Re: Phase One Environmental Site Assessment
Proposed Chicken Processing Plant
3043 Dunning Road
Ottawa, Ontario

Enclosed is our Phase One Environmental Site Assessment (ESA) report for the above noted property. The report presented herein is based on the scope of work discussed in the proposal dated May 15, 2024. This report was prepared by Jeffrey Gauthier, B.Eng, and reviewed by Nicole Soucy, M.A.Sc., P.Eng, QP_{ESA}.

Environmental Engineer

EXECUTIVE SUMMARY

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by J.L. Richards & Associates Limited (JLR) to carry out a Phase One Environmental Site Assessment (ESA) in accordance with Ontario Regulation (O.Reg) 153/04, as amended, for portion of the property located at 3043 Duning Road in Ottawa, Ontario. It is understood that this Phase One ESA is required to support site plant control application and that the land use of the Site will not be changing to a more sensitive land use.

The proposed area (herein referred to as the 'Site') fronts along Dunning Road and ends at up to a municipal drain (Jules Potvin Drain). The Site is not considered an enhanced investigation property as defined under O.Reg 153/04, as amended. The Site and surrounding lands within a 250 metre (m) radius, the 'Study Area', are illustrated on Figure A.1, Appendix A. The primary objective of this Phase One ESA was to identify any current and/or former potentially contaminating activities at the Site, as well as within the vicinity of the Site, to develop a preliminary determination of the likelihood of contamination in soil or groundwater which would result in the requirement of a Phase Two ESA. The general objectives were met through the evaluation of the information gathered from the records review, an interview, and a Site reconnaissance.

Three areas of potential environmental concern (APECs) were identified at the Site based on the Phase One ESA findings and are summarized below:

APEC 1 – Presence of Aboveground Storage Tanks (ASTs) On-site

Through the review of information (aerial photographs, Site reconnaissance, and Interview), the Site has two ASTs. No evidence of staining, spills or odours were noted at the time of the Site reconnaissance. The Contaminants of Potential Concern (COPCs) are Petroleum Hydrocarbons Fractions F1-F4 (PHC F1-F4), Polycyclic Aromatic Hydrocarbons (PAHs), Benzene, Toluene, Ethylbenzene, Xylene (BTEX), and Metals in soil and groundwater.

APEC 2 – Use of Transformer

Through the review of information (Site reconnaissance), there is a pole mounted transformer on the north of the border. No evidence of staining on the pole below the transformer or stressed vegetation in the area. The COPCs are polychlorinated biphenyls (PCBs).

APEC 3 – Presence of ASTs adjacent to the subject site

Through the review of information (aerial photographs, Site reconnaissance, and Interview), 3085 Dunning has one AST located about 10m from the Subject Site. The AST was stated by Mr. Robert Laplante to be a furnace oil tank similar to that on the Subject Site. The COPCs are PHC F1-F4, BTEX, Metals, and PAHs in soil and groundwater.

Based on the information obtained and reviewed as part of this Phase One ESA, three APECs were identified at the Site. Based on the identification of APECs, it is recommended that a subsurface investigation, A Phase Two ESA, be carried out to adequately characterize soil and groundwater conditions in support of the proposed works in accordance with O.Reg 153/04, as amended.

LIST OF TABLES

LIST OF APPENDICES

1.0 INTRODUCTION

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by J.L. Richards & Associates (JLR) to carry out a Phase One Environmental Site Assessment (ESA) in accordance with Ontario Regulation (O.Reg) 153/04, as amended, for the property located at 3043 Dunning Road in Ottawa, Ontario. It is understood that this Phase One ESA is required to support site plan control application (SPCA) and that the land use of the Site will not be changing to a more sensitive land use.

The proposed area (herein referred to as the 'Site') fronts along Dunning Road and ends at a municipal drain (Jules Potvin Drain). The Site is not considered an enhanced investigation property as defined under O.Reg 153/04, as amended. The Site and surrounding lands within a 250 metre (m) radius, the 'Study Area', are illustrated on Figure A.1, Appendix A.

Table 1.1 details the current land use of the Site, the adjacent properties, and other publicly accessible areas.

Table 1.1: Current Site and Adjacent Property Land Uses

Property Location	Civic Address	Property Land Use	Property Details
Site	3043 Dunning Road	Agriculture	The Site covers an approximate area of 17,000 square metres (m^2). The Site currently has one structure which is owned and operated by 'Laplant Poultry Farms Limited'. The Site is serviced by overhead hydro, a water well, and furnace oil for heating. The ground cover was primarily grass with a gravel graded roadways/driveways.
North	3105, 2997 Dunning Road	Agricultural Residential	The Site is bound to the north by an agricultural land parcel followed by what appears to be an abandoned dwelling. The Rolland Dutrisac Drain is present.
East	3105 Dunning Road	Agricultural	The Site is bound to the east by Jules Potvin Drain followed by an agricultural land parcel.
South	3085, 3105 Dunning Road	Residential Agricultural	The Site is bound to the south by a chicken barn, a residential dwelling at 3085Dunning Road, a barn and agricultural structures at 3105 Dunning Road.
West	3094, 3032, 3016, 3004, 2992, 2966 Dunning Road 2570 Giroux Road	Agricultural Residential Community	The Site is bound to the west by Dunning Road, followed by an agricultural land parcel, and residential dwellings at 3094, 3016, 3004, 2992, 2966 Dunning Road and 2570 Giroux Road.

Property Location	Civic Address	Property Land Use	Property Details
	Dunning Road and Giroux Road		Two community use roadways, Dunning Road and Giroux Road, are present within the study area.

The Phase One ESA was conducted by GEMTEC staff members whose qualifications are provided in Appendix B.

The Site features (including structures) are shown in Figure A.2, Appendix A. The one structure present at the Site includes:

- One Story Chicken Barn

1.1 Site Information

The Site covers an approximate area of approximately 17,000 m^2 and is occupied by one structure owned and operated by 'Laplante Poultry Farms Limited. The details for the Site are summarized in Table 1.2. A copy of the title search for the Site is provided in Appendix C.

Table 1.2: Legal Description and Site Information

Site Contact	Robert Laplante

2.0 SCOPE OF THE INVESTIGATION

2.1 General Objectives

The Phase One ESA was conducted in accordance with O.Reg 153/04, as amended. The objectives of the Phase One ESA were:

- To develop a preliminary determination of the likelihood of contamination in soil or groundwater by identifying and documenting current and historical environmental conditions and operations or practices at the Site; and,
- To determine if such operations or practices result in any Areas of Potential Environmental Concern (APECs) on the Site.

The general objectives were met though the evaluation of the information gathered from the records review and available documents, an interview, and a Site reconnaissance. Specific objectives for these components and the tasks completed to achieve these objectives are described in Section 2.2.

GEMTEC understands that the Site will not be changing to a more sensitive land use. Therefore, the filing of a Record of Site Condition (RSC), as regulated by O.Reg 153/04, as amended, under the Environmental Protection Act, is not required.

2.2 Records Review

The records review included obtaining and reviewing records that relate to the Site and the Phase One Study Area to identify current and past land uses and activities that may have impacted the soil and groundwater quality at the Site. The following available records were reviewed as part of the investigation:

- Bedrock and Overburden Geology Maps – Overburden and bedrock geology maps, provided by Natural Resources Canada, were reviewed to identify the underlying soil deposits and bedrock types;
- Chain of Title – A chain of title abstract for the Site was obtained through Environmental Risk Information Services (ERIS). A copy of the title abstract is provided in Appendix C;
- Fire Insurance Maps and Insurance Reports – A copy of the Fire Insurance Maps and Insurance Reports is provided in Appendix D;
- ERIS Report – The ERIS report searches 73 public and private information databases to identify potential environmental concerns. An ERIS report was obtained for the Site and Phase One Study Area. A copy of the ERIS Report is provided in Appendix E;
- City Directories – A City Directory Report was requested from ERIS for the Site and surrounding properties within the Phase One Study Area. A copy of the City Directory Report is provided in Appendix F;
- WA records search was requested from the Technical Standards and Safety Authority (TSSA) for the Site (3043 Dunning Road) and the following adjacent properties located at 2570, 3004, 3016, 3032, 3085, 3094, 3105 Dunning Road. The TSSA search results are provided in Appendix G;
- Freedom of Information (FOI) - A FOI request for records on the Site was sent to the Ministry of the Environment, Conservation and Parks (MECP) in May 2024. FOI responses consist of information obtained from documents and records from the Ottawa District Office, Environmental Assessment and Permissions Division (EAPD), Environmental Monitoring and Reporting Branch (EMRB), Environmental Investigations and Enforcement Branch (EIEB) and Safe Drinking Water Branch (SDW). The response is provided in Appendix H;
- Historic Land Use Inventory (HLUI) – A HLUI request for records on the Site was sent to the City of Ottawa in January 2024. The response is provided in Appendix I;

- GeoOttawa®, and National Air Photo Library (NAPL) Aerial Photographs – Aerial photographs from the years 1945, 1953, 1964, 1985, 1991, 1999, and 2023 were available for review. They were reviewed for the Site and Phase One Study Area to identify APECs resulting from historical land uses. The aerial photographs can be found in Appendix J;
- Well Records - The MECP Well Records for the Site and the Phase One Study Area were reviewed and are provided in Appendix K;
- Map of Federal Contaminated Sites Inventory' prepared by Treasury Board of Canada Secretariat was reviewed;
- 'Ontario Inventory of PCB Storage Sites' prepared by Ontario Ministry of the Environment (Waste Management Branch) dated January 1992 was reviewed;
- 'Old Landfill Management Strategy – Phase 1 – Identification of Sites, City of Ottawa, Ontario' prepared by Golder Associates Ltd. dated October 2004 was reviewed; and,
- 'Small Landfill Sites List' and 'Large Landfill Sites List' prepared by the Ontario MECP were reviewed.

2.3 Interview

The objective of the interview was to assist in the identification of potentially contaminating activities (PCAs) that may have led to APECs at the Site. Mr. Robert Laplante, chicken farmer and son of the owner, was interviewed in person on June 7, 2024.

2.4 Site Reconnaissance

The Site was visually assessed to document current conditions and to evaluate the potential for environmental impacts to on-Site soil and groundwater. The Site was also inspected to identify if any possible preferential pathways such as underground utilities exist on the Site that may affect the fate, transport, and distribution of contaminants. Adjacent and neighbouring properties within the Phase One Study Area were assessed from publicly accessible boundaries to evaluate the potential for environmental impacts to the Site.

3.0 RECORDS REVIEW

3.1 General

3.1.1 Phase One Study Area Determination

The Site is located at the land parcel of 3043 Dunning Road in Ottawa, Ontario and has an approximate area of 17,000 m^2. The Site fronts along Dunning Road and back onto a municipal drain (Jules Potvin Drain).

Based on the available aerial photographs, the Site has been developed between the years 1991 and 1999. The current structure was present in the same location on the Site and the land use at the Site was agricultural. The site appears to be agricultural fields prior to the structure being built. Historical land use in the Phase One Study Area was predominately agricultural, with some rural residential, and community use roadways.

Based on this information, a Phase One Study Area of 250 m surrounding the Site is deemed sufficient for the purpose of this Phase One ESA. The location of the Site and the extent of the Phase One Study area, are provided on Figure A.1, Appendix A.

3.1.2 First Developed Use Determination

Based on the available aerial photographs as outlined in section 3.3.1, the Site was developed sometime between 1991 and 1999 considering the structure is present in 1999 and was not identified in the 1991 aerial photograph.

3.1.3 Chain of Title

A copy of the chain of title is available in Appendix C. The legal description for the Site is:

- PT LT 7 CON 4 CUMBERLAND PT 1, 4R11019; CUMBERLAND..

The PIN for the Site is:

- 14512-0120 (LT).

3.1.4 Fire Insurance Plans and Reports

A search of Fire Insurance Plans and insurance reports was completed for the Site. No FIPs or insurance reports were available for the Site. A copy of the response from OPTA Information Intelligence is available in Appendix D.

3.1.5 Historical Reports

The following historical reports completed by GEMTEC were available for review:

- *Proposed Work Program, 3043 Dunning Road, Ottawa, Ontario*. Dated December 19, 2023.
- *Pumping Test Design Report, Environmental Activity and Sector Registry, Proposed Chicken Processing Facility, 3043 Dunning Road, Ottawa, Ontario*. Dated January 19, 2024.
- *Hydrogeological Investigation & Terrain Analysis, Proposed Chicken Processing Facility, Part of Lot 7, Concession 4 (3043 Dunning Road), Ottawa, Ontario.* Dated February 13, 2024;
- *DRAFT Environmental Impact Statement, Proposed Zoning-By Law Amendment and Site Plan Approval, 3043 Dunning Road, City of Ottawa, Ontario*. Dated February 14, 2024.

These reports were reviewed, and it was surmised that four boreholes, two shallow and two deep were advanced on the Subject Site, no PCAs were identified through review of the reports.

3.2 Environmental Source and Regulatory Information

3.2.1 ERIS Database Report

GEMTEC contacted ERIS to conduct a search of 73 public and private information databases for the Site and the Phase One Study Area. The complete ERIS report, including a list of databases searched, is provided in Appendix E. All listings were reviewed, and the highlights are provided in Table 3.1.

Table 3.1: Summary of ERIS report

Address	Distance from the Site	Database	Company/Name - Description
3043 Dunning Road	On Site	EASR	Laplante Poultry Farms Limited Approval Number: R-011-1265325587 dated January 2024. EASR record indicates that the site is used as a chicken farm and permits the taking of water for a pumping test – which is consistent with the work completed by GEMTEC to date.

Note:

EASR – Environmental Activity and Sector RegistryThe unplottable report summary was reviewed to determine if any of the records were located within at the Site or within the Phase One Study Area. Many of the entries were only located by company name with no defined civic address. As such, there were many uncertainties related to the entries describing these activities, and in most cases, these could not be confirmed as being present within the Phase One Study Area.

3.2.2 City Directory

A review of the city directories, from 1997 to 2021, was completed for the Subject Site and several adjacent properties located along Dunning Road and Giroux Road. A copy of the City Directory records is provided in Appendix F. All records were reviewed, and no environmentally significant records were identified within the Phase One Study Area.

3.2.3 Technical Safety and Standards Association

The Technical Standards and Safety Authority (TSSA) was contacted on May 28, 2024. The record search response revealed that there were no records of tanks or elevating devices present on the Subject Site and adjacent properties located within the Phase One Study Area. The TSSA search results are provided in Appendix G.

3.2.4 Freedom of Information (FOI)

A FOI request for Subject Site records was sent to the MECP on May 23, 2024. The FOI response from MECP indicates that no records were identified for the Subject Site and a copy of the request is provided in Appendix H.

3.2.5 Historic Land Use Inventory

A HLUI request for Subject Site records was sent to the City of Ottawa on May 27, 2024. To date, GEMTEC has not received a response from the City of Ottawa, once a response is received, the results will be reviewed and should they alter the conclusions in this report the client will be notified, a copy of the request is provided in Appendix I.

3.2.6 Mapping of Federally Contaminated Subject Sites

A Government of Canada, Treasury Board of Canada Secretariat, interactive map illustrating the database of over 4,000 federally contaminated sites was reviewed. No federally owned contaminated sites were identified within the Phase One Study Area.

3.2.7 Ontario Inventory of PCB Storage Sites

The Waste Management Branch of the MECP published a report titled “Ontario Inventory of PCB Storage Sites” in October 1991. The publication includes information of PCB storage sites collected under O.Reg 11/82 through MECP district and regional offices. The database did not identify any PCB storage sites located on the Subject Site or within the Phase One Study Area.

3.2.8 Landfills

Golder Associates Ltd. published an Old Landfill Management Strategy – Phase 1 - Identification of Sites, City of Ottawa, Ontario dated October 2004. The publication includes information to identify old landfill sites for potential environmental considerations within the boundary of the amalgamated City of Ottawa. The database did not identify any landfills on the Subject Site or the Phase One Study Area.

The MECP published maps entitled ‘*Small Landfill Sites List’* and ‘*Large Landfill Sites Map’* published March 2014 – Updated October 2021. The publication includes information to identify old landfill sites for potential environmental considerations within the boundary of the province of Ontario. No landfills were identified at the Subject Site or within the Phase One Study Area.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Select aerial photographs were examined as part of this Phase One ESA. The copies of the aerial photographs are provided in Appendix J.

Aerial photographs were obtained at regular intervals and were selected based on suitable scales for analysis and coverage area. The earliest aerial photograph obtained was from 1946. Observations made with respect to the selected aerial photographs are discussed in Table 3.2.

Table 3.2: Summary of aerial photograph review

Date	Photograph Number	Observations
1945	NAPL	The Subject Site appears to be used for agricultural purposes; no structures are present. Historical land use in the Phase One Study Area appears predominately agricultural with rural residential and community right of ways (i.e., roadways). Dunning Road is located to the west of the Subject Site. What is currently known as the Rolland Dutrisac Drain is present north of the Subject Site within the study area.
1953	NAPL	No significant changes to the Subject Site and the Phase One Study Area compared to the aerial photograph from 1945.
1964	NAPL	No significant changes to the Subject Site and the Phase One Study Area compared to the aerial photograph from 1953.
1985	NAPL	No significant changes to the Subject Site compared to the aerial photograph from 1964. Rural residential development has occurred South of the Subject Site within the Phase One Study Area. What appears to be an excavation/ disturbed earth is present south of the Subject Site.
1991	GeoOttawa®	No significant changes to the Subject Site compared to the aerial photograph from 1985. Further residential/ agricultural development has occurred south and west of the Subject Site within the Phase One Study Area.
1999	GeoOttawa®	A Barn (the chicken barn) can be seen in the eastern/central area of the Subject Site. A storage tank is located on the north side of the barn. A long driveway connects the barn to what is currently known as Dunning Road. In the Phase One Study Area, a similar barn structure, with a similar tank, to that on the Subject Site, is present directly south. The areas of excavation/disrobed earth is not longer visible. A line of 12 structures is present south of the Subject Site.
2017	GeoOttawa®	An additional storage tank is present next to the initial storage tank on the north side of the barn. Structures from the line of 12 buildings in the Phase One Study area have been removed and rebuilt for a total of 12 during 2002 and 2017
2021	GeoOttawa®	No significant changes to the Subject Site and the Phase One Study Area compared to the aerial photograph from 2017.
2023	MAXAR Technologies	No significant changes to the Subject Site and the Phase One Study Area compared to the aerial photograph from 2021.

Notes:

1. NAPL – National Air Photo Library
2. Aerials from NAPL and Maxar Technologies were order though ERIS.
3. The Subject Site features (including structures) are shown in Figure A.2, Appendix A.

4. Aerial photographs reviewed through GeoOttawa® as part of the investigation are not reproduced due to copyright limitations.

Based on the review of the aerial photographs, the following PCA was identified on the subject site or within the study area:

- **PCA # 28**: Gasoline and Associated Products Storage in Fixed Tanks on the Subject Site for of the existing barn structure;
- **PCA # 28**: Gasoline and Associated Products Storage in Fixed Tanks north of the structure at 3085 Dunning Road approximately 10 m south of the Subject Site; and,
- **PCA # 30**: Importation of Fill Material of Unknown Quality 200 m south of the subject property on 3105 Dunning Road.

3.3.2 Topography and Hydrogeology

The Subject Site has a relatively flat topography and is at an elevation of approximately 88 m above sea level (m asl). The Subject Site has no discernable topographic high points. The Jules Potvin Drain is east of the Subject Site and is a topographic low point. Surface water is assumed to drain into the Jules Potvin Drain which flows into the Rolland Dutrisac Drain north of the Subject Site.

Groundwater flow often reflects topographic features and typically flows towards nearby lakes, rivers, and wetland areas. Based on previous hydrogeological reports completed by GEMTEC, local groundwater typically flows towards the east-southeast, generally coinciding with local topography.

3.3.2.1 Surficial and Bedrock Geology

Surficial and bedrock geology maps of the Canada indicate that the overburden in Phase One Study Area generally consists of fine-textured glaciomarine deposits (i.e., silt and clay, minor sand and gravel) and is massive to well laminated.

3.3.3 Fill Materials

No evidence of stockpiled fill material or fill with debris was not observed on the Subject Site.

3.3.4 Waterbodies and Areas of Natural Significance

No provincially significant wetlands (PSWs) or areas of natural and scientific interest (ANSIs) were identified on the Subject Site or within the Phase One Study Area. Jules Potvin Drain, a municipal drain, is present along the east edge of the Subject Site, and Rolland Dutrisac Drain, which is present north of Subject Site.

3.3.5 Well Records

Well records were reviewed for the Subject Site and Phase One Study Area and were available through the MECP. The MECP well records did not identify and wells on the Subject Site. Six wells are located within the Phase One Study Area and are located at the land parcel of 3105, 3094 Dunning Road, 2570 Giroux Road, (south of the Subject Site), 3032, 2992, 2966 Dunning Road (west of Subject Site).

A review of Well Record (ID: 1516193) indicates that the overburden consists of gray clay soil to the depth of approximately 17.40 m below ground surface (bgs), gravel and sand soil between 17.40 m and 20.10 m bgs, underlain by gray limestone.

A review of Well Record (ID: 1515552) indicates that the overburden consists of a brown topsoil to a depth of approximately 0.9 m bgs, blue clay soil between 0.9 m and 11.60 m bgs, gravel and sand soil between 11.60 m and 12.50 m bgs, underlain by brown sandstone.

A review of Well Record (ID: 1513961) indicates that the overburden consists of blue clay soil to a depth of 5.5 m bgs and grey coarse gravel between 5.5 m and 6.1 m bgs.

A review of Well Record (ID: 1512438) indicates that the overburden consists of blue clay soil to a depth of 11.6 m bgs and grey gravel between 11.6 m and 12.2 m bgs.

A review of Well Record (ID: 1513949) indicates that the overburden consists of yellow sand to a depth of 6.7 m bgs, blue clay soil between 6.7 and 20.7 m bgs, and grey gravel between 20.7 m and 23.2 m bgs.

A review of Well Record (ID: 7299830) indicates that the overburden consists of brown clay to a depth of 3.9 m bgs, grey clay soil between 3.9 and 16.7 m bgs, grey gravel between 16.7 m and 21.9 m bgs, underlain by grey limestone.

The well records are available in Appendix K.

Note: Through work completed by GEMTEC and Site Reconnaissance, it had been confirmed that there are 5 wells on the Subject Site, four monitoring wells and one domestica water well, however these were not identified in the MECP well records and will be discussed in section 5.

4.0 INTERVIEW

Mr. Robert Laplante, Site contact and son of the owner, was interviewed in person during the Site reconnaissance on June 7, 2024. A summary of information provided to GEMTEC during the interview is provided below. To the best of Mr. Laplantes knowledge:

- Mr. Laplante family has resided on property since acquired by his father in 1965;
- The barn is used to house chickens and was constructed in 1994;

- No fill material was brought to the Subject Site, only gravel for the driveway;
- No sumps or pits were located at the Subject Site;
- The Subject Site is not connected to municipal sewers and no septic tanks are on Subject Site;
- There are drains inside the barn that lead outside, however Mr. LaPlante confirmed they are clogged since the mid 1990's and are no longer operational;
- Pesticides/Herbicides and Agricultural chemicals are not used/stored on Subject Site but are used on adjacent plots of land (North, East, West) for agricultural purposes;
- No manufacturing activities are conducted at the Subject Site;
- The Subject Site is serviced by furnace oil for heating, diesel for an on-site generator, overhead hydro, and a domestic water well;
- No domestic wastewater is produced on Subject Site;
- Two tanks are located on Subject Site: A heating oil tank used for heating of the barn and a diesel tank used for the generator;
- One transformer is present on the Subject Site;
- A disinfectant and hydrogen peroxide are stored within the barn in small quantities, Mr. Laplante indicated there have never been any spills;
- No historical spills were reported at the Subject Site; and,
- Not aware of any environmental concerns related to the Subject Site.

4.1 Assessment and Evaluation of Interview

The interview with Mr. Robert Laplante is consistent with historical records and other information sources.

Based on the review of available information through interview, the following PCAs were identified to be present on the Subject Site or withing the Study Area:

- **PCA # 28**: Gasoline and Associated Products Storage in Fixed Tanks on the Subject Site for of the existing barn structure; and,

- **PCA # 40**: Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications within the Study Area, north, east, and west of the Subject Site.

5.0 SITE RECONNAISSANCE

5.1 General Requirements

A Site reconnaissance was carried out on June 7, 2024. The weather at the time of Site reconnaissance was overcast with a temperature of approximately 17 °C.

The Site reconnaissance was completed by Mr. Jeffrey Gauthier, B.Eng, and Nicole Soucy, M.A.Sc., P.Eng, QP_{ESA}. The Site reconnaissance was completed to determine if there were visually observable environmental concerns with the Site and/or surrounding properties within the Phase One Study Area.

5.2 Site Photographs

Photographs of the Site were taken during the Site reconnaissance to document the general condition of the Site. The relevant photographs are presented in Appendix L. A description of the photographs is summarized in Table 5.1.

Table 5.1: Summary of Site photographs

Photo Number	Compass Orientation	Description
1	West	Looking west along the Dunning Road. View of two monitoring wells and a small ditch along Dunning Road.
2	-	Disinfectant used on the Site property. Stored within barn.
3	-	Hydrogen Peroxide used on the Site property. Stored within barn.
4	-	Generator used on site property. Stored within barn.
5	-	Boiler used on site property. Stored within barn.
6	East	Looking west inside the barn. Slab floor on grade. Venting overhead and vent windows along wall. Some staining from agricultural practices.
7	North	Looking north inside the bar. A drain located at the intersection of wall and floor. Multiple drains are within the barn. Piping for water above drain and below venting window.
8	East	Looking east at the Jules Potvin Drain along the east property line of the Site.
9	West	Looking west along the Dunning Road. View of a monitoring well and a small ditch along Dunning Road.
10	South	Looking south at the barn. Drain exit from the inside of the barn.
11	South	Looking south towards the diesel storage tank on concrete slab.
12	South	Looking south towards the furnace oil storage tank on concrete slab.
13	South	Looking south towards the two storage tank with an old well.
14	North	Looking north, up the pole. An electrical transformer on the pole with no staining seen on the wood below it.

Photo Number	Compass Orientation	Description
15	South	Looking south at the adjacent barn's furnace oil tank. Parcels of land are separated by a small ditch.

5.3 Specific Observations at Site

5.3.1 On-Site Structures

Through the review of aerial photographs, the Site was developed between 1991 and 1999. Mr. Robert Laplante stated that the barn was built in 1994 which is consistent with the aerial photographs. One structure was present in the center to east portion of the Site and the land use at the Site was agricultural.

Based on aerial photographs and the Site assessment, the Site has not developed substantially since the initial development. There is currently a single structure which is used to house chickens. The Site occupies an area of approximately 17,000 m^2. The one structure present at the Site is used as a single-story chicken barn.

The Site features (including structure) are shown in Figure A.2, Appendix A. The structure is owned and operated by Laplante Poultry Farms Limited.

The barn is used for housing chickens. There are gravel driveways present on site. The access to the Site is from Dunning Road. The Site is serviced by overhead hydro, a water well, and furnace oil for heating and diesel for the on-site generator. The barn has boilers, and small volumes of chemicals (chemical cleaners, water disinfectant) stored inside. The inside flooring was concrete with staining (likely from chickens and general operations) and minimal cracking. There are drains located the edges of the barn that lead outdoors (Mr. Robert Laplante stated that they are clogged and not in use).

Adjacent to the barn (north) are two aboveground storage tank (ASTs). A 4,550 liter (L) storage tank with furnace oil and a 1,360 L storage tank for diesel. Both were on concrete slab on grade which has minimal to no cracking and no staining from the tank contents were noted.

5.3.2 Observations

The following observations were made for the Site:

- The Site is currently occupied by one structure. The details of the structures are available in Section 5.3.1 and the Site features (including structure) are shown in Figure A.2, Appendix A;
- Gravel roadways/driveways are present at the Site;
- The Site is serviced by overhead hydro, a water well, and furnace oil for heating and diesel for the generator;

- No signs of staining or spills were noted in proximity of the ASTs;
- A pole mounted transformer located next to the ASTs has no visible staining on the pole;
- Concrete slab on grade was in a good condition with minimal cracking for ASTs;
- Concrete flooring inside barn has minimal cracking and some staining was observed, it is anticipated the staining is from farming operations;
- No stressed vegetation or staining was identified at the Site; and,
- The details of the ASTs are provided in Table 5.2.

Table 5.2: Summary of on-site ASTs

Tank Volume	Date of Manufacture	Tank Description	Tank Construction	Fuel Storage
4,550 L	05-2021	AST for flammable and combustible liquids with integral spill containment – Double Wall	Steel Double Wall	Furnace Oil
1,360 L	03-2015	AST for flammable and combustible liquids– Double Wall Utility Tank	Steel Double Wall	Diesel

5.3.3 Site Services

The Site is serviced by overhead hydro, a water well, furnace oil for heating, and a diesel generator. A roadside drainage ditches were identified along Dunning Road.

5.3.4 Unidentified Substances

No unidentified substances were observed on the Site during the Site reconnaissance.

5.3.5 Odours

No odours were identified on the Site during the Site reconnaissance.

5.3.6 Enhanced Investigation Property

The Site is not considered an enhanced investigation property as defined under O.Reg 153/04, as amended.

5.4 Specific Observations within the Phase One Study Area

5.4.1 Surrounding Properties

Adjacent properties were viewed from the Site and publicly accessible boundaries to assess the potential for uses to adversely affect the Site. Table 5.3 summarizes the findings.

Table 5.3: Summary of Surrounding Properties

Property Location	Civic Address	Property Land Use	Property Details
North	3105, 2997 Dunning Road	Agricultural Residential	The Site is bound to the north by an agricultural land parcel followed by what appears to be an abandoned dwelling. The Rolland Dutrisac Drain is present.
East	3105 Dunning Road Jules Potvin Drain	Agricultural	The Site is bound to the east by Jules Potvin Drain followed by an agricultural land parcel.
South	3085, 3105Dunning Road	Residential Agricultural	The Site is bound to the south by a chicken barn, a residential dwellings at 3085 Dunning Road, and a barn with agricultural structures on 3105 Dunning Road.
West	3094, 3032, 3016, 3004, 2992, 2966 Dunning Road 2570 Giroux Road Dunning Road and Giroux Road	Agricultural Residential Community	The Site is bound to the west by Dunning Road, followed by an agricultural land parcel, and residential dwellings at 3094, 3016, 3004, 2992, 2966 Dunning Road and 2570 Giroux Road. Two community use roadways, Dunning Road and Giroux Road, are present within the study area.

5.4.2 Water, Wastewater and Storm Water

The Site is serviced by a water well. No wastewater management was identified. The adjacent agricultural properties were assumed to have similar conditions as the Site. The storm water is believed to either infiltrate the ground surface or flow towards Jules Potvin Drain or the small drainage ditches located along Dunning Road or the small ditches along the north and south property lines.

5.4.3 Pits, Ponds, and Lagoons

No pits, ponds or lagoons were observed at the time of the Site reconnaissance.

5.4.4 Stained Materials and Stressed Vegetation

No signs of stressed vegetation were observed at the time of Site reconnaissance.

5.4.5 Watercourses, Ditches or Standing Water

No major watercourse is located close to the Subject Site. Roadside drainage ditches are located along Dunning Road and there are ditches along the north and south property lines. Jules Potvin Drain (a municipal drain) is present along the eastern edge of the Subject Site and the Rolland

Dutrisac Drain is North of the subject Site. No standing water was noted at the time of Site reconnaissance.

5.5 Site Reconnaissance Limitations

No limitations were noted at the time of Site reconnaissance.

5.6 Assessment and Evaluation of Site Reconnaissance

Based on the review of available information through the Site Reconnaissance, the following PCAs were identified to be present on the Subject Site or withing the Study Area:

- **PCA # 28**: Gasoline and Associated Products Storage in Fixed Tanks on the Subject Site for of the existing barn structure;
- **PCA # 28**: Gasoline and Associated Products Storage in Fixed Tanks north of the structure at 3085 Dunning Road approximately 10 m south of the Subject Site; and,
- **PCA # 55**: Transformer Manufacturing, Processing and Use. A pole mounted transformer was identified on the Subject Site.

6.0 REVIEW AND EVALUATION OF INFORMATION

6.1 Current and Past Uses

Currently the Site is occupied by one structure which are owned and operated by Laplante Poultry Farms Limited. The details of the structure is available in Section 5.3.1. The Site was used for agricultural purposes historically and the current use is agricultural (poultry raising).

6.2 Potentially Contaminating Activities

Two PCAs were identified on-Site. Three off-Site PCAs was identified. The locations of the PCAs are shown on Figure A.3, Appendix A and summarized in Table 6.1.

Table 6.1: Summary of Potentially Contaminating Activities

PCA ID	Type of PCA	Address / Location	Information source	PCA Description	Rationale
28	Presence of ASTs	On-Site	Aerial Photographs Site Reconnaissance	Presence of ASTs for heating barn	Yes – APEC 1 As per O.Reg 153/04, as amended, on-Site PCA leads to an APEC.

PCA ID	Type of PCA	Address / Location	Information source	PCA Description	Rationale
55	Use of Transformer	On-Site	Site Reconnaissance	Presence of pole mounted transformer	Yes – APEC 2 As per O.Reg 153/04, as amended, on-Site PCA leads to an APEC.
28	Presence of ASTs	3085 Dunning Road	Site Reconnaissance	Presence of ASTs for heating barn. Similar to that on-site	Yes – APEC 3 As per O.Reg 153/04, as amended, on-Site PCA leads to an APEC.
40	Bulk Storage and Large Scale Applications of Pesticides	3105, 3032 Dunning Road	Interview	Application of pesticides for agricultural purposes	No Based on PCA not being on-Site
30	Importation of Fill Material of Unknown Quality	3105 Dunning Road	Aerial Photographs	Use of fill to fill an excavated section south of site.	No Based on PCA not being on-Site

Notes:
28. Gasoline and Associated Products Storage in Fixed Tanks
30. Importation of Fill Material of Unknown Quality
40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
55. Transformer Manufacturing, Processing and Bulk Storage

6.3 Areas of Potential Environmental Concern

GEMTEC identified three APECs on the Subject Site resulting from two on-Site PCAs and one PCA in the study area. The identified APECs, impacted media, and contaminants of potential concern (COPCs) are summarized in Table 6.2 and Figure A.4, Appendix A.

Table 6.2: Areas of Potential Environmental Concern

APEC #	APEC	Location of APEC on the Site	PCA	Location of PCA (On-Site and/or Off-Site)	COPCs	Media Potentially Impacted (Soil, Groundwater and/or Sediments)
1	Two ASTs identified on the subject site north	Northwest section along barn	28	On-Site	PHC F1-F4, BTEX,	Soil Groundwater

APEC #	APEC	Location of APEC on the Site	PCA	Location of PCA (On-Site and/or Off-Site)	COPCs	Media Potentially Impacted (Soil, Groundwater and/or Sediments)
	of the existing chicken barn				Metals, PAHs	
2	Pole-mounted electrical transformer identified north of existing chicken barn	Northwest from barn	55	On-Site	PCBs	Soil Groundwater
3	One AST identified about 10m south of subject site	South of the Site. Northwest section along barn on 3085 Dunning	28	3085 Dunning Road	PHC F1-F4, BTEX, Metals, PAHs	Soil Groundwater

Notes:

28. Gasoline and Associated Products Storage in Fixed Tanks
55. Transformer Manufacturing, Processing and Bulk Storage
PHC F1-F4 – Petroleum Hydrocarbons F1-F4
BTEX – Benzene, Toluene, Ethylbenzene, and Xylene
PCBs – Polychlorinated Biphenyls
PAHs – Polycyclic Aromatic hydrocarbons

A summary and description of the identified APECs and pertinent COPCs is provided below:

APEC 1 – Presence of ASTs On-site

Through the review of information (aerial photographs, Site reconnaissance, and Interview), the Site has two ASTs. No evidence of staining, spills or odours were noted at the time of the Site reconnaissance. The COPCs are PHC F1-F4, BTEX, Metals, and PAHs in soil and groundwater.

APEC 2 – Use of Transformer

Through the review of information (Site reconnaissance), there is a pole mounted transformer on the north of the border. No evidence of staining on the pole below the transformer or stressed vegetation in the area. The COPCs are polychlorinated biphenyls (PCBs).

APEC 3 – Presence of ASTs adjacent to the subject site

Through the review of information (aerial photographs, Site reconnaissance, and Interview), 3085 Dunning has one AST located about 10m from the Subject Site. The AST was stated by Mr.

Robert Laplante to be a furnace oil tank similar to that on the Subject Site. The COPCs are PHC F1-F4, BTEX, Metals, and PAHs in soil and groundwater.

6.3.1 Discussion of Uncertainty

Information provided to GEMTEC and discussion with Mr. Robert Laplante has been relied upon in good faith, no uncertainties were identified.

6.4 Phase One Conceptual Site Model

The Phase One Conceptual Site Model (CSM) describes the nature and extent of potential contaminants on the Site. The Phase One CSM is summarized in Sections 6.4.1 through 6.4.11 and the figures included in Appendix A, as outlined in Table 6.3.

Table 6.3: Summary of Conceptual Site Model Figures

Conceptual Model Detail	Figure
Roads, Existing Buildings and Structures	Figure A.1: Site and Phase One Study Area
Potentially Contaminating Activities	Figure A.2: Potentially Contaminating Activities
Areas of Potential Environmental Concern	Figure A.3: Areas of Potential Environmental Concern
Water Wells, Waterbodies, watercourses, ANSIs	Figure A.4: Topographic map and MECP Water Wells

6.4.1 Site Description

Through the review of aerial photographs, the Site was developed between 1991 and 1999. Mr. Robert Laplante stated that the barn was built in 1994 which is consistent with the aerial photographs. One structure was present in the center to east portion of the Site and the land use at the Site was agricultural.

Based on aerial photographs and the Site assessment, the Site has not developed substantially since the initial development. There is currently a single structure which is used to house chickens. The Site occupies an area of approximately 17,000 m^2. The one structure present at the Site is:

- Structure 1 – One Story Chicken Barn

The Site features (including structure) are shown in Figure A.2, Appendix A. The structure is owned and operated by Laplante Poultry Farms Limited.

The barn is used for housing chickens. There are gravel roadways/driveways present on site. The access to the Site is from Dunning Road. The Site is serviced by overhead hydro, a water well, furnace oil for heating, and diesel for the generator. The barn has an indoor generator with a tank, boilers, and small volumes of chemicals (chemical cleaners, water disinfectant) stored inside. The

inside flooring was concrete with staining (likely from chickens and general operations) and minimal cracking. There are drains located the edges of the barn that lead outdoors (Mr. Robert Laplante stated that they are clogged and not in use).

Adjacent to the barn (north) are two ASTs. A 4,550 L storage tank with furnace oil and a 1,360 L storage tank for diesel. Both were on concrete slab on grade which has minimal to no cracking and no staining from the tank contents were noted.

6.4.2 Current and Proposed Future Site Use

Currently the Site is occupied by one structure which are owned and operated by Laplante Poultry Farms Limited. The details of the structure is available in Section 5.3.1. The Site's current use is agricultural (poultry raising). The future use is expected to remain agricultural.

6.4.3 Topography, Hydrology and Geology

The Subject Site has a relatively flat topography and is at an elevation of approximately 88 m above sea level (m asl). The Subject Site has no discernable topographic high points. The Jules Potvin Drain is east of the Subject Site and is a topographic low point. Surface water is assumed to drain into the Jules Potvin Drain which flows into the Rolland Dutrisac Drain north of the Subject Site.

Groundwater flow often reflects topographic features and typically flows towards nearby lakes, rivers, and wetland areas. Based on previous hydrogeological reports completed by GEMTEC, local groundwater typically flows towards the east-southeast, generally coinciding with local topography.

Surficial and bedrock geology maps of the Canada indicate that the overburden in Phase One Study Area generally consists of fine-textured glaciomarine deposits (i.e., silt and clay, minor sand and gravel) and is massive to well laminated.

6.4.4 Waterbodies and Areas of Natural and Scientific Interest

No provincially significant wetlands (PSWs) or areas of natural and scientific interest (ANSIs) were identified on the Subject Site or within the Phase One Study Area. Jules Potvin Drain, a municipal drain, is present along the east edge of the Subject Site, and Rolland Dutrisac Drain, which is present north of Subject Site.

6.4.5 Well Records

Well records were reviewed for the Site and Phase One Study Area and were available through the MECP. No wells are located at the Site. Six wells are located within the Phase One Study Area and are located at the land parcel of 3105, 3094 Dunning Road, 2570 Giroux Road, (south of the Site), 3032, 2992, 2966 Dunning Road (west of site).

A review of Well Record (ID: 1516193) indicates that the overburden consists of gray clay soil to the depth of approximately 17.40 m below ground surface (bgs), gravel and sand soil between 17.40 m and 20.10 m bgs, underlain by gray limestone.

A review of Well Record (ID: 1515552) indicates that the overburden consists of a brown top-soil to a depth of approximately 0.9 m bgs, blue clay soil between 0.9 m and 11.60 m bgs, gravel and sand soil between 11.60 m and 12.50 m bgs, underlain by brown sandstone.

A review of Well Record (ID: 1513961) indicates that the overburden consists of blue clay soil to a depth of 5.5 m bgs and grey coarse gravel between 5.5 m and 6.1 m bgs.

A review of Well Record (ID: 1512438) indicates that the overburden consists of blue clay soil to a depth of 11.6 m bgs and grey gravel between 11.6 m and 12.2 m bgs.

A review of Well Record (ID: 1513949) indicates that the overburden consists of yellow sand to a depth of 6.7 m bgs, blue clay soil between 6.7 and 20.7 m bgs, and grey gravel between 20.7 m and 23.2 m bgs.

A review of Well Record (ID: 7299830) indicates that the overburden consists of brown clay to a depth of 3.9 m bgs, grey clay soil between 3.9 and 16.7 m bgs, grey gravel between 16.7 m and 21.9 m bgs, underlain by grey limestone.

The well records are available in Appendix K.

6.4.6 Potentially Contaminating Activities, Contaminants of Potential Concern and Area of Potential Environmental Concern

The Phase One ESA identified two PCAs on-Site. Three off-Site PCAs were identified. A summary of the PCAs as outlined on Table 2 in Schedule D of the Regulation, and identified in the Phase One ESA, are provided in Table 6.4.

Table 6.4: Summary of Potentially Contaminating Activities

PCA ID	Type of PCA	Address / Location	Information source	PCA Description	Rationale
28	Presence of ASTs	On-Site	Aerial Photographs Site Reconnaissance	Presence of ASTs for heating barn	Yes – APEC 1 As per O.Reg 153/04, as amended, on-Site PCA leads to an APEC.
55	Use of Transformer	On-Site	Site Reconnaissance	Presence of pole mounted transformer	Yes – APEC 2 As per O.Reg 153/04, as amended, on-Site PCA leads to an APEC.

PCA ID	Type of PCA	Address / Location	Information source	PCA Description	Rationale
28	Presence of ASTs	3085 Dunning Road	Site Reconnaissance	Presence of ASTs for heating barn. Similar to that on-site	Yes – APEC 3 As per O.Reg 153/04, as amended, on-Site PCA leads to an APEC.
40	Bulk Storage and Large Scale Applications of Pesticides	3105, 3032 Dunning Road	Interview	Application of pesticides for agricultural purposes	No Based on PCA not being on-Site
30	Importation of Fill Material of Unknown Quality	3105 Dunning Road	Aerial Photographs	Use of fill to fill an excavated section south of site.	No Based on PCA not being on-Site

Notes:

28. Gasoline and Associated Products Storage in Fixed Tanks
30. Importation of Fill Material of Unknown Quality
40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
55. Transformer Manufacturing, Processing and Bulk Storage

6.4.7 Subsurface Structures and Utilities

There is low potential for underground utilities to affect contaminant transport on or to the Site if contaminants are present. The existing buildings are serviced by overhead hydro, a water well , furnace oil for heating, and diesel for the generator.

6.4.8 Areas of Potential Environmental Concern (APECs)

The available information was reviewed in a comprehensive manner starting with available historical information, followed by the results of the Site reconnaissance and finally the results of the interviews. Based on the PCAs identified within the Phase One Study Area, three APECs were identified on the Site and summarized in Table 6.5.

Table 6.5: Areas of Potential Environmental Concern

APEC #	APEC	Location of APEC on the Site	PCA	Location of PCA (On-Site and/or Off-Site)	COPCs	Media Potentially Impacted (Soil, Groundwater and/or Sediments)
1	Two ASTs identified on the subject site north of the existing chicken barn	Northwest section along barn	28	On-Site	PHC F1-F4, BTEX, Metals, PAHs	Soil Groundwater
2	Pole-mounted electrical transformer identified north of existing chicken barn	Northwest from barn	55	On-Site	PCBs	Soil Groundwater
3	One AST identified about 10m south of subject site	South of the Site. Northwest section along barn on 3085 Dunning	28	3085 Dunning Road	PHC F1-F4, BTEX, Metals, PAHs	Soil Groundwater

Notes:

28. Gasoline and Associated Products Storage in Fixed Tanks
55. Transformer Manufacturing, Processing and Bulk Storage
PHC F1-F4 – Petroleum Hydrocarbons F1-F4
BTEX – Benzene, Toluene, Ethylbenzene, and Xylene
PCBs – Polychlorinated Biphenyls
PAHs – Polycyclic Aromatic Hydrocarbons

6.4.9 Contaminants of Potential Concern (COPCs)

Three APECs were identified on the Site. A summary and description of the identified APECs and pertinent COPCs is provided below:

APEC 1 – Presence of ASTs On-site

Through the review of information (aerial photographs, Site reconnaissance, and Interview), the Site has two ASTs. No evidence of staining, spills or odours were noted at the time of the Site reconnaissance. The COPCs are PHC F1-F4, BTEX, Metals, and PAHs in soil and groundwater.

APEC 2 – Use of Transformer

Through the review of information (Site reconnaissance), there is a pole mounted transformer on the north of the border. No evidence of staining on the pole below the transformer or stressed vegetation in the area. The COPCs are polychlorinated biphenyls (PCBs).

APEC 3 – Presence of ASTs adjacent to the subject site

Through the review of information (aerial photographs, Site reconnaissance, and Interview), 3085 Dunning has one AST located about 10m from the Subject Site. The AST was stated by Mr. Robert Laplante to be a furnace oil tank similar to that on the Subject Site. The COPCs are PHC F1-F4, BTEX, Metals, and PAHs in soil and groundwater.

6.4.10 Uncertainty and Absence of Information

There were no material deviations to the Phase One ESA requirements set out in O.Reg 153/04, as amended, that would cause uncertainty or absence of information that would affect the validity of the Phase One ESA CSM or the findings of this Phase One ESA.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the information obtained and reviewed as part of this Phase One ESA, three APECs were identified at the Site. Based on the identification of APECs, it is recommended that a subsurface investigation be carried out to adequately characterize soil and groundwater conditions in support of the proposed works in accordance with O.Reg 153/04, as amended.

9.0 LIMITATIONS OF LIABILITY

The Phase One Environmental Site Assessment has been supervised and reviewed the qualified person. This Phase One ESA was carried out in general with Ontario Regulation 153/04 made under the Environmental Protection Act and meets the requirements of Part VII (Sections 23 to 31) and Schedule D of the regulation.

The results of this Phase One ESA should in no way be construed as a warranty that the Site is free from any and all contaminants other than those noted in this report, nor that all compliance issues have been addressed.

This report was prepared for the exclusive use of Laplante Poultry Farms Limited and is based on data and information collected during the Phase One ESA of the property conducted by GEMTEC. This report may not be relied upon by any other person or entity without the express written consent of GEMTEC and Laplante Poultry Farms Limited. In evaluating this Site, GEMTEC has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others.

The assessment of environmental conditions and possible site hazards presented has been made using the available historical and technical data collected and provided by others. The conclusions provided herein represent the best judgment of GEMTEC based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the Phase One ESA is sufficient to identify existing and/or potential environmental liabilities that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the Site was carried out as part of this assessment. The Phase One ESA does not include a program of intrusive observation/testing. These activities would be carried out as part of a Phase Two ESA. This environmental assessment included only a cursory overview of the neighbouring land uses from public right of ways and from the Site and does not constitute a complete assessment of the adjacent sites.

10.0 CLOSURE

The undersigned Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust this report provides sufficient information for your present purposes. If you have any questions concerning this report, please do not hesitate to contact our office.

Sincerely,

Jeffrey Gauthier, B.Eng.
Environmental Technologist

QUALIFICATION OF ASSESSORS

Jeffrey Gauthier, B.Eng – Environmental Technician

The primary assessor for this Phase One Environmental Site Assessment (ESA) was Mr. Jeffrey Gauthier, Junior Environmental Technician with GEMTEC. Jeffrey has Bachelor of Environmental Engineering with a specialization in contaminated sites. Mr. Gauthier's formal education and work experience in environmental consulting with GEMTEC has provided him with the knowledge and expertise to identify sources of environmental concern and evaluate their potential to cause adverse environmental impacts.

Nicole Soucy, M.Sc., P.Eng., QP_{ESA}– Environmental Engineer

The ESA was carried out under the supervision of Ms. Nicole Soucy, M.A.Sc., P.Eng., a registered Professional Engineer in the Province of Ontario and Qualified Person ESA (QP_{ESA}) under Ontario Regulation 153/04 and 406/19. Ms. Soucy has a Master of Applied Science with specialization in Environmental Engineering and vapour intrusion. Ms. Soucy's formal education and experience working in environmental consulting has provided her with the knowledge and expertise to identify sources of environmental concern and evaluate their potential to cause adverse environmental impacts.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2023

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Mar 2024

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Mar 31, 2024

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Mar 31, 2024

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Mar 31, 2024

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Mar 31, 2024

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2024

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2022

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2024

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2021

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory 1993-2020: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 29, 2024

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Mar 31, 2024

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Mar 31, 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Mar 31, 2024

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Apr 2024

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in Mar 2023-Dec 2023 and Jan 29, 2024-Feb 29, 2024 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Jan 2023; see description

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Mar 31, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH
3043 Dunning Road
Ottawa,ON K0A 3E0

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

2997-3105 of Dunning Road

2570 of Giroux Road

Search Notes:

Sarsfield, ON is last listed in 1997

Hello ,

NO RECORDS FOUND IN CURRENT DATABASE:

- We confirm that there are NO **elevating devices** records in our database at the subject address(es).

- We confirm that there are NO **fuels records** in our database at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the **TSSA Client Portal** to complete an Application for Release of Public Information.

Please refer to How to Submit a Public Information Request (tssa.org) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

Kind regards,

Slavka Zahrebelny | Public Information & Records Agent

Dear Connor Shaw:

RE: **MECP FOI A-2024-03284, Your Reference 100117.056 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

3043 Dunning Road, Ottawa

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Amina Shah at 437-339-1251 or amina.shah@ontario.ca.

Yours truly,

ASheh.

What is the land currently used for? *Chicken Farm*

Lot frontage: _____ m Lot depth: _____ m Lot area: _____ m²

OR Lot area: (irregular lot) 17052.11 m²

Does the site have Full Municipal Services: ○ Yes ○ No

Required Fees

Please don't hesitate to visit the Historic Land Use Inventory website more information. Fees must be paid in full at the time of application submission.

Planning Fee $181.00

Submittal Requirements

The following are required to be submitted with this application:

1. **Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
2. **Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Real Estate and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
3. **A site plan or key plan of the property, its location and particular features.**
4. **Any significant dates or time frames that you would like researched.**

Disclaimer
For use with HLUI Database

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to GEMTEC ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.

3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.

4. Copyright is reserved to the City.

5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.

6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.

7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

Signed:
