Bearings are grid-derived from Can-Net 2016 Real Time Network GPS observations and are referenced to Specified Control points 01919680105 and 019196434761, MTM Zone 9 (76°30' West Longitude) NAD-83 (original).

For bearing comparisons, a rotation of 0°02'50" counter-clockwise was applied to bearings on plans (P2) and P3, and a rotation of 0°02'30" counter-clockwise was applied to bearings on plans (P1), (P4) and (P5).

1. Elevations shown are geodetic and are referred to the CGVD28 geodetic datum.
2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that it's relative elevation and description agrees with the information shown on this drawing.

UTILITY NOTES

1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
2. Only visible surface utilities were located.
3. A field location of underground pipe by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating, etc.
