EXECUTIVE SUMMARY

DST, a division of Englobe (DST) was retained by 101381 Canada Inc. & Coffee Factory Inc. (the “Client”) to conduct a combined Phase I & II Environmental Site Assessment (ESA) for the property located at 1531 St. Laurent Blvd, in Ottawa, Ontario (the “Site”).

The Site consists of a rectangular shaped parcel of land that covers an area of approximately 4,966 m². It is developed with a single-storey, single-tenant commercial building, with one basement level, and an asphalt-paved parking lot. The Site building, which has a footprint area of approximately 685 m², is occupied by a restaurant (Robbie’s Italian Restaurant).

DST performed this assessment in general accordance with CSA documents Z768-01 (R2016) – Phase I Environmental Site Assessment and Z769-00 (R2018) – Phase II Environmental Site Assessment. This combined Phase I & II ESA was completed strictly for the purpose of environmental due diligence only and is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation (O. Reg.) 153/04 (as amended).

The purpose of the Phase I ESA portion of the assessment was to evaluate actual and potential environmental concerns on Site, and to assess the potential for the Site to be impacted by the current and historical uses of the Site and surrounding properties.

The Site reconnaissance was conducted by DST on April 30, 2021, and an interview was conducted with Mr. Robbie Skaff (the property owner at the time of this assessment). Based on the environmental records review, Site reconnaissance and interview, the following potentially contaminating activities (PCAs) were identified within the Phase I study area:

1. Existing and historical presence of retail fuel outlet and automotive repairs at 1515 St. Laurent Boulevard (approximately 25 m north of the Site);
2. Historical presence of gas bar and fuel oil depot at 1499 St. Laurent Boulevard (approximately 80 m north of the Site);
3. Historical presence of oil dealer and underground oil tanks at 1560 St. Laurent Boulevard (approximately 40 m south of the Site);
4. Existing and historical presence of automotive repair garage at numerous properties to the north, east and south of the Site, within the Phase I study area;
5. Historical diesel fuel spill at the intersection of St. Laurent Boulevard and Belfast Road (approximately 25 m northwest of the Site); and
6. Existing bus depot, USTs and historical spills at 1500 St. Laurent Boulevard (approximately 60 m northwest of the Site).

The Phase II ESA portion of the assessment was conducted in order to investigate the above-noted PCAs and to confirm the presence or absence of potential contaminants of concern within the soil and groundwater on Site.

The field investigation consisted of the following activities:

- The advancement of four exterior boreholes (MW1-21 through MW4-21) instrumented with groundwater monitoring wells at strategic locations on Site. Boreholes MW1-21 and MW2-21 were advanced along the northern Site boundary, within the parking lot. MW3-21 and MW4-21 were advanced close to the southern Site boundary, in the western and eastern portion of the Site, respectively; and
- The collection of soil and groundwater samples from the advanced boreholes/ monitoring wells, for laboratory analysis of petroleum hydrocarbon fractions F1 – F4 (PHCs F1 – F4) and volatile organic compounds (VOCs).

Soil and groundwater analytical results were compared against applicable provincial standards, as set out in the following document:

- Ontario Ministry of the Environment, Conservation and Parks (MECP) “Soil, Groundwater and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act”, April 15, 2011. Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Groundwater Condition. Industrial/Commercial/Community Property Use for soil (coarse textured soils) and All Types of Property Use for groundwater.

Based on the laboratory analytical soil results, the following exceedances of the applicable MECP Table 3 standards were detected in the collected soil samples:

- Concentrations of ethylbenzene, total xylenes, PHC F1 and PHC F2 in the soil sample collected from MW1-21 exceeded their respective applicable MECP Table 3 standards.

Concentrations of all other analyzed parameters in the collected soil samples were below their respective MECP Table 3 standards.

Based on the laboratory analytical groundwater results, all collected groundwater samples met the applicable MECP Table 3 standards for PHCs F1 – F4 and VOCs.

Further to the completion of the Phase I and II ESAs, the assessment identified impacts to the soil quality at borehole location MW1-21, which is located to the north of the building footprint. The subject impacts at this borehole location are likely attributed to off-Site sources potentially linked to one or more of the previously-noted PCAs within the Phase I study area.

It is inferred (based on the current limited data available) that existing soils to the north of the Site building, up to the northern property boundary, contain impacts above the applicable MECP Table 3 standards, from a depth of approximately 1.0 metres below ground surface (m bgs) to 3.0 m bgs. Further investigation is recommended to the south and east of borehole location MW1-21 in order to confirm the horizontal and vertical extents of the soil impacts in the vicinity of the subject borehole location.

1 Introduction

1.1 General

DST, a division of Englobe (DST) was retained by 101381 Canada Inc. & Coffee Factory Inc. (the “Client”) to conduct a combined Phase I & II Environmental Site Assessment (ESA) at the property located at 1531 St. Laurent Boulevard in Ottawa, Ontario (the “Site”). A Site Location Map is provided as Figure 1, in Appendix A.

The purpose of the Phase I ESA portion of the assessment was to evaluate actual and potential environmental concerns on Site, and to assess the potential for the Site to be impacted by the current and historical uses of the Site and surrounding properties. The Phase II ESA investigation was completed to confirm the presence or absence of impacts to the soil and groundwater quality at the Site.

It is understood that this combined Phase I & II ESA was completed strictly for the purpose of environmental due diligence only and is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation (O. Reg.) 153/04 (as amended). The assessment was conducted in accordance with professional standards and procedures, which generally reflect the guidance provided under CSA documents Z768-01 (R2016) – Phase I Environmental Site Assessment and Z769-00 (R2018) – Phase II Environmental Site Assessment.

This report was prepared for the exclusive use of 101381 Canada Inc. & Coffee Factory Inc. Any use of this report by any third party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. DST accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report. Please refer to Section 11 for limitations inherent to the subject report.

1.2 Site Description

The Site is located at 1531 St. Laurent Boulevard in Ottawa, Ontario, and is located in an area zoned as AM – Arterial Mainstreet Zone. The Site consists of a rectangular shaped parcel of land that covers an area of approximately 4,966 m². It is developed with a single-storey, single-tenant commercial building, with one basement level, and an asphalt parking lot. The building, which has a footprint area of approximately 650 m², is occupied by a restaurant (Robbie’s Italian Restaurant).

Information regarding the Site and the Phase I study area (area within 250 m of Site boundaries) was compiled through a records review, Site reconnaissance and an interview of a knowledgeable Site representative. A depiction of the Phase I ESA study area is provided in Figure 2, in Appendix A.

2 Scope of Work

The scope of work for this combined Phase I & II ESA is summarized in the following subsections. All work was completed in accordance with professional standards and procedures, which generally reflect the guidance provided under CSA documents Z768-01 (R2016) – Phase I Environmental Site Assessment and Z769-00 (R2018) – Phase II Environmental Site Assessment.

2.1 Records Review

A records review was completed that involved collecting data from federal, provincial, and municipal databases, aerial photographs, geological maps, etc., in order to subjectively determine the presence or absence of actual and/or potential environmental concerns at the Site and surrounding areas.

2.2 Site Reconnaissance

A Site reconnaissance was conducted to inspect the Site and surrounding properties on April 30, 2021. DST was unable to access the interior of the Site building due to restrictions related to the COVID-19 pandemic, and as such, only the exterior of the Site building and outdoor features were observed. Surrounding properties were assessed from publicly accessible locations.

2.3 Interviews

DST personnel conducted an interview with Mr. Robbie Skaff, the Site property owner at the time of this assessment, via telephone on May 3, 2021.

2.4 Compilation of Records Review, Site Reconnaissance and Interview Results

The data collected during the records review and the Site reconnaissance was compiled and reviewed by DST. The information has been presented in a logical manner that evaluates actual and potential environmental issues that may affect the environmental condition at the Site. A summary of actual or potential environmental concerns which may affect the Site have been summarized in Section 6.

2.5 Field Investigation

The scope of work for the field program of the Phase II ESA portion of this assessment consisted of the following activities:

- Obtaining underground utility clearances and locates;
- The advancement of four exterior boreholes (MW1-21 through MW4-21) instrumented with groundwater monitoring wells at strategic locations on Site. Boreholes MW1-21 and MW2-21 were advanced along the northern Site boundary, within the parking lot. MW3-21 and MW4-21 were advanced close to the southern Site boundary, in the western and eastern portion of the Site, respectively; and

- The collection of soil and groundwater samples from the advanced boreholes/ monitoring wells, for laboratory analysis of petroleum hydrocarbon fractions F1 – F4 (PHCs F1 – F4) and volatile organic compounds (VOCs).

3 Records Review

3.1 General

Information related to the Site was received and/or requested from numerous sources as detailed in this section. The agencies contacted, information requested, and responses received are summarized in the following sub-sections.

3.1.1 First Developed Use Determination

Based on our review of the available Fire Insurance Plans (FIPs), aerial photographs (see Section 3.3.1), and city directory records (see Section 3.2.9), the Site appears to have been developed between 1954 and 1958. A building is visible on Site in the 1958 aerial photograph, but the Site address is not listed in the 1954 city directory. The subject building is identified as an office building and transport warehouse in the 1963 FIP (as noted in Section 3.1.2 below).

No earlier records were available for the Site.

3.1.2 Fire Insurance Plans

DST contacted Opta Information Intelligence (Opta) for any FIPs or insurance records for the Site. Opta maintains records, including plans and maps for Canadian cities which indicate past and existing structures on properties, including aboveground storage tanks (ASTs) and underground storage tanks (USTs). FIPs for the year 1963 were obtained from Opta Information Intelligence (Opta) and reviewed by DST. A summary of the reviewed FIPs is provided below. Copies of the FIPs are provided in Appendix D.

1963 FIP:

- A building is present at the Site and is identified as an office on the west side and a transport warehouse on the east side. The structure is identified as exposed steel with a mill roof. The remainder of the Site has no identifiable features.
- Fleetway Aluminum Manufacturing Co. and Ottawa Automotive Warehousing Ltd. occupy the structures on the property adjacent to the south of the Site. Further south, "D. Grandmaitre Ltd.", identified as an oil dealer, is present. Underground oil tanks are identified to the east of the structure.
- Pinnacle Construction Ltd. is identified on the property to the east of the Site, across Triole Street (currently Lagan Way). A garage is identified as part of the building on the property.
- The property to the north of the Site, across Belfast Road, does not contain any structure information. However, a gas bar and a fuel oil depot, including four USTs, are identified on the property.
- There is no FIP information available to the west of the Site.

3.2 Environmental Source Information

Environmental information for the Site was obtained from the sources described in the sub-sections below. Distances provided relative to the Site are approximations.

3.2.1 Provincial, Federal and Private Database Search

Environmental Risk Information Service (ERIS) was retained by DST to complete a search of federal, provincial and private databases for environmental information regarding the Site and properties within 250 m of the Site.

There were no records found for the Site, and 288 records were found for other properties within the Phase I ESA study area. Table 1 below provides a summary of the pertinent results of the database search as they relate to potential impacts to the environmental condition of the soil and groundwater at the Site.

Table 1: Database Search Summary

Name/Location	Approximate Distance from the Site	Details
Intersection of Belfast Rd. & St. Laurent Blvd.	25 m northwest of the Site	-One record was identified in the Ontario Spills (SPL) database for a 100 L release of diesel fuel to road/sewer from a motor vehicle accident on November 4 th , 2003. Environmental impact was deemed as "Possible" in the record.
1515 St. Laurent Blvd	25 m north of the Site	-One record was identified in the Private and Retail Fuel Storage Tanks (PRT) database, registering a retail Fuel Storage Tank with a 5,000L capacity. It was licensed by Dominion Propane Corp in 1994. -One record was identified in the PRT database, registering a fuel storage tank with a 113,500 L capacity. It was licensed by Sunys Petroleum Inc. in 1995. -Three records were identified in the Retail Fuel Storage (RST) database, registering tank #1186800 to Class A Service Centre, Sunys Petroleum Inc., and Sunys Energy Inc., respectively. -One record was identified in the fuel storage tank – historic (FSTH) database, identifying four USTs on Site installed in 1992, with a combined capacity of 113,500 L. -Three records were identified in the FST database, identifying the installation of two 50,000 L capacity liquid fuel USTs and one 20,000 L liquid fuel UST on May 15, 2009.
Fast Lube / Mr. Tire Garage 1043 Belfast Rd	60 m northeast of the Site	-Three records were identified in the RST database, registered under headcode 00921430 – oil changes & lubrication service.
1575 St. Laurent Blvd (formerly 1560 Triolet Street)	40 m south of the Site	-One record was identified in the SPL database for an intentional release of an oil tank to parking lot on September 23 rd , 1997. Environmental impact was deemed as "Possible" in the record.
BNR Equipment Rentals 1550 Michael Street	100 m east of the Site	-Two records were listed in the PRT database, identifying the presence of an underground storage tank (UST) with a capacity of 2,600 L. The record is listed with an expiry date of 1995. -Three records were identified in the GEN database, registered under generator number ON0900501 for BNR Equipment

Name/Location	Approximate Distance from the Site	Details
		Rentals., for generating petroleum distillates (213) and waste oils & lubricants (252) in 1989 to 1998.
RJ Laflamme Lift Truck 2311 Shore Street	130 m north of the Site	-Four records were identified in the GEN database, registered under generator number ON0979600 for RJ Laflamme Lift Truck for generating petroleum distillates (213) and waste oils & lubricants (252) between 1986 and 1998.
Suntract Rentals 1508 Michael Street.	110 m northeast of the Site	-Four records were identified in the GEN database, registered under generator number ON0036108, for light fuels (221), petroleum distillates (213), and waste oils & lubricants (252) from 1986 to 1998.
1551 Michael Street	185 m east of the Site	<p>-Two records were identified in the SCT Directory in 1946 for Ridalco Industries Inc., for Fabricated Pipe and Pipe Fittings, Service Industry Machinery not elsewhere Classified, Laboratory Apparatus and Furniture, Sheet Metal Work, Metal Stampings not elsewhere Classified, Other Ornamental and Architectural Metal Products Manufacturing, and All Other Miscellaneous Fabricated Metal Product Manufacturing</p> <p>-Three records were identified in the GEN database, registered as Vital Car & Truck Rustproofing., under generator number ON02996011, for inert organic wastes (150), petroleum distillates (213), and oil skimmings & sludges (251) between 1990 and 2004.</p> <p>-One record was identified in the GEN database, registered as Ottawa's Auto Sound Plus Inc., under generator number ON2808459, for oil skimmings & sludges (251) and other specified inorganics (146) in 2005 and 2006.</p> <p>-Two records were identified in the GEN database, registered as 7631421 Canada Inc., under generator number ON4889728, for oil skimmings & sludges (251) in 2015 and 2016.</p>
1515 Michael Street	180 m east of the Site	<p>-Fourteen records were identified in the GEN database, registered as Ryder Truck Rental Canada Ltd., under generator number ON0177618, for aromatic solvents (211), aliphatic solvents (212), petroleum distillates (213), light fuels (221), oil skimmings & sludges (251), and waste oils & lubricants (252) between 1986 and 2020.</p> <p>-One record was identified in the FSTH database, identifying three USTs on Site, installed in 1987, with a total capacity of 90,920L of Diesel and 45,460L of gasoline.</p>
1500 St. Laurent Blvd.	60 m northwest of the Site	<p>-Two records identified in the PRT database identify the presence of two USTs, with a combined capacity of 185,840L with an unknown install date.</p> <p>- 18 records were identified in the GEN database, registered to O.C Transpo, under generator number ON0133300, between 1986 and 2021.</p>

Name/Location	Approximate Distance from the Site	Details
		-One record was identified in the FSTH database, identifying four USTs with a combined capacity of 200,000L for diesel installed in 1995. -One record was identified in the SPL database for a release of 100 L of diesel fuel to land, reported in 2009. Environmental impact was deemed as “confirmed” in the report. -One record was identified in the SPL database for a release of 50L of hydraulic oil to land and water. Environmental impact was deemed as “possible” with regard to soil and water contamination.

3.2.2 Environment and Climate Change Canada (ECCC)

DST submitted a request to ECCC, under the Access to Information Act, to provide available information related to environmental concerns (general correspondence, occurrence reports, abatement), orders, tanks (ASTs/USTs), spills, investigations/prosecutions (with owner/tenant information), and waste generator number/classes for the Site. A response was received from ECCC noting that no records were found for the Site. A copy of ECCC’s response is included in Appendix D.

3.2.3 Ministry of Environment, Conservation and Parks

The Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information (FOI) office was contacted for information on the Site, such as past or existing environmental permits, existing environmental orders, fuel storage tanks, or any other environmentally-related information. A response was not received as of the issuance date of this report. A copy of the response will be sent to the Client upon receipt. If the search results affect the conclusions of this report, an addendum to the report will be issued along with the response.

3.2.4 City of Ottawa

DST submitted a request to the City of Ottawa for Historical Land Use Inventory information for the Site. No information was returned on the subject property. A copy of the HLUI response is included in Appendix D.

3.2.5 Technical Standards and Safety Authority (TSSA)

The TSSA Fuel Handling Division is responsible for records regarding licensing of fuel handling facilities in Ontario. The TSSA was contacted for any information with respect to environmental concerns, which could include past or existing environmental spills, information on fuel tanks, or any other related environmental information at the Site and adjacent/neighbouring properties (1500, 1515, 1530, 1550 and 1555 St Laurent Blvd.; 1520 Lagan Way; and 1083 Belfast Road). A response was received on May 11, 2021 indicating five active and three expired records for fuel

storage tanks at 1500 St. Laurent, and four active and ten expired records for fuel storage tanks at 1515 St. Laurent Blvd. Records are included for liquid fuel storage and dispensing; propane storage, refill, and cylinder exchange; and compressed natural gas storage and dispensing. A copy of the TSSA's response is included in Appendix D.

3.2.6 MECP Inventory of Coal Gasification Plant Waste Sites in Ontario

A review of the MECP's Inventory of Coal Gasification Plant Waste Sites in Ontario (April 1987) revealed that the Site has not been used for the gasification of coal. No coal gasification plants were identified within 250 m of the Site.

3.2.7 MECP Inventory of Industrial Site Producing Coal Tars and Related Tars in Ontario

A review of the MECP's Inventory of Industrial Sites Producing Coal Tars and Related Tars in Ontario (November 1988) revealed that the production and use of coal or other tars has not taken place at the Site or on the surrounding properties within 250 m of the Site.

3.2.8 MECP Inventory of PCB Storage Sites in Ontario

The 1991 and 1995 Inventories of polychlorinated biphenyl (PCB) Storage Sites in Ontario indicate that no PCB storage sites were identified at the Site or on the surrounding properties (within 250 m radius).

3.2.9 City Directory

The city directory search provides the names of businesses that were operating at certain municipal addresses at a point in time. They do not provide details as to the activities at the properties.

A summary of the City Directory listings is provided in Table 2 below. A copy of the city directory records is provided in Appendix D. It is important to note that due to the current COVID-19 measures in place in Ontario, access to information was limited.

3.2.10 Intera Report

DST reviewed *Mapping and Assessment of Former Industrial Sites, City of Ottawa* document (Intera Technologies Ltd., 1988). This document describes historical waste disposal sites, and historical industrial sites throughout the City of Ottawa. There are no historical waste disposal sites identified within 250 m of the Site.

3.2.11 Golder Report – Old Landfill Management Strategy

In 2004, Golder Associates Ltd. completed a study for the City of Ottawa that identified old landfill sites for potential environmental considerations within the boundary of the amalgamated City of Ottawa. This report represents the Phase I of the Old Landfill Site Management Strategy implemented by the City of Ottawa, as a proactive initiative to protect human health and the environment, minimize possible liability of the municipality and individuals, and to provide information to various stakeholders associated with old landfill sites.

DST reviewed the *Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa, Ontario* (Golder Associates Ltd, 2004). There were no landfills identified within the Phase I study area.

3.3 Physical Setting Sources

Aerial photographs as well as soil, bedrock geology, and topography maps were reviewed for information pertaining to the physical setting of the Site. A description of the results for each record reviewed is provided below.

3.3.1 Aerial Photographs

Aerial photographs can provide an indication of historical land uses with respect to the Site and surrounding properties. Fifteen (15) aerial photographs were obtained from the City of Ottawa geoOttawa website, for the years 1958, 1965, 1976, 1991, 1999, 2002, 2005, 2007, 2008, 2009, 2011, 2014, 2015, 2017 and 2019. The reviewed aerial photographs, showing the approximate Site location, are provided in Appendix C.

The following table highlights the observed features of the Site and the surrounding properties for each aerial photograph.

Table 3: Aerial Photograph Observations

Aerial Photograph Year	Site Observations	Surrounding Property Observations
1958	<ul style="list-style-type: none"> A commercial-style building is present on Site. The remaining Site areas appear to be undeveloped land. 	<ul style="list-style-type: none"> North: Belfast Rd., followed by a number of commercial and residential buildings present along Shore Street, Lagan Way and St. Laurent Blvd. East: Lagan Way, followed by residential dwellings and commercial buildings along Michael Street, further followed by undeveloped agricultural fields South: One residential dwelling is present on the property located approximately 40 m south of the Site, followed by undeveloped agricultural fields and railways. West: St. Laurent Blvd., followed by undeveloped lands, a railway, and a potential railway depot along Industrial Ave.
1965	<ul style="list-style-type: none"> The building noted in the 1958 aerial photographs remains on Site. Several vehicles and trucks are visible in the western portion of the Site, and a number of storage containers are present in the central portion of the Site. 	<ul style="list-style-type: none"> North: More structures have been added to these properties. A large commercial-style building is now visible on the property north of the Site (across Belfast Rd.), and a gas bar is present further north (at 1499 St. Laurent Blvd.). East: Most of the properties have additional structures added. South: Two large buildings (similar in configuration to the current existing buildings) have been constructed on the adjacent property. West: Water features, suspected to be small drainage ponds, are now present along the railway.

Aerial Photograph Year	Site Observations	Surrounding Property Observations
1976	<ul style="list-style-type: none"> The land around the building on Site now appears to have been paved. 	<ul style="list-style-type: none"> North: The gas bar noted at 1499 St Laurent Blvd. in the 1965 aerial photograph has been removed and replaced with a commercial plaza building. Most of the properties to the north now have paved parking lots. Additional structures have been added. The vehicle depot to the northwest has been expanded. East: Several large structures with paved parking lots have been constructed to the east, along Newmarket St. and Liverpool Court. South: An additional structure has been added. Other structures appear to have paved parking lots. West: Several structures to the west have been constructed along Belfast Rd, north of the railway.
1991	<ul style="list-style-type: none"> The former Site building appears to have been demolished and replaced with the current Site building. The storage containers formerly present at the Site are no longer visible. 	<ul style="list-style-type: none"> North: The property to the north of the Site (1515 St. Laurent Blvd.) appears to have been converted to a retail fuel outlet as three pump islands are now visible on the property. An additional structure has been constructed, north of Shore St. East: Similar to the 1976 aerial photograph. South: A commercial building has been constructed on Newmarket St, to the southeast of the Site. West: The structure along St. Laurent and Belfast has a new parking lot.
1999	<ul style="list-style-type: none"> Similar to the 1991 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 1991 aerial photograph. East: Similar to the 1991 aerial photograph. South: The lands to the south, north of the railway, have been cleared of natural features. West: The lands to the west of the bus depot have been developed with additional structures and a parking lot.
2002	<ul style="list-style-type: none"> Similar to the 1999 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 1999 aerial photograph. East: Similar to the 1999 aerial photograph. South: Similar to the 1999 aerial photograph. West: Similar to the 1999 aerial photograph.

Aerial Photograph Year	Site Observations	Surrounding Property Observations
2005	<ul style="list-style-type: none"> Similar to the 2002 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2002 aerial photograph East: Similar to the 2002 aerial photograph South: Similar to the 2002 aerial photograph West: Similar to the 2002 aerial photograph
2007	<ul style="list-style-type: none"> Similar to 2005 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2005 aerial photograph East: Similar to the 2005 aerial photograph South: Similar to the 2005 aerial photograph West: Similar to the 2005 aerial photograph
2008	<ul style="list-style-type: none"> Similar to 2007 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2007 aerial photograph East: Similar to the 2007 aerial photograph South: Similar to the 2007 aerial photograph West: Similar to the 2007 aerial photograph
2009	<ul style="list-style-type: none"> Similar to 2008 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2008 aerial photograph East: Similar to the 2008 aerial photograph South: Similar to the 2008 aerial photograph West: Similar to the 2008 aerial photograph, with an additional structure built to the southwest, along Industrial Avenue
2011	<ul style="list-style-type: none"> Similar to 2009 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2009 aerial photograph East: Similar to the 2009 aerial photograph South: Similar to the 2009 aerial photograph, West: Similar to the 2009 aerial photograph
2014	<ul style="list-style-type: none"> Similar to 2011 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2011 aerial photograph East: Similar to the 2011 aerial photograph South: Similar to the 2011 aerial photograph West: Similar to the 2011 aerial photograph
2015	<ul style="list-style-type: none"> Similar to the 2014 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2014 aerial photograph East: Similar to the 2014 aerial photograph South: Similar to the 2014 aerial photograph, with some additional development and excavation performed on a property to the south (at 1599 St. Laurent Blvd.) West: Similar to the 2014 aerial photograph

Aerial Photograph Year	Site Observations	Surrounding Property Observations
2017	<ul style="list-style-type: none"> Similar to the 2015 aerial photograph 	<ul style="list-style-type: none"> North: Similar to the 2015 aerial photograph East: Similar to the 2015 aerial photograph South: Lagan Way has been extended, and a commercial building has been built to the south (at 1599 St. Laurent Blvd.), with a paved parking lot. West: Similar to the 2015 aerial photograph.
2019	<ul style="list-style-type: none"> Similar to 2017 aerial photograph. 	<ul style="list-style-type: none"> North: Similar to the 2017 aerial photograph. East: Similar to the 2017 aerial photograph. South: Similar to the 2017 aerial photograph. West: Similar to the 2017 aerial photograph.

3.3.2 Topography, Hydrology, and Geology

DST reviewed available maps to determine Site and surrounding features such as local geology, topography, hydrogeology and locations of nearby watercourses. A description of the noted Site and surrounding property features is described in Table 4 below.

Table 4: Summary of Maps Reviewed

Map Title	Source	Site and Surrounding Property Features
Ontario Base Mapping	The Atlas of Canada – Toporama, Ministry of Natural Resources and Forestry, 2020	<ul style="list-style-type: none"> The Site and surrounding properties are relatively flat, located at an approximate elevation of approximately 67-68 m above sea level (masl). The nearest surface water body is the Rideau River, approximately 1.7 km east of the Site.
Natural Heritage Areas	Ministry of Natural Resources and Forestry, 2020	<ul style="list-style-type: none"> There are no wetlands identified within the Phase I study area. There are no Areas of Natural Scientific Interest (ANSI) located at the Site or within the Phase I study area.
Ontario Geological Survey (OGS) Bedrock Geology of Ontario	Ministry of Northern Development and Mines, 2011	<ul style="list-style-type: none"> The bedrock geology in the area of the Site consists of limestone, dolostone, shale, and siltstone of the Georgian Bay formation, Blue Mountain Formation, and Billings Formation.
OGS Quaternary Geology	Ministry of Northern Development and Mines, 2000	<ul style="list-style-type: none"> The Quaternary Geology of the Site is composed of undifferentiated till of sandy silt to silt on Pleistocene terrain.

3.3.3 Fill Materials

The presence or absence of fill materials within the Site and surrounding areas could not be confirmed from the review of aerial photographs and geological information from the provincial and federal data sources.

3.3.4 Water Bodies and Areas of Natural Significance

The nearest waterbody to the Site is Green's Creek, approximately 1.7 km east of the Site. There are no areas of natural significance in the Phase I study area.

3.3.5 Well Records

A search of MECP well records was completed by DST throughout the MECP online database. There were no well records identified for the Site. There were 13 well records identified within the surrounding area, eleven of which were identified as observation/test wells. Two (2) wells from 1953 were identified for domestic water supply.

3.4 Site Operating Records

No Site Operating Records were provided to DST for review.

4 Interviews

Interviews of public and government agencies regarding specific details of properties are handled through FOI requests due to privacy legislation. The details of these information requests are provided in Sections 3.2.2 through 3.2.5.

DST conducted an interview with Mr. Robbie Skaff (herein referred to as the “Site representative”) via telephone. The information provided to DST through the interview is incorporated into the appropriate Site reconnaissance sections of the report.

5 Site Reconnaissance

5.1 General Requirements

The findings documented in this section are based on observations made by DST at the time of the Site reconnaissance. The Site reconnaissance took place on the morning of April 30, 2021, and the conditions were snowy, with a temperature of approximately 6°C. DST was not able to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic.

The findings documented in this section are based on observations made by DST at the time of the Site reconnaissance. Select photographs taken during the Site reconnaissance are included in Appendix B.

5.2 Specific Observations at the Phase I Property

5.2.1 Description of Structures and Other Improvements

The Site consists of a rectangular-shaped parcel of land that covers an area of approximately 4,965 m². It is developed with a single-storey, single-tenant commercial building, with one basement level, and an asphalt parking lot. The building, which has a footprint area of approximately 685 m², is occupied by a restaurant (Robbie's Italian Restaurant).

5.2.2 Description of Below-Ground Structures

As noted above, the Site building includes one belowground basement level (poured concrete foundation); however, DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic.

5.2.3 Details of Tanks

No evidence of any ASTs or USTs were observed at the Site. The Site representative was unaware of any historical ASTs or USTs at the Site.

5.2.4 Potable and Non-Potable Water Sources

The Site is serviced with municipal water through the City of Ottawa's distribution system, which connects to the Site building via the watermain along St. Laurent Blvd.

5.2.5 Underground Utilities and Service Corridors

The Site and surrounding properties are supplied with municipal drinking water. Sanitary effluent discharges into the municipal system. Natural gas and electrical power are provided to the Site through underground service lines from third party providers. Communication services are provided to the Site through overhead service lines.

5.2.6 Features of Structures and Buildings

Entry and Exit Points

The main entrance to the on-Site building is on the west side, with additional entrances on the north and east sides of the Site building.

Heating and Cooling Systems

As previously noted, DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic. However, based on information provided by the Site owner during the interview, the Site building is heated via forced air natural gas furnace, and it is cooled via three rooftop units.

Drains, Pits, and Sumps

DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic. As such, DST was unable to determine the presence of drains, pits, and sumps within the building.

Chemical Storage

DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic. As such, DST was unable to determine the presence and nature of chemicals stored within the building.

Waste Removal

Dumpsters were observed outside the southeast corner of the Site building. Garbage is collected from the Site on a weekly basis by a private waste collection company.

Stains or Corrosion

DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic. As such, DST could not observe signs of stains or corrosion within the building.

5.2.7 Wells

No monitoring wells were observed on Site during the Site reconnaissance.

5.2.8 Ground Surface

The exterior areas of the Site are asphalt-paved (used as a parking lot for the restaurant). Additionally, the northern, eastern and western perimeters of the Site are landscaped.

5.2.9 Railway Lines or Spurs

No railway spurs or lines were observed on Site or in the surrounding area.

5.2.10 Stained Soil and Stressed Vegetation

No stained soil or stressed vegetation was observed during the Site reconnaissance.

5.2.11 Fill and Debris

No evidence of fill or debris was noted during the Site reconnaissance.

5.2.12 Designated and Hazardous Materials

Eleven designated substances are regulated by the Ministry of Labour (MOL) under the Occupational Health and Safety Act (OHSA) through the development of designated substance regulations that control worker exposure to designated substances. The designated substances identified in OHSA include *asbestos, vinyl chloride, arsenic, benzene, lead, coke oven emissions, ethylene oxide, acrylonitrile, mercury, isocyanates, and silica*. Guidelines have been developed for building projects such as renovations, construction, and demolition where designated substances may be disturbed. The following sections address Special Attention Items such as lead and/or lead based paints, mercury, asbestos containing materials (ACMs), and silica, and their potential presence within the Site Building. A designated substances and hazardous materials assessment should be completed in advance of any building renovations or demolition to confirm the presence or absence of such materials.

Lead and/or Lead-Containing Paint

Lead may be present in a variety of building materials and is commonly associated with paints, solder material, pipe plumbing, ceramic tile glazing and mechanical equipment due to its ability to resist corrosion. Exposure to lead may cause lead poisoning and is considered to be a human health risk. The historic use of lead-containing paints (LCPs) is a source of exposure through ingesting peeling or flaking paints, and/or routine contact with painted surfaces containing lead. Regulations have been established that limit worker exposure to lead, and guidelines have been published with work procedures to be followed when performing work that generates airborne lead containing dust.

Based on the estimated construction date of the Site building (1987), LCPs and other lead-based materials may be present within the interior of the Site building.

Mercury

Liquid mercury is commonly associated with mechanical equipment such as thermostats, thermometers, barometers, pressure gauges, and electrical switches. A small amount of mercury is present in fluorescent light tubes and compact fluorescent light bulbs. Removal of materials suspected to contain mercury should be conducted in accordance with "The Safe Handling of Mercury: A Guide for the Construction Industry". DST was unable to access the interior of the structure. Fluorescent light tubes, if present, are assumed to contain mercury.

Asbestos-Containing Materials

Asbestos is a naturally occurring fibrous mineral which has been widely used historically due to physical properties that, amongst other things, allow asbestos to withstand high

temperatures. Asbestos has been used in a number of building products including, but not limited to thermal and electrical insulation, floor and ceiling tiles, plaster and drywall joint compound.

Based on the date of construction of the Site building (1987), asbestos-containing materials (ACMs) are not suspected to be present in building materials within the Site building.

Urea Formaldehyde Foam Insulation

Based on the inferred date of construction of the Site buildings, urea formaldehyde foam insulation (UFFI) may have been used. UFFI was banned in Canada in 1980. No evidence of UFFI was observed during the Site reconnaissance.

Silica

Silica is a naturally occurring mineral found in a variety of construction materials and is commonly associated with manufactured concrete products, ceramic tiles, mortar, and products in the electronics industry.

Many building materials within the Site building are expected to contain silica, such as, but not limited to, concrete foundations, block walls and tiled floors. The basement walls and floor of the Site building are constructed of concrete.

Polychlorinated Biphenyls

In 1977, the Canadian government enacted a set of chlorobiphenyls regulations which limited the use of polychlorinated biphenyls (PCBs). As such, the only allowable use of PCBs in Canada is in electrical transformers and capacitors existing in Canada before July 1, 1980, and certain other “closed use” equipment (specifically heat transfer equipment, hydraulic equipment and vapour diffusion pumps) that were in Canada before September 1, 1977.

PCBs are also commonly found within electrical ballasts manufactured prior to 1981, within fluorescent light fixtures and high intensity discharge (HID) lamps. Light fixtures with T12 lamps are more likely to contain ballasts that were manufactured prior to 1981. T8 lamps are associated with light fixtures that were manufactured after the phase-out of PCB-containing ballasts. The letter “T” denotes the shape of the light fixture (e.g. tubular) and the number which follows indicates the diameter in eighths of an inch.

DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic. As such, DST was unable to confirm the presence of fluorescent light fixtures which may contain PCB light ballasts.

Ozone Depleting Substances

Canada signed the Montreal Protocol on September 16, 1987 which controlled the use of Ozone Depleting Substances (ODSs) and banned over 100 ODSs grouped into the following categories: chlorofluorocarbons (CFCs); halons; carbon tetrachloride (CTC); hydrochlorofluorocarbons (HCFC); methyl chloroform; and methyl bromide. ODSs can be found in older refrigerating and air conditioning equipment.

Based on the current use of the Site building (restaurant), ODS-containing equipment, such as air conditioning units, refrigerators and freezers, are expected within the Site building.

Mould

DST was unable to access the interior areas of the Site building due to restrictions related to the COVID-19 pandemic. As such, DST was unable to confirm the presence or absence of mould within the building.

5.2.13 Potentially Contaminating Activities

No on-Site potentially contaminating activities (PCAs) were identified during the Site reconnaissance.

5.2.14 Unidentified Substances

No unidentified substances were observed at the Site at the time of the Site reconnaissance.

5.3 Neighbouring Properties

Nearby properties were observed from publicly accessible areas. The property uses of the immediate adjacent and neighbouring properties surrounding the Site are summarized in the following table.

Table 5: Immediate Adjacent and Neighbouring Property Uses

Direction	Surrounding Property Activities
North	Belfast Road, followed by a MacEwen gas station, Sunlight Oil and Auto Parts Lancaster Auto Sales, and Red Lobster, followed by other commercial properties, including additional automotive repair garages.
East	Lagan Way, followed by Nutri-Lawn Ottawa Ecology and further commercial properties, including several automotive repair garages.
South	Ottawa Wraptors and Ottawa Auto Care, followed by the Obsession Lounge and The Nuden Adult Entertainment and further commercial properties.
West	St. Laurent Blvd., followed by a commercial complex containing retail shops and an associated parking lot.

6 Results of Records Review, Site Reconnaissance and Interviews

6.1 Current and Past Uses

Based on a review of historical aerial photographs and city directories, the Site has been used for commercial/retail purposes since its development. The Site was first developed between 1954 and 1958. The 1958 aerial photograph shows a commercial-style building present at the Site, while the first record for the Site in the city directories was in 1959, under Husband Transport Ltd. Based on a review of later aerial photographs, the previous building appears to have been demolished between 1976 and 1987 since the current building was constructed in 1987. Based on information provided during the interview, the current Site building has been used as a restaurant since its construction.

6.2 Interpreted Hydrogeological Conditions

The Site is located within an area where the overburden material mainly consists of sand with some clay and gravel. The nearest surface water feature to the Site is Green's Creek, located approximately 1.7 km east of the Site.

The above conditions have been interpreted based on available information for the purposes of evaluating the data presented in this Phase I ESA. They are not intended to replace subsurface Phase II ESAs in any way.

6.3 Potentially Contaminating Activities

The presence of PCAs in the Phase I ESA study area does not necessarily indicate that the soil and groundwater at the Site are affected by these contaminants. It depends on individual use of best management practices at the locations of the PCAs and the location of any existing contamination relative to the Site.

Based on the Phase I ESA activities and results described in this report, the following PCAs were identified in the Phase I study area.

Table 6: Phase I Study Area PCAs

Potentially Contaminating Activity	Details	Location of PCA
PCA 1 – Existing and historical presence of retail fuel outlet and automotive repairs	Based on historical records and observations made during the Site reconnaissance, a retail fuel outlet and an automotive repair shop are present at 1515 St. Laurent Blvd.	Approximately 25 m north of the Site
PCA 2 – Historical presence of gas bar and fuel oil depot	Based on historical records, a gas bar and fuel oil depot (with associated USTs) were historically present at the property located at 1499 St. Laurent Blvd.	Approximately 80 m north of the Site

Potentially Contaminating Activity	Details	Location of PCA
PCA 3 – Historical presence of oil dealer and underground oil tanks	Based on historical records, an oil dealer and underground oil tanks were historically present at the property located at 1560 St. Laurent Blvd.	Approximately 40 m south of the Site
PCA 4 – Existing and historical presence of automotive repair garages	Based on historical records and observations made during the Site reconnaissance, numerous automotive repair garage were/are present at multiple properties to the north, east and south of the Site, within the Phase I study area.	To the north, east and south of the Site – within Phase I study area
PCA 5 – Historical diesel fuel spill	Based on historical records, a spill of approximately 100 L of diesel fuel occurred at the intersection of St. Laurent Blvd. and Belfast Rd. as a result of a motor vehicle accident on November 4, 2003.	Approximately 25 m northwest of the Site
PCA 6 – Existing bus depot, USTs and historical spills	Based on historical records, a bus depot (O.C Transpo), several USTs and a number of historical spills were identified at the property located at 1500 St. Laurent Blvd.	Approximately 60 m northwest of the Site

7 Site Condition Standards

Based on Site conditions, the following Site Conditions Standards were considered applicable to the Site:

SOIL:

- Ontario Ministry of the Environment, Conservation and Parks (MECP) "Soil, Groundwater and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act", April 2011. Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Ground Water Condition (Industrial/Commercial/Community Property Use, coarse textured soils).

GROUNDWATER:

- MECP "Soil, Groundwater and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act", April 2011. Table 3: Full Depth Generic Site Condition Standards for a Non-Potable Ground Water Condition (All Types of Property Use, coarse textured soils).

The rationale for the selection of the above-referenced Site Condition Standards was as follows:

- The Site and its adjacent properties are supplied with potable water through the City of Ottawa's municipal drinking water system; thus, the potable groundwater pathway is not considered applicable;
- The current use of the Site is commercial;
- No shallow bedrock conditions were encountered within the boreholes advanced at the Site;
- The Site is located more than 30 metres from the nearest surface water body;
- Surface soils at the Site do not have a pH value less than 5 or greater than 9 (refer to the laboratory certificates of analysis in Appendix G); and
- A coarse-grained soil texture was selected for comparison of analytical data to applicable provincial standards as this represents the 'worst-case' scenario.

8 Field Investigation Methodology

8.1 Borehole Drilling

The drilling program took place on May 5, 2021 and consisted of the advancement of four boreholes (MW1-21 through MW4-21). All four boreholes were instrumented with groundwater monitoring wells and were advanced within the parking lot area of the Site.

The boreholes were advanced by CCC Geotechnical & Environmental Drilling Ltd. (CCC), under the supervision of DST field personnel, using a CME truck-mounted drill rig. The boreholes were advanced through the overburden using hollow stem augers. The drill rig was equipped with a split spoon sampling device, which allowed for continuous soil sampling in the overburden.

Representative soil samples were recovered in 0.6 m intervals, where possible, and were then placed directly into laboratory-supplied containers.

The boreholes were advanced to depths ranging from 4.1 metres below ground surface (m bgs) to 5.2 m bgs.

A Borehole/ Monitoring Well Location Plan is provided as Figure 3, in Appendix A. Borehole logs are provided in Appendix E.

8.2 Soil Sampling

Soil samples were placed directly into laboratory-supplied sample jars and vials. The sample jars were filled completely with soil to minimize the amount of headspace vapour within the jars. Samples to be submitted for laboratory analysis of PHC F2 – F4 were placed in unpreserved 120 mL clear glass jars with Teflon lids, while samples to be submitted for laboratory analysis of volatile compounds (VOCs and PHC F1) were collected using disposable soil plug sample collectors supplied by the laboratory. The soil plugs were placed in laboratory-supplied vials charged with measured volumes of methanol for sample preservation.

Soil samples were logged in the field for texture, odour, moisture and visual appearance (staining).

8.3 Field Screening Methods

A portion of each collected soil sample from the advanced boreholes was placed in a polyethylene bag and was allowed to equilibrate in a warm environment prior to being screened for combustible vapour concentrations (CVCs). Combustible vapour concentrations of soil samples were measured using an RKI Eagle 2™ dual gas portable vapour meter. The RKI Eagle 2™ is equipped with a catalytic combustible gas detector (CCGD) with a detection limit of 5 parts per million (ppm), and a photoionization detector (PID) with a detection limit of 1 ppm, for the detection of PHC and VOC vapour concentrations. The vapour meter was operated in methane elimination mode and was calibrated prior to use.

Based on visual and olfactory observations, CVC measurements, and the position of the collected soil samples with respect to the inferred groundwater table, four soil samples were submitted for

laboratory analysis. The CVCs of the collected soil samples, as measured by the vapour meter, are provided in the borehole logs in Appendix E. Soil sample locations and analysis are presented in the table below.

Table 7: Summary of Soil Samples Submitted for Laboratory Analysis

Sampling Date (d/m/y)	Sample ID/Location	Sample Depth (m bgs)	Laboratory Analysis
5/5/2021	MW1-21 SS4	2.3 – 2.9	PHCs F1 – F4, VOCs
5/5/2021	MW2-21 SS5	3.0 – 3.4	PHCs F1 – F4, VOCs
5/5/2021	MW3-21 SS5	3.1 – 3.7	PHCs F1 – F4, VOCs
5/5/2021	MW4-21 SS3	1.5 – 2.1	PHCs F1 – F4, VOCs, pH

8.4 Monitoring Well Installation

Monitoring wells were installed by CCC, in all four of the advanced boreholes, using the same drilling equipment described above. The wells were constructed with a 50 mm diameter polyvinyl chloride (PVC) pipe and a #10 slotted PVC well screen, approximately 3.0 m in length. A sand-pack consisting of clean silica gravel was placed within the annular space surrounding the screened section of the wells and to a depth of approximately 0.3 m above the top of the screen. Bentonite chips were added from the top of the sand layer to within 0.3 m of the surface to minimize the potential for cross-contamination between aquifers. A locking J-Plug cap was placed at the top of each well pipe and a protective flush-mount steel casing was cemented at surface to protect the well. The monitoring wells were installed in accordance with *Ontario Regulation (O. Reg.) 903 – Wells (as amended)*, made under the *Ontario Water Resources Act*.

The monitoring wells were developed using polyethylene tubing equipped with inertial foot valves to remove any groundwater impacted by drilling activities and to reduce the amount of sediment within the wells.

8.5 Groundwater Level Measurements

Prior to sampling, groundwater levels and the presence/absence of light and dense non-aqueous phase liquids (LNAPLs and DNAPLs) were measured using a Heron Instruments™ oil/water interface probe that was thoroughly decontaminated between monitoring wells using reagent-free detergent and water, followed by a distilled water rinse. New powder-free nitrile gloves were worn during the sampling process and discarded between samples to prevent cross-contamination.

8.6 Groundwater Sampling

In order to remove any stagnant groundwater prior to sampling and reduce the amount of sediment within the wells, the installed monitoring wells were developed on May 11, 2021. All four monitoring wells were purged of approximately three well volumes of groundwater each. The wells were developed using dedicated polyethylene tubing equipped with inertial foot valves.

On May 12, 2021, groundwater sampling was completed using low flow techniques using a peristaltic pump, operating at a low flow rate (<1 L/minute). DST monitored the water quality parameters using a Horiba™ U52 multi-parameter water quality meter, including pH, conductivity, dissolved oxygen (DO), temperature, turbidity and oxygen redox potential (ORP), and recorded each reading every 3 to 5 minutes during, purging prior to sampling. Groundwater samples were collected after three consecutive readings of field groundwater parameters were within 10% of each other. Once field parameters stabilized, the flow-through cell was removed, and the groundwater sample was collected directly into laboratory-supplied sample containers.

All groundwater sample containers were labelled with the DST project number and site name, monitoring well identification, and sampling date. Groundwater samples were then placed in clean laboratory-supplied coolers containing ice made from potable water, to store and maintain the samples at a temperature below 10°C.

Prior to well development, purging, and the collection of every groundwater sample, the peristaltic pump and other sampling equipment were decontaminated with reagent-free detergent and distilled water with a distilled water rinse. New powder-free nitrile gloves were donned by the DST technician prior to the handling of each sample, to eliminate cross-contamination.

Groundwater sample locations and analyses are presented below.

Table 8: Summary of Groundwater Samples Submitted for Laboratory Analysis

Sampling Date (d/m/y)	Sample ID/ Location	Laboratory Analysis
12/5/2021	MW01-21	PHCs F1 – F4, VOCs
	MW02-21	PHCs F1 – F4, VOCs
	MW03-21	PHCs F1 – F4, VOCs
	MW04-21	PHCs F1 – F4, VOCs

8.7 Analytical Testing

Soil and groundwater samples were submitted to Paracel Laboratories Inc. (Paracel) of Ottawa, Ontario, for chemical analysis. Paracel is a Canadian Association for Laboratory Accreditation Inc. (CALA) accredited laboratory.

8.8 Residue Maintenance

All soil cuttings resulting from drilling activities, purge water resulting from well development and purging activities, and fluids resulting from equipment decontamination were appropriately contained and secured on Site, and proper disposal was coordinated by DST.

8.9 Quality Assurance / Quality Control

DST maintains a standard Quality Assurance/ Quality Control (QA/QC) program for environmental investigations. All project documentation was maintained and controlled by the appointed field supervisor. All borehole advancement and soil and groundwater sampling were completed in accordance with industry standards, and applicable provincial standards/guidelines.

Collected soil and groundwater samples during the investigation were placed in ice-packed coolers prior to being delivered, under a Chain of Custody protocol, to Paracel for chemical analysis.

The potential for cross-contamination between samples was minimized by, where applicable, washing sampling tools with reagent-free detergent and water, followed by rinsing with distilled water, and by wearing new disposable nitrile gloves prior to the handling of each sample. All field screening instruments (i.e. RKI Eagle 2™ vapour meter and the water quality meter) were calibrated prior to arriving on Site.

9 Field Investigation Results

9.1 Stratigraphy

Based on the soil data collected during the advancement of the boreholes, the general soil stratigraphy at the Site is characterized by a surficial asphalt layer underlain by a layer of fill material, mainly consisting of gravel and sand, which in turn is underlain by clayey sand then sandy gravel.

Detailed descriptions and soil stratigraphy for each borehole are provided in the borehole logs in Appendix E.

9.2 Groundwater Field Measurements and Elevations

As previously noted, DST field personnel collected groundwater level measurements from the installed monitoring wells prior to groundwater sampling activities. The measured groundwater levels and groundwater elevations are presented in the table below.

Table 9: Groundwater Levels and Elevations (May 11, 2021)

Monitoring Well ID	Elevation (m)	Groundwater Depth (m bgs)	Groundwater Elevation (m)
MW1-21	99.09 (GS)	1.56	97.53
MW2-21	98.93 (GS)	1.78	97.15
MW3-21	99.41 (GS)	1.84	97.57
MW4-21	99.27 (GS)	1.89	97.38

Notes: - GS refers to the ground surface adjacent to the monitoring well.
- Elevations are reported in metres relative to an arbitrary, non-geodetic benchmark (top of foundation at northeast corner of Site building – Assumed Elevation 100 m).

Based on the groundwater elevation data noted in the table above, the local groundwater flow across the Site is inferred to be in an easterly/ north-easterly direction.

9.3 Field Observations

Visual and olfactory evidence of petroleum impacts (PHC odours and sheen) were observed during the drilling and collection of soil samples from borehole MW1-21. Additionally, PHC odours and a minor hydrocarbon sheen was noted during the development of monitoring well MW1-21.

There was no visual or olfactory evidence of petroleum or other impacts observed in any of the soil or groundwater samples collected from other boreholes/ monitoring wells advanced at the Site.

9.4 Soil Quality

Analytical results of the soil samples submitted for laboratory analysis were compared against the applicable MECP Table 3 standards for Industrial/Commercial/Community Property Use and coarse textured soils.

Based on the laboratory analytical results, the following exceedances of the applicable MECP Table 3 standards were detected in the collected soil samples:

- Concentrations of ethylbenzene in the soil sample collected from MW1-21 (70.0 µg/g) exceeded the applicable MECP Table 3 standard (9.5 µg/g).
- Concentrations of total xylenes in the soil sample collected from MW1-21 (38.4 µg/g) exceeded the applicable MECP Table 3 standard (26 µg/g).
- Concentrations of PHC F1 in the soil sample collected from MW1-21 (1,730 µg/g) exceeded the applicable MECP Table 3 standard (55 µg/g).
- Concentrations of PHC F2 in the soil sample collected from MW1-21 (373 µg/g) exceeded the applicable MECP Table 3 standard (230 µg/g).

Concentrations of all other analyzed parameters in the collected soil samples were below their respective MECP Table 3 standards.

Refer to Tables F-1 and F-2, in Appendix F, for the soil analytical results. The laboratory certificates of analysis are provided in Appendix G.

9.5 Groundwater Quality

Analytical results of the groundwater samples submitted for laboratory analysis were compared against the applicable MECP Table 3 standards for All Types of Property Use and coarse textured soils.

Based on the laboratory analytical results, no exceedances of the applicable MECP Table 3 standards for the analyzed parameters were identified in the collected groundwater samples.

Refer to Tables F-3 and F4, in Appendix F, for the groundwater analytical results. The laboratory certificates of analysis are provided in Appendix G.

10 Assessment Summary

DST conducted a combined Phase I & II ESA at the property located at 1531 St. Laurent Boulevard in Ottawa, Ontario.

Based on the findings of the Phase I ESA portion of DST's assessment, the following PCAs were identified within the Phase I study area:

1. Existing and historical presence of retail fuel outlet and automotive repairs at 1515 St. Laurent Boulevard (approximately 25 m north of the Site);
2. Historical presence of gas bar and fuel oil depot at 1499 St. Laurent Boulevard (approximately 80 m north of the Site);
3. Historical presence of oil dealer and underground oil tanks at 1560 St. Laurent Boulevard (approximately 40 m south of the Site);
4. Existing and historical presence of automotive repair garage at numerous properties to the north, east and south of the Site, within the Phase I study area;
5. Historical diesel fuel spill at the intersection of St. Laurent Boulevard and Belfast Road (approximately 25 m northwest of the Site); and
6. Existing bus depot, USTs and historical spills at 1500 St. Laurent Boulevard (approximately 60 m northwest of the Site).

The Phase II ESA portion of the assessment was conducted in order to further evaluate the above-noted PCAs and to confirm the presence or absence of potential contaminants of concern in the soil and groundwater on Site. The field program consisted of the advancement of four boreholes, instrumented with groundwater monitoring wells, at select locations on Site. A total of four soil samples and four groundwater samples (one soil and one groundwater sample from each borehole/ monitoring well) collected during the investigation were submitted for laboratory analysis of PHCs F1 – F4 and VOCs.

Based on the laboratory analytical soil results, the following exceedances of the applicable MECP Table 3 standards were detected in the collected soil samples:

- Concentrations of ethylbenzene, total xylenes, PHC F1 and PHC F2 in the soil sample collected from MW1-21 exceeded their respective applicable MECP Table 3 standards.

Concentrations of all other analyzed parameters in the collected soil samples were below their respective MECP Table 3 standards.

Based on the laboratory analytical groundwater results, all collected groundwater samples met the applicable MECP Table 3 standards for PHCs F1 – F4 and VOCs.

11 Conclusions & Recommendations

Further to the completion of the Phase I and II ESAs, the assessment identified impacts to the soil quality at borehole location MW1-21, which is located to the north of the building footprint on Site. This location is immediately adjacent to Belfast Road. The subject impacts at this borehole location may be attributed to off-Site sources potentially linked to one or more of the previously-noted PCAs within the Phase I study area.

It is estimated (based on the current limited data available) that existing soils to the north of the Site building, up to the northern property boundary, have impacts above the applicable MECP Table 3 standards, from a depth of approximately 1.0 m bgs to 3.0 m bgs. Further investigation is recommended to the south and east of borehole MW1-21 in order to confirm the horizontal and vertical extents of the soil impacts at this borehole location.

All other test locations on site meet the applicable standards for soils and groundwater quality.

12 Limitations of Report

The information, conclusions and recommendations given herein are specifically for this project and this Client (101381 Canada Inc. & Coffee Factory Inc.) only, and for the scope of work described herein. It may not be sufficient for other uses. DST does not accept responsibility for use by third parties.

The data, conclusions and recommendations which are presented in this letter, and the quality thereof, are based on a scope of work authorized by the Client. Note, however, that no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground. For example, conditions between test holes may differ from those encountered in the investigation and observed or measured conditions may change with time. This letter, therefore, cannot warranty that all conditions on or off the site are represented by those identified at specific locations.

Any recommendations and conclusions provided that are based on conditions or assumptions reported herein will inherently include any uncertainty associated with those conditions or assumptions. In fact, many aspects involving professional judgement such as subsurface models and remediation criteria contain a degree of uncertainty which cannot be eliminated. This uncertainty should be managed by periodic review and refinement as additional information becomes available.

Note also that standards, guidelines and practices related to environmental investigations may change with time. Those which were applied at the time of this investigation may be obsolete or unacceptable at a later date.

Any topographic benchmarks and elevations documented in this letter are primarily to establish relative elevation differences between test locations and should not be used for other purposes such as grading, excavation, planning, development, etc.

Any comments given in this letter on potential remediation problems and possible methods are intended only for the guidance of the designer. The scope of work may not be sufficient to determine all of the factors that may affect construction or clean-up methods and costs. Contractors bidding on this project or undertaking clean-ups should, therefore, make their own interpretation of the factual information presented and draw their own conclusions as to how the conditions may affect their work.

Any results from an analytical laboratory, title searcher or other subcontractor reported herein have been carried out by others, and DST cannot warranty their accuracy. Similarly, DST cannot warranty the accuracy of information supplied by the Client.

13 Closure

This report was prepared for the exclusive use of 101381 Canada Inc. & Coffee Factory Inc. Any use of this report by any third party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. DST accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

We trust the information herein meets your present requirements. Should you have any questions, please do not hesitate to contact the undersigned.

Yours truly,

For **DST, a division of Englobe**

Andrew Couturier, B.Sc., C.E.T., EP
Environmental Technician

Salim Eid, P.Eng.
Team Lead

License Issue Date:		7/2/2002			
Tank Status:		Licensed			
Tank Status As Of:		August 2007			
Operation Type:		Retail Fuel Outlet			
Facility Type:		Gasoline Station - Full Serve			
--Details--					
Status:		Active			
Year of Installation:		1992			
Corrosion Protection:					
Capacity:		45400			
Tank Fuel Type:		Liquid Fuel Single Wall UST - Diesel			
Status:		Active			
Year of Installation:		1992			
Corrosion Protection:					
Capacity:		22700			
Tank Fuel Type:		Liquid Fuel Single Wall UST - Gasoline			
Status:		Active			
Year of Installation:		1992			
Corrosion Protection:					
Capacity:		22700			
Tank Fuel Type:		Liquid Fuel Single Wall UST - Gasoline			
Status:		Active			
Year of Installation:		1992			
Corrosion Protection:					
Capacity:		22700			
Tank Fuel Type:		Liquid Fuel Single Wall UST - Gasoline

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Dec 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Feb 28, 2021

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Mar 31, 2021

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Feb 28, 2021

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Mar 31, 2021

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2021

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jan 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jan 31, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2018

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2020

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Feb 28, 2021

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Mar 31, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Feb 28, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Mar 2020; Jul 2020 - Aug 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Mar 31, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Opta Historical Environmental Services Enviroscan TM Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Dear Mr. Couturier,

This letter is in response to your request under the *Access to Information Act* for:

“Owner: 101381 Canada Inc. and Coffee Factory Inc.

Property: 1531 St. Laurent Boulevard, Ottawa, ON K1G 1A1

Environmental Concerns (General correspondence, occurrence reports, abatement), Orders, Tanks (ASTs/USTs), Spills, Investigations/Prosecutions (with owner/tenant information), and Waste Generator number/classes. Certificates of Approval including; Air-emissions, Water, Sewage, Waste Water - industrial discharge, Waste Systems, and Pesticide licenses.

Authorization: {Robbie Skaff}”

After a thorough search, no records were found concerning this request.

Please be advised that you are entitled to file a complaint with the Information Commissioner of Canada concerning the processing of your request within sixty days of the receipt of this notice. In the event you decide to avail yourself of this right, your notice of complaint should be addressed to:

Information Commissioner of Canada
30 Victoria Street
Gatineau, Québec K1A 1H3

.../2

If you have any questions regarding this request, please do not hesitate to contact Josée Bécharde by email at josee.becharde@ec.gc.ca.

Yours sincerely,

Sent via email [acouturier@dstgroup.com]

Dear Mr. Couturier,

**Re: Information Request
1531 St Laurent Boulevard, Ottawa, Ontario ("Subject Property")**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Ren". The signature is fluid and cursive, with a horizontal line underlining the name.

Jeffrey Ren

Borehole Logs

MW2-21

DST Project No.	02105693.000	Date	May 5, 2021
Client	101381 Canada Inc. & Coffee Factory Inc.	Method	Hollow Stem Auger
Project	Phase I/II Environmental Site Assessment	Diameter	200 mm
Address	1531 St. Laurent Blvd, Ottawa, ON		

Template: DST - ENVIRONMENTAL LOG SHEET A1 Date: September 22, 2021
 File: C:\USERS\MENDOZA\DOCUMENTS\WORK FROM HOME 03.24.2020\GINT LIB\LIBRARY - DST.LOGO.GLB
 Library: C:\USERS\MENDOZA\DOCUMENTS\WORK FROM HOME 03.24.2020\GINT LIB\LIBRARY - DST.LOGO.GLB
 ST LAURENT BLVD ESA.GPJ

Depth (m)	Elevation (m)	Water level	Well construction	Depth (m) Elevation (m)	Symbol	Material Description	Sample #	Sample Type	% Samp. Recov	CCGD / PID Reading		Analysis					Remarks		
										CCGD	PID	PAHs	PHC/BTEX	Metals / Inorganics	VOCs	Others			
				0		ASPHALT													
				0.075		FILL - GRAVEL, trace sand, grey, moist													
0.5							SS1	50		0 ppm	0 ppm								
				0.9		- SAND, trace gravel, brown, moist													
1.0							SS2	65		0 ppm	1 ppm								
				1.1		CLAYEY SAND - grey, moist													
1.5							SS3	75		0 ppm	0 ppm								
2.0																			
				2.3		- some gravel, grey, moist													
2.5							SS4	100		0 ppm	0 ppm								
3.0																			
				3.4		POSSIBLE BEDROCK - (Augered) highly weathered and fractured													
3.5							SS5	100		0 ppm	2 ppm		✓			✓			
				3.9		- no recovery													
4.0																			
4.5						End of Borehole at 4.4 m.													
5.0																			

Groundwater level at 1.78 mbgs on May 11, 2021.

Monitoring Well Protected with Flushmount Casing

APPENDIX G

Laboratory Certificates of Analysis

Certificate of Analysis

DST Consulting Engineers Inc. (Ottawa)

203-2150 Thurston Dr.
Ottawa, ON K1G 5T9
Attn: Salim Eid

Client PO: 1531 St. Laurent
Project:
Custody: 131614

Report Date: 10-May-2021
Order Date: 6-May-2021

Order #: 2119399

This Certificate of Analysis contains analytical data applicable to the following samples as submitted:

Parcel ID	Client ID
2119399-01	MW1-21 SS4
2119399-02	MW2-21 SS5
2119399-03	MW3-21 SS5
2119399-04	MW4-21 SS3

Approved By:

Mark Foto, M.Sc.
Lab Supervisor

Certificate of Analysis

Report Date: 10-May-2021

Client: DST Consulting Engineers Inc. (Ottawa)

Order Date: 6-May-2021

Client PO: 1531 St. Laurent

Project Description:

Analysis Summary Table

Analysis	Method Reference/Description	Extraction Date	Analysis Date
pH, soil	EPA 150.1 - pH probe @ 25 °C, CaCl buffered ext.	7-May-21	7-May-21
PHC F1	CWS Tier 1 - P&T GC-FID	7-May-21	8-May-21
PHCs F2 to F4	CWS Tier 1 - GC-FID, extraction	6-May-21	10-May-21
REG 153: VOCs by P&T GC/MS	EPA 8260 - P&T GC-MS	7-May-21	8-May-21
Solids, %	Gravimetric, calculation	7-May-21	7-May-21

Certificate of Analysis

Report Date: 10-May-2021

Client: **DST Consulting Engineers Inc. (Ottawa)**

Order Date: 6-May-2021

Client PO: 1531 St. Laurent

Project Description:

Qualifier Notes:

None

Sample Data Revisions

None

Work Order Revisions / Comments:

None

Other Report Notes:

n/a: not applicable
ND: Not Detected
MDL: Method Detection Limit
Source Result: Data used as source for matrix and duplicate samples
%REC: Percent recovery.
RPD: Relative percent difference.
NC: Not Calculated

Soil results are reported on a dry weight basis when the units are denoted with 'dry'.
Where %Solids is reported, moisture loss includes the loss of volatile hydrocarbons.

CCME PHC additional information:

- The method for the analysis of PHCs complies with the Reference Method for the CWS PHC and is validated for use in the laboratory. All prescribed quality criteria identified in the method has been met.
- F1 range corrected for BTEX.
- F2 to F3 ranges corrected for appropriate PAHs where available.
- The gravimetric heavy hydrocarbons (F4G) are not to be added to C6 to C50 hydrocarbons.
- In the case where F4 and F4G are both reported, the greater of the two results is to be used for comparison to CWS PHC criteria.
- When reported, data for F4G has been processed using a silica gel cleanup.

Order Date: 12-May-2021

Client PO:

Project Description: 1531 St. Laurent Blvd

Qualifier Notes:

QC Qualifiers :

QR-07 : Duplicate result exceeds RPD limits due to non-homogeneity between multiple sample vials. Remainder of QA/QC is acceptable.

Sample Data Revisions

None

Work Order Revisions / Comments:

None

Other Report Notes:

n/a: not applicable

ND: Not Detected

MDL: Method Detection Limit

Source Result: Data used as source for matrix and duplicate samples

%REC: Percent recovery.

RPD: Relative percent difference.

NC: Not Calculated

CCME PHC additional information:

- The method for the analysis of PHCs complies with the Reference Method for the CWS PHC and is validated for use in the laboratory. All prescribed quality criteria identified in the method has been met.
- F1 range corrected for BTEX.
- F2 to F3 ranges corrected for appropriate PAHs where available.
- The gravimetric heavy hydrocarbons (F4G) are not to be added to C6 to C50 hydrocarbons.
- In the case where F4 and F4G are both reported, the greater of the two results is to be used for comparison to CWS PHC criteria.
- When reported, data for F4G has been processed using a silica gel cleanup.
