## **EXECUTIVE SUMMARY**

### **Assessment**

Paterson Group was retained by 10869279 Canada Inc. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 1649 Montreal Road and 741 Blair Road, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

According to the historical research, the subject site was initially developed with a residential dwelling (741 Blair Road), sometime prior to 1928. An auto service garage and retail fuel outlet were later constructed on the subject site (1649 Montreal Road) sometime in the early 1960's. The retail fuel outlet was eventually decommissioned sometime in the later 1990's, at which time the former underground fuel tanks (APEC #1), and former fuel pump island (APEC #2) were removed from the property. An addition, containing two (2) service bays, was later constructed onto the west side of the auto service garage sometime in the early 2000's.

According to previous environmental reports conducted for the subject site, two (2) underground waste oil storage tanks (APECs #3 and #4) were formerly present on the subject site and two (2) in-ground hydraulic hoists (APEC #5) were formerly present within the eastern service bay of the auto service garage. These were reportedly decommissioned and removed sometime in the late 1990's/early 2000's. The former subsurface investigations also identified fill material (APEC #6) beneath the asphaltic concrete ground surface throughout the property addressed 1649 Montreal Road.

A former retail fuel outlet was historically present on the property addressed 1648 Montreal Road, located approximately 35 m south of the subject site opposite Montreal Road. Based on its separation distance and significant down-gradient orientation, the former use of this property is not considered to pose an environmental concern to the subject site.

Following the historical review, a site inspection was conducted to assess the present-day environmental conditions of the subject site. The subject site is currently occupied with an auto service garage (APEC #7) (1649 Montreal Road) and a residential dwelling (741 Blair Road).

During the inspection of the auto service garage, one (1) aboveground motor oil storage tank (APEC #8) and two (2) aboveground waste oil tanks (APEC #9) were observed on-site. These tanks were noted to be in good condition, with no signs of leaks or staining in their vicinity. These oil tanks are considered to represent APECs with respect to the subject site.

The floor drains within the maintenance bays of the auto service garage reportedly feed into two (2) oil/water separators (APECs #10 and #11) before ultimately draining into the City of Ottawa sanitary sewer system. The presence of these oil/water separators is considered to represent APECs with respect to the subject site.

The neighbouring lands within the vicinity of the subject site were generally observed to be used for residential and commercial purposes. No environmental concerns were identified regarding the use of the surrounding properties.

## **Recommendations**

Based on the findings of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment will be required for the subject site.**

### **Hazardous Building Materials**

Based on the age of the auto service garage (c.1960's), asbestos containing building materials may be potentially present within the structure. The potential ACMs identified at time of the site inspection include the drywall joint compound throughout the building. These building materials were generally observed to be in good condition at the time of the site inspection and do not pose an immediate concern to the occupants of the building. Access to the interior of the residence at 741 Blair Road was not available at the time of the site inspection, thus a detailed inspection for potential ACMs could not be conducted.

An asbestos survey of the buildings should be conducted in accordance with O.Reg. 278/05, under the Occupational Health and Safety Act, prior to any renovation or demolition activities, if one has not already been conducted.

Based on the age of the auto service garage (c.1960's), lead-based paints may be present on any original or older painted surfaces. The painted surfaces within the garage were generally observed to be in good condition, and do not pose an immediate concern to the occupants of the building. Major work involving lead-based paint or other lead containing products must be done in accordance with O.Reg. 843, under the Occupational Health and Safety Act.

## **1.0 INTRODUCTION**

At the request of 10869279 Canada Inc., Paterson Group (Paterson) conducted a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 1649 Montreal Road and 741 Blair Road, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

Paterson was engaged to conduct this Phase I ESA by Mr. Martin Chénier of 10869279 Canada Inc. Mr. Chénier can be reached by telephone at 819-664-4195.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared in general accordance with Ontario Regulation 153/04, as amended under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

## 2.0 SUBJECT PROPERTY INFORMATION

Addresses:	1649 Montreal Road, Ottawa, Ontario; 741 Blair Road, Ottawa, Ontario.
Legal Description:	Part of Lot 20, Concession 1 (Ottawa Front), Formerly the Township of Gloucester, in the City of Ottawa.
Location:	The subject site is located on the north side of Montreal Road, east of Blair Road, in the City of Ottawa, Ontario. Refer to Figure 1 – Key Plan for the site location.
Latitude and Longitude:	45° 26' 49" N, 75° 36' 53" W

### Site Description:

Configuration:	Irregular
Site Area:	4,850 m <sup>2</sup> (approximate)
Zoning:	R3 – Residential Third Density Zone
Current Uses:	The subject site is current occupied with a one (1) storey auto service garage (1649 Montreal Road), as well as a two (2) storey residential dwelling with one (1) basement level (741 Blair Road).
Services:	The subject site is located within a municipally serviced area.

## 2.1 Property Owner Information

The subject properties are currently owned by Mr. John Goveat. Paterson was retained to complete this Phase I ESA by Mr. Martin Chénier of 10869279 Canada Inc. Mr. Chénier can be reached by telephone at 819-664-4195.

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject property and, if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of Ontario Regulation 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01;
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## 4.0 RECORDS REVIEW

### 4.1 General

#### Phase I ESA Study Area Determination

A radius of approximately 250 m was determined to be appropriate as a Phase I ESA study area for this assignment. Properties located outside this 250 m radius are not considered to have had the potential to impact the subject site, based on their significant distance away from the property.

#### First Developed Use Determination

Based on a review of available historical information, the subject site was first developed for residential purposes sometime prior to 1928, as well as with an auto service garage and retail fuel outlet sometime in the early 1960's.

#### Fire Insurance Plans

Fire insurance plans (FIPs) are not available for the area of the subject site.

#### City of Ottawa Street Directories

As part of this assessment, the City of Ottawa street directories for the general area of the subject site were reviewed in approximate ten (10) year intervals, from 1961 to 2011. The directories indicate that the subject site and surrounding properties have been used primarily for residential and/or commercial purposes during the time period reviewed.

A summary of potentially contaminating activities identified within the Phase I study area is provided below in Table 1:

<b>Table 1: City Directories – PCAs Identified Within Phase I Study Area</b>			
<b>Address</b>	<b>Listed Activity (years listed)</b>	<b>Distance / Orientation from Site</b>	<b>Area of Potential Environmental Concern (Y / N)</b>
<b>Montreal Road</b>			
1648	Imperial Esso Service Station (1962-1984)	35 m South	No
1649	Shell Canada Service Station (1962-1984) Marier Auto Garage (2006-2011)	On-Site	<b>Yes</b>
1696	Wheelsport (1996) Koleman's, Fred Wheelsport Motorcycle Sales and Service (1967-1984)	170 m East	No

The historical presence of an on-site retail fuel outlet and auto service garage are considered to represent areas of potential environmental concern with respect to the subject site.

A retail fuel outlet was historically listed for the property addressed 1648 Montreal Road, located approximately 35 m south of the subject site, opposite Montreal Road. Based on its significant down-gradient orientation, the former use of this property is not considered to pose an environmental concern to the subject site.

## **4.2 Environmental Source Information**

### **National Pollutant Release Inventory**

A search of the National Pollutant Release Inventory (NPRI) was conducted as part of this assessment. The search did not identify any records of pollutant releases for the subject site.

The property addressed 1200 Montreal Road, part of the National Research Council office campus and located approximately 20 m west of the subject site, contains records for several airborne pollutant releases. According to the NPRI data, the pollutant releases originated from the National Research Council buildings M6 and M11, which in reality are situated outside of the Phase I study area. Based on their separation distance, as well as having been discharged into the air, the pollutant releases on this property are not considered to pose an environmental concern to the subject site.

### **PCB Waste Storage Site Inventory**

A search of the national PCB waste storage site inventory was conducted as part of this assessment. One (1) former PCB waste storage site was identified at the property addressed 1500 Montreal Road, part of the National Research Council office campus and located approximately 45 m southwest of the subject site. According to the available information, the former PCB waste storage site on this property is located at National Research Council building M51, which in reality is situated outside of the Phase I study area. As a result, this former PCB waste storage site is not considered to pose an environmental concern to the subject site.

### **Ontario Ministry of Environment (MECP) Instruments**

A request was submitted to the MECP Freedom of Information office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site. A response had not been received prior to the issuance of this report.

### **MECP Incident Reports**

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the subject site or adjacent properties. A response had not been received prior to the issuance of this report.

### **MECP Waste Management Records**

A request was submitted to the MECP Freedom of Information office for information with respect to waste management records for the subject site. A response had not been received prior to the issuance of this report.

### **MECP Submissions**

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the subject site. A response had not been received prior to the issuance of this report.

### **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Municipal Coal Gasification Plant Site Inventory, 1991*" was reviewed as part of this assessment. This document provides a reference to the locations of former plants with respect to the subject site. A review of this document did not identify any former coal gasification plants located on the subject site or within the Phase I study area.

### **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Waste Disposal Site Inventory in Ontario, 1991*" was reviewed as part of this assessment. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario. A review of this document did not identify any relevant records pertaining to the subject site or for properties located within the Phase I study area.

### **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment. No Records of Site Condition (RSCs) were filed for the subject site or for any properties situated within the Phase I study area.

## **Technical Standards and Safety Authority (TSSA)**

The TSSA Fuels Safety Branch in Toronto was contacted electronically, as part of this assessment, to inquire about current and former underground fuel storage tanks, spills, and historical incidents for the subject site and neighbouring properties. The response from the TSSA indicated that the subject site contains records for one (1) expired retail fuel outlet and three (3) expired fuel storage tanks. The historical presence of an on-site retail fuel outlet is considered to represent an APEC with respect to the subject site.

The property located at 1648 Montreal Road, located approximately 35 m south of the subject site, contains records for one (1) expired retail fuel outlet and one (1) expired fuel storage tank. Based on this property's significant down-gradient orientation, the former retail fuel outlet at this location is not considered to pose an environmental concern to the subject site.

A copy of the correspondence with the TSSA is included in Appendix 2.

## **OMNRF Areas of Natural Significance**

A search for areas of natural and scientific interest situated within the Phase I study area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website. The search did not identify any natural features or areas of natural significance within the Phase I study area.

## **City of Ottawa Old Landfill Sites**

The document prepared by Golder Associates entitled, "*Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa*", was reviewed as part of this assessment. No former landfill sites were identified on the subject site or within the Phase I study area.

## **City of Ottawa Historical Land Use Inventory (HLUI) Database**

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City's Historical Land Use Inventory (HLUI 2005) database for any environmental records pertaining to the subject site as well as any properties situated within the Phase I study area.

A response from the City had not been received prior to the issuance of this report. A copy of the response will be forwarded to the client should it contain any pertinent information. A copy of the submission request has been included in Appendix 2.

---

## ERIS Database Report

A database report, prepared by ERIS (Environmental Risk Information Services) Ltd., dated October 7, 2020, was acquired and reviewed as part of this assessment. The complete ERIS report has been included in the appendix.

### *On-Site Records:*

The ERIS report identified twelve (12) environmental records pertaining to the subject site (1649 Montreal Road). The records include descriptions regarding four (4) delisted fuel tanks, three (3) expired fuel safety systems, three (3) fuel storage tanks, one (1) private and retail fuel storage tank, and one (1) minor spill event.

These records appear to be associated with the former retail fuel outlet historically present on the subject site (1649 Montreal Road). The historical presence of an on-site retail fuel outlet is considered to represent an APEC with respect to the subject site.

### *Off-Site Records:*

The ERIS report identified seventy-three (73) records pertaining to properties located within a 250 m radius of the subject site. These off-site records are listed for properties which are situated at a significant distance away or are situated in a down-gradient or cross-gradient orientation, and thus are not considered to pose an environmental concern to the subject site.

## 4.3 Physical Setting Sources

### Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals, commencing with the earliest available photograph. Based on the review, the following observations have been made:

- 1945      (*Poor Scale*) The property addressed 741 Blair Road appears to be developed with a residential dwelling at this time, whereas the surrounding properties appear to be used for residential and/or agricultural purposes.
  
- 1958      (*City of Ottawa Website*) No significant changes are apparent with respect to the subject site. A retail fuel outlet can be seen to the south of the subject site, opposite Montreal Road. The National Research Council office campus can also be seen to the west of the subject site.

- 1965      *(City of Ottawa Website)* The property addressed 1649 Montreal Road appears to be developed with a retail fuel outlet and auto service garage at this time. No significant changes are apparent with respect to the neighbouring properties.
- 1976      *(City of Ottawa Website)* No significant changes are apparent with respect to the subject site. The property immediately to the east of the subject site appears to have been redeveloped with a commercial building. Additional residential dwellings can also be seen immediately to the north of the subject site at this time.
- 1991      *(City of Ottawa Website)* No significant changes are apparent with respect to the subject site or the neighbouring properties.
- 2002      *(City of Ottawa Website)* The former on-site fuel pump island can no longer be seen in this photograph. The retail fuel outlet to the south appears to have been demolished and redeveloped with a commercial building.
- 2011      *(City of Ottawa Website)* An addition appears to have been constructed on the west side of the auto service garage at 1649 Montreal Road. No other significant changes are apparent with respect to the subject site or the neighbouring properties.
- 2017      *(City of Ottawa Website)* No significant changes are apparent with respect to the subject site or neighbouring properties. The subject site appears as it does today.

Copies of selected aerial photographs reviewed are included in Appendix 1.

### **Water Bodies**

No water bodies are present on the subject site or within the Phase I study area. The nearest named water body with respect to the subject site is the Ottawa River, located approximately 1.90 km to the north.

### **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was reviewed as part of this assessment. Based on the available information, the bedrock in the area of the subject site consists of interbedded limestone and dolomite of the Gull River Formation, whereas the surficial geology consists of Paleozoic bedrock with a overburden ranging from approximately 0 m to 1 m in thickness.

## **Topographic Maps**

A topographic map was reviewed from the Natural Resources Canada – The Atlas of Canada website as part of this assessment. The topographic map indicates that the general elevation of the subject site is approximately 100 m above sea level. The regional topography in the general area of the subject site slopes down towards the south. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

## **Physiographic Maps**

A physiographic map was reviewed from the Natural Resources Canada – The Atlas of Canada website, as a part of this assessment. According to the publication and mapping information, the subject site is situated within the St. Lawrence Lowlands. According to the description provided: *“The lowlands are plain-like areas that were affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.”* The subject site is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

## **MECP Water Well Records**

A search of the MECPs website for all drilled well records within a 250 m radius of the subject site was conducted as part of this assessment. The search identified twenty-four (24) well records within the Phase I study area. These records pertain to wells installed between 1952 and 2009 and used for domestic household or groundwater observation purposes. Based on the availability of municipal services, drinking water wells are not expected to be in use within the Phase I study area.

According to the well records, the overburden stratigraphy in the area of the subject site generally consists of a thin to negligible layer of sandy/silty loam over top of bedrock. The bedrock, consisting primarily of limestone, was typically encountered at an average depth of approximately 0 m to 5 m below ground surface.

Copies of the aforementioned well records have been included in Appendix 2.

## **Previous Engineering Reports**

The following report was reviewed prior to conducting this assessment:

- *“Phase II – Environmental Site Assessment, Former Retail Fuel Outlet, 1649 Montreal Road, Gloucester, Ontario”*, prepared by Paterson Group and dated December 18, 2000.

Paterson was retained to conduct a Phase II ESA for the subject site to identify any potential environmental impact resulting from the former on-site use of underground fuel storage tanks, pump islands, and associated piping.

As part of the subsurface investigation, three (3) exterior boreholes (BH1-BH3) and three (3) interior coreholes (CH4-CH6) were advanced on the subject site on December 6 and 7, 2000. The boreholes were drilled to depths ranging from approximately 1.9 m to 3.8 m below the existing ground surface and terminated on practical refusal on inferred bedrock. Groundwater was generally encountered at depths ranging from approximately 0.8 to 2.0 m below the existing ground surface.

Three (3) soil samples were submitted for laboratory analysis of Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX) as well as Total Petroleum Hydrocarbons (TPH). According to the analytical test results, the concentration of TPH (gasoline/diesel range) in CH4, located in the vicinity of the interior oil/water separator and vehicle hoists in the eastern maintenance bay, exceeded the then applicable MOE commercial soil remediation criteria. These results also exceed the contemporary MECP Table 7 commercial and residential standards. It should be noted that this soil was later remediated and removed from the subject site in April 2001.

No groundwater samples were submitted for laboratory analysis as part of the investigation. At the time of the field program, the eastern portion of the subject site (in the area of a former underground waste oil storage tank) was undergoing a remedial operation, overseen by a separate consulting firm. It was not considered practical to conduct any water sampling until after completion of the remediation activities.

The Phase II ESA concluded that an interior remediation program would be required to address the contaminated soil found beneath the floor slab in the vicinity of the oil/water separator. The report further recommended that the oil/water separator and in-ground hoists be decommissioned and removed at the time of the remediation program.

Due to the absence of any groundwater testing, as well as the continued use of the property as an auto service garage, an updated subsurface investigation will be required to address the present-day soil and groundwater conditions on the subject site, specifically within the vicinity of the former underground tank nests, former fuel pump island, and the interior of the auto service garage.

- “*Environmental Site Remediation Summary, Former Retail Fuel Outlet, 1649 Montreal Road, Ottawa (Gloucester), Ontario*”, prepared by Paterson Group and dated May 16, 2001.

Based on the results and recommendations of our 2000 Phase II ESA, Jacques Whitford Environmental Limited (JWEL) was commissioned to supervise the removal of the two (2) in-ground hydraulic hoists, oil/water separator, and any associated impacted soil. Paterson conducted periodic visits to the subject site during the remediation operations to document the decommissioning process and clean-up procedures.

The in-ground hoists and the oil/water separator (located in the eastern maintenance bay) were removed from the subject site on April 9, 2001. An inspection of the hoists did not indicate any apparent signs of oil leakage from the units, although some staining in the sandy fill around the former oil/water separator did indicate some leakage from the unit.

Suspected contaminated soil was stockpiled on polyethylene sheeting to the north of the garage building pending testing to determine the appropriate means of disposal. This soil was later found to have contaminant concentrations in excess of the then applicable MOE guidelines, and was disposed of at a licensed landfill.

According to the remediation report provided by JWEL, approximately 50 tonnes of impacted soil and 3,000 litres of impacted groundwater was removed from the subject site. Confirmatory soil and groundwater sampling, conducted by Paterson, did not identify any contaminant concentrations exceeding the applicable MOE guidelines. The results are also in compliance with the contemporary MECP Table 7 commercial and residential standards.

Based on Paterson’s observations, as well as the test results and information contained in JWEL’s report, it was our opinion that the interior site remediation activities were effective in removing the previously identified contaminated soil from within the vicinity of the former in-ground hoists and oil/water separator.

## **5.0 PERSONAL INTERVIEWS**

Mr. John Goveat, the current property owner, was available at the time of the site inspection to respond to questioning. According to Mr. Goveat, the subject site (1649 Montreal Road) was formerly occupied with a retail fuel outlet, until decommissioned in the late 1990's. Mr. Goveat stated that an addition was later constructed onto the existing auto service garage sometime in the early 2000's. According to Mr. Goveat, all in-ground hoists were decommissioned and removed from the maintenance bays sometime in the early 2000's. Mr. Goveat also stated that two (2) oil/water separators are present within the auto service garage, and that no leaks or issues have ever been reported regarding their use. Mr. Goveat further stated that two (2) waste oil storage tanks are present on the exterior of the building, and that no leaks or issues have ever been reported regarding their use.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

A site inspection was conducted for the subject site on October 7, 2020, between 2:00 PM and 3:00 PM. Weather conditions were cloudy, with a temperature of approximately 15°C. Mr. Nick Sullivan, from the Environmental Department of Paterson Group, conducted the inspection. In addition to the subject site, the uses of neighbouring properties within the Phase I study area were also assessed at the time of the site inspection.

### **6.2 Site Inspection Observations**

#### **Existing Buildings and Structures**

The property addressed 1649 Montreal Road is currently occupied with a one (1) storey, slab-on-grade style auto service garage. Built sometime in the early 1960's, with the western maintenance bay later added in the early 2000's, the garage is constructed with a poured concrete foundation and is finished on the exterior with metal siding and a flat tar-and-gravel style roof. The building is currently heated via a natural gas-fired heating unit, suspended from the interior ceiling.

The property addressed 741 Blair Road is currently occupied with a two (2) storey residential dwelling, with one (1) basement level. Built sometime in the 1920's, the residence is constructed with a wood frame, stone foundation, and is finished on the exterior with wood siding and a sloped shingled roof. The residence is currently abandoned (c.2010) and no longer being heated.

## Site Description

The property addressed 1649 Montreal Road is currently occupied with an auto service garage, located in the eastern portion of the property. The remainder of the property is paved with asphaltic concrete to the north, west, and south of the garage building. The western portion of the property is used for vehicle parking, whereas the northern portion of the property, at the rear of the garage building, is used for general storage.

The property addressed 741 Blair Road is currently occupied with a vacant residential dwelling, located in the northwestern portion of the property. The remainder of the property consists of grassy landscaped areas and mature trees.

The site topography appears to slope down to the south, towards Montreal Road, whereas the regional topography also appears to slope down to the south. Water drainage on the subject site occurs primarily via infiltration in the landscaped areas, as well as via surface run-off towards a catch basin located on Montreal Road. No ponded water, stressed vegetation, surficial staining, or any other indications of potential sub-surface contamination were observed at time of the site inspection.

A depiction of the subject site is illustrated on Drawing PE5061-1 – Site Plan, in the Figures section of this report.

## Underground Utilities

Underground service locates were completed as part of a Phase II ESA investigation conducted for the subject site in tandem with this assessment. According to the locates, underground natural gas lines, electrical lines, as well as water and sewer pipes are present on the subject site.

## Potential Environmental Concerns

### Hazardous Materials and Unidentified Substances

No hazardous materials, unidentified substances, spills, surficial staining, abnormal odours, or indications of potential sub-surface contamination were observed on the exterior of the subject site at the time of the site inspection.

### Railway Lines

No active or former railway lines were identified within the Phase I study area.

**Fill Material**

According to the previous subsurface investigations and remediations conducted for the subject site, fill material is present beneath the asphaltic concrete ground surface of 1649 Montreal Road. Due to its unknown quality, this fill material is considered to represent an APEC with respect to the subject site.

**Transformer Oil and Polychlorinated Biphenyls (PCBs)**

One (1) off-site pole-mounted transformer was observed adjacent to the southwestern property boundary. The transformer was noted to be in good condition, with no signs of leaks or staining observed at the time of the site inspection.

**Fuels and Chemical Storage**

Two (2) aboveground waste oil storage tanks were identified at the rear of the garage building at 1649 Montreal Road. Both tanks, manufactured in 2000, were noted to be constructed with a single 2 mm thick steel wall and contain a capacity for 910 L of waste oil. The tanks were noted to be in good condition, with no signs of leaks or staining observed at the time of the site inspection. The underlying ground surface, consisting of poured concrete, was also noted to be in good condition at the time of the site inspection, with no signs of cracks visible. The presence of these waste oil tanks is considered to represent APECs with respect to the subject site.

No vent and fill pipes, aboveground fuel storage tanks, or signs of underground fuel storage tanks were observed on the property addressed 741 Blair Road at the time of the site inspection.

**Waste Management**

Solid, non-hazardous domestic waste and recyclable products are stored in plastic and metal bins on the exterior of the subject site and are collected by a licensed contractor on a regular basis. No environmental concerns were identified with respect to waste management practices on the subject site.

## **Interior Assessment**

The interior of the residential dwelling situated at 741 Blair Road was not accessible at the time of the site inspection, due to its derelict nature, and as a result, a detailed description of its interior could not be ascertained for the purpose of this assessment.

A general description of the interior of the auto service garage (1649 Montreal Road) is as follows:

- The floors consist of poured concrete and ceramic tiles;
- The walls consist of drywall and concrete blocks;
- The ceilings consist of drywall;
- Lighting throughout the building is provided by incandescent and fluorescent light fixtures.

## **Potentially Hazardous Building Products**

### **Asbestos-Containing Materials (ACMs)**

Based on the age of the auto service garage (c.1960's), asbestos containing building materials may be potentially present within the structure. The potential ACMs identified at time of the site inspection include the drywall joint compound throughout the building. These building materials were generally observed to be in good condition at the time of the site inspection and do not pose an immediate concern to the occupants of the building.

The interior of the residential dwelling situated at 741 Blair Road was not accessible at the time of the site inspection, and thus an inspection for potential ACMs could not be conducted.

### **Lead-Based Paints**

Based on the age of the auto service garage (c.1960's), lead-based paints may be present on any original or older painted surfaces. The painted surfaces within the garage were generally observed to be in good condition, and do not pose an immediate concern to the occupants of the building.

The interior of the residential dwelling situated at 741 Blair Road was not accessible at the time of the site inspection, and thus an inspection on the condition of painted surfaces could not be conducted

**Polychlorinated Biphenyls (PCBs) and Transformer Oil**

No sources of PCBs were identified within the interior of the auto service garage at the time of the site inspection.

**Urea Formaldehyde Foam Insulation (UFFI)**

UFFI was not observed at the time of the site inspection, however, wall cavities were not inspected for insulation type.

**Other Potential Environmental Concerns**

**Interior Fuel and Chemical Storage**

One (1) aboveground oil storage tank was identified within maintenance bay of the auto service garage (1649 Montreal Road). The tank was noted to be constructed with a single 2 mm thick steel wall and contained a capacity for 1,000 L of motor oil. The tank was noted to be in good condition, with no signs of leaks or stains observed at the time of the site inspection. The underlying floor was observed to consist of poured concrete, which was also noted to be in good condition at the time of the site inspection, with no signs of cracks visible. The presence of this oil tank is considered to represent an APEC with respect to the subject site.

Chemical products stored within the subject building were observed to be limited to domestically available cleaning products, motor oils, greases, and lubricants, stored in their original containers. No environmental concerns were identified with respect to chemical storage practices on the subject site.

**Wastewater Discharges**

Several floor drains were observed within the auto service garage maintenance bays. According to conversations with the property owner, these drains flow into two (2) underground oil/water separators, also located within the maintenance bays, before draining out into the City of Ottawa sanitary sewer system. An inspection of the oil/water separators did not identify any leaks or issues regarding their use. According to the property owner, a licensed contractor performs routine inspections and draining of the oil/water separators on a regular basis. The presence of these oil/water separators is considered to represent APECs with respect to the subject site.

Wastewater from the subject building (wash water and sewage) is discharged into the City of Ottawa sanitary sewer system. Roof drainage is discharged into the landscaped areas on the subject site or to the City of Ottawa storm water system via surface runoff. No concerns were noted with respect to wastewater discharge on the subject site.

**Sump Pits and Floor Drains**

One (1) sump pit was observed within the mechanical room of the auto service garage. The water inside the sump pit was observed to be clear and odourless at the time of the site inspection.

**Ozone Depleting Substances (ODSs)**

Potential sources of ODSs observed on-site include fire extinguishers, a refrigerator, and a window-mounted air conditioner unit. These appliances appeared to be in good condition at the time of the site inspection and should be regularly serviced by a licensed contractor.

### **Neighbouring Properties**

Land use adjacent to the subject site was observed as follows:

*North:* Residential dwellings;

*South:* Montreal Road, followed by a bank branch, a motel, and residential dwellings;

*East:* A fitness center and a church, followed by a chiropractor's office, a doctor's office, and a restaurant;

*West:* Blair Road, followed by government offices.

No environmental concerns were identified with respect to the current use of the neighbouring properties. Current land use adjacent to the subject site is illustrated on Drawing PE5061-2 – Surrounding Land Use Plan, appended to this report.

## **6.3 Enhanced Investigation Area**

### **On-Site Operations**

The property addressed 1649 Montreal Road, with occupies the southern half of the subject site, has been operated as an automotive service garage since the 1960's. Historically, the site also operated as a retail fuel outlet from the 1960's until the late 1990's. According to the current property owner, Mr. John Goveat, current automotive repair services performed on-site include engine, transmission, suspension, undercarriage, and brake repairs; oil and tire changes; as well as engine and transmission fluid flushes.

### **Hazardous Materials Used or Stored**

As previously noted, a 1,000 L motor oil storage tank was observed within the eastern maintenance bay of the auto service garage at 1649 Montreal Road, in addition to multiple containers (less than 10 L in volume) of various motor oils, washer fluid, brake fluid, transmission fluid, greases, and lubricants. Minor areas of surficial staining were noted on the concrete floor throughout the garage maintenance bays at the time of the site inspection. The concrete floor was noted to be in good condition, with no cracks visible at the time of the site inspection.

Two (2) 900 L waste oil storage tanks were also observed on the exterior of the auto service garage at 1649 Montreal Road. The tanks were noted to be in good condition, with no obvious signs of leaks or staining observed within their vicinity. According to the current property owner, Mr. John Goveat, the waste oil is reportedly collected and disposed of off-site by a licensed contractor as needed.

### **Manufactured Products**

No products are manufactured on the subject site.

### **By-Products and Waste**

As previously discussed, two (2) 900 L waste oil storage tanks were observed on the exterior of the auto service garage at 1649 Montreal Road. The tanks were noted to be in good condition, with no obvious signs of leaks or staining observed within their vicinity. According to the current property owner, Mr. John Goveat, the waste oil is reportedly collected and disposed of off-site by a licensed contractor as needed.

### **Raw Materials Handling and Storage**

No raw materials are handled or stored on the Phase I Property.

## **Drums, Totes, and Bins**

As previously noted, one (1) 1,000 L motor oil storage tank is present within the interior of the auto service garage at 1649 Montreal Road. Additionally, two (2) 900 L waste oil storage tanks are present on the exterior of the garage. A 150 L plastic bin, containing used oil filters, was also observed on the exterior of the garage. No other drums, bins, or totes were observed on-site at the time of the site inspection.

## **Oil/Water Separators**

The floor drains within the maintenance bays of the auto service garage at 1649 Montreal Road were reported to feed into two (2) oil/water separators before ultimately draining into the City of Ottawa sanitary sewer system. According to the property owner, Mr. John Goveat, the oil/water separators are cleaned out by a licensed contractor on an as-needed basis.

The locations of the oil/water separators are shown on Drawing PE5061-1 Site Plan, appended to this report.

## **Vehicle and Equipment Maintenance Areas**

The auto service garage at 1649 Montreal Road consists of four (4) maintenance bays, each equipped with an electric hoist. The locations of the vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas, are shown on Drawing PE5061-1 Site Plan, appended to this report.

## **Spill Events**

Based on the historical review, personal interviews, as well as the site inspection, no records or evidence of spills were identified.

## **Liquid Discharge Points**

Several catch basins were observed on the neighbouring roads adjacent to the subject site. No concerns were identified during a visual inspection of these catch basins.

Several large floor drains were observed within the vehicle maintenance bays of the auto service garage at 1649 Montreal Road. These drains reportedly feed into two (2) oil/water separators before draining into the City of Ottawa sanitary sewer system. No concerns were identified during a visual inspection of these floor drains.

## **Hydraulic Lift Equipment**

The four (4) maintenance bays within the auto service garage at 1649 Montreal Road each contain an aboveground electric hoist. No in-ground hydraulic hoists were observed in the maintenance bays at the time of the site inspection. According to the current property owner, as well as information contained in our files, two (2) in-ground hydraulic hoists were formerly present within the maintenance bays on the east side of the auto service garage. These hoists were reportedly decommissioned and removed sometime in the early 2000's.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Land Use History

Based on a review of available historical information, the subject site was first developed with a residential dwelling sometime prior to 1928, as well as with an auto service garage and retail fuel outlet sometime in the early 1960's.

#### **Potentially Contaminating Activities (PCAs)**

Based on the findings of this Phase I ESA, eleven (11) PCAs, resulting in APECs, were identified as pertaining to the subject site. These APECs include:

- A former underground fuel storage tank nest, located in the southwestern portion of the subject site;
- A former fuel pump island, located in the southern portion of the subject site;
- A former underground waste oil tank nest, located to the south of the auto service garage;
- A former underground waste oil tank nest, located beneath the western portion of the auto service garage;
- Two (2) former in-ground hydraulic hoists, located in the eastern portion of the auto service garage;
- Fill material of unknown quality, located throughout the southern portion of the subject site;
- An existing auto service garage, located in the southern portion of the subject site;
- An existing aboveground motor oil storage tank, located in the eastern portion of the auto service garage;
- Two (2) existing aboveground waste oil storage tanks, located on the exterior of the east side of the auto service garage;
- An oil/water separator, located in the eastern portion of the auto service garage;
- An oil/water separator, located in the western portion of the auto service garage;

Several other off-site PCAs were identified within the Phase I study area, however, based on their separation distance as well as their down-gradient orientation, these sites are not considered to pose an environmental concern to the subject site.

## Areas of Potential Environmental Concern (APECs)

The areas of potential environmental concern identified in this Phase I ESA are summarized below in Table 2:

<b>Table 2</b>					
<b>Areas of Potential Environmental Concern</b>					
<b>APEC</b>	<b>Location of APEC</b>	<b>PCA (O. Reg. 153/04 – Table 2)</b>	<b>Location of PCA</b>	<b>Contaminants of Potential Concern</b>	<b>Media Potentially Impacted</b>
<b>APEC #1</b> Former Underground Fuel Storage Tank Nest	Southwestern portion of subject site	<i>"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"</i>	On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #2</b> Former Fuel Pump Island	Southern portion of subject site		On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #3</b> Former Underground Waste Oil Storage Tank Nest	Southeastern portion of subject site		On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #4</b> Former Underground Waste Oil Storage Tank Nest	Southeastern portion of subject site		On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #5</b> Former In-Ground Hydraulic Hoists	Southeastern portion of subject site	<i>"Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems"</i>	On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #6</b> Fill Material of Unknown Quality	Southern portion of subject site	<i>"Item 30: Importation of Fill Material of Unknown Quality"</i>	On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> ) Metals	Soil/Fill
<b>APEC #7</b> Existing Auto Service Garage	Southern portion of subject site	<i>"Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems"</i>	On-Site	VOCs PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #8</b> Existing Aboveground Motor Oil Storage Tank	Southeastern portion of subject site	<i>"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"</i>	On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #9</b> Existing Aboveground Waste Oil Storage Tanks (x2)	Southeastern portion of subject site		On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #10</b> Oil/Water Separator	Southeastern portion of subject site		On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #11</b> Oil/Water Separator	Southeastern portion of subject site		On-Site	BTEX PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater

## **Contaminants of Potential Concern (CPCs)**

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX);
- Petroleum Hydrocarbons, Fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- Volatile Organic Compounds (VOCs);
- Metals (including mercury and hexavalent chromium).

The BTEX, VOC, and PHC contaminants have the potential to be present in the fill/soil matrix and/or the groundwater situated beneath the subject site, whereas the metal contaminants are anticipated to be present only within the fill/soil matrix.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

Based on the available information, the bedrock in the area of the subject site consists of interbedded limestone and dolomite of the Gull River Formation, whereas the surficial geology consists of Paleozoic bedrock with a overburden ranging from approximately 0 m to 1 m in thickness.

Groundwater is anticipated to be encountered within the bedrock and flow in a southerly direction.

### **Water Bodies and Areas of Natural and Scientific Interest**

No water bodies or areas of natural and scientific interest are present on the subject site or within the Phase I study area. The nearest named water body with respect to the subject site is the Ottawa River, located approximately 1.90 km to the north.

### **Existing Buildings and Structures**

The subject site is currently occupied with a one (1) storey auto service garage (1649 Montreal Road) as well as a two (2) storey residential dwelling (741 Blair Road).

## **Drinking Water Wells**

Based on the availability of municipal services, no drinking water wells are expected to be present within the Phase I study area.

## **Neighbouring Land Use**

Neighbouring land use within the Phase I study area consists mainly of residential and commercial properties. Current land use is illustrated on Drawing PE5061-2 Surrounding Land Use Plan, appended to this report.

## **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

As per Section 6.1 of this report, eleven (11) PCAs, resulting in APECs, were identified on the subject site. These APECs include:

- A former underground fuel storage tank nest, located in the southwestern portion of the subject site;
- A former fuel pump island, located in the southern portion of the subject site;
- A former underground waste oil tank nest, located to the south of the auto service garage;
- A former underground waste oil tank nest, located beneath the western portion of the auto service garage;
- Two (2) former in-ground hydraulic hoists, located in the eastern portion of the auto service garage;
- Fill material of unknown quality, located throughout the southern portion of the subject site;
- An existing auto service garage, located in the southern portion of the subject site;
- An existing aboveground motor oil storage tank, located in the eastern portion of the auto service garage;
- Two (2) existing aboveground waste oil storage tanks, located on the exterior of the east side of the auto service garage;
- An oil/water separator, located in the eastern portion of the auto service garage;
- An oil/water separator, located in the western portion of the auto service garage;

Several other off-site PCAs were identified within the Phase I study area, however, based on their separation distance as well as their down-gradient orientation, these sites are not considered to pose an environmental concern to the subject site.

### **Contaminants of Potential Concern**

The contaminants of potential concern associated with the aforementioned APECs are considered to be:

- Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX);
- Petroleum Hydrocarbons, Fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- Volatile Organic Compounds (VOCs);
- Metals (including mercury and hexavalent chromium).

The BTEX, VOC, and PHC contaminants have the potential to be present in the fill/soil matrix and/or the groundwater situated beneath the subject site, whereas the metal contaminants are anticipated to be present only within the fill/soil matrix.

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that there are PCAs and APECs associated with the subject site. The presence of these PCAs were confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **8.0 CONCLUSION**

### **8.1 Assessment**

Paterson Group was retained by 10869279 Canada Inc. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 1649 Montreal Road and 741 Blair Road, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

According to the historical research, the subject site was initially developed with a residential dwelling (741 Blair Road), sometime prior to 1928. An auto service garage and retail fuel outlet were later constructed on the subject site (1649 Montreal Road) sometime in the early 1960's. The retail fuel outlet was eventually decommissioned sometime in the later 1990's, at which time the former underground fuel tanks (APEC #1), and former fuel pump island (APEC #2) were removed from the property. An addition, containing two (2) service bays, was later constructed onto the west side of the auto service garage sometime in the early 2000's.

According to previous environmental reports conducted for the subject site, two (2) underground waste oil storage tanks (APECs #3 and #4) were formerly present on the subject site and two (2) in-ground hydraulic hoists (APEC #5) were formerly present within the eastern service bay of the auto service garage. These were reportedly decommissioned and removed sometime in the late 1990's/early 2000's. The former subsurface investigations also identified fill material (APEC #6) beneath the asphaltic concrete ground surface throughout the property addressed 1649 Montreal Road.

A former retail fuel outlet was historically present on the property addressed 1648 Montreal Road, located approximately 35 m south of the subject site opposite Montreal Road. Based on its separation distance and significant down-gradient orientation, the former use of this property is not considered to pose an environmental concern to the subject site.

Following the historical review, a site inspection was conducted to assess the present-day environmental conditions of the subject site. The subject site is currently occupied with an auto service garage (APEC #7) (1649 Montreal Road) and a residential dwelling (741 Blair Road).

During the inspection of the auto service garage, one (1) aboveground motor oil storage tank (APEC #8) and two (2) aboveground waste oil tanks (APEC #9) were observed on-site. These tanks were noted to be in good condition, with no signs of leaks or staining in their vicinity. These oil tanks are considered to represent APECs with respect to the subject site.

The floor drains within the maintenance bays of the auto service garage reportedly feed into two (2) oil/water separators (APECs #10 and #11) before ultimately draining into the City of Ottawa sanitary sewer system. The presence of these oil/water separators is considered to represent APECs with respect to the subject site.

The neighbouring lands within the vicinity of the subject site were generally observed to be used for residential and commercial purposes. No environmental concerns were identified regarding the use of the surrounding properties.

## **8.2 Recommendations**

Based on the findings of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment will be required for the subject site.**

### **Hazardous Building Materials**

Based on the age of the auto service garage (c.1960's), asbestos containing building materials may be potentially present within the structure. The potential ACMs identified at time of the site inspection include the drywall joint compound throughout the building. These building materials were generally observed to be in good condition at the time of the site inspection and do not pose an immediate concern to the occupants of the building. Access to the interior of the residence at 741 Blair Road was not available at the time of the site inspection, thus a detailed inspection for potential ACMs could not be conducted.

An asbestos survey of the buildings should be conducted in accordance with O.Reg. 278/05, under the Occupational Health and Safety Act, prior to any renovation or demolition activities, if one has not already been conducted.

Based on the age of the auto service garage (c.1960's), lead-based paints may be present on any original or older painted surfaces. The painted surfaces within the garage were generally observed to be in good condition, and do not pose an immediate concern to the occupants of the building. Major work involving lead-based paint or other lead containing products must be done in accordance with O.Reg. 843, under the Occupational Health and Safety Act.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of 10869279 Canada Inc. Permission and notification from 10869279 Canada Inc. and Paterson Group will be required prior to the release of this report to any other party.

### Request Parameters

Municipal Address / Lot, Concession, Geographic Township (**Municipal address essential for cities, towns or regions**)  
1649 Montreal Road; Part of Lot 20, Concession 1 (Ottawa Front), Formerly the Township of Gloucester, in the City of Ottawa, ON

Present Property Owner(s) and Date(s) of Ownership

Previous Property Owner(s) and Date(s) of Ownership

Present/Previous Tenant(s), (if applicable)

Search Parameters	Specify Year(s) Requested
<i>Files older than 2 years may require \$60.00 retrieval cost. There is no guarantee that records responsive to your request will be located.</i>	
Environmental concerns (General correspondence, occurrence reports, abatement)	all
Orders	all
Spills	all
Investigations/prosecutions ➤ Owner <b>AND</b> tenant information must be provided	all
Waste Generator number/classes	all

### Certificates of Approval ➤ Proponent information must be provided

1985 and prior records are searched manually. **Search fees in excess of \$300.00** could be incurred, depending on the types and years to be searched. Specify Certificates of Approval number(s) (if known). **If supporting documents are also required, mark SD box and specify type e.g. maps, plans, reports, etc.**

	SD	Specify Year(s) Requested
air - emissions		1986-present
water - mains, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster)		1986-present
sewage - sanitary, storm, treatment, stormwater, leachate & leachate treatment & sewage pump stations		1986-present
waste water - industrial discharges		1986-present
waste sites - disposal, landfill sites, transfer stations, processing sites, incineratorsites		1986-present
waste systems - PCB destruction, mobile waste processing units, haulers: sewage, non-hazardous & hazardous waste		1986-present
pesticides - licenses		1986-present

A \$5.00 non-refundable application fee, payable to the Minister of Finance, is mandatory. The cost of locating on-site and/or preparing any record is \$30.00/hour and 20 cents/page for photocopying and you will be contacted for approval for fees in excess of \$30.00.

# Historic Land Use Inventory

## Application Form

### Notice of Public Record

All information and materials required in support of your application shall be made available to the public, as indicated by Section 1.0.1 of *The Planning Act*, R.S.O. 1990, C.P.13.

### Municipal Freedom of Information and Protection Act

Personal information on this form is collected under the authority the *Planning Act*, RSO 1990, c. P. 13 and will be used to process this application. Questions about this collection may be directed by mail to Manager, Business Support Services, Planning Infrastructure and Economic Development Department, 110 Laurier Avenue West, Ottawa, K1P 1J1, or by phone at (613) 580-2424, ext. 24075

### Background Information

\*Site Address or Location:

\* Mandatory Field

### Applicant/Agent Information:

Name:

Mailing Address:

Telephone:  Email Address:

### Registered Property Owner Information: Same as above

Name:

Mailing Address:

Telephone:  Email Address:

### Site Details

Legal Description and PIN:

Part of Lot 20, Concession 1 (Ottawa Front), formerly the Township of Gloucester, in the City of Ottawa.

What is the land currently used for?

Site is currently occupied with an automotive service garage (Marier Auto Garage)

Lot frontage:  m Lot depth:  m Lot area: \_\_\_\_\_ m<sup>2</sup>

OR Lot area: (irregular lot)  m<sup>2</sup>

Does the site have Full Municipal Services:  Yes  No

### Required Fees

Please don't hesitate to visit [the Historic Land Use Inventory website](#) more information. Fees must be paid in full at the time of application submission.

Planning Fee

\$125.00

~~\$100.00~~

### Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Infrastructure and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3.** A site plan or key plan of the property, its location and particular features.
- 4.** Any significant dates or time frames that you would like researched.

**Disclaimer**  
**For use with HLUI Database**

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Paterson Group Inc. \_\_\_\_\_ ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2019**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jun 30, 2020**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM MAN

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Jun 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Dec 2019**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Aug 31, 2020**

**Delisted Fuel Tanks:**

Provincial DELISTED TANK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Drill Hole Database:**

Provincial **DRL**

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2019**

**Environmental Activity and Sector Registry:**

Provincial **EASR**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Aug 31, 2020**

**Environmental Registry:**

Provincial **EBR**

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Aug 31, 2020**

**Environmental Compliance Approval:**

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Aug 31, 2020**

**Environmental Effects Monitoring:**

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2020**

**Environmental Issues Inventory System:**

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial [EXP](#)

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal [FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal [FCS](#)

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Apr 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal [FOFT](#)

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal [FRST](#)

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial [FST](#)

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial [FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2017**

**TSSA Historic Incidents:**

Provincial **HINC**

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial **INC**

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial **MNR**

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Mar 31, 2020**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Aug 31, 2020****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\*****Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011-Aug 31, 2020****Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness. The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Aug 31, 2020**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial [RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2020**

**Retail Fuel Storage Tanks:**

Private [RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jun 30, 2020**

**Scott's Manufacturing Directory:**

Private [SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial [SPL](#)

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Nov 2019**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

Listing of variiances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variiances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Aug 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**To:** Nick Sullivan  
**Subject:** RE: Records Search Request (PE5061)

Hello,

Thank you for your request for confirmation of public information.

- We confirm the following **fuel storage tanks records** in our database at the subject address(es).

Inst Number	Segment1	Address	City	Province	Postal Code	Status
9813711	FS GASOLINE STATION - FULL SERVE	1649 MONTREAL RD	GLOUCESTER	ON	K1J 6N6	EXPIRED
9826947	FS GASOLINE STATION - SELF SERVE	1648 MONTREAL RD	GLOUCESTER	ON	K1J 6N5	EXPIRED
10762783	FS LIQUID FUEL TANK	1648 MONTREAL RD	GLOUCESTER	ON	K1J 6N5	EXPIRED
10762795	FS LIQUID FUEL TANK	1649 MONTREAL RD	GLOUCESTER	ON	K1J 6N6	EXPIRED
10762815	FS LIQUID FUEL TANK	1649 MONTREAL RD	GLOUCESTER	ON	K1J 6N6	EXPIRED
10762833	FS LIQUID FUEL TANK	1649 MONTREAL RD	GLOUCESTER	ON	K1J 6N6	EXPIRED

For a further search in our archives please complete our release of public information form found at <https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?mid=392> and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

**Please refrain from sending documents to head office and only submit your requests electronically via email** along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

Kind regards,

Roxana
