

PHASE ONE ENVIRONMENTAL SITE ASSESSMENT

1592 TENTH LINE ROAD, ORLÉANS, ONTARIO

Prepared For:

Bridor Developments 996B St Augustin Road Embrun, ON K0A 1W0 Attention: Eric Brisson eric.brisson@oligogroup.com 613-978-4123

Prepared By:

AEL environment (a division of Aeon Egmond Ltd.) 1705 Argentia Rd, Unit 3, Mississauga, ON, L5N 3A9 Telephone: (416) 657-2367 Facsimile: (866) 281-5328

Client: Bridor Developments Date: July 7, 2021 Project #: 11463

I. EXECUTIVE SUMMARY

I.I LOCATION

The phase one property is located at 1592 Tenth Line, Orleans, Ontario (herein referred to as the "the Site"). The site is situated on the west side of Tenth line Road and east of Phoenix Crescent, in the City of Orleans, Ontario.

I.II USE

The site was occupied by a two-storey building with five (5) residential apartments located centrally on the site. The first developed use of the property was residential in the early 1950s. Prior to approximately 1954, the site use was likely vacant or used for agricultural purposes. The site building was located centrally on the property, the north portion of the site was covered in asphalt and serves as a parking area for residents. Naturalized overgrown trees were present along the east and south of the property boundary. Driveway access to the property was available from the east from Tenth Line Road and from the west via Phoenix Crescent.

Residential properties were located to the north, south and west. The neighbouring properties on the east side of Tenth Line Road appeared to be commercial in use.

I.III HISTORY

AEL undertook a site history using a number of sources including historical mapping, aerial photographs and other sources as available. Historical evidence indicates that the 1592 Tenth Line property was first owned by the Canada Company in 1840. Aerial photos obtained from the National Air Photo Library (NAPL) show evidence of residential development on the property by 1954 and show evidence of sparse residential development to the east, north and south by 1960. Prior to first development the site was crown land, likely vacant or used for agricultural purposes, until initial development of the area. Surrounding lands were developed in the 1960s.

I.IV FIELD AND OFFICE WORK

AEL office work consisted of a review of selected historical documents and aerial photographs, titles, and other information. An owner interview was completed online. Information requests were made with various governmental departments in compliance with Ontario Regulation 153/04.

I.V OPINION

Based on all the work completed to date, AEL were of the opinion that there was no need to investigate the site further, based on the data reviewed at time of reporting, and a Phase two ESA is not recommended.

The report will be updated and become O.Reg.153/04 compliant when responses to freedom of information requests to government agencies have been received and reviewed by AEL. Based on the predominately residential nature of the Site, AEL do not anticipate the responses will alter AELs opinion regarding the assessment conclusions and opinion.

1. INTRODUCTION

1.1 PHASE ONE PROPERTY INFORMATION

1.1.1 LOCATION

The phase one property is located at 1592 Tenth Line Road, Orléans, Ontario and was herein referred to as "the site". The site is situated on the west-southwest side of Tenth Line Road and east-northeast side of Phoenix Crescent in Orléans, located in the City of Ottawa, Ontario. For this project, project east was oriented towards Tenth Line Road.

The site has an area of approximately 1,482 m² (0.148 Ha), according to estimates from the Geowarehouse on-line property database. The site is located in a mixed area of residential, community, institutional, commercial, and parkland land use as determined from site reconnaissance and records review. Figure 1 shows the phase one site and study area.

1.1.2 LEGAL DESCRIPTION

Based on a title review the property has a legal description of:

PT LT B, CON 11, PART 2, 50R1622; CUMBERLAND.

The Property Identification Number (PIN) is 14518-0375. The Roll Assessment number of the current property containing the site is 061450030132500.

1.1.3 GEOGRAPHIC CENTER

The property was centred on approximately 18T 461,381 m east, 5,035,336 m north and was at a surface elevation of about 86 metres above sea level (m asl) according to contour maps from Land Information Ontario (LIO).

1.1.4 OWNER

The owner of record for the phase one property was:

Bridor Developments 996B St Augustin Road Embrun, ON K0A 1W0 Attention: Eric Brisson eric.brisson@oligogroup.com 613-978-4123

1.1.5 CLIENT

The client of record was:

Bridor Developments 996B St Augustin Road Embrun, ON K0A 1W0 Attention: Eric Brisson eric.brisson@oligogroup.com 613-978-4123

1.2 PHASE ONE ENVIRONMENTAL SITE ASSESSMENT INITIATION

The client engaged AEL Environment (AEL) to carry out an Ontario Regulation (O. Reg.) 153/04 compliant phase one environmental site assessment (ESA) for the site, known as 1592 Tenth Line Road, Orléans, ON. The client authorized the project in June 2021.

The report is for the use of the client and AEL only in accordance with the terms of reference, during a 2021 site evaluation. The study was part of the client's work to complete an environmental assessment of the site for the purpose of legal segregation of the property. Additional studies may be required as a result of this report to address issues not specifically identified in the terms of reference of the report.

1.4 **APPLICABILITY**

Further as to use, the report may omit or not consider issues which may be important to the reader or deal with issues to the extent sought by the reader. Others with an interest in the site must undertake their own investigations and studies when considering site conditions discussed in this report. Neither AEL nor its officers know of any conflicts of interest AEL has respecting the site or the owner of the site.

1.5 FOLLOW UP

The report was prepared on the understanding and assumption that any work recommended or required, and any materials found will be completed and dealt with in accordance with any applicable law.

1.6 LIMITATIONS

The report was completed for the sole use of AEL and the client in a 2021 site evaluation stage. Others with an interest in the site must decide on the site conditions and conduct their own investigations to determine how or if the site affects them.

1.7 ASSESSOR

The geo-environmental engineering consulting firm of:

AEL environment

A division of Aeon Egmond Ltd. 1705 Argentia Road, Unit 3 Mississauga ON L5N 3A9 Telephone: 416-657-2367

Attention: Charna Kozole, P. Eng., Qualified Person

1.8 PHASE ONE ESA FORMAT

The ESA, as prepared herein, for those portions completed for the project, shall be in accordance with O. Reg. 153/04. The report will be updated and become O.Reg.153/04 compliant when responses to freedom of information requests to government agencies have been received and reviewed by AEL. Based on the predominately residential nature of the Site, AEL do not anticipate the responses will alter AELs opinion regarding the assessment conclusions and opinion

2. SCOPE OF INVESTIGATION

2.1 TERMS OF REFERENCE

The proposed scope of work (SOW) for the project and assumptions used to base the timing and cost estimates on were as follows:

- Carry out a phase one ESA to investigate the potential environmental legacy of the site.
- Carry out site investigations and records review from sources such as (but not necessarily including) existing reports by others (to be supplied by the client), historical maps, historical documents, title search, government and other information in consideration of various protocols, and other sources as could be developed within the investigation time frame.
- Carry out site reconnaissance and interviews.
- Evaluate the information gathered from the records review, interviews and site reconnaissance.
- Prepare a phase one ESA report outlining the findings and provide comments based on the findings as well as using information available to AEL received on or before the completion date of the report.
- A qualified person shall ensure that the phase one ESA meets the requirements of Schedule D of O. Reg. 153/04.
- Denial of access to a qualified person, or someone supervised by a qualified person, to a structure or building or to any other part of the phase one property or any area under the phase one property, for any reason other than safety or inaccessibility, is an impediment that precludes meeting the general or specific objectives, components or requirements of a phase one ESA.
- The client shall be responsible for providing AEL with a current site survey showing any current building(s) and site configuration prior to a Record of Site Condition (RSC) submission.
- All matters not listed in the terms of reference or general conditions are specifically excluded from AEL's responsibilities and reporting.

2.2 PHASE ONE ESA STANDARD

AEL followed the general procedures set out in O. Reg. 153/04 (as amended) to carry out the phase one ESA. AEL retains the sole discretion to increase or decrease the scope of the work based on the ongoing findings.

2.3 HISTORICAL SITE DOCUMENTS

AEL retained a private search firm to search various government and related agency archives to develop information related to the environmental legacy at the site. AEL further reviewed historical mapping and aerial photographs (See Figure 2a-k). The results of searches of Ecolog ERIS records are presented in Appendix 1. The titles search is presented in Appendix 2. Responses received from government agency requests are presented in Appendix 3.

2.4 MUNICIPAL POTABLE WATER USE

AEL made inquiries on behalf of the client with the municipality that has authority under the Municipal Act, 2001 to pass bylaws respecting water production, treatment and storage (City of Ottawa) regarding the application of non-potable water criteria at the site. The City of Ottawa responded they did not object to the application of non-potable clean-up standards. Based on the City's response, absence of potable drinking water wells on the site and absence of a Wellhead Protection Area, AEL conclude that the site is located in an are of non-potable water use for reporting purposes. The one domestic well noted as being present 189 m upgradient from Site is not anticipated to be influenced by Site activities.

3. **RECORDS REVIEW**

3.1 GENERAL

3.1.1 PHASE ONE STUDY AREA DETERMINATION

The phase one study area included properties that were located, wholly or partly, within 250 meters from the nearest point on a boundary of the phase one property.

3.1.2 FIRST DEVELOPED USE DETERMINATION

A qualified person reviewed material provided by the client and photos obtained from other sources (e.g. government and private agency databases, Google Earth). Historical evidence indicates that the property was first owned by an individual in 1840, likely for residential land use. Aerial photos obtained from the National Air Photo Library (NAPL) show evidence of residential development on the Site by 1954 and show evidence of sparse residential development to the east, north and south by 1960. Prior to first development the site was crown land, likely vacant or used for agricultural purposes, until initial development of the area. Surrounding lands were developed in the 1960s.

3.1.3 FIRE INSURANCE PLANS

No fire insurance plans were available for review of the site and the surrounding lands within 250 m of the stie.

	Table 3-1 Summary of Fire Insurance Plans						
Date	Source	Address	Relevant information				
N/A							

3.1.4 CHAIN OF TITLE

AEL prepared an up-to-date chronological chain of title that shows the owners' names and dates of ownership for the phase one property based on a search of title that goes back to the date of the first developed use of the phase one property (to patent) (see Appendix 2). Table 3-2, below, summarizes the chain of title for the phase one property.

	Table 3-2 Chain of Title: PIN 14518-0375

May14, 2021	Daniel Dore, Nathaniel Valle-Dore	Bridor Developments	Current Owner					

3.1.5 NEIGHBOURING PROPERTIES – CITY DIRECTORY SEARCH

AEL used a private search company, Environmental Risk Information Services (ERIS) to conduct a search of available city directories for the site and select neighbouring properties including those properties directly adjacent to the site. The search results have not been received to date, due to Covid-19 delays to access to library held information. When received, information will be summarized in an updated report, and will be updated in Appendix 1.

Table 3-3 City Directory Search Results							
Date	Possible Consequences/Areas of Concern						
N/A	N/A To be updated upon receipt of information.						

3.1.6 ENVIRONMENTAL REPORTS

The following is a list and summary of reports reviewed as referred to in Ontario Regulation 153/04, Schedule D, Part II, including,

- i. environmental site assessment reports,
- ii. remediation reports,
- iii. reports prepared in response to an order or request of the Ministry, and
- iv. any other reports relating to the presence of a contaminant on, in or under the phase one property or the existence of an area of potential environmental concern.

AEL was provided with the following reports for review:

 "Property located at 1592 Tenth Line, Orleans, ON, Phase 1 Environmental Assessment", prepared for Oligo Properties Inc., prepared by St. Lawrence Testing & Inspection Co. Ltd., dated December 9, 2020 (herein referred to as the 2020 Oligo Phase I ESA Report).

AEL was provided a site plan (See Appendix 4).

3.1.6.1 2020 OLIGO PHASE I ESA REPORT

AEL noted the following information from the report:

- A Phase I Environmental Site Assessment was undertaken by St. Lawrence Testing & Inspection Co. Ltd (St. Lawrence Testing) for a commercial property located at 1592 Tenth Line, Orleans.
- The site walkover was completed on December 7, 2020, which included an exterior and interior visual inspection of the property. Observations of the adjoining and neighbouring properties were performed from public access areas.
- The Phase I property was rectangular in shape, with an area of 1486.71 m². The Phase I property falls within the residential third density (R3Z) zoning for the City of Ottawa.
- The Phase I property had two (2) structures present, with a two-story rectangular structure located at the east side and a small wood framed storage shed located at the south side.
- The structure was possibly constructed in the 1960s as a private residential building. The building had five (5) apartment units present.
- The adjoining property to the south and located at 417 Phoenix Crescent was residential in use.
- The neighbouring properties to the west located across Phoenix Crescent were all private, residential use properties. The neighbouring properties to the east were a mix of commercial and community use.
- The first use of the Phase I property was as a private, residential property in the 1960's.
- The site was serviced with natural gas, potable water and sanitary sewer were supplied by the municipality.
- Aerial Photographs taken in 1975 shows evidence of a square shaped structure present on the property.
- Twenty-five (25) records were found in the Ontario Waste Generators Database within 250m radius of the Site. Waste generated from 1585 Tenth Line Road included inert organic waste, brine, paint, pigments and coatings, Waste generated from 1675 Tenth Line Road included pharmaceutical wastes, pathological wastes. Wastes generated from 1515 Tenth Line Road included light fuels, waste oils, lubricants, oil skimmings & sludges, acid & alkaline waste, inorganic wastes, petroleum distillates and aliphatic solvents. St. Lawrence testing deemed this a low environmental risk to the site property, as the generation, handling and disposal of these wastes are provincially regulated.
- One (1) record was found in the Fuel Oil Spills and Leaks Database, the property involved was located 234m northwest of the Site at 1540 Tenth Line Road. On December 1, 2014, a one (1) Litre heating fuel leak occurred at a private residence. St. Lawrence testing deemed this not an environmental concern due to the volume spilled and distance to the Site.
- Ten (10) records were found in the Pesticide Registry. All the records involved a limited vendor of retail pesticide located at 1675 Tenth Line Road. St. Lawrence Testing deemed this not an environmental concern due to the volume of pesticides sold at this location.
- Four (4) records were found in the Ontario Spills Database, the nearest spill occurred in 2001 at 1585 Tenth Line Road, approximately 187m east of the Site. Spill involved an unknown gas into the air. St. Lawrence Testing deemed this would not pose an environmental concern as the air would have been sufficiently diluted prior to reaching the Site.
- Two refrigerant spills occurred at the properties located at 1675 Tenth Line Road and 1515 Tenth Line Road respectively. St. Lawrence Testing deemed this not an environmental concern as records indicated no environmental impacts were suspected.
- The site was serviced with potable water by the municipality.
- The site was service with a connection to a sanitary sewer line along Tenth Line Road. The site also had an abandoned septic system located at the south side of the Site property.
- No fill material or stressed vegetation was observed during the Site walkover.

3.2 ENVIRONMENTAL SOURCE INFORMATION

AEL used a private search company, ERIS, to review some government records and provide internet searches for others. The records reviewed included the Ontario government records for water well records, fuel tanks, spills reporting and environmental infringements. Not all databases searched are listed below but are presented in Appendix 1.

3.2.1 ENVIRONMENTAL REPORTING

3.2.1.1 NATIONAL POLLUTANT RELEASE INVENTORY (NPRI)

The commercial search found no records for the site or for the surrounding lands within 250 m of the site.

3.2.1.2 CERTIFICATES OF APPROVAL (CA)

The commercial search found no records for the site.

The commercial search found one (1) record for surrounding lands within 250 m of the site. The records were reviewed, and details can be found in Appendix 1.

The record was reviewed and due to the type of record and distance to the site, this is not considered a potential environmental liability.

3.2.1.3 ENVIRONMENTAL COMPLIANCE APPROVAL (ECA)

The commercial search found no records for the site.

The commercial search found two (2) records for surrounding lands within 250 m of the site. The records were reviewed, and details can be found in Appendix 1.

The records were reviewed and due to the types of records, distance to the site and/or the inferred direction of groundwater flow, these are not considered a potential environmental liability.

3.2.1.4 ENVIRONMENTAL ACTIVITY AND SECTOR REGISTRY (EASR)

The commercial search found no records for the site.

The commercial search found two (2) records for surrounding lands within 250 m of the site. The records were reviewed, and details can be found in Appendix 1.

The records were reviewed and due to the types of records, these are not considered a potential environmental liability.

3.2.1.5 ENVIRONMENTAL REGISTRY (EBR)

The commercial search found no records for the site or for the surrounding lands within 250 m of the site.

3.2.1.6 NATIONAL PCB INVENTORY (NPCB)

The commercial search found no records for the site or for the surrounding lands within 250 m of the site.

3.2.1.7 INVENTORY OF PCB STORAGE SITES (0PCB)

The commercial search found no records for the site or for the surrounding lands withing 250 m of the site.

3.2.1.8 PESTICIDE REGISTER (PES)

The commercial search found no records for the site

The commercial search found ten (10) records for surrounding lands within 250 m of the site. The records were reviewed, and details can be found in Appendix 1.

The records were reviewed and due to the types of records and distance to the site and/or the inferred direction of groundwater flow, there are not considered a potential environmental liability.

3.2.2 ENVIRONMENTAL INCIDENT REPORTS

3.2.2.1 ONTARIO SPILLS (SPL)

The commercial search found no records for the site.

The commercial search found four (4) records for surrounding lands within 250 m of the site. The records were reviewed and details can be found in Appendix 1.

The records were reviewed and due to the types of gaseous releases, distance to the site and/or the inferred direction of groundwater flow, these are not considered a potential environmental liability.

3.2.2.2 TSSA INCIDENTS (INC)

The commercial search found no records for the site

The commercial search found one (1) for surrounding lands within 250 m of the site. The record was reviewed, and details can be found in Appendix 1.

The record was reviewed and due to the distance to the site and the inferred direction of groundwater flow, this is not considered a potential environmental liability.

3.2.2.3 TSSA HISTORIC INCIDENTS (HINC)

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.2.4 TSSA PIPELINE INCIDENTS (PINC)

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.3 WASTE MANAGEMENT RECORDS

AEL requested Ecolog ERIS to review waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors with respect to the phase one property and any property on, under or adjacent to the phase one property.

3.2.3.1 WASTE DISPOSAL SITES (WDS) – MOE CA INVENTORY

The commercial search found no records for the site or surrounding lands within 250 m of the site.

3.2.3.2 WASTE DISPOSAL SITES (WDSH) – MOE 1991 HISTORICAL APPROVAL INVENTORY

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.3.3 WASTE DISPOSAL SITES (ANDR) – ANDERSON'S WASTE DISPOSAL SITES

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.3.4 ONTARIO REGULATION 347 WASTE GENERATORS SUMMARY (GEN)

The commercial search found no records for the site.

The commercial search found twenty-five (25) records for surrounding lands within 250 m of the site. The records were reviewed, and details can be found in Appendix 1.

The records were reviewed and due to the types of records (i.e. pharmacy wastes, high school lab and shop and maintenance wates), distance to the site and/or inferred direction of groundwater flow, these are not considered a potential environmental liability.

3.2.3.5 ONTARIO REGULATION 347 WASTE RECEIVERS SUMMARY (REC)

The commercial search found no records for the site or for the surrounding lands within 250 m of the site.

3.2.4 FUEL STORAGE TANK INFORMATION

3.2.4.1 FUEL STORAGE TANKS ON THE PHASE ONE STUDY PROPERTY (FST)

The commercial search found no records for the site. It should be noted that the Fuels Safety Division did not register private fuel underground or aboveground tanks prior to January 1990 or furnace oil tanks prior to May 1, 2002. The Fuels Safety Division did not register waste oil tanks in apartments, office buildings, residences, etc. or above ground gas or diesel tanks.

3.2.4.2 FUEL STORAGE TANKS ON ADJACENT PROPERTIES

The commercial search found no records for surrounding lands within 250 m of the site. Details can be found in Appendix 1.

3.2.4.3 FUEL STORAGE TANKS – HISTORIC (FSTH)

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.4.4 RETAIL FUEL STORAGE TANKS (RST)

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.4.5 PRIVATE FUEL STORAGE TANKS (PRT)

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.4.6 TSSA EXPIRED FACILITIES (EXP)

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.4.7 DELISTED FUEL TANKS

The commercial search found no records for the site or for surrounding lands within 250 m of the site.

3.2.5 NOTICES AND INSTRUMENTS/ONTARIO BROWNFIELDS REGISTRY

AEL reviewed the applicable document sites kept by the government. The site was not listed during AEL's search.

3.2.6 AREAS OF NATURAL SIGNIFICANCE

AEL reviewed maps by LIO and the municipality and determined the site is situated away from the boundaries of any areas of natural significance.

3.2.7 BUILDING AND ENGINEERING PLANNING RECORDS

No building or engineering planning records were available for review for the site.

3.3 PHYSICAL SETTING SOURCES

3.3.1 AERIAL PHOTOGRAPHS

AEL considered selected aerial photographs for the site. The photographs were collected from the National Air Photo Library (NAPL) and Google Earth (Table 3-4).

The time period between aerial photographs used was based on estimated time of first development of site starting from about 10 years prior and then progressing in approximately 10-year increments. Selected air photos are included as Figures 2a - k.

	Table 3-4 Aerial Photographs							
Year	Photo Source	Site Features Observed	Neighbouring Property Observation					
1954	Hunting Survey Corporation Limited	Buildings appear to be present on Site.	Residential Buildings are present to the east and west. General area appears to be developed with few residential properties, the remaining lands are either or vacant or agricultural in use. Current configuration of roads visible: Tenth Line Road is visible					
1960	NAPL	No significant changes apparent from 1954 aerial photograph.	No significant changes apparent from 1954 aerial photograph.					
1975	NAPL	No significant changes apparent from 1975 aerial photograph.	Significant residential development evident to the north and northwest. Neighbouring property to the east appears to be either vacant or agricultural in use.					
1988	NAPL	No significant changes apparent from 1975 aerial photograph.	Significant residential development evident to the south, west and east.					
1990	NAPL	No significant changes apparent from 1988 aerial photograph.	Sparse commercial development evident on the southeast. An institutional building (Sir Wilfrid Laurier Secondary School) is now present to the east of the site.					

	Table 3-4 Aerial Photographs								
Year	Photo Source	Site Features Observed	Neighbouring Property Observation						
2003	Google Earth	No significant changes apparent from 1990 aerial photograph	A community building with a large parking lot has been developed to the east of the site. Commercial development present to the southeast						
2008	Google Earth	No significant changes apparent from 2003 aerial photograph.	No significant changes apparent from 2003 aerial photograph						
2020	Google EarthNo significant changes apparent from 2008 aerial photographNo significant changes appa photograph		No significant changes apparent from 2008 aerial photograph						

3.3.2 TOPOGRAPHY, HYDROLOGY, GEOLOGY

3.3.2.1 TOPOGRAPHY

According to LIO, the site at an approximate elevation of 86 m asl. The local site topography is almost flat, with a slight slope towards the west (see Figure 3).

3.3.2.2 PHYSIOGRAPHY

The regional physiography is dominated by Ottawa Valley clay plains. Lying in the Ottawa Valley between Pembroke and Hawkesbury, it consists of plains interrupted by ridges of rock or sand as seen in Figure 4.

AEL did not undertake a geotechnical investigation of the site. Upon review of the Ministry of Northern Development and Mine's "Surficial Geology" layer from OGSEarth, the site is in an area of offshore marine deposits, characterized by Clay, Silty Clay and Silt. These materials are generally resistant to the infiltration of fluids and have a higher runoff potential and lower infiltration rates, due to the clay components (see Figure 5a).

3.3.2.3 GEOLOGY

Upon review of the Ministry of Northern Development and Mine's "Bedrock Geology" layer from OGSEarth, the bedrock consists of the Shadow Lake Formation (limestone, dolostone, shale, arkose, sandstone) from the Ordovician period (See Figure 5b). The depth to bedrock is anticipated to be approximately at 35m.

3.3.2.4 FILL MATERIALS

During site reconnaissance no fill material was observed.

3.3.2.5 WATER BODIES, AREAS OF NATURAL SIGNIFICANCE & GROUND WATER INFORMATION

The closest visible body of water is the tributary of Bilberry Creek, located approximately 800 m southwest of the site (see Figure 3). Based on local and regional topography the inferred direction of groundwater flow is to the northwest.

There are no parks, reserves or other areas of natural significance within vicinity, in whole or part, of the site (within 250 m).

The site and properties within the phase one study area are currently serviced by municipally supplied water. Well records searched on the MECP online database found no well records for wells located on the site. There was one (1) well record on surrounding lands withing 250 m of the site. The final use of these wells was listed as domestic water supply.

3.3.2.6 WELL RECORDS

The commercial search found no records for the site.

	Table 3-5 Wells Within Phase One Site							
Well #	Location	Stratigraphy	Depth to Bedrock	Well Depth	Depth to Water Table	Final Well Status		
No well records were identified for the site.								

The commercial search found one (1) well records for surrounding lands within 250 m of the site, with details listed in Table 3-6 and in Appendix 1.

	Table 3-6 Wells Within Phase One Study Area								
Well #	Location	Distance/Direction to Site	Stratigraphy	Depth to Bedrock	Well Depth	Depth to Water Table	Final Well Status		
7167525	NAD83 – Zone 18 Easting: 461238 Northing: 5035224	188.9 m WNW (upgradient)	Clay 0-117 ft Gravel 117- 119 ft Limestone 119-130 ft	N/A	130 ft	23.3 ft	Domestic Water Supply		

3.4 SITE OPERATING RECORDS

Since the phase one property is not an enhanced investigation property, in accordance with clause 32 (3) (a) of the regulation, site operating records were not reviewed.

3.5 GOVERNMENT RECORDS

Contacts with various government agencies were made (Appendix 3), with responses listed below.

3.5.1 MINISTRY OF ENVIRONMENT, CONSERVATION AND PARKS (MECP)

AEL filed a Freedom of Information request with the MECP (formerly the Ministry of the Environment and Climate Change) regarding the site. No response was received before the report was issued.

3.5.2 MINISTRY OF LABOUR, TRAINING AND SKILLS DEVELOPMENT (MLTSD)

AEL filed a Freedom of Information request with the MLTSD regarding the site. MLTSD responded they held no records for the site in MLTSD's Occupational Health and Safety Database.

3.5.3 THE TECHNICAL STANDARDS AND SAFETY AUTHORITY (TSSA)

AEL filed an information request with the TSSA inquiring on the presence of USTs or ASTs. The TSSA responded they held no records of fuel storage tanks at the address.

3.5.4 CITY OF OTTAWA

AEL filed an information request with the City of Ottawa regarding the site. No response was received before the report was issued.

3.5.5 ENVIRONMENT AND CLIMATE CHANGE CANADA (ECCC)

AEL filed a Freedom of Information request with ECCC regarding the site. ECCC indicated they have no records pertaining to the site.

3.5.6 COAL TAR WASTES/MANUFACTURED GAS PLANTS

AEL reviewed the applicable documents kept by the government. The site and adjacent properties were not listed.

3.5.7 WASTE DISPOSAL SITE INVENTORY

AEL reviewed the applicable documents kept by the government. The site and adjacent properties were not listed.

4. **PROPERTY INFORMATION INTERVIEW**

4.1 DAN DORE, PART OWNER

4.1.1 INTERVIEW BACKGROUND

AEL interviewed a part owner of the property, Dan Dore of DORE Property Management. Mr. Dore's responses were logged electronically on June 04, 2021, using AEL's custom property survey form. See Appendix 4 for completed owner survey Mr. Dore is deemed to be a credible source due to his involvement in managing the property.

4.1.2 INTERVIEW SUMMARY

The following information was provided in regard to the property on 1592 Tenth Line Road:

- The current site and past site use are residential.
- The property contains a two-storey dwelling with five apartment units.
- No transformers are located on site.
- No PCBs, hazardous chemicals or herbicides have been used on site.
- No recorded/known spills.
- No above or below ground storage tanks.
- There is a basement on site.
- No asbestos-containing materials or lead-based paints are present on-site.
- The site is on city water supply and is serviced by municipal sewer services.
- No known fill has ever been placed on-site.
- Tenants are present in three out of the five apartment units.

5. SITE RECONNAISSANCE

5.1 GENERAL REQUIREMENTS

5.1.1 INTRODUCTION

John Stephen, under the supervision of Charna Kozole, QP, attended the area and site from 1:00 PM to 1:40 PM on June 14th, 2021, during a cloudy day at a temperature of about 24° Celsius. All portions of the site were accessible, and no snow was present on-site surfaces. See Appendix 5 for the photographic layout of the site.

5.1.2 RECONNAISSANCE FINDINGS

The site was semi-occupied at the time of the investigation, consisting of a two-story residential dwelling with five (5) individual apartments located centrally on the site, along with a small wooden storage shed located at the south side of the Site. The site was located on the west side of Tenth Line Road, driveway access to the site was available from the east from Tenth Line Road and from the west via Phoenix Crescent.

Naturalized overgrown trees were present along the east and south of the property boundary. All vegetation appeared to be in good health, and no stressed vegetation was noted. An asphalt covered parking area extends west to east along the northern property boundary. The site contained remnants of a potable well located on the west side of the property, the well was abandoned and backfilled and no longer in service. No record of this well was located on the Ontario Well Records website. The site has access to sanitary sewer line along Tenth Line Road, during the site walkover an abandoned septic system was located at the south side of the site.

Chain link fenced separates the Site from the adjoining property to the north. A wooden fence separates the site from the adjoining property to the south. The adjoining properties to the south, north and east appear to be residential in use. Adjoining properties to the east located across Tenth Line Road appear to be a combination of commercial and/or community use.

The site has access to municipal water and sewer, hydro, natural gas and cable. Municipal water and sewer likely enter the site from the east side of the building from Tenth Line Road. Hydro enters the site from the north side of the building and natural gas enters the site from the west side of the building.

The phase one property was not currently nor formerly used for any of the uses described in Schedule D Table 2 of the regulation (O. Reg. 153/04)

5.1.3 NAME AND QUALIFICATIONS OF SITE INVESTIGATOR

John Stephen, under the supervision of Charna Kozole, P. Eng., completed site reconnaissance. Ms. Kozole is a qualified person as defined in O. Reg. 153/04.

5.1.4 PHOTOGRAPHIC RECORD

Below is a table outlining the details of the photographs taken by AEL during the site reconnaissance. The orientation by compass of the photographs and orientation with respect to other photographs can be seen in the site Photographic Plan (Appendix 5). Copies of the photographs can be found in the photo record appended to this report.

Table 5-1 Photographic Record					
Photo Number	Description				
001	Facing west, the "site" consists of a two storey residential building with five (5) apartments. Northern portion of the site is asphat covered and serves as a parking area for the residents				
002	Facing east, hot water tanks located in the basement. The site is service by municipal water.				
003	Facing south, overhead hydrolines enter the property from the south side of the building.				
004	Facing east, gas enters the property from the west side of the building.				

Table 5-1 Photographic Record				
Photo Number Description				
005	Facing southwest, remnants of a potable well that has been abandoned and backfilled. There are no records of a potable well existing on this site according Ontario Well Records database. The site is serviced by municipal water.			
006	Facing southeast, commercial properties were located east of the site along Tenth Line Road.			

5.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

5.2.1 BUILDINGS AND STRUCTURES

Two-storey rectangular building was present centrally on the Site. A small wooden storage shed was located at the south side of the site.

5.2.2 BELOW GROUND STRUCTURES

A basement containing two apartment units and a utility room containing washing machine, dryer and hot water tanks were present.

5.2.3 INTERIOR STORAGE TANKS

Five (5) domestic hot water tanks were located in the basement of the building.

5.2.4 WATER SOURCES

5.2.4.1 POTABLE WATER SOURCES

The site was connected to the municipal water system and enters the site at the east side.

5.2.4.2 NON-POTABLE WATER SOURCES

No evidence of non-potable wells was noted on site.

5.2.5 UNDERGROUND UTILITIES

No underground utility drawings were available for review. If a phase two ESA is to be undertaken at the site, AEL will obtain public and private locates. The exact location of underground utilities is unknown, although based on available records and site reconnaissance, the following was noted.

The site and neighbouring properties appear to be serviced by overhead hydro lines, underground natural gas lines and municipally supplied water and sewer lines. Municipal water and sewer likely enter the site from the east side of the building from Tenth Line Road. Hydro enters the site from the north side of the building and natural gas enters the site from the west side of the building. As natural gas lines are very small in diameter, they are not expected to have an effect on the transport of potential contaminants in the subsurface. Water and sewer lines are anticipated to be larger, and likely present within the same area on-site, and thus a preferential pathway may exist for the transport of groundwater and potential contaminants of concern where these utility lines are present.

5.2.6 BUILDING FEATURES

5.2.6.1 EXIT AND ENTRY POINTS

Entrance and exit to the site building is present from the east. Driveway access to the site is present east from Tenth Line Road and from the west via Phoenix Crescent.

5.2.6.2 HEATING/COOLING SYSTEM

Heating for the basement and second floor is via electric baseboards. The apartment present on the main floor is heated via a hot water boiler system using natural gas.

5.2.6.3 DRAINS, PITS AND SUMPS

Sanitary drains were present in the building, laundry equipment drained in the basement and lead in to the municipal sewer system.

5.2.6.4 FLOOR STAINING

No staining was noted.

5.2.6.5 FLOOR CRACKING

No cracking was noted.

5.2.6.6 UNIDENTIFIED SUBSTANCES

No unidentified substances were noted.

5.2.6.7 LIGHT FIXTURES

Standard fluorescent light fixtures were found throughout the building.

5.2.6.8 CHEMICAL STORAGE

Twenty (20) small containers (<5L) of paint and paint thinners were located in a storage closet on the east side of the building.

5.2.7 EXTERIOR PROPERTY

5.2.7.1 WELLS

During site reconnaissance remnants of a potable well was located on the west side of the site. The well was backfilled and abandoned.

5.2.7.2 SEWAGE WORKS

The site is serviced by the municipal sewer system, and likely enters the property at the east side along Tenth Line Road. There was also an abandoned septic system located at the south side of the site.

5.2.7.3 GROUND COVER

An asphalt covered parking area extended west to east along the northern property boundary, the remaining parts of the site was covered in grass.

5.2.7.4 RAILWAY LINES

Based on Google Earth estimates, the closest railway line is approximately 5.5 km south of the site. Considering the distance to the site, no impacts are anticipated.

5.2.7.5 EXTERIOR STORAGE TANKS

No tanks were present on site.

5.2.7.6 STAINING

No staining was noted.

5.2.7.7 VEGETATION

Naturalized overgrown trees were present along the east and south of the property boundary. All vegetation appeared to be in good health, and no stressed vegetation was noted.

5.2.7.8 FILL / DEBRIS

No fill material was observed.

5.2.7.9 UNIDENTIFIED SUBSTANCES

No unidentified substances were found at the property.

5.2.7.10 ENVIRONMENTALLY SENSITIVE AREAS

The site does not fall within the boundary of any environmentally sensitive areas.

5.2.7.11 BODIES OF WATER

The closest visible body of water is a tributary of Bilberry Creek located 800 m southwest of the site (see Figure 3). Based on local and regional topography the inferred direction of groundwater flow is to the northwest.

5.2.8 HAZARDOUS MATERIALS

5.2.8.1 ASBESTOS CONTAINING MATERIALS (ACMS)

Asbestos was a common component in building materials until the 1970s due to its fire-retardant properties. The health risks associated with asbestos occur when asbestos fibres are released from ACMs into the air. This may be the case during maintenance or demolition activities, or where an ACM has deteriorated to the point it has become friable. If an ACM is in good condition, it generally does not pose a health risk.

Building materials commonly containing asbestos include ceiling and flooring tiles, pipe, boiler, electrical wiring and blown-in insulation, electrical panel partitions, joint compounds, cement siding and wallboard, and caulking and putties.

An asbestos survey was not completed as part of the phase one ESA. Given the age of the building at the site. ACMs may potentially be present. A DSS survey should be completed prior to renovations to determine the presence of any designated substances.

5.2.8.2 LEAD

Lead was a common paint additive until the 1980s, as it produced a high quality, durable protective coating. Paints made prior to 1950 contain large amounts of lead; after 1950, lead was more common in exterior paint.

A lead survey was not completed as part of the phase one ESA. Given the age of the building at the site, lead maybe potentially be present. A DSS survey should be completed prior to renovations of the property.

5.2.8.3 MERCURY

Mercury-containing products were commonly used in building products due to its ability to conduct electricity, measure temperature and pressure, and as a fungicide, preservative and disinfectant. Mercury-containing products include fluorescent lamps, thermostats, electrical switches and paints.

A mercury survey was not completed as part of the phase one ESA. Given the age of the building at the site, mercury may potentially be present in small quantities. A DSS survey should be completed prior to renovations of the property.

5.2.8.4 POLYCHLORINATED BIPHENYLS (PCBS)

PCBs were common up to the early 1980s as a dielectric fluid in transformers, capacitors and light ballasts. PCBs are an environmental concern as they persist in the environment and can accumulate in the food chain. The use of PCBs in light ballasts was ceased in the early 1980's. Federal PCB regulations have designated a 2009 deadline for end-of-use and end-of storage for high level PCBs for products and equipment containing PCBs. Products and equipment with low level PCBs are to be eliminated by 2025.

A PCB survey was not completed as part of the phase one ESA. Given the on-site activities PCBs are unlikely to be present on the site. A DSS survey should be completed prior to renovations to the property.

5.2.8.5 OZONE-DEPLETING SUBSTANCES (ODSS)

ODSs are any substances containing chlorofluorocarbon (CFC), carbon tetrachloride, methyl chloroform, or any other chemicals capable of depleting the stratospheric ozone layer. ODSs are commonly used in refrigeration, air conditioning, foam and industrial solvent applications. In Ontario, O. Reg. 463/10 outlines the mandatory recovery and reclamation of ODSs during maintenance of ODS containing equipment. ODSs are not of concern if handled with care during repair, removal or disposal activities.

Equipment potentially containing ODSs was not identified during site reconnaissance. Storage of ODSs was not observed during site reconnaissance.

5.2.8.6 UREA FOAM FORMALDEHYDE INSULATION (UFFI)

UFFI was used in the 1970s as building blown-in insulation but was banned in 1980. This material was mainly used in residential buildings as cavity filler, where the use of conventional insulation was impractical. UFFI is not a high concern in buildings with high ventilation rates.

Evidence of UFFI was not observed during site reconnaissance. A DSS survey should be completed prior to renovations to determine the presence of any designated substances.

5.2.8.7 OTHER

During site reconnaissance no obvious signs of any other hazardous or designated substances were observed.

5.3 SURROUNDING LANDS

All properties directly adjacent to the site and immediately surrounding lands were residential, community, institutional, or parkland in nature. Figure 6 outlines the site and surrounding property uses.

5.3.1 NORTH

A short walkway connecting Phoenix Crescent and Tenth Line Road was located north of the site, with a residential property (1582 Tenth Line Road) located on the north side of the walkway, further north of the site.

5.3.2 WEST

Phoenix Crescent was located west of the site, with a residential property (410 Phoenix Crescent) located on the west side of Phoenix Crescent, further west of the site.

5.3.3 SOUTH

A residential property, 417 Phoenix Crescent, was located south of the site.

5.3.4 EAST

Tenth Line Road was located east of the site, with a community/institutional/parkland property (a recreation centre, child care centre, and outdoor playing fields) located on the east side of Tenth Line Road, further east of the site.

5.4 WRITTEN DESCRIPTION OF INVESTIGATION

AEL undertook a site history using a number of sources including historical mapping, aerial photographs and other sources as available. Historical evidence indicates that the 1592 Tenth Line property was first owned by an individual in 1840, likely for residential land use. Aerial photos obtained from the National Air Photo Library (NAPL) show evidence of a residential property present on the site by 1956 and indicates that surrounding property use appears to be residential and agricultural in use. Prior to first development the site likely vacant or used for agricultural purposes. Surrounding lands were developed around the same time.

John Stephen, under the supervision of Charna Kozole, QP, attended the area and site from 1:00 PM to 1:40 PM on June 14th, 2021, during a cloudy day at a temperature of about 24° Celsius. All portions of the site were accessible, and no snow was present on-site surfaces. The site was semi-occupied at the time of the investigation, consisting of a two-story residential dwelling with five (5) individual apartments located centrally on the site, along with a small wooden storage shed located at the south side of the Site. The site was located on the west side of Tenth Line Road, driveway access to the site was available from the east from Tenth Line Road and from the west via Phoenix Crescent.

Naturalized overgrown trees were present along the east and south of the property boundary. All vegetation appeared to be in good health, and no stressed vegetation was noted. An asphalt covered parking area extends west to east along the northern property boundary. The site contained remnants of potable well located on the west side of the property, the well was abandoned and backfilled and no longer in service. No record of this well was located on the Ontario Well Records website. The site has access to sanitary sewer line along Tenth Line Road, during the site walkover an abandoned septic system was located at the south side of the site.

Chain link fenced separates the Site from the adjoining property to the north. A wooden fence separates the site from the adjoining property to the south. The adjoining properties to the south, north and east appear to be residential in use. Adjoining properties to the east located across Tenth Line Road appear to be commercial and/or community use.

The site has access to municipal water and sewer, hydro, natural gas and cable. Municipal water and sewer likely enter the site from the east side of the building from Tenth Line Road. Hydro enters the site from the north side of the building and natural gas enters the site from the west side of the building.

The phase one property was not currently nor formerly used for any of the uses described in Schedule D Table 2 of the regulation (O. Reg. 153/04).

6. **REVIEW AND EVALUATION OF INFORMATION**

6.1 CURRENT AND PAST USES

At the time of reporting, the land use type at the site was residential. The site was semi-occupied at the time of the investigation, consisting of a two-story residential dwelling with five (5) individual apartments located centrally on the site. The site was first developed in the early 1950s, surrounding lands were developed around the same time. Prior to the 1950s, the exact use of the property is unknown.

Table 6-1 summarizes the current and past uses of the phase one property, along with descriptions and observations, if any, made by AEL from historical records.

Table 6-1 Table of Current and Past Uses of the Phase One Property					
Year(s)	Name of Owner (Last Name, First Name)	Description of Property Use(s)	Property Use(s) (per regulatory types)	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.	
Prior to October 20, 1840	Crown	No Information	Agriculture or other use		
October 20, 1840 – May 6, 1870	Canada Company		Agriculture or other use	No records available.	
May 6, 1870- Feb 2, 1887	Samuel Sauve				
Feb 2, 1887 - Feb 15, 1932	Israel Cardinal	Exact use unknown			
Feb 15, 1932 – Jan 22, 1937	Octave N. Lacroix				
Jan 22, 1937 – April 26, 1949	Victor Lacroix				
April 26, 1949 – August 14, 1961	Oscar Lacroix		Residential		
August 14, 1961- June 17, 1974	B.M. & B Holdings Limited

May 29, 1998 – May 29 1998	Lucille Lacroix (Survivorship Application)				
May 29, 1998 – February 05, 2008	Jack Koo Kim Loo				
NL P V U		Residential Home	Residential	Residential Property Observed in Aerial Photographs and during Site Walkover	

Table 6-1 Table of Current and Past Uses of the Phase One Property					
Year(s) Name of Owner (Last Name, First Name)		Description of Property Use(s)	Property Use(s) (per regulatory types)	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.	
2021-Present	Bridor Developments	Residential Home	Residential	Residential Property Observed during Site Walkover	

6.2 POTENTIALLY CONTAMINATING ACTIVITY (PCAS)

No PCAs were identified for the subject site's current activities, past site use and neighbouring site land use activities.

Table 6-2 Potentially Contaminating Activities (PCAs)					
PCA	Location (On-site or Off- site; up, down or trans gradient)	Information Source	Potentially Contaminating Activity*	Potential of PCA Contributing to an APEC	
N/A					

* A potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

6.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN (APEC)

6.3.1 LOGIC USED BY QUALIFIED PERSON IN DETERMINING APECS

APECs were identified by noting all activities of potential concern within the phase one study area and then assessing the likelihood that the activities could have an environmentally deleterious effect on the site based on the following criteria:

- 1. Scale of the activity
- 2. Nature of the chemicals involved in the activity
- 3. Proximity of the activity to the ground outside
- 4. Potential pathways

6.3.2 APECS PRESENT AT SITE

No APECs were identified for the subject site's current activities, past site use and neighbouring site land use activities did present a potential for on-site APECs at this time.

Table 6-3 Table of Areas of Potential Environmental Concern					
Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Soil, groundwater and/or sediment)
N/A					

6.3.3 UNCERTAINTY

Minor gaps in data exist which raise minor uncertainties that all APECs were identified during the phase one ESA. Historical searches, particularly the fire insurance plans did not cover all years, therefore potentially contaminating activities that occurred during this period remain unknown to the Qualified Person.

AEL has ample experience in assessing similar facilities and used previous experience to deduce areas and contaminants of potential concern.

7. PHASE ONE CONCEPTUAL SITE MODEL (CSM)

7.1 POTENTIALLY CONTAMINATING ACTIVITIES (PCAS)

Table 6-2 summarizes the PCAs for the phase one property (none identified) and the phase one study area noted during the phase one ESA investigation.

7.2 CONTAMINANTS OF POTENTIAL CONCERN (COPCS)

No groups of contaminants of potential concern (COPCs), as identified in the "Protocol for Analytical Methods in the Assessment of Properties under Part XV.1 of the Environmental Protection Act" (MOE, 2004) were identified at the site:

7.3 EFFECTS OF UNDERGROUND UTILITIES

The presence of utilities was investigated during the phase one site reconnaissance. The exact location of underground utilities is unknown, although based on available records and site reconnaissance, the following was noted.

7.3.1 COMMUNICATION LINES

The site and neighbouring properties appear to be serviced by underground communication lines, that enter the site at the north side of the site. As communication lines are very small in diameter, they are not expected to have an effect on the transport of potential contaminants in the subsurface.

7.3.2 GAS LINE

The site was service by natural gas, which entered the property at the west side of the site. As a natural gas utility connection is very small in diameter it is not expected to have an effect on the transport of potential contaminants in the subsurface.

7.3.3 HYDRO LINE

The site was serviced by overhead hydro lines, entering the property from the north.

7.3.4 WATER AND SEWER

The site is serviced by municipally supplied water and sewer services, which likely enter the property at the east side of the site from Tenth Line Road, Water and sewer lines are anticipated to be larger, and likely present within the same area on-site, and thus a preferential pathway may exist for the transport of groundwater and potential contaminants of concern where these utility lines are present.

7.3.5 UNDERGROUND PIPING

Site reconnaissance revealed no anticipated underground piping will be present on the site.

7.3.6 GEOLOGICAL AND HYDROGEOLOGICAL CONDITIONS

According to LIO, the site is at an approximate elevation of 86m asl. The local site topography is almost flat, with a slight downwards slope towards the west.

7.3.7 PHYSIOGRAPHY

The regional physiography is dominated by Ottawa Valley clay plains. Lying in the Ottawa Valley between Pembroke and Hawkesbury, it consists of plains interrupted by ridges of rock or sand as seen in Figure 4.

AEL did not undertake a geotechnical investigation of the site. Upon review of the Ministry of Northern Development and Mine's "Surficial Geology" layer from OGSEarth, the site is in an area of offshore marine deposits, characterized by Clay, Silty Clay and Silt. These materials are generally resistant to the infiltration of fluids and have a higher runoff potential and lower infiltration rates, due to the clay components (see Figure 5a).

7.3.8 GEOLOGY

Upon review of the Ministry of Northern Development and Mine's "Bedrock Geology" layer from OGSEarth, the bedrock consists of the Shadow Lake Formation (limestone, dolostone, shale, arkose, sandstone) from the Ordovician period (See Figure 5b). The depth to bedrock is anticipated to be approximately at 35m.

7.3.9 FILL MATERIALS

During site reconnaissance only minor gravel surface fill material was observed.

7.3.10 WATER BODIES AND AREAS OF NATURAL SIGNIFICANCE

The closest visible body of water is a tributary of Bilberry Creek, located approximately 800 m southwest of the site (see figure 3. Based on local and regional topography the inferred direction of groundwater flow is to the northwest.

There are no parks, reserves or other areas of natural significance within vicinity, in whole or part, of the site (within 250 m).

7.3.11 UNCERTAINTIES

Uncertainty or absence of information available regarding all past potential spills on-site and the potential presence of any above or underground tanks on neighbouring sites in each of the components of the phase one environmental site assessment could affect the validity of the CSM. As the majority of historical tanks have been identified on, and adjacent to, the site, the presence of additional tanks that could affect the site on surrounding lands is minimal.

8. CONCLUSIONS

8.1 ENGINEER'S OPINION AND JUDGMENT

AEL are of the opinion and judgment that the following conclusions may be reached for the site based on the information and observations made during the phase one ESA:

- Historical evidence indicates that the 1592 Tenth Line property was first owned by the Canada Company in 1840. Aerial photos obtained from the National Air Photo Library (NAPL) show evidence of residential development on the property by 1954 and show evidence of sparse residential development to the east, north and south by 1960. Prior to first development the site was crown land, likely vacant or used for agricultural purposes, until initial development of the area. Surrounding lands were developed in the 1960s.
- Site soils likely include clay, silty clay and silt components, which generally have a higher runoff potential and lower infiltration rates, due to the clay and silt components. These materials are generally less resistant to the infiltration of fluids.
- Based on local soil and surface conditions, the flow of groundwater in soils in the vicinity of the site is likely to the northwest, towards Bilberry Creek.
- AEL made inquiries on behalf of the client with the municipality that has authority under the Municipal Act, 2001 to pass by-laws respecting water production, treatment and storage (City of Ottawa) regarding the application of non-potable water criteria at the site. The City did not object to the application of non-potable water criteria at the site.

8.2 REQUIREMENT FOR PHASE TWO ENVIRONMENTAL SITE ASSESSMENT

A phase two ESA is not required before a Record of Site Condition may be submitted, with respect to all or part of the phase one property.

8.2.1 FURTHER INVESTIGATIONS

Based on all the work completed to date, AEL were of the opinion that there was no need to investigate the site further.

The report will be updated and become O.Reg.153/04 compliant when responses to freedom of information requests to government agencies have been received and reviewed by AEL. Based on the predominately residential nature of the Site, AEL do not anticipate the responses will alter AELs opinion regarding the assessment conclusions and opinion.

9. CLOSURE AND LIMITATIONS

9.1 CONTRACT

The Client authorized AEL to carry out the work set out in the report in accordance with the scope of work as set out herein.

9.2 O. REG. 153/04 STANDARD OF CARE

AEL are of the opinion the investigation and report above meet the general requirements for phase one ESAs. The Qualified Person (QP) confirms that work completed for the phase one ESA was conducted and/or supervised by the QP, and all findings and conclusions of the phase one ESA are included in the report. The report will be updated and become O.Reg.153/04 compliant when responses to freedom of information requests to government agencies have been received and reviewed by AEL. Based on the predominately residential nature of the Site, AEL do not anticipate the responses will alter AELs opinion regarding the assessment conclusions and opinion.

9.3 LIMITATIONS

The present work is for the sole use of AEL, and the client in a 2021 site evaluation. Others with an interest in the site such as contractors, purchasers, etc., must undertake their own investigations respecting the site, and are advised that the work is to the terms of reference only. Neither AEL nor the Client warrant or represent the report has found, detected or reported on all site conditions or site environmental conditions.

John Stephen, B.Sc. Project Scientist

C. Kozal.

Charna Kozole, P. Eng., QP_{ESA} Senior Engineer

10. QUALIFICATIONS

10.1 HISTORY

AEL is an engineering firm operating in Canada and the United States of America. Through its ownership since 1987 AEL have completed over 1200 projects in real estate and mortgage type environmental issues, contaminants, soils, rock, concrete, and groundwater.

10.2 ASSOCIATES

AEL Principal Paul Wilson, P. Eng., has over 30 years of engineering and contaminated sites experience. AEL Senior Engineer Charna Kozole, P. Eng., has over 20 years of engineering and contaminated sites experience. Mr. Wilson and Mrs. Kozole are qualified persons as defined in Ontario Regulation 153/04.

10.3 CLIENTS

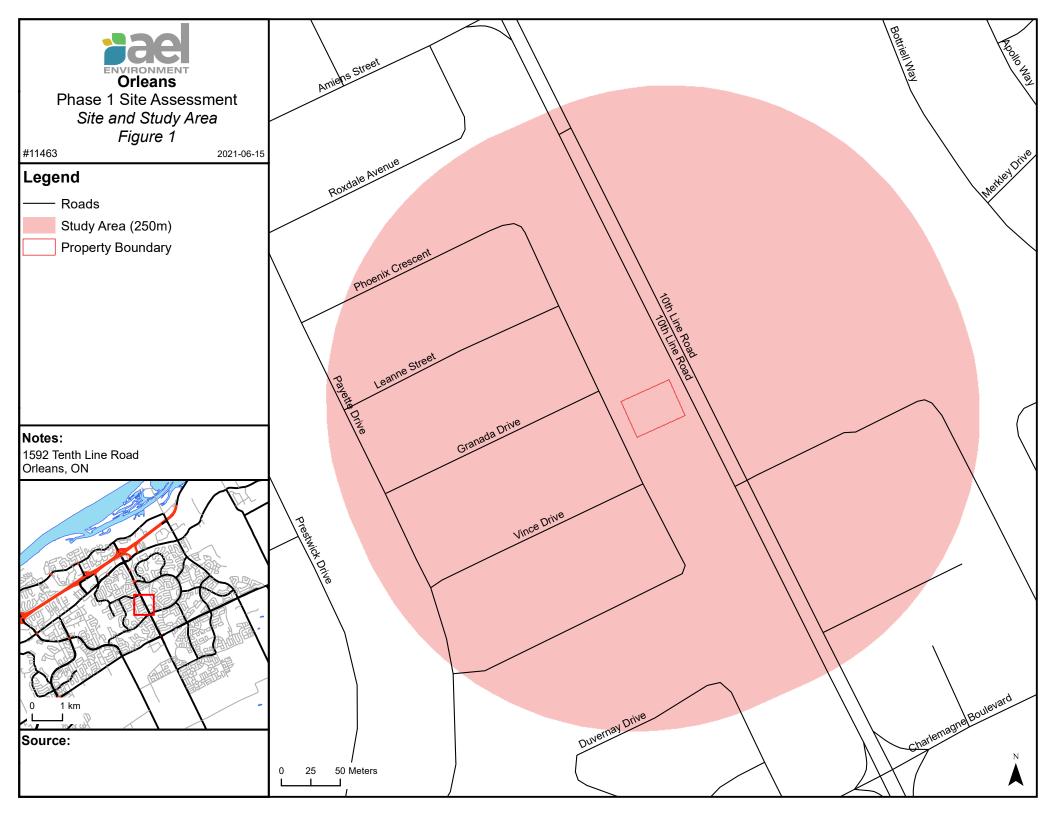

AEL clients include major corporations (e.g., CIBC, Hydro One, NAV CANADA); governmental organizations such as Ontario Hydro, school boards; governments; and environmental groups.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. Note: Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Provincial AAGR The MAAP Program maintains a database of abandoned pits and guarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.* Government Publication Date: Sept 2002*

Provincial Aggregate Inventory: AGR The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage. Government Publication Date: Up to Sep 2020

Provincial Abandoned Mine Information System: AMIS The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated. Government Publication Date: May 31, 2014

Private Automobile Wrecking & Supplies: AUWR This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jun 30, 2020

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW. Government Publication Date: 1875-Jul 2018

Abandoned Aggregate Inventory:

Borehole:

Certificates of Approval:

Dry Cleaning Facilities: List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's

Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities. Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA).

Government Publication Date: Jan 2004-Dec 2017

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks:

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information. Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors: This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or

distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.). Government Publication Date: 1999-Jan 31, 2020

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1999-Jun 30, 2020

Compressed Natural Gas Stations:

Chemical Register:

Canadian Natural Gas Vehicle Alliance. Government Publication Date: Dec 2012 - Sep 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

have been found guilty of environmental offenses in Ontario courts of law.

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.* Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here

Delisted Fuel Tanks:

Environmental Registry:

Drill Hole Database:

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information. Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry: EASR On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database. Government Publication Date: Oct 2011-Oct 31, 2020

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be

to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Oct 31, 2020

Environmental Compliance Approval:

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Oct 31, 2020

Environmental Effects Monitoring:

ERIS Historical Searches:

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data. Government Publication Date: 1992-2007*

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jul 31, 2020

Environmental Issues Inventory System:

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed. Government Publication Date: 1992-2001*

Emergency Management Historical Event:

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations. Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities: List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities

outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground. Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Contaminated Sites on Federal Land:

Federal Convictions:

FCON Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty. Government Publication Date: 1988-Jun 2007*

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Sep 2020

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Fisheries & Oceans Fuel Tanks:

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation. Government Publication Date: 1964-Sep 2019

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products

Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery. Government Publication Date: May 31, 2018

Fuel Storage Tank: FST List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Fuel Storage Tank - Historic:

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2020

Greenhouse Gas Emissions from Large Facilities:

dioxide equivalents (kt CO2 eq). Government Publication Date: 2013-Dec 2018

Provincial **TSSA Historic Incidents:** HINC List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here. Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status. Government Publication Date: Feb 28, 2019

Canadian Mine Locations: MINE This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Mineral Occurrences: In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in

regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy. Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released. Government Publication Date: 1974-1994*

Non-Compliance Reports: NCPL The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database. Government Publication Date: Up to May 2001*

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on

National Defense & Canadian Forces Spills:

National Defence & Canadian Forces Waste Disposal Sites:

under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered. Government Publication Date: Mar 1999-Apr 2018

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status. Government Publication Date: 2001-Apr 2007*

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Pipeline Incidents:

National Energy Board Wells:

59

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

National Environmental Emergencies System (NEES):

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: NPCB Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. Government Publication Date: 1993-May 2017

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All

Permit to Take Water:

take water.

Ontario Regulation 347 Waste Receivers Summary: REC Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2020

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power

Government Publication Date: 1915-1953*

Anderson's Storage Tanks:

Transport Canada Fuel Storage Tanks:

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type. Government Publication Date: 1970-Aug 2019

Variances for Abandonment of Underground Storage Tanks:

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Oct 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Mr. John Stephen Unit 3, 1705 Argentia Road Mississauga, Ontario L5N 3A9

Dear Mr. John Stephen:

Re: Access to Information Request - {AEL Environment (AEL)} is conducting an environmental investigation of the property identified as 1592 Tenth Line, Orleans, ON (PT LT B, CON 11, PART 2, 50R1622; Cumberland). Without limiting the information sought please provide information held by your agency relating directly to the environmental issues such as: known spills, city orders relating to the environment, and other associated compliance data, site information in regards to the environment, breech of standards and breech of designated substance. {AEL} would greatly appreciate the provision of any pertinent information if this should become available during your search.

This letter will acknowledge receipt of your request on June 2, 2021 received under the *Municipal Freedom of Information and Protection of Privacy Act*. Your receipt for the application fee received is enclosed.

At this time, access review procedures have been initiated and a formal response to your application will be provided within the legislated timeline. In the event that a time extension is required, you will be notified in writing of the revised timeline.

The present State of Emergency declared by the Province under the *Emergency Management and Civil Protection Act* enforces business closures to encourage selfisolation practices due to COVID19 and imposes limitations on how and when our office may perform some of our duties under MFIPPA. The City of Ottawa has scaled back operations beyond essential services to minimize risks to health and safety while maintaining services to our residents. We continue our efforts to provide access to information in accordance with MFIPPA and will attempt to keep delays at a minimum.

Dear Mr. Stephen,

This letter is in response to your request under the Access to Information Act for:

"Owner: Bridor Development

Property: 1592 Tenth Line, Orleans, ON K1E 2H8

Without limiting information sought, please provide information held by your agency such as: known spills, site visit information and breech of your standards for the Property.

Authorization: {Eric Brisson}"

After a thorough search, no records were found concerning this request.

Please be advised that you are entitled to file a complaint with the Information Commissioner of Canada concerning the processing of your request within sixty days of the receipt of this notice. In the event you decide to avail yourself of this right, your notice of complaint should be addressed to:

Information Commissioner of Canada 30 Victoria Street Gatineau, Québec K1A 1H3

If you have any questions regarding this request, please do not hesitate to contact Josée Béchard by email at josee.bechard@canada.ca.

Yours sincerely,

Original signed by:

Shelley Emmerson Director, Access to Information and Privacy

Mr. John Stephen 1705 Argentia Rd. Unit 3 Mississauga, ON L5N 3A9

Dear Mr. Stephen:

I am responding to your request made under the *Freedom of Information and Protection of Privacy Act (FIPPA)*, received on June 1, 2021, related to the property located at 1592 Tenth Line in Orleans.

The ministry's Data Management Branch has performed a search and found there are no outstanding orders at the above specified property in the MLTSD's Occupational Health and Safety Database.

Please note that the database may not be completely up-to-date; orders that may have been issued recently might not be reported if the information has not yet been entered in the ministry's database.

Right of Appeal

Under section 50(1) of *FIPPA*, you may request that the Information and Privacy Commissioner review this decision. Please note that you have 30 days from the date of this decision to request a review. Please be aware that there is a \$25.00 appeal fee. The Commissioner's office is located at 2 Bloor Street East, Suite 1400, Toronto Ontario, M4W 1A8 and can be reached by phone at (416) 326-3333. Please visit their website at <u>www.ipc.on.ca</u> for information on how best to communicate with them.

To support efficient processing of access requests, you are encouraged to submit any future requests through the province's <u>online portal</u>. It can be found on <u>www.Ontario.ca</u> under the How to Make a Freedom of Information Request section.

Sincerely,

Krista Lanthier Team Lead, Freedom of Information, Privacy and Information Management Office

KL/mc

Contact with Ministry of Environment, Conservation and Parks was made. The response was not received before the report was issued.

APPENDIX 4 PROPERTY INFORMATION SURVEY & SITE PLAN

John Stephen

From:	Kevin Kim
Sent:	June 4, 2021 11:46 AM
То:	Kevin Kim
Subject:	Phase I Environmental Site Assessment - Property Survey - 1592 Tenth Line Road

Name of person filling out survey: **Dan Doré** Email Address: **dan@dorerentals.com** Company: **DORE Property Management** Position: **President** Phone Number: **6132277368**

Time of survey completion: 6/4/2021 3:45:45 PM

What is the address this survey is being completed for? 1592 Tenth Line Road

What year was the property developed? 1970's (I suspect)

Has the current owner (or predecessor companies) owned the property since it was developed for its current use? No

Please describe the current site use(s). Multi family rental

Identify any prior owners of the site (if known) and years of use. Bridor Development just bought from Daniel Dore (me) and I owned since 2008

Please describe any previous land use associated with the site (if known). unknown

List any buildings on site. Main dwelling and removable storage shed

Are the buildings heated? If so, how? Main building heated by natural gas boiler and electric

Is there a transformer located on site that is owned by the local electrical utility? I don't know

Are there any non-utility oil filled electrical transformers (i.e., owned transformers) at the site? I don't know

Describe owned transformers on-site (size, type, age, use, etc.)

Are there PCB containing transformers or PCB waste stored at the site? I don't know

Are there hazardous chemicals (other than PCBs) stored or used on-site? No

Please list the chemicals.

Have there ever been spills at the site? None recorded/known

List relevant spills information (date, was it reported to MECP or government agency, material, cleanup actions taken, volume, etc.).

From the list below, select any of the operations which apply to the properties immediately adjacent to the site. Not applicable

Are there any above or below ground storage tanks on site? No

Please list number of tanks, whether above or below ground, age, contents, type (fiberglass, metal), and size.

Are there any other underground structures, such as a basement, an oil/water interceptor, or sumps, on the site? I don't know

Please describe the underground structures, such as a basement, an oil/water interceptor, or sumps, on the site.

Has there ever been asbestos containing material found at the site? I don't know

Has lead-based paint ever been used at the site? I don't know

Are/were herbicides used at the site? I don't know

Is there a source of potable water at the site? City water

Is the site serviced by municipal sewers? Yes

Is there (or has there been) a septic bed at the site? I don't know

Has fill ever been placed on the site? None known Where was fill placed? How much? What was the source?

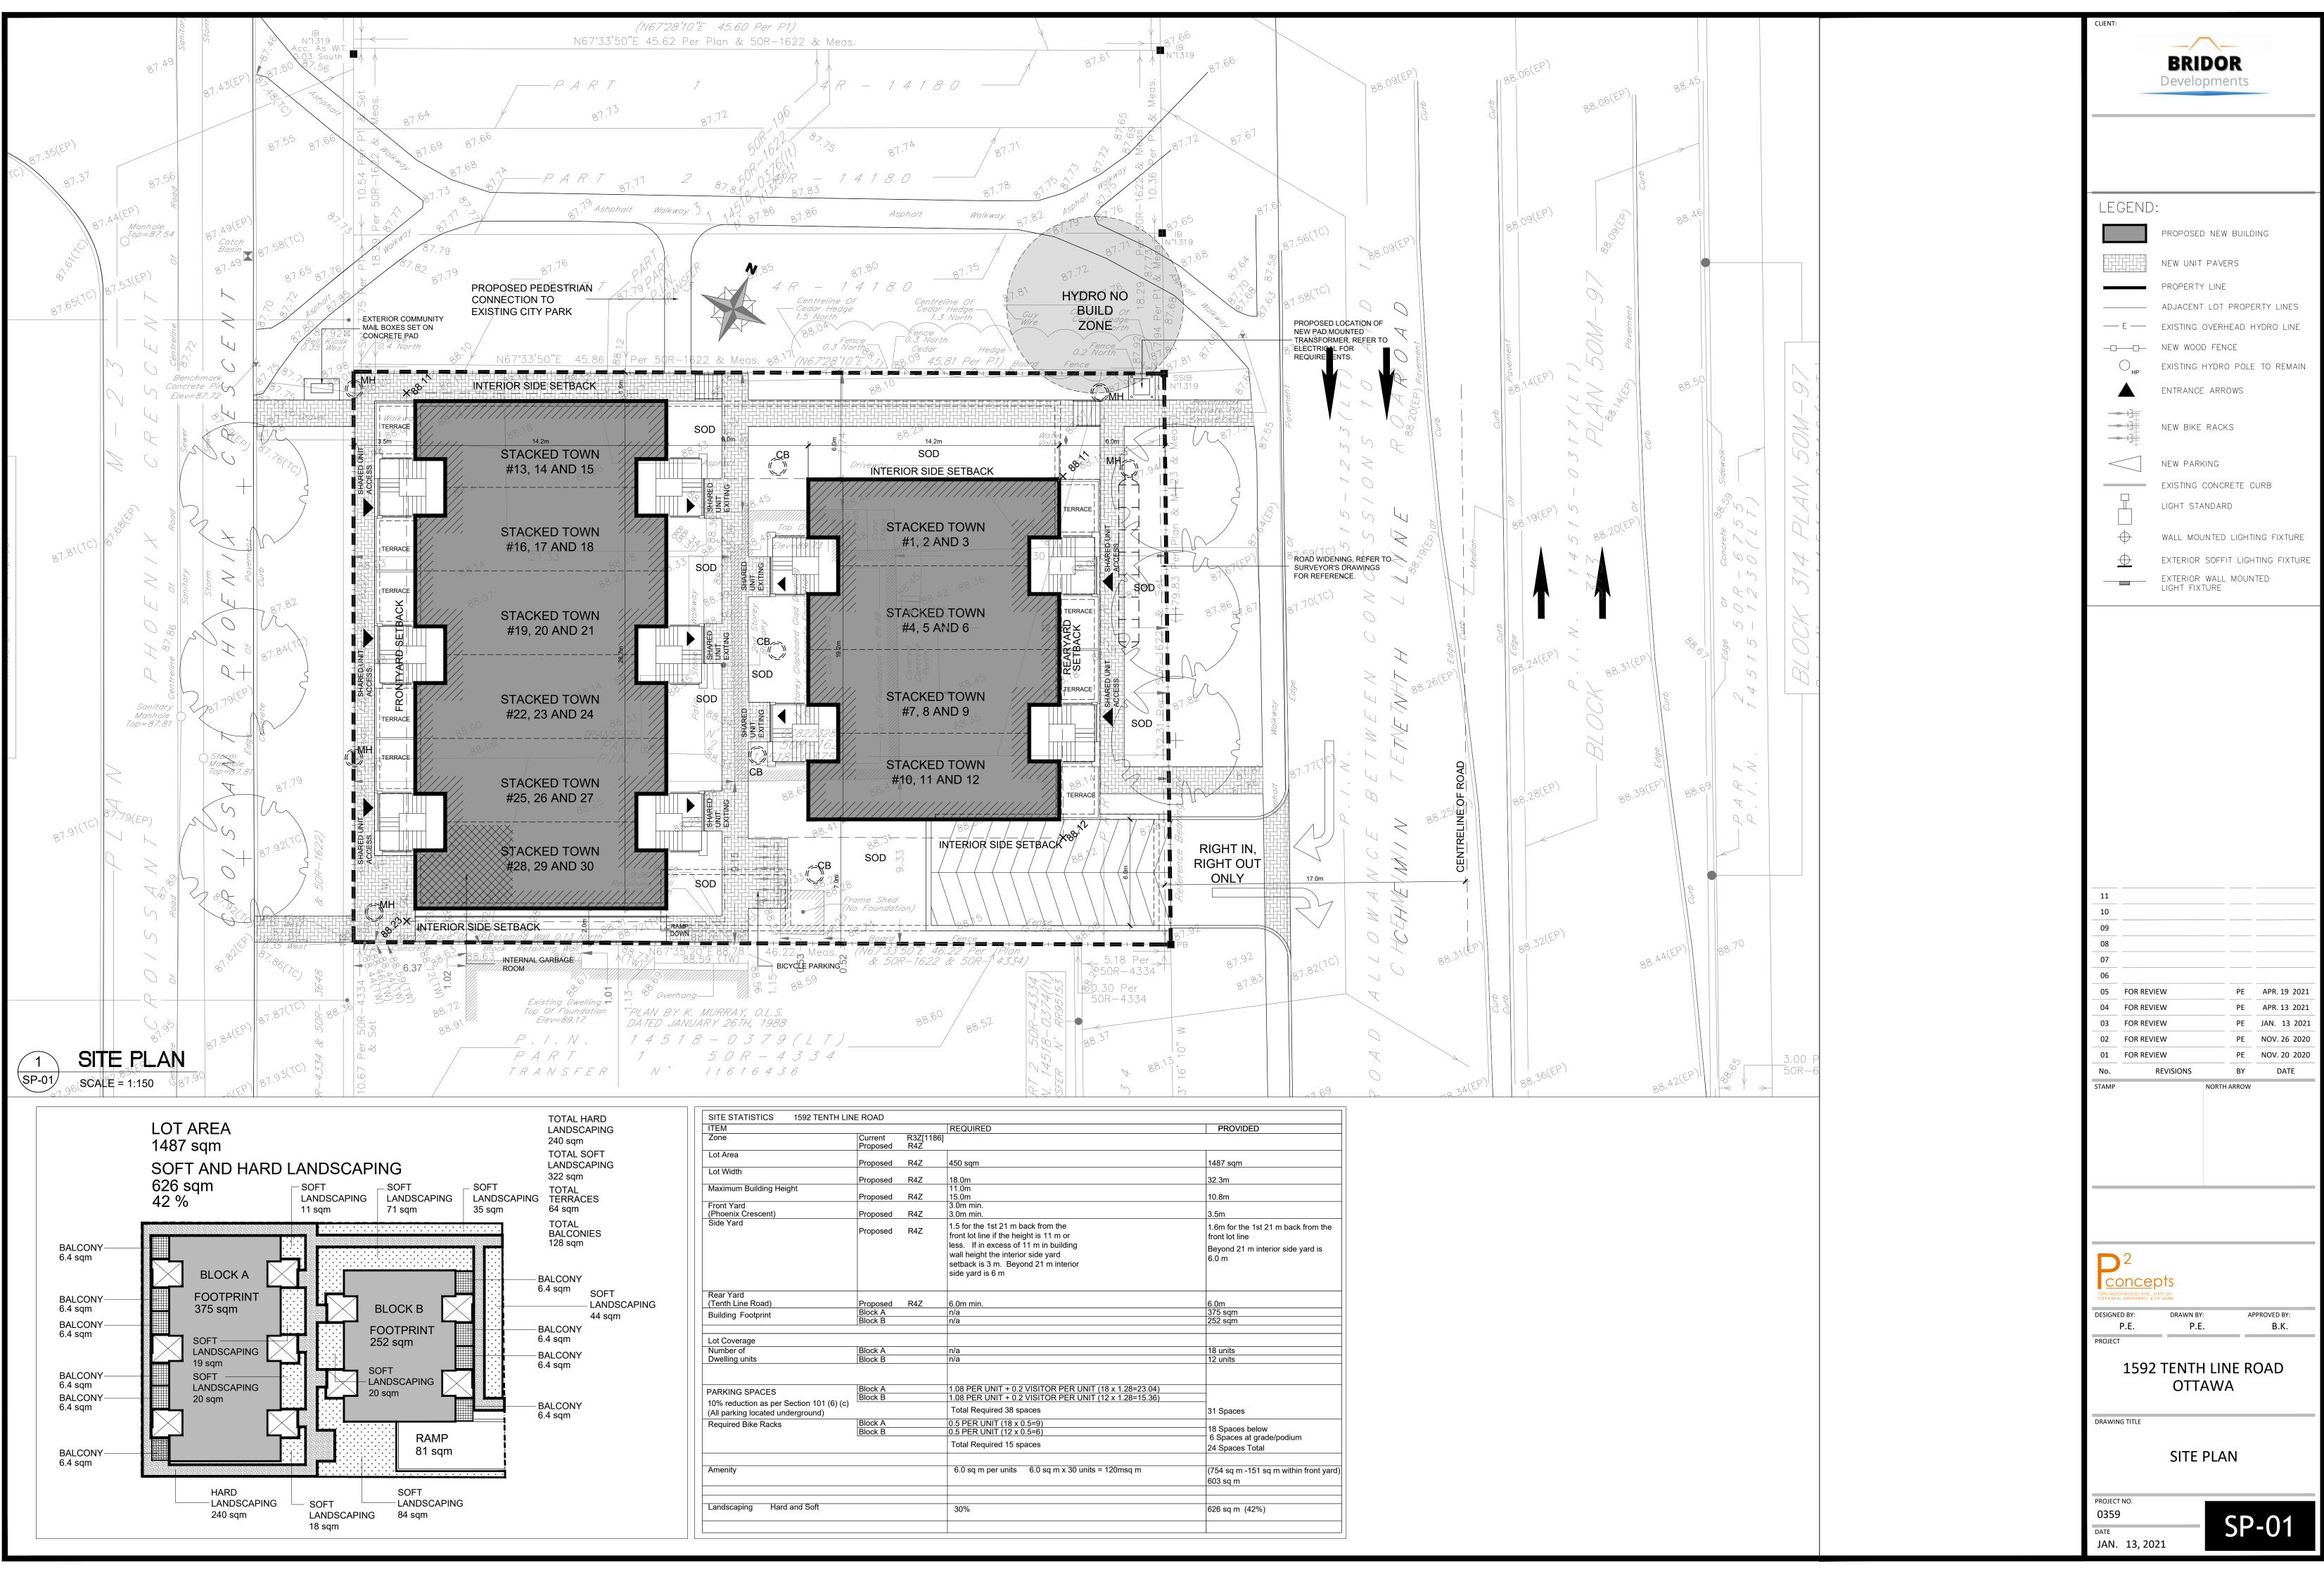

Are there any tenants operating on the site?

Yes

Please list tenant information and details (name, permitted use, lease since, etc.) Residential tenants (month to month leases)

Has the property ever been used for any of the activities listed in Table 2 of Schedule D of O. Reg. 153/04: Records of Site Condition? Check all that apply. If none apply, please select "none of the above". None of the above

Do you know of any other operations or incidents at this or any neighbouring property that might have resulted in a negative impact on the environmental conditions of the property or its immediate surroundings? NO

APPENDIX 5 SITE RECONNAISANCE PHOTOGRAPHS

Photo 1: Facing west, the "site" consists of a two storey residential building with five (5) apartments. Northern portion of the site is asphat covered and serves as a parking area for the residents.

1705 Argentia Rd, Unit 3 Mississauga, ON L5N 3A9 aelenv.com

Photo 2: Facing east, hot water tanks located in the basement. The site is service by municipal water.

Photo 3: Facing south, overhead hydrolines enter the property from the south side of the building.

Photo 4: Facing east, gas enters the property from the west side of the building.

Photo 5: Facing southwest, remnants of a potable well that has been abandoned and backfilled. There are no records of a potable well existing on this site according Ontario Well Records database. The site is serviced by municipal water.

Photo 6: Facing southeast, commercial properties were located east of the site along Tenth Line Road

APPENDIX 6 AUTHORIZATION AND TERMS

Terms of Engagement

GENERAL - Aeon Egmond Ltd. (AEL) and the Client (as described in the attached proposal) agree that any professional services, including subsequent services and charges (collectively the Services) to be provided by AEL relating to the Proposal will be subject to the following Terms and Conditions.

STANDARD OF CARE – Services provided by AEL will be conducted with a level of care ordinarily provided by the engineering and geosciences professions under similar site and time constraints. No warranty, express or implied is made. AEL's work may result in damage to surfaces, the restoration of which is not part of this agreement.

SITE ACCESS – The Client provides right of entry to AEL and their subcontractors to carry out the work.

INFORMATION – The Client warrants that it has provided AEL all information known to, or suspected by the Client relating to the past and existing condition of the Site, including but not limited to soil and groundwater data, hazardous materials and buried utilities. AEL may rely on such information.

SAFETY – AEL is responsible only for its activities and that of its employees.

PAYMENT - Charges for the service(s) rendered will be made in accordance with the Consultant's Schedule of Fees and Disbursements as the services are rendered. Invoices will be due and payable on receipt from the date of the invoice without holdback. Interest on overdue accounts is 2% per month, collection fees being extra and payable on collection (where allowed). If the account is not paid within 60 days from the date of the invoice then AEL shall have the right to suspend all work under this agreement without prejudice.

CHANGES IN WORK SCOPE – AEL and the Client agree that it may be necessary to modify the scope of work, schedule and/or cost estimate proposed in the agreement.

INSURANCE – AEL carries \$1,000,000 in commercial general liability, professional liability and automobile coverage. Details on our standard coverage is available on request. AEL maintains worker's compensation coverage to statutory amounts.

LIMITATION OF LIABILITY – The Client agrees to limit the liability of AEL, its employees, officers, directors, agents, consultants and subcontractors to matters which arise directly from AEL's acts, errors or omissions and such that the total aggregate liability of AEL, whether arising in contract, tort, or otherwise, shall not exceed the greater of \$50,000 or AEL's total fee for services. Any liability shall expire one year after substantial completion of the services. Neither party shall be responsible for lost revenues, profits, cost of capital, claims of customers, or other special, indirect, consequential or punitive damages.

MUTUAL INDEMNITY – AEL agrees to indemnity, defend and save harmless the Client, its officers, directors, employees, subcontractors and agents from and against all claims, damages, losses and expenses (including but not limited to legal fees) arising from personal injury, death or damage to third party property to the extent arising from the negligent acts, errors and omissions of AEL. The Client agrees to indemnity, defend and save harmless AEL, its officers, directors, employees, subcontractors and agents from and against all claims, damages, losses and expenses (including but not limited to legal fees) arising out of or resulting from the Services or work of AEL including but not limited to, claims made by third parties or any claims against AEL arising from the acts, errors, or omissions of the Client or others. To the fullest extent permitted by law, such indemnifications shall apply regardless of breach of contract or strict liability of AEL. Such indemnity shall not apply to the extent that AEL is finally determined to be negligent.

SUBSURFACE RISKS – Special risks occur whenever engineering or related disciplines are applied to identify subsurface conditions and even a comprehensive sampling and testing program may fail to detect certain conditions. The environmental, geological, geotechnical, geochemical and hydrogeological conditions that AEL interprets to exist between sampling points may differ from those that actually exist. The client agrees to waive any claim against AEL and agrees to defend, indemnify and hold AEL harmless from any claim or liability for injury or loss which may arise as a result of any damage and resulting impacts to subterranean structures, utilities or cross-contamination caused by any subsurface investigation.

DISCOVERY OF HAZARDOUS MATERIALS – The Client recognized that hazardous or suspected hazardous substances may be discovered at the site in the course of the work and that the presence of such substances are not the responsibility of AEL. All contaminated samples, materials, and field equipment that cannot be readily cleaned, shall remain the property and responsibility for the Client for proper handling and disposal. The client agrees that the discovery of any such substances shall constitute a changed condition for which AEL shall be fairly compensated. The client agrees to waive any claim against AEL and agree to defend, indemnify and hold AEL harmless from any claim or liability for injury or loss of any type arising from any alleged or actual discovery of hazardous or suspected hazardous substances.

DOCUMENTS – All reports, plans, data, notes, drawings and other documents prepared by AEL are considered its professional work product and shall remain the copyright property of AEL. The services and documents provided by AEL are intended for one time use only. At the request and expense of the Client, AEL shall provide the Client with copies of such documents. The Client acknowledges that electronic media are susceptible to unauthorised modification deterioration and incompatibility and therefore the Client cannot rely upon the electronic media version.

DELAYS – If site conditions prevent or inhibit performance of the work or unrevealed hazardous waste materials or conditions are encountered services under this Agreement may be delayed. The client shall not hold AEL responsible for damages or delays in performance caused by any such delays, or delays caused by the Client, its subcontractors, acts of God, acts and/or omissions of governmental authorities and regulatory agencies or other events which are beyond the reasonable control of AEL.

LITIGATION - The Client shall reimburse AEL for all direct expenses and time in connection with any disputes, litigation or arbitration involving representatives or documents of AEL arising out of the Services in accordance with AEL's prevailing Schedule of Fees.

PROPERTY TRANSACTIONS – In connection with any contemplated or actual purchase or sale of property related to the work, AEL will not be responsible for the independent conclusions, interpretations, interpolations and/or decisions for the Client or others arising out of data which is directly the product of AEL's services.

MISCELLANEOUS – This agreement supersedes all other agreements, oral or written and contains the entire agreement of at the parties concerning its subject matter. No cancellation, modification, amendment, deletion, addition, waiver or other change in the Agreement shall have effect unless specifically set forth in writing singed by the party to be bound thereby. The Client acknowledges and agrees that if it accepts this engagement letter, or AEL performs the services contemplated therein, then the above Terms of Engagement shall constitute a binding agreement for the sole benefit of the Client and AEL and that no third party beneficiaries are created by this agreement.
