed, anchored to the masonry floor and be protected by an area alarm, connected to a central station.
- * 94-04 Fire, Liability & Basic Crime - Fencing should be extended to all sides of the property, and be provided with gates that are locked on a nightly basis.

CONSTRUCTION OF BUILDING

1. TYPE OF CONSTRUCTION - Floors & Roof Carried on:

- (a) Skeleton Steel Framework Showroom & parts.
- (b) Reinforced Concrete, Framework garage
- (c) Bearing Walls & Partitions
- (d) Bearing Walls & Steel Columns
- (e) Steel on Steel Walls & Roof
- (f) Other Construction

(Describe fully)

2. WALLS - State construction of external walls. Brick on H.C.B.

If bearing walls give thickness of walls in inches at each floor

3. ROOF AND FLOOR - Materials

- | | | | |
|--|--|--|--|
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (a) Concrete, reinforced - Poured in place | inches thick |
| Roof <input type="checkbox"/> <u>parts</u> | Floors <input checked="" type="checkbox"/> | (b) Concrete, on metal pan - Poured in place | <u>2 1/2</u> inches thick |
| Roof <input checked="" type="checkbox"/> | Floors <input type="checkbox"/> | (c) Concrete, Precast Units | <u>3-4</u> inches thick <u>?</u>
(Name of Manufacturer) |
| Roof <input checked="" type="checkbox"/> | Floors <input type="checkbox"/> | (d) Steel Deck, Construction #1 <input checked="" type="checkbox"/> Otherwise <input type="checkbox"/> | |
| | | *If Construction #1 State method of attaching insulation to steel deck and type of insulation | |
| | | Mechanical Fasteners <input type="checkbox"/> * Adhesive <input type="checkbox"/> Otherwise <input type="checkbox"/> | |
| | | *If adhesive state trade name | <u>unknown</u> |
| | | Type of insulation on steel deck | <u>tin test</u> |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (e) Other Materials - Describe and Show Thickness | |

ROOF AND FLOOR — Method of support

- | | | |
|--|--|---|
| Roof <input checked="" type="checkbox"/> | Floors <input checked="" type="checkbox"/> | (a) Unprotected Steel Beams. |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (b) Steel Beams Protected by inches of |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (c) Reinforced Conc. Beams — Poured in place. |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (d) Precast Concrete Structural Units inches thick (Name of Manufacturer) |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (e) Bearing Walls Only. No Supporting Steel. |

If building is composed of more than one type of construction, identify sections of floor involving each type and indicate on plan.

- (a) Is there any roof space exceeding 3 feet in height? NO If so, for what purpose is it used?
 How is access obtained thereto? If by trap or door, describe type
- (b) Are all skylights of wired glass in metal frames?
- (c) Is there any wood in roof, louvres, ventilators or skylights; if so give details NO
- (d) Is there a wood roof laid over an incombustible one? — If so, how is it supported?
- (e) If so, what is the maximum and minimum height of this above the incombustible roof?
- (f) Is the incombustible roof broken by Texas, louvres, ventilator, trapdoor, skylight, stair, elevator, other shafts?
- Is so, what is the construction of the sides through roof space?
- Is there any access or opening from these shafts to the roof space? Describe each separately
- (g) Is there a superstructure, water cooling tower, or Penthouse of any kind on the roof? NO If so, give dimensions, construction and occupancy
- How is access obtained?
- (h) Is there a wood wearing floor? If so, on which storeys?
- (i) Is it laid directly on incombustible floor or with an airspace? Describe
4. **STEEL COLUMNS AND BEAMS** — Are they fireproofed? NO If "Yes" state nature and thickness of such protection.
- (a) Columns
- (b) Beams

FLOOR OPENINGS

5. **STAIRWAYS** — How many, and state from which floor to which? 2 - 1st to 2nd
- Is there an enclosure around them? yes If so, describe construction of enclosure, and the doors, and whether doors are self-closing HEB shafts
- No doors or wood doors not self closing
6. **ELEVATORS** — How many, and state from which floor to which? —
- Is there an enclosure around them? If so, describe construction of enclosure, and the doors, and whether doors are self-closing
7. **CHUTES, VENTS, DUMB WAITERS & BELT HOLES & OTHER FLOOR OPENINGS** — Give size, construction of enclosure (if any), type of door (if any), and whether self-closing, stating which floors are cut by each, —
8. **HEATING AND VENTILATING DUCTS** — Are there any? — (a) Are ducts, which cut through floor, in masonry shafts
- (b) Give construction of shaft (c) State whether separate duct to each floor without communication to other floors
- (d) Do ducts open into roof space?
9. **HEIGHT** — State number of floors and whether there is a basement 2 & 1 = 2 no basement
10. **AREA** — Give ground floor dimensions 115 x 125 & 40 x 60 = 14,375 sq ft.

11 INTERIOR FINISH -

State separately for each floor, finish and method of attachment to walls and ceiling (if more than one type of finish is present on any one floor, state percentage of each type)

	Basement	1st	2nd	3rd	4th	5th	6th
(a) Walls	/	HEBIN	HEBIN GYP				
(b) Ceilings	/	HLP open	TT & open				
(c) Partitions		HEB	HEB				

State extent of any wood partitions, or partitions having wood supports in square feet separately for each floor:-

Battery charging room 25' x 12' x 8' high of frame construction

(d) Is there any other inside or outside combustible finish or trim other than above? Describe fully

12. HEATING - What is the system of heating the building? Hot water & Radiator. Where is heating plant located? Megawatt & Suspended units. Is it in fire-resistive room with standard fire door? Are there any stoves; if so, how many and where located

Do any heating devices vent otherwise than to brick or concrete chimney; if so, give details

Type "B" floor

What fuel is used? natural gas

13. ELECTRIC WIRING - All wiring is in Rigid Conduit Otherwise

Are all circuits protected by type "S" tamper resisting fuses or non-interchangeable circuit breakers? yes

14. POWER - Is any used? yes. If so, what kind? electric. Total Horse Power? 20-30 HP

What used for? Compressors, grinders & hand tools.

If gasoline engine, state method of ignition, location and capacity of supply tank, whether feed is pressure or gravity, quantity of gasoline in engine

15. GASOLINE OR BENZINE, OR OTHER OILS - Are any kept? yes. If so, what quantity of each? 45 gals of varrol

What used for? 45 gals of red proofing

16. COMMUNICATIONS - Does the building communicate with any other building? (a) If so, give dimensions, height, construction and occupancy and indicate clearly on diagram

(b) If so, are buildings separated by solid wall? (c) If so, are all openings in this wall protected by self-closing U.L. labelled Class A fire doors?

(d) If not, describe type of doors on each opening

PUBLIC PROTECTION

17. FIRE DEPARTMENT - State distance to the nearest fire station 2 miles

18. HYDRANTS - What is the distance to the nearest two hydrants? 150 & 350. Give size of main 8"

INTERNAL PROTECTION

19. Show number units for each floor:

	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
Extrgs. 2 1/2 Gal. Class A		2	1						
Extrgs. Class B & C		4							
Stand Pipe & Hose		-	-						

20. WATCHMAN - Is there a Watchman making rounds of the whole premises, nights, Sundays, holidays, and at all times when plant is not in operation, rounds being made not less than once an hour during the night, i.e. from 6 p.m. to 6 a.m., and every two hours during the day?

(a) Does he use a portable clock, electric detector, or report to central station?

(b) Give name of manufacturer of clock (c) Does it bear approval label of Underwriters' Laboratories

(d) Are the stations sufficient and so located that the Watchman must traverse each flat and every portion be visible to him?

21. AUTOMATIC FIRE DETECTION SYSTEM - If such system is present provide details on questionnaire obtainable from IAO

Opta Historical Environmental Services EnviroscanTM Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

NOTE: The sole purpose of this report is to provide insurance pricing and underwriting information about the particular insured and location named. Only the person requesting this survey will receive a copy of the report, and IAO asks that it be kept strictly confidential. This report does not guarantee compliance with any standards or with any federal, provincial or municipal codes, ordinances or regulations. Tests of fire and other protection equipment have not been conducted or witnessed during this survey.

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from a survey of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications, referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any loss or damages, whether consequential or other, however caused, incurred or suffered, as a result of the services being provided.

METRO PLYMOUTH CHRYSLER 1047 RD RICHMOND; OTTAWA, ONTARIO

M U L T I R I S K - L I A B I L I T Y

OCCUPANCY - GENERAL INFORMATION

- * Neighbourhood is predominantly commercial, residential
- * Insured - owner/occupant Area occupied - 1985 sq. m
- * 30% accessible to public. Public access is considered moderate
- * Gross revenue - \$20,000,000

PREMISES information at the time of this survey

* The following appeared to be SATISFACTORY:

Stairs, ramps, handrails; Floor surfaces & coverings; Wall & ceilings; Interior Lighting; Exterior Lighting; Interior Housekeeping; Exterior Housekeeping; Washrooms; Sidewalks, Yards & Parking Lots; Snow & ice removal; Signs & Awnings; Roof attachments; Fire exits

ELEVATING DEVICES

- * 12 Hoists
 - Current license is not present.
 - Maintenance contract - No

M U L T I R I S K - B A S I C C R I M E

NEIGHBOURHOOD:

- * Predominantly commercial, residential
- * Stable
- * Best described as having a moderate crime rate

BUSINESS:

- * Description - Automobile dealership with repairs and body shop
- * Hours of Operation - 7:30 am. - 9:00 pm. Mon. - Fri. 9:00 am. - 6:00 pm. Sat.
- * Typical Stock - New and used vehicles (new vehicles are not owned) auto parts
- * Target Stock Details - As above
- * Smash and Grab exposure is moderate
- * There is a safe on the premises

GENERAL PROTECTION at the time of this survey:

- * The following appeared to be SATISFACTORY:
 - Exterior Lighting, Interior Lighting, Roof Accessability, Police Patrols
- * The following were found to be UNSATISFACTORY, (refere to the Remarks and Recommendations for further details):
 - Permisses fully fenced, Outdoor stock protection, Target stock protection
- * Security Alarm System - None

PHYSICAL PROTECTION (TENANT or OWNER/OCCUPANT):

- * The exterior locks at this location are deadbolt, motor locks
- * The windows are not barred

This report section is designed to provide basic crime information only. More detailed crime information can be obtained by ordering an Expanded Crime Supplement.

M U L T I R I S K - S P R A Y A P P L I C A T I O N S

OCCUPANCY:

Principal occupancy at this location is Auto dealer

- * Product(s) Applied: - Paint, Primer
- * Applied in: - Booth
- * Construction: - Prefabricated
- * Floor Construction: - Concrete
- * Spray area: - Standard
- * Frequency of use: - High
- * Work done: - Only in intended area

EQUIPMENT:

- * Compressed air spray gun

VENTILATION:

- * Ventilation - suitable for this installation
- * Filtering system - Dry filter
- * Filtering system - Well maintained.
- * Ventilation motor - Non-sparking and labelled
- * Exhaust duct - Suitable

ELECTRICAL:

- * Electrical equipment located inside the spray area - None
- * Electrical equipment located outside the spray area - Standard
- * Lighting fixtures are not labelled
- * At time of survey, lighting fixtures appeared to be in good repair
- * Lighting deficiencies - None

DRYER INSTALLATION:

- * No dryers were found

AIS Ref No.: 10681262

1994

Page: 8

METRO PLYMOUTH CHRYSLER 1047 RD RICHMOND; OTTAWA, ONTARIO

HAZARDS:

- * Storage of flammable and combustible liquid is non-standard
- * Flammable and combustible liquids storage
 - In the open, ordinary metal cabinets
 - In spray area, Outside spray area
- * Labelled safety cans not used
- * Handling - Safe
- * Quantity in spray area - 24 litres.
- * Quantity outside spray area - 250 litres.
- * As a result of survey, the following were found to be satisfactory:

Storage of dirty rags in safety containers; Restriction of smoking; Posting of no smoking signs; Welding/cutting a sufficient distance from spray area; Heating equipment a sufficient distance from spray area; Spray area is not highly congested
- * As a result of survey the following were found needing attention, please refer to the remarks and recommendations for further details:
- * Maintenance - Good

PROTECTION:

- * Portable fire extinguishers - Suitable
 - Well located
- * Automatic fixed extinguishing system - None
- * Automatic sprinklers - None

R E M A R K S / R E C O M M E N D A T I O N S

REMARKS:

- * Fire, Liability & Basic Crime - The insured operates a successful business building and is well maintained. Waste oil is kept outside in an above ground double walled tank which is picked up by Safety Kleen. Some of the parts wash tanks do not have fusible links (recommendation made). There is no alarm system present (recommendation made); Note that the security guard is a private individual and may only be utilized for certain periods. The safe is unacceptable burglar protection (UL Class 350 fire safe) (recommendation made). Fencing should be considered on all sides of the dealership.

AIS Ref No.: 10681262

Page: 10

METRO PLYMOUTH CHRYSLER 1047 RD RICHMOND; OTTAWA, ONTARIO

1994

This document is owned by Opta Information Intelligence Inc. and is subject to copyright protection. Please see the full Terms and Conditions at the front of this document.

RECOMMENDATIONS:

- * 94-01 Fire, Liability & Basic Crime - The parts wash tanks missing fusible links should be replaced with tanks equipped with same.
- * 94-02 Fire, Liability & Basic Crime - A burglar alarm system should be considered for the occupancy with alarms terminating at a recognized monitoring service.
- * 94-03 Fire, Liability & Basic Crime - The safe provided should be replaced with a burglar resistant safe having a minimum ULC rating of TL 30. The safe should be alarmed, anchored to the masonry floor and be protected by an area alarm, connected to a central station.
- * 94-04 Fire, Liability & Basic Crime - Fencing should be extended to all sides of the property, and be provided with gates that are locked on a nightly basis.

3rd (& Other): _____ x _____ ; _____ x _____ ; _____ x _____ = _____ m²
Separation Walls (describe) _____ . Total Area 1907.3 m² EFFECTIVE AREA: 1907.3 m²

- ROOF SURFACE: Non-Combustible (describe) _____ . Combustible (describe) _____ .
Patent . FALSE ROOF over Masonry or Fire Resistive Roof () (describe) _____ .

- COMBUSTIBLE CONCEALED SPACES: Combustible Space In Roof , &/or Ceiling . If In Roof, Is This An Attic , Cut Off , Shut Off , With Access Limited By Trap(s)/Hatchway(s) . In Proportion To Total Roof/Ceiling Area COMBUSTIBLE CONCEALED SPACE Comprises _____ % In ROOF &/or _____ % In CEILING. Describe _____ .

- COMBUSTIBLE INTERIOR CONSTRUCTION: Floor Surfacing (describe & give % of total floor area affected) _____
- Partitions/Walls (describe & give % of total interior wall area) _____
- Mezzanines/Decks (describe & give % of total area of floors & roof) _____

- INTERIOR FINISH or INSULATION: (Specify Where SPECIAL DAMAGE Materials Are Used)

Specify FLOOR	1ST.	2ND			
Walls:	CB, GYP/CB	CB, GYP			
Ceiling:	OPEN STEEL OPEN CONC.	A.M.T., OPEN STEEL			
Interior Partitions:	CB.	CB.			
Smoke Developed	-	-			
Flame Spread	-	-			

Ordinary Damage Materials Attached To Fire Resistive or Non-Combustible Walls and/or Ceiling

- COMB. EXTERIOR ATTACHMENTS OR FINISH: Attachments Comprise Of (describe & give chargeable %) _____
- Finish Comprises Of (describe & give chargeable %) _____
- Smoke Developed - 200 or Less ; Over 200 ; Flame Spread Rating _____
- None Of The Above . Are Attachments/Finish Attached/Applied To Fire Resistive or Non-Comb., Walls or Roof? Yes ; No .

- BUILDING CONDITION: Moderate , Major , Extreme Deficiencies . Describe Sub-Standard Structural Conditions _____

COMMON HAZARDS - (SECTION VII, Items 720-724)

- HEATING: Building Heated? Yes ; No . Borrowed Heat . Describe Heating System Including Controls & Fuel Used: Hot Water and susp. hot air units - natural gas
- Describe Chimney(s) & Deficiencies If Any: Std installation and venting

- ELECTRICAL: FUSES: Type "S" ; Type "C" & Rejector System ; Circuit Breakers ; ORDINARY ; Used Exclusively .
- Aluminum Wiring ; Rigid Conduit ; Other (describe) Bx. Open .
- Electrical Equipment Defects: None ; Minor ; Moderate ; Major ; Serious . Describe Condition: _____

- HOUSEKEEPING: See General Underwriting Comments Section (Page 3)
MUNICIPAL PROTECTION - (SECTION IX)

- FIRE DEPARTMENT: Risk Within 2.5 km Of Nearest Fire Hall? Yes ; No . If No - State Distance To Fire Hall: _____ km.
- HYDRANTS: Two Hydrants Within 155m of Risk? Yes ; No . And All Parts Of Building Within 155m Of At Least One Hydrant? Yes ; No . MAINS - 150mm ; 200mm ; 300mm . Other (describe) _____
- Circulating ; and/or Dead End Mains. Describe Deficiency (if any): _____
- ACCESSIBILITY: Risk Accessible At Least On One Side By Street 15m In Width? Yes ; No . If No - Describe _____
- CONGESTED AREA: Congested/Conflagration Hazard Prevails? Yes ; No . If Yes, Describe Under General Underwriting Comments.
- PRIVATE PROTECTION: Is There Exclusive Private Protection . Or Supplement To Municipal Protection (). Describe _____

INTERNAL PROTECTION - (SECTION XI)

- MANUAL FIRE FIGHTING EQUIPMENT: Standard ; Non-Standard . (See Occupancy Section, page 3).
- WATCHMAN SERVICE: Standard . Including Proprietary Supervision . Including Central Station Supervisory Ser. . Describe: _____
- AUTOMATIC FIRE DETECTION SYSTEM: Full Protection ; Partial Protection (i.e. Minimum Requirements) ; Describe (& Attach Form No. 2184-6/80, for Automatic Fire Alarm Detection Systems, After Completion) _____
- PARTIAL AUTOMATIC SPRINKLER SYSTEMS: Acceptable Waterflow Alarm To Approved CENTRAL STATION . No Such Alarm . Total area Protected by Automatic Sprinklers Comprises _____ m².
- OTHER LIMITED AUTOMATIC FIRE PROTECTION SYSTEMS: Area Protected by: HALON ; CO₂ ; HIGH EXPANSION FOAM ; Other (describe) _____, Comprises _____ m².

ATION

ONTARIO REGION

SURVEY FOR RATING FIRE-RESISTIVE RISKS (excluding Sprinklered bldgs.) OF ALL CLASSES.

IBC CODE: TERT. 63 IND. 59 CONS. 2 PROT. 2

Location (Town and Street) OTTAWA RICHMOND RD Ins. Plan-5 338 B. 2257 No. 1047
 Owned by Parkway Chrysler Plymouth Ltd Occupied by Same
 For a Auto dealership No. of hands.....

Is building completely finished and out of workmen's hands?

OCCUPANCY

Give occupancy, kind of work, processes, machinery and number of hands on each floor

Basement

1st Showroom, parts dept, repair garage & rust proofing

2nd Office, boiler room & parts storage.

3rd

4th

5th

6th

CONSTRUCTION OF BUILDING

1. TYPE OF CONSTRUCTION - Floors & Roof Carried on:

- (a) Skeleton Steel Framework Showroom & parts.
- (b) Reinforced Concrete, Framework garage
- (c) Bearing Walls & Partitions
- (d) Bearing Walls & Steel Columns
- (e) Steel on Steel Walls & Roof
- (f) Other Construction

(Describe fully)

2. WALLS - State construction of external walls. Brick on H.C.B.

If bearing walls give thickness of walls in inches at each floor

3. ROOF AND FLOOR - Materials

- | | | |
|--|--|---|
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (a) Concrete, reinforced - Poured in place..... inches thick |
| Roof <input type="checkbox"/> <u>parts</u> | Floors <input checked="" type="checkbox"/> | (b) Concrete, on metal pan - Poured in place <u>2 1/2</u> inches thick |
| Roof <input checked="" type="checkbox"/> | Floors <input type="checkbox"/> | (c) Concrete, Precast Units <u>3-4</u> inches thick <u>?</u>
(Name of Manufacturer) |
| Roof <input checked="" type="checkbox"/> | Floors <input type="checkbox"/> | (d) Steel Deck, Construction #1 <input checked="" type="checkbox"/> Otherwise <input type="checkbox"/>
*If Construction #1 State method of attaching insulation to steel deck and type of insulation
Mechanical Fasteners <input type="checkbox"/> * Adhesive <input type="checkbox"/> Otherwise <input type="checkbox"/>
*If adhesive state trade name <u>unknown</u>
Type of insulation on steel deck <u>ten test</u> |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (e) Other Materials - Describe and Show Thickness |

ROOF AND FLOOR — Method of support

- | | | |
|--|--|--|
| Roof <input checked="" type="checkbox"/> | Floors <input checked="" type="checkbox"/> | (a) Unprotected Steel Beams. |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (b) Steel Beams Protected by inches of |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (c) Reinforced Conc. Beams — Poured in place. |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (d) Precast Concrete Structural Units inches thick
(Name of Manufacturer) |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (e) Bearing Walls Only. No Supporting Steel. |

If building is composed of more than one type of construction, identify sections of floor involving each type and indicate on plan.

- (a) Is there any roof space exceeding 3 feet in height? NO If so, for what purpose is it used?
How is access obtained thereto? If by trap or door, describe type
- (b) Are all skylights of wired glass in metal frames?
- (c) Is there any wood in roof, louvres, ventilators or skylights; if so give details NO
- (d) Is there a wood roof laid over an incombustible one? — If so, how is it supported?
- (e) If so, what is the maximum and minimum height of this above the incombustible roof?
- (f) Is the incombustible roof broken by Texas, louvres, ventilator, trapdoor, skylight, stair, elevator, other shafts?
If so, what is the construction of the sides through roof space?
Is there any access or opening from these shafts to the roof space? Describe each separately
- (g) Is there a superstructure, water cooling tower, or Penthouse of any kind on the roof? NO If so, give dimensions, construction and occupancy
How is access obtained?
- (h) Is there a wood wearing floor? If so, on which storeys?
- (i) Is it laid directly on incombustible floor or with an airspace? Describe
4. **STEEL COLUMNS AND BEAMS** — Are they fireproofed? NO If "Yes" state nature and thickness of such protection.
(a) Columns
(b) Beams

FLOOR OPENINGS

5. **STAIRWAYS** — How many, and state from which floor to which? 2 - 1st to 2nd
Is there an enclosure around them? yes If so, describe construction of enclosure, and the doors, and whether doors are self-closing HEB shafts
No doors or wood doors not self closing
6. **ELEVATORS** — How many, and state from which floor to which? —
Is there an enclosure around them? If so, describe construction of enclosure, and the doors, and whether doors are self-closing
7. **CHUTES, VENTS, DUMB WAITERS & BELT HOLES & OTHER FLOOR OPENINGS** — Give size, construction of enclosure (if any), type of door (if any), and whether self-closing, stating which floors are cut by each, —
8. **HEATING AND VENTILATING DUCTS** — Are there any? — (a) Are ducts, which cut through floor, in masonry shafts
(b) Give construction of shaft (c) State whether separate duct to each floor without communication to other floors
(d) Do ducts open into roof space?
9. **HEIGHT** — State number of floors and whether there is a basement 2 & 1 = 2 no basement
10. **AREA** — Give ground floor dimensions 115 x 125 & 40 x 60 = 14,375 sq ft.

11 INTERIOR FINISH -

State separately for each floor, finish and method of attachment to walls and ceiling (if more than one type of finish is present on any one floor, state percentage of each type)

	Basement	1st	2nd	3rd	4th	5th	6th
(a) Walls	/	HCBIN	HCBIN GYP				
(b) Ceilings	/	HLP open	TT & open				
(c) Partitions		HCB	HCB				

State extent of any wood partitions, or partitions having wood supports in square feet separately for each floor:-

Battery charging room 25' x 12' x 8' high of frame construction

(d) Is there any other inside or outside combustible finish or trim other than above? Describe fully

12. HEATING - What is the system of heating the building? Hot water & Radiator. Where is heating plant located? Megawatt & Suspended units. Is it in fire-resistive room with standard fire door? Are there any stoves; if so, how many and where located

Type "B" floor

Do any heating devices vent otherwise than to brick or concrete chimney; if so, give details

What fuel is used? natural gas

13. ELECTRIC WIRING - All wiring is in Rigid Conduit Otherwise

Are all circuits protected by type "S" tamper resisting fuses or non-interchangeable circuit breakers? yes

14. POWER - Is any used? yes. If so, what kind? electric. Total Horse Power? 20-30 HP

What used for? Compressors, grinders & hand tools

If gasoline engine, state method of ignition, location and capacity of supply tank, whether feed is pressure or gravity, quantity of gasoline in engine

15. GASOLINE OR BENZINE, OR OTHER OILS - Are any kept? yes. If so, what quantity of each? 45 gals of varrol

What used for? 45 gals of red proofing

16. COMMUNICATIONS - Does the building communicate with any other building? (a) If so, give dimensions, height, construction and occupancy and indicate clearly on diagram

(b) If so, are buildings separated by solid wall? (c) If so, are all openings in this wall protected by self-closing U.L. labelled Class A fire doors?

(d) If not, describe type of doors on each opening

PUBLIC PROTECTION

17. FIRE DEPARTMENT - State distance to the nearest fire station 2 miles

18. HYDRANTS - What is the distance to the nearest two hydrants? 150 & 350. Give size of main 8"

INTERNAL PROTECTION

19. Show number units for each floor:

	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
Extrgs. 2 1/2 Gal. Class A		2	1						
Extrgs. Class B & C		4							
Stand Pipe & Hose		-	-						

20. WATCHMAN - Is there a Watchman making rounds of the whole premises, nights, Sundays, holidays, and at all times when plant is not in operation, rounds being made not less than once an hour during the night, i.e. from 6 p.m. to 6 a.m., and every two hours during the day?

(a) Does he use a portable clock, electric detector, or report to central station?

(b) Give name of manufacturer of clock (c) Does it bear approval label of Underwriters' Laboratories

(d) Are the stations sufficient and so located that the Watchman must traverse each flat and every portion be visible to him?

21. AUTOMATIC FIRE DETECTION SYSTEM - If such system is present provide details on questionnaire obtainable from IAO

EXTERNAL EMAIL

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

NO RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationsservices@tssa.org along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Mariah

Good morning,

May you please perform a TSSA database record search for any underground storage tanks, registered fuel tanks, outstanding instructions, incident reports, fuel oil spills or contaminations records for the following locations. We found additional

information that lead us to this address:

- 1047 Richmond Road, Ottawa, Ontario

Thanks,

Jaime Brear (BA) (she/her)
