# 1 Executive Summary

Englobe Corp. (Englobe) was retained by KATASA Groupe + Développement (herein referred to as the “Client”) to conduct a Phase I Environmental Site Assessment (ESA) for the property located at 1531 St. Laurent Boulevard, in Ottawa, Ontario (herein referred to as the “Site” or “Phase I Property”). The Site location is shown in Figure 1, in Appendix A.

The purpose of this Phase I ESA was to evaluate actual and potential environmental concerns on Site and to assess the potential for the Site to be impacted by the current and/or historical uses of the Site and surrounding properties. This Phase I ESA was completed in general accordance with the requirements of Ontario Regulation 153/04 Records of Site Condition - Part XV.1 of the Act under the Ontario Environmental Protection Act, R.S.O. 1990, chapter E.19 (O. Reg. 153/04), as amended, in support of a City of Ottawa Site Plan Control Application (SPCA) for the planned development of mixed commercial/residential buildings at the Site. This report is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition for the Site in accordance with O. Reg. 153/04 (as amended).

The scope of this Phase I ESA did not include sampling and analysis of potentially contaminated media. Information regarding the Phase I Study Area (the Site and the area within 250 m of the Site boundaries) was compiled through a records review, Site reconnaissance visit, and interview with persons knowledgeable about the Site. Federal, provincial, municipal, and private agencies/databases were searched during the records review for indicators of potential environmental concerns with regards to the Site and Phase I Study Area.

The Site is located at 1531 St. Laurent Boulevard, Ottawa, ON K1G 1A1. It is located in an area zoned as AM - Arterial Mainstreet Zone. The Site consists of a rectangular shaped parcel of land that covers an area of approximately 4,966 m<sup>2</sup>. It is developed with a double-storey, single-tenant commercial building, with one basement level, and an asphalt parking lot. The building, which has a footprint area of approximately 650 m<sup>2</sup>, was vacant at the time of Englobe’s assessment but was previously occupied by a restaurant (Robbie’s Italian Restaurant).

The following Area of Potential Environmental Concerns (APECs) were identified on the Phase I Property:

## APECs identified at the Phase I Property.

PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
1	Undefined No. 1. Known soil contamination	On Site	Known soil contamination on Site in vicinity of MW1-21 and MW22-02	1	North central/western portion	PHCs F1-F4 / BTEX	Soil
2	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	On Site	Husband Transport historically operated on Site	2	Entire Site	PHCs F1-F4 / BTEX	Soil and Groundwater

PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
3	Undefined No. 2. Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	3 <sup>1</sup>	Entire Site	Na, Cl, EC, SAR	Soil and Groundwater
4	28. Gasoline and Associated Products Storage in Fixed Tanks	On Site	Diesel and gasoline UST records associated with Husband Transport	4	Entire Site	PHCs F1-F4 / BTEX	Soil and Groundwater
5	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Retail fuel outlet	5	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
6	49. Salvage Yard, including automobile wrecking	Off Site	Automobile wrecking inventory record	6	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
7	10. Commercial Autobody Shop	Off Site	Sunlight Oil and Auto Parts with tanks	7	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
8	Undefined No. 3. - Auto Sales	Off Site	Lancaster Auto Sales (bulk/long term vehicle storage)	8	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
57	49. Salvage Yard, including automobile wrecking	Off Site	Automobile wrecking inventory record	9	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
58	10. Commercial Autobody Shop	Off Site	Automobile repair shop	10	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
59	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Diesel and gasoline UST records	11	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
60	10. Commercial Autobody Shop	Off Site	Beaver Construction Garage	12	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
61	Undefined No. 10 - Equipment Maintenance	Off Site	Dickie Moore Rental with garage bay doors - equipment servicing inferred	13	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
62	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Dominion Building Materials Ltd. with UST	14	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
67	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Fleetway Aluminum Manufacturing Co. and Ottawa	15	Southern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater

PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
			Automotive Warehousing Ltd.				
68	10. Commercial Autobody Shop	Off Site	RPM Motorworks/Bison Auto Centre	16	Southern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
69	49. Salvage Yard, including automobile wrecking	Off Site	Automobile wrecking inventory record	17	Southern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
84	Undefined No. 11 - Spill	Off Site	Trail of diesel spill over 3-4 kilometers (km) of road from a bus hose leak in 1999	18	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
85	Undefined No. 12 - Spill	Off Site	100 L release of diesel fuel to road/sewer in November 2003 and Motor oil spill of unknown volume to the catch basin in 2019	19	Northwestern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater

<sup>1</sup> Road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both; thus, it is the QP's opinion that this PCA and associated APEC are exempted, and no soil and groundwater samples must be collected and submitted for laboratory analyses for related parameters.

**Note:**

PHCs F1-F4 = Petroleum Hydrocarbons Fractions 1 to 4

BTEX = Benzene, Toluene, Ethylbenzene, and Xylenes

Based on the information obtained as part of this Phase I ESA, 19 APECs were identified at the Site. However, based on a review of historical environmental investigations completed at the Site (i.e., DST Consulting Engineers Inc., September 2021; and Englobe, February 2022), all APECs requiring investigation appear to have been fully investigated as part of the previous environmental investigations.

It is recommended that PHC-impacted soils in the vicinity of MW1-21 and MW22-02 be excavated from the Site and disposed of at an MECP-licensed waste disposal facility during the planned construction/ Site development activities. Additional delineation may be warranted at the time to delineate the previously-confirmed PHC impacts in soil, to attempt to minimize soil disposal costs for the building construction project and/or to fully remediate the contaminated soils on Site, as required. Any excess soils shall be handled in accordance with O. Reg. 406/19, at the time of Site development.

Additionally, it is recommended that any monitoring wells no longer in use be abandoned within 180 days of their installation date, in accordance with O. Reg. 903: Wells (as amended).

## Property and Confidentiality

“This report can only be used for the purposes stated therein. Any use of the report must take into consideration the object and scope of the mandate by virtue of which the report was prepared, as well as the limitations and conditions specified therein and the state of scientific knowledge at the time the report was prepared. Englobe Corp. provides no warranty and makes no representations other than those expressly contained in the report.

This document is the work product of Englobe Corp. Any reproduction, distribution or adaptation, partial or total, is strictly forbidden without the prior written authorization of Englobe Corp. and its Client. For greater certainty, use of any and all extracts from the report is strictly forbidden without the written authorization of Englobe Corp. and its Client, given that the report must be read and considered in its entirety.

No information contained in this report can be used by any third party without the prior written authorization of Englobe Corp. and its Client. Englobe Corp. disclaims any responsibility or liability for any unauthorized reproduction, distribution, adaptation or use of the report.

If tests have been carried out, the results of these tests are valid only for the sample described in this report.

Englobe Corp.’s subcontractors who have carried out on-site or laboratory work are duly assessed according to the purchase procedure of our quality system. For further information, please contact your project manager.”

# 2 Introduction

Englobe Corp. (Englobe) was retained by KATASA Groupe + Développement (herein referred to as the “Client”) to conduct a Phase I Environmental Site Assessment (ESA) for the property located at 1531 St. Laurent Boulevard, in Ottawa, Ontario (herein referred to as the “Site” or “Phase I Property”). The Site location is shown in Figure 1, in Appendix A.

The purpose of this Phase I ESA was to evaluate actual and potential environmental concerns on Site and to assess the potential for the Site to be impacted by the current and/or historical uses of the Site and surrounding properties. This Phase I ESA was completed in general accordance with the requirements of *Ontario Regulation 153/04 Records of Site Condition - Part XV.1 of the Act under the Ontario Environmental Protection Act, R.S.O. 1990, chapter E.19* (O. Reg. 153/04), as amended, in support of a City of Ottawa Site Plan Control Application (SPCA) for the planned development of mixed commercial/residential buildings at the Site. This report is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition for the Site in accordance with O. Reg. 153/04 (as amended).

The scope of this Phase I ESA did not include sampling and analysis of potentially contaminated media. Information regarding the Phase I Study Area (the Site and the area within 250 m of the Site boundaries) was compiled through a records review, Site reconnaissance visit, and interview with persons knowledgeable about the Site. Federal, provincial, municipal, and private agencies/databases were searched during the records review for indicators of potential environmental concerns with regards to the Site and Phase I Study Area.

This report was prepared for the exclusive use of the Client. Any use of this report by any third party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. Englobe accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report. Full Report Limitations are provided in Section 11 of this report.

## 2.1 Site Information

The Site is located at 1531 St, Laurent Boulevard, Ottawa, ON K1G 1A1. It is located in an area zoned as AM - Arterial Mainstreet Zone. The Site consists of a rectangular shaped parcel of land that covers an area of approximately 4,966 m<sup>2</sup>. It is developed with a double-storey, single-tenant commercial building, with one basement level, and an asphalt parking lot. The building, which has a footprint area of approximately 650 m<sup>2</sup>, was vacant at the time of Englobe’s assessment but was previously occupied by a restaurant (Robbie’s Italian Restaurant).

A summary of the Site details is presented below.

Table 2.1. Site detail summary

Item	Detail
Municipal Address	1531 St, Laurent Boulevard, Ottawa, ON K1G 1A1
Site Area	4965.81 m <sup>2</sup>
Property Identification No.	04263-0011 (LT)
Legal Description	PT LT 40, 41, 53 & 54, PL 63, AS IN NS239549, EXCEPT PT 1 5R11262; OTTAWA/GLOUCESTER

## 2.2 Contact Information

Contact information for the Client representative is as follows:

Chaxu Baria, Project Management Assistant

- Email: [chaxu@katasa.ca](mailto:chaxu@katasa.ca)
- Business Address: 69 rue Jean-Proulx unite #301, Gatineau, QC, J8Z 1W2.

# 3 Scope of Investigation

The scope of work for the Phase I ESA is summarized in the following subsections. Englobe has performed this Phase I ESA in general accordance with the requirements outlined in O. Reg. 153/04, as amended.

## 3.1 Records Review

A records review was completed that involved collecting data from federal, provincial, and municipal databases, aerial photographs, geological maps, land title information, etc., in order to determine the presence or absence of actual and/or potential contaminants at the Site and the surrounding properties within the Phase I Study Area.

## 3.2 Site Reconnaissance

The Site reconnaissance to inspect the Site and surrounding properties was conducted on May 31, 2023. The Client arranged for access to the Site, as required. Surrounding properties were assessed from publicly accessible locations.

## 3.3 Interviews

Englobe personnel conducted an interview with the Client. The interview was designed to confirm and/or augment information gathered during the records review and/or Site Reconnaissance visit regarding past or present land uses or events that may affect the environmental condition of the Site. Information from this interview has been incorporated into various sections of this report and summarized in Section 5 below.

## 3.4 Data Evaluation and Reporting

The data collected during the records review and the Site visit was compiled and collated by Englobe. The information is presented in a logical manner that clearly defines actual and potential environmental issues that may affect the Site. The identified potentially contaminating activities (PCAs) and areas of potential environmental concern (APECs) have been summarized in Tables 7.2 and 7.3, respectively.

# 4 Records Review

## 4.1 General

Information related to the Site was received and/or requested from numerous sources as detailed in this section. The agencies contacted, information requested, and responses received are summarized in the following sub-sections.

### 4.1.1 Phase I Study Area Determination

The Phase I Study Area encompasses the Site, as well as properties wholly and partly located within 250 m of the Site, as shown on Figure 2, in Appendix A.

### 4.1.2 First Developed Use Determination

Based on the O. Reg. 153/04 (as amended) definition of “first developed use” and available information, the Site was first developed between 1954 and 1958. A building is visible on Site in the 1958 aerial photograph, but the Site address is not listed in the 1954 city directory (as noted in Section 4.2.2 below). The subject building is identified as an office building and transport warehouse in the 1963 Fire Insurance Plan (as noted in Section 4.1.3 below).

### 4.1.3 Fire Insurance Plans

Englobe requested a search of Fire Insurance Plans (FIPs) through Opta Information Intelligence (Opta). Opta maintains records, including plans and maps for Canadian cities which indicate past and existing structures on properties, including but not limited to, aboveground storage tanks (ASTs), underground storage tanks (USTs), and other building structure information. One FIP volume for the year 1963 was identified for the Phase I Study Area. Pertinent details as they relate to this Phase I ESA are summarized below.

- A building is present at the Site and is identified as an office on the west side and a transport warehouse on the east side. The structure is identified as exposed steel with a mill roof. The remainder of the Site has no identifiable features.
- The property to the north of the Site, across Belfast Road at 1499 St. Laurent Boulevard does not contain any structure information; however, a gas bar and a fuel oil depot, including four USTs are identified on the property.
- To the northwest of the Site at 1500B St. Laurent Boulevard, a large bus storage building at up to 3 diesel oil USTs are visible. At 1500A St. Laurent Boulevard, a large building containing areas labelled as pits/hoists, paint shop with spray booth and paint storage, injector repairs, lube oil, and batteries are visible. Outside of this building, three fuel oil USTs (to the North), and one waste oil UST (to the South) are visible.
- A garage and truck storage building with one UST is visible at 2311 Shore Road.
- At 1555/1557 St. Laurent Boulevard, Fleetway Aluminum Manufacturing Co. and Ottawa Automotive Warehousing Ltd. are visible.
- At 1571 St. Laurent Boulevard, D. Grandmaitre Ltd., identified as an oil dealer, is present. 13 USTs are identified to the east of the structure along Triole Road (currently Lagan Way).

- At 1039 Belfast Road, Pinnacle Construction Ltd. is identified with a garage as part of the building on the property.
- At 1547 Triole Road (currently Lagan Way), Beaver Construction is identified with a garage as part of the building on the property.
- At 1575B Triole Road (currently Lagan Way), a small oil storage building is identified on the property labelled as Dominion Building Materials Ltd. with one UST.
- At 1551 Michael Street, a building labelled Dominion Iron & Welding Works is visible.
- At 1550 Michael Street, Therien Rug Cleaners Ltd. is identified on the property with two rooms labelled as drying room and dusting room.
- There is no FIP information available to the west of the Site.

A copy of the FIP results is provided in Appendix B.

#### 4.1.4 Chain of Title

Englobe requested a title search for the Site through Environment Risk Information Services (ERIS), from Crown ownership to the present. The below table provides a summary of the chain of title information.

**Table 4.1.4. Summary of Chain of Title**

Property Identification Number	Registered Property Owner	Owned From
04263-0011 (LT)	Crown	Prior to June 3, 1835
	Neil McDonald	June 3, 1835 to February 20, 1836
	John McLaurin	February 20, 1836 to June 26, 1847
	John Forgie	June 26, 1847 to September 2, 1853
	Michael CYR, Sr.	September 2, 1853 to September 2, 1859
	Michael CYR, Jr.	September 2, 1859 to November 27, 1873
	Joseph CYR	November 27, 1873 to September 6, 1875
	Pierre Rivet	September 6, 1875 to May 1, 1914
	Patrick Cassidy	May 1, 1914 to September 4, 1919
	William Apps	September 4, 1919 to July 2, 1920
	Narchoise Gauthier	July 2, 1920 to June 10, 1932
	John P. Ostby	June 10, 1932 to August 23, 1939
	Sadie Ostby	August 23, 1939 to October 3, 1944
	Wilmer Martin & Helena Martin	October 3, 1944 to July 30, 1946
	J. Harvet Duhaine	July 30, 1946 to June 22, 1956
	Pinnacle Construction Ltd.	June 22, 1956 to November 24, 1959
	Husband Transport Ltd.	November 24, 1959 to December 12, 1981
	Gormark Holdings Ltd.	December 12, 1981 to May 15, 1984
	The Coffee Factory Inc. 101381 Canada Inc.	May 15, 1984 to April 14, 2022
<b>13802434 Canada Inc.</b>	<b>April 14, 2022 to Present</b>	

A copy of the Chain of Title is provided in Appendix C.

## 4.1.5 Environmental Reports

Englobe reviewed the following environmental reports when preparing this Phase I ESA report:

### 4.1.5.1 DST Consulting Engineers Inc. September 2021. "Phase I and II Environmental Site Assessment, 1531 St. Laurent Boulevard, Ottawa, Ontario". Reference No. 02105693.000.

DST Consulting Engineers Inc. (now Englobe) completed a Phase I and II ESA at the subject property in 2021. The following potential environmental concerns were identified by the Phase I ESA:

- Existing and historical presence of retail fuel outlet and automotive repairs at 1515 St. Laurent Boulevard (approximately 25 m north of the Site);
- Historical presence of gas bar and fuel oil depot at 1499 St. Laurent Boulevard (approximately 80 m north of the Site);
- Historical presence of oil dealer and underground oil tanks at 1560 St. Laurent Boulevard (approximately 40 m south of the Site);
- Existing and historical presence of automotive repair garage at numerous properties to the north, east and south of the Site, within the Phase I study area;
- Historical diesel fuel spill at the intersection of St. Laurent Boulevard and Belfast Road (approximately 25 m northwest of the Site); and
- Existing bus depot, USTs and historical spills at 1500 St. Laurent Boulevard (approximately 60 m northwest of the Site).

Based on the results of the Phase I ESA, a Phase II ESA was recommended in order to address the above-noted potential environmental concerns.

The Phase II ESA portion of the assessment was conducted in order to investigate the above-noted PCAs and to confirm the presence or absence of potential contaminants of concern within the soil and groundwater on Site.

The field investigation consisted of the following activities:

- The advancement of four exterior boreholes (MW1-21 through MW4-21) instrumented with groundwater monitoring wells at strategic locations on Site. Boreholes MW1-21 and MW2-21 were advanced along the northern Site boundary, within the parking lot. MW3-21 and MW4-21 were advanced close to the southern Site boundary, in the western and eastern portion of the Site, respectively; and
- The collection of soil and groundwater samples from the advanced boreholes/ monitoring wells, for laboratory analysis of petroleum hydrocarbon fractions F1 - F4 (PHCs F1 - F4) and volatile organic compounds (VOCs).

Soil and groundwater analytical results were compared against applicable provincial standards, as set out in the following document:

- Ontario Ministry of the Environment, Conservation and Parks (MECP) "Soil, Groundwater and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act", April 15, 2011. Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Groundwater Condition. Industrial/Commercial/Community Property Use for soil (coarse textured soils) and All Types of Property Use for groundwater.

Based on the laboratory analytical soil results, the following exceedances of the applicable MECP Table 3 standards were detected in the collected soil samples:

- Concentrations of ethylbenzene, total xylenes, PHC F1 and PHC F2 in the soil sample collected from MW1-21 exceeded their respective applicable MECP Table 3 standards.

Concentrations of all other analyzed parameters in the collected soil samples were below their respective MECP Table 3 standards.

Based on the laboratory analytical groundwater results, all collected groundwater samples met the applicable MECP Table 3 standards for PHCs F1 - F4 and VOCs.

Further to the completion of the Phase I and II ESAs, the assessment identified impacts to the soil quality at borehole location MW1-21, which is located to the north of the building footprint. The subject impacts at this borehole location were likely attributed to off-Site sources potentially linked to one or more of the previously noted PCAs within the Phase I Study Area.

It was inferred that existing soils to the north of the Site building, up to the northern property boundary, contain impacts above the applicable MECP Table 3 standards, from a depth of approximately 1.0 metres below ground surface (m bgs) to 3.0 m bgs. Further investigation was recommended to the south and east of borehole location MW1-21 in order to confirm the horizontal and vertical extents of the soil impacts in the vicinity of the subject borehole location.

Based on a review of the analytical data, no further exceedances were noted when compared to the future applicable MECP Table associated with the intended land use (i.e., Table 3 SCS for Residential Land Uses).

#### 4.1.5.2 Englobe Corp. February 2022. "Supplemental Investigation, 1531 St. Laurent Boulevard, Ottawa, Ontario". Reference No. 02105693.001.

Englobe conducted a supplemental investigation into the environmental conditions at the property to delineate the horizontal and vertical impacts to the soil quality at MW1-21, located in the northern portion of the Site.

The field investigation consisted of the following activities:

- The advancement of two exterior boreholes (MW22-01 and MW22-02) and one interior borehole (MW22-03), instrumented with groundwater monitoring wells, at strategic locations on Site. Borehole MW22-01 was advanced in the northwestern portion of the parking lot, located to the east of the Site building and southeast of MW1-21. MW22-02 was advanced along the northern Site boundary, within the parking lot located to the west of the Site building, and west of MW1-21. MW22-03 was advanced in the central basement of the Site building; and
- The collection of soil and groundwater samples from the advanced boreholes/ monitoring wells, for laboratory analysis of PHCs F1 - F4 and benzene, toluene, ethylbenzene, and xylene (BTEX) compounds.

Soil and groundwater analytical results were compared against applicable provincial standards as set out in the following document:

- Ontario Ministry of the Environment, Conservation and Parks (MECP) "Soil, Groundwater and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act", April 15, 2011. Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Groundwater Condition. Industrial/Commercial/Community Property Use for soil (coarse textured soils) and All Types of Property Use for groundwater.

Based on the laboratory analytical soil results, none of the samples collected during this investigation exceeded the applicable MECP Table 3 standards for PHCs F1 - F4 and BTEX.

Based on a review of the analytical data, no further exceedances were noted when compared to the future applicable MECP Table associated with the intended land use (i.e., Table 3 SCS for Residential Land Uses), with the exception of the soil sample collected at MW22-02 SS4 (sampled on January 24, 2022). In this sample, concentrations of PHC F2 (180 ug/g) exceed the Table 3 SCS for Residential Land Uses (standard of 98 ug/g).

Based on the above, PHC impacted soil appears to be limited to the vicinity of MW1-21 and MW22-02. All other test locations on Site met the applicable standards for soils and groundwater quality.

Copies of the previous environmental reports noted above are provided in Appendix J.

## 4.2 Environmental Source Information

Environmental information for the Site was obtained from the sources described in the sub-sections below. Distances provided relative to the Site are approximations. Locations of records with respect to local topography relative to the Site are also inferred.

### 4.2.1 ERIS Database Report

ERIS was retained by Englobe to complete a search of federal, provincial and private databases for environmental information regarding the Site and properties within the Phase I Study Area.

In total, there were four records found for the Site and 334 records found for surrounding properties in the Phase I Study Area. The following table is a summary of the pertinent results of the database search as they relate to potential impacts to the environmental condition of the soil and groundwater at the Site.

**Table 4.2.1. Summary of ERIS database search results**

Name/Location	Approximate Distance from the Site	Details
Belfast Street to St. Laurent Boulevard	20 m west	One SPL record related to a trail of diesel spill over 3-4 kilometers (km) of road from a bus hose leak in 1999.
Intersection of Belfast Rd. & St. Laurent Boulevard	20 m northwest	One SPL record relating to 100 L release of diesel fuel to road/sewer in November 2003. Soil contamination was listed as “possible” in the record.
		One SPL record relating to a motor oil spill of unknown volume to the catch basin in 2019.
1555 St. Laurent Boulevard	20 m southeast	Two GEN records indicate the address was listed as a waste generator of light fuels in 2012 and 2013.
1550 Triole Street	25 m southeast	One AUWR record indicates the address was listed in the automobile wrecking and supplies inventory.  Two GEN records indicate the address was listed as a waste generator of petroleum distillates in the years 1992-1998 and of an unknown waste class in 1990.
1515 St. Laurent Boulevard	25 m north	Three PRT records indicate the address had registered retail fuel storage tanks and/or was registered as a retail fuel outlet.  Seven RST records indicate the address was listed as a retail fuel outlet location under the names of Class A Service Centre 1994 Ltd., Sunys Petroleum Inc., Sunyos Energy Inc., Sunlight Oil Ltd., Fast Lube, and Ottawa Imports. Listed details include service station and oil change/lubrication service.  Two GEN database record indicates the address was registered as a waste generator of light fuels from 2007-2008. Additionally, the address was listed as a waste generator in 2004, although no waste class information was provided.  One FSTH record database identifies four USTs on Site installed in 1992, with a combined capacity of 113,500 L.

Name/Location	Approximate Distance from the Site	Details
		<p>One AUWR record indicates the address was listed in the automobile wrecking and supplies inventory under Sunlight Oil Ltd.</p> <p>14 DTNK records relating to once found and previously removed fuel storage tanks at the property. Additionally, one DTNK record relates to a historic propane tank at the property and one DTNK record relates to the active retail fuel outlet at the property.</p> <p>Seven FST records relate to the installation of 2 X 45,400 L steel single walled diesel UST and 3 X 22,700 L steel single walled gasoline USTs in 1992, in addition to 2 X 50,000 L double walled fiberglass gasoline USTs and 1 X 20,000 L double walled fiberglass diesel UST in May 2009 (MacEwen Petroleum Inc.)</p>
1520B Triole Street	55 m north	Three GEN records indicate the address was listed as a waste generator of petroleum distillates, halogenated solvents, and waste oils/lubricants from 1989 to 1998.
1520 Triole Street	55 m north	One SCT record indicates the address was listed under Scott's Manufacturing Directory, related to millwork and sawmills (Logos End Inc.). The plant was established in 1997.
1038 Belfast Road	65 m east-northeast	<p>One AUWR record indicates the address was listed in the automobile wrecking and supplies inventory under Belfast Auto Recycling and Garage.</p> <p>14 PES records indicate the address has historically and is currently listed as an operator in the pesticide vendor database.</p> <p>Six GEN database records indicate the address was listed as a waste generator of light fuels in from 2007-2009 and of waste crankcase oils and lubricants in from 2020-2022.</p>
1045 Belfast Road	85 m northeast	One GEN database record indicates the address was listed as a waste generator of aromatic solvents from 1997-2001.
1043 Belfast Road	90 m northeast	Three RST records indicate the address was registered under headcode 00921430 for oil changes & lubrication service.
1575 St. Laurent Boulevard (formerly 1560 Triole Street)	80 m southeast	<p>One AUWR record indicates the address was listed in the automobile wrecking and supplies inventory under Performance Auto Centre.</p> <p>One SPL record relates to a building fire; however, no detailed spill information is provided.</p> <p>One SPL record indicates an oil spill of unknown quantity occurred to a gravel parking lot in 1997. Soil contamination is listed as possible.</p> <p>One GEN record indicates the address was listed as a waste generator of alkaline wastes/other metals, paint/pigment/coating residues, petroleum distillates, waste oils/lubricants, waster compressed gasses, acid waste/heavy metals, and alkaline wastes/heavy metals.</p>
Belfast Road west of Michael Street	90 m east-northeast	One SPL record indicates that a spill of 55 kilograms (kg) of gear lubricant to the road occurred in 1988.
1547 Triole Street / 1547 Lagan Way	105 m east-southeast	17 GEN record indicates that the address was listed as a waste generator of petroleum distillates, waste oils/lubricants, aliphatic solvents, oil skimmings/sludges, light fuels, from 1986-2018.

Name/Location	Approximate Distance from the Site	Details
		Three GEN records indicate the address was listed as a waste generator of petroleum distillates, waste crankcase oils/lubricants, light fuels, and waste oils/sludges from 2020-2022.
1010 Belfast Road	110 m west-southwest	One SCT record indicates the address was listed under Scott's Manufacturing Directory related to commercial printing. The plan was reportedly established in 1979 (Pro Printers Inc.).  One GEN record indicates the address was listed as a waste generator of pathological wastes in 2022.
1516 Michael Street	125 m east-northeast	One SPL record relates to a spill of oil (unknown volume) to the catch basin in 2009. Environmental impact is listed as confirmed.
1550 Michael Street	140 m east	Two PRT records relating to the presence of a UST with a capacity of 2,600 L. The record is listed with an expiry date of 1995.  Three GEN database records indicate the address was listed a waste generator of petroleum distillates and waste oils/lubricants in from 1898-1998.
2311 Shore Street	150 m north	Four GEN database records indicate the address was listed as a waste generator of petroleum distillates and waste oils/lubricants between 1986 and 1998.
1556 Michael Street	150 m east	Eight GEN database records indicate the address was listed as a waste generator of alkaline wastes/other metals, paint/pigment/coating residues, aromatic solvents, oil skimmings/sludges, petroleum distillates, waste oils/lubricants, and emulsified oils between 2007-2012.
1485 Triole Street	155 m north	One SCT record indicates the address was listed under Scott's Manufacturing Directory related to heating equipment and commercial refrigeration equipment manufacturing lighting fixture manufacturing, switchgear/switchboard and relay/industrial control apparatus manufacturing, other electrical equipment manufacturing, and electrical wiring/construction supplies wholesaler.
2321 Shore Street	160 m north-northwest	One CA record indicates that an addition to a garage (Nayel Automotive Inc.) will be made.
Belfast Street and Michael Street	170 m east-northeast	One SPL record indicates a spill related to a leaking transformer occurred in in 1988.
Belfast Street and Michael Street OC Transpo Garage	170 m east-northeast	One SPL record indicates a 9000 L spill of diesel occurred to the ditch from an OC Transpo Garage in 1988.
1508 Michael Street	170 m northeast	Four GEN records indicate the address was listed as a waste generator of light fuels, petroleum distillates, and waste oils/lubricants from 1986 to 1998.  One DTNK records indicates a previous propane tank/refill centre was located at the property.
1506 Michael Street	175 m northeast	Four GEN database records indicate the address was listed as a waste generator of petroleum distillates and waste oils/lubricants from 1988 to 2001, related to commercial printing.
1534 Michael Street	180 east-northeast	One SCT record indicates the address was listed under Scott's Manufacturing Directory related to metal window and door manufacturing in 1998.

Name/Location	Approximate Distance from the Site	Details
1477 Triolet Street	195 m north	Two AUWR records indicate the address was listed in the automobile wrecking and supplies inventory under Performance Auto Centre.
1555 Michael Street	210 m east	Four GEN records indicate the address was listed as a waste generator of waste oils/sludges and waste crankcase oils/lubricants from 2018 and 2020-2022.
1485 St. Laurent Boulevard	210 m northwest	Six GEN records indicate the address was listed as a waste generator of petroleum distillates, waste oils/lubricants, aliphatic solvents, aromatic solvents, light fuels, in 2018 and from 2020-2022.
1500 Michael Street	210 m north-northeast	Four GEN records indicate the address was listed as a waste generator of petroleum distillates from 2002-2004, 2016, 2018, and 2020-2022.
1533 Michael Street	210 m east-northeast	Three SCT records indicate the address was listed under Scott's Manufacturing Directory related to other textile product mills in 1996.
1580 Michael Street	215 m east-southeast	One SCT record indicates the address was listed under Scott's Manufacturing Directory related to other ornamental and architectural metal product manufacturing in 1996. Two WDS records indicate the address was listed as a waste transfer site (Cannon Hygiene Canada Ltd.) for hygiene product waste in 2009, 2012, and 2017. Six GEN database records indicate the address was registered as a waste generator of pathological waste from 2013-2016 and 2018-2019.
1551 Michael Street	220 m east-northeast	Two SCT records indicate the address was listed under Scott's Manufacturing Directory related to fabricated pipe and pipe fittings, service industry machinery, laboratory apparatus and furniture, sheet metal work, metal stampings, other ornamental and architectural metal product manufacturing, other misc. fabricated metal product manufacturing, commercial and service industry machinery manufacturing, and institutional furniture manufacturing in 1946. The plant size is listed as 20,000 people. Six GEN records indicate the address was listed as a waste generator of inert inorganic wastes, petroleum distillates, oil skimmings/sludges, other specified inorganics, and waste crankcase oils/lubricants from 1990-2006, 2016, 2018, and 2020-2022.
1569 Michael Street	225 m east	Two GEN records indicate the address was listed as a waste generator of paint/pigment/coating residues, petroleum distillates, oil skimmings/sludges, waste oils/lubricants, and organic laboratory chemicals from 2005-2009.
1515 Michael Street	180 m east	Four PRT records indicate the address had registered retail fuel storage tanks and/or was registered as a retail fuel outlet (Ryder Truck Rental Canada Ltd.). One SPL record relates to a spill of 50L of diesel to concrete in 1996. Environmental impact is listed as not anticipated. One SPL record relates to a spill of 50L of oil to the ground in 2002. Soil contamination is listed as possible.

Name/Location	Approximate Distance from the Site	Details
		<p>21 GEN records indicate the address was registered as a waste generator of for aromatic solvents, aliphatic solvents, petroleum distillates, light fuels, oil skimmings &amp; sludges, organic laboratory chemicals, and waste oils &amp; lubricants between 1986 and 2022.</p> <p>One SPL record indicates a 30L spills of diesel to the ground occurred in 2011. Surface water pollution is listed as confirmed.</p> <p>Three FSTH records indicate the property operated as a private fuel outlet, identifying three various diesel and gasoline USTs.</p> <p>Four FST records indicate that 1 X 50,000 L steel double walled horizontal gasoline AST was installed in 2014 and that 2 X 45,460 single walled USTs (1 gasoline and 2 diesel) were installed in 2009.</p> <p>Six DTNK records indicate a previous fuel outlet and underground tanks at the property.</p>
940 Belfast Road	240 m west-southwest	<p>Three SCT records indicate the address was listed under Scott's Manufacturing Directory related to printing and writing paper as well as software publishers in 1980 and 1999.</p> <p>Two GEN records indicate the address was listed as a waste generator of unknown waste in 2011 (Freeman Company) and of PCBs in 2021 (Richelieu Hardware Canada Ltd.)</p>
1541 Michael Street	242 m east-northeast	<p>Three SCT records indicate the address was listed under Scott's Manufacturing Directory related to cut stone and stone products, all other non-metallic mineral product manufacturing, and pottery/ceramics/plumbing fixture manufacturing in 2000.</p> <p>Three GEN records indicate the address was listed as a waste generator of inert organic wastes in 2009, 2020, and 2014.</p>

SPL = Ontario Spills Database

GEN = Ontario Regulation 347/07 Waste Generators Summary

AUWR = Automobile Wrecking & Supplies Database

PRT = Private and Retail Fuel Storage Tank Database

RST = Retail Fuel Outlet Database

FSTH = Historic Fuel Storage Tank Database

DTNK = Delisted Fuel Tank Database

SCT = Scott's Manufacturing Directory

PES = Pesticide Registry

CA = Certificate of Approval

WDS = Waste Disposal Site Inventory

FST = Fuel Storage Tank Database

Note: Any spills ≤25 L are considered small and localized in nature and have not been identified as PCAs in this report.

A copy of the ERIS report is provided in Appendix D.

## 4.2.2 City Directory Information

The city directory search provides the names of businesses/tenants that were operating at certain municipal addresses at one point in time. They do not provide details as to the activities at the properties.

Englobe retained ERIS to conduct a city directory search for the Site and various properties within the Phase I Study Area. City directory results were provided for years 1994-1996, 1999-2001, 2004-2006, and 2009/2010.

The results are summarized in the table below.

**Table 4.2.2 City directory search summary**

Address	Approximate Distance from the Site	Years Listed	Listings
1531 St. Laurent Boulevard	On Site	1994-1996, 1999-2001, 2004-2006, 2009/2010	-Robbie's Italian Restaurant
		1959-1961, 1964-1966, 1969-1971, 1974-1976, 1979-1982	-Husband Transport
		1954-1957, 1984-1986	-Not listed
1555 St. Laurent Boulevard	Adjacent to the Site from the south	2009/2010	-Bisan Auto Centre -Cool Heat -Sports Action 2000
		2004-2006	-Bisan Auto Centre -Be Cool Heat -Sports Action 2000 -Kander Auto Repair
		1999-2001	-Sports Action
		1994-1996	-Performance Mazda Collision Center
		1989-1990	-St. Laurent Collision Centre
		1959-1961, 1964-1966, 1969-1971, 1974-1976, 1979-1982, 1984-1986	-Not listed
1520 St. Laurent Boulevard	40 m west of the Site	1959-1961, 1964-1966, 1969-1971, 1974-1976, 1979-1982, 1994-1996, 1999-2001, 2004 - 2006, 2009/2010	-Not Listed
1515 St. Laurent Boulevard	25 m north of the Site	2009/2010	-MacEwen Petroleum -Castrol Oil Distribution -Residential (1 Tenant)
		2004-2006	-Lube Express -Fast Lube -Suny's Energy Inc. -Castrol Oil Distributors -Sunlight Oil Ltd -Valvoline Oil Distributors
		1999-2001	-Castrol Oil Distributors -Sunlight Oil Ltd -Valvoline Oil Distributors
		1994-1996	-Castrol Oil Distributors -Sunlight Oil Ltd -Valvoline Oil Distributors -Class A Service Centre
		1988 - 1990	-Rick's Esso Station -Sunlight Oil Ltd -Class A Service Centre
		1984-1986	-Rick's Esso Station -Sunlight Oil Ltd -Cansave Service Station

Address	Approximate Distance from the Site	Years Listed	Listings
		1964-1966, 1969-1971, 1974-1976, 1979-1982	-Sunlight Oil Ltd
		1954-1957, 1959-1961,	-Not Listed
1038 Belfast Rd	20 m east of the Site	2009/2010	-Belfast Auto Recycling Inc.
		2004-2006	-Belfast Auto Recycling Inc. -Federal Heating & Air Conditioning -Nutri Lawn
		1964-1966, 1969-1971, 1974-1976, 1999-2001	-Federal Heating & Air Conditioning
		1994-1996	-Federal Heating & Air Conditioning -Delta Motor Sales -Residential (1 Tenant)
		1984-1986, 1989-1990	-Federal Heating & Air Conditioning -Asplundhm Utility Services
		1979-1982	-Federal Heating & Air Conditioning -R&A Recreational Vehicles
		1959-1961	-Pinnacle Construction Ltd
		1954-1956	-Not Listed

A copy of the city directory results is included in Appendix E.

#### 4.2.3 MECP Inventory of Coal Gasification Waste Plants in Ontario

A review of the MECP's Inventory of Coal Gasification Plant Waste Sites in Ontario (April 1987) revealed that the Site has not been used for the gasification of coal. No coal gasification plants were identified within the Phase I Study Area.

#### 4.2.4 MECP Inventory of Industrial Sites Producing Tars and Related Tars in Ontario

A review of the MECP's Inventory of Industrial Sites Producing Coal Tars and Related Tars in Ontario (November 1988) revealed that the production and use of coal or other tars has not taken place at the Site or the surrounding properties within the Phase I Study Area.

#### 4.2.5 MECP Inventory of PCB Sites in Ontario

The 1991 and 1995 Inventories of polychlorinated biphenyl (PCB) Storage Sites in Ontario indicate that the Site has not been used for PCB storage. Additionally, no PCB storage sites were identified within the Phase I Study Area.

## 4.2.6 MECP Waste Disposal Site Inventory

Englobe reviewed the 1991 Waste Disposal Site Inventory. Results indicate that the Site was not previously used as a waste disposal site, and that there are no previous waste disposal sites in the Phase I Study Area.

## 4.2.7 Intera Former Industrial Sites

Englobe reviewed the Intera map of Former Industrial Sites (1998) in the Ottawa Area. There were no historical waste disposal sites identified within the Phase I Study Area.

## 4.2.8 City Of Ottawa Old Landfill Management Strategy Report

Englobe reviewed the Golder Associates Old Landfill Management Strategy Phase I Report. This report identifies old landfill Sites in the City of Ottawa. No old landfill sites were identified within the Phase I Study Area.

## 4.2.9 Environment and Climate Change Canada

Englobe submitted a request to Environment and Climate Change Canada (ECCC) under the *Access to Information Act*, to provide available information related to environmental concerns (general correspondence, occurrence reports, abatement), orders, tanks (ASTs/USTs), spills, investigations/prosecutions (with owner/tenant information), and waste generator number/classes. A response was not received as of the issuance date of this report. If the search results affect the conclusions of this report, an addendum to the report will be issued.

## 4.2.10 Ministry of the Environment, Conservation, and Parks

The Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information (FOI) office was contacted for information on the Site, such as past or existing environmental permits, existing environmental orders, fuel storage tanks, or any other environmentally related information. A response was not received as of the issuance date of this report. If the search results affect the conclusions of this report, an addendum to the report will be issued. As outlined in DST's previous Phase I ESA report, no records were found for the Site at that time.

## 4.2.11 City of Ottawa Historic Land Use Inventory

Englobe submitted a request to the City of Ottawa for Historical Land Use Inventory (HLUI) information for the Site and properties within the Phase I Study Area in 2021. As outlined in DST's previous Phase I ESA report, no records were found for the Site at that time. A copy of the response is provided in Appendix F.

## 4.2.12 Technical Safety and Standards Association

The Technical Safety and Standards Association (TSSA) Fuel Handling Division is responsible for records regarding licensing of fuel handling facilities in Ontario. The TSSA was contacted for any information with respect to environmental concerns, which could include past or existing environmental spills, information on fuel tanks, or any other related environmental information at the Site and adjacent properties located at the Site. A response was not received as of the issuance date of this report. If the search results affect the conclusions of this report, an addendum to the report will be issued.

## 4.3 Physical Setting Sources

Aerial photographs, as well as soil, bedrock geology, and topography maps were reviewed for information pertaining to the physical setting of the Site. A description of the results for each record reviewed is provided below.

### 4.3.1 Aerial Photographs

Aerial photographs can provide an indication of historical land uses with respect to the Site and surrounding properties. 19 aerial photographs were obtained from the City of Ottawa GeoOttawa website and as provided by ERIS, for the years 1933, 1946, 1958, 1965, 1976, 1991, 1999, 2002, 2005, 2007, 2008, 2009, 2011, 2014, 2015, 2017, 2019, and 2022.

The following table summarizes the observed features of the Site and surrounding properties within the Phase I Study Area for each aerial photograph.

**Table 4.3.1 Summary of aerial photographs.**

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
1933	Agricultural lands	<u>North:</u> Agricultural lands followed by what appears to be grouping of residential or agricultural structures. <u>East:</u> Agricultural lands. <u>South:</u> Agricultural lands. <u>West:</u> St. Laurent Boulevard followed by agricultural lands.
1946	Similar to the 1933 aerial photograph.	<u>North:</u> Similar to the 1933 aerial photograph. <u>East:</u> Similar to the 1933 aerial photograph. <u>West:</u> Similar to the 1933 aerial photograph. <u>South:</u> Similar to the 1933 aerial photograph.
1953	Similar to the 1946 aerial photograph.	<u>North:</u> Some development of assumed residential/agricultural structures. <u>East:</u> Similar to the 1946 aerial photograph. <u>South:</u> Some development of assumed residential/agricultural structures. <u>West:</u> Similar to the 1946 aerial photograph.
1958	A commercial-style building is present on Site.	<u>North:</u> Belfast Rd., followed by a number of commercial and residential buildings present along Shore Street, Lagan Way and St. Laurent Blvd. To the northeast, a railway line is visible. <u>East:</u> Lagan Way, followed by residential dwellings, commercial buildings, and agricultural fields followed by Michael Street. <u>South:</u> One dwelling is present on the property located approximately 40 m south of the Site, followed by undeveloped agricultural fields and railways. <u>West:</u> St. Laurent Blvd., followed by undeveloped lands and railway lines.
1965	The building noted in the 1958 aerial photographs remains on Site. Several vehicles and trucks are visible in the western portion of the Site, and a number of storage containers are present in the central portion of the Site.	<u>North:</u> More structures have been added to these properties. A large commercial-style building is now visible on the property north of the Site (across Belfast Rd.), and a gas bar is present further north (at 1499 St. Laurent Blvd.). OC Transpo now visible northwest of the Site. <u>East:</u> Most of the properties have additional structures added. <u>South:</u> Two large buildings (similar in configuration to the current existing buildings) have been constructed on the adjacent property.

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
		<u>West:</u> Water features, suspected to be small drainage ponds, are now present along the railway.
1976	The land around the building on Site now appears to have been paved.	<p><u>North:</u> The gas bar noted at 1499 St Laurent Blvd. in the 1965 aerial photograph has been removed and replaced with a commercial plaza building. Most of the properties to the north now have paved parking lots. Additional structures have been added. The OC Transpo depot to the northwest has been expanded.</p> <p><u>East:</u> Several large structures with paved parking lots have been constructed to the east.</p> <p><u>South:</u> New structures appear to have been developed.</p> <p><u>West:</u> Several structures to the west have been constructed along Belfast Rd, north of the railway.</p>
1991	The former Site building appears to have been demolished and replaced with the current Site building. The storage containers formerly present at the Site are no longer visible and the parking lot appears to have been recently re-paved and painted.	<p><u>North:</u> The property to the north of the Site (1515 St. Laurent Blvd.) appears to have been converted to a retail fuel outlet as several pump islands are now visible on the property.</p> <p><u>East:</u> Similar to the 1976 aerial photograph.</p> <p><u>South:</u> A commercial building has been constructed on Newmarket St, to the southeast of the Site.</p> <p><u>West:</u> The structure along St. Laurent and Belfast has a new parking lot.</p>
1999	Similar to the 1991 aerial photograph	<p><u>North:</u> Similar to the 1991 aerial photograph.</p> <p><u>East:</u> Similar to the 1991 aerial photograph.</p> <p><u>South:</u> Similar to the 1991 aerial photograph.</p> <p><u>West:</u> The lands to the west of the bus depot have been developed with additional structures and a parking lot.</p>
2002	Similar to the 1999 aerial photograph	<p><u>North:</u> Similar to the 1999 aerial photograph.</p> <p><u>East:</u> Similar to the 1999 aerial photograph.</p> <p><u>South:</u> Similar to the 1999 aerial photograph.</p> <p><u>West:</u> Similar to the 1999 aerial photograph.</p>
2005	Similar to the 2002 aerial photograph	<p><u>North:</u> Similar to the 2002 aerial photograph.</p> <p><u>East:</u> Similar to the 2002 aerial photograph.</p> <p><u>South:</u> Similar to the 2002 aerial photograph.</p> <p><u>West:</u> Similar to the 2002 aerial photograph.</p>
2007	Similar to 2005 aerial photograph	<p><u>North:</u> Similar to the 2005 aerial photograph.</p> <p><u>East:</u> Similar to the 2005 aerial photograph.</p> <p><u>South:</u> Similar to the 2005 aerial photograph.</p> <p><u>West:</u> Similar to the 2005 aerial photograph.</p>
2008	Similar to 2007 aerial photograph	<p><u>North:</u> Similar to the 2007 aerial photograph.</p> <p><u>East:</u> Similar to the 2007 aerial photograph.</p> <p><u>South:</u> Similar to the 2007 aerial photograph. Railway lines to the south no longer visible.</p> <p><u>West:</u> Similar to the 2007 aerial photograph.</p>
2009	Similar to 2008 aerial photograph	<p><u>North:</u> Similar to the 2008 aerial photograph.</p> <p><u>East:</u> Similar to the 2008 aerial photograph.</p> <p><u>South:</u> Similar to the 2008 aerial photograph.</p> <p><u>West:</u> Similar to the 2008 aerial photograph.</p>
2011	Similar to 2009 aerial photograph	<p><u>North:</u> Similar to the 2009 aerial photograph.</p> <p><u>East:</u> Similar to the 2009 aerial photograph.</p> <p><u>South:</u> Similar to the 2009 aerial photograph.</p> <p><u>West:</u> Similar to the 2009 aerial photograph.</p>

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
2014	Similar to 2011 aerial photograph	<u>North</u> : Similar to the 2011 aerial photograph. <u>East</u> : Similar to the 2011 aerial photograph. <u>South</u> : Similar to the 2011 aerial photograph. <u>West</u> : Similar to the 2011 aerial photograph.
2015	Similar to the 2014 aerial photograph	<u>North</u> : Similar to the 2014 aerial photograph. <u>East</u> : Similar to the 2014 aerial photograph. <u>South</u> : Similar to the 2014 aerial photograph, with some additional development and excavation performed on a property to the south (at 1599 St. Laurent Blvd.) <u>West</u> : Similar to the 2014 aerial photograph.
2017	Similar to the 2015 aerial photograph	<u>North</u> : Similar to the 2015 aerial photograph. <u>East</u> : Similar to the 2015 aerial photograph. <u>South</u> : Lagan Way has been extended, and a commercial building has been built to the south (at 1599 St. Laurent Blvd.), with a paved parking lot. <u>West</u> : Similar to the 2015 aerial photograph.
2019	Similar to 2017 aerial photograph.	<u>North</u> : Similar to the 2017 aerial photograph. <u>East</u> : Similar to the 2017 aerial photograph. <u>South</u> : Similar to the 2017 aerial photograph. <u>West</u> : Similar to the 2017 aerial photograph.
2022	Similar to 2019 aerial photograph.	<u>North</u> : Similar to the 2019 aerial photograph. <u>East</u> : Similar to the 2019 aerial photograph. <u>South</u> : Similar to the 2019 aerial photograph. <u>West</u> : Similar to the 2019 aerial photograph.

A copy of the reviewed aerial photographs are provided in Appendix G.

### 4.3.2 Topography, Hydrology, and Geology

Englobe reviewed available maps to determine Site and surrounding features, such as local geology, topography, hydrogeology and locations of nearby watercourses. The maps reviewed and a description of the noted Site and surrounding property features are described in the table below.

**Table 4.3.2 Summary of maps reviewed**

Map Title	Source	Site and Surrounding Property Features
Natural Heritage Areas	Ministry of Natural Resources and Forestry, 2020	The Site is located at an approximate elevation of 67-68 m above sea level (m asl).  The nearest surface waterbody to the Site is the Rideau River, which is approximately 1.7 km east of the Site.  There are no mapped Areas of Natural and Scientific Interest (ANSIs) or wetlands within the Phase I Study Area.
OGS Earth Bedrock Geology	Ministry of Northern Development and Mines, 2014a	The bedrock geology in the Phase I Study Area consists of Shale, limestone, dolostone, siltstone of the Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member.

Map Title	Source	Site and Surrounding Property Features
OGS Physiographic Region	Ministry of Northern Development and Mines, 2000	The site is located within the physiographic region of Southern Ontario known as the Clay Plains (Chapman and Putnam, 1984).

### 4.3.3 Fill Materials

There is no evidence of fill materials at the Site at this time.

### 4.3.4 Water Bodies, Areas of Natural Significance, & Groundwater Information

The nearest surface waterbody to the Site is the Rideau River, which is approximately 1.7 km east of the Site. There are no mapped ANSIs or wetlands within the Phase I Study Area. The surrounding properties within the Phase I Study Area appear to be serviced by municipal water. The Site does not appear to have any water servicing in place at the time of Englobe’s assessment.

### 4.3.5 Well Records

A search of the Water Well Information System (WWIS) database completed in the ERIS database report yielded 21 well records within the Phase I Study Area. 19 of these well records related to monitoring/observation/test wells and 2 related to domestic water supply wells installed in 1953. It should be noted that based on the current site conditions and municipal underground water supply system, it is inferred that the two historic domestic water supply wells are no longer in use.

Based on a review of the two previous reports (as outlined in Section 4.1.5 above), up to seven monitoring wells are located on Site (MW1-21 through MW4-21 and MW22-01 through MW22-03). Based on a review of the stratigraphic borehole logs from the advanced boreholes on Site, the underlying stratigraphy can be generally characterized as a fill material underlain by clayey sand underlain by clay to the depth of the advanced boreholes. The depth to groundwater in the previously advanced monitoring wells on Site ranges from 0.24 to 2.26 m bgs.

Specific details related to soil stratigraphy can be found on the borehole logs provided in Appendix J of the previous reports.

## 4.4 On-Site Operating Records

No Site operating records were made available for Englobe’s review.

# 5 Interview

An interview questionnaire prepared by Englobe was completed by Tanya Chowieri, a representative of the current property owner. Relevant information provided via the interview questionnaire is summarized below:

- The Site building is currently vacant; however, previously operated as an Italian restaurant;

- The on-Site building is planned for demolition and plans for redevelopment are underway;
- Surrounding property uses include automotive garages and a fuel outlet;
- Several boreholes exist on Site from previous environmental investigations; and
- There have been no reported spills, tanks or hazardous materials on Site.

## 6 Site Reconnaissance

### 6.1 General Requirements

The findings documented in this Section are based on observations made by Englobe's Site Assessor, Colette Robitaille during the Site Reconnaissance (Qualifications of Assessors are included in Appendix I). The Site reconnaissance began at 1 pm on May 31, 2023 and was approximately two hours in duration. Weather conditions at the time were sunny, with a temperature of approximately 20°C. No operations were ongoing nor were any tenants or buildings noted on Site during the Site reconnaissance.

Figures depicting the Site are presented in Appendix A. Select photographs taken during the Site reconnaissance are included in Appendix H.

### 6.2 Specific Observations at the Phase I Property

#### 6.2.1 Description of the Phase I Property

The Site is located at 1531 St, Laurent Boulevard, Ottawa, ON. It is located in an area zoned as AM - Arterial Mainstreet Zone. The Site consists of a rectangular shaped parcel of land that covers an area of approximately 4,966 m<sup>2</sup>. It is developed with a double-storey, single-tenant commercial building, with one basement level, and an asphalt parking lot.

Refer to Figure 1 in Appendix A for a Site Location Map.

#### 6.2.2 Description of Structures and Other Improvements

One building (2 storeys tall in addition to one basement level below grade), with a footprint area of approximately 650 m<sup>2</sup>, was vacant at the time of Englobe's assessment but was previously occupied by a restaurant (Robbie's Italian Restaurant). The building contained kitchen areas, dining areas, bar areas, washrooms, office spaces, and maintenance rooms.

#### 6.2.3 Description of Below-Ground Structures

No other confirmed below-ground structures were observed at the Phase I Property at the time of Englobe's Site reconnaissance. The one basement level of the on-Site was observed to have primarily concrete, carpet, or tile flooring and generally consisted of dry-walled, open stud, or tiled walls. The basement level included a kitchen area, banquet hall area, bar, washrooms, and various storage rooms (i.e., electrical room, locker room, change room, storage room, etc.).

## **6.2.4 Details of Fuel Storage Tanks**

No fuel storage tanks were observed at the Site at the time of Englobe's Site reconnaissance.

## **6.2.5 Potable and Non-Potable Water Sources**

The Site is serviced by municipal water through the City of Ottawa's distribution system.

## **6.2.6 Underground Utility and Service Corridors**

Public and private utility locates were not completed as part of this Phase I ESA. Based on the Site characteristics, previous reports, and utility markings visible on Site at the time of Englobe's Site reconnaissance, it is assumed that the Site is currently serviced by underground utilities for municipal water, sewer, natural gas, electricity, and communications.

## **6.2.7 Features of Structures and Buildings**

### **6.2.7.1 Description of Entry and Exit Points**

The main entrance to the on-Site building is on the west side of the building with additional entrances on the north and east sides of the Site building.

### **6.2.7.2 Heating and Cooling Systems**

A forced air natural gas furnace and several rooftop cooling units were observed during Englobe's Site reconnaissance.

### **6.2.7.3 Drains, Pits, and Sumps**

Drains throughout the interior of the building were noted in various locations of the building (i.e., upper and lower floor washrooms and kitchen areas, lower electrical room, etc.) although the discharge location of these drains was unknown by the Site representative and could not be confirmed. A sump pit and pump were observed in the basement level of the building in the electrical room.

### **6.2.7.4 Unidentified Substances**

No unidentified substances were observed at the Phase I Property at the time of Englobe's Site reconnaissance.

### **6.2.7.5 Chemical Storage**

No bulk chemical storage was observed at the Phase I Property at the time of Englobe's Site reconnaissance. Generic household cleaning supplies were observed in various areas of the building.

### **6.2.7.6 Stains or Corrosion**

No significant stains or corrosion was observed at the Phase I Property at the time of Englobe's Site reconnaissance. Minor staining that appeared to be caused by water was apparent in several areas along the floor, wall and ceiling. Minor soot/grease staining along the walls was noted in the kitchen areas.

## **6.2.8 Wells**

Five monitoring wells were observed at the Phase I Property at the time of Englobe's Site reconnaissance (i.e., MW1-21 through MW4-21, MW22-02, and MW22-03). MW22-01 was not observed; however, it may have been obstructed by vehicles parking in the area.

## **6.2.9 Sewage Works**

The Site is serviced by the City of Ottawa's sanitary sewer system.

## **6.2.10 Solid Wastes**

Minor amounts of gathered solid wastes were observed at the Phase I Property at the time of Englobe's Site reconnaissance in the rear of the building in the location of the historic dumpsters. It is understood that at this time the Site does not routinely generate solid waste.

## **6.2.11 Liquid Industrial Wastes**

No liquid industrial wastes were observed at the Phase I Property at the time of Englobe's Site reconnaissance. It is understood that at this time, the Site does not routinely generate liquid waste.

## **6.2.12 Air Emissions**

No sources of air emissions were observed at the Phase I Property at the time of Englobe's Site reconnaissance

## **6.2.13 Ground Surface**

The ground surface was noted to be generally flat and consisted of primarily asphalt-covered parking areas, a patio seating area, and small landscaped areas.

## **6.2.14 Railway Lines or Spurs**

No railway lines or spurs were observed at the Phase I Property at the time of Englobe's Site Reconnaissance.

## **6.2.15 Stained Soil**

No stained soil was observed at the Phase I Property at the time of Englobe's Site Reconnaissance.

## **6.2.16 Stressed Vegetation**

No stressed vegetation was observed at the Phase I Property at the time of Englobe's Site reconnaissance.

## **6.2.17 Fill and Debris Materials**

No evidence of imported fill or debris was observed at the Phase I Property at the time of Englobe's Site reconnaissance.

## 6.2.18 Designated Substances and Special Attention Items

Eleven designated substances are regulated by the Ministry of Labour (MOL) under the Occupational Health and Safety Act (OHSA) through the development of designated substance regulations that control worker exposure to designated substances. The designated substances identified in OHSA include *acrylonitrile, arsenic, asbestos, benzene, coke oven emissions, ethylene oxide, isocyanates, lead, mercury, silica, and vinyl chloride*. Guidelines have been developed for building projects such as renovations, construction, and demolition where designated substances may be disturbed. The following sub-sections also address selected Special Attention Items including lead and/or lead-based paints, mercury, asbestos-containing material, PCBs, and radiation.

It should be noted that a Designated Substance and Hazardous Materials Survey (DSHMS) was not conducted as part of this Phase I ESA.

### 6.2.18.1 Lead and/or Lead-Containing Paint

Lead may be present in a variety of building materials and is commonly associated with paints, the solder material associated with pipe plumbing, ceramic tile glazing, and mechanical equipment due to its ability to resist corrosion. Exposure to lead may cause lead poisoning and is considered to be a human health risk. The historic use of lead-containing paints (LCPs) is a source of exposure through ingesting peeling or flaking paints and/or routine contact with painted surfaces containing lead. Regulations have been established that limit worker exposure to lead, and guidelines have been published with work procedures to be followed when performing work that generates airborne lead-containing dust.

Based on the construction date of the building (new building constructed 1991), it is unlikely that lead-based materials have been utilized in the on-Site structures.

### 6.2.18.2 Mercury

Liquid mercury is commonly associated with mechanical equipment such as thermostats, thermometers, barometers, pressure gauges, and electrical switches. A small amount of mercury is present in fluorescent light tubes and compact fluorescent light bulbs. Removal of materials suspected to contain mercury should be conducted in accordance with “The Safe Handling of Mercury: A Guide for the Construction Industry”.

Fluorescent light tubes were observed throughout the Site building during the Site Reconnaissance. Any mercury-containing items should be appropriately disposed of if/when removed off-Site.

### 6.2.18.3 Asbestos-Containing Materials

Asbestos is a naturally occurring fibrous mineral that has been widely used historically due to physical properties that, amongst other things, allow asbestos to withstand high temperatures. Asbestos-containing materials (ACMs) have been used in a number of building products including, but not limited to thermal and electrical insulation, floor and ceiling tiles, and plaster.

Asbestos is used in two forms termed friable and non-friable. Friable asbestos refers to materials that contain asbestos fibres in a formulation that is soft enough to be crushed by hand pressure alone, which allows for the release of the fibres upon disturbance. Non-friable asbestos-containing material refers to materials that contain a binding agent (such as tar or cement), which results in a “hard” material that requires considerable force before asbestos fibres are released. Exposure to asbestos has been linked to a number of respiratory conditions including asbestosis, lung cancer, and mesothelioma.

Based on the construction date of the building (new building constructed 1991), it is unlikely that asbestos-containing materials have been utilized in the on-Site structures.

#### 6.2.18.4 Polychlorinated Biphenyls

Polychlorinated Biphenyl (PCB) - containing dielectric fluid (Askarel) was used extensively for insulating and cooling electrical equipment such as transformers, capacitors, and fluorescent light ballasts, from the late 1920s to the mid-1970s. In 1977, the Canadian government enacted a set of chlorobiphenyl regulations that limited the use of PCBs. As such, the only allowable use of PCBs in Canada is in electrical transformers and capacitors existing in Canada before July 1, 1980, and certain other “closed use” equipment (specifically heat transfer equipment, hydraulic equipment, and vapour diffusion pumps) that were in Canada before September 1, 1977 (Hilborn and Buccini, 1998).

PCBs are commonly found within electrical ballasts manufactured before 1981, within fluorescent light fixtures and high-intensity discharge (HID) lamps. Light fixtures with T12 lamps are more likely to contain ballasts that were manufactured before 1981. T8 lamps are associated with light fixtures that were manufactured after the phase-out of PCB-containing ballasts. The letter “T” denotes the shape of the light fixture (e.g., tubular) and the number which follows indicates the diameter in eighths of an inch.

Fluorescent light tubes were observed throughout the Site building during the Site Reconnaissance. A transformer was noted at the rear of the building along the Belfast Roadway portion of the property; however, there was no indication that the transformer was PCB containing.

### 6.3 Phase I Study Area Observations

Properties in the Phase I Study Area were observed from publicly accessible areas and from within the Site boundaries. Surrounding property uses primarily include commercial and industrial properties.

### 6.4 Potentially Contaminating Activities

PCAs identified from the Site Reconnaissance have been identified in Table 7.2 below.

## 7 Review and Evaluation of Information

### 7.1 Current and Past Uses

Based on the O. Reg. 153/04 (as amended) definition of “first developed use” and available information, the Site was first developed between 1954 and 1958. A building is visible on Site in the 1958 aerial photograph, but the Site address is not listed in the 1954 city directory. The subject building is identified as an office building and transport warehouse in the 1963 Fire Insurance Plan.

**Table 7.1 Table of current and past uses**

Year	Name of owner	Description of property use	Property use	Other observations from aerial photographs, fire insurance plans, etc.
Prior to 1835	Crown	Vacant	Agricultural or Other Use	Based on chain of title, aerial photographs, and city directories.
1835 to 1959	Various individuals and businesses	Undetermined	Agricultural or Other Use	Based on chain of title, aerial photographs, and city directories.
1959 to 1981	Husband Transport Ltd.	Trucking	Commercial	Based on chain of title, aerial photographs, and city directories.
1981 to 2022	Various businesses	Misc. Businesses	Commercial	Based on chain of title, aerial photographs, and city directories.
2022 to Present	13802434 Canada Inc.	Vacant Operations	Commercial (most recent)	<b>Based on chain of title, aerial photographs, and city directories.</b>

## 7.2 Potentially Contaminating Activities

The presence of PCAs in the Phase I Study Area does not necessarily indicate that the soil and groundwater at the Site are affected by these contaminants. This depends on individual use of best management practices at the locations of the PCAs and the location of any contamination relative to the Site (i.e., on Site, up-gradient or down-gradient).

The following table summarizes the identified PCAs within the Phase I Study Area and at the Phase I Property.

**Table 7.2. Summary of PCAs**

PCA No.	Potentially Contaminating Activity (PCA)			Location of PCA			Source of Information	Potentially Impacted Media (Groundwater, Soil and/or Sediment)	Considered an APEC (Yes/No)
	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities	On/Off Site	Proximity to Site (m) (approximate)	Relative Direction to the Site			
1	Undefined No. 1. Known soil contamination	1531 St. Laurent Boulevard	Known soil contamination on Site in vicinity of MW1-21 and MW22-02	On Site	NA	NA	Previous Reports	Soil	Yes
2	52. Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems	1531 St. Laurent Boulevard	Husband Transport historically operated on Site	On Site	NA	NA	FIPs, City Directories	Soil and Groundwater	Yes
3	Undefined No. 2. Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	1531 St. Laurent Boulevard	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	NA	NA	Aerials, Site Recon	Soil and Groundwater	Yes
4	28. Gasoline and Associated Products Storage in Fixed Tanks	1531 St. Laurent Boulevard	Diesel and gasoline UST records associated with Husband Transport	On Site	NA	NA	HLUI	Soil and Groundwater	Yes
5	28. Gasoline and Associated Products	1515 St. Laurent Boulevard	Retail fuel outlet	Off Site	25	NE	ERIS, City Directories, Site Recon, HLUI	Soil and Groundwater	Yes

PCA No.	Potentially Contaminating Activity (PCA)			Location of PCA			Source of Information	Potentially Impacted Media (Groundwater, Soil and/or Sediment)	Considered an APEC (Yes/No)
	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities	On/Off Site	Proximity to Site (m) (approximate)	Relative Direction to the Site			
	Storage in Fixed Tanks								
6	49. Salvage Yard, including automobile wrecking	1515 St. Laurent Boulevard	Automobile wrecking inventory record	Off Site	25	NE	ERIS, City Directories	Soil and Groundwater	Yes
7	10. Commercial Autobody Shop	1515 St. Laurent Boulevard	Sunlight Oil and Auto Parts with tanks	Off Site	25	NE	ERIS, City Directories, Site Recon, HLUI	Soil and Groundwater	Yes
8	Undefined No. 3. - Auto Sales	1515 St. Laurent Boulevard	Lancaster Auto Sales (bulk/long term vehicle storage)	Off Site	25	NE	ERIS, City Directories, Site Recon, HLUI	Soil and Groundwater	Yes
9	45. Pulp, Paper and Paperboard Manufacturing and Processing	1520 Triole Street (currently Lagan Way)	Millwork and sawmill (Logos End Inc.)	Off Site	55	N	ERIS	Groundwater	No
10	19. Electronic and Computer Equipment Manufacturing	1520/1550 Triole Street (currently Lagan Way)	Canada Computer Power Cables (manufacturing)	Off Site	55	N	HLUI	Groundwater	No
11	10. Commercial Autobody Shop	1520/1550 Triole Street (currently Lagan Way)	Automobile repair shop	Off Site	55	N	HLUI	Groundwater	No

	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities	On/Off Site	Proximity to Site (m) (approximate)	Relative Direction to the Site			
		Michael Street	the road occurred in 1988						
87	Undefined No. 14 - Spill	Belfast Street and Michael Street	Spill related to a leaking transformer in 1988	Off Site	170	ENE	ERIS	Groundwater	No
88	Undefined No. 15 - Spill	Belfast Street and Michael Street	9,000 L spill of diesel occurred to the ditch from an OC Transpo Garage in 1988	Off Site	170	ENE	ERIS	Groundwater	No
89	46. Rail Yards, Tracks and Spurs	1660/1661 St Laurent Boulevard	Historic railway lines	Off Site	215	S	Aerial Photographs	Groundwater	No
90	46. Rail Yards, Tracks and Spurs	2865B Walkley Road	Railway lines	Off Site	240	NE	Aerial Photographs	Groundwater	No

Based on the nature of the above-noted PCAs, their proximity to the Site, and the local topography, all PCAs, with the exception of PCA No. 1-8, 57-62, 67-69, 84-85, are unlikely to pose a potential environmental concern at the Site.

## 7.3 Areas of Potential Environmental Concern

Based on the findings of this Phase I ESA, there are 19 APECs identified at the Site. The following table summarizes the APECs identified on Site (Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04). These APECs were identified based on the available information at the time of preparation of this Phase I ESA report only.

**Table 7.3. Summary of APEC.**

PCA						APEC			
PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	PCA Proximity to Site (m)	PCA Relative Direction to the Site	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
1	Undefined No. 1. Known soil contamination	On Site	Known soil contamination on Site in vicinity of MW1-21 and MW22-02	NA	NA	1	North central/western portion	PHCs F1-F4 / BTEX	Soil
2	52. Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems	On Site	Husband Transport historically operated on Site	NA	NA	2	Entire Site	PHCs F1-F4 / BTEX	Soil and Groundwater
3	Undefined No. 2. Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	NA	NA	3 <sup>1</sup>	Entire Site	Na, Cl, EC, SAR	Soil and Groundwater
4	28. Gasoline and Associated Products Storage in Fixed Tanks	On Site	Diesel and gasoline UST records associated with Husband Transport	NA	NA	4	Entire Site	PHCs F1-F4 / BTEX	Soil and Groundwater
5	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Retail fuel outlet	25	NE	5	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
6	49. Salvage Yard, including automobile wrecking	Off Site	Automobile wrecking inventory record	25	NE	6	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater

PCA						APEC

59	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Diesel and gasoline UST records	65	ENE	11	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
60	10. Commercial Autobody Shop	Off Site	Beaver Construction Garage	105	ESE	12	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
61	Undefined No. 10 - Equipment Maintenance	Off Site	Dickie Moore Rental with garage bay doors - equipment servicing inferred	105	ESE	13	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
62	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Dominion Building Materials Ltd. with UST	105	ESE	14	Eastern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
67	28. Gasoline and Associated Products Storage in Fixed Tanks	Off Site	Fleetway Aluminum Manufacturing Co. and Ottawa Automotive Warehousing Ltd.	1	S	15	Southern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater

PCA						APEC			
PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	PCA Proximity to Site (m)	PCA Relative Direction to the Site	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
68	10. Commercial Autobody Shop	Off Site	RPM Motorworks/Bison Auto Centre	1	S	16	Southern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
69	49. Salvage Yard, including automobile wrecking	Off Site	Automobile wrecking inventory record	1	S	17	Southern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
84	Undefined No. 11 - Spill	Off Site	Trail of diesel spill over 3-4 kilometers (km) of road from a bus hose leak in 1999	10	N	18	Northern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater
85	Undefined No. 12 - Spill	Off Site	100 L release of diesel fuel to road/sewer in November 2003 and Motor oil spill of unknown volume to the catch basin in 2019	20	NW	19	Northwestern portion of the property	PHCs F1-F4 / BTEX	Soil and Groundwater

<sup>1</sup> Road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both; thus, it is the QP's opinion that this PCA and associated APEC are exempted, and no soil and groundwater samples must be collected and submitted for laboratory analyses for related parameters.

## 7.4 Phase I Conceptual Site Model

The illustrative requirements, according to O. Reg. 153/04, of the Phase I Conceptual Site Model (CSM) are shown on Figures 1 through 4 provided in Appendix A. These figures identify the locations of the water bodies, roads, the uses of properties adjacent to the Site, the location of PCAs within the Phase I Study Area and any applicable APECs at the Site. The PCAs and evaluation of any APECs are discussed in Sections 7.2 and 7.3 above.

**Table 7.4 Summary of Phase I Conceptual Site Model Requirements.**

O. Reg. 153/04 Schedule D (Part VI) Table 1 Requirement	Phase I ESA Findings / Details
Show any existing buildings and structures	One building (2 storeys tall with one basement level below grade) with a footprint area of approximately 650 m <sup>2</sup> was vacant at the time of Englobe's assessment but was previously occupied by a restaurant (Robbie's Italian Restaurant). The location of the Site is shown on Figure 1, in Appendix A.
Identify and locate water bodies located in whole or in part on the Phase I Study Area	The nearest surface waterbody to the Site is the Rideau River, which is approximately 1.7 km east of the Site.
Identify and locate any areas of natural significance located in whole or in part on the Phase I Study Area	There are no mapped ANSIs or wetlands within the Phase I Study Area.
Locate any drinking water wells at the Phase I Property	A search of the Water Well Information System (WWIS) database completed in the ERIS database report yielded 21 well records within the Phase I Study Area. 19 of these well records related to monitoring/observation/test wells and 2 related to domestic water supply wells installed in 1953. It should be noted that based on the current site conditions and municipal underground water supply system, it is inferred that the two historic domestic water supply wells are no longer in use.  Based on a review of the two previous reports (as outlined in Section 4.1.5 above), up to seven monitoring wells are located on Site (MW1-21 through MW4-21 and MW22-01 through MW22-03). Based on a review of the stratigraphic borehole logs from the advanced boreholes on Site, the underlying stratigraphy can be generally characterized as a fill material underlain by clayey sand underlain by clay to the depth of the advanced boreholes.
Show roads, including names, within the Phase I Study Area	The Site is bordered to the north Belfast Road, to the west by St Laurent Boulevard, and to the East by Lagan Way.
Show uses of properties adjacent to the Phase I Property	Surrounding property uses primarily include commercial and industrial properties
Identify and locate areas where any PCA has occurred and show tanks in such areas.	Seven PCAs as outlined in table 7.2 above were identified in the Phase I Study Area.
Identify and locate any APECs	One APEC, as outlined in table 7.3, above was identified on Site.
Describe and assess any areas where potentially contaminating activity on or potentially affecting the Phase I Property has occurred.	Based on the PCAs and resulting APECs at the Site, media potentially impacted includes soil and groundwater.
Describe and assess any contaminants of potential environmental concern	Based on the identified APECs on Site, the following contaminants of potential environmental concern have been identified in the soil and/or groundwater: EC, SAR, Na, Cl, PHCs BTEX.
Describe and assess the potential for underground utilities, if any present, to affect contaminant distribution and transport	Public and private utility locates were not completed as part of this Phase I ESA. Based on the Site characteristics, previous reports, and utility markings visible on Site at the time of Englobe's site reconnaissance, it is assumed that the Site is currently serviced by underground utilities for municipal water, sewer, natural gas, electricity, and communications.

O. Reg. 153/04 Schedule D (Part VI) Table 1 Requirement	Phase I ESA Findings / Details
Describe and assess available regional or site specific geological and hydrogeological information	The bedrock geology in the Phase I Study Area consists of Shale, limestone, dolostone, siltstone of the Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member. The site is located within the physiographic region of Southern Ontario known as the Clay Plains (Chapman and Putnam, 1984).
Describe and assess how any uncertainty or absence of information obtained in each of the components of the Phase I ESA could affect the validity of the model.	All FOI requests from ECCC, the MECP, and the TSSA have not been received as of the issuance date of this report. At this time, no absence of information is expected to alter the conclusions of this report.
If the exemption set out in paragraph 1, 1.1 or 2 of section 49.1 of the regulation is being relied upon, document the rationale for relying upon the exemption, which may be based on information gathered during one or more of the records review, interviews and site reconnaissance.	<p>It is highly possible that the application of road salt or de-icing substances along the Phase One Property driveway and parking area has occurred during the winter seasons. This represents an environmental concern to the Phase One Property. However, as road salt and de-icing substances on the driveway and parking area was applied for the purposes of keeping these areas safe for traffic and pedestrians under conditions of snow or ice or both, exemptions for potential road salt and/or de-icing substance impacts to the Phase One Property, provided for under Paragraph 1 of Section 49.1 of O. Reg. 153/04, as amended, apply.</p> <p>Englobe intends to rely upon the exemption set out in Paragraph 1 of Section 49.1 of O. Reg. 153/04, as amended, to exempt road salt and/or de-icing substance impacts to the Phase One Property in the area of the driveway and parking area, specific to impacts of electrical conductivity and SAR, in soil, and sodium and chloride, in groundwater.</p> <p>Englobe does not intend to rely upon the exemption set out in Paragraph 1.1 or 2 of Section 49.1 of O. Reg. 153/04, as amended, as Englobe is not aware of any previously identified exceedances at the Site to which this exemption would apply.</p>
If there is an intention to rely upon the exemption set out in paragraph 3 of section 49.1 of the regulation, set out the intention to rely upon the exemption and provide a brief explanation as to why the exemption may apply, which may be based on information gathered during one or more of the records review, interviews and site reconnaissance.	Englobe does not intend to rely upon the exemption set out in Paragraph 3 of Section 49.1 of O. Reg. 153/04, as amended, as Englobe is not aware of any previously identified exceedances at the Site to which this exemption would apply.

This report was prepared based on the available information at the time of preparation of this Phase I ESA report only.

# 8 Conclusions and Recommendations

Based on the information obtained as part of this Phase I ESA, 19 APECs were identified at the Site. However, based on a review of historical environmental investigations completed at the Site (i.e., DST Consulting Engineers Inc., September 2021; and Englobe, February 2022), all APECs requiring investigation appear to have been fully investigated as part of the previous environmental investigations.

It is recommended that PHC-impacted soils in the vicinity of MW1-21 and MW22-02 be excavated from the Site and disposed of at an MECP-licensed waste disposal facility during the planned construction/ Site development activities. Additional delineation may be warranted at the time to delineate the previously-confirmed PHC impacts in soil, to attempt to minimize soil disposal costs for the building construction project and/or to fully remediate the contaminated soils on Site, as required. Any excess soils shall be handled in accordance with O. Reg. 406/19, at the time of Site development.

Additionally, it is recommended that any monitoring wells no longer in use be abandoned within 180 days of their installation date, in accordance with O. Reg. 903: Wells (as amended).

# 11 Statement of Limitations

This report (hereinafter, the “Report”) was prepared by Englobe Corp. (herein the “Company”) and is provided for the sole exclusive use and benefit of KATASA Groupe + Développement (the “Client”). Ownership in and copyright for the contents of the Report belong to the Company.

No other person is authorized to rely on, use, copy, duplicate, reproduce, or disseminate this Report, in whole or in part and for any reason whatsoever, without the express prior written consent of the Company. Any person using this Report, other than the person(s) to whom it is directly addressed, does so entirely at its own risk. The Company assumes no responsibility or liability in connection with decisions made or actions taken based on the Report, or the observations and/or comments contained within the Report. Others with interest in the site and/or subject matter of this Report should undertake their own investigations and studies to determine how or if they or their plans could be affected.

This Report should be considered in its entirety; selecting specific portions of the Report may result in the misinterpretation of the content.

The work performed by the Company was carried out in accordance with the terms and conditions specified in the Professional Services Agreement between the Company and the Client, in accordance with currently accepted engineering standards and practices and in a manner consistent with the level of skill, care and competence ordinarily exercised by members of the same profession currently practicing under similar conditions and like circumstances in the same jurisdiction in which the services were provided. Standards, guidelines, and practices may change over time; those which were applied to produce this Report may be obsolete or unacceptable at a later date.

The findings, recommendations, suggestions, or opinions expressed in this Report reflect the Company’s best professional judgement based on observations and/or information reasonably available at the time the work was performed, as appropriate for the scope, work schedule and budgetary constraints established by the Client. No other warranty or representation, expressed or implied, is included in this Report including, but not limited to, that the Report deals with all issues potentially applicable to the site and/or that the Report deals with any and all of the important features of the Site, except as expressly provided in the scope of work.

This report has been prepared for the specific site, development, building, design or building assessment objectives and/or purposes that were described to the Company by the Client. The applicability and reliability of the content of this Report, subject to the limitations provided herein, are only valid to the extent that there has been no material alteration or variation thereto, and the Company expressly disclaims any obligation to update the Report. However, the Company reserves the right to amend or supplement this Report based on additional information, documentation or evidence made available to it.

*The Company makes no representation concerning the legal significance of its findings, nor as to the present or future value of the property, or its fitness for a particular purpose and hereby disclaims any responsibility or liability for consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.*

Since the passage of time, natural occurrences, and direct or indirect human intervention may affect the views, conclusions, and recommendations (if any) provided in the Report, it is intended for immediate use.

This Statement of Limitations forms an integral part of the Report.

In preparing this Report, the Company has relied in good faith on information provided by others and has assumed that such information is factual, accurate, and complete. The Company accepts no responsibility or liability for any deficiency, misstatement, or inaccuracy in this Report resulting from the information provided, concealed, or not fully disclosed by those individuals.

The conclusions presented herein are based on information gathered from a limited historical review of readily available geological, historical, and regulatory information and a field inspection program. Sampling and analysis of soil, ground water, or any other material was not carried out as part of this assessment. Consequently, the presence and/or extent of any adverse environmental impact cannot be verified. The potential for environmental liability and/or environmental impact is an opinion that has been arrived at within the scope of this assessment.

Any description of the site and its physical setting documented in this Report is presented for informational purposes only, to provide the reader a better understanding of the site and scope of work. Any topographic benchmarks and elevations are primarily to establish relative elevation differences between sampling locations and should not be used for other purposes such as grading, excavation, planning, development, or similar purposes.

Any contractors or others bidding on or undertaking contractual work to be performed as part of the project who may come into possession of or learn of this Report or its content are to rely on their own interpretations of the data contained in this Report, in addition to their own investigations and conclusions as to how their work may be affected.

Potentially Contaminating Activity (PCA)			
PCA No.	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities
1	Undefined No. 1. Known soil contamination	1531 St. Laurent Boulevard	Known soil contamination on Site in vicinity of MW1-21 and MW22-02
2	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	1531 St. Laurent Boulevard	Husband Transport historically operated on Site
3	Undefined No. 2. Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	1531 St. Laurent Boulevard	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic
4	28. Gasoline and Associated Products Storage in Fixed Tanks	1531 St. Laurent Boulevard	Diesel and gasoline UST records associated with Husband Transport
5	28. Gasoline and Associated Products Storage in Fixed Tanks	1515 St. Laurent Boulevard	Retail fuel outlet
6	49. Salvage Yard, including automobile wrecking	1515 St. Laurent Boulevard	Automobile wrecking inventory record
7	10. Commercial Autobody Shop	1515 St. Laurent Boulevard	Sunlight Oil and Auto Parts with tanks
8	Undefined No. 3. - Auto Sales	1515 St. Laurent Boulevard	Lancaster Auto Sales (bulk/long term vehicle storage)
9	45. Pulp, Paper and Paperboard Manufacturing and Processing	1520 Triolet Street (currently Lagan Way)	Millwork and sawmill (Logos End Inc.)
10	19. Electronic and Computer Equipment Manufacturing	1520/1550 Triolet Street (currently Lagan Way)	Canada Computer Power Cables (manufacturing)
11	10. Commercial Autobody Shop	1520/1550 Triolet Street (currently Lagan Way)	Automobile repair shop
12	28. Gasoline and Associated Products Storage in Fixed Tanks	1499 St. Laurent Boulevard	Historic Retail fuel outlet with USTs and Fuel Oil Depot
13	10. Commercial Autobody Shop	2321 Shore Street	Automobile repair shop
14	10. Commercial Autobody Shop	2310/2311 Shore Road	Garage and truck storage building
15	28. Gasoline and Associated Products Storage in Fixed Tanks	2310/2311 Shore Road	UST associated with garage and truck storage building and fuel oil depot
16	Undefined No. 4. - Auto Sales	1496 Lagan Way	Savy Car Sales and AF7 Auto Inc. (bulk/long term vehicle storage)
17	Undefined No. 5. - Auto Sales	1486 Lagan Way	Auto Sales (bulk/long term vehicle storage)
18	49. Salvage Yard, including automobile wrecking	1477 Lagan Way	Automobile wrecking inventory record
19	10. Commercial Autobody Shop	1477/1475 Lagan Way	Automobile repair shop
20	10. Commercial Autobody Shop	1475 Lagan Way	Automobile repair shop
21	28. Gasoline and Associated Products Storage in Fixed Tanks	1485 Lagan Way	UST Record
22	10. Commercial Autobody Shop	1485 Lagan Way	Allard's and Allstar Collision Centre
23	10. Commercial Autobody Shop	1515 Lagan Way	Kings Auto
24	10. Commercial Autobody Shop	1521 Lagan Way	Omar Motors
25	10. Commercial Autobody Shop	1039 Belfast Road	Automobile repair shop
26	28. Gasoline and Associated Products Storage in Fixed Tanks	1039 Belfast Road	UST Record
27	32. Iron and Steel Manufacturing and Processing	1039 Belfast Road	Concrete column Clamps Ltd. Fracassi Iron Works
28	10. Commercial Autobody Shop	1043/1047 Belfast Road	Automobile repair shops
29	Undefined No. 6. - Auto Sales	1520 Belfast Road	Auto Sales (bulk/long term vehicle storage)
30	10. Commercial Autobody Shop	1508 Michael Street	Automobile repair shop
31	Undefined No. 7 - Spill	1516 /1508 Michael Street	Oil spill (unknown volume) to the catch basin in 2009
32	31. Ink Manufacturing, Processing and Bulk Storage	1506 / 1508 Michael Street	Historic commercial printing
33	Undefined No. 8. - Auto Sales	1506 / 1508 Michael Street	Auto Sales (bulk/long term vehicle storage)
34	10. Commercial Autobody Shop	1504 Michael Street	Automobile repair shop
35	Undefined No. 8. - Auto Sales	1504 Michael Street	Auto Sales (bulk/long term vehicle storage)

Potentially Contaminating Activity (PCA)			
PCA No.	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities
36	Undefined No. 10 - Spills	1515 Michael Street	50 L spill of diesel to concrete in 1996, 50 L spill of oil to the ground in 2002, and 30 L spill of diesel to the ground occurred in 2011.
37	28. Gasoline and Associated Products Storage in Fixed Tanks	1515 Michael Street	Fuel outlet serviced by ASTs and USTs
38	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	1515 Michael Street	Truck Transport Industries (Ryder Truck Rental Company)
39	10. Commercial Autobody Shop	1525 Michael Street	Automobile repair shop
40	32. Iron and Steel Manufacturing and Processing	1551 Michael Street	Dominion Iron & Welding Works
41	34. Metal Fabrication	1551 /1537 / 1534 Michael Street	Metal product manufacturing
42	33. Metal Treatment, Coating, Plating and Finishing	1551 / 1537 / 1534 Michael Street	Metal product manufacturing
43	10. Commercial Autobody Shop	1551 /1543 Michael Street	Automobile repair shop
44	54. Textile Manufacturing and Processing	1533 /1551 Michael Street	SCT records related to other textile product mills in 1996
45	12. Concrete, Cement and Lime Manufacturing	1541 /1551 Michael Street	Cut stone and stone products, all other non-metallic mineral product manufacturing, and pottery/ceramics/plumbing fixture manufacturing
46	31. Ink Manufacturing, Processing and Bulk Storage	1551 Michael Street	Cora commercial printing
47	39. Paints Manufacturing, Processing and Bulk Storage	1580 Michael Street	MF Paint shop
48	34. Metal Fabrication	1580 Michael Street	SCT record related to other ornamental and architectural metal product manufacturing in 1996
49	33. Metal Treatment, Coating, Plating and Finishing	1580 Michael Street	SCT record related to other ornamental and architectural metal product manufacturing in 1996
50	58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	1580 Michael Street	WDS records indicate the address was listed as a waste transfer site (Cannon Hygiene Canada Ltd.) for hygiene product waste in 2009, 2012, and 2017
51	10. Commercial Autobody Shop	1556 Michael Street	Potential former automobile repair shop
52	37. Operation of Dry Cleaning Equipment (where chemicals are used)	1550 Michael Street	Therien Rug Cleaners Ltd.
53	10. Commercial Autobody Shop	1550 Michael Street	Automobile repair shop
54	28. Gasoline and Associated Products Storage in Fixed Tanks	1550 Michael Street	Records of USTs
55	Undefined No.9. - Auto Sales	1550 Michael Street	Auto Sales (bulk/long term vehicle storage)
56	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	1038 Belfast Road	Pesticide vendor and bulk storage
57	49. Salvage Yard, including automobile wrecking	1038 Belfast Road	Automobile wrecking inventory record
58	10. Commercial Autobody Shop	1038 / 1045Belfast Road	Automobile repair shop
59	28. Gasoline and Associated Products Storage in Fixed Tanks	1038 Belfast Road	Diesel and gasoline UST records
60	10. Commercial Autobody Shop	1547 Lagan Way	Beaver Construction Garage
61	Undefined No. 10 - Equipment Maintenance	1547 Lagan Way	Dickie Moore Rental with garage bay doors - equipment servicing inferred
62	28. Gasoline and Associated Products Storage in Fixed Tanks	1547 Lagan Way	Dominion Building Materials Ltd. with UST
63	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	1599 Lagan Way	Apex Motor Express
64	10. Commercial Autobody Shop	1575 /1560 St. Laurent Boulevard	Automobile repair shop
65	49. Salvage Yard, including automobile wrecking	1575 /1560 St. Laurent Boulevard	Automobile wrecking inventory record
66	Undefined No. 11 - Spill	1575 /1560 St. Laurent Boulevard	Oil spill of unknown quantity occurred to a gravel parking lot in 1997

Potentially Contaminating Activity (PCA)			
PCA No.	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities
67	28. Gasoline and Associated Products Storage in Fixed Tanks	1555/1557 St. Laurent Boulevard	Fleetway Aluminum Manufacturing Co. and Ottawa Automotive Warehousing Ltd.
68	10. Commercial Autobody Shop	1555/1557 St. Laurent Boulevard / 1550 Lagan Way	RPM Motorworks/Bison Auto Centre
69	49. Salvage Yard, including automobile wrecking	1555/1557 St. Laurent Boulevard / 1550 Lagan Way	Automobile wrecking inventory record
70	28. Gasoline and Associated Products Storage in Fixed Tanks	1475 Lagan Way	UST Record
71	19. Electronic and Computer Equipment Manufacturing	1475 Lagan Way	SCT record related to heating equipment and commercial refrigeration equipment manufacturing lighting fixture manufacturing, switchgear/switchboard and relay/industrial control apparatus manufacturing, and other electrical equipment manufacturing
72	31. Ink Manufacturing, Processing and Bulk Storage	1000/1010 Belfast Road	Historic commercial printing
73	28. Gasoline and Associated Products Storage in Fixed Tanks	1000/1010 Belfast Road	UST records associated with gasoline service station
74	31. Ink Manufacturing, Processing and Bulk Storage	940 Belfast Road	SCT records indicate historic commercial printing operations
75	37. Operation of Dry Cleaning Equipment (where chemicals are used)	920 Belfast Road	Parker Cleaner laundry/cleaner
76	28. Gasoline and Associated Products Storage in Fixed Tanks	1500 St Laurent Boulevard	Large bus storage and associated USTs at 1500A and 1500B St. Laurent Boulevard
77	39. Paints Manufacturing, Processing and Bulk Storage	1500 St Laurent Boulevard	Paint shop with spray booth and paint storage
78	10. Commercial Autobody Shop	1500 St Laurent Boulevard	Pits/hoists
79	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	1500 St Laurent Boulevard	OC Transpo Service Centre/Storage Location
80	31. Ink Manufacturing, Processing and Bulk Storage	1604 Michael Street	Historic Commercial Printing
81	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	1604 Michael Street	Truck transport industries (D&M Tilt25 N Load)
82	37. Operation of Dry Cleaning Equipment (where chemicals are used)	1470 Lagans Way	Sears carpet/upholstery cleaning
83	28. Gasoline and Associated Products Storage in Fixed Tanks	1571 St. Laurent Boulevard (now 1560 Lagan)	D. Grandmaitre Ltd. (oil dealer) with 13 USTs
84	Undefined No. 11 - Spill	Belfast Street to St. Laurent Boulevard	Trail of diesel spill over 3-4 kilometers (km) of road from a bus hose leak in 1999
85	Undefined No. 12 - Spill	Intersection of Belfast Rd. & St. Laurent Boulevard	100 L release of diesel fuel to road/sewer in November 2003 and Motor oil spill of unknown volume to the catch basin in 2019
86	Undefined No. 13 - Spill	Belfast Road west of Michael Street	Spill of 55 kilograms (kg) of gear lubricant to the road occurred in 1988
87	Undefined No. 14 - Spill	Belfast Street and Michael Street	Spill related to a leaking transformer in 1988
88	Undefined No. 15 - Spill	Belfast Street and Michael Street	9,000 L spill of diesel occurred to the ditch from an OC Transpo Garage in 1988
89	46. Rail Yards, Tracks and Spurs	1660/1661 St Laurent Boulevard	Historic railway lines
90	46. Rail Yards, Tracks and Spurs	2865B Walkley Road	Railway lines

PART OF LOTS 40, 41, 53 & 54 REGISTERED PLAN 63 CITY OF OTTAWA

FARLEY, SMITH & DENIS SURVEYING LTD. 2022

Scale 1: 250

Metric Note

Distances on this plan are in metres and can be converted to feet by dividing by 0.3048.

Bearing Note

Bearings hereon are grid bearings derived from the Can-Net Real Time Network and are referred to the Central Meridian of MTM Zone 9 (76°30' West Longitude) Nad-83 (Original).

Elevation Notes

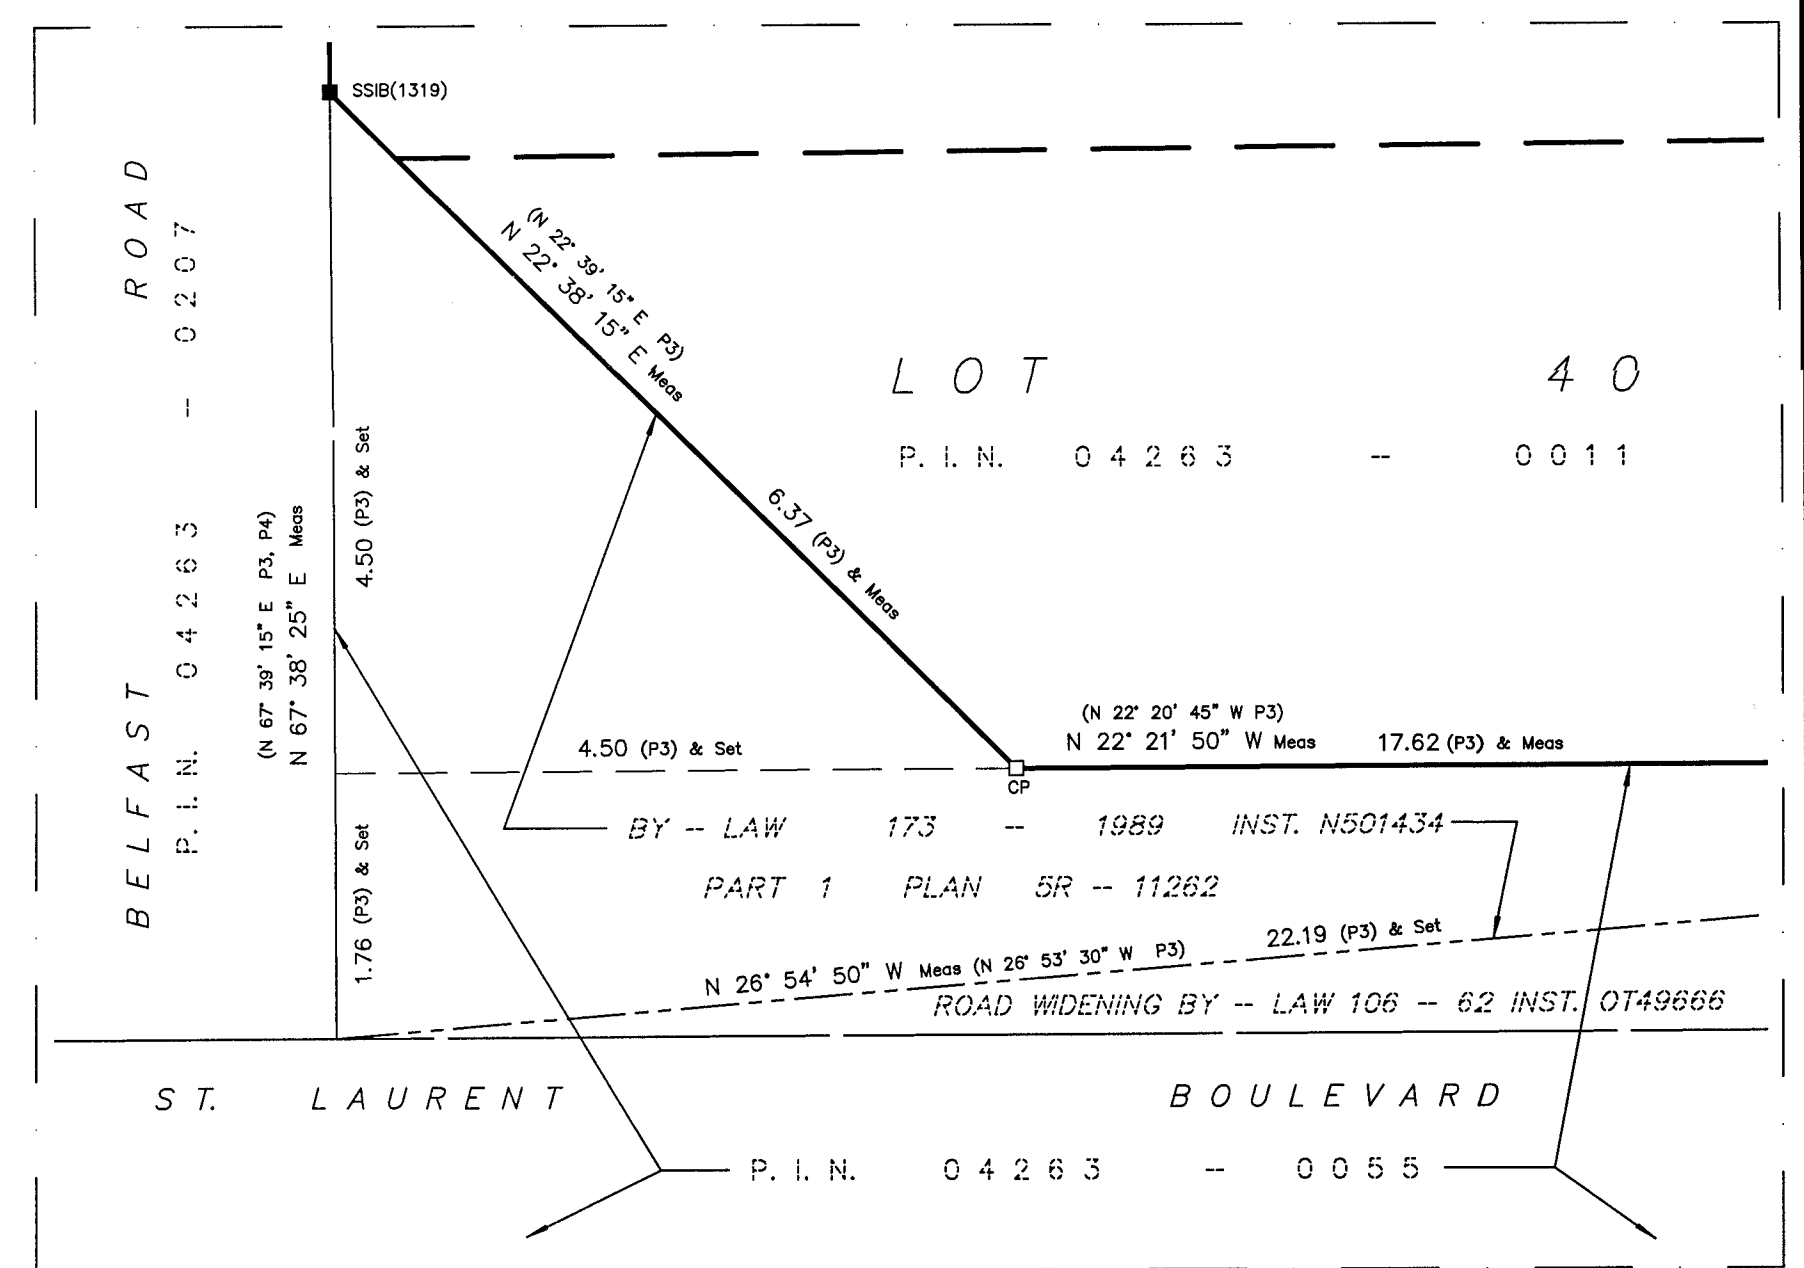

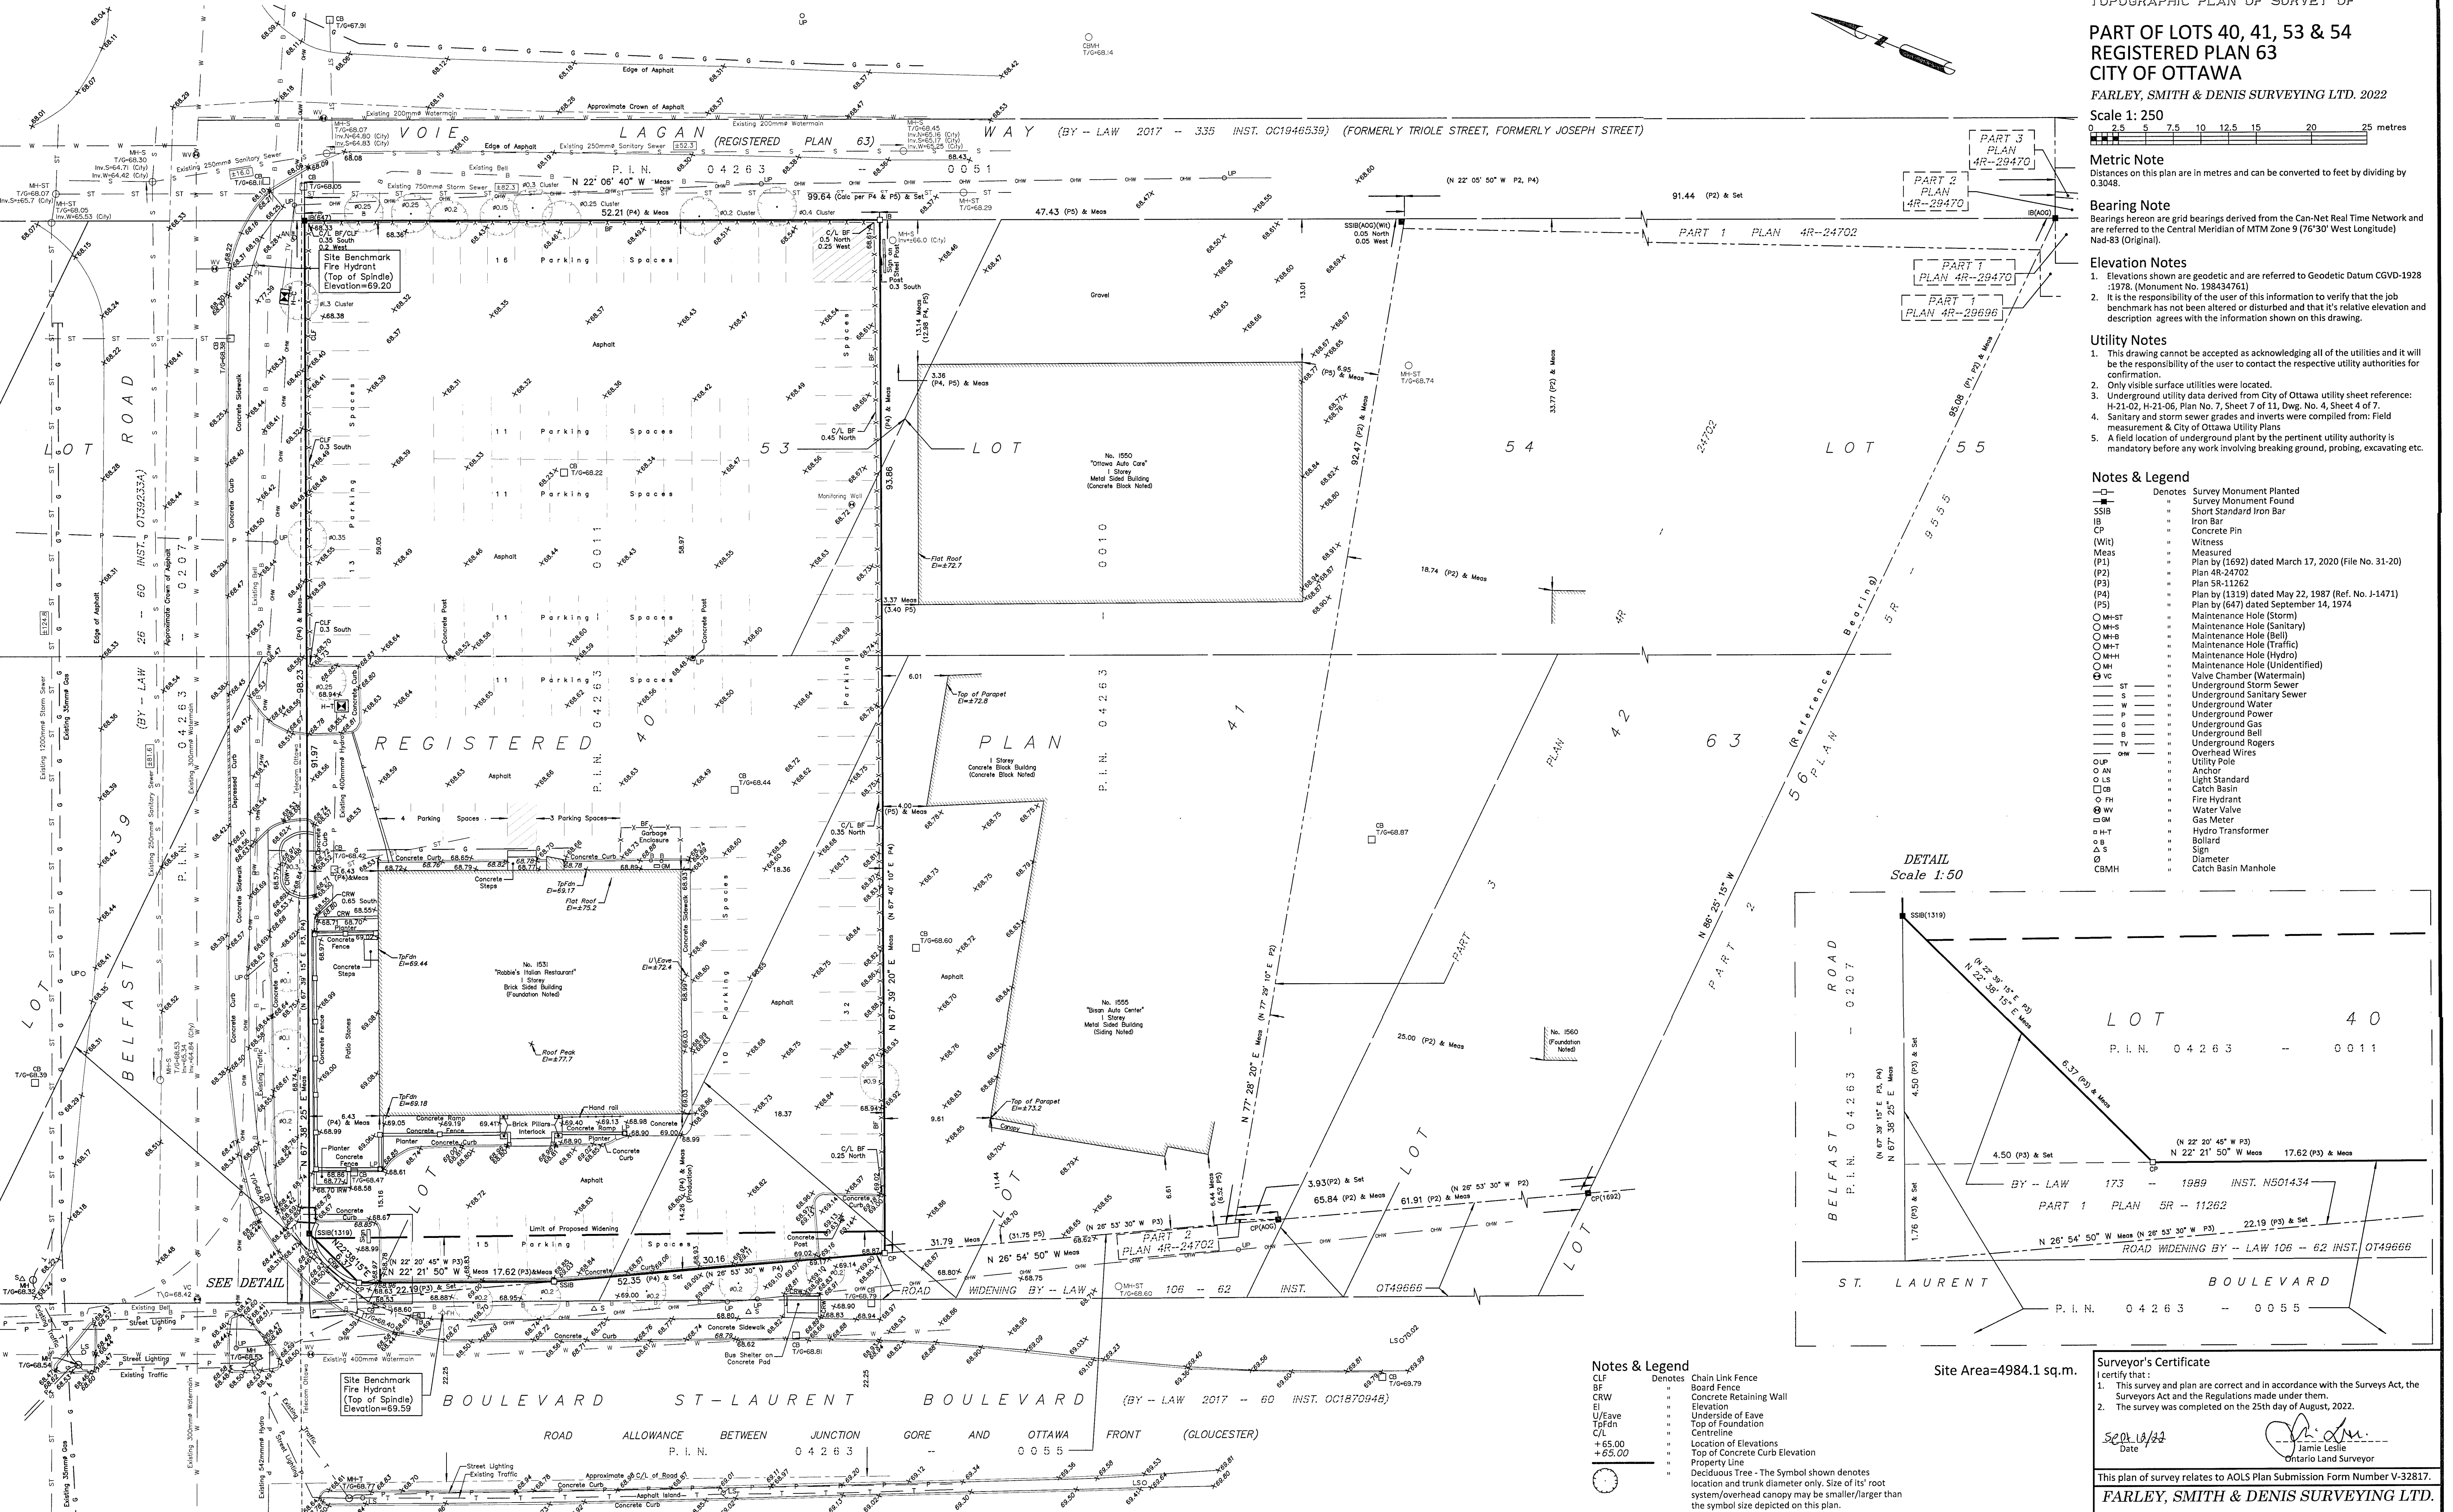

- 1. Elevations shown are geodetic and are referred to Geodetic Datum CGVD-1928 :1978. (Monument No. 198434761)
2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

Utility Notes

- 1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
2. Only visible surface utilities were located.
3. Underground utility data derived from City of Ottawa utility sheet reference: H-21-02, H-21-06, Plan No. 7, Sheet 7 of 11, Dwg. No. 4, Sheet 4 of 7.
4. Sanitary and storm sewer grades and inverts were compiled from: Field measurement & City of Ottawa Utility Plans
5. A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating etc.

Notes & Legend

Table with 2 columns: Symbol and Description. Includes symbols for Survey Monument Planted, Short Standard Iron Bar, Concrete Pin, Witness, Measured, Plan by (1692) dated March 17, 2020, etc.

Notes & Legend table with symbols for Chain Link Fence, Board Fence, Concrete Retaining Wall, Elevation, Underside of Eave, etc.

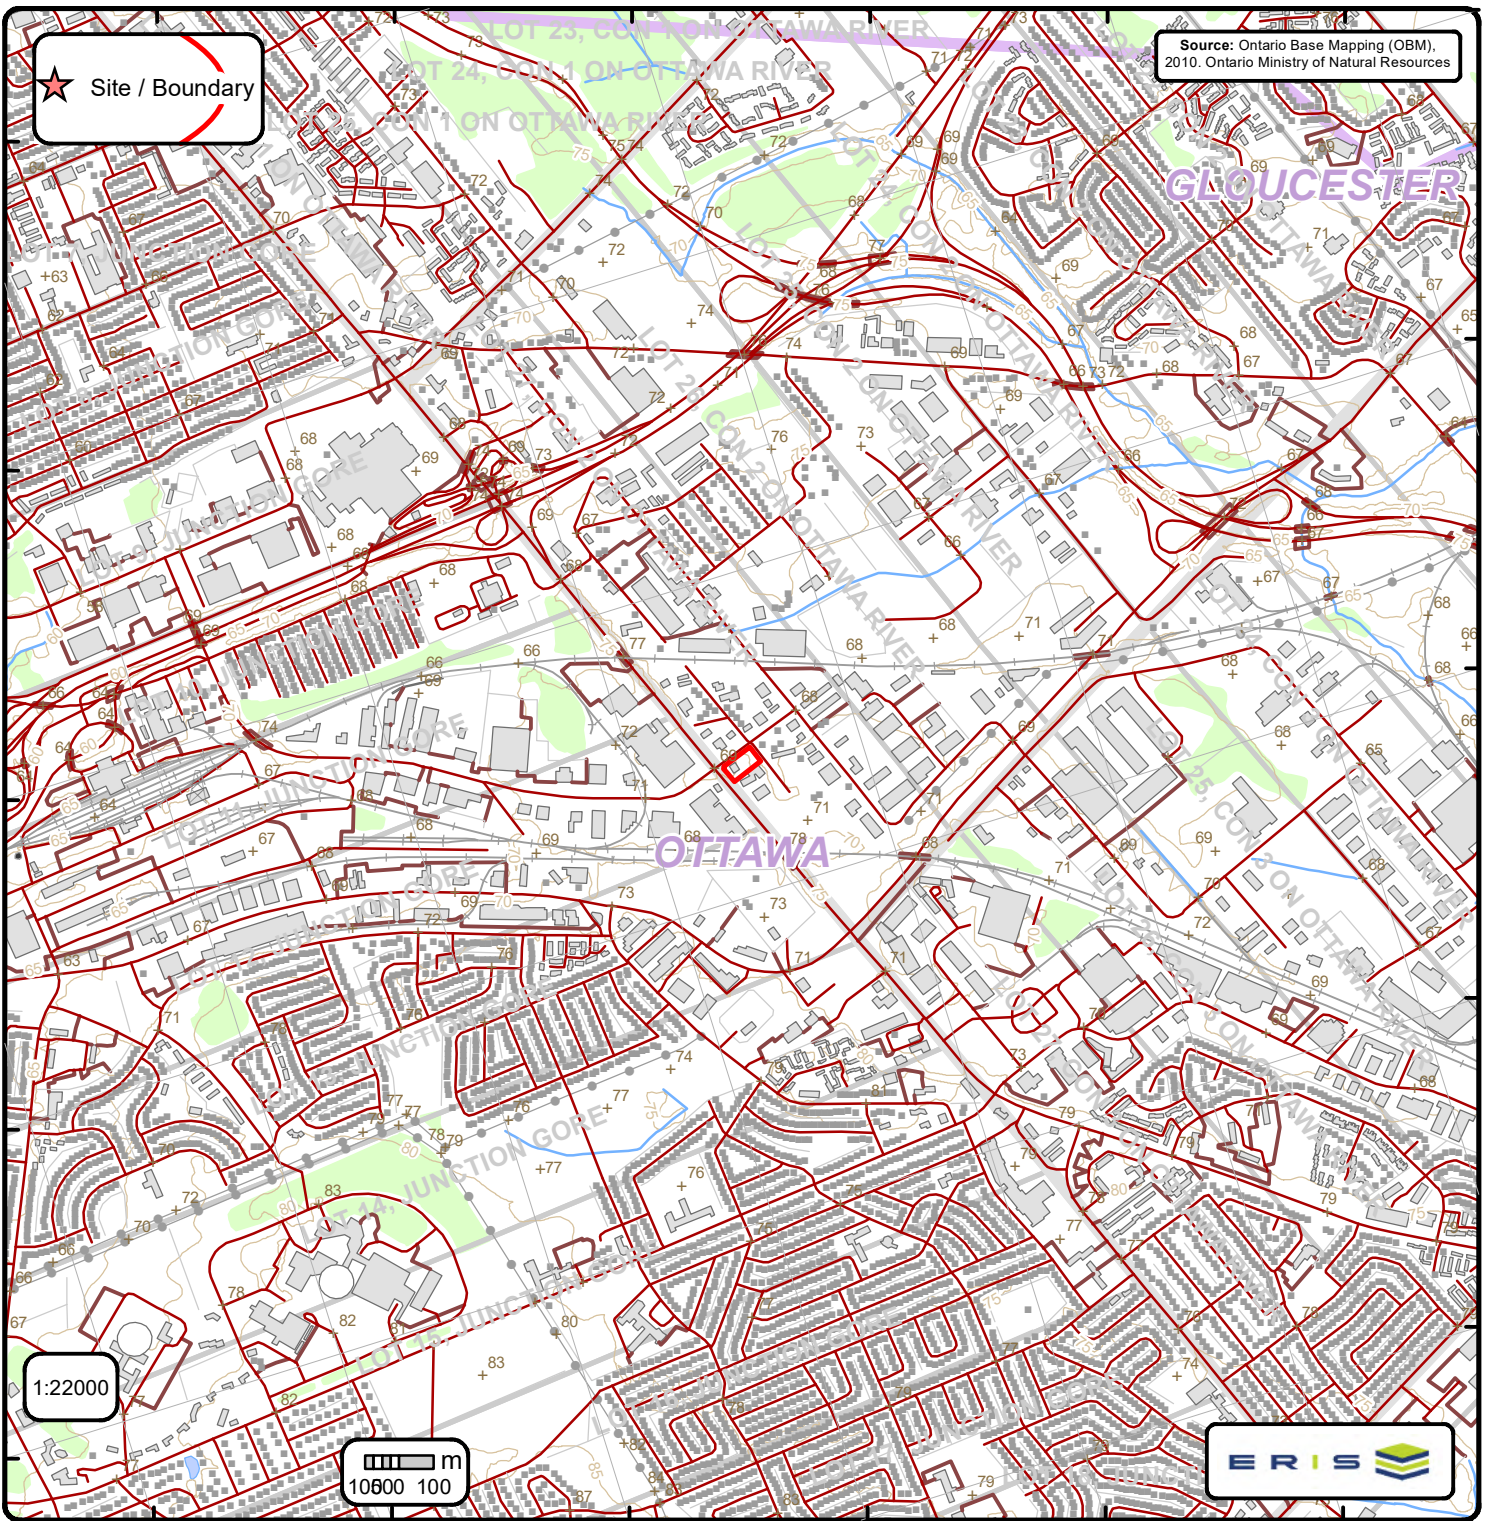

Site Area=4984.1 sq.m.

Surveyor's Certificate section containing a declaration of accuracy, date (5/20/22), signature of Jamie Leslie, and company name FARLEY, SMITH & DENIS SURVEYING LTD.

WARNING NO PERSON MAY COPY, REPRODUCE, DISTRIBUTE OR ALTER THIS PLAN IN WHOLE OR IN PART WITHOUT THE WRITTEN PERMISSION OF FARLEY, SMITH & DENIS SURVEYING LTD.

Page 4  
**Order No.**  
23051000042

No Surface Geology units found within search area.

**ID** - ID applied to the Unit

**Unit Name** - Name of deposit

**Deposit Type Code** - The geological unit number taken from the original map legend.

**Deposit Age** - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

**Map Number** - Original map series number, eg., 'M2402' or 'P1973'. Each sgu\_point feature is tagged to its original map.

**Map Name** - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

**Source Map Scale** - The scale at which the original map was captured, e.g., '1:50 000'

**Primary Material** - This attribute provides the user with information regarding the most prevalent material present within a given area.

**Primary Material Modifier** - This attribute provides the user with a more refined description of the lithological classification of the primary material.

**Secondary Material** - This attribute provides the user with information regarding subordinate materials present within a given area.

**Primary General** - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

**Primary General Modifier** - This attribute provides the user with a refined interpretation of the primary genetic modifier.

**Veneer** - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

**Sub Episode** - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

**Sub Episode** - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

**Phase** - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

**Stratus Modifier** - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

**Provenance** - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

**Carbon Content** - This attribute provides the user with information regarding the carbonate content of till.

**Formation** - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

**Permeability** - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

**Material Description** - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.

23051000042

**ID:** 13323 | **Unit Name:** |

**Type (All):** 55b | **Type (Primary):** 55b | **Type (Secondary):** | **Type (Tertiary):** | **Rock Type (Primary):** Shale, limestone, dolostone, siltstone | **Strata (Primary):** Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member | **Super Eon (Primary):** | **Eon (Primary):** PHANEROZOIC (Present to 542.0 Ma) | **Era (Primary):** PALEOZOIC (251.0 Ma to 542.0 Ma) | **Period (Primary):** ORDOVICIAN (443.7 Ma to 488.3 Ma) | **Epoch (Primary):** UPPER ORDOVICIAN | **Province (Primary):**

**ID - Unit ID**      **Unit Name** - Generalized geological unit classification

**Type (All)** - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

**Type (Primary)** - The primary geological unit number or code for the primary rock type in an individual polygon

**Type (Secondary)** - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

**Type (Tertiary)** - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

**Rock Type (Primary)** - Rock type or sub-unit description

**Status (Primary)** - The Stratigraphic unit. Divided into:

Supergroup (two or more groups and lone formations)  
Group (two or more formations)  
Formation (primary unit of lithostratigraphy)  
Member (named lithologic subdivision of a formation)  
Bed (named distinctive layer in a member or formation)

**Super Eon (Primary)** - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

PRECAMBRIAN (0.542 Ga to <3.85 Ga)

**Eon (Primary)** - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

ARCHEAN (2.5 Ga to <3.85 Ga)  
PROTEROZOIC (0.542 Ga to 2.50 Ga)  
PHANEROZOIC (Present to 542.0 Ma)

**Era (Primary)** - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

MESOARCHEAN (2.8 Ga to 3.2 Ga)	MESOPROTEROZOIC (1.0 Ga to 1.6 Ga)
NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga)	EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga)
NEOARCHEAN (2.5 Ga to 2.8 Ga)	NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga)
PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga)	PALEOZOIC (251.0 Ma to 542.0 Ma)
MESO-TO PALEOPROTEROZOIC (1.0 Ga to 2.5 Ga)	MESOZOIC (65.5 Ma to 251.0 Ma)

**Period (Primary)** - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

CAMBRIAN (488.3 Ma to 542.0 Ma)  
ORDOVICIAN (443.7 Ma to 488.3 Ma)  
SILURIAN (416.0 Ma to 443.7 Ma)  
DEVONIAN (359.2 Ma to 416.0 Ma)  
MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)  
JURASSIC (145.5 Ma to 199.6 Ma)  
CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)

**Epoch (Primary)** - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

LOWER ORDOVICIAN	UPPER SILURIAN
MIDDLE ORDOVICIAN	LOWER DEVONIAN
UPPER ORDOVICIAN	MIDDLE DEVONIAN
MIDDLE AND LOWER SILURIAN	UPPER DEVONIAN
UPPER SILURIAN TO LOWER DEVONIAN	LOWER CRETACEOUS AND MIDDLE JURASSIC

**Province (Primary)** - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

## Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

## Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

## Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

## Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

## Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Postal
----	------------------------	---------	------	--------

# Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Feb 28, 2022**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2021**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Feb 28, 2023**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Feb 2023**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Feb 2023**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Mar 31, 2023**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Mar 31, 2023**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Dec 31, 2022**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Apr 30, 2022**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2022**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Mar 2023**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2023**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2022**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Mar 31, 2023**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Mar 31, 2023**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2020**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2023**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Feb 28, 2023**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Oct 2021**

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jun 30 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Mr. Couturier,

**Re: Information Request  
1531 St Laurent Boulevard, Ottawa, Ontario ("Subject Property")**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

**Additional information may be obtained by contacting:**

**Ontario's Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

## **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Ren". The signature is fluid and cursive, with a horizontal line underlining the name.

Jeffrey Ren
