MMLOS Review

### Intersection MMLOS Analysis

The following is a review of the MMLOS of the signalized intersections within the study area, using complete streets principles. Ogilvie Road/Blair Road, Ogilvie Road/1900 Ogilvie Road, Ogilvie Road/City Park Drive, Ogilvie Road/Blair Road, HWY 174 Westbound off-ramp/Blair Road, and HWY 174 Eastbound off-ramp/Blair Road have been evaluated using the MMLOS targets for intersections within 600m of a rapid transit station. Ogilvie Road/Matheson Road/Palmerston Drive and Ogilvie Road/City Park Drive/Bathgate Drive have been evaluated using the worst case MMLOS targets for intersections within a Mixed-Use Centre or Employment Area.

Exhibit 5 of the Addendum to the MMLOS Guidelines has been used to evaluate the existing PLOS at the intersections listed above. Exhibit 22 of the MMLOS Guidelines suggests a target PLOS A for all roadways within 600m of a rapid transit station and a target PLOS C within a Mixed-Use Centre or Employment Area. The results of the intersection PLOS analysis are summarized in **Table 5**.

Exhibit 12 of the MMLOS Guidelines has been used to evaluate the existing BLOS at the intersection listed above. As per Exhibit 22 of the MMLOS Guidelines suggest a target BLOS C for arterial spine routes within 600m of rapid transit, in a Mixed-Use Centre, or in the Employment Area. It also suggests a target BLOS B for local routes along collector roads. The results of the intersection BLOS analysis are summarized in **Table 6**.

Exhibit 16 of the MMLOS Guidelines has been used to evaluate the existing TLOS at the intersection listed above. Exhibit 22 of the MMLOS Guidelines identifies a target TLOS D for all roads with isolated transit priority measures within 600m of rapid transit, in a Mixed Use Centre, or in the Employment Area. The TLOS has been evaluated for every approach that is currently used by transit. The results of the intersection TLOS analysis are summarized in **Table 7**.

Exhibit 21 of the MMLOS Guidelines has been used to evaluate the existing TkLOS at the intersection listed above. Exhibit 22 of the MMLOS Guidelines identifies a target TkLOS B for truck arterial truck routes in the Employment Area and a TkLOS D for arterial truck routes in within 600m of rapid transit or in a Mixed Use Centre. The results of the intersection TkLOS analysis are summarized in **Table 8**.
