## Executive Summary

EXP Services Inc. (EXP) was retained by Sun Life Assurance Company of Canada c/o BentallGreenOak (Canada) LP to complete a Phase One Environmental Site Assessment (ESA) of the property located at 1820-1846 Bank Street in Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by a commercial strip mall and associated parking lot.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used to support a zoning by-law amendment and site plan approval with the City of Ottawa for the proposed future development of the Phase One property.

EXP understands that the most recent use of the Phase One property is commercial and that the proposed future use is residential and commercial. Consequently, since the proposed future use of the property is more sensitive than its previous use a Record of Site Condition (RSC) is required.

The Phase One property has the municipal addresses of 1820-1846 Bank Street in Ottawa, Ontario. The Phase One property is located on the northwest corner of the intersection of Bank Street and Walkley Road. The Phase One property is irregular in shape with an approximate area of 1.74 hectares.

The Phase One property is occupied by single storey, slab on grade commercial buildings containing multiple units. The building has an approximately footprint of 42,240 square feet. At the time of the visit, the building tenants included Value Village, Algonquin Careers Academy, Ruby Inn (restaurant), Bel-O-Sol (tanning salon), Savannah Afro Caribbean (retail), and Hera Beauty (retail).

The legal description of the Phase One property is Part Lot 23, Concession Junction Gore, as in CT131445 and NS95310 Except Parts 16, 17 and 18 on Expropriation NS275909 and Parts 1, 2 and 3 on Plan 5R284; subject to OT55584 Ottawa/Gloucester. The property identification number (PIN) is 040690603.

Based on a review of historical aerial photographs, and other records review, it appears the subject site was first developed for commercial use between 1954 and 1965. The Phase One property was initially occupied by Webster & Son Ltd., a building supplies store. The original building was demolished, and the existing commercial building was constructed on the Phase One property in the early 1970s.

Based on the findings of this investigation the following PCA have been identified in the Phase One study area:

- PCA 1: 1822 Bank Street – former on-site rail siding (PCA #46)
- PCA 2: Glenhaven Private – former rail line (PCA #46)
- PCA 3: 1841 Bank Street – former gas station (PCA #28)
- PCA 4: 1841 Bank Street – active repair garage (PCA #10)
- PCA 5: 1827 (1811 Bank Street – former contractor's repair garage (PCA #10)
- PCA 6: 1827 (1811) Bank Street – former UST (PCA #28)
- PCA 7: 1847 Bank Street – active gas station (PCA #28)
- PCA 8: 1877 Bank Street – former gas station (PCA #28)
- PCA 9: 1846 Bank Street (Phase One property) – former dry cleaner (PCA #37)

- PCA 10: 1832 Bank Street (Phase One property) – former gas station (PCA #28)
- PCA 11: 1800 Bank Street – former dry cleaner (PCA #37) and potential furnace oil leak from UST (PCA #28)
- PCA 12: 1811 Bank Street – car dealership with repair garage (PCA #10)
- PCA 13: 1811 Bank Street – gasoline and waste oil USTs for car dealership (PCA #28)
- PCA 14: 1850 Bank Street – former car dealership with repair garage (PCA #10)
- PCA 15: 1850 Bank Street – Former gasoline and waste oil USTs (PCA #28)
- PCA 16: 1792 Bank Street – active repair garage (PCA #10)
- PCA 17: 1792 Bank Street – former gas station (PCA #28)
- PCA 18: 1770 Bank Street – car dealership with repair garage (PCA #10)
- PCA 19: 1770 Bank Street – gasoline and waste oil UST for car dealership/repair garage (PCA #28)
- PCA 20: 1820-1846 Bank Street – fill material of unknown quality (PCA #30)
- PCA 21: 2629 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 22: 2706 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 23: 1750 Bank Street – former repair garage (PCA #10)
- PCA 24: 1750 Bank Street – former gas stations (PCA #28)
- PCA 25: 1750 Bank Street – former dry cleaner (PCA #37)

All of the on-site PCAs were determined to result in APECs. A dry cleaner (PCA 9) operated in the northernmost unit from the 1970s until 2018. A gas station (PCA 10) was present on the east part of the site for a brief period in the 1970s. Previous investigations conducted on this part of the site identified tetrachloroethylene (PCE) impacted soil and groundwater, although it is noted that the most recent investigation conducted by Pinchin Limited did not identify any exceedances of the applicable standards in the monitoring wells sampled near the former on-site dry cleaner or gas station. The previous investigation also identified between 0.9 m and 2 m of fill material on the Phase One property (PCA 20). A rail siding (PCA 1) was historically located on the Phase One property prior to the construction of the existing site-building.

With respect to off-site PCAs, due to the proximity and/or inferred upgradient location from the Phase One property, the gas stations at 1841 and 1847 Bank Street, the repair garages/car dealerships at 1841 and 1850 Bank Street, the former rail line to the west, and the former dry cleaner at 1800 Bank Street were considered to contribute to APECs on the Phase One property.

The remaining PCAs identified in the Phase One study area were located at least 100 m from the Phase One property and/or down/cross-gradient to the Phase One property and were not considered to contribute to APECs on the Phase One property.

The following APECs were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1. Former on-site dry-cleaner	North end of site building	PCA #37 – Operations of dry cleaning equipment (where chemicals are used) (PCA 9)	On-site	VOC	Soil and groundwater

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#2. Former on-site gas station	East part of Phase One property	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 10)	On-site	PHC, VOC, metals	Soil and groundwater
#3. Former on-site rail siding	Northwest part of Phase One property	PCA #46 – Rail yard, tracks, and spurs (PCA 1)	On-site	PAH, metals	Soil
#4. Fill material	Entire Phase One property	PCA #30 – Importation of fill material of unknown quality (PCA 20)	On-site	PHC, PAH, metals	Soil
#5. Former dry cleaner at 1800 Bank Street & historical furnace oil leak from UST	Along north property line	PCA #37 – Operations of dry cleaning equipment (where chemicals are used) and PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 10 & 11)	Off-site	PHC, VOC	Soil and groundwater
#6. Former gas station at 1841 Bank Street	Along southeast property line	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 3)	Off-site	PHC, VOC	Soil and groundwater
#7. Repair garage at 1841 Bank Street	Along southeast property line	PCA #10 – Commercial autobody shop (PCA 4)	Off-site	PHC, VOC, metals	Soil and groundwater
#8. Gas station at 1847 Bank Street	Along southeast property line	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 7)	Off-site	PHC, VOC	Soil and groundwater
#9. Former car dealership at 1850 Bank Street	Along south property line	PCA #10 – Commercial autobody shop (PCA 14)	Off-site	PHC, VOC, metals	Soil and groundwater
#10. Former USTs associated with car dealership at 1850 Bank Street	Along south property line	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 15)	Off-site	BTEX, PHC	Soil and groundwater
#11. Former rail line to the west of the site	Along west property line	PCA #46 – Rail yard, tracks, and spurs (PCA 2)	Off-site	PAH, metals	Soil

The Qualified Person who oversaw this work, Leah Wells, P.Eng., recommends that a Phase Two ESA be conducted to address the APEC identified on the Phase One property.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

*This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.*

## 1.0 Introduction

EXP Services Inc. (EXP) was retained by Sun Life Assurance Company of Canada c/o BentallGreenOak (Canada) LP to complete a Phase One Environmental Site Assessment (ESA) of the property located at 1820-1846 Bank Street in Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by a commercial strip mall and associated parking lot.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

### 1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used to support a zoning by-law amendment and site plan approval with the City of Ottawa for the proposed future development of the Phase One property.

EXP understands that the most recent use of the Phase One property is commercial and that the proposed future use is residential and commercial. Consequently, since the proposed future use of the property is more sensitive than its previous use a Record of Site Condition (RSC) is required.

EXP personnel who conducted assessment work for this project included Chris Kimmerly, P.Geo., and Leah Wells, P.Eng. An outline of their qualifications is provided in Appendix A.

### 1.2 Phase One Property Information

The Phase One property has the municipal addresses of 1820-1846 Bank Street in Ottawa, Ontario. The Phase One property is located on the northwest corner of the intersection of Bank Street and Walkley Road. The Phase One property is irregular in shape with an approximate area of 1.74 hectares.

The Phase One property is occupied by single-storey, slab-on-grade commercial buildings containing multiple units. The building has an approximately footprint of 42,240 square feet. At the time of the visit, the building tenants included Value Village, Algonquin Careers Academy, Ruby Inn (restaurant), Bel-O-Sol (tanning salon), Savannah Afro Caribbean (retail), and Hera Beauty (retail).

The legal description of the Phase One property is Part Lot 23, Concession Junction Gore, as in CT131445 and NS95310 Except Parts 16, 17 and 18 on Expropriation NS275909 and Parts 1, 2 and 3 on Plan 5R284; subject to OT55584 Ottawa/Gloucester. The property identification number (PIN) is 040690603.

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid are Zone 18, 447944 m E and 5024339 m N. The UTM coordinates are based on measurements from Google Earth Pro, published by the Google Limited Liability Company (LLC). The accuracy of the centroid is estimated to be less than 10 m.

The Phase One property is owned by Sun Life Assurance Company of Canada. Authorization to proceed with this investigation was provided by Mr. Dylan Gillingham of BentallGreenOak.

A survey plan is provided in Appendix B. A Site Location Plan is provided as Figure 1 in Appendix C.

## 2.0 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Obtaining a search of land title and assessment rolls for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250-metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

## 3.0 Records Review

### 3.1 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250-metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property.

The Phase One property is zoned AM – Arterial Main Street. Surrounding properties to the north and south along Bank Street are also zoned AM. The property south adjacent to the site is also zoned AM. The remaining properties in the Phase One study area of primarily zoned residential.

The Phase One study area is shown on Figure 2 in Appendix C.

### 3.2 First Developed Use Determination

Based on a review of historical aerial photographs, and other records review, it appears the subject site was first developed for commercial use between 1954 and 1965. The Phase One property was initially occupied by Webster & Son Ltd., a building supplies store. The original building was demolished, and the existing commercial building was constructed on the Phase One property in the early 1970s.

### 3.3 Fire Insurance Plans

EXP reviewed the Catalogue of Canadian Fire Insurance Plans 1875 – 1975. No fire insurance plans depicting the Phase One study area were available for review. Fire insurance plans from 1957 were reviewed.

The FIP shows that the Phase One property was occupied by a commercial building labelled as Webster & Sons Ltd. Builders Supplies.

Properties along Bank Street and Walkley Road appear to be primarily commercial and light industrial. Properties to the southeast of the site were mainly residential. Gas stations were present at 1835, 1855 and 1875 Bank Street. A contractor's yard with a repair garage and an underground storage tank (UST) was located east of the Phase One property across Bank Street.

Based on a review of the FIPs, the following PCAs were identified:

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale (Yes/No)
<b>1822 Bank Street</b>	One-site	Rail siding for site building	1957	Yes, as the rail siding is present on the Phase One property (PCA #46 – Rail yard, tracks, and spurs).
<b>West of Bank Street</b>	10 m west	Rail line	1957	Yes, due to the proximity to the Phase One property (PCA #46 – Rail yard, tracks, and spurs).
<b>1835 (now 1841) Bank Street</b>	40 m east	Gas station with three USTs	1957	Yes, due to the proximity to the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>1827 (now 1811) Bank Street</b>	90 m east	Contractor's yard with repair garage and UST	1957	No, due to the distance from the Phase One property, (90 m east for the garage, 150 m east for the UST) (PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products in fixed tanks).

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale (Yes/No)
<b>1855 (now 1847) Bank Street</b>	60 m southeast	Gas station with three USTs	1957	Yes, due to the proximity and inferred upgradient location from the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>1875 (now 1877) Bank Street</b>	100 m southeast	Gas station with two USTs	1957	No, although the property is located inferred upgradient of the Phase One property, there are closer potential sources of hydrocarbon contamination (PCA #28 – Gasoline and associated products storage in fixed tanks).

Based on a review of the FIPs, potentially contaminating activities (PCAs) were identified in the Phase One study area including rail lines, gas stations and repair garages. Due to the proximity and/or inferred up-gradient location from the Phase One property, the rail lines, and the gas stations at 1835 and 1855 Bank Street were considered to contribute to areas of potential environmental concern (APECs).

### 3.4 Chain of Title

A chain of title was requested from Read Abstracts Limited for the Phase One property. The chain of title has not yet been received.

### 3.5 City Directories

City directories pertaining to the Phase One study area were requested from Environmental Risk Information Services (ERIS). ERIS is an environmental database and information service provider. City directories between 1955 and 2021 were reviewed in five-year increments. There were no listings in the Phase One study area prior to 1955.

The following properties of interest were noted:

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
<b>1820-1846 Bank Street</b>	Phase One property	Webster & Son Ltd. Not listed Beauty Salon Radio Shack ABC Children's World Wall Coverings Décor Ruby Inn Shoppers Drug Mart Grocery Store Mill Fab Ltd. Dry cleaner Vac's & Wax Ltd. Frame store Videophilia Bel-O-Sol Tanning Pet store Savannah Afro Caribbean Value Village Algonquin Careers Academy	1960 to 1966 1970 1975 to 2021 1975 to 1990 1975 1975 to 1980 1975 to 2021 1975 to 2017 1975 to 1986 1975 1975 to 2017 1980 1980 to 1990 1986 to 1990 1986 to 2021 1996 2000 2000 2021	Yes, the former dry cleaner is a potential environmental concern. None of the other site tenants were considered PCAs (PCA #37 – Operation of dry cleaning equipment (where chemicals are used)).

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
1832 Bank Street	Phase One property	Gas station	1975	Yes, the former on-site gas station is a potential environmental concern (PCA #28 – Gasoline and associated products storage in fixed tanks).
1800 Bank Street	North adjacent	Dry cleaner	1990	Yes, due to the proximity to the Phase One property (PCA #37 – Operation of dry-cleaning equipment (where chemicals are used)).
1841 Bank Street	40 m east	Gas station Repair garage	1960 to 2017 1990 to 2021	Yes, due to the proximity to the Phase One property (PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks).
1811-1815 Bank Street	90 m east	Car dealership Repair garage	1975 to 2021 1966 to 2017	No, due to the distance from the Phase One property (PCA #10 – Commercial autobody shops).
1850 Bank Street	40 m south	Car dealership	1960 to 2017	Yes, due to the proximity to the Phase One property (PCA #10 – Commercial autobody shops).
1847 Bank Street	60 m southeast	Gas station	1955 to 2021	Yes, due to the proximity and the inferred up-gradient location from the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).
1792 Bank Street	80 m north	Repair garage	1966 to 2017	No, due to the distance and cross-gradient location from the Phase One property (PCA #10 – Commercial autobody shop).
1883 Bank Street	100 m southeast	Gas station	1960 to 1980	No, although the property is located inferred up-gradient from the Phase One property, there are closer potential sources of hydrocarbon contamination to the site (PCA #28 – Gasoline and associated products storage in fixed tanks).
1770 Bank Street	140 m north	Car dealership	1966 to 2021	No, due to the distance and cross-gradient location from the Phase One property (PCA #10 – Commercial autobody shop).

Based on a review of the city directories, PCAs were identified in the Phase One study including gas stations, auto repair garages, and dry cleaners. The former on-site dry cleaner and gas station were considered to contribute to APECs. Due to the proximity and inferred up-gradient location from the Phase One property, the gas stations at 1835 and 1855 Bank Street, the repair garage at 1850 Bank Street, and the dry cleaner at 1800 Bank Street were considered to contribute to areas of potential environmental concern (APECs). The remaining PCAs identified in the Phase One study area were located at least 100 m from the Phase One property and/or down/cross-gradient to the Phase One property.

### 3.6 Environmental Reports

The following previous report was provided for review:

1. Trow Associates Inc. (now EXP Services Inc.), *Phase I Environmental Site Assessment Update, Walkley Centre Plaza, 1820-1846 Bank Street, Ottawa, Ontario*, May 2002.

This investigation was conducted to provide an indication of existing environmental site conditions and to identify potential environmental liabilities at the site. The update was intended to supplement previous investigation, and did not include an assessment of the former gas station on the east side of the Phase One property.

The update included a review of the following reports, which were not provided to EXP for review:

- *"Phase I Environmental Site Assessment, Walkley Centre, 1820-1846 Bank Street, City of Ottawa, Regional Municipality of Ottawa-Carleton, Province of Ontario"*, prepared for Vithorn Investments Limited by The Hazcon Group Ltd., September 1995.
- *"Phase I Environmental Site Assessment, Walkley Centre, 1824-1846 Banks Street, Ottawa"*, prepared for The Glenview Corporation by Jacques Whitford Environmental Limited, May 1999.
- *"Limited Phase II Environmental Site Assessment, Walkley Centre, 1824-1846 Bank Street, Ottawa"*, prepared for The Glenview Corporation by Jacques Whitford Environmental Limited, November 1999.

Based on historical records review, Trow identified the following potentially contaminating activities:

- Dry cleaning operation at 1820 Bank Street (northmost unit in the site building). The dry cleaner had been present since the 1970s and was still present at the time of this report issue (2002). A limited Phase II ESA was conducted by JWEL in 1999 to address the dry-cleaning operations. Concentrations of volatile organic compound (VOC) in exceedance of the Ministry of the Environment (MOE) applicable standards were present in the groundwater.
- The north adjacent property was historically occupied by an industrial plant (Westinghouse), and a dry-cleaning operation.
- In addition, several gas stations and repair garages were identified to the northeast and northwest of the Phase One property. As these operations were located inferred cross-gradient to the site, they were not anticipated the contribute to areas of potential environmental concern.
- A rail line was historically present to the south of the Phase One property. As the rail line was downgradient of the site, if was not inferred to have potentially impacted the Phase One property.

A site visit was conducted as part of the Phase I ESA update. The following was noted:

- A dry cleaner (Laundryland) was located in the northernmost unit of the site building. Perchloroethylene (PCE) was contained within the dry cleaning machinery located at the rear of the unit. No floor drains were noted in this area, and the floor was observed to be in good condition with no cracks or staining. Approximately 430 kg of PCE was delivered to the unit by a licensed contractor every 4 to 5 months. No issues pertaining to chemical storage/disposal were observed during the site visit. The conditions/disposal methods of chemicals of prior tenants (prior to the 1990s) is unknown.
- Other tenants observed during the site visit included: Value Village, Shoppers Drug Mart, Shoppers Home Care, Savannah Afro-Caribbean Products Inc., and Bel-O-Sol Suntan City. No potential environmental concerns were observed in these units.
- The unit occupied by Ruby Inn; a Chinese food restaurant, was not accessible during the site visit. The site representative indicated that all grease generated by the restaurant is collected and removed from site by a licensed contractor. It is not anticipated that operations in the restaurant may potentially impact the site.

In February 2002, Trow advanced three boreholes on the site, in the vicinity of the dry cleaner. Two of the boreholes were completed as monitoring wells. Following this investigation, a video inspection company as retained to conducted video imaging to assess the integrity of the sewers in/around the dry-cleaning unit.

A new dry-cleaning machine was installed in March 2002, it was noted that the new unit was self-contained and not connected to the municipal sewers. Waste PCE was stored in tanks that formed part of the machine and is removed from site by a licensed contractor.

It was recommended that a Phase II ESA be conducted to address the dry cleaning/impacted groundwater, and the former industrial/dry cleaning operations on the north adjacent site.

2. Trow Associates Inc. (now EXP Services Inc., "*Limited Phase II Environmental Site Assessment, Walkley Centre Plaza, 1820-1846 Bank Street, Ottawa, Ontario*", May 2002.

The Phase II ESA was conducted to address the potentially contaminating activities identified in the Phase I ESA completed by Trow. A total of three boreholes were advanced at the site to approximately 6.4 metres below ground surface. All three of the boreholes were completed as monitoring wells.

Subsurface stratigraphy generally consisted of sandy silt fill to approximately 0.6 m bgs, overlying native silty sand with some gravel. Highly fractured shale bedrock was encountered approximately 2.0 to 2.5 m bgs in all three boreholes. It is noted that all of the monitoring wells were installed in the bedrock.

A total of three soil samples were submitted for analysis of VOC, one soil samples was submitted for analysis of polycyclic aromatic hydrocarbons (PAH), and metals. Three groundwater samples were submitted for analysis of VOC, and one groundwater sample was also submitted for analysis of PAH and metals. One soil sample (MW 101), and one groundwater sample (MW 102) exceeded the applicable non-potable criteria for PCE. When compared to the updated 2011 MECP site condition standards (SCS) these PCE detections in soil and groundwater would also be considered to exceed the pertinent MECP standards for the Phase One property (i.e. commercial standards) and the comparable residential standards.

As part of the Phase II ESA, a video inspection was conducted to assess the integrity of the sanitary sewer in/around the Laundryland unit. A floor drain was noted in the dry-cleaning unit which connected to the sanitary sewer. The video assessment of the sanitary sewer indicated that the condition of the sanitary sewer in the vicinity of the floor drain/toilet was in suspect condition and may be allowing seepage of wastewater to the subsurface beneath the building. Swab samples were also collected from the sanitary sewer pipe in the vicinity of the dry-cleaning machine and submitted for analysis of VOC. Results of the swab analysis indicated that trichloroethylene (TCE) and PCE were present in the sanitary sewer. It was inferred from these results that the former dry-cleaning machine was connected to the sanitary sewer and discharging waste PCE.

It was recommended that bi-annual groundwater sampling be conducted to monitor the concentrations of VOCs. It was recommended that the floor drain in the vicinity of the dry-cleaning machine be capped, as the new machine was self-contained, and a sewer connection was no longer required. The JWEL monitoring well was decommissioned to prevent further migration of impacted groundwater.

3. Pinchin Environmental, "*Phase I Environmental Site Assessment, 1820-1846 Bank Street, Ottawa, Ontario*", May 2013.

The Phase I ESA and groundwater sampling program were conducted to assess potential areas of potential environmental concern for due diligence purposes. At the time of the site visit the tenants included the following: Landryland, Value Village, Algonquin Careers Academy, Ruby Chinese Food, Bel-Sol Tanning, Savannah Afro-Caribbean Products Inc., Kick-Boxing Martial Arts, Hair by Joe, and a vacant unit. It was noted by Pinchin that limited information was provided regarding the dry-cleaning operations, and much of the information included in the report was obtained from the Trow 2002 report.

A gas station formerly operated on the east portion of the site. As the fuel outlet only operated for a short period of time, Pinchin considered this operation unlikely to result in potential environmental concerns. No information was reviewed pertaining to the decommissioning of the gas station.

A rail line was present approximately 10 m west of the west site boundary. As impacts from the rail line were inferred to be localized, and as the rail line was located west of the site, Pinchin considered the rail line unlikely to result in any subsurface impacts at the site.

Three monitoring wells north of the dry-cleaning unit, and one monitoring well on the east part of the site in the area of the former gas station were sampled as part of this investigation. Groundwater samples were submitted for analysis of volatile organic compounds (VOC) and/or petroleum hydrocarbons (PHC). The groundwater samples were compared to the MECP Table 3 site condition standards (SCS) for commercial land use. All of the groundwater samples were within the Table 3 SCS for commercial land use and also below for residential land uses, given that the samples were below laboratory detection limits.

Based on the results of the groundwater sampling program, it was Pinchin's opinion that none of the on-site operations had resulted in any subsurface impacts. No additional subsurface investigation was recommended by Pinchin. Pinchin noted that, based on the age of the site building, there was potential for asbestos containing materials to be present in the site building.

4. Pinchin Environmental, "Phase I Environmental Site Assessment, 1820-1846 Bank Street, Ottawa, Ontario", May 2015.

The Phase I ESA was conducted to assess potential areas of potential environmental concern for due diligence purposes. The building tenants were noted to be the same as the 2013 investigation, with the exception the Kick-Boxing Martial Arts unit was now vacant. No additional PCAs were identified since the 2013 Phase I ESA.

Based on the results of the 2013 groundwater sampling program, it was Pinchin's opinion that none of the on-site operations had resulted in any subsurface impacts. No additional subsurface investigation was recommended by Pinchin.

### 3.7 Environmental Source Information

Information pertaining to the Phase One property was obtained by reviewing documents that are available to the public through municipal and provincial sources. EXP did not identify the need to contact any federal agencies.

Written responses from regulatory agencies and copies of documents obtained via searches are provided in Appendix C.

#### 3.7.1 Ontario Ministry of the Environment, Conservation and Parks Records

Records pertaining to the Phase One property were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act* (FOI).

No records pertaining the Phase One property were found. The MECP response is provided in Appendix C.

#### 3.7.2 Historical Land Use Inventory

Records pertaining to the site were requested from the City of Ottawa for the Historical Land Use Inventory (HLUI) through the Municipal Freedom of Information and Protection of Privacy Act (FOI).

The following properties of interest were noted:

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
1822 Bank Street	Phase One property	Dry cleaner Record for two 22,700 L gasoline USTs and one 2,270 L waste oil UST installed in 1970.	Yes, the former on-site gas station and dry-cleaner are potential environmental concerns (PCA #28 – Gasoline and associated products storage in fixed tanks, PCA #37 – Operation of dry-cleaning equipment (where chemicals are used)).
1180 Walkley Road (1850 Bank Street)	30 m south	Repair garage from the 1970s to 2000s. Records for three gasoline USTs and one waste oil UST.	Yes, due to the proximity to the Phase One property (PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks).

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
<b>1841 Bank Street</b>	40 m east	Gas station from the 1950s to 2000s.	Yes, due to the proximity to the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>1847 Bank Street</b>	60 m southeast	Gas station from the 1950s to present.	Yes, due to the proximity and inferred upgradient location from the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>1792 Bank Street</b>	80 m north	Gas station from the 1970 to the 1990s.	No, due to the distance and cross gradient location from the Phase One property (PCA #28 – Gasoline and associate products storage in fixed tanks).
<b>1811 Bank Street</b>	90 m east	Repair garage from 1970s to present. Record for gasoline and waste oil USTs at car dealership.	No, due to the distance from the Phase One property (PCA #10 – Commercial autobody shops).
<b>1827 (now 1811) Bank Street</b>	90 m east	Record for UST	No, due to the distance from the Phase One property, (150 m east for the UST) (PCA #28 – Gasoline and associated products in fixed tanks).
<b>1875-1877 Bank Street</b>	100 m southeast	Gas station from the 1950s to the 1960s. Record for two fuel oil USTs.	No, although the property is located inferred upgradient of the Phase One property, there are closer potential sources of hydrocarbon contamination (PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>1770 Bank Street</b>	140 m north	Repair garage from the 1970 to present. Record for one waste oil and one motor oil UST installed in the 1960s.	No, due to the distance and cross gradient location from the Phase One property (PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>2629 Alta Vista Drive</b>	150 m northeast	Dry cleaner	No, due to the distance and cross-gradient location from the Phase One property (PCA #37 – Operation of dry cleaning equipment (where chemicals are used)).
<b>2706 (2660) Alta Vista Drive</b>	200 m north	Dry cleaner from the 1970s to present.	No, due to the distance and cross-gradient location from the Phase One property (PCA #37 – Operation of dry cleaning equipment (where chemicals are used)).
<b>1750 Bank Street</b>	220 m north	Repair garage in the 2000s. Gas station from the 1970s to the 1990s. Dry cleaner in the 2000s.	No, due to the distance and cross gradient location from the Phase One property (PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks, PCA #37 – Operation of dry-cleaning equipment (where chemicals are used)).

Based on a review of the HLUI, multiple PCAs were identified in the Phase One study area. Due to the proximity and/or inferred up-gradient location from the Phase One property, the on-site gas station and dry-cleaner, the former repair garage at 1180 Walkey Road, and the gas stations at 1841, and 1847 Bank Street were considered to contribute to APECs.

The City of Ottawa also provided a site plan from 1970 showing the locations of the USTs on the site associated with the former gas station. The records indicate that three 5,000-gallon gasoline USTs and one 500-gallon waste oil UST were installed on the east side of the site.

A copy of the HLUI information is provided in Appendix C.

### 3.7.3 Environmental Registry

On July 26, 2022, the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. Search terms included Walkley Road, Bank Street, Glenhaven Private, Alta Vista Drive, and Transitway. The following records were found:

- An Environmental Compliance Approval (ECA) was issued to Suncor Energy Inc. in 2021 for the proposed re-development of the gas station located at 1847 Bank Street, including the removal and replacement of the existing sales kiosk, site lighting, internal and external storm and sanitary sewers, and the installation of an oil and grit separator.

A gas station is located at 1847 Bank Street, 60 m southeast of the Phase One property. Due to the proximity and the potential up-gradient location from the Phase One property, the gas station contributes to an APEC.

### 3.7.4 Environmental Access

On July 26, 2023, the MECP Environmental Access website was searched for postings within the Phase One study area. The following records were found:

- A Certificate of Approval (CA) was issued to the City of Ottawa in 2007 for air emissions associated with the operation of a standby diesel generator at the Walkley Transitway Station. An ECA was issued to the City of Ottawa in 2021 for the construction of sanitary and storm sewers to service the OLRT Trillium Line Walkley Station.
- A CA was issued in 2003 for a stormwater management system associated with the townhouse condominium complex at 1119 Walkley Road.
- A CA for air emissions associated the operation of a paint spray booth was issued to Jim Tubman Motors at 1770 Bank Street in 2005. A CA for a stormwater management system was issued for 1770 Bank Street in 2003.
- Two Permits to Take Water (PTTWs) were issued in the Phase One study area for dewatering operations associated with construction activities.

A repair garage was present at 1770 Bank Street, 140 m north of the Phase One property. Due to the distance and the cross-gradient location from the site, garage was not considered to contribute an APEC on the Phase One property. None of the other records reviewed were considered environmental concerns to the Phase One property.

### 3.7.5 Hazardous Waste Program Registry

On July 31, 2023, the MECP Hazardous Waste Program (HWP) Registry website was searched for registered waste generators within the Phase One study area. The following records were found:

Location (Generator)	Proximity to the Site	Wastes Generated	Years	Environmental Concern to Site (Yes/No) & Rationale
<b>Value Village</b> 1824 Bank Street ON9574861	Phase One property	Waste compressed gases, pathological wastes, non-halogenated pesticides, laboratory chemicals, detergent/soaps, pharmaceuticals, waste oils and lubricants, halogenated pesticides, aliphatic solvents, paint/pigment/coating residues, alkaline and acid wastes	2006 to present	No, operations at a thrift store do not generate significant quantities of hazardous wastes.
<b>Shoppers Drug Mart</b> 1180 Walkley Road ON6265345	30 m south	Pathological wastes, pharmaceuticals	2014 to present	No, it is not anticipated that significant quantities of wastes are generated by a pharmacy.

Location (Generator)	Proximity to the Site	Wastes Generated	Years	Environmental Concern to Site (Yes/No) & Rationale
<b>Walkley Medical Centre</b> 1852 Bank Street ON9083050	40 m south	Pathological wastes, pharmaceuticals	2012 to present	No, it is not anticipated that significant quantities of waste are generated by medical offices.
<b>Loblaws Inc.</b> 2681 Alta Vista Drive ON3202679	80 m northeast	Pathological wastes, pharmaceuticals, aliphatic solvents	2014 to present	No, it is not anticipated that significant quantities of wastes are generated by a pharmacy.
<b>Walkley Animal Hospital</b> 2679 Alta Vista Drive ON6159471	80 m northeast	Pathological wastes	2021 to present	No, it is not anticipated that significant quantities of waste are generated by veterinary offices.

No PCAs were identified on the HWP Registry.

### 3.7.6 Records of Site Condition

On July 31, 2023, the MECP Brownfields Registry website was searched for postings of Records of Site Condition within the Phase One study area.

- An RSC was filed for the property at 1841 Bank Street (RSC #36301) in 2007, 40 m east of the Phase One property. The RSC was filed using Table 3 SCS for commercial property use and coarse textured soil. Approximately 225 m<sup>3</sup> of impacted soil was removed from the property. Approximately 29,000 L of groundwater was removed during the excavation.
- An RSC was filed for the property at 1850 Bank Street (RSC #60123) in 2009, 40 m south of the Phase One property. The RSC was filed using Table 3 SCS for commercial property use and coarse textured soil. Approximately 1,500 m<sup>3</sup> of impacted soil was removed from the property. A total of 13,404 L of liquid waste (a combination of furnace oil removed from a UST and impacted groundwater) was removed during the decommissioning program.
- An RSC was filed for the property at 1172 Walkley Road (RSC #204726) in 2012, 40 m southwest of the Phase One property. The RSC was filed using Table 3 SCS for residential property use and fine textured soil. The property was remediated and approximately 1,400 m<sup>3</sup> of PAH impacted soil was removed from the property. No impacted groundwater was identified at the property.

### 3.7.7 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

### 3.7.8 PCB Storage Sites

The document entitled *Ontario Inventory of PCB Storage Sites* prepared by the MECP was reviewed. No records pertaining to PCB storage sites were identified within the Phase One study area.

### 3.7.9 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed. No former landfills or waste disposal sites were identified within the Phase One study area.

### 3.7.10 Former Industrial Sites

The document entitled *Mapping and Assessment of Former Industrial Sites; City of Ottawa* prepared by Intera Inc. was reviewed. No former industrial sites were located within the Phase One study area.

## 3.8 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the Phase One property and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the EcoLog ERIS report is provided in Appendix D.

The most pertinent entries are summarized below:

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
<b>1824 Bank Street</b>	Phase One property	Value Village, registered waste generator of halogenated solvents, laboratory chemicals, waste compressed gases, acid and alkaline wastes, waste oils and lubricants, detergents/soaps, pharmaceuticals, and paint/pigment/coating residues from 2006 to 2022 (ON9574861).	Ontario Regulation 347 Waste Generators Summary (GEN)	No, operations at a thrift store do not generate significant quantities of hazardous wastes.
<b>1830 Bank Street</b>	Phase One property	Kamaj, registered waste generator of pharmaceuticals and pathological wastes from 2000 to 2001 (ON2579300). Shopper Drug Mart, registered waste generator of pharmaceuticals and pathological wastes from 2000 to 2001 (ON2588407). Algonquin Careers Academy, registered waste generator of pathological wastes from 2014 to 2022 (ON7011016).	GEN	No, it is not anticipated that significant quantities of waste are generated by pharmacies, or dental offices (training).
<b>1820 Bank Street</b>	Phase One property	On-site dry-cleaning facility between the 1970s and 2018. Landry Land, registered waste generator of halogenated solvents from 1990 to 2012 (ON1343800). Bentall Kennedy (Canada) LP, registered waste generator of halogenated solvents in 2016 (ON8360581).	CDRY GEN	Yes, although the most recent subsurface investigations did not identify any impacts (Section 3.5), the potential impact beneath the building has not been assessed (PCA #37 – Operation of dry-cleaning equipment (where chemicals are used)).
<b>1818 Bank Street</b>	Northeast adjacent	Rebec & Kroes Cycle & Sport, registered waste generator of petroleum distillates from 1989 to 1998 (ON1239200).	GEN	No, it is not anticipated that significant quantities of wastes were generated at a bicycle repair shop.

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
<b>1800 Bank Street</b>	North adjacent	Dutch Girl Cleaners, registered waste generator of halogenated solvents from 1989 to 1998 (ON0500801). June 6, 1988, an unknown quantity of furnace oil was spilled from a leaking underground tank.	GEN Ontario Spills (SPL)	Yes, a unit in the north adjacent commercial building was formerly occupied by a dry cleaner (PCA #37 – operation of fry-cleaning equipment (where chemicals are used)) and an unknown quantity of furnace oil historically leaked from a UST.
<b>55 Glenhaven Private</b>	West adjacent	South Keys Landing, registered waste generator of oil skimmings and sludges in 2010 (ON5535313).	GEN	No, wastes were likely generated by property maintenance activities and are assumed to be insignificant.
<b>293 Westvalley Private</b>	30 m west	Norean Harris Property Manager, registered waste generator of waste oils/sludges from 2020 to 2021 (ON2844912).	GEN	No, wastes were likely generated by property maintenance activities and are assumed to be insignificant.
<b>1180 Walkley Road</b>	30 m south	Michelle Tijssen Drugs Ltd./Sajjad Giby Pharmacies Inc., registered waste generator of pathological wastes and pharmaceuticals from 2014 to 2022 (ON6265345).	GEN	No, it is not anticipated that significant quantities of wastes are generated by a pharmacy.
<b>1811 Bank Street</b>	40 m east	Mendes Toyota, registered waste generator of light fuels from 2007 to 2008 (ON9871543).	GEN	No, due to the distance of the service garage from the Phase One property (90 m east) (PCA #10 – Commercial autobody shops).
<b>1827 (now 1811) Bank Street</b>	40 m east	July 9, 2002, Daoust Construction reported 20 L of oil spilled from an old heater to the storm sewer. Paul Daoust Construction, registered waste generator of paint/pigment/coating residues, laboratory chemicals, light fuels, waste oils and lubricants from 2002 to 2004 (ON9849205).	SPL GEN	No, waste generation activities are assumed to have been associated with building demolition/construction. The small volumes of contaminant spilled is not considered a concern.
		Record for 750 L fuel oil UST installed in 1954.	DTNK	No, UST is assumed to be the same as shown in the 1957 FIP, which was located over 150 m east of the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
<b>1841 Bank Street</b>	40 m east	Former gas station, and active repair garage Records for four USTs installed in 1979, and two USTs installed in 1986.	DTNK PRT RST	Yes, due to the proximity to the Phase One property (PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>313 Southcrest Private</b>	60 m west	South Keys Landing, registered waste generator of oil skimmings and sludges in 2010 (ON3410400).	GEN	No, wastes were likely generated by property maintenance activities and are assumed to be insignificant.
<b>1850 Bank Street</b>	40 m south	Ambassador Realty, registered waste generator of light fuels in 2009 (ON5557382).	GEN	No, waste generation activities are assumed to be associated with remediation for an RSC which was filed in 2009.
<b>1852 Bank Street</b>	40 m south	Walkley Medical centre, registered waste generator of pathological wastes from 2012 to 2022 (ON9083050).	GEN	No, it is not anticipated that significant quantities of waste are generated by medical offices.
<b>1847 Bank Street</b>	60 m southeast	Active gas station; records for five USTs removed in 1974. Four USTs were installed in 1986, and four USTs were installed in 1992. June 16, 2014, approximately 70 L of gasoline was spilled to Roadway and catch basin. Suncor Energy Products, registered waste generator of light fuels, and waste oils/sludges from 2018 to 2022 (ON9078460).	PRT SPL GEN	Yes, due to the proximity and the inferred up-gradient location from the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>1792 Bank Street</b>	80 m north	W. Elias Associates, registered waste generator of light fuels in 2013 (ON843710).	GEN	No, due to the distance and cross gradient location from the Phase One property (PCA #10 – Commercial autobody shop).
<b>2679 Alta Vista Drive</b>	80 m northeast	Dhaliwal Veterinary Professional Corporation, registered waste generator of pathological wastes from 2021 to 2022 (ON6159471).	GEN	No, it is not anticipated that significant quantities of waste are generated by veterinary offices.
<b>2681 Alta Vista Drive</b>	80 m northeast	Loblaws Companies Ltd., registered waste generator of pharmaceuticals, and pathological wastes from 2014 to 2022 (ON3202679).	GEN	No, it is not anticipated that significant quantities of wastes are generated at a pharmacy.

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
<b>1883 Bank Street</b>	100 m southeast	Chadha Medical, registered waste generator of pathological wastes from 2014 to 2022 (ON6388927).	GEN	No, it is not anticipated that significant quantities of wastes are generated at a pharmacy.
<b>1860 Bank Street</b>	120 m south	March 31, 1995, approximately 30 L of diesel spilled to parking lot from tank overfilling. Randall's Paints, registered waste generator of paint/pigment/coating residues and aromatic solvents from 2002 to 2016 (ON2103000).	SPL	No, due to the small quantity of contaminant spilled. It is not anticipated that significant quantities of wastes are generated at a paint store.
<b>1770 Bank Street</b>	140 m north	May 2, 2000, Tubman Motors reported 680 L of waste oil spilled to ground.	SPL	No, due to the distance and cross-gradient location from the Phase One property. The spill was reported cleaned.

In addition to the databases outlined above the following entries from the EcoLog ERIS report were reviewed and summarized below:

- The Certificate of Approval and Environmental Compliance Approval databases identified ten records in the Phase One study area. Seven of the records were for municipal water/sewer works. Three of the records were for industrial air emissions (restaurant kitchen exhaust, paint spray booth, and a waste oil furnace);
- The Ontario Spills database identified ten records in the Phase One study area for contaminant spills for quantities less than 10 litres. Due to the small volume of contaminant spilled, these spills were not considered an environmental concern to the Phase One property.
- The Pesticide Register database identified three records for pesticide vendors in the Phase One property. As it is anticipated that pesticides are sold in retail containers, and significant quantities of pesticides are not being applied to the ground at these properties, these records are not considered an environmental concern to the site.
- The Pipeline Incidents database and Ontario Spills database identified one record for a carbon monoxide spill in the Phase One study area. As carbon monoxide is discharged to the atmosphere, this records is not considered a concern to the Phase One property; and,
- The Water Well Information System (WWIS) identified 25 records in the Phase One study area. Nine of the records were for water supply wells installed between 1949 and 1959. As municipal services are now present in the Phase One study area, it is unlikely that these wells are still in use. The remaining well records were for monitoring wells.

Based on a review of the Ecolog, no additional PCAs have been identified in the Phase One study area other than those mentioned in previous sections.

## 3.9 Physical Setting Sources

### 3.9.1 Aerial Photographs

Aerial photographs dated 1954, 1965, 1976, 1991, 2002, 2005, 2014, and 2021 were available for review on the City of Ottawa website. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs. Copies of the aerial photographs are provided in Appendix E.

Aerial Photograph (year)	Details
1954	The Phase One property is vacant. Rail lines are present along the west property boundary, and approximately 150 m west of the Phase One property. Bank Street and Walkley Road are both present. Sawmill Creek is present approximately 300 m west of the Phase One property. Several commercial buildings appear to be present to the north of the site along Bank Street, and residential properties are present to the southeast. The remainder of the properties in the Phase One study area are mostly undeveloped.
1965	A commercial building is present on the southeast corner of the Phase One property. A rail siding runs from the northwest corner of the building and connects to a rail line to the north of the site. Commercial and light industrial properties were present to the north and south along Bank Street. Properties to the northwest and southeast of the Phase One property were residential. Gas stations are present at 1841, 1847 and 1877 Bank Street.
1976	The building and the rail siding on the Phase One property has been demolished, and the existing site building is present. Outside of the building footprint, the Phase One property is occupied by a parking lot. Several additional commercial buildings have been constructed along Bank Street.
1991	The Phase One property appears similar to the 1991 aerial photograph. The gas station at 1841 Bank Street has been replaced with a new gas station and repair garage. The gas station is no longer present at 1877 Bank Street. A multi-tenant commercial building has been constructed on the north adjacent property. The remainder of the Phase One study area appears similar to the 1976 aerial photograph.
2002	The Phase One property and study area appear similar to the 1991 aerial photograph.
2005	The gas station is no longer present at 1841 Bank Street. The Phase One property and remainder of the Phase One study area appear similar to the 2002 aerial photograph.
2014	The commercial buildings at 1811 Bank Street have been demolished and replaced by a car dealership and service garage. The Phase One property and study area appear similar to the 2005 aerial photograph.
2021	The Phase One property and study area appear similar to the 2014 aerial photograph.

Based on the review of the aerial photographs, no additional PCAs have been identified in the Phase One study area other than those mentioned in previous sections.

### 3.9.2 Topography, Hydrology, Geology

The following information sources were reviewed to determine the nature of the subsurface materials at the site:

- Map 1506A, Surficial Geology, Ottawa- Hull. Scale 1:50,000. 1982;
- Map 1508A, Generalized Bedrock Geology, Ottawa- Hull. Scale 1:125,000. 1980; and,
- MECP Water Well Records.

Beneath any fill, the surficial geology of the subject site is characterised by Champlain Sea fine textured glacial marine deposits of silt and clay. The bedrock geology underlying the site consists of shale of the Carlsbad Formation.

Previous investigations have determined that the site geology generally consists of clay, sand and gravel fill overlying shale bedrock. Bedrock is present between 0.9 m and 2 metres below ground surface across the Phase One property.

Topographically, the Phase One property is relatively flat. Regionally, topography slopes to the west towards Sawmill Creek. Ground surface elevation at the Phase One property is approximately 90 metres above sea level.

### 3.9.3 Fill Materials

Granular fill material is likely present across the site as a base for the buildings and parking lot. Previous investigations identified between 0.9 and 2 metres of clay, sand, and gravel fill at the property. The fill material identified at the Phase One property is a potentially contaminating activity (PCA #30 – Importation of fill material of unknown quality).

### 3.9.4 Water Bodies and Areas of Natural Significance

There are no water bodies on the subject site. The closest body of water is Sawmill Creek, located approximately 300 m west of the Phase One property. Sawmill Creek flows to the north towards the Rideau River. The inferred groundwater flow direction is to the north-northwest towards the Rideau River.

There are no Areas of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website ([www.gisapplication.lrc.gov.on.ca/mamnh/Index.html](http://www.gisapplication.lrc.gov.on.ca/mamnh/Index.html)).

### 3.9.5 Well Records

The Ontario well records website (<https://www.ontario.ca/page/map-well-records>) was accessed. There were 52 well records for the Phase One study area. None of the well records appear to be for the Phase One property, although historically there were monitoring wells present on the site.

Eighteen of the records were for water supply wells installed between 1949 and 1959. As municipal services are now present in the Phase One study area, it is unlikely that these wells are still in use.

The remaining well records were for monitoring wells. There were 17 records for the installation/abandonment of monitoring wells at 1841 Bank Street. Ten of the records were for monitoring wells installed by the city in the Bank Street right-of-way between Surrey Avenue and Alta Vista Drive.

It is acknowledged that the number of wells within the Phase One study area identified by EXP when searching the database doesn't match exactly the number of wells documented in the ERIS report. The discrepancy is likely related to the search radius, which is measured from the centre of the Phase One property for the ERIS report.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library ([maps.ogsrlibrary.com/wells/](http://maps.ogsrlibrary.com/wells/)).

## 3.10 Site Operating Records

No site operating records were provided to EXP for review.

## 3.11 Summary of Records Review

Based on a review of the available records, the following PCAs were identified in the Phase One study area:

- PCA 1: 1822 Bank Street – former on-site rail siding (PCA #46)
- PCA 2: Glenhaven Private – former rail line (PCA #46)
- PCA 3: 1841 Bank Street – former gas station (PCA #28)
- PCA 4: 1841 Bank Street – active repair garage (PCA #10)
- PCA 5: 1827 (1811 Bank Street – former contractor's repair garage (PCA #10)
- PCA 6: 1827 (1811) Bank Street – former UST (PCA #28)
- PCA 7: 1847 Bank Street – active gas station (PCA #28)
- PCA 8: 1877 Bank Street – former gas station (PCA #28)
- PCA 9: 1846 Bank Street (Phase One property) – former dry cleaner (PCA #37)
- PCA 10: 1832 Bank Street (Phase One property) – former gas station (PCA #28)
- PCA 11: 1800 Bank Street – former dry cleaner (PCA #37)

- PCA 12: 1811 Bank Street – car dealership with repair garage (PCA #10)
- PCA 13: 1811 Bank Street – gasoline and waste oil USTs for car dealership (PCA #28)
- PCA 14: 1850 Bank Street – former car dealership with repair garage (PCA #10)
- PCA 15: 1850 Bank Street – Former gasoline and waste oil USTs (PCA #28)
- PCA 16: 1792 Bank Street – active repair garage (PCA #10)
- PCA 17: 1792 Bank Street – former gas station (PCA #28)
- PCA 18: 1770 Bank Street – car dealership with repair garage (PCA #10)
- PCA 19: 1770 Bank Street – gasoline and waste oil UST for car dealership/repair garage (PCA #28)
- PCA 20: 1820-1846 Bank Street – fill material of unknown quality (PCA #30)
- PCA 21: 2629 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 22: 2706 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 23: 1750 Bank Street – former repair garage (PCA #10)
- PCA 24: 1750 Bank Street – former gas stations (PCA #28)
- PCA 25: 1750 Bank Street – former dry cleaner (PCA #37)

## 4.0 Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable about both the current and historical Phase One property uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the Phase One property.

Mr. Marco Polcaro, Property Manager for BentallGreenOak, was interviewed during the site visit on July 18, 2023. Mr. Polcaro has managed the Phase One property since 2019.

Some previous asbestos-containing materials (ACM), including drywall joint compound, were removed as part of renovations at 1846 Bank Street. It is assumed likely that ACM are present throughout the site-building.

He was unaware of any environmental issues with the Phase One property.

## 5.0 Site Reconnaissance

### 5.1 General Requirements

On July 18, 2023, at 9:00 am, Ms. Leah Wells of EXP conducted the site visit in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The weather was overcast with an approximate temperature of 12 degrees Celsius. The site visit lasted approximately 60 minutes. It is noted that Chris Kimmerly, M.Sc., P.Geo., of EXP also completed a site visit on June 13, 2024 as a follow-up.

The general environmental management and housekeeping practices at the Site were reviewed as part of this assessment insofar as they could impact the environmental condition of the property; however, a detailed review of regulatory compliance issues was beyond the scope of EXP's investigation.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

Photographs documenting the site visit are included in Appendix F.

### 5.2 Specific Observations at the Phase One Property

#### 5.2.1 Buildings and Structures

The Phase One property is occupied by single-storey, slab-on-grade commercial buildings containing multiple units. The building has an approximate footprint of 42,240 square feet. At the time of the visit, the building tenants included Value Village, Algonquin Careers Academy, Ruby Inn (restaurant), Bel-O-Sol (tanning salon), Savannah Afro Caribbean (retail), and Hera Beauty (retail). Outside of the building footprint, the Phase One property mainly consists of the asphalt parking lot.

#### 5.2.2 Site Utilities and Services

The Site is serviced with municipal sewer and water, hydro and natural gas.

### 5.3 Storage Tanks

#### 5.3.1 Underground Storage Tanks

EXP did not observe any evidence of underground storage tanks (USTs), such as vent and fill pipes, during the site reconnaissance. Furthermore, the historical review did not identify any former USTs at the site.

#### 5.3.2 Above Ground Storage Tanks

No above-ground storage tanks (ASTs) were observed on the Phase One property.

### 5.4 Chemical Storage Handling and Floor Condition

Chemical use on the Phase One property was limited to small quantities of commonly available retail-sized containers of cleaners and detergents. All chemicals observed on the Site were stored in small quantities and in their original retail packaging or approved containers. As such, the potential environmental concern to the subsurface environmental conditions of the Site from the use of chemicals is low.

### 5.5 Areas of Stained Soil, Pavement or Stressed Vegetation

No staining was observed on the Site at the time of EXP's site visit. No significant vegetation was present on the Phase One property.

## 5.6 Fill and Debris

Granular fill material is likely present across the site as a base for the buildings and parking lot.

## 5.7 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. According to the Environmental Protection Act (EPA), an ECA (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29, 1988.

No air emissions of concerns were identified at the time of the site visit.

## 5.8 Odours

No strong odours were present during the site visit.

## 5.9 Noise

No excessive noise was heard during the site visit.

## 5.10 Other Observations

There were no pits and lagoons, no railways or spurs and no unidentified substances observed on the Phase One property.

## 5.11 Special Attention Items, Hazardous Building Materials and Designated Substances

### 5.11.1 Asbestos

Asbestos-containing materials (ACM) are fibrous hydrated silicates and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-friable asbestos refers to asbestos that is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACM in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHSA). Under OHSA, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACM was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

The site representative indicated that in accordance with an Asbestos Abatement Completion Letter issued in July of 2019, ACM drywall joint compound sections were removed when unit 1840 was renovated from 1846 Bank Street. Based on the Asbestos Assessment completed by Pinchin in April of 2019 for the Walkley Centre indicates that potentially friable 24" x 48" acoustic ceiling tiles with long lengthwise fissures and small medium pinhole pattern and pink backing are potentially present in Unit 1738. In addition, the Asbestos Assessment report indicates that asbestos-containing drywall compound along walls and ceilings is present throughout the building.

### 5.11.2 Ozone Depleting Substances (ODSs)

Chlorofluorocarbons (CFC), often referred to as freons, ceased production in Canada in 1993 as a result of their ozone-depleting characteristics. Under the Montreal Protocol, importation of CFCs into Canada ceased in 1997 and all developed countries agreed to a total ban on their use by 2030.

Based on the age of the building on the Phase One property, it is possible that ODS are present. Maintenance of refrigerant-containing equipment should continue to be completed by a licensed refrigeration contractor. The equipment should only be repaired, removed, or serviced by an appropriately licensed contractor.

### 5.11.3 Lead

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinplate and plumbing. The use of lead-based paints (LBPs) was phased out *circa* 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain higher levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the age of the building at the Phase One property, it is possible that LBPs are present.

### 5.11.4 Mercury

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove "interior uses" from their product labels.

Based on the age of the building at the Phase One property, it is possible that mercury-containing paints are present. No mercury-containing equipment was observed at the site, although it is noted that not all of the units were accessed.

### 5.11.5 Polychlorinated Biphenyls (PCB)

The manufacture of PCB in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Phase One property. Potential equipment, which could contain PCB include fluorescent mercury and sodium vapour light ballasts, oil-filled capacitors and transformers. Any electrical equipment containing PCB must be disposed of in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCB is permissible.

There was no evidence of PCB-containing equipment on the Phase One property. Based on the ages of the building on the Phase One property, PCB-containing equipment may be present. A transformer was located on the southwest corner of the site. As the transformer was installed in 2019, it is unlikely that PCBs are present.

### 5.11.6 Urea Formaldehyde Foam Insulation

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets, and fabrics, and it contributes to "that new house smell."

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose, and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. The further use of UFFI was banned in Canada in 1980.

No evidence of UFFI was observed during the site visit.

### 5.11.7 Radon

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints, and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerels per cubic metre (Bq/m<sup>3</sup>) where radon gas is present and the annual radon concentration exceeds 200 Bq/m<sup>3</sup> in the normal occupancy area.

A radon gas assessment was beyond the scope of this Phase One ESA, and as such, radon gas was not assessed. The Radon Potential Map of Ontario created by Radon Environmental indicates that the Phase One property is located in Zone 3 – Guarded, which has the lowest potential for radon. The zones are identified based on regional geologic conditions. It is noted that although the property is located in Zone 3, a wide spectrum of readings can occur in all zones.

### 5.11.8 Mould

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow, a food source (i.e. gypsum wallboard, wallpaper, wood, etc.) and moist conditions are required. Mould can have an impact on human health depending on the species and concentration of the airborne mould spores. Health effects can include allergies and mucous membrane irritation.

Currently, there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment, the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled “Mould Guidelines for the Canadian Construction Industry” and the Environmental Abatement Council of Ontario (EACO) guidelines titled “EACO Mould Abatement Guidelines, Edition 3 (2015).”

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

No indication of mould or water damage were observed during the site visit.

## 5.12 Other Substances

No other special attention substances (such as acrylonitrile or isocyanates) were suspected to be present at the Phase One property at the time of site reconnaissance.

## 5.13 Processing and Manufacturing Operations

No processing or manufacturing operations were observed at the Phase One property.

## 5.14 Hazardous Materials Use and Storage

No hazardous materials are used or stored at the Phase One property.

## 5.15 Vehicle and Equipment Maintenance Areas

No vehicle or equipment maintenance was observed at the Phase One property.

## 5.16 Oil/Water Separators

No oil/water separators were present on the Phase One property.

## 5.17 Sewage and Wastewater Disposal

Sewage and wastewater generated at the Phase One property are disposed of via the municipal system.

## 5.18 Solid Waste Generation, Storage & Disposal

Wastes generated at the Phase One property are primarily limited to household wastes. Wastes for most of the tenants is stored in metal bins at the southwest corner of the Phase One property. A large hydraulic compactor is present for Value Village at the north end of the side building.

A dental office used for training purposes is present at Algonquin Careers Academy which generates small quantities of pathological wastes.

## 5.19 Liquid Waste Generation, Storage & Disposal

A grease bin for the restaurant was located on the west side of the site-building. No other liquid wastes were generated on the Phase One property.

## 5.20 Unidentified Substances

No unidentified substances were observed on the Phase One property at the time of the site visit. No dumping or any other deleterious materials were identified.

## 5.21 Hydraulic Lift Equipment

No hydraulic equipment of concern was observed at the Phase One property. A hydraulic garbage compactor was present for the Value Village unit.

## 5.22 Mechanical Equipment

No mechanical equipment of concern was present on the Phase One property.

## 5.23 Abandoned and Existing Wells

There are no potable wells present on the Phase One property. Four monitoring wells from previous investigations were observed on the site, two of which were damaged. Additional monitoring wells which were identified in previous reports, but not located on the Phase One property are shown on Figure 3.

## 5.24 Roads, Parking Facilities and Right of Ways

Vehicular access to the Phase One property is via Bank Street or Walkley Road.

## 5.25 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within 250 m of the Phase One property was conducted from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the Phase One property. Refer to Figure 3 in Appendix C for the adjacent land uses.

The following land uses border the Phase One property:

- North: Commercial (retail);
- West: Residential;

- East: Commercial (car dealership, repair garage, gas station); and
- South: Commercial (retail).

Multiple auto repair garages and a gas station were observed in the Phase One study area. No PCAs were identified that had not been previously identified during the records review.

## 5.26 Enhanced Investigation Property

Ontario Regulation 153/04 defines an enhanced investigation property as a “property that is used, or has ever been used, in whole or in part for an industrial use or any of the following commercial uses: a garage; a bulk liquid dispensing facility, including a gasoline outlet; or, for the operation of dry-cleaning equipment.”

As both a dry-cleaner and a gas station were historically present on the Phase One property, in accordance with Regulation 153/04, the property is considered an enhanced investigation property.

## 5.27 Summary and Written Description of Investigation

At the time of the investigation, the Phase One property was occupied by a commercial strip mall.

Based on the findings of this investigation, the following PCA have been identified in the Phase One study area:

- PCA 4: 1841 Bank Street – active repair garage (PCA #10)
- PCA 7: 1847 Bank Street – active gas station (PCA #28)
- PCA 12: 1811 Bank Street – car dealership with repair garage (PCA #10)
- PCA 16: 1792 Bank Street – active repair garage (PCA #10)
- PCA 18: 1770 Bank Street – car dealership with repair garage (PCA #10)
- PCA 20: 1820-1846 Bank Street – fill material of unknown quality (PCA #30)

## 6.0 Review and Evaluation of Information

### 6.1 Current and Past Uses

Based on a review of historical aerial photographs, and other records review, the Phase One property was vacant and not in use for agricultural purposes until the subject site was first developed for commercial use between 1954 and 1965. The Phase One property was initially occupied by Webster & Son Ltd., a building supplies store. The original building was demolished, and the existing commercial building was constructed on the Phase One property in the early 1970s.

### 6.2 Potentially Contaminating Activity

Ontario Regulation (O. Reg.) 153/04 defines a Potential Contaminating Activity (PCA) as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D that occurs or has occurred in the Phase One study area.

The following PCAs were identified:

- PCA 1: 1822 Bank Street – former on-site rail siding (PCA #46)
- PCA 2: Glenhaven Private – former rail line (PCA #46)
- PCA 3: 1841 Bank Street – former gas station (PCA #28)
- PCA 4: 1841 Bank Street – active repair garage (PCA #10)
- PCA 5: 1827 (1811 Bank Street – former contractor's repair garage (PCA #10)
- PCA 6: 1827 (1811) Bank Street – former UST (PCA #28)
- PCA 7: 1847 Bank Street – active gas station (PCA #28)
- PCA 8: 1877 Bank Street – former gas station (PCA #28)
- PCA 9: 1846 Bank Street (Phase One property) – former dry cleaner (PCA #37)
- PCA 10: 1832 Bank Street (Phase One property) – former gas station (PCA #28)
- PCA 11: 1800 Bank Street – former dry cleaner (PCA #37)
- PCA 12: 1811 Bank Street – car dealership with repair garage (PCA #10)
- PCA 13: 1811 Bank Street – gasoline and waste oil USTs for car dealership (PCA #28)
- PCA 14: 1850 Bank Street – former car dealership with repair garage (PCA #10)
- PCA 15: 1850 Bank Street – Former gasoline and waste oil USTs (PCA #28)
- PCA 16: 1792 Bank Street – active repair garage (PCA #10)
- PCA 17: 1792 Bank Street – former gas station (PCA #28)
- PCA 18: 1770 Bank Street – car dealership with repair garage (PCA #10)
- PCA 19: 1770 Bank Street – gasoline and waste oil UST for car dealership/repair garage (PCA #28)
- PCA 20: 1820-1846 Bank Street (Phase One property) – fill material of unknown quality (PCA #30)
- PCA 21: 2629 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 22: 2706 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 23: 1750 Bank Street – former repair garage (PCA #10)

- PCA 24: 1750 Bank Street – former gas stations (PCA #28)
- PCA 25: 1750 Bank Street – former dry cleaner (PCA #37)

All of the on-site PCAs were determined to result in APECs. A dry cleaner (PCA 9) operated in the northernmost unit from the 1970s until 2018. A gas station (PCA 10) was present on the east part of the site for a brief period in the 1970s. Previous investigations conducted on this part of the site identified tetrachloroethylene (PCE) impacted soil and groundwater, although it is noted that the most recent investigation conducted by Pinchin Limited did not identify any exceedances of the applicable standards in the monitoring wells sampled near the former on-site dry cleaner or gas station. The previous investigation also identified between 0.9 m and 2 m of fill material on the Phase One property (PCA 20). A rail siding (PCA 1) was historically located on the Phase One property prior to the construction of the existing site building.

With respect to off-site PCAs, due to the proximity and/or inferred upgradient location from the Phase One property, the gas stations at 1841 and 1847 Bank Street, the repair garages/car dealerships at 1841 and 1850 Bank Street, the former rail line to the west, and the former dry cleaner at 1800 Bank Street were considered to contribute to APECs on the Phase One property.

The remaining PCAs identified in the Phase One study area were located at least 100 m from the Phase One property and/or down/cross-gradient to the Phase One property and were not considered to contribute to APECs on the Phase One property.

### 6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present. The following APECs were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1. Former on-site dry-cleaner	North end of site building	PCA #37 – Operations of dry cleaning equipment (where chemicals are used) (PCA 9)	On-site	VOC	Soil and groundwater
#2. Former on-site gas station	East part of Phase One property	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 10)	On-site	PHC, VOC, metals	Soil and groundwater
#3. Former on-site rail siding	Northwest part of Phase One property	PCA #46 – Rail yard, tracks, and spurs (PCA 1)	On-site	PAH, metals	Soil
#4. Fill material	Entire Phase One property	PCA #30 – Importation of fill material of unknown quality (PCA 20)	On-site	PHC, PAH, metals	Soil
#5. Former dry cleaner at 1800 Bank Street & historical furnace oil leak from UST	Along the north property line	PCA #37 – Operations of dry cleaning equipment (where chemicals are used) and PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 10 & 11)	Off-site	PHC, VOC	Soil and groundwater
#6. Former gas station at 1841 Bank Street	Along southeast property line	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 3)	Off-site	PHC, VOC	Soil and groundwater

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#7. Repair garage at 1841 Bank Street	Along southeast property line	PCA #10 – Commercial autobody shop (PCA 4)	Off-site	PHC, VOC, metals	Soil and groundwater
#8. Gas station at 1847 Bank Street	Along southeast property line	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 7)	Off-site	PHC, VOC	Soil and groundwater
#9. Former car dealership at 1850 Bank Street	Along south property line	PCA #10 – Commercial autobody shop (PCA 14)	Off-site	PHC, VOC, metals	Soil and groundwater
#10. Former USTs associated with car dealership at 1850 Bank Street	Along south property line	PCA #28 – Gasoline and associated products storage in fixed tanks (PCA 15)	Off-site	BTEX, PHC	Soil and groundwater
#11. Former rail line to the west of the site	Along west property line	PCA #46 – Rail yard, tracks, and spurs (PCA 2)	Off-site	PAH, metals	Soil

## 6.4 Phase One Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 2.

### 6.4.1 Buildings and Structures

The Phase One property is occupied by single storey, slab on grade commercial buildings containing multiple units. The building has an approximately footprint of 42,240 square feet. At the time of the visit, the building tenants included Value Village, Algonquin Careers Academy, Ruby Inn (restaurant), Bel-O-Sol (tanning salon), Savannah Afro Caribbean (retail), and Hera Beauty (retail). Outside of the building footprint, the Phase One property mainly consists of asphalt parking lot.

### 6.4.2 Water Bodies and Groundwater Flow Direction

There are no water bodies on the subject site. The closest body of water is Sawmill Creek, located approximately 300 m west of the Phase One property. Sawmill Creek flows to the north towards the Rideau River. The inferred groundwater flow direction is to the north-northwest towards the Rideau River.

### 6.4.3 Areas of Natural Significance

There are no ANSI within the Phase One study area.

### 6.4.4 Water Wells

There were 52 well records for the Phase One study area. None of the well records appear to be for the Phase One property, although historically there were monitoring wells present on the site.

Eighteen of the records were for water supply wells installed between 1949 and 1959. As municipal services are no present in the Phase One study area, it is unlikely that these wells are still in use.

The remaining well records were for monitoring wells. There were 17 records for the installation/abandonment of monitoring wells at 1841 Bank Street. Ten of the records were for monitoring wells installed by the city in the Bank Street right-of-way between Surrey Avenue and Alta Vista Drive.

### 6.4.5 Potentially Contaminating Activity

Based on the findings of this investigation the following PCA have been identified in the Phase One study area:

- PCA 1: 1822 Bank Street – former on-site rail siding (PCA #46)
- PCA 2: Glenhaven Private – former rail line (PCA #46)
- PCA 3: 1841 Bank Street – former gas station (PCA #28)
- PCA 4: 1841 Bank Street – active repair garage (PCA #10)
- PCA 5: 1827 (1811 Bank Street – former contractor's repair garage (PCA #10)
- PCA 6: 1827 (1811) Bank Street – former UST (PCA #28)
- PCA 7: 1847 Bank Street – active gas station (PCA #28)
- PCA 8: 1877 Bank Street – former gas station (PCA #28)
- PCA 9: 1846 Bank Street (Phase One property) – former dry cleaner (PCA #37)
- PCA 10: 1832 Bank Street (Phase One property) – former gas station (PCA #28)
- PCA 11: 1800 Bank Street – former dry cleaner (PCA #37)
- PCA 12: 1811 Bank Street – car dealership with repair garage (PCA #10)
- PCA 13: 1811 Bank Street – gasoline and waste oil USTs for car dealership (PCA #28)
- PCA 14: 1850 Bank Street – former car dealership with repair garage (PCA #10)
- PCA 15: 1850 Bank Street – Former gasoline and waste oil USTs (PCA #28)
- PCA 16: 1792 Bank Street – active repair garage (PCA #10)
- PCA 17: 1792 Bank Street – former gas station (PCA #28)
- PCA 18: 1770 Bank Street – car dealership with repair garage (PCA #10)
- PCA 19: 1770 Bank Street – gasoline and waste oil UST for car dealership/repair garage (PCA #28)
- PCA 20: 1820-1846 Bank Street – fill material of unknown quality (PCA #30)
- PCA 21: 2629 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 22: 2706 Alta Vista Drive – dry cleaner (PCA #37)
- PCA 23: 1750 Bank Street – former repair garage (PCA #10)
- PCA 24: 1750 Bank Street – former gas stations (PCA #28)
- PCA 25: 1750 Bank Street – former dry cleaner (PCA #37)

### 6.4.6 Areas of Potential Environmental Concern

The following APECs were identified:

- APEC #1 – North end of site building (PCA 9)
- APEC #2 – East part of Phase One property (PCA 10)
- APEC #3 – Northwest part of Phase One property (PCA 1)

- APEC #4 – Entire Phase One property (PCA 20)
- APEC #5 – Along north property line (PCA 10 & 11)
- APEC #6 – Along southeast property line (PCA 3)
- APEC #7 – Along southeast property line (PCA 4)
- APEC #8 – Along southeast property line (PCA 7)
- APEC #9 – Along south property line (PCA 14)
- APEC #10 – Along south property line (PCA 15)
- APEC #11 – Along west property line (PCA 2)

#### **6.4.7 Subsurface Stratigraphy**

Beneath any fill, the surficial geology of the subject site is characterised by Champlain Sea fine textured glaciarmarine deposits of silt and clay. The bedrock geology underlying the site consists of shale of the Carlsbad Formation.

Previous investigations have determined that the site geology generally consists of clay, sand and gravel fill overlying shale bedrock. Bedrock is present between 0.9 m and 2 metres below ground surface across the Phase One property.

Topographically, the Phase One property is relatively flat. Regionally, topography slopes to the west towards Sawmill Creek. Ground surface elevation at the Phase One property is approximately 90 metres above sea level.

#### **6.4.8 Uncertainty Analysis**

The CSM is a simplification of reality, which aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

## 7.0 Conclusions

The Qualified Person who oversaw this work, Leah Wells P.Eng., recommends that a Phase Two ESA be conducted to address the APEC identified on the Phase One property.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

## 9.0 Limitation of Liability, Scope of Report, and Third Party Reliance

This report was prepared pursuant to and in accordance with the master services agreement (the “MSA”) dated April 8, 2019 between EXP Services Inc. (“Consultant”) and the other parties listed thereto, and the project specific agreement dated June 29, 2023 between Consultant and BentallGreenOak (Canada) LP.

The report was prepared by Consultant for the use of Owner and Manager (as those terms are defined under the MSA). In addition to the use of and reliance on this report by Owner and Manager, any person who has received a reliance letter for this report may use and rely on this report as if it was prepared for such persons. Any use of or reliance on this report by any other person (i.e., a person other than any Owner, Manager or otherwise permitted person) is the sole and exclusive responsibility of such other person. Consultant accepts no responsibility for damages, if any, suffered by such other person as a result of the use of or reliance on this report.

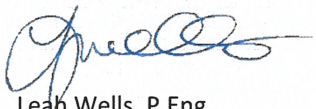

This report is based on the best information available to Consultant at the time of preparing this report after Consultant has used best industry practices, in the circumstances, to obtain information. To the extent that Consultant was required to rely on information from other persons, Consultant has verified such information to the extent reasonably possible in the circumstances. The material provided in this report reflects best industry judgment in light of the information available at the time of preparation of this report.

## **Appendix A: Qualifications of Assessors**

## Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment, Conservation and Parks. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

**Chris Kimmerly, M.Sc., P.Geo.**, has more than 28 years of environmental consulting experience, 27 of which have been with EXP. A graduate of Brock University with a Master of Science Degree in Geological Science, His technical experience includes managing, coordinating, and conducting environmental site assessments; groundwater sampling programs; soil and groundwater remedial action and risk mitigation plans; mineral aggregate assessments; hydrogeological and terrain analysis assessments; designated substances and hazardous materials surveys.

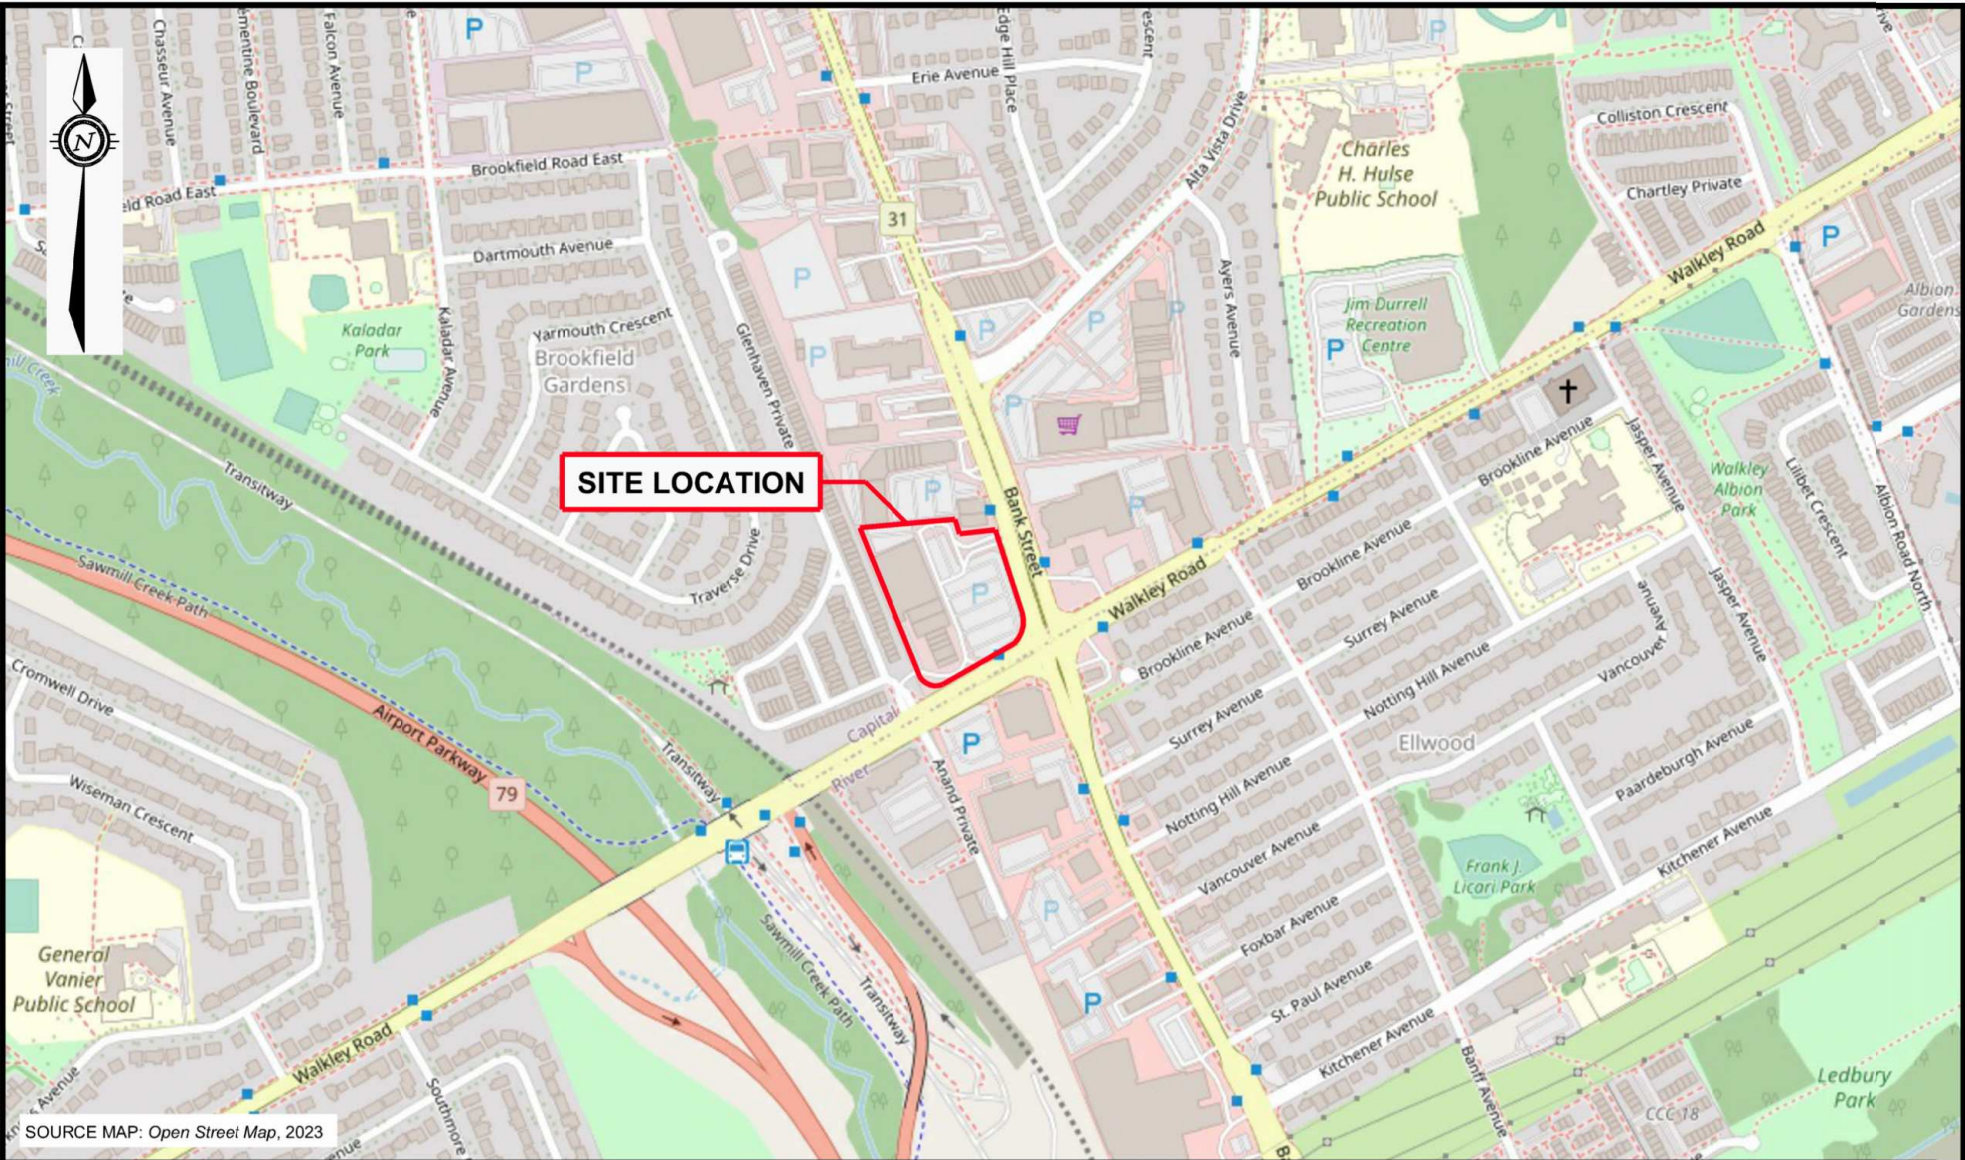

**Leah Wells, P.Eng.**, is an Environmental Engineer who has been working in the consulting field since 2018. She has worked on numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, completing soil and groundwater sampling, soil vapour sampling, assisting in report preparation and data entry and analysis. Ms. Wells earned her B.A.Sc. in geological engineering at the Queen's University. She is licensed as a professional engineer in Ontario.

Dear Leah Wells:

RE: **MECP FOI A-2023-04539, Your Reference OTT-23002538-A0 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 1822 - 1846 Bank Street, Ottawa.

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Adeolu Paul-Taiwo at [adeolu.paul-taiwo@ontario.ca](mailto:adeolu.paul-taiwo@ontario.ca).

Yours truly,

*Adeolu*

for  
Josephine DeSouza  
Manager (A), Access and Privacy Office

RE: CITY DIRECTORY RESEARCH  
1822 Bank Street  
Ottawa, ON K1V

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

2675-2685 Odd of Alta Vista Drive  
2714 of Alta Vista Drive  
555-655 of Anand Private  
1770-1895 of Bank Street  
1822 of Bank Street  
1200-1245 of Brookline Avenue  
1-100 of Glenhaven Private  
2525-2540 of Needham Crescent  
300-325 of Southcrest Private  
1200-1230 of Surrey Avenue  
2575-2650 of Traverse Drive  
1165-1240 of Walkley Road  
200-300 of Westvalley Private

**Search Notes:**

Bank Street is also known as 1840 Bank Street in Ottawa.

# Opta Historical Environmental Services Enviroscan<sup>TM</sup>

## Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

FS Liquid Fuel Tank

Tank Type:

Liquid Fuel Single Wall UST

Install Date:

5/15/2009

Install Year:

1974

Years in Service:

Model:

NULL

Description:

Capacity:

22750

Tank Material:

Steel

Corrosion Protect:

Sacrificial anode

Overfill Protect:

Facility Type:

FS Liquid Fuel Tank

Parent Facility Type:

Facility Location:

Device Installed Location:

1847 BANK ST OTTAWA K1V 7Z7 ON CA

Manufacturer:

Serial No:

Ulc Standard:

Quantity:

Unit of Measure:

Fuel Type:

Gasoline

Fuel Type2:

NULL

Fuel Type3:

NULL

Piping Steel:

Piping Galvanized:

Tanks Single Wall St:

Piping Underground:

No Underground:

**Description:**

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to pay the fine.

**Penalty Imposed:**

**Description:**

On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Feb 28, 2022**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2021**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Feb 28, 2023**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -May 2023**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Apr 2023**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - May 31, 2023**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022**

**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011- May 31, 2023**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - May 31, 2023**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- May 31, 2023**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jun 30, 2023**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date:** Apr 30, 2022

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2022

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Mar 2023

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** May 31, 2018

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2023****National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\*****Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021****National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\*****National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Oct 2022****National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\*****National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021****National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2023****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - May 31, 2023****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011- May 31, 2023

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - May 31, 2023

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2021

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-May 2023

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Feb 28, 2023

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** 1988-Oct 2021

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date:** 1990-Dec 31, 2020

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date:** 1915-1953\*

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date:** 1970 - Apr 2020

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date:** Oct 2011- May 31, 2023

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date:** Up to Oct 1990\*

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date:** Mar 31 2023

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
