Executive Summary

EXP Services Inc. (EXP) was retained by the 11421247 Canada Inc. to complete a Phase One Environmental Site Assessment (ESA) of the property located at 1740-1760 St. Laurent Boulevard, Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by three commercial buildings.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used to support a site plan application. EXP understands that the most recent use of the Phase One property is commercial and that the proposed future use is residential. Consequently, since the proposed future use of the property is more sensitive than its previous use, a Record of Site Condition (RSC) is required.

The Phase One property consists of the municipal addresses 1740, 1754, and 1760 St. Laurent Boulevard in Ottawa, Ontario. The Phase One property is located within a commercial and residential neighbourhood near the intersection of Industrial Avenue and St. Laurent Boulevard. The property at 1740 St. Laurent Boulevard is occupied by a Petro Canada retail fuel outlet and was not accessible at the time of the investigation. The property at 1756 St. Laurent Boulevard is occupied by a single storey building containing a St. Hubert's restaurant and associated parking lot. The property at 1760 St. Laurent Boulevard is occupied by a building containing three commercial units and a paved parking lot at the rear of the property. The Phase One property has an area of 1.82 hectares.

The Phase One property has the property identification numbers (PIN): 042610229, 042610230, 042610231, 042610232, and 042610177.

The legal description of the Phase One property is:

- 1740 St. Laurent Boulevard - BLOCKS 14-16 PLAN 4M1476;
- 1754 St. Laurent Boulevard – BLOCK 17 PLAN 4M1476; and
- 1760 St. Laurent Boulevard - JG S PT LOT 14 N PT LOT 15; RP 5R997 PARTS 1 AND 2.

Based on a review of historical aerial photographs, historical maps, previous reports and other records, it appears that 1760 St. Laurent Boulevard was the first property to be developed in the Phase One study area. It was first developed as a storage facility for a paper products distributor (Wilson J.C. Limited) after a water well was installed in the area in 1961. The properties located at 1740 and 1754 St. Laurent Boulevard were first developed in the 1980s.

Green's Creek, which is approximately 1.7 kilometres north east of the Phase One property, flows in a north-easterly direction toward the Ottawa River, which is over six kilometres north of the Phase One property.

There are no areas of natural or scientific interest (ANSI) within the Phase One study area.

There are no potable water wells within the Phase One study area.

The APEC and PCA are described below:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1	The area at 1760 St. Laurent Boulevard that includes the building and the land immediately surrounding the building, as the property was previously operated as a dry-cleaning facility	#37 – Operation of Dry-Cleaning Equipment (where chemicals are used)	#37 – On-Site	Volatile Organic Compounds (VOC)	Soil and Groundwater
#2	The area adjacent to the south property boundary, as an auto service station is located south adjacent to the Phase One property	#10 – Commercial Autobody Shops	#10 – Off-Site	Benzene, Toluene, Ethylbenzene, Xylene (BTEX), Petroleum Hydrocarbons (PHC), Polycyclic Aromatic Hydrocarbons (PAH), and metals	Soil
#3	1740 St. Laurent Boulevard	#28 – Gasoline and Associated Products Storage in Fixed Tanks	#28 – On-Site	BTEX, PHC, VOC and metals	Soil and Groundwater

Soil and groundwater samples collected from within all three APEC are within the Table 3 SCS for all parameters that were analysed. Further sampling will have to be conducted from the vicinity of the petroleum handling equipment when it is removed from APEC #3. Sampling for all of the parameters identified in the table above will have to be conducted.

The Qualified Person who oversaw this work, Patricia Stelmack, M.Sc., P.Eng., recommends that a Phase Two ESA be conducted to address the PCA that may have adversely affected the APEC on the Phase One property.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

1.0 Introduction

EXP Services Inc. (EXP) was retained by the 11421247 Canada Inc. to complete a Phase One Environmental Site Assessment (ESA) of the property located at 1740-1760 St. Laurent Boulevard, Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was operating as three commercial properties, 1740, 1754, and 1760 St. Laurent Boulevard.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used to support a site plan application.

EXP understands that the most recent use of the Phase One property is commercial and that the proposed future use is residential. Consequently, since the proposed future use of the property is more sensitive than its previous use and because two of the current and former uses are types of enhanced investigation property (current gas station at 1740 St. Laurent Blvd. and former dry cleaning facility at 1760 St. Laurent Blvd.), a Record of Site Condition (RSC) is required.

EXP personnel who conducted assessment work for this project included Patricia Stelmack, M.Sc., P.Eng. and Leah Wells, EIT. An outline of their qualifications is provided in Appendix A.

1.2 Phase One Property Information

The Phase One property consists of the municipal addresses 1740, 1754, and 1760 St. Laurent Boulevard in Ottawa, Ontario. The Phase One property is located within a commercial and residential neighbourhood near the intersection of Industrial Avenue and St. Laurent Boulevard. The property at 1740 St. Laurent Boulevard is occupied by a Petro Canada retail fuel outlet and was not accessible at the time of the investigation. The property at 1754 St. Laurent Boulevard is occupied by a single storey building containing a St. Hubert's restaurant and associated parking lot. The property at 1760 St. Laurent Boulevard is occupied by a building containing three commercial units and a paved parking lot at the rear of the property. The Phase One property has an area of 1.82 hectares.

A Site Location Plan is provided as Figure 1 and a Site Plan is provided as Figure 2 in Appendix C.

The Phase One property has the property identification numbers (PIN): 042610229, 042610230, 042610231, 042610232, and 042610177.

The legal description of the Phase One property is:

- 1740 St. Laurent Boulevard - BLOCKS 14-16 PLAN 4M1476;
- 1754 St. Laurent Boulevard – BLOCK 17 PLAN 4M1476; and
- 1760 St. Laurent Boulevard - JG S PT LOT 14 N PT LOT 15; RP 5R997 PARTS 1 AND 2.

11421247 Canada Inc.
Phase One Environmental Site Assessment 1740-1760 St. Laurent Boulevard, Ottawa, Ontario
OTT-00260579-A0
October 23, 2020 (Updated December 16, 2020)

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid are Zone 18, 450906 m E and 5028105 m N. The UTM coordinates are based on measurements from Google Earth Pro, published by the Google Limited Liability Company (LLC). The accuracy of the centroid is estimated to be less than 10 m.

The property owners are 11258052 Canada Inc., 10163252 Canada Inc., and 11421247 Canada Inc. for 1740, 1754, and 1760 St. Laurent Boulevard, respectively. Authorization to proceed with this investigation was provided by Carmine Zayoun, Vice President, Heafey Group. Contact information for Mr. Zayoun is 768 St. Joseph Boulevard #100, Gatineau, Quebec, J8Y 4B8.

2.0 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Obtaining a search of land title and assessment rolls for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250-metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

3.0 Records Review

3.1 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250-metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property.

According to the City of Ottawa GeoOttawa on-line mapping tool, the Phase One property is zoned for Arterial Mainstreet use (AM10). The AM designation means that the property is zoned for a broad range of uses including mixed use commercial, residential and institutional use, while the 10 designation refers to setbacks and minimum and maximum dimensions of the buildings. Surrounding properties directly adjacent to the Phase One property are also zoned for Arterial Mainstreet use. Other properties within the 250 meters of the Phase One study area are classified for institutional use (northwest), light industrial use (east and southeast) and residential use (south and southwest).

The Phase One study area is shown on Figure 3 in Appendix C.

3.2 First Developed Use Determination

Based on a review of historical aerial photographs, historical maps, previous reports and other records, it appears that 1760 St. Laurent Boulevard was the first property to be developed in the Phase One study area. It was first developed as a storage facility for a paper products distributor (Wilson J.C. Limited) after a water well was installed in the area in 1961. The properties located at 1740 and 1754 St. Laurent Boulevard were first developed in the 1980s as a gas station and a restaurant, respectively.

3.3 Fire Insurance Plans

EXP reviewed the Catalogue of Canadian Fire Insurance Plans 1875 – 1975. No fire insurance plans depicting the Phase One study area were available for review.

3.4 Chain of Title

A chain of title was requested from Read Abstracts Limited for the Phase One property. A chain of title search provides a list of property owners and the dates when they owned them.

The properties located at 1740 and 1754 St. Laurent Boulevard were first patented in 1889, while the property at 1760 St. Laurent Boulevard was first patented in 1892. All three properties had similar chains of title until all parts of the property were acquired by Thomas R. Dempsey between 1957 and 1965. In September 1966, due to a bankruptcy, title for 1740 and 1754 St. Laurent Boulevard was transferred to Maynard R. Denison, who transferred title to 6553061 Canada Inc. in May 2006. This entity registered a plan for the property in 2013. Title for 1760 St. Laurent Boulevard remained within the Dempsey family after the bankruptcy until 1974, after which time title was transferred sequentially to several holding and leasing companies.

Title for 1740 St. Laurent Boulevard was transferred to the current owner, 11258052 Canada Inc., on March 21, 2019. Title for 1754 St. Laurent Boulevard was transferred to the current owner, 10163252 Canada Inc. on March 21, 2019. Title for 1760 St. Laurent Boulevard was transferred to the current owner, 11421247 Canada Inc., on December 10, 2019.

The chain of title documentation is provided in Appendix D.

3.5 Environmental Reports

The following reports were reviewed for the Phase One property as part of the Phase One ESA:

- *Phase I Environmental Site Assessment (ESA), 1740-1760 St. Laurent Boulevard & 1757 Russell Road, Ottawa, Ontario*, dated November 2001 prepared by AMEC Earth & Environmental Ltd. for M.R. Denison Associates Ltd.

The Phase I report determined the presence of the on-site Petro Canada fuel outlet to be a potential contaminating activity. A Phase II ESA in the vicinity of the Petro Canada retail fuel outlet was recommended to assess potential soil/groundwater contamination. In addition, the buildings ages were cited as an indicator of potential designated substances being used in the building materials.

- *Phase II Environmental Site Assessment (ESA), 1740-1760 St. Laurent Boulevard & 1757 Russell Road, Ottawa, Ontario*, dated January 2002 prepared by AMEC Earth & Environmental Ltd. for M.R. Denison Associates Ltd.

The 2002 Phase II investigation was completed to address concerns identified in the 2001 Phase I ESA. The potential environmental concern noted was the presence of a Petro Canada retail fuel outlet (1740 St. Laurent), which has operated since the early 1980s.

Nine boreholes (BH1 to BH9) were advanced on the Phase II property. BH1 to BH4 were advanced at 1740 St. Laurent Boulevard in the vicinity of the pump island and UST nest area, BH5 at the west end of 1754 St. Laurent, and BH6 to BH9 were advanced at 1757 Russell Road. Boreholes were advanced to a maximum depth of 4.6 meters below ground surface (m bgs). Three monitoring wells were installed in BH1 to BH3. Groundwater samples were submitted for analysis of BTEX, C₅ to C₂₄, TPH (gas/diesel), TPH (heavy oil), VOCs, and metals.

Subsurface conditions at the site consisted of a surficial layer of gravel fill overlying sand, silty clay, and silty clay till. Bedrock was encountered at depths as shallow as 1.1 m. Criteria for the eastern portion of the site was selected to be non-potable groundwater conditions (Table B).

Low level PHC concentrations were identified in groundwater regime in the vicinity of the Petro Canada. All concentrations were below their respective Table B criteria. No additional investigation was recommended.

- *Petro Canada, Phase II Environmental Site Assessment (ESA), 1740 St. Laurent Boulevard, Ottawa, Ontario*, dated June 2009 prepared by Terrapex Environmental Ltd. for Petro Canada.

The Phase II ESA was intended to delineate the nature and extent of any subsurface petroleum hydrocarbon impact in the soil and groundwater beneath the site.

Ten boreholes were advanced to depths between 4.3 m and 5.2 m bgs across the site, five of which were completed as monitoring wells. No liquid phase petroleum product was observed during the drilling program. One soil sample from each of the boreholes and a groundwater sample from each of the monitoring wells were submitted for analysis of BTEX and PHC. All of the soil and groundwater samples submitted were less than the Table 3 SCS for commercial land use and fine-grained soil.

- *Phase I Environmental Site Assessment (ESA) Update, 1760 St. Laurent Boulevard, Ottawa, Ontario*, dated June 2017 prepared by Pinchin Ltd. for Primecorp Property Management.

The 2017 Pinchin Phase I ESA included information pertaining to a Phase II ESA report from 2005, which was completed to assess soil and groundwater impacts from the former on-site dry-cleaning facility, Dutch Girl Cleaners. Bedrock was not encountered during the Phase II ESA as four boreholes were drilled (MW-1, MW-2, MW-3, MW-4), as the maximum depth investigated was 5.8 m bgs. The stratigraphy of the soil was reported to consist of asphalt and granular sub-grade that was underlain by sandy silt, silty clay and clay.

Soil samples collected from the boreholes were selected for chemical analysis based on field observations which included location, depth, soil type, grain size, colour, odour and recorded organic vapour concentrations. Monitoring wells were installed in all four of the boreholes. Four soil samples and four groundwater samples were collected and analyzed for the

presence of volatile organic compounds (VOCs) and petroleum hydrocarbons (PHCs) F1 to F4 fractions. The analytical results were compared to the Ministry of the Environment, Conservation and Parks (MECP) 2004 Table 3 Standards for Commercial/Industrial/Community land use and coarse-grained soils in a non-potable groundwater condition as outlined in the "Soil, Groundwater and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act". The results indicated that VOC and PHC concentrations were below the 2004 Table 3 Standards. A copy of the report was not provided to EXP.

The 2017 Phase I ESA did not identify the presence of spills or damaged floors in the chemical storage area of the Phase One property. There were no above ground storage tanks (ASTs), underground storage tanks (USTs), or oil/water separators observed on the Phase One property. An oil-cooled transformer that was owned and maintained by Ottawa Hydro was observed, however no staining was observed on the concrete pad in the vicinity of the transformer.

Based on the age of the building on the Phase One property, which was constructed in approximately 1963, the Pinchin report notes potential for the presence of asbestos-containing materials and lead containing paints. The 2017 Phase I ESA did not assess the presence of asbestos or lead on the Phase One property.

The Phase One property building is heated by natural gas-fired suspended unit heater and natural gas-fired HVAC units located on the rooftop.

- *Soil and Groundwater Investigation, Suncor Retail Fuel Outlet, 1740 St. Laurent Boulevard, Ottawa, Ontario (SS #14178)*, dated November 30, 2020 prepared by Terrapex Environmental Ltd. for Suncor Energy Products Partnership.

The report was prepared to gain an understanding of subsurface conditions prior to site closure. The petroleum handling facility was still in operation at the time.

Eight boreholes were advanced to depths between 4.0 m and 4.6 m bgs across the site. Ten soil samples and one field duplicate were submitted for analysis of BTEX and PHC F1 to F4. Seven groundwater samples and one field duplicate were collected from existing monitoring wells and were submitted for laboratory analysis of BTEX and PHC F1 to F4. All of the soil and groundwater samples submitted were within the Table 3 SCS for commercial land use and fine-grained soil.

A recommendation was to collect soil samples upon removal of the petroleum handling equipment. All of the soil and groundwater samples submitted were less than the Table 3 SCS for commercial land use and fine-grained soil.

3.6 Environmental Source Information

Information pertaining to the Phase One property was obtained by reviewing documents that are available to the public through municipal and provincial sources. EXP did not identify the need to contact any federal agencies.

Written responses from regulatory agencies and copies of documents obtained via searches are provided in Appendix D.

3.6.1 Ontario Ministry of the Environment, Conservation and Parks Records

August 4, 2020, records pertaining to the Phase One property were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act* (FOI). To date, no response has been received. If environmentally significant information is obtained from the MECP search, it will be provided as an addendum to this report.

3.6.2 Historical Land Use Inventory

On October 17, 2019, records pertaining to the site were requested from the City of Ottawa for the Historical Land Use Inventory (HLUI) through the Municipal Freedom of Information and Protection of Privacy Act (FOI) for the property located at 1760 St. Laurent Boulevard.

A response dated May 22, 2020 was received. Two activities associated with the Phase One property were identified. The activity at 1760 St. Laurent Boulevard relates to the retail furniture facility. This activity does not pose an environmental concern to the Phase One property as there is no evidence that manufacturing occurred at the Phase One property. The activity at 1740 St. Laurent Boulevard relates to the retail fuel outlet. This constitutes a potentially contaminating activity to the Phase One property

Other activities identified within 250 m of the Phase One property include the fire station at 898 Industrial Avenue, a Hydro One facility, gas stations, truck yards, motor vehicle repair shops, a city asphalt plant, commercial printing facilities, a medical centre, a TV station, commercial retail and wholesale facilities, and warehouses. One of the motor vehicle repair shops is immediately south of the Phase One property and may pose an environmental concern. The other activities are downgradient of the Phase One property and/or do not handle chemicals in large quantities. As such, they are unlikely to pose an environmental concern to the Phase One property.

Thus, based on the review of the HLUI report, the following potentially contaminating activity (PCA) has been identified in the Phase One study area:

- PCA #10 – Commercial Autobody Shops
- PCA #28 – Gasoline and Associated products storage in fixed tanks

3.6.3 TSSA

A request for information regarding the Phase One property was made to the Technical Standards and Safety Authority (TSSA). A response was received on October 8, 2020.

The TSSA reported records for three active fuel tanks at 1740 St. Laurent Boulevard. Two 50,000 L and one 35,000 L fibreglass tanks were installed in 2002. There are also records for four expired tanks installed in 1989, which were presumably replaced in 2002.

The date of the last TSSA inspection was January 31, 2019. No significant deficiencies were noted in any of the TSSA site inspections.

A copy of the documents provided by the TSSA is provided in Appendix C.

3.6.4 Environmental Registry

On September 17, 2020, the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. Search parameters included: "St. Laurent Boulevard", "Gladwin Crescent", "Innes Road" and "Industrial Avenue". No postings were listed for properties within the Phase One study area.

3.6.5 Environmental Access

On September 17, 2020, the MECP Environmental Access website was searched for postings within the Phase One study area.

- 1730 St. Laurent Boulevard (50 m north) – Certificate of Approval for Air & Noise issued to GWL Realty Advisors Inc. for one standby diesel generator to provide power during an emergency situation. Certificate number 9029-7FSQAT issued June 24, 2009.
- 1810 St. Laurent Boulevard (60 m south) – Certificate of Approval for Air & Noise issued to Rogers Cable Communications Inc. for one standby diesel generator to provide power during an emergency situation. Certificate number 3488-73AKCP issued June 10, 2007.
- 2212 Gladwin Crescent (220 m east) – Certificate of Approval for Air & Noise issued to 3799263 Canada Inc. for a paint spray booth for solvent application. Certificate number 4917-7HEKMR issued August 11, 2008.

Since the Certificate of Approvals indicates that testing of the systems is performed periodically and that routine operating and maintenance procedures are followed, it is the opinion of the Qualified Person who oversaw this work that none of the records reviewed pose an environmental concern to the Phase One property.

3.6.6 Hazardous Waste Information Network

On September 19, 2020, the MECP Hazardous Waste Information Network (HWIN) website was searched for registered waste generators within the Phase One study area. Search parameters included “St. Laurent”, “Bourassa”, “Everest”, “Gladwin”, “Industrial”, “Innes”, “Russell” and all of the commercial establishments listed in the ERIS report. Seven postings were listed in the database and are summarized below.

Location (Generator)	Proximity to the Phase One Property	Wastes Generated	Years	Environmental Concern to Phase One Property and Rationale
Ontario 2227190 1730 St. Laurent Boulevard (ON8416487)	North adjacent	Pathological wastes	2016 to 2020	No – Use for medical purposes only, Downgradient to the inferred groundwater flow direction.
City of Ottawa 900 Industrial Avenue (ON9836046)	Northwest adjacent	Light fuels, oil skimmings and solvents, waste oils and lubricants	2005 to 2020	No – Cross gradient to the inferred groundwater flow direction, sufficient distance such that chemicals are unlikely to migrate.
Canadian Conservation Institute 1030 Innes Road (ON0205101)	60 m northeast	Inorganic and organic laboratory chemicals, metals from acid and alkaline processes, aromatic and aliphatic solvents, polymeric resins, waste oils and lubricants, photo processing waste, and compressed gases	1986 to 2020	No – Cross gradient to the inferred groundwater flow direction, sufficient distance such that chemicals are unlikely to migrate.
US Embassy Canada 1747b St. Laurent Boulevard (ON4231052)	60 m northeast	Pharmaceutical and pathological wastes	2012 to 2020	No – Cross gradient to the inferred groundwater flow direction, sufficient distance such that chemicals are unlikely to migrate.
Archer Precision Inc. 2228 Gladwin Crescent (ON7475789)	180 m southeast	Emulsified oils	2013 to 2020	No – Cross gradient to the inferred groundwater flow direction, sufficient distance such that chemicals are unlikely to migrate.
Sherwin Williams 2232 Gladwin Crescent (ON2681994)	180 m southeast	Paint/pigment/coating residues, polymeric resins, and waste compressed gases	2016 to 2020	No – Cross gradient to the inferred groundwater flow direction, sufficient distance such that chemicals are unlikely to migrate.
PPG Architectural Coatings Canada, Inc. 2247 Gladwin Crescent (ON7085597)	180 m east	Paint/pigment/coating residues	1992 to 2020	No – Down gradient to the inferred groundwater flow direction, sufficient distance such that chemicals are unlikely to migrate.

A copy of the HWIN generators listed is included in Appendix D.

3.6.7 Records of Site Condition

On September 19, 2020, the MECP Brownfields Registry website was searched for postings of Records of Site Condition within the Phase One study area. An RSC was filed for the property located at 1757 Russell Road.

Copies of the RSC postings are included in Appendix D.

3.6.8 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

3.6.9 PCB Storage Sites

Documents entitled *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada, 2003 Annual Report* prepared by Environment Canada and *Ontario Inventory of PCB Storage Sites* prepared by the MECP were reviewed. No records pertaining to PCB storage sites were identified within the Phase One study area.

3.6.10 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed. No former landfills or waste disposal sites were identified within the Phase One study area.

3.6.11 Street Directories

A search of municipal street directories for properties within the Phase One study area was conducted by EcoLog Environmental Risk Information Services (or EcoLog ERIS). EcoLog ERIS is an environmental database and information service provider. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the city directory information is provided in Appendix C.

Directories published in 1951, 1956, 1961, 1965, 1971, 1976, 1981/82, 1987, 1992, 1996/97, 2001/02, 2006/07, and 2011 were reviewed. A summary of the more significant findings is provided below:

- The Phase One property and surrounding adjacent properties (including St. Laurent Boulevard (1700-1815), Bourassa Street, Everest Private, Gladwin Crescent (2200-2290), Industrial Avenue (900-920), 1030 Innes Road and Russell Road (1800-1875)) were not listed in the 1951, 1956, or 1961 directories;
- The first listing for the Phase One property occurs in 1965 for 1760 St. Laurent Boulevard under Wilson J C Ltd., a paper products company. In the same year, adjacent properties were not listed except for Russell Road, which were residential;
- In 1971, 1760 St. Laurent Boulevard was listed under Prince Wilson Ltd., a paper products company. Properties on Russell Road were listed as residential and 1750 St. Laurent Boulevard was listed under Denison M R Association Ltd. In the same year, other adjacent properties were not listed;
- In 1976, 1760 St. Laurent Boulevard was listed under Moloughney's Van & Storage Ltd. Adjacent properties on St. Laurent Boulevard and Gladwin Crescent included a variety of light commercial businesses. Adjacent properties on Russell Road were listed as residential;
- In 1981/82, 1760 St. Laurent Boulevard was listed as vacant. Adjacent properties on St. Laurent Boulevard and Gladwin Crescent included a variety of light commercial businesses. Adjacent properties on Russell Road were listed as residential;
- In 1987, 1760 St. Laurent Boulevard was listed under Dutch Girl Cleaners (a dry-cleaning facility), 1754 St. Laurent Boulevard and 1740 St. Laurent Boulevard are listed for a St. Hubert's restaurant and Petro Canada respectively. Adjacent properties on St. Laurent Boulevard and Gladwin Crescent included a variety of light commercial businesses. Adjacent properties on Russell Road were listed as residential and a fire station/training centre was present at 900 Industrial Avenue;

- In the 1992 directory, listings for 1760 St. Laurent Boulevard include Appliance Warehouse and Don Lesh Appliances. Adjacent properties on St. Laurent Boulevard and Gladwin Crescent included a variety of commercial businesses similar to those in 1987. Adjacent properties on Russell Road are listed as residential except for 1842 Russell Road, where a janitorial service is present under Hallmark Building Cleaning Ltd;
- The 1996/97 directory search had the same listings for the Phase One property as the 1992 directory. Adjacent properties on St. Laurent Boulevard, Gladwin Crescent and Russell Road had similar uses to previous years;
- In the 2001/02 directory, the 1760 St. Laurent Boulevard was listed under a restaurant called Texas Steak Co. Adjacent properties were similar in use as described for previous years. In other adjacent properties located at 919 Industrial Avenue a restaurant and office are listed;
- In the 2006/07 directory, Muskoka Cabinet Company and Tamarack Development Design Centre were listed for the 1760 St. Laurent Boulevard. Adjacent properties were similar in use as described for previous years. The adjacent property at 1030 Innes Road was listed for a building installation contractor called Defran Inc; and
- In the 2011 directory, the 1760 St. Laurent Boulevard was listed under a custom kitchen manufacturer (Muskoka Cabinet Company) and a restaurant (Local Heroes Bar & Grill). Adjacent properties on St. Laurent Boulevard and Gladwin Crescent included a variety of light commercial businesses similar in use to what was reported earlier. An automotive repair garage, St. Laurent Auto Service & St. Laurent Collision Centre, was listed approximately 20 meters to the south of the Phase One property at 1800 St. Laurent Boulevard. The adjacent property at 919 Industrial Avenue was listed as a restaurant and properties at Russell Road were predominantly residential apart from a conference centre, roofing business and a community centre. Adjacent properties were not listed for Bourassa Street, Everest Private and 1030 Innes Road.

Based on the review of the street directories the following potentially contaminating activities (PCAs) have been identified in the Phase One study area;

- PCA #10 – Commercial Autobody Shops (St. Laurent Auto Service & Collision Centre; Off-Site);
- PCA #24 – Fire Training (1987 Fire Station/Training Centre at 900 Industrial Avenue; Off-Site);
- PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks (1987 Petro Canada; On-Site); and
- PCA #37 – Operation of Dry-Cleaning Equipment (1987 Dutch Girl Cleaners; On-Site)

However, since the fire training centre is cross gradient from the Phase One property, PCA #24 is not likely to pose an environmental issue to the Phase One property. PCA #10, PCA #28, and PCA #37 may have contributed to an environmental issue to the Phase One property.

3.7 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the Phase One property and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A summary of the more significant findings is provided below. A copy of the EcoLog ERIS report is provided in Appendix E.

Location	Proximity to the Phase One Property	Description	Database	Environmental Concern to Phase One Property (Yes/No) & Rationale
1760 St. Laurent Boulevard	Phase One property	Dutch Girl Cleaners was noted as a 'Power Laundry/Cleaners' facility and listed as a registered waste generator for halogenated solvents from 1986 to 1988. This facility was also listed in the database as "out of business" in 1989.	GEN	Yes, PCA #37 – Operation of Dry-Cleaning Equipment

Location	Proximity to the Phase One Property	Description	Database	Environmental Concern to Phase One Property (Yes/No) & Rationale
1740 St. Laurent Boulevard	Phase One property	Suncor Energy Products is noted as having three active (two 50,000 L and one 35,000 L capacity) double walled reinforced with fiberglass reinforced USTs installed in 2002. Four single wall USTs installed in 1989 by GCE Inc. have been removed as of 2007. Three double walled USTs installed in 2002 (two 50,000 L and one 35,000 L). Petro Canada Car Wash had registered a fuel storage tank listed in 1985. There are nine records of expired USTs within the Phase One study area for GCE Inc.	EXP FST FSTH PRT	Yes, PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks
900 Industrial Avenue	north adjacent	The City of Ottawa - Ottawa Fire Department registered waste generator for waste oils/lubricants and light fuels from 1998 to 2013. The City of Ottawa property was noted as a 'Bulk Liquid Trucking' facility and registered waste generator of oil skimmings & sludges, waste oils and lubricants, and light fuels from 2005 to 2020.	GEN	No, property is cross-gradient of Phase One property.
1730 St. Laurent Boulevard	North adjacent	Redcliff Metivier Realty registered waste generator of acid wastes, alkaline wastes, other specified inorganics and PCBs in 2009. Ontario 2227190 was noted as 'Offices of Dentists' and registered waste generator pathological waste from 2016 to 2020.	GEN	No, property is cross-gradient of Phase One property.
1757 Russell Road	West adjacent	January 19, 1991, 2 L of transformer oil spilled to ground when garbage truck struck pole.	RSC SPL	No, 2 litres of fuel is unlikely to migrate significantly.
1800 St. Laurent Boulevard	South adjacent	August 10, 2004, 45 L of antifreeze spilled to sewer from OC transpo bus hose leak.	SPL	No, as substance was spilled to sewer and due to small volume.
1810 St. Laurent Boulevard	60 m south	Ontario Petroleum Pump Inc. was noted to be a 'Oil and Gas Pipeline and Related Structures Construction' facility and listed as a registered waste generator of light fuels in 2009. Rogers Cable was listed as a registered waste generator of oil skimmings & sludges in 2009.	GEN	No, property is cross-gradient of Phase One property.
1769 St. Laurent Boulevard	60 m east	Safe-T-Strobe Inc was noted as a 'All Other Plastic Product Manufacturing' and 'Medical Equipment and Supplies Manufacturing' in the directory.	SCT	No, as there is no evidence of manufacturing at the site (it appears facility was used for warehousing only).
1747 St. Laurent Boulevard	60 m northeast	The US Embassy Canada registered waste generator for pathological and pharmaceutical waste from 2012 to 2020.	GEN	No, property is cross-gradient of Phase One property.
1733 St. Laurent Boulevard	60 m northeast	Forevergreen holds a licence as a general vendor and operator of pesticides. National Tilden Operations registered waste generator of oil skimmings & sludges from 1997 to 2001.	PES GEN	No, property is cross-gradient of Phase One property.
1030 Innes Road	60 m northeast	The Canadian Conservation Institute registered waste generator of inorganic and organic laboratory chemicals, metals from acid and alkaline processes, aromatic and aliphatic solvents, polymeric resins, waste oils and lubricants, photo processing waste, and compressed gases, from 1986 to 2020. Calfra Management Inc. listed as a registered waste generator of petroleum distillates, PCBs, waste oils and lubricants,	GEN NPCB SPL	No, property is cross-gradient of Phase One property.

11421247 Canada Inc.
Phase One Environmental Site Assessment 1740-1760 St. Laurent Boulevard, Ottawa, Ontario
OTT-00260579-A0
October 23, 2020 (Updated December 16, 2020)

Location	Proximity to the Phase One Property	Description	Database	Environmental Concern to Phase One Property (Yes/No) & Rationale
		<p>paint/pigment/coating residue and halogenated solvents in 2004.</p> <p>On March 30, 2004 10 L of transformer oil spilled to pavement.</p> <p>Communications Canada reported PCB containing material was stored for future use in 1991 and 1994.</p>		
2239-2261 Gladwin Crescent	180 m east	<p>Sico Inc. registered waste generator of aromatic solvents from 1992 to 1998.</p> <p>Milwaukee is registered waste generator of petroleum-based waste oils and sludges in 2020.</p> <p>Glidden paints registered waste generator of aromatic solvents, petroleum distillates, halogenated solvents and paint/pigment/coating residues, from 1992 to 2006.</p> <p>Garda Security Corporation was noted as a 'General Automotive Repair' facility and a registered waste generator for waste oils & lubricants in 2013 to 2020.</p> <p>Akzo Nobel Paints LLC registered waste generator of acid waste, alkaline wastes, aromatic solvents, petroleum distillates, polymeric resins and paint/ pigment/coating residues from 2007 to 2011.</p> <p>PPG Architectural Coatings Canada Inc. registered waste generator of aromatic solvents, petroleum distillates, paint/pigment/coating residues, generation of metals from acid and alkaline processes, polymeric resins, halogenated solvents from 1992 to 1997 and from 2004 to 2020.</p> <p>February 23, 2016, natural gas pipeline leak during excavation.</p> <p>Black and Decker Canada Inc registered waste generator for petroleum distillates, light fuels, waste oils and lubricants and oil skimmings and sludges from 2012 to 2016.</p> <p>Information Mediary Corporation was noted as a 'Printing Ink Manufacturing' facility and a registered waste generator for organic and inorganic chemicals, paint/pigments/coatings residues, aliphatic solvents, other specified inorganics and graphic art waste in 2010 and 2011.</p>	GEN SPL	No, property is downgradient of Phase One property.
2220-2234 Gladwin Crescent	180 m southeast	<p>Sherwin Williams Canada registered waste generator of polymeric resins, compressed gases and paint/pigment/coating residues 2016 to 2020.</p> <p>Archer Precision Inc registered waste generator of emulsified oils 2013 to 2020.</p>	GEN	No, property is cross-gradient of Phase One property.
911 Industrial Avenue	210 m northwest	December 12, 2012, 80 L of hydraulic oil spilled to ground from motor vehicle.	SPL	No, property is cross-gradient of Phase One property.
1816 St. Laurent Boulevard	245 m southeast	The City of Ottawa registered waste generator of light fuels in 2012 and 2013.	GEN	No, HWIN generation was probably the result of a temporary project.

Databases:

EXP – List of Expired Fuel Safety Facilities
FSTH – Fuel Storage Tank – Historic
NPCB – National PCB Inventory
PRT – Private and Retail Fuel Storage Tanks
SPL – Ontario Spills

FST – Fuel Storage Tank
GEN – Ontario Regulation 347 Waste Generators Summary
PES – Pesticide Register
RSC – Record of Site Condition

In addition to the databases outlined above the following entries from the EcoLog ERIS report were reviewed and summarized below:

- The TSSA Historic Incidents database identified one entry for a commercial business located at 1804 St. Laurent Boulevard. December 19, 2016, a natural gas leak occurred from a pipeline strike. This incident does not pose a concern to the Phase One property since the gas was discharged to the atmosphere;
- The Environmental Compliance Approval database identified four entries in the Phase One study area. None of the records reviewed pose an environmental concern to the Phase One property;
- The Environmental Activity and Sector Registry identified one entry in the Phase One study area. The entry was for a permit to take water and does not pose an environmental concern to the Phase One property;
- The Certificates of Approval database identified three entries in the Phase One study area. None of the records reviewed pose an environmental concern to the Phase One property;
- One Record of Site Condition (RSC) was filed for properties within the Phase One study area. The RSC was filed on June 29, 2011 for 6553061 Canada Inc. at 1751 Russell Road in Ottawa, ON (RSC identification: 114283). The RSC fillings for 1751 Russell Road, Ottawa, ON relate to a commercial property with a total size of approximately 1.86 hectares. The application standard was full depth background site condition standard, coarse textured soil for residential/parkland/institutional property use and non-potable groundwater use; and
- There were four records found in the Water Well Information System (WWIS) database for the Phase One study area. No records were found for the Phase One property. The records relate to monitoring and test holes and abandoned wells. No water well records were found in the Phase One study area.

Based on the review of the ERIS report, no PCA, other than those mentioned in previous sections, were identified.

3.8 Physical Setting Sources

3.8.1 Aerial Photographs

Aerial photographs dated 1965, 1976, 1991, 1999, 2007, and 2017 were available for review on the City of Ottawa website. Aerial photographs dated prior to 1965 were not available for review. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs. Copies of the aerial photographs are provided in Appendix F.

Aerial Photograph (year)	Details
1965	<p>The Phase One property is developed with a single building at 1760 St. Laurent Boulevard, which occupies the eastern portion of the property. Parking and associated landscaping is observed immediately to the east, south and west of the building. Immediately to the north of the Phase One property Everest Private appears to be under construction. The remaining land on the Phase One property is undeveloped.</p> <p>Adjacent to the south of the Phase One property is a large building with parking (now 1800 St. Laurent Boulevard) and further south appears to be undeveloped land followed by several buildings and a car lot. Adjacent properties within the Phase One study area to the north, east and west of the Phase One property appear to be undeveloped. Streets such as Innes Road, St. Laurent Boulevard and Russell Road are clearly visible while Industrial Avenue looks to be under construction.</p>
1976	<p>There is an expansion to the Phase One building observed in 1965 with additions of a second and third unit immediately to the west and east of the building. The parking areas have been paved and expanded to the north, east</p>

Aerial Photograph (year)	Details
	<p>and west of the Phase One property. Immediately to the north of the Phase One property Everest Private appears to be constructed.</p> <p>Adjacent to the south of the Phase One property the building occupying 1800 St. Laurent Boulevard has an expansion to the paved parking surfaces and a clearly defined property boundary. Further to the south there is a large commercial building and associated paved parking facing St. Laurent Boulevard followed by some residential dwellings and apartment building along Russel Road. To the north of the Phase One property (between Everest Private and Industrial Avenue) is predominantly undeveloped land except for the construction of what would later be the Ottawa Fire Service Training Centre at 898 Industrial Avenue. To the east of the Phase One property and past St. Laurent Boulevard several large commercial buildings and associated parking are developed and occupy municipal addresses such as 1705, 1755 and 1795 St. Laurent Boulevard and 2239 Gladwin Crescent. To the northwest and west of the Phase One property residential dwellings and townhomes are developed extending to Russell Road.</p> <p>Further expansion to the Industrial Avenue appears to be under construction.</p>
1991	<p>A single commercial building (1754 St. Laurent Boulevard) with a drive through and paved parking and the gas station with associated paved parking (1740 St. Laurent Boulevard) have been constructed on the Phase One property. A large building (1730 St. Laurent Boulevard) located at the intersection of Innes Road and St. Laurent Boulevard has been constructed north of the Phase One property. The construction of the Ottawa Fire Service Training Centre has been completed. To the east of the Phase One property there is no further change from the previous year. To the south of the Phase One property and past the commercial building locate at 1800 St. Laurent Boulevard several commercial buildings with paved parking are constructed at 1802 and 1810 St. Laurent Boulevard. Further to the south a park (Alda Burt Park) and community centre are developed at 1816 St. Laurent Boulevard and at the intersection of Smyth Road and St. Laurent Boulevard a medical building is present. Residential areas to the northwest and west of the Phase One property appear to be unchanged except for the expansion of parking surrounding the two residential townhomes at Everest Private.</p>
1999	<p>The buildings on the Phase One property appear to be the same in this photograph as in 1991, however there has been an expansion to the paved parking area at 1760 St. Laurent Boulevard. The phase One property has a clear property boundary.</p> <p>There are no significant changes to the configuration of surrounding properties in the Phase One study area.</p>
2007	<p>The Phase One property appears unchanged from 2002. There was an expansion to the strip mall present to the north of the Phase One property. No other significant changes to the Phase One study area were apparent.</p>
2017	<p>There are no changes to the Phase One property and no significant changes to the configuration of surrounding properties in the Phase One study area.</p>

Based on the review of the aerial photographs, no additional PCAs have been identified in the Phase One study area in addition to those mentioned in previous sections.

3.8.2 Topography, Hydrology, Geology

Bedrock and surficial geology were reviewed via the Google Earth applications published by the Ontario Ministry of Energy, Northern Development and Mines. The bedrock geology application is available via www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/bedrock-geology and was last modified on March 19, 2018. The surficial geology application is available via www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/surficial-geology and was last modified on May 23, 2017.

Based on these applications, bedrock in the general area of the Phase One property consists of shale, limestone, dolostone and siltstone. Native surficial soil consists of fine-textured glaciomarine deposits of silt and clay with minor sand and gravel.

Ground surface is approximately 70 metres above sea level (masl) and bedrock is approximately 9 meters below ground surface (mbgs) at the Phase One property. The local topography slopes to the north.

A topographical map available from Natural Resources Canada (atlas.gc.ca/toporama/en/) was also reviewed. Green's Creek, which is approximately 1.7 kilometers northeast of the Phase One property, flows in a north-easterly direction towards Ottawa River, which is more than six kilometres north of the Phase One property. The topographical map was used as the base of the Site Location Plan. Figure 1, as shown in Appendix C.

3.8.3 Fill Materials

Fill material is typically brought to a site as a base for buildings and pavement. Other areas where fill is likely present are where underground storage tanks or other infrastructure were previously located. Since no significant changes in grade were observed during the site visit, the presence of fill material is not anticipated on the Phase One property.

3.8.4 Water Bodies and Areas of Natural Significance

Green's Creek, which is approximately 1.7 kilometres north east of the Phase One property, flows in a north-easterly direction toward the Ottawa River, which is over six kilometres north of the Phase One property.

There are no Area of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website (www.gisapplication.lrc.gov.on.ca/mamnh/Index.html).

3.8.5 Well Records

The Ontario well records website (www.ontario.ca/environment-and-energy/map-well-records water wells) was accessed. There were at least eight records for monitoring wells within the Phase One study area. One water well was installed in the area, possibly on the Phase One property, in 1961. The well record indicates that it was to service a storage unit. Since the Phase One property and surrounding properties are now serviced by municipal water, it is unlikely that this well is still in use.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library (maps.ogsrlibrary.com/wells/).

3.9 Site Operating Records

No site operating records were provided to EXP for review.

4.0 Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable about both the current and historical Phase One property uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the Phase One property.

During the completion of this Phase One ESA, an in-person interview was conducted on October 17, 2019 with Ms. Jennifer Davies, the current Property Manager for 1760 St. Laurent Boulevard. Ms. Leah Wells, EIT of EXP conducted the interview. Ms. Davies was selected as an interviewee since she has been the property manager at the property for 15 years.

Ms. Davies had no knowledge of any spills or releases of chemicals at or adjacent to the Phase One property. Further, she has no knowledge of any potable water wells or monitoring wells ever having been installed on the Phase One property and confirmed that the building is serviced by municipal water. She has no knowledge of any garbage, debris, or fill having been deposited on the Phase One property. Ms. Davies was aware that there was one previous environmental report prepared for the Phase One property.

Mr. Daniel Guertin, Director of Operations, was interviewed in-person on September 23, 2020 during the site visit for 1754 St. Laurent Boulevard. Ms. Leah Wells, EIT of EXP conducted the interview. Mr. Guertin has been the Director of Operations for the property for 10 years.

Mr. Guertin has no knowledge of any spills or releases of chemicals at or adjacent to the Phase One property. Mr. Guertin indicated that, outside of cleaning products, no chemicals are used at the property. He indicated that the St. Hubert's has operated at that location for 40 years.

The property at 1740 St. Laurent Boulevard could not be accessed at the time of this investigation as the retail fuel station was still in operation.

Responses to other questions were made during site reconnaissance and are discussed in section 5.0.

5.0 Site Reconnaissance

5.1 General Requirements

On October 17, 2019 at 1:30 p.m., Ms. Leah Wells, EIT of EXP conducted the site visit for 1760 St. Laurent Boulevard. The weather was rainy with an approximate temperature of 10 degrees Celsius. There was precipitation from the rain during the site visit, which lasted approximately 90 minutes.

On September 23, 2020 at 9:30 a.m., Ms. Leah Wells, EIT of EXP conducted the site visit for 1754 St. Laurent Boulevard. The weather was overcast with an approximate temperature of 15 degrees Celsius. The site visit lasted approximately 60 minutes.

The property at 1740 St. Laurent Boulevard was not accessed at the time of this investigation due to ongoing operations on site. This section will be updated when 1740 St. Laurent is accessible.

The site visits were conducted in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the Phase One property.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

Photographs were taken at the Phase One property on October 17, 2019 and September 23, 2020 and pertinent photographs are included in Appendix F.

5.2 Specific Observations at the Phase One Property

5.2.1 Buildings and Structures

The property at 1760 St. Laurent consists of a single slab-on-grade building with three units and is occupied by commercial businesses including End of the Roll Discount Carpets and Flooring, Ottawa Swordplay and a Sushi restaurant (168 Sushi). The exterior construction of the building is concrete. The lights inside the building are fluorescent type. Access to the property is provided by an asphalt driveway which leads to parking along the perimeter of the building and into a large parking lot occupying the western portion of the property.

The building at 1754 St. Laurent Boulevard is a single storey slab-on grade building occupied by a St. Hubert's restaurant. The building is flat roofed with brick cladding. Access to this property and 1740 St. Laurent Boulevard is provided via a shared driveway between the properties. The west part of the property is an asphalt parking lot.

Three transformers were observed on the Phase One Property. A dry transformer was observed inside the building at 1760 in the unit where the End of the Roll business is located. Two exterior pad mounted transformers were observed on the Phase One property. One is located adjacent to the sushi restaurant and the other is located between the site buildings at 1760 and 1754 St. Laurent Boulevard. All the transformers appeared to be in good condition and no staining was observed in the vicinity.

5.2.2 Site Utilities and Services

The Phase One property is supplied by municipal water provided by the City of Ottawa. The source of municipal water is the Ottawa River. Sewage, wastewater and solid waste for the Phase One property are also managed by the City of Ottawa.

Solid waste is managed by the City of Ottawa in the form of collections of garbage and recycling bins at the rear of the respective buildings. The Phase One property is supplied with natural gas.

There was no evidence of a railway being present on the Phase One property. A railway is present approximately 1.3 km north of the Phase One property.

5.3 Storage Tanks

5.3.1 Underground Storage Tanks

Three fuel USTs are present at 1740 St. Laurent Boulevard.

5.3.2 Above Ground Storage Tanks

Both 1756 and 1760 St. Laurent have a single AST at the rear of the respective buildings for disposal of grease related to cooking.

5.4 Chemical Storage Handling and Floor Condition

Chemical use on the Phase One property was predominantly limited to commonly available retail sized containers of cleaners and detergents, as well as common maintenance chemicals such as paint.

All chemicals observed on the Phase One property were stored in small quantities and in their original retail packaging or approved containers. All chemical storage containers on the Phase One property were observed to be in good condition at the time of EXP's site visit. Flooring in the vicinity of any chemical storage areas was observed to be in good condition, free of damage or staining. As such, the potential environmental concern to the subsurface environmental conditions of the Phase One property from the use of chemicals is considered to be low.

5.5 Areas of Stained Soil, Pavement or Stressed Vegetation

No areas of significant staining of soil or pavement was observed on the Phase One property at the time of EXP's site visit. Further, the vegetation on the property did not appear to be stressed.

5.6 Fill and Debris

Fill is unlikely present on the Phase One property, since the grade of the Phase One property is similar to surrounding properties.

5.7 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. According to the Environmental Protection Act (EPA), an ECA (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29, 1988.

During the site visit no emergency powered generators were observed. Therefore, no air emissions of concerns were identified at the time of the site visit.

5.8 Odours

No strong odours were present during the site visit.

5.9 Noise

No excessive noise was heard during the site visit.

5.10 Other Observations

There were no pits and lagoons, no railways or spurs and no unidentified substances observed on the Phase One property.

5.11 Special Attention Items, Hazardous Building Materials and Designated Substances

5.11.1 Asbestos

Asbestos-containing materials (ACM) are fibrous hydrated silicates and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-Friable asbestos refers to asbestos that is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-Friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACM in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHSA). Under OHSA, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACM was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

Based on the age of the buildings at the Phase One property ACM may be present.

5.11.2 Ozone Depleting Substances (ODSs)

Chlorofluorocarbons (CFC), often referred to as freons, ceased production in Canada in 1993 as a result of their ozone-depleting characteristics. Importation of CFCs into Canada ceased in 1997 and a total ban on their use is proposed for 2020. The use of these materials is still permitted in existing equipment, but equipment must be serviced by a licensed contractor such that CFCs are contained and not released to the environment during servicing or operation.

At the time of EXP's site visit, all cooling units on the Phase One property were understood to be in good operating condition. Under the management of a licensed contractor, the subject systems do not represent a significant concern to human health or the environment. However, if present, CFCs will require replacement by 2030.

Maintenance of refrigerant containing equipment should continue to be completed by a licensed refrigeration contractor. The equipment should only be repaired, removed, or serviced by an appropriately licensed contractor.

5.11.3 Lead

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinplate and plumbing. The use of lead-based paints (LBPs) was phased out *circa* 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain higher levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the age of the buildings at the Phase One property LBPs may be present. The painted surfaces observed during EXP's site visit were observed to be in good condition.

5.11.4 Mercury

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove "interior uses" from their product labels.

Mercury-containing equipment was not observed during the Site visit. The interior painted surfaces observed during EXP's site visit were in good condition. No mercury-containing thermostats were observed in the building.

5.11.5 Polychlorinated Biphenyls (PCB)

The manufacture of PCB in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Phase One property. Potential equipment, which could contain PCB include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCB must be disposed of in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCB is permissible.

There was no evidence of PCB-containing equipment on the Phase One property.

5.11.6 Urea Formaldehyde Foam Insulation

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets, and fabrics, and it contributes to "that new house smell."

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose, and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. The further use of UFFI was banned in Canada in 1980.

No evidence of UFFI was observed during the site visit.

5.11.7 Radon

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints, and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerels per cubic metre (Bq/m³) where radon gas is present and the annual radon concentration exceeds 200 Bq/m³ in the normal occupancy area.

A radon gas assessment was beyond the scope of this Phase One ESA, and as such, radon gas was not assessed.

5.11.8 Mould

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow, a food source (i.e. gypsum wallboard, wallpaper, wood, etc.) and moist conditions are required. Mould can have an impact on human health depending on the species and concentration of the airborne mould spores. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment, the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled "mould guidelines for the Canadian construction industry" and the Environmental Abatement Council of Ontario (EACO) guidelines titled "EACO Mould Abatement Guidelines, Edition 3 (2015)."

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

No evidence of significant water damage or mould growth was observed during the site visit.

5.11.9 Other Substances

No other special attention substances (such as acrylonitrile or isocyanates) were suspected to be present at the Phase One property at the time of site reconnaissance.

5.11.10 Processing and Manufacturing Operations

No processing or manufacturing operations were observed at the Phase One property.

5.11.11 Hazardous Materials Use and Storage

No hazardous materials are used or stored at the Phase One property. Small amounts of household cleaners are present in both buildings on the Phase One property.

5.11.12 Vehicle and Equipment Maintenance Areas

No vehicle and equipment maintenance activities were observed or reported.

5.11.13 Oil/Water Separators

No oil-water separators were observed at the Phase One property.

5.11.14 Sewage and Wastewater Disposal

Sewage and wastewater generated at the Phase One property is disposed of via the municipal sewer system.

5.11.15 Solid Waste Generation, Storage & Disposal

Solid wastes generated at the Phase One property are collected by the City of Ottawa.

5.11.16 Liquid Waste Generation, Storage & Disposal

Two grease bins are located on the Phase One property. One at the rear of 168 Sushi and one at the rear of the St. Hubert's. Grease traps and bins are regularly cleaned and emptied by a contractor.

5.11.17 Unidentified Substances

No unidentified substances were observed on the Phase One property at the time of the site visit. No dumping or any other deleterious materials were identified.

5.11.18 Hydraulic Lift Equipment

No hydraulic equipment was observed at the Phase One property.

5.11.19 Mechanical Equipment

No mechanical equipment of concern was present on the Phase One property. One forklift was observed at End of the Roll.

5.11.20 Abandoned and Existing Wells

There are no domestic wells on the Phase One property. Several monitoring wells are present on the Phase One property.

5.11.21 Roads, Parking Facilities and Right of Ways

Vehicular access to the Phase One property is provided by an entrance from the St. Laurent Boulevard.

5.12 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within 250 m of the Phase One property was conducted from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the Phase One property. Refer to Figure 3 in Appendix C for the adjacent land uses.

The following land uses border the Phase One property:

- North: Commercial;
- West: Residential;
- East: Commercial (strip malls); and
- South: Commercial.

5.13 Enhanced Investigation Property

Ontario Regulation 153/04 defines an enhanced investigation property as a “property that is used, or has ever been used, in whole or in part for an industrial use or any of the following commercial uses: a garage; a bulk liquid dispensing facility, including a gasoline outlet; or, for the operation of dry-cleaning equipment.”

Therefore, in accordance with Regulation 153/04, the property is considered to be an enhanced investigation property, as 1760 St. Laurent Boulevard was operated as a dry-cleaning facility.

5.14 Summary and Written Description of Investigation

At the time of the investigation, the Phase One property consisted of one two-storey building with an attic and crawlspace and associated gravel parking and landscaped areas.

Based on the findings of this investigation the following PCA have been identified in the Phase One study area:

- PCA #10 – Commercial Autobody Shops;
- PCA #37 – Operation of Dry-Cleaning Equipment (where chemicals are used); and
- PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks.

The following areas of potential environmental concern (APEC) were identified:

11421247 Canada Inc.

Phase One Environmental Site Assessment 1740-1760 St. Laurent Boulevard, Ottawa, Ontario

OTT-00260579-A0

October 23, 2020 (Updated December 16, 2020)

- APEC #1 – The area that includes the building and the land immediately surrounding the building, as the property was previously operated as a dry-cleaning facility (PCA #37 – Operation of Dry-Cleaning Equipment);
- APEC #2 – The area adjacent to the south property boundary, as an auto service station is located south adjacent to the Phase One property (PCA #10 – Commercial Autobody Shops); and
- APEC #3 – 1740 St. Laurent Boulevard, due to the operation of 1740 St. Laurent Boulevard as a retail fuel outlet since the 1980s (PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks).

6.0 Review and Evaluation of Information

6.1 Current and Past Uses

The Phase One property was first developed *circa* 1961 at which time 1760 St. Laurent was developed as a storage facility for a paper products distributor (Wilson J.C. Limited). This building is currently occupied by three commercial businesses (168 Sushi, End of the Roll, and Ottawa Swordplay). The properties located at 1740 and 1754 St. Laurent Boulevard were first developed in the 1980s, as a gas station and St. Hubert's restaurant respectively. These businesses are currently still in operation.

6.2 Potentially Contaminating Activity

Ontario Regulation (O. Reg.) 153/04 defines a Potential Contaminating Activity (PCA) as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D that occurs or has occurred in the Phase One study area. The following PCA were identified for the Phase One property and the Phase One study area:

- PCA #10 – Commercial Autobody Shops
- PAC #28 – Gasoline and Associated Products Storage in Fixed Tanks
- PCA #37 – Operation of Dry-Cleaning Equipment (where chemicals are used).

6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present. Based on this Phase One ESA, the following APEC was identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1	The area at 1760 St. Laurent Boulevard that includes the building and the land immediately surrounding the building, as the property was previously operated as a dry-cleaning facility	#37 – Operation of Dry-Cleaning Equipment (where chemicals are used)	#37 - On-Site	Volatile Organic Compounds (VOC)	Soil and Groundwater
#2	The area adjacent to the south property boundary, as an auto service station is located south adjacent to the Phase One property	#10 – Commercial Autobody Shops	#10 - Off-Site	Benzene, Toluene, Ethylbenzene, Xylene (BTEX), Petroleum Hydrocarbons (PHC), Polycyclic Aromatic Hydrocarbons (PAH), and metals	Soil

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#3	1740 St. Laurent Boulevard	#28 – Gasoline and Associated Products Storage in Fixed Tanks	#28 – On-Site	BTEX, PHC, VOC and metals	Soil and Groundwater

6.4 Phase One Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 2.

6.4.1 Buildings and Structures

The Phase One property was first developed *circa* 1961 at which time 1760 St. Laurent was developed. This property is currently occupied by a single storey, slab on grade building containing three commercial businesses (168 Sushi, End of the Roll, and Ottawa Swordplay). The properties located at 1740 and 1754 St. Laurent Boulevard were first developed in the 1980s, as a gas station and St. Hubert's restaurant respectively, both with single storey slab on grade structures.

6.4.2 Water Bodies and Groundwater Flow Direction

Green's Creek, which is approximately 1.7 kilometres north east of the Phase One property, flows in a north-easterly direction toward the Ottawa River, which is over six kilometres north of the Phase One property.

6.4.3 Areas of Natural Significance

There are no ANSI within the Phase One study area.

6.4.4 Water Wells

There are no potable water wells within the Phase One study area.

6.4.5 Potentially Contaminating Activity

The following on-site PCA were identified:

- PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks; and
- PCA #37 – Operation of Dry-Cleaning Equipment (where chemicals are used).

The following off-site PCA were identified:

- PCA #10 – Commercial Autobody Shops.

6.4.6 Areas of Potential Environmental Concern

The following APEC were identified:

- APEC #1 – The area at 1760 St. Laurent Boulevard that includes the building and the land immediately surrounding the building, as the property was previously operated as a dry-cleaning facility;

- APEC #2 – The area adjacent to the south property boundary, as an auto service station is located south adjacent to the Phase One property;
- APEC #3 – 1740 St. Laurent Boulevard and the north property line of 1754 St. Laurent Boulevard, due to the operation of 1740 St. Laurent Boulevard as a retail fuel outlet since the 1980s.

6.4.7 Subsurface Stratigraphy

Bedrock in the general area of the Phase One property consists of shale, limestone, dolostone and siltstone. Native surficial soil consists of fine-textured glaciomarine deposits of silt and clay with minor sand and gravel. Ground surface is approximately 70 metres above sea level (masl) and bedrock is approximately 9 meters below ground surface (mbgs) at the Phase One property. The local topography slopes to the north.

Based on the previous investigations for the Phase One property, overburden stratigraphy generally consisted of a surficial layer of gravel fill overlying sand, silty clay, and silty clay till. The native soil underlain by limestone bedrock at approximately 5.9 to 7.6 metres below ground surface (mbgs).

6.4.8 Uncertainty Analysis

The CSM is a simplification of reality, which aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

7.0 Conclusions

EXP understands that the most recent use of the property is defined by Ontario Regulation 153/04 as commercial property use, and that the proposed use is multiple residential apartment buildings.

In summary, the following areas of potential environmental concern (APEC) were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1	The area at 1760 St. Laurent Boulevard that includes the building and the land immediately surrounding the building, as the property was previously operated as a dry-cleaning facility	#37 – Operation of Dry-Cleaning Equipment (where chemicals are used)	#37 – On-Site	Volatile Organic Compounds (VOC)	Soil and Groundwater
#2	The area adjacent to the south property boundary, as an auto service station is located south adjacent to the Phase One property	#10 – Commercial Autobody Shops	#10 – Off-Site	Benzene, Toluene, Ethylbenzene, Xylene (BTEX), Petroleum Hydrocarbons (PHC), Polycyclic Aromatic Hydrocarbons (PAH), and metals	Soil
#3	1740 St. Laurent Boulevard	#28 – Gasoline and Associated Products Storage in Fixed Tanks	#28 – On-Site	BTEX, PHC, VOC and metals	Soil and Groundwater

Soil and groundwater samples collected from within all three APEC are within the Table 3 SCS for all parameters that were analysed. Further sampling will have to be conducted from the vicinity of the petroleum handling equipment when it is removed from APEC #3. Sampling for all of the parameters identified in the table above will have to be conducted.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

The Qualified Person who oversaw this work, Patricia Stelmack, M.Sc., P.Eng., recommends that a Phase Two ESA be conducted to address the PCA that may have adversely affected the APEC on the Phase One property.

9.0 Limitation of Liability, Scope of Report, and Third Party Reliance

Basis of Report

This report ("Report") is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or 11421247 Canada Inc. ("the Client") has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Reliance on Information Provided

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp. If new information about the environmental conditions at the Site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

Standard of Care

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

Complete Report

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

Use of Report

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

Report Format

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

Earth and Environment

Appendix A: Qualifications of Assessors

Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment, Conservation and Parks. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Patricia Stelmack, M.Sc., P.Eng., is a Senior Chemical Engineer/Senior Project Manager who has been working in the environmental field as a consultant and in industry since 1997. Since joining EXP (formerly Barenco Inc.) in 2000, Ms. Stelmack has conducted and managed over 1,000 environmental assessment and remediation projects. Ms. Stelmack earned her B.Sc. in biochemistry and B.A.Sc. in chemical engineering at the University of Ottawa and earned her M.Sc. in chemical and materials engineering at the University of Alberta. She is licensed as a professional engineer in Ontario, Manitoba, and Saskatchewan and is a Qualified Person, as defined in Ontario Regulation 153/04.

Leah Wells, B.A.Sc., P.Eng. has four years of experience in the environmental consulting field. She has worked on numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, completing soil and groundwater sampling, soil vapour sampling, assisting in report preparation and data entry and analysis. She is licensed as a professional engineer in Ontario.

Re: OTT-00260579-A0 **File Review Request**
1740, 1750 & 1760 St. Laurent Blvd., Ottawa, Ontario

Dear Sir or Madam:

I am sending three Freedom of Information Requests to you for 1740, 1750 and 1760 St. Laurent Blvd., Ottawa, Ontario. We are conducting an environmental site assessment and require any environmental concerns.

If possible, we would appreciate receiving the documentation by email (kathy.radisch@exp.com) and by mail. If you have any questions, or require any further information, please do not hesitate to contact the undersigned at 613-688-1891, ext. 3296.

Yours truly,
EXP Services Inc.

Sent via email [kathy.radisch@exp.com]

Dear Ms. Radisch,

**Re: Information Request
1760 St. Laurent Boulevard, Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

Search of Historical Land Use Inventory

This acknowledges receipt of the signed Disclaimer regarding your request for information from the City’s Historical Land Use Inventory (HLUI 2005) database for the Subject Property.

A search of the HLUI database revealed the following information:

- There are no activities associated with the Subject Property.
- There is 1 activity associated with the Subject Property.

The HLUI database was also searched for activity associated with properties located within 250m of the Subject Property. The search revealed the following:

- There are 65 activities associated with 18 properties located within 250m of the Subject Property.

Please note that certain activities have been identified to have a PIN Certainty of “2”. This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the property. All database entries with a PIN Certainty of “2” require independent verification as to their precise location.

A **site map** and **table** have been included to show the location of the Subject Property as well as the location of all the activities noted above, including the HLUI database’s location of the Activity Numbers with a PIN Certainty of “2”.

Additional information may be obtained by contacting:

Ontario’s Environmental Registry

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact Colette Gorni at 613-580-2424 ext. 21239 or HLUI@ottawa.ca

Sincerely,

Colette Gorni

Attn: Phil Costa
1740 St. Laurent Blvd.
Ottawa, ON K1G 1A2

Dear Mr. Costa:

Re: **1740 St. Laurent Blvd.**
Receipt # 43527

This will acknowledge receipt of your request received September 6, 2012, with attached monies, requesting confirmation that the sell of propane is permitted at the above-mentioned location.

We wish to advise that this property is subject to the provisions of Zoning By-law 2008-250, as appealed and amended, in a zone designated as AM[1658]. This is a *Arterial Main Street Zone Exception 1658*. A **retail store** business is a listed permitted use in this zone designation. As such, a propane cylinder exchange facility is permitted at the above-mentioned location.

It should be noted that having the use permitted under the Zoning By-laws does not supercede any other required approvals or regulations.

We trust this information is of assistance to you and wish to emphasize that our response was formulated based on the information you provided to us. Should circumstances change, or you require further information, please contact the undersigned at 613-580-2424, ext. 27905.

Yours truly,

A handwritten signature in cursive script that reads 'Colleen'.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2020

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Jun 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jul 31, 2020

Drill Hole Database:

Provincial **DRL**

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry:

Provincial **EASR**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jul 31, 2020

Environmental Registry:

Provincial **EBR**

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jul 31, 2020

Environmental Compliance Approval:

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jul 31, 2020

Environmental Effects Monitoring:

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Apr 30, 2020

Environmental Issues Inventory System:

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2020

Fisheries & Oceans Fuel Tanks:

Federal **FOLT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2020

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jul 31, 2020

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Jul 31, 2020

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jul 31, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2020

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database:

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variations for Abandonment of Underground Storage Tanks:

Provincial **VAR**

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial **WDS**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jul 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
