Subject property looking South-West

UTILITY NOTES

1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
2. Only visible surface utilities were located.
3. Underground utility data derived from City of Ottawa utility sheet reference 1442 (Sheet 2 of 5).
4. Sanitary and storm sewer grades and inverts were derived from City of Ottawa utility sheet reference 1442 (Sheet 2 of 5) and field measurement.
5. A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating etc.

ELEVATION NOTES

1. Elevations shown are geodetic and are referred to the CGVD28 geodetic datum, derived from City of Ottawa benchmark No. G-38 (Index No. 313) having a published elevation of 60.816 metres.
2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

Bearings are given derived from Can-Net 2016 Real Time Network GPS observations, MTM Zone 9 (78°36' West Longitude) NAD-83 (original).
For bearing comparisons, a rotation of 0°00'20" counter-clockwise was applied to bearings on FS & FS.

SURVEYOR'S REAL PROPERTY REPORT

PART 1 Plan of
PART 1 of
CONCESSION JUNCTION GORE
GEOGRAPHIC TOWNSHIP OF GLOUCESTER
CITY OF OTTAWA
Surveyed by Annis, O'Sullivan, Vollebakk Ltd.

Scale 1 : 200

0 0.5 1 1.5 2 2.5 3 3.5 4 4.5 5 5.5 6 6.5 7 7.5 8 Metres

Metric

DISTANCES SHOWN ON THIS PLAN ARE IN METRES AND CAN BE CONVERTED TO FEET BY DIVIDING BY 0.3048

Surveyor's Certificate

I CERTIFY THAT:

1. This survey and plan are correct and in accordance with the Surveys Act and the Surveyors Act and the regulations made under them.
2. The survey was completed on the 10th day of May, 2024.

May 23, 2024

E. H. Hennevey
Ontario Land Surveyor

PART 2

THIS PLAN MUST BE READ IN CONJUNCTION WITH
SURVEY REPORT DATED: May 23, 2024

ANNIS, O'SULLIVAN, VOLLEBEKK LTD. grants to
Centretown Citizens Housing Cooperative Inc., ("The Client"), their solicitors,
mortgagees, and other related parties, permission to use original, signed, sealed
copies of the Surveyor's Real Property Report in transactions involving The Client.

Proposed 6 Storey Building

Ground floor lifted to maximize site parking.
Front facade aligns with neighbour.

Terrace formed at the height
of adjacent building.

Lift stair core to create roof access
and dynamic volumes.

Proposed 6 storey affordable housing.

Potential for development in neighboring
lots according to current N4B zoning.

Design Brief:

The proposed development at 240 Presland Road is led by Centertown Citizens Ottawa

Sustainability Statement:

The proposed development will incorporate multiple strategies to support sustainable design and energy efficiency. As a project located in Ontario, it will be subject to SB-10 of the Ontario Building Code, which mandates that energy performance exceed the National Energy Code for Buildings (NECB) by at least 30% for buildings of this type. This regulation—effective since January 1, 2017—ensures that projects align with Ontario’s progressive targets for greenhouse gas (GHG) emission reductions and energy conservation.

To meet these requirements, the project will undertake a comprehensive energy modelling analysis. This process will help determine the optimal balance between a high-performance building envelope, glazing ratios, and mechanical system performance, ensuring efficient heating and cooling across all four seasons. The energy model will guide the design team in selecting strategies that are both environmentally responsible and cost-effective.

Additional sustainability features will include bird-safe glazing treatments on large areas of glazing to mitigate bird collisions and enhance urban biodiversity, and a white reflective roofing membrane, designed to reduce the urban heat island effect by minimizing solar heat gain on horizontal surfaces.

These strategies reflect a commitment to responsible design, environmental stewardship, and alignment with both local and provincial sustainability objectives.
