## **EXECUTIVE SUMMARY**

### **Assessment**

Paterson Group was retained by Inside Edge Properties to conduct a Phase I-Environmental Site Assessment (ESA) for the property addressed 1657-1673 Carling Avenue, and 386 Tillbury Avenue, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the southern portion of the Phase I Property was first developed circa 1957 for commercial purposes: Sheridan Equipment Co. Ltd. Bulldozers and was subsequently redeveloped circa 1976 with the present-day multi-tenant commercial building. The northern portion of the Phase I Property was developed with the existing residential dwelling circa 2008.

The former use of the site for the storage of heavy equipment is considered to represent a potentially contaminating activity (PCA) on the Phase I Property, resulting in an area of potential environmental concern (APEC).

The historical use of the neighbouring lands consisted of commercial along both sides of Carling Avenue east and west of the Phase I Property, with an industrial property further south of Carling Avenue. Residential land use occurred to the north of the Phase I Property.

Several historical off-site PCAs were identified within the Phase I Study Area. Of note, 4 of these PCAs were considered to result in 2 APECs on the Phase I Property: a historical retail fuel outlet (RFO) and automotive service garage on the adjacent property to the west were considered to result in an APEC along the northwestern portion of the Phase I Property, while a former heating oil AST and reported groundwater impacts on the adjacent property to the east were considered to represent an APEC along the southeastern portion of the Phase I Property.

Additional off-site PCAs identified within the Phase I Study Area were not considered to result in APECs on the Phase I Property given their separation distances of over 50m, their orientations down- or cross-gradient relative to the Phase I Property, and/or information contained in the MECP Environmental Site Registry.

## Recommendations

Based on the findings of the Phase I ESA, no new PCAs have been identified since the time of the 2018 Phase II ESA conducted by others. Given the date of the previous Phase II ESA, it is recommended that the Phase II ESA report be updated in general accordance with O.Reg. 153/04, to support the filing of municipal applications and ultimately a Record of Site Condition.

It is our understanding that the Phase I Property will be redeveloped for residential purposes, and as such, a Record of Site Condition (RSC) will be required for the northern portion of the Phase I Property due to the more sensitive land use change.

A designated substance survey (DSS) of the commercial building must be conducted prior to demolition of the existing building in accordance with Ontario Regulation 490/09, under the Occupational Health and Safety Act, prior to the disturbance of any designated substances.

## 1.0 INTRODUCTION

At the request of Inside Edge Properties, Paterson Group (Paterson) conducted a Phase I-Environmental Site Assessment (Phase I-ESA) for the properties located at 1657 to 1673 Carling Avenue and 386 Tillbury Avenue, in the City of Ottawa, Ontario, herein referred to as the Phase I Property. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and properties within the Phase I Study Area to identify any potentially contaminating activities (PCAs) that would result in areas of potential environmental concern (APECs) on the Phase I Property.

Paterson was engaged to conduct this Phase I-ESA by Mr. Jordan R. Bianconi from Inside Edge Properties. The head office is located at 464 Bank Street, Ottawa Ontario. Mr. Bianconi can be reached by telephone at (613) 482-8324.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all of our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared under the supervision of a Qualified Person, in general accordance with Ontario Regulation (O.Reg.) 153/04, as amended under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

| Configuration:                           | Irregular                                                                                                                                                                                                                                                                                                         |
| Area:                                    | 3,890m <sup>2</sup> (approximately)                                                                                                                                                                                                                                                                               |
| Zoning:                                  | AM10 – Arterial Mainstreet Zone (Mixed-use)                                                                                                                                                                                                                                                                       |
| Current Use:                             | The northern portion of the Phase I Property fronting Tillbury Avenue is currently occupied by a 2-storey residential dwelling. The southern portion of the Phase I Property, fronting Carling Avenue, is occupied by a 2-storey multi-tenant commercial retail/office building and associated vehicular parking. |
| Services:                                | The Phase I Property is situated in a municipally serviced area.                                                                                                                                                                                                                                                  |

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- ☐ Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- ☐ Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- ☐ Conduct interviews with persons knowledgeable of current and historic operations on the subject properties, and if warranted, neighbouring properties;
- ☐ Present the results of our findings in a comprehensive report in general accordance with the requirements of O.Reg. 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01 (reaffirmed 2022);
- ☐ Provide a preliminary environmental site evaluation based on our findings;
- ☐ Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I-ESA Study Area Determination**

A radius of approximately 250 m was determined to be appropriate as a Phase I Study Area for this assignment. Properties outside the 250 m radius are not considered to have impacted the subject land, based on their significant distance from the site.

#### **First Developed Use Determination**

Based on the review of available aerial images along with 1948 and 1957 Fire Insurance Plans (FIPs) and City Directory listings, the Phase I Property was first developed for commercial purposes circa 1957.

#### **Fire Insurance Plans**

The 1948 and 1957 Fire Insurance Plans (FIPs) for the Phase I Property and properties within the Phase I Study Area were reviewed as part of this assessment.

The 1948 FIP depicts the Phase I Property as a vacant plot of land, while the 1957 FIP depicts the southern portion of the Phase I Property (1657-1673 Carling Avenue) as being occupied by a commercial building denoted as “Sheridan Equipment Co. Ltd. Bulldozers, etc.”. According to the FIPs, the building was primarily storage space with office space fronting Carling Avenue.

The 1948 and 1957 FIPs depict the surrounding lands as being occupied by residential dwellings to the north, and commercial properties along Carling Avenue, to the east, west and south. Several off-site potentially contaminating activities (PCAs) were identified during the review of the FIPs, and are summarized in Table 1, along with their separation distances and relative orientations with respect to the Phase I Property.

The historical retail fuel outlet on the adjacent land to the west (1677 Carling Avenue) is considered to result in an APEC on the Phase I Property, although it is considered to be low risk based on the separation distance of 35m from the tank nest and the cross-gradient orientation relative to the Phase I Property. Groundwater flow is expected to be in a northerly direction based on regional topography.

The remaining off-site PCAs are not considered to represent APECs on the Phase I Property, based on their respective separation distances and/or cross-gradient orientations relative to the subject land.

| 1678                                                                                              | Cement Manufactured Products (1948-1957) | 50m SW                                | No                |
| <b>Clyde Avenue</b>                                                                               |                                          |                                       |                   |
| 822                                                                                               | Fibreglass Boat Manufacturer (1948-1957) | 170m SW                               | No                |
| 842                                                                                               | Industrial Wax Manufacturer (1948-1957)  | 215m SW                               | No                |

## City Directories

City directories were reviewed in approximate ten (10) year intervals from 1960 through 2011. The commercial portion of the Phase I Property was first listed in 1958 as Sheridan Equipment Co. The subject commercial addresses (1657 to 1673 Carling Avenue) were not listed in the City Directories between 1973 and 1979. From 1980 through 2011, the commercial addresses were listed as retailers, legal offices, a medical clinic, and restaurants. The residential portion of the Phase I Property was first listed in 1980 and has been listed as private individuals since that time.

Based on a review of aerial photographs, the northern portion of 1657 to 1673 Carling Avenue was occupied by yard associated with the Sheridan Equipment Co. This apparent former use is considered a potentially contaminating activity resulting (PCA) in an area of potential environmental concern (APEC) on the Phase I Property. Otherwise, no PCAs were identified on the Phase I Property during the review of the City Directories.

Surrounding lands along Carling Avenue were listed as various car dealerships, retailers, motels and restaurants. The PCAs identified during the City Directory review are listed in Table 2. A former retail fuel outlet and an automotive service garage were identified on the adjacent property to the west. The former uses of the adjacent property to the west are considered to result in an APEC on the Phase I Property.

**Table 2: Potentially Contaminating Activities  
City Directories Review Summary**

| Address               | Listed Activity (years listed)                    | Relative Orientation from Site | APEC (Y/N) |
|-----------------------|---------------------------------------------------|--------------------------------|------------|
| <b>Carling Avenue</b> |                                                   |                                |            |
| 1598                  | Retail fuel outlet and service garage (1960-1980) | 160m SE                        | No         |
| 1599                  | Retail fuel outlet and service garage (1960-2005) | 180m E                         | No         |
| 1607                  | Retail fuel outlet and service garage (1960-2011) | 120m E                         | No         |
| 1622                  | Car dealership and repair garage (1990-2011)      | 120m SE                        | No         |
| 1638                  | Car dealership and repair garage (1990-2011)      | 70m SE                         | No         |
| 1660                  | Automotive repair garage (2007-2011)              | 105m S                         | No         |
| 1677                  | Retail fuel outlet and repair garage (1960-1980)  | 30m W                          | Yes        |

### Plan of Survey

A plan of survey, produced by the Farley, Smith & Denis Surveying Ltd. was reviewed for the commercial portion (1657-1673 Carling Avenue) of the Phase I Property. The commercial portion of the Phase I Property is depicted in its current configuration under the legal description of Part of Lot 2 of Registered Plan 492. A copy of the plan of survey is provided in Appendix 1.

### Previous Engineering Reports

The following engineering reports were reviewed as part of this assessment:

- ☐ "Phase II-Environmental Site Assessment, 1657-1673 Carling Avenue, Ottawa, Ontario," prepared by Pinchin, dated May 4, 2018.
- ☐ "Phase I-Environmental Site Assessment, 1657-1673 Carling Avenue, Ottawa, Ontario," prepared by Pinchin, dated November 11, 2021.

The 2018 Phase II-ESA was completed for the commercial portion of the Phase I Property to address potential environmental concerns identified in a previous Phase I-ESA carried out by Pinchin (and not provided for review). Potentially contaminating activities addressed during the Phase II-ESA included a historical retail fuel outlet (RFO) on the adjacent property to the west (1677 Carling Avenue) and a historical RFO at 1607 Carling Avenue, approximately 130 m east of the subject land.

The subsurface investigation consisted of drilling three (3) boreholes instrumented with groundwater monitoring wells; one was placed on the central west side and two (2) along the eastern side of the subject site. Based on the borehole logs, the overburden encountered during the field program consisted of a pavement structure consisting of asphalt and engineered fill, overlying a native silty sand with traces of clay and gravel, underlain by limestone bedrock.

Bedrock was encountered at depths ranging from 1.52 to 2.74 m below the ground surface (mbgs). Boreholes were terminated at a maximum depth of 7.62 mbgs. No odour or deleterious material was reportedly encountered during the drilling program.

Three (3) soil samples were submitted for analytical testing of petroleum hydrocarbons, fractions F1 through F4 (PHCs, F1-F4) and volatile organic compounds (VOCs), which included the benzene, toluene, ethylbenzene, and xylene (BTEX) group of parameters. All the analyzed parameter concentrations were below the laboratory detection limit and thus, complied with the selected MECP Standards.

Three (3) groundwater samples were retrieved from each of the monitoring wells and submitted for analytical testing of PHCs (F1-F4) and VOCs (including BTEX). All the analyzed parameter concentrations were below the laboratory detection limits and thus, complied with the MECP Standards.

A Phase I ESA update was subsequently completed in 2021 by Pinchin. Based on the update, no new PCAs were identified to result in APECs on the Phase I Property. It was recommended, based on the year of construction of the present-day building (prior to 1976), that a designated substance survey be completed.

## **4.2 Environmental Source Information**

### **Environment Canada – National Pollutant Release Inventory**

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on March 22, 2023, as part of this assessment. This federally managed database provides various reports and tracking information relating to the release of solid, liquid, or gaseous pollutants from industrial facilities into the natural environment. No records were found in the NPRI database located within the Phase I Study Area.

### **PCB Inventory**

A search of national and provincial PCB waste storage sites was conducted. No PCB waste storage sites are located within the Phase I Study Area.

### **Areas of Natural Significance**

A search for areas of natural significance and features within the Phase I Study Area was conducted on the website of the Ontario Ministry of Natural Resources (MNR) on March 22, 2023. The search did not reveal any areas of natural significance within the Phase I Study Area.

---

## **Ministry of the Environment, Conservation and Parks (MECP) Submissions**

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the Phase I Property as apart of this assessment. A response from the MECP was received on March 21, 2023. Based on the MECP FOI response, there are no records pertaining to the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Instruments**

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments as apart of this assessment.

Based on the MECP FOI response, there are no records pertaining to the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Waste Management Records**

A request was submitted to the MECP FOI office for information with respect to waste management records as apart of this assessment. Based on the MECP FOI response, a generator number was registered for 1673 Carling Avenue in 1990. The waste streams included fixer solution, developer solution, film negatives and clear acetate. According to the ERIS report, further discussed below, a generator number for the same waste class was registered for the site through 1998. The occupant at the tie was the Canadian Wildlife Federation.

Given the nature of the waste in combination with the nature of the building occupants at the time, the generation of these waste streams is not considered to represent an APEC on the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Incident Reports**

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP as apart of this assessment. Based on the MECP FOI response, there are no records pertaining to the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted as part of this assessment for the Phase I Property and properties within the Phase I Study Area. No Record of Site Condition (RSC) has previously been filed for the Phase I Property.

Two (2) RSCs were identified within the Phase I Study Area, at 1650-1666 Carling Avenue (RSC#14102) and at 1705 Carling Avenue (RSC#225386), approximately 40 m south and 170 m west, respectively, from the Phase I Property.

According to the information provided in the ESR, 800 m<sup>3</sup> of contaminated soil was removed from the RSC Property addressed 1650-1660 Carling Avenue. Given that no impacted groundwater was identified, this RSC Property is not considered to represent an APEC on the Phase I Property.

No site remediation was required for the RSC Property at 1705 Carling Avenue, and as such, poses no risk to the Phase I Property.

## **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. No former waste disposal sites were identified within the Phase I Study Area.

## **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I Study Area.

## **Technical Standards and Safety Authority (TSSA)**

The TSSA, Fuels Safety Branch in Toronto, was contacted on March 28, 2023, to inquire about current and former underground storage tanks, spills and incidents for the site and neighbouring properties along Carling Avenue and Tillbury Avenue. No records were identified for the Phase I Property. An active propane tank was identified at 1660 Carling Avenue, however, propane gas to the receiving medium (air) is not considered to pose a risk to the Phase I Property. A copy of the TSSA correspondence is provided in Appendix 2.

In addition to TSSA correspondence, the ERIS report identified the following records within the Phase I Study Area:

- ☐ Diesel fuel spill at 861 Clyde Avenue (approximately 185m south of the Phase I Property);
- ☐ Diesel fuel spill at Carling Avenue and Cole Avenue (approximately 80m west of the Phase I Property)
- ☐ Diesel spill and former and existing underground storage tanks at 1607 Carling Avenue (approximately 115m east of the Phase I Property)
- ☐ UST furnace oil leak at Hakim Optical on Carling Avenue (approximately 90m east of the Phase I Property).

Based on the separation distances relative to the Phase I Property, the records identified at these properties are not considered to represent APECs on the Phase I Property.

### **City of Ottawa Historical Land Use Inventory (HLUI)**

A requisition form was sent to the City of Ottawa's Historical Land Use Inventory (HLUI) for the Phase I Property and properties within the Phase I Study Area. Based on the HLUI response, a copy of which is provided in Appendix 2, no PCAs not already identified in the previous sections of this report, are considered to result in APECs on the Phase I Property. A copy of the HLUI request is provided in Appendix 2.

### **Environmental Risk Information Services (ERIS) Report**

An ERIS (Environmental Risk Information Service) Report was obtained for the Phase I ESA Property and properties within the 250 m study area.

Based on the ERIS search, an Ontario Waste Generator number for photo processing wastes was registered for the Phase I Property circa 1992 through 1998. As discussed previously, based on the nature of the building occupants and waste registration, there is no associated PCA or APEC on the Phase I Property.

Several off-site records including waste generators, TSSA related records and spills were identified within the Phase I Study Area. A review of these records did not identify any off-site PCAs, other than those already discussed in this report, that would represent APECs on the Phase I Property. A copy of the ERIS report is provided in Appendix 2.

## 4.3 Physical Setting Sources

### Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals. Based on the review, the following observations have been made:

1928            The Phase I Property exists as undeveloped land that was used for agricultural purposes at this time. The neighbouring lands appear as either agricultural fields or farmsteads. Carling Avenue and Churchill Avenue are both present at this time.

1958            The southern portion of the Phase I Property is developed and occupied by a commercial building, while the remainder of the site appears to be used for vehicular parking and or storage associated with the commercial business. The small wedge of land fronting Tillbury Avenue remains vacant; however some soil disturbance appears to have occurred on this portion of the site.

Tillbury Avenue is now present immediately north of the Phase I Property, followed by residential apartment buildings. The adjacent lands to the east are occupied by apparent residential buildings fronting Tillbury Avenue and a commercial motel fronting Carling Avenue. Two (2) RFOs can be seen at the northwest and northeast corners of Churchill Avenue at Carling Avenue, further east of the Phase I Property.

The adjacent property to the west of the Phase I Property remains vacant, undeveloped land, followed by residential apartment buildings across Cole Avenue. Properties along the south side of Carling Avenue appear to be occupied by commercial buildings with some residential to the southwest.

1965            The Phase I Property appears to remain unchanged from the 1958 aerial photograph. The adjacent property to the west has been developed for commercial purposes, including a possible RFO. Otherwise, the surrounding lands appear unchanged from the previous image.

1976            The southern portion of the Phase I Property has been redeveloped with the present-day commercial building and associated surface parking. A small portion of the site fronting Tillbury Avenue consists of vacant, treed land.

The neighbouring lands to the south, across Carling Avenue, have been redeveloped for commercial retail purposes. The remaining lands within the Phase I Study Area appear to remain largely unchanged.

- 1999 (GeoOttawa) No significant changes are noted on the Phase I Property. The RFOs located on the adjacent property to the west and on the northeast corner of Churchill Avenue at Carling Avenue are no longer present at this time.
- 2002 The Phase I Property and the surrounding lands appear to remain unchanged from the previous images, apart from the adjacent property to the east; the former motel structure has been demolished and this property exists as vacant land at this time.
- 2008 (GeoOttawa) The northern portion of the Phase I Property has been stripped of trees and appears to be under construction. No other changes have been made to the Phase I Property. No significant changes appear to have been made to the adjacent and neighbouring properties with the exception of the property at the southeast corner of Carling Avenue and Clyde Avenue; this property has been redeveloped and appears to remain commercial in use.
- 2011 The northern portion of the Phase I Property is occupied by the present-day residential dwelling. Otherwise, the Phase I Property and neighbouring properties remain unchanged from the previous photograph.
- 2021 The Phase I Property and the surrounding area appear unchanged from the previous aerial image.

Copies of selected aerial photographs reviewed are included in Appendix 1.

### **Physiographic Maps**

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website, as a part of this assessment. According to the publication and mapping, the Phase I Property is situated within the St. Lawrence Lowlands. According to the description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.”

The Phase I Property is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

## **Topographic Maps**

Topographic information was obtained from Natural Resources Canada – The Atlas of Canada website. The topographic maps indicate that the elevation of the subject site is approximately 77 m above sea level. The regional topography in the general area of the Phase I Property slopes down in a northerly direction. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

## **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock within the area of the subject land consists of limestone interbedded with dolomite of the Gull River Formation. The overburden consists of plain till with a drift thickness on the order of 1 to 3 m.

Based on the Pinchin 2018 field logs, the stratigraphy at the Phase I Property consists of a pavement structure followed by a silty sand layer with traces of clay and gravel, underlain by limestone bedrock. Bedrock was confirmed at depths ranging from approximately 1.5 to 2.7 mbgs. The groundwater in the immediate area of the Phase I Property at that time was determined to flow in a southeasterly direction.

## **Water Well Records**

A well record search was conducted on March 24, 2023, for all drilled wells within 250 m of the Phase I Property. The search returned three (3) groundwater monitoring well records for the Phase I Property; these wells were drilled as part of the Phase II ESA that was carried out by Pinchin in 2018.

The well record search returned several results for ten (10) properties within the Phase I Study Area:

- ☐ One domestic well drilled in 1951 was identified at the adjacent property to the west at 1677 Carling Avenue. Although a well abandonment record was not identified for this property, it is assumed that the well is no longer present on the property since it was redeveloped in the late 1990s and is currently provided with municipal services.

- ❑ Three (3) well records, specifically a domestic well drilled in 1956, abandonment well record, and a groundwater monitoring well record for four (4) wells drilled as a cluster as part of a Phase II ESA completed by Paterson in 2018, were identified for the residential property addressed 346 to 376 Tillbury Avenue. Based on the information in our files, this property is not considered to pose a risk to the Phase I Property.
- ❑ One abandonment well record was identified for the RFO located on the northwest corner of Carling Avenue at Churchill Avenue, addressed 1607 Carling Avenue. No other pertinent information was provided in this record. Based on the separation distance of approximately 115m and the cross-gradient orientation relative to the Phase I Property, the RFO is not considered to represent an APEC on the Phase I Property.
- ❑ Six (6) well records were identified for a residential property at 365 Tillbury Avenue, approximately 65 m northeast of the Phase I Property. Three (3) were identified as groundwater monitoring well records, while the remaining were abandonment records. The monitoring wells were drilled along the eastern and northern sides of the property. Based on information in our files, these wells were drilled to assess potential impacts from the adjacent property to the south at 1655 Carling Avenue (the former motel property with a historical UST).

Several other well records were identified on properties more than 200m away from the Phase I Property; as such, these properties and any PCAs associated with them are not considered to represent APECs on the Phase I Property. It should be noted that most of the monitoring wells records were identified for properties that have been previously identified as PCAs in this report during the FIP and City Directory reviews. A copy of the well records identified within the Phase I Study Area is provided in Appendix 2.

### **Areas of Natural Significance and Natural Water Bodies**

No areas of natural significance or natural bodies of water were identified in the Phase I Study Area.

## **5.0 INTERVIEW**

### **Property Owner**

Mr. Jordan Bianconi, the current landowner of the Phase I Property since 2020, was interviewed as part of this assessment via email.

Based on the information provided by the Mr. Bianconi, the commercial portion of the Phase I Property consisted of various retail tenants, restaurants, medical and health clinics, and commercial office spaces. The residential portion of the subject land has always been used for residential purposes. Mr. Bianconi is not aware of any potential environmental concerns regarding the Phase I Property.

Any other pertinent information obtained during the interview has been included in the relevant sections of this report.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

The site visit was conducted on March 24, 2023 by Ms. Mandy Witteman from the Environmental Department of Paterson. The forecast at the time of the site visit was sunny with an average temperature of 2 degrees Celsius. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site visit.

### **6.2 Specific Observations at the Phase I Property**

#### **Buildings and Structures**

The southern portion of the Phase I Property, addressed 1657-1673 Carling Avenue, is occupied by a 2-storey commercial building that was constructed circa 1976 with a slab-on-grade foundation and a flat tar and gravel style roof. The exterior is finished with brick and metal siding. The ground level is occupied by 2 restaurants, a wellness and health clinic, a hearing clinic, commercial office (employment agency) and a beauty salon. The upper level is used as commercial office space.

The northern portion of the Phase I Property, addressed 386 Tillbury Avenue, is occupied by a vacant, 2-storey single-family dwelling with a half grade basement level. The subject dwelling was constructed circa 2009 with a poured concrete foundation. The exterior of the dwelling is finished with brick and vinyl siding, and a sloped shingle-style roof. Both subject buildings are heated by natural gas-fired equipment.

---

## **Site Features**

The commercial building, fronting Carling Avenue, occupies the southern portion of the site. The residential building occupies the parcel of land fronting onto Tillbury Avenue.

The remainder of the Phase I Property exists as a paved parking lot associated with the commercial building, or landscaped vegetation around the dwelling.

Two (2) catch basins along the eastern side of the property was noted as well as four (4) drains along the southern property boundary, which drain into the municipal stormwater sewers. Waste and grease waste bins were noted on the northwest corner of the commercial part of the site.

The southern portion of the Phase I Property is situated below the grade of Carling Avenue and the adjacent property to the west and is at the same grade as the abutting property to the east. The Phase I Property gradually slopes down towards the north towards the subject residential dwelling, where the property is slightly above the grade of Tillbury Avenue. The regional topography appears to slope down in a north/northwesterly direction towards the Ottawa River.

Site drainage on the commercial portion consists of sheet flow to on-site catch basins, while the residential property consists of infiltration on the landscaped areas and sheet flow to a catch basin located along Tillbury Avenue.

No evidence of current or former railway or spur lines was observed on the Phase I Property at the time of the site visit. No areas of stained pavement, stressed vegetation, signs of contamination, unidentified substances or imported fill material were observed on-site at the time of the site visit. No chemicals or signs of an underground storage tank (UST) or above ground storage tank (AST) were noted at the time of the site visit.

Site features on the Phase I Property are shown on Drawing PE6046-1 – Site Plan, in the Figures section of this report.

## **Subsurface Services and Utilities**

The Phase I Property is situated in a municipally serviced area. Underground utilities include stormwater, sanitary and municipal water services, and natural gas that enter and/or exit the Phase I Property along Carling Avenue and Tillbury Avenue.

Two (2) on-site stormwater catch basins are situated along the eastern side as well as four (4) drains along the southern side of the commercial portion of the Phase I Property.

Two groundwater monitoring wells were identified along the eastern portion of the commercial portion of the Phase I Property.

Other than the aforementioned catch basins, drainage system and monitoring wells, no subsurface structures were present on the Phase I Property.

### **Interior Assessments**

A general description of the interior of the residential dwelling addressed 365 Tillbury Avenue is as follows:

- ☐ The floors were finished with a combination of ceramic, carpet, laminate flooring and poured concrete.
- ☐ The walls and ceilings consisted of drywall and poured concrete in the basement.
- ☐ Lighting throughout the building was provided by incandescent light fixtures.

The building is heated by natural gas-fired equipment. No sump pits were noted at the time of the site visit and floor drains noted were observed to be dry and clean. No chemicals, fuels or waste was noted at the time of the site visit, nor were any staining or odours indicating potential contamination observed. No potential environmental concerns were noted on the interior of the residential dwelling at the time of the site visit.

Based on the age of the building, there are no designated substances expected to be present within the building structure.

A general description of the interior of the commercial building addressed 1657 to 1673 Carling Avenue, is as follows:

- ☐ The floors were finished with a combination of ceramic, laminate flooring and poured concrete.
- ☐ The walls and ceilings consisted of drywall.
- ☐ Lighting throughout the building was provided by incandescent and LED light fixtures.

The building is heated by natural gas-fired equipment and supplemental electrical baseboard heaters. No sump pits were noted at the time of the site visit and floor drains noted were observed to be dry and clean. No staining or odours were noted at the time of the site visit; chemicals stored on-site included paints and household cleaning products, all of which were properly stored in labelled containers. No fuels or unidentified substances or any other potential environmental concerns were noted on the interior of the commercial building at the time of the site visit.

## Neighbouring Properties

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection.

Land use adjacent to the subject site is as follows:

- ☐ North: Tillbury Avenue, followed by low-rise residential apartment buildings;
- ☐ South: Carling Avenue, followed by a vacant commercial retail building (formerly Canadian Tire);
- ☐ East: Vacant lot currently under construction, followed by a vacant commercial building; and.
- ☐ West: Commercial retail stores and associated vehicular parking lot, followed by Cole Avenue South.

Land use within the Phase I Study Area (250 m radius) is used for residential and commercial purposes. Surrounding land use is shown on Drawing PE6046-2 – Surrounding Land Use Plan.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 Land Use History**

The commercial portion of the Phase I Property at 1657-1673 Carling Avenue was first developed circa 1957 and has always been used for commercial purposes. The residential portion Phase I Property at 386 Tillbury Avenue appears to have been first developed for residential purposes in 2008.

It is our understanding that the Phase I Property will be redeveloped for residential land use. A Record of Site Condition (RSC) will be required due to the more sensitive land use change (from commercial to residential).

#### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

Based on the historical use of the Phase I Property and neighbouring lands, 4 potentially contaminating activities (PCAs) were identified and considered to represent areas of potential environmental concern (APECs) on the Phase I Property.

- ☐ APEC 1 – Former storage of heavy equipment on the northern portion of the Phase I Property (PCA - Other).
- ☐ APEC 2 – Use of road salt for safety purposes under conditions of ice and snow, across the Phase I Property (PCA - Other).
- ☐ APEC 3 – Former off-site UST and groundwater impacts associated with the historical motel property at 1655 Carling Avenue, along the southeastern portion of the Phase I Property (PCA 28 and PCA – Other).
- ☐ APEC 4 – Former off-site retail fuel outlet and automotive service garage at 1677 Carling Avenue (PCA 28 and PCA 52).

The locations of the APECs are shown on Drawing PE6046-1–Site Plan.

Off-site PCAs that were identified within the Phase I Study Area were not considered to result in APECs, based on their separation distances, information in the ESR and/or orientations (down or cross-gradient) with respect to the Phase I Property. The off-site PCAs within the Phase I Study Area that do not represent APECs are identified in green on Drawing PE6046-2– Surrounding Land Use Plan, while PCAs resulting in APECs are shown in red.

The rationale for identifying the above APECs is based on a review of fire insurance plans, city directories, aerial photographs, environmental source information and field observations.

### **Contaminants of Potential Concern**

Based on the APECs identified on the Phase I Property, the contaminants of potential concern (CPCs) in soil and/or groundwater include benzene, toluene, ethylbenzene, and xylenes (BTEX), volatile organic compounds (VOCs), petroleum hydrocarbons (PHCs, F1-F4) and EC/SAR.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

According to the Geological Survey of Canada website, the bedrock in the area of the Phase I Property is reported to consist of limestone interbedded with dolomite of the Gull River Formation. Overburden consists of plain till with a drift thickness ranging from 1 to 3 metres.

The 2018 subsurface investigation confirmed the reported geological setting. The groundwater beneath the Phase I Property at that time was determined to flow in a southeasterly direction, although due to recent construction in the immediate area, the groundwater flow beneath the Phase I Property is expected to have changed.

### **Areas of Natural Significance**

No areas of natural significance were identified in the Phase I Study Area.

### **Water Bodies**

No natural bodies were identified in the Phase I Study Area.

### **Drinking Water Wells and Monitoring Wells**

There are no potable water wells on the Phase I Property. While historical well records were identified for several properties within the Phase I Study Area, these wells are no longer considered to be operation given the area is provided with municipal services.

Well records for 3 monitoring wells installed during the 2018 Pinchin investigation were identified. Based on site observations only 2 of the 3 wells remain present and viable.

Well records for monitoring wells were identified at several properties within the Phase I Study Area.

### **Existing Buildings and Structures**

The portion of the Phase I Property addressed 1657-1673 Carling Avenue is occupied by a 2-storey commercial building, fronting onto Carling Avenue. The commercial building was constructed circa 1976 with a slab-on-grade foundation and is finished on the exterior with brick and metal siding as well as a flat tar-and-gravel style roof. The ground level is occupied by 2 restaurants, a wellness and health clinic, a hearing clinic, commercial office (employment agency) and a beauty salon, while the upper level is used as commercial office space.

The residential portion of the Phase I Property, addressed 386 Tillbury Avenue, is occupied by a vacant 2-storey single family dwelling with a half grade basement level. The subject dwelling was constructed circa 2009 with a poured concrete foundation. The exterior of the dwelling is finished in brick and vinyl siding and a sloped shingle style roof. Both on-site buildings are heated by natural gas-fired equipment.

### **Subsurface Structures and Utilities**

The Phase I Property is situated in a municipally serviced area. Underground utilities include stormwater, sanitary and municipal water services, and natural gas that enter and/or exit the Phase I Property along Carling Avenue and Tillbury Avenue.

Two (2) on-site stormwater catch basins are situated along the eastern side as well as four (4) drains along the southern side of the commercial portion of the Phase I Property. Two groundwater monitoring wells were observed on-site.

The approximate locations of the buried utilities and services are shown on Drawing PE6046-4 – Site Plan.

### **Neighbouring Land Use**

Neighbouring land use in the Phase I Study Area consists of commercial land use along both the north and south sides of Carling Avenue to the east and west of the Phase I Property. Land use north of Carling Avenue is residential.

### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

The PCAs identified on- and off-site that are considered to represent areas of potential environmental concern (APECs) on the Phase I Property are summarized in Table 3, along with their respective Contaminants of Potential Concern (CPCs).

**Table 3: Areas of Potential Environmental Concern**

| Area of potential environmental concern                                                                                                 | Location of area of potential environmental concern on phase I property | Potentially contaminating activity                                                                                               | Location of PCA (onsite or off-site) | Contaminants of potential concern | Media potentially impacted (Ground water, soil and/or sediment) |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-----------------------------------|-----------------------------------------------------------------|
| <b>APEC 1</b><br>Former storage of heavy equipment                                                                                      | Northern portion of Phase I Property                                    | PCA - Other                                                                                                                      | On-site                              | BTEX<br>VOCs<br>PHCs              | Soil and groundwater                                            |
| <b>APEC 2<sup>1</sup></b><br>Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice | Northern half of the commercial portion of the Phase I Property         | PCA - Other                                                                                                                      | On-site                              | EC<br>SAR                         | Soil                                                            |
| <b>APEC 3</b><br>Former off-site UST and historical groundwater impacts                                                                 | Northern half of the commercial portion of the Phase I Property         | PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks                                                                 | Off-site                             | BTEX<br>VOCs<br>PHCs              | Groundwater                                                     |
|                                                                                                                                         |                                                                         | PCA - Other                                                                                                                      |                                      |                                   |                                                                 |
| <b>APEC 4</b><br>Former retail fuel outlet and automotive service garage                                                                | Southwestern portion of the Phase I Property                            | PCA 28 – Gasoline and associated products storage in fixed tanks                                                                 | Off-site                             | BTEX<br>VOC<br>PHCs               | Groundwater                                                     |
|                                                                                                                                         |                                                                         | PCA 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems. |                                      |                                   |                                                                 |

1 – In accordance with Section 49.1 of Ontario Regulation 153/04 standards are deemed to be met if an applicable site condition standard is exceeded at a property solely because the qualified person has determined that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. The exemption outlined in Section 49.1 is being relied upon with respect to the Phase I property.

The APECs are shown on Drawing PE6046-1–Site Plan, while the corresponding PCAs are shown in red on Drawing PE6046-2–Surrounding Land Use Plan.

### **Contaminants of Potential Concern (CPCs)**

Based on the APECs identified on the Phase I Property, the following Contaminants of Potential Concern (CPCs) were identified with respect to the soil on the Phase I Property:

- ☐ Benzene, Toluene, Ethylbenzene, Xylenes (BTEX);
- ☐ Volatile Organic Compounds (VOCs);
- ☐ Petroleum Hydrocarbons fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- ☐ Electrical Conductivity (EC); and,
- ☐ Sodium Adsorption Ratio (SAR).

The following Contaminants of Potential Concern (CPCs) were identified with respect to the groundwater beneath the Phase I Property:

- ☐ Benzene, Toluene, Ethylbenzene, Xylenes (BTEX);
- ☐ Volatile Organic Compounds (VOCs); and,
- ☐ Petroleum Hydrocarbons fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>).

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of the Phase I- ESA is considered to be sufficient to conclude that there are PCAs that have resulted in APECs on the Phase I Property.

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **8.0 CONCLUSIONS**

### **8.1 Assessment**

Paterson Group was retained by Inside Edge Properties to conduct a Phase I-Environmental Site Assessment (ESA) for the property addressed 1657-1673 Carling Avenue, and 386 Tillbury Avenue, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the southern portion of the Phase I Property was first developed circa 1957 for commercial purposes: Sheridan Equipment Co. Ltd. Bulldozers and was subsequently redeveloped circa 1976 with the present-day multi-tenant commercial building. The northern portion of the Phase I Property was developed with the existing residential dwelling circa 2008.

The former use of the site for the storage of heavy equipment is considered to represent a potentially contaminating activity (PCA) on the Phase I Property, resulting in an area of potential environmental concern (APEC).

The historical use of the neighbouring lands consisted of commercial along both sides of Carling Avenue east and west of the Phase I Property, with an industrial property further south of Carling Avenue. Residential land use occurred to the north of the Phase I Property.

Several historical off-site PCAs were identified within the Phase I Study Area. Of note, 4 of these PCAs were considered to result in 2 APECs on the Phase I Property: a historical retail fuel outlet (RFO) and automotive service garage on the adjacent property to the west were considered to result in an APEC along the northwestern portion of the Phase I Property, while a former heating oil AST and reported groundwater impacts on the adjacent property to the east were considered to represent an APEC along the southeastern portion of the Phase I Property.

Additional off-site PCAs identified within the Phase I Study Area were not considered to result in APECs on the Phase I Property given their separation distances of over 50m, their orientations down- or cross-gradient relative to the Phase I Property, and/or information contained in the MECP Environmental Site Registry.

Following the historical research, a site visit was conducted. The southern portion of the Phase I Property is occupied by the multi-tenant commercial office building (currently occupied by retailers, restaurants, health and medical clinics and offices) and the vacant residential dwelling constructed in 2008, as discussed above.

No PCAs were identified on the Phase I Property at the time of the site visit.

Surrounding lands were used for a combination of residential and commercial uses. An existing gas station is present approximately 115m east of the Phase I Property, at 1607 Carling Avenue. Based on the separation distance in combination with the cross-gradient orientation relative to the Phase I Property, it is not considered to result in an APEC on the Phase I Property.

## **8.2 Recommendations**

Based on the findings of the Phase I ESA, no new PCAs have been identified since the time of the 2018 Phase II ESA conducted by others. Given the date of the previous Phase II ESA, it is recommended that the Phase II ESA report be updated in general accordance with O.Reg. 153/04, to support the filing of municipal applications and ultimately a Record of Site Condition.

It is our understanding that the Phase I Property will be redeveloped for residential purposes, and as such, a Record of Site Condition (RSC) will be required for the commercial portion of the Phase I Property due to the more sensitive land use change.

A designated substance survey (DSS) of the commercial building must be conducted prior to demolition of the existing building in accordance with Ontario Regulation 490/09, under the Occupational Health and Safety Act, prior to the disturbance of any designated substances.

Two groundwater monitoring wells were identified along the eastern portion of the commercial portion of the Phase I Property.

Other than the aforementioned catch basins, drainage system and monitoring wells, no subsurface structures were present on the Phase I Property.

### **Interior Assessments**

A general description of the interior of the residential dwelling addressed 365 Tillbury Avenue is as follows:

- ☐ The floors were finished with a combination of ceramic, carpet, laminate flooring and poured concrete.
- ☐ The walls and ceilings consisted of drywall and poured concrete in the basement.
- ☐ Lighting throughout the building was provided by incandescent light fixtures.

The building is heated by natural gas-fired equipment. No sump pits were noted at the time of the site visit and floor drains noted were observed to be dry and clean. No chemicals, fuels or waste was noted at the time of the site visit, nor were any staining or odours indicating potential contamination observed. No potential environmental concerns were noted on the interior of the residential dwelling at the time of the site visit.

Based on the age of the building, there are no designated substances expected to be present within the building structure.

A general description of the interior of the commercial building addressed 1657 to 1673 Carling Avenue, is as follows:

- ☐ The floors were finished with a combination of ceramic, laminate flooring and poured concrete.
- ☐ The walls and ceilings consisted of drywall.
- ☐ Lighting throughout the building was provided by incandescent and LED light fixtures.

The building is heated by natural gas-fired equipment and supplemental electrical baseboard heaters. No sump pits were noted at the time of the site visit and floor drains noted were observed to be dry and clean. No staining or odours were noted at the time of the site visit; chemicals stored on-site included paints and household cleaning products, all of which were properly stored in labelled containers. No fuels or unidentified substances or any other potential environmental concerns were noted on the interior of the commercial building at the time of the site visit.

## **Neighbouring Properties**

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection.

Land use adjacent to the subject site is as follows:

- ☐ North: Tillbury Avenue, followed by low-rise residential apartment buildings;
- ☐ South: Carling Avenue, followed by a vacant commercial retail building (formerly Canadian Tire);
- ☐ East: Vacant lot currently under construction, followed by a vacant commercial building; and.
- ☐ West: Commercial retail stores and associated vehicular parking lot, followed by Cole Avenue South.

Land use within the Phase I Study Area (250 m radius) is used for residential and commercial purposes. Surrounding land use is shown on Drawing PE6046-2 – Surrounding Land Use Plan.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 Land Use History**

The commercial portion of the Phase I Property at 1657-1673 Carling Avenue was first developed circa 1957 and has always been used for commercial purposes. The residential portion Phase I Property at 386 Tillbury Avenue appears to have been first developed for residential purposes in 2008.

It is our understanding that the Phase I Property will be redeveloped for residential land use. A Record of Site Condition (RSC) will be required due to the more sensitive land use change (from commercial to residential).

#### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

Based on the historical use of the Phase I Property and neighbouring lands, 4 potentially contaminating activities (PCAs) were identified and considered to represent areas of potential environmental concern (APECs) on the Phase I Property.

- ☐ APEC 1 – Former storage of heavy equipment on the northern portion of the Phase I Property (PCA - Other).
- ☐ APEC 2 – Use of road salt for safety purposes under conditions of ice and snow, across the Phase I Property (PCA - Other).
- ☐ APEC 3 – Former off-site UST and groundwater impacts associated with the historical motel property at 1655 Carling Avenue, along the southeastern portion of the Phase I Property (PCA 28 and PCA – Other).
- ☐ APEC 4 – Former off-site retail fuel outlet and automotive service garage at 1677 Carling Avenue (PCA 28 and PCA 52).

The locations of the APECs are shown on Drawing PE6046-1–Site Plan.

Off-site PCAs that were identified within the Phase I Study Area were not considered to result in APECs, based on their separation distances, information in the ESR and/or orientations (down or cross-gradient) with respect to the Phase I Property. The off-site PCAs within the Phase I Study Area that do not represent APECs are identified in green on Drawing PE6046-2– Surrounding Land Use Plan, while PCAs resulting in APECs are shown in red.

The rationale for identifying the above APECs is based on a review of fire insurance plans, city directories, aerial photographs, environmental source information and field observations.

### **Contaminants of Potential Concern**

Based on the APECs identified on the Phase I Property, the contaminants of potential concern (CPCs) in soil and/or groundwater include benzene, toluene, ethylbenzene, and xylenes (BTEX), volatile organic compounds (VOCs), petroleum hydrocarbons (PHCs, F1-F4) and EC/SAR.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

According to the Geological Survey of Canada website, the bedrock in the area of the Phase I Property is reported to consist of limestone interbedded with dolomite of the Gull River Formation. Overburden consists of plain till with a drift thickness ranging from 1 to 3 metres.

The 2018 subsurface investigation confirmed the reported geological setting. The groundwater beneath the Phase I Property at that time was determined to flow in a southeasterly direction, although due to recent construction in the immediate area, the groundwater flow beneath the Phase I Property is expected to have changed.

### **Areas of Natural Significance**

No areas of natural significance were identified in the Phase I Study Area.

### **Water Bodies**

No natural bodies were identified in the Phase I Study Area.

### **Drinking Water Wells and Monitoring Wells**

There are no potable water wells on the Phase I Property. While historical well records were identified for several properties within the Phase I Study Area, these wells are no longer considered to be operation given the area is provided with municipal services.

Well records for 3 monitoring wells installed during the 2018 Pinchin investigation were identified. Based on site observations only 2 of the 3 wells remain present and viable.

Well records for monitoring wells were identified at several properties within the Phase I Study Area.

### **Existing Buildings and Structures**

The portion of the Phase I Property addressed 1657-1673 Carling Avenue is occupied by a 2-storey commercial building, fronting onto Carling Avenue. The commercial building was constructed circa 1976 with a slab-on-grade foundation and is finished on the exterior with brick and metal siding as well as a flat tar-and-gravel style roof. The ground level is occupied by 2 restaurants, a wellness and health clinic, a hearing clinic, commercial office (employment agency) and a beauty salon, while the upper level is used as commercial office space.

The residential portion of the Phase I Property, addressed 386 Tillbury Avenue, is occupied by a vacant 2-storey single family dwelling with a half grade basement level. The subject dwelling was constructed circa 2009 with a poured concrete foundation. The exterior of the dwelling is finished in brick and vinyl siding and a sloped shingle style roof. Both on-site buildings are heated by natural gas-fired equipment.

### **Subsurface Structures and Utilities**

The Phase I Property is situated in a municipally serviced area. Underground utilities include stormwater, sanitary and municipal water services, and natural gas that enter and/or exit the Phase I Property along Carling Avenue and Tillbury Avenue.

Two (2) on-site stormwater catch basins are situated along the eastern side as well as four (4) drains along the southern side of the commercial portion of the Phase I Property. Two groundwater monitoring wells were observed on-site.

The approximate locations of the buried utilities and services are shown on Drawing PE6046-4 – Site Plan.

### **Neighbouring Land Use**

Neighbouring land use in the Phase I Study Area consists of commercial land use along both the north and south sides of Carling Avenue to the east and west of the Phase I Property. Land use north of Carling Avenue is residential.

### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

The PCAs identified on- and off-site that are considered to represent areas of potential environmental concern (APECs) on the Phase I Property are summarized in Table 3, along with their respective Contaminants of Potential Concern (CPCs).

**Table 3: Areas of Potential Environmental Concern**

| Area of potential environmental concern                                                                                                 | Location of area of potential environmental concern on phase I property | Potentially contaminating activity                                                                                               | Location of PCA (onsite or off-site) | Contaminants of potential concern | Media potentially impacted (Ground water, soil and/or sediment) |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-----------------------------------|-----------------------------------------------------------------|

1 – In accordance with Section 49.1 of Ontario Regulation 153/04 standards are deemed to be met if an applicable site condition standard is exceeded at a property solely because the qualified person has determined that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. The exemption outlined in Section 49.1 is being relied upon with respect to the Phase I property.

The APECs are shown on Drawing PE6046-1–Site Plan, while the corresponding PCAs are shown in red on Drawing PE6046-2–Surrounding Land Use Plan.

### **Contaminants of Potential Concern (CPCs)**

Based on the APECs identified on the Phase I Property, the following Contaminants of Potential Concern (CPCs) were identified with respect to the soil on the Phase I Property:

- ☐ Benzene, Toluene, Ethylbenzene, Xylenes (BTEX);
- ☐ Volatile Organic Compounds (VOCs);
- ☐ Petroleum Hydrocarbons fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- ☐ Electrical Conductivity (EC); and,
- ☐ Sodium Adsorption Ratio (SAR).

The following Contaminants of Potential Concern (CPCs) were identified with respect to the groundwater beneath the Phase I Property:

- ☐ Benzene, Toluene, Ethylbenzene, Xylenes (BTEX);
- ☐ Volatile Organic Compounds (VOCs); and,
- ☐ Petroleum Hydrocarbons fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>).

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of the Phase I- ESA is considered to be sufficient to conclude that there are PCAs that have resulted in APECs on the Phase I Property.

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **8.0 CONCLUSIONS**

### **8.1 Assessment**

Paterson Group was retained by Inside Edge Properties to conduct a Phase I-Environmental Site Assessment (ESA) for the property addressed 1657-1673 Carling Avenue, and 386 Tillbury Avenue, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the southern portion of the Phase I Property was first developed circa 1957 for commercial purposes: Sheridan Equipment Co. Ltd. Bulldozers and was subsequently redeveloped circa 1976 with the present-day multi-tenant commercial building. The northern portion of the Phase I Property was developed with the existing residential dwelling circa 2008.

The former use of the site for the storage of heavy equipment is considered to represent a potentially contaminating activity (PCA) on the Phase I Property, resulting in an area of potential environmental concern (APEC).

The historical use of the neighbouring lands consisted of commercial along both sides of Carling Avenue east and west of the Phase I Property, with an industrial property further south of Carling Avenue. Residential land use occurred to the north of the Phase I Property.

Several historical off-site PCAs were identified within the Phase I Study Area. Of note, 4 of these PCAs were considered to result in 2 APECs on the RSC Property: a historical retail fuel outlet (RFO) and automotive service garage on the adjacent property to the west were considered to result in an APEC along the northwestern portion of the Phase I Property, while a former heating oil AST and reported groundwater impacts on the adjacent property to the east were considered to represent an APEC along the southeastern portion of the Phase I Property.

Additional off-site PCAs identified within the Phase I Study Area were not considered to result in APECs on the Phase I Property given their separation distances of over 50m, their orientations down- or cross-gradient relative to the Phase I Property, and/or information contained in the MECP Environmental Site Registry.

Following the historical research, a site visit was conducted. The southern portion of the Phase I Property is occupied by the multi-tenant commercial office building (currently occupied by retailers, restaurants, health and medical clinics and offices) and the vacant residential dwelling constructed in 2008, as discussed above.

No PCAs were identified on the Phase I Property at the time of the site visit.

Surrounding lands were used for a combination of residential and commercial uses. An existing gas station is present approximately 115m east of the Phase I Property, at 1607 Carling Avenue. Based on the separation distance in combination with the cross-gradient orientation relative to the Phase I Property, it is not considered to result in an APEC on the Phase I Property.

## **8.2 Recommendations**

Based on the findings of the Phase I ESA, no new PCAs have been identified since the time of the 2018 Phase II ESA conducted by others. Given the date of the previous Phase II ESA, it is recommended that the Phase II ESA report be updated in general accordance with O.Reg. 153/04, to support the filing of municipal applications and ultimately a Record of Site Condition.

It is our understanding that the Phase I Property will be redeveloped for residential purposes, and as such, a Record of Site Condition (RSC) will be required for the northern portion of the Phase I Property due to the more sensitive land use change.

A designated substance survey (DSS) of the commercial building must be conducted prior to demolition of the existing building in accordance with Ontario Regulation 490/09, under the Occupational Health and Safety Act, prior to the disturbance of any designated substances.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared under the supervision of a Qualified Person, in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (2022, reaffirmed). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Inside Edge Properties. Permission and notification from the above noted party and Paterson will be required to release this report to any other entity.

Attn: Mr. G. Blundell  
Director of Research

Dear Mr. Blundell:

RE: Acknowledgement of Subject Waste Registration

As prescribed by Section 15(3) of Ontario Regulation 309, this letter acknowledges receipt of your Generator Registration Report(s) dated June 19, 1990 and telephone conversation(s) with you on June 20, 1990 for the following site:

1673 Carling Avenue  
Ottawa, Ontario

The Generator Registration Number assigned to your company at this site is:

ON1303400

Please note that this Generator Registration Number must be used only in conjunction with the site for which it was issued.

Please ensure that the company name shown in this letter is complete and accurate. This would be the corporate name or, if a partnership or proprietorship, the name of the principal(s). If you intend to carry on business under a separate name or style, this should also be entered. If there is a discrepancy, it is your responsibility to re-register providing us with your complete and accurate company name.

A list of the waste stream(s) covered by this acknowledgement is attached to this letter as Schedule "A".

For off-site disposal of subject wastes, the waste number(s) describing the waste stream(s) in Schedule "A" and the Generator Registration Number must be entered on manifest forms for each waste transaction after you have received this generator registration document. A copy of an example manifest form is attached for your information.

For on-site disposal of subject wastes covered by this acknowledgement, including on-site incineration, landfilling and discharges to sanitary sewers, every generator shall retain records for a period of at least two years. These records shall include the generator registration number, waste name(s), waste number(s), quantity and disposition of the waste(s).

For off-site disposal of any registerable solid wastes shown in Schedule "A" (waste classes ending in the letter "N"), manifesting is not required at this time. These wastes can be disposed of at most approved municipal landfilling sites.

The selection of accurate waste classes is the responsibility of each waste generator. This acknowledgement must not be considered as a confirmation of the accuracy of information submitted by you. Based on the information you have provided, the waste class(es) that has (have) been selected appear(s) to be correct. If, due to new information or re-assessment of information submitted, you feel your waste is inappropriately classified, you should apply for a revision to your registration using the Generator Registration Report, Form 2. Should the waste class(es) that you have selected be deemed incorrect by the Ministry, or improper waste disposal occurs at any time, you may be subject to legal action as provided by the Environmental Protection Act and Regulation 309.

Your Generator Registration Report has now been forwarded to the District Office of this Ministry that is closest to your generating site. The District Office will be conducting a post-registration audit and may be contacting you for additional information or may be conducting site visits.

It is important to note that under Section 15(4) of Ontario Regulation 309, a new Generator Registration Report must be submitted to the Ministry within fifteen (15) days for any of the following reasons:

1. If the name, address or telephone number of your company or waste generating site changes.
2. If the description, the waste class or physical or chemical characteristics of your registered wastes change(s).
3. If you generate a hazardous or liquid industrial waste that has not been registered with the Ministry.

If the quantity of registered wastes or your carrier or receiver changes, automatic re-registration is not required. However, in order to update our file, we may periodically request additional information when we observe or suspect a significant change as compared to the most recent information submitted by you for registration purposes.

Should you have any questions concerning generator registration or manifesting requirements, please contact the Waste Management Branch Reviewer identified below at 323-5143.

Yours truly,

  
Director  
Regulation 309, R.R.O., 1980  
Environmental Protection Act

Waste Management Branch Reviewer:

EAS/mb

Enclosure

ADDITIONAL COMMENTS:

The number of wastes reported in Field 11 of Part 1 of your Generator Registration Report (GRR) does not correspond to the number of wastes included in Part 2 of the GRR (i.e., does not correspond to the number of copies of page 2 submitted in your GRR). Should there be additional wastes which require registration, other than those shown in Schedule "A" of this letter, re-registration would be required for these additional wastes.

SCHEDULE "A"

This attached Schedule forms part of the acknowledgement of generator registration for the facility and site identified by Generator Registration Number ON1303400, dated at Toronto,

JUL 12 1990

|    | Waste Stream                                                          | Waste Class |
|----|-----------------------------------------------------------------------|-------------|
| 1. | Waste fixer solution containing ammonium thiosulphate and acetic acid | 264T        |
| 2. | Waste developer solution containing hydroquinone                      | 264T        |
| 3. | Waste negative films                                                  | 264T        |
| 4. | Waste clear acetate (positives)                                       | 264T        |

The Well Drillers Act  
Department of Mines, Province of Ontario

Water Well Record

OTTAWA  
Township, Village, Town or City  
Town or City  
Date Completed Jan 29 1951 Cost of Well (excluding pump)  
(day) (month) (year)

Pipe and Casing Record

Pumping Test

Casing diameter(s) 6 in  
Length(s) of casing(s) 14  
Type of screen  
Length of screen  
Distance from top of screen to ground level  
Is well a gravel-wall type?  
Date  
Static level 28  
Pumping level 90  
Pumping rate 110 gal  
Duration of test 2 hr  
Distance from cylinder or bowls to ground level

**Instructions for Completing Form**

- For use in the Province of Ontario only. This document is a permanent legal document. Please retain for future reference.
- All Sections must be completed in full to avoid delays in processing. Further instructions and explanations are available on the back of this form.
- Questions regarding completing this application can be directed to the Water Well Management Coordinator at 416-235-6203.
- All metre measurements shall be reported to 1/10<sup>th</sup> of a metre.
- Please print clearly in blue or black ink only.

Well Contractor and Well Technician Information

Business Name of Well Contractor: Strata Drilling Group

Business Address (Street Number/Name): 129 Ryegood Dr.

Province: ON

Postal Code: L4A8C1

Business E-mail Address: wrecord@stratasoil.com

Bus. Telephone No. (inc. area code): 905 940 7919

Name of Well Technician (Last Name, First Name): McLoe, James

Well Technician's Licence No.: 7107

Signature of Technician and/or Contractor: [Signature]

Date Submitted: 2020 09 04

### Well ID

Well ID Number: 7119479  
Well Audit Number: M00178  
Well Tag Number: A080378  
*This table contains information from the original well record and any subsequent updates.*

This well is part of a well cluster.  
The information below is extracted from the cluster well record.  
More information on the cluster well record (related to other wells in the cluster) is also available.

Well Record

Regulation 903 Ontario Water Resources Act

Measurements recorded in: ☒ Metric ☐ Imperial

5-15347 Page of

### Well Owner's Information

First Name: Sapote Dairy Products CAN Last Name / Organization: [Redacted] E-mail Address: [Redacted] ☐ Well Constructed by Well Owner

Mailing Address (Street Number/Name): 2305 Chemin de la Côte de Liasse St Laurent Province: Que Postal Code: H4W 2A7 Telephone: [Redacted]

### Well Location

Address of Well Location (Street Number/Name): 861 Clyde Ave Township: [Redacted] Lot: [Redacted] Concession: [Redacted]  
County/District/Municipality: [Redacted] City/Town/Village: Ottawa Province: Ontario Postal Code: [Redacted]

UTM Coordinates Zone: 18 Easting: 8441372 Northing: 5825205 NAD: 83 Municipal Plan and Sublot Number: [Redacted] Other: [Redacted]

### Overburden and Bedrock Materials/Abandonment Sealing Record (see instructions on the back of this form)

| General Colour | Most Common Material | Other Materials | General Description | Depth (m/ft) |
|----------------|----------------------|-----------------|---------------------|--------------|
| BKN            | Sand                 |                 |                     | 0 .91        |
| BKN            | Sand                 | Trace clay      |                     | .91 2.13     |
| GRY            | Limestone            |                 |                     | 2.13 3.35    |

### Annular Space

| Depth Set at (m/ft) | Type of Sealant Used (Material and Type) | Volume Placed (m³/ft³) |
|---------------------|------------------------------------------|------------------------|
| 0 .31               | Concrete/Flashguard                      |                        |
| .31 1.5             | Bitumen                                  |                        |
| 1.5 3.35            | Sand                                     |                        |

### Method of Construction

|                                                                 |                                  |                                          |                                                     |                                                |

## Map: Well records

This map allows you to search and view well record information from reported wells in Ontario.

Full dataset is available in the Open Data catalogue (<https://data.ontario.ca/dataset/well-records>) .

### Well ID

Well ID Number: 7119477  
Well Audit Number: M03311  
Well Tag Number: A080404  
*This table contains information from the original well record and any subsequent updates.*

This well is part of a well cluster.  
The information below is extracted from the cluster well record.  
More information on the cluster well record (related to other wells in the cluster) is also available.

### Well Location

**Sent:** March 29, 2023 7:50 AM  
**To:** Mandy Witteman  
**Subject:** RE: Search Records Request (PE6046)

Hello,

### **RECORD FOUND IN CURRENT DATABASE**

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are records in our database of any **fuel storage tanks** at the subject address(es).

| Inventory Number | Address            | City   | Province | Postal Code | Status | Asset Type / Inventory Item |
|------------------|--------------------|--------|----------|-------------|--------|-----------------------------|
| 56244871         | 1660 CARLING<br>AV | OTTAWA | ON       | K2A 1C5     | Active | FS CYLINDER EXCHANGE        |

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click [Release of Public Information - TSSA](#) - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (\*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
  - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

**Kimberly Gage | Public Information Agent**

Dear Mandy,

**Re: Information Request**  
1657-1673 Carling & 386 Tillbury Ave **Ottawa, Ontario ("Subject Property")**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:  
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('ADDRESS – HLUI Summary report.xlsx'), please refer to the [Overview and User Guide](#).

**Additional information may be obtained by contacting:**

**Ontario's Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate

existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

### **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

### **Ottawa Public Health**

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You**

**may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

**Adwoa Achireko**
