Subject: **Phase I - Environmental Site Assessment Update**
178, 180, 182 and 200 Isabella Street and 205 Pretoria Avenue
Ottawa, Ontario

Dear Sir,

Further to your request, Paterson Group (Paterson) conducted a Phase I - Environmental Site Assessment Update (Phase I ESA Update) for the aforementioned properties. This report updates a Phase I ESA report entitled, "Phase I Environmental Site Assessment, 178, 180, 182 and 200 Isabella Street, Ottawa, Ontario," completed by Paterson, dated October 24, 2016, and is intended to meet the requirements of a Phase I ESA, as per O.Reg. 153/04, as amended, under the Environmental Protection Act. This report is to be read in conjunction with the previous Phase I ESA report (PE3895-REP.01).

Site Information

The Phase I Property is located on the south side of Isabella Street and the north side of Pretoria Avenue, between Bank Street and O'Connor Street, in Ottawa, Ontario. One (1) residential dwelling occupies the subject site, at 205 Pretoria Avenue, which is situated in a residential zone and municipally serviced area. The properties along Isabella Street are vacant.

Records Review

Phase I ESA Study Area Determination

A radius of approximately 250 m was determined to be appropriate as a Phase I ESA study area for this assignment. Properties outside the 250 m radius are not considered to have the potential to impact the subject site, based on their separation distance.

First Developed Use Determination

According to the city directories, the addresses constituting the subject site were first listed in the 1890s. For the purposes of this report, and based on the above information, the Phase I Property is considered to have been first developed with residential buildings circa 1890.

Previous Environmental Reports

- “Phase I - Environmental Site Assessment, 178, 180, 182 and 200 Isabella Street, Ottawa, Ontario”, prepared by Paterson Group, dated October 24, 2016.

Based on the historical review of the aforementioned Phase I-ESA report, the subject site was first developed with residential dwellings in the 1890s. Neighbouring land use in the area consisted primarily of residential dwellings. A tinsmith was identified at the rear of 186 Isabella Street in the 1956 Fire Insurance Plans and a heating service contractor was identified in the City Directories and Historic Land Use Inventory on 182 Isabella Street. These on-site Potentially Contaminating Activities were identified as Areas of Potential Environmental Concern. To the north, across Isabella Street, a former rail line and associated buildings were identified on the FIPs. These PCAs were also considered to represent APECs on the Phase I Property. The buildings on the subject site were demolished early in 2016.

Following the historical review, a site visit was conducted. No potential environmental concerns were noted with the use of the site or adjacent lands. Based on the historic uses of the Phase I Property and railway lands to the north, a Phase II-ESA was recommended.

- “Phase II - Environmental Site Assessment, 178, 180, 182 and 200 Isabella Street, Ottawa, Ontario”, prepared by Paterson Group, dated November 7, 2016.

Based on the results of the Phase I-ESA report, a Phase II ESA was carried out for the properties on Isabella Street. Three (3) boreholes were placed on the Phase II Property and instrumented with groundwater monitoring wells. Site soils consisted of a layer of fill material, including demolition debris in former building locations, which was underlain by native silty clay. Based on the screening results, samples were selected for testing of metals and/or BTEX/PHC parameters. Based on the analytical results, the soil on the subject site was in compliance with the MECP Table 3 Commercial and Residential standards.

Groundwater samples were collected from the monitoring wells and analyzed for BTEX/PHCs and PAHs. No parameters were detected in the groundwater samples

analysed. Based on the analytical groundwater results the groundwater on the subject site has not been impacted by the past activities of the subject site or adjacent properties.

Plan of Survey

A plan of survey for 178 and 200 Isabella Street, prepared by Farley, Smith and Murray Surveying Ltd., was reviewed as part of this assessment. The survey plan is dated March 25, 1985 and shows the subject site as occupied by an office building at 200 Isabella Street, a second building at 182 Isabella Street, and parking at 178 Isabella Street. No buildings are indicated on the lots along Pretoria Avenue.

Environment Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on August 16, 2019. The subject site was not listed in the NPRI database. No records of pollutant release were listed in the database for properties located within the Phase I Study Area.

Ministry of the Environment, Conservation and Parks (MECP) Instruments

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site, as a part of the original Phase I ESA. The response from the MECP did not identify any environmental concerns.

MECP Submissions

A request was submitted as part of the 2016 Phase I ESA to the MECP FOI office for information with respect to reports related to environmental conditions for the property. The response from the MECP did not identify any environmental concerns.

MECP Incident Reports

A request was submitted as part of the 2016 Phase I ESA to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the site or adjacent properties. The response from the MECP did not identify any reports.

MECP Waste Management Records

A request was submitted to the MECP FOI office for information with respect to waste management records as part of the 2016 Phase I ESA. The response from the MECP did not identify any environmental concerns.

MECP Coal Gasification Plant Inventory

The Ontario Ministry of Environment document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I study area.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted as part of this assessment for the site, neighbouring properties and the general area of the site. No Records of Site Condition (RSCs) were filed for the subject property or properties in the Phase I study area.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There is one former waste disposal site (Site X1102), located 150 m downgradient from the subject site at Patterson Creek Park/Central Park. Based on the separation distance and orientation, this former waste site is not considered to generate an APEC on the Phase I Property.

Technical Standards and Safety Authority (TSSA)

The TSSA, Fuels Safety Branch in Toronto, was contacted electronically on August 14, 2019. A response from the TSSA indicated that there are no records for the subject or neighbouring properties.

City of Ottawa Landfill Document

The document entitled "Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa", was reviewed. Patterson Creek Park and Central Park (Ur-22) is a former landfill in the City of Ottawa Landfill document. This landfill closed before 1924 and was owned by the City of Ottawa. Based on the separation distance and age of the former landfill, it is not considered to represent an APEC to the subject site.

City of Ottawa Historical Land Use Inventory (HLUI)

A request for information from the City of Ottawa's Historical Land Use Inventory (HLUI) database was submitted as part of the original 2016 Phase I ESA. Since the original Phase I ESA was issued, no changes have been made to the HLUI database. One (1)

activity identified by the HLUI is considered to present a concern to the subject site: George P. Harris Limited, which operated at 182 Isabella Street circa 1960 to 1970 as part of the heating equipment industry.

Aerial Photographs

The most recent aerial photograph reviewed in the previous report was taken in 2014. An aerial photograph from 2017 was reviewed as part of the current Phase I ESA Update for the properties on Isabella Street. The 2017 photograph shows that the residential apartment building formerly at 200 Isabella Street has been demolished. Aerial photographs from 1928 to 2017 were reviewed for the property addressed 205 Pretoria Avenue. The property was occupied by a residential dwelling in 1928, and no apparent changes to the property have ever been made.

Physiographic Maps

The Ontario Geological Survey publication 'The Physiography of Southern Ontario, Third Edition' was reviewed as a part of this assessment. According to the publication and attached mapping, the site is situated within the Ottawa Valley Clay Plains physiographic region, described as "clay plains interrupted by ridges of rock or sand". Mapping shows the subject site as situated on an area of shallow glacial till and rock ridges.

Site Reconnaissance

The Phase I - ESA Update site visit was conducted on August 13, 2019, by Paterson personnel from the environmental division. Ms. Marie Chenier, a representative of the owner of the subject property, was interviewed at the time of the site assessment. Ms. Chenier indicated that the interior of the building at 205 Pretoria Avenue was renovated approximately 15 years ago, and she is not aware of any potential environmental concerns regarding the subject site or neighbouring lands.

Exterior Assessment

The site is occupied by a two-storey residential dwelling at 205 Pretoria Avenue, which is currently used as office space by Cinnamon Toast New Media Inc. The building is finished in vinyl siding with a sloped and shingled roof. An asphalt and gravel covered driveway is present along the eastern side of the structure, and the rear is gravel covered and used for parking. The properties along Isabella Street are vacant; 178 Isabella Street and the western half of 200 Isabella Street is paved, while the remainder of 200, as well as 182 and 180 Isabella Street, are covered with fill material with sparse vegetation. Fill material at the Isabella Street addresses is considered to be a PCA and APEC.

The site topography is slightly above the grade of Isabella Street and Pretoria Avenue, with no significant directional slopes. Site drainage is primarily sheet flow onto Isabella Street and Pretoria Avenue. Regional topography slopes downwards a southerly direction towards the Rideau River (Patterson Creek).

No evidence of an underground or above ground storage tank was observed on the exterior of the subject property. No potential environmental concerns were identified on the exterior of the subject site at the time of the assessment.

No evidence of current or former railway or spur lines on the subject site were observed at the time of the site inspection. There were no fuels, chemicals or unidentified substances observed on the Phase I Property. It should be noted that the Phase I Property remains unchanged since the 2016 Phase I ESA.

Interior Assessment

The floors in the building consisted of laminate, wood, and ceramic. The walls consisted of drywall (possibly some plaster) and stone (basement foundations). The ceilings consisted of drywall, ceiling stipple, and suspended ceiling tiles. Lighting throughout the buildings was provided by fluorescent fixtures.

No evidence of a former AST was observed on the interior of the subject building. A cleanout and chimney were observed in the basement, but no hydrocarbon stains or odours were noted. No sump pits were noted in the building. No potential environmental concerns were identified in the interior of the subject building at the time of the assessment.

Neighbouring Properties

Land use adjacent to the subject site was as follows:

- North – Isabella Street, followed by Highway 417;
- East – Residential dwellings (on Pretoria Avenue) and commercial buildings (on Isabella Street), followed by O'Connor Street;
- South – Pretoria Avenue, followed by residential dwellings;
- West – Residential dwellings followed by a Clocktower Brew Pub restaurant (on Pretoria Avenue) and a furniture store (on Isabella Street), followed by Bank Street.

The current uses of the adjacent properties were not considered to pose an environmental concern to the subject site. Current land use in the Phase I Study area is illustrated on Drawing: PE4710-2 – Surrounding Land Use Plan.

Review and Evaluation of Information

Land Use History

The following table indicates the current and past uses of the site as well as associated potentially contaminating activities dating back to the first developed use of the site. Information included in the table is based on information provided by Chains of Title, Fire Insurance Plans, City of Ottawa directories, and aerial photographs obtained during the completion of the 2016 Phase I ESA.

Table 1: Land Use History			
Time Period	Land Use - Owner	Potentially Contaminating Activities	Areas of Potential Environmental Concern
178 Isabella Street			
Prior to 1891	Vacant or Residential	None	None
1891-1952	Residential – private owners	None	None
1952-1960	Commercial - Welch and Johnston Ltd.	None	None

Potentially Contaminating Activities and Areas of Potential Environmental Concern

Based on the results of the Phase I ESA and Phase I ESA Update completed for the Phase I Property, several Potentially Contaminating Activities (PCAs) were identified at the site and within the Phase I ESA study area. Several of these PCAs are considered to

represent Areas of Potential Environmental Concern (APECs) with respect to the RSC Property, and both are summarized in the table below.

Table 2: Areas of Potential Environmental Concern					
Area of Potential Environmental Concern	Location of APEC on Phase I Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media potentially impacted (Groundwater, soil and/or sediment)
APEC 1 - Former tinsmith at 186 Isabella Street (east side of 200 Isabella Street)	Central portion of Phase I Property	Item 34, Table 2, O.Reg. 153/04: Metal fabrication	On-site	Metals, PHCs (F1-F4), BTEX	Soil, Groundwater
APEC 2 – Former fuel business at 182 Isabella Street	Central and West portion of Phase I Property	No item: Distribution of fuel oil, coal, and fuel oil burners; Contractors Office	On-Site	PHCs (F1-F4), BTEX	Soil, Groundwater
APEC 3 – Fill material of unknown quality	North side of the Phase I Property	Item 30, Table 2, O.Reg. 153/04: Importation of fill material of unknown quality	On-Site	PAHs, metals	Soil, Groundwater
APEC 4 – De-icing in parking lot	Former parking lot on east side of 200 Isabella Street	No item: application of salt for de-icing purposes.	On-Site	Sodium, chloride	Soil, Groundwater
APEC 5 – De-icing in parking lot	Former parking lots on 178 and 180 Isabella Street	No item: application of salt for de-icing purposes.	On-Site	Sodium, chloride	Soil, Groundwater

Additional historical PCAs identified within the Phase I Study Area were not considered to represent APECs on the Phase I Property based on their respective separation distances and/or their down-gradient or cross-gradient orientations with respect to the Phase I Property. These PCAs are shown in green on Drawing PE4710-2– Surrounding Land Use Plan.

Contaminants of Potential Concern (CPC)

The following Contaminants of Potential Concern (CPCs) were identified with respect to the RSC Property:

- Metals

- Petroleum Hydrocarbons Fractions 1 through 4 (PHCs F1-F4)
- Benzene, toluene, ethylbenzene, xylenes (BTEX)
- Polycyclic Aromatic Hydrocarbons (PAHs)
- Sodium, chloride

Conceptual Site Model

Geological and Hydrogeological Setting

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of the original Phase I ESA. Based on this information, bedrock in the area of the site consists of shale of the Billings Formation. Overburden soils are shown as offshore marine sediments with a drift thickness of 15 to 25 meters.

The 2016 Phase II ESA determined that the subsurface profile of the site consisted of fill overlying native silty clay. The bedrock surface was encountered at approximately 18 m below ground surface.

Contaminants of Potential Concern

The contaminants of potential concern (CPCs) include metals, polycyclic aromatic hydrocarbons (PAHs), petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene, and xylenes (BTEX), sodium, and chloride.

Existing Buildings and Structures

The northern portion of the Phase I Property is vacant (Isabella Street addresses). The southern portion of the Phase I Property is occupied by a two (2) storey residential dwelling that has been converted into an office space. The structure was constructed pre-1910 with a stone and mortar foundation.

Areas of Natural Significance and Water Bodies

No areas of natural significance were identified on the Phase I Property or within the Phase I Study Area. There are no water bodies on the Phase I Property. The closest water body is Patterson Creek, on the Rideau Canal system, located approximately 300 m to the southeast of the subject site.

Drinking Water Wells

No domestic water wells are located on the Phase I Property or within the Phase I study area.

Neighbouring Land Use

Neighbouring land use in the Phase I Study Area is currently a combination of commercial offices, retail businesses, restaurants, automotive repair garages/retail fuel outlets and residential dwellings and remains consistent with the neighbouring land use described in the 2016 Phase I ESA. No new PCAs were identified with the use of neighbouring lands.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

New potentially contaminating activities (PCAs) were identified in the records review and current use review of the Phase I Study Area. Based on the findings of the 2015 and Phase II ESA, no contaminants resulting from the former use of the site by heating contractor and tinsmith businesses were identified on-site. However, the potential former use of salt for de-icing purposes in laneways and parking lots, and the presence of fill material on the northern portion of the site are considered to be new PCAs resulting in APECs on the Phase I Property.

Assessment of Uncertainty and/or Absence of Information

The 2016 Phase I ESA identified the presence of several potentially contaminating activities (PCAs) that resulted in APECs on the Phase I Property. A Phase II ESA was subsequently conducted in 2016 to assess the former APECs. The analytical results found that the contaminants of potential concern on the Phase I Property were in compliance with the MECP Table 3 commercial and residential standards for soil and groundwater.

Additional APECs have been identified on the Phase I Property, and the parcel addressed 205 Pretoria Avenue has been added to the Phase I Property with this update.

Conclusions

The results of the records review, previous reports, and site inspection indicated that contaminated soil remains a potential environmental concern to the subject site. Based on the results of this Phase I ESA Update, **a Phase II Environmental Site Assessment is required for the property.**

Statement of Limitations

This Phase I - Environmental Site Assessment Update report has been prepared in general accordance with O.Reg. 153/04, as amended, by O.Reg. 269/11 under the Environmental Protection Act. The conclusions presented herein are based on

information gathered from a historical review and field inspection program. The findings of the Phase I ESA Update are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Minto Communities Inc. Permission and notification from Minto Communities Inc. and this firm will be required to release this report to any other party.

We trust that this submission satisfies your current requirements. Should you have any questions please contact the undersigned.

Paterson Group Inc.

Dear Michael Beaudoin:

RE: ***Freedom of Information and Protection of Privacy Act Request***
Our File # A-2016-06031, Your Reference PE3895

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 178, 180, 182, 200 Isabella St, Ottawa.

After a thorough search through the files of the Ministry's Ottawa District Office, Investigations and Enforcement Branch, Environmental Approvals Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment. This file is now closed.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Richard Beernaert at richard.beernaert@ontario.ca.

Yours truly,

FN Tracey Goodwin
FOI Manager (A)

Subject: RE: Records search request for 205 Pretoria Avenue

NO RECORD

Hello. Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at <https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?mid=392> and email the completed form to publicinformationsservices@tssa.org or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Gaya

Sent via email [MBeaudoin@patersongroup.ca]

Dear Michael Beaudoin,

Re: Information Request
178, 180, 182, 200 Isabella Street, Ottawa, Ontario (“Subject Properties”)

Internal Department Circulation

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Properties:

- No information was returned on the Subject Properties from Departmental circulation.

Search of Historical Land Use Inventory

This acknowledges receipt of the signed Disclaimer regarding your request for information from the City’s Historical Land Use Inventory (HLUI 2005) database for the Subject Properties.

A search of the HLUI database revealed the following information:

- There are 7 activities associated with the Subject Properties: Activity Numbers 6323, 11043, 3929, 5135, 584, 6520 and 9579.

The HLUI database was also searched for activity associated with properties located within 50m of the Subject Properties. The search revealed the following:

Shaping our future together
Ensemble, formons notre avenir

City of Ottawa
Planning, Infrastructure and Economic
Development Department

110 Laurier Avenue West, 4th Floor
Ottawa, ON K1P 1J1
Tel: (613) 580-2424 ext. 24856
Fax: (613) 560-6006
www.ottawa.ca

Ville d'Ottawa
Services de la planification, de l'infrastructure et
du développement économique

110, avenue Laurier Ouest, 4e étage
Ottawa (Ontario) K1P 1J1
Tél.: (613) 580-2424 ext. 24856
Télééc: (613) 560-6006
www.ottawa.ca

- There are 12 activities associated with the properties located within 50m of the Subject Properties: Activity Numbers 12365, 6519, 11283, 11898, 8867, 13137, 13571, 13935, 2490, 2538, 5146 and 8603.

Please note that Activity Numbers 2538 and 6519 have a PIN Certainty of "2". This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the Subject Properties. All database entries with a PIN Certainty of "2" require independent verification as to their precise location.

A site map has been included to show the location of the Subject Properties as well as the location of all the activities noted above, including the HLUI database's location of the Activity Numbers with a PIN Certainty of "2".

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no

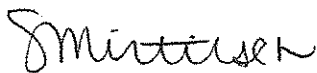

representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Properties. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact Stephanie Mirtitsch at 613-580-2424 ext. 24856 or HLUI@ottawa.ca

Sincerely,

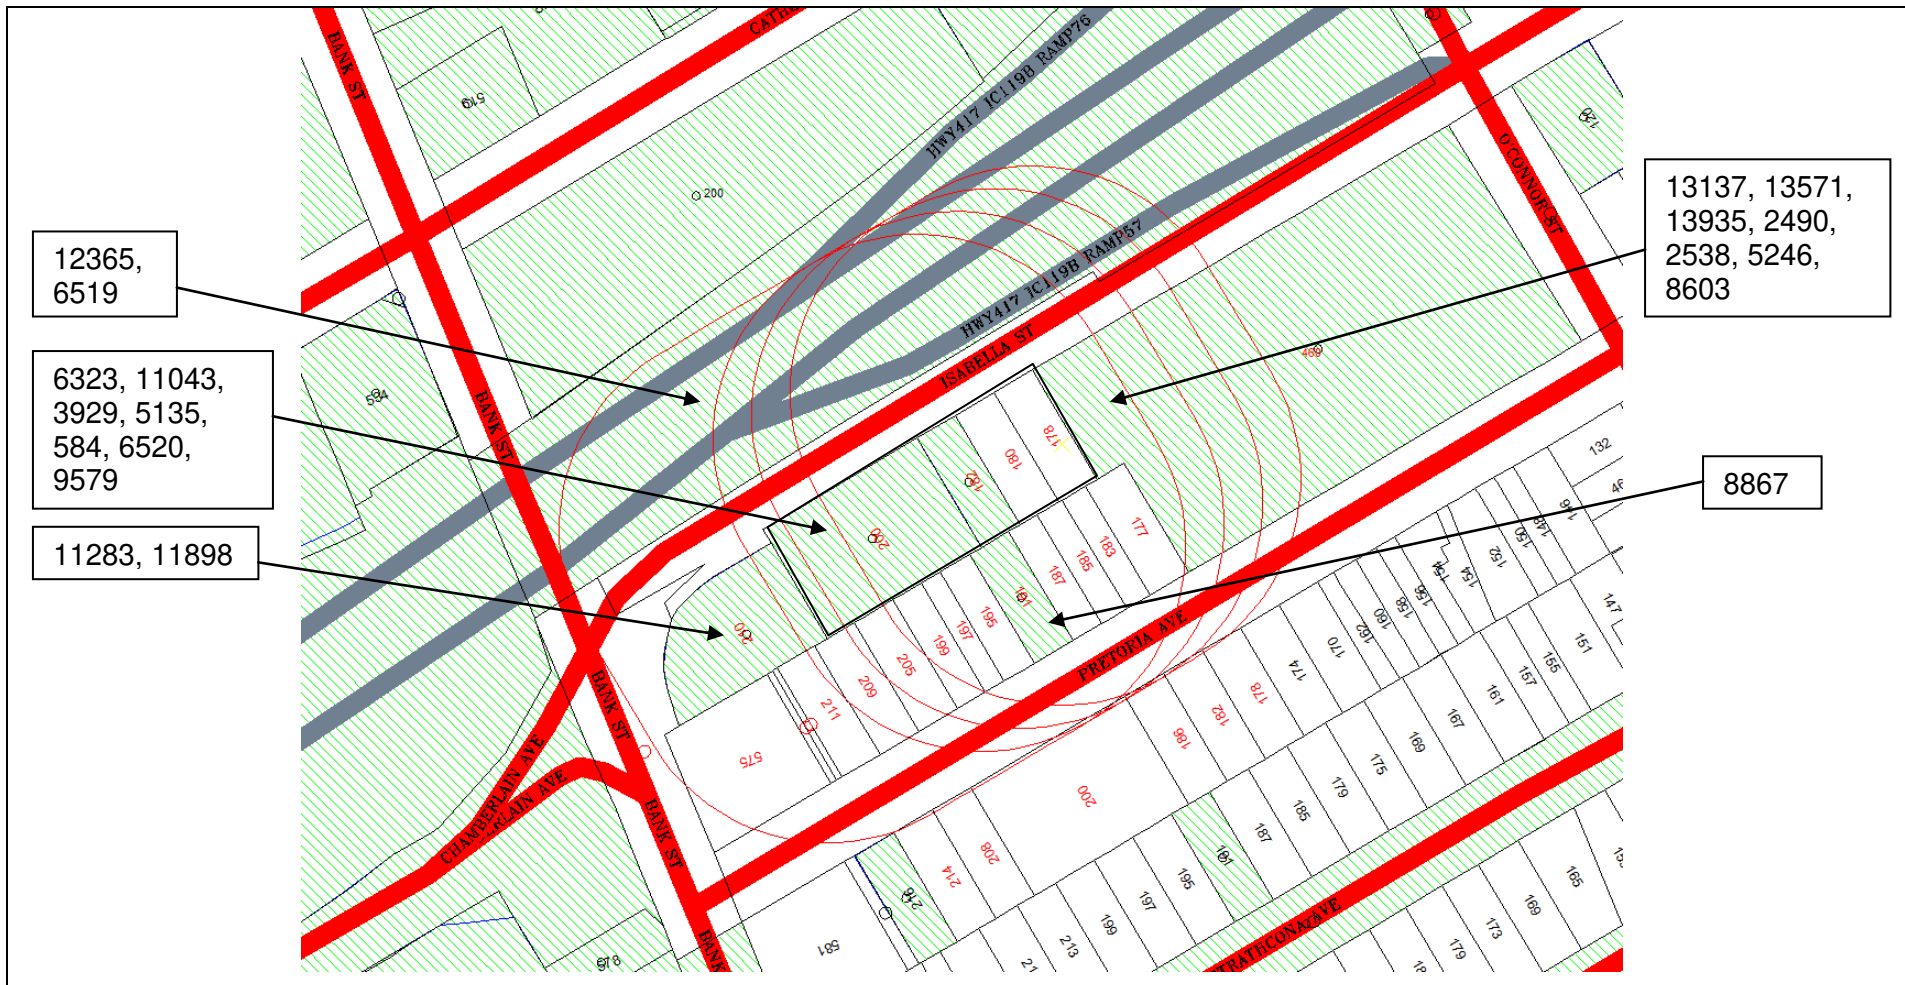

for: Michael Boughton, MCIP, RPP
