**Re: Phase One Environmental Site Assessment  
2505 Solandt Road and 2707 Solandt Road  
Ottawa, Ontario**

---

Enclosed is our Phase One Environmental Site Assessment (ESA) report for the above-noted property. The report presented herein is based on the scope of work summarized in the proposal dated November 21, 2025. This report was prepared by Jeffrey Gauthier, B.Eng. and reviewed by Mike Kosiw, B.Sc., EP, CESA, and Daniel Elliot, B.Sc., P.Geo., QP<sub>ESA</sub>.

## 1.0 EXECUTIVE SUMMARY

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by Silk Development Group Limited to carry out a Phase One Environmental Site Assessment (ESA) of the properties located at 2505 and 2707 Solandt Road, in Ottawa, Ontario (hereafter referred to as the Site and/or Phase One Property).

This Phase One ESA was carried out in general accordance with Ontario Regulation (O. Reg) 153/04. The Phase One Property is not considered an enhanced investigation property as defined by O. Reg 153/04.

The primary objective of this Phase One ESA is to identify and document current and historical environmental conditions and operations or practices at and in the vicinity of the Site that have the potential to impact soil and/or groundwater quality at the Site, and to determine if such operations or practices result in any Areas of Potential Environmental Concern (APECs) in association with the Site. The general objectives were met through the evaluation of the information gathered from the review of records, interviews, and a Site reconnaissance.

Based on the Phase One ESA findings, potentially contaminating activities (PCAs) were identified resulting in two APECs:

- APEC 1 – Historic use of fill for infill of wetland. Contaminants of Potential Concern (COPCs) include metal and inorganics (M&I), petroleum hydrocarbon fractions F1 to F4 (PHCs), benzene, toluene, ethylbenzene, toluene, xylenes (BTEX), polycyclic aromatic hydrocarbons (PAH) with potential for impacts in soil.

Based on the identification of APECs associated with the Site, a Phase Two Environmental Site Assessment (ESA) is recommended in general accordance with Ontario Regulation 153/04 to further evaluate subsurface environmental conditions and to determine whether any contaminants of potential concern are present at concentrations exceeding the applicable site condition standards.

## 2.0 INTRODUCTION

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by Silk Development Group Limited (Client) to carry out a Phase One Environmental Site Assessment (ESA) of the properties located at 2505 and 2707 Solandt Road, in Ottawa, Ontario (hereafter referred to as the Site and/or Phase One Property).

Based on information provided by the Client, the Site is currently occupied by a heavily treed undeveloped lot and an asphaltic concrete surfaced parking lot and proposed for commercial development. The Site consists of two property parcels which form a combined area of 10.07 acres (4.08 hectares) of land located at 2505 and 2707 Solandt Road in Ottawa, Ontario.

It is understood that the Phase One ESA is required to assess the Site's potential for redevelopment into a proposed wellness spa. The location of the Site is provided on Figure A.1 in Appendix A.

This Phase One ESA was carried out in general accordance with Ontario Regulation (O. Reg) 153/04. The Phase One Property is not considered an enhanced investigation property as defined by O. Reg 153/04 based on its current property use.

The primary objective of this Phase One ESA is to identify and document current and historical environmental conditions and operations or practices at and in the vicinity of the Site that have the potential to impact soil and/or groundwater quality at the Site, and to determine if such operations or practices result in any APECs in association with the Site. The general objectives were met through the evaluation of the information gathered from the review of records, interviews, and a Site reconnaissance.

The Phase One ESA was conducted by GEMTEC staff members whose qualifications are provided in Appendix B.

### 2.1 Phase One Property Information

The Phase One ESA was completed for the following property:

Information	Description
Municipal Address	2505 Solandt Road, Ottawa, Ontario, K2K 3G5 2707 Solandt Road, Ottawa, Ontario, K2K 3G5
Property Identification Number	04517-1992 (LT) 04517-1589 (LT)

Information	Description
Legal Description	PART BLOCK 29 PLAN 4M280 PART 2 ON PLAN 4R26736; SUBJECT TO AN EASEMENT OVER PART 3 4R13632 AS IN LT1112680; CITY OF OTTAWA BLOCK 12 ON PLAN 4M-1096, SAVE AND EXCEPT PART 1 ON PLAN 4R-21488. OTTAWA.

The contact information for the Phase One Property is:

Owner / Client	Address	Contact Information
Client: Silk Development Group Limited Owner: Silk Development Group Limited	Silk Development Group Limited 40 Shields Court Markham, Ontario L3R 0M5	Mike Dunphy tel: 705-817-5692 email: mike@silkdevgroup.com

### 3.0 SCOPE OF THE INVESTIGATION

#### 3.1 General Objectives

The Phase One ESA was carried out in general accordance with O. Reg 153/04. The primary objective of the Phase One ESA is to identify any former, or current, operations or practices that may represent APECs with respect to the Site.

The general objectives were met through the evaluation of the information gathered from the review of records and available documents, interviews with relevant persons, and a Site reconnaissance.

#### 3.2 Records Review

A review of information was conducted to identify actual or potential sources of contamination within the study area from the following sources:

- Fire Insurance Maps and Reports – Fire Insurance Maps were requested through Environmental Risk Information Services (ERIS) and requested to search for fire insurance records. Relevant records, where available, were obtained for the Site and Phase One Study Area;
- Title Abstract – A chain of title abstract for the Site was requested through ERIS;
- City Directories – A City Directory Report was requested through ERIS for the Site and surrounding streets within the Study Area;

- ERIS Databases – The ERIS report searches over 70 public and private information databases to identify potential environmental concerns. An ERIS report was obtained for the Site and Phase One Study Area;
- Ministry of Environment, Conservation and Parks (MECP) - A Freedom of Information (FOI) request was submitted to the MECP for environmental records relating to the Site.
- Technical Standards and Safety Authority (TSSA) - A records search request was submitted to the TSSA for information relating to fuel storage at the Site and/or surrounding properties, where applicable;
- Aerial Photographs - Aerial photographs for various years were obtained from ERIS and reviewed on-line, where available. Aerial photos were reviewed for the Site and study area to identify areas of potential environmental concern resulting from historical land uses on the Site and surrounding areas;
- Bedrock and Overburden Geology Maps – Overburden and bedrock geology maps provided by Natural Resources Canada were reviewed to identify the underlying soil deposits and bedrock types;
- Well Records – The MECP Well Records website was searched for the Site and the study area. Any records obtained were reviewed for depth to groundwater and soil stratigraphy.
- “Mapping of Federally owned Contaminated Project Areas” website prepared by Treasury Board of Canada Secretariat was reviewed;
- ‘Old Landfill Management Strategy – Phase 1 – Identification of Sites, City of Ottawa, Ontario’ prepared by Golder Associates Ltd. dated October 2004 was reviewed; and,
- ‘Small Landfill Sites List’ and ‘Large Landfill Sites List’ prepared by the Ontario MECP were reviewed.

### **3.3 Interview**

An interview was conducted via Microsoft Teams with Richard Goldstein, Lisa Bowley, and Greg Winters on December 18, 2025, Site interview candidates of the properties at 2505 and 2707 Solandt Road, as outlined in Section 5.0. Additional communications with persons familiar with the development history of the Site were undertaken in January 2026.

### **3.4 Site Reconnaissance**

The Site was visually assessed to document current conditions and to evaluate the potential for environmental impacts to on-Site soil and groundwater. Adjacent and neighbouring properties within the Study Area were assessed from publicly accessible boundaries to evaluate the potential for environmental impacts to the Site.

## 4.0 RECORDS REVIEW

### 4.1 General

#### 4.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Phase One Property. Based on GEMTEC's review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the Site reconnaissance, it was concluded that an assessment of information pertaining to properties within 250 metre (m) of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA.

The Site and limits of the Phase One Study Area are provided on Figure A.1, Appendix A.

#### 4.1.2 First Developed Use Determination

Based on the review of the historical records obtained as part of this assessment, the Phase One Property appears to have been historically agricultural from at least 1934 until approximately 1955 when the Site appeared to no longer be in use as agricultural fields, based on the aerial photograph.

#### 4.1.3 Fire Insurance Plans

Fire insurance plans (FIPs), insurance and/or inspection reports were requested from Verisk related to the Site and surrounding properties. Verisk informed GEMTEC that there were no records pertaining to the Phase One Property.

A copy of the Verisk response is provided in Appendix C.

#### 4.1.4 Chain of Title

A chain of title search from crown to present-day was obtained from ERIS and is included in Appendix D. The following are of note based on a review of the title abstracts going back to the 2007:

Owners Name	Dates of Ownership
PIN 04517-1589 (LT) – 2505 Solandt Road	
C-Mac Kanata Inc.	Prior to November 23, 1999
Kanata Research Park Corporation/ Wesley Clover International Corporation	November 23, 1999, to present

Owners Name	Dates of Ownership
PIN 04517-1992 (LT) – 2707 Solandt Road	
Solandt Road Property GP Inc.	Prior to January 16, 2015
Solandt Road Property, Limited Partnership	
Kanata Research Park Corporation/ Wesley Clover International Corporation	January 16, 2015, to Present

#### 4.1.5 Environmental Reports

No historic environmental reports were available for GEMTEC to review. Two reports were available for GEMTEC to review. A geotechnical investigation completed by GEMTEC was available, and one report completed by Golder Associates Ltd., was provided by Novatech. Both are summarized below:

- Geotechnical Investigation, Proposed Commercial Development, 2505 and 2707 Solandt Road, Ottawa, Ontario. GEMTEC. December 2025.
  - Fill material was encountered (at 2505 Solandt Road) and extended to depths ranging from about 2.4 to 3.8 metres (m) below ground surface (bgs). Fill material ranged from fine to coarse grained soils and contained organics, cobbles, and boulders.
  - The soil stratigraphy was identified as fill underlain by silty clay to clayey silt underlain by clay to silty clay underlain by glacial till to a depth of 7.1 m bgs.
  - Groundwater elevations were measured at 74.6 to 74.8 m above sea level (asl) on October 21, 2025.
- Phase One Environmental Site Assessment. 2707 Solandt Road, Ottawa, Ontario. Golder Associated Ltd. August 2019.
  - No APECs were identified at 2707 Solandt Road.
  - A salt storage dome and fill stockpiles were present on 2505 Solandt Road.

Additional reporting from GEMTEC's predecessor, Morey, Houle, Chevrier Engineering Ltd. (MHC), was reviewed. The reporting included a geotechnical investigation completed in November 2005, site reports from December 2005 and January 2006, and an enhanced CSA Phase I ESA. The following is a summary of findings:

- Eight test pits were advanced in preparation for redevelopment of the 2505 Solandt Rd. property as a parking lot.
- Fill materials with waste such as lumber, metal, plastic, and tires was observed up to 3 m bgs in four of the eight test pits advanced at the Site.
- No visual or olfactory evidence of contaminants, beyond the waste materials, were noted in the geotechnical and enhanced Phase I ESA.

- Soil quality testing was recommended to confirm the presence or absence of contaminants of potential concerns associated with the fill with waste debris.
- Some fill materials and peat were removed from 2505 Solandt Rd., as recommended by the geotechnical investigation, to accommodate the construction of the parking lot.
- Not all areas where waste debris was noted were removed from the site.

Based on the additional information, it appears that fill materials of unknown quality with visual waste were identified on the Site and not removed. As such the following PCA was identified:

- PCA #30: Importation of Fill Material of Unknown Quality

## 4.2 Environmental Source Information

### 4.2.1 ERIS Database Report

GEMTEC contacted ERIS to conduct a search of over 70 public and private information databases for the Site and the study area. The complete ERIS report, including a list of databases searched, is provided in Appendix E. The listings of note for the Site and adjacent properties are provided in the table below:

Address / Location	Distance from Site	Company / Name	Description
515 Legget Drive	Directly west of the Site		Listed as a waste generator (ON3449897) in year 2015 for oil skimmings & sludges.
		Broccolini Construction Ottawa Inc.	Listed in Scott's Manufacturing Directory for software publishers, and computer systems design and related services in 1983, 1987, and 1993.
		Open Text Corporation	Listed as a spill of diesel fuel of unknown quantity to ground in 2008. Evidence of cleaning the spill.
415 Legget Drive	30 m east	Canadian Marconi Company/CMC Electronics	Listed as a waste generator (ON0249400/ON3005081) during the years 1986 to 2004 for one or more of the following: acid waste – heavy metals, aliphatic solvents, polymeric resins, halogenated solvents, waste oils & lubricants, other specified inorganics, inorganic laboratory chemicals, alkaline wastes - other metals, organic laboratory chemicals, waste compressed gases,
		SCI Brockville Corp	
		Esterline CMC Electronics	

Address / Location	Distance from Site	Company / Name	Description
		Semtech Corporation	paint/pigment/coating residues, aromatic solvents.
		Control Microsystems Inc.	Listed as a waste generator (ON6007772) during the years 2002 to 2013 for one or more of the following: other specified inorganics, waste oils & lubricants, emulsified oils, organic laboratory chemicals, inorganic laboratory chemicals, waste compressed gases, aliphatic solvents, alkaline wastes – heavy metals, graphic art wastes, polymeric resins, acid waste – other metals, paint/pigment/coating residues, petroleum distillates.
		415 Legget Kanata Inc.	Listed as a waste generator (ON6773632) during the years 2007 to 2016 for one or more of the following: waste oils & lubricants, organic laboratory chemicals, inorganic laboratory chemicals, waste compressed gases, aliphatic solvents, alkaline wastes – other metals, polymeric resins, acid waste – heavy metals.
		Access Property Development Inc.	Listed as a waste generator (ON8700842) during the years 2007 to 2012 for one or more of the following: PCBs, alkaline wastes – other metals, other specified inorganics, oil skimmings & sludges.
		BAE Systems Canada	Listed as a waste generator (ON2875627) during the years 2016 to 2019 for one or more of the following: waste compressed gases, organic laboratory chemicals, inorganic laboratory chemicals.
			Listed as a waste generator (ON4444964) during the years 2014 to 2021 for one or more of the following: waste compressed gases, organic laboratory chemicals, inorganic laboratory chemicals, aliphatic solvents, petroleum distillates.

Address / Location	Distance from Site	Company / Name	Description
			<p>Listed as a waste generator (ON9095516/9640093) during the years 2014 to 2021 for one or more of the following: waste compressed gases, alkaline wastes – other metals, paint/pigment/coating residues, waste oils &amp; lubricants, aliphatic solvents.</p> <p>Listed as a waste generator (ON001072364) during 2024 for aliphatic solvents.</p> <p>Listed as semiconductor and other electronic component manufacturing from 1993 to 2025 with the production of lead waste. Listed as a transportation equipment manufacturer from 1993 to 2025.</p> <p>Listed in Scott's Manufacturing Directory for calculating and accounting machines, except electronic computers, telephone and telegraph apparatus, radio and television broadcasting and communications equipment, and search, detection, navigation, guidance, aeronautical, and nautical systems and instruments in 1982.</p> <p>Listed in Scott's Manufacturing Directory for aerospace product and parts manufacturing, semiconductor and other electronic component manufacturing, computer, and peripheral equipment manufacturing, measuring, medical and controlling devices manufacturing, navigational and guidance instruments manufacturing, radio and television broadcasting and wireless communications equipment manufacturing, navigational and guidance instruments manufacturing in 2003.</p>

Address / Location	Distance from Site	Company / Name	Description
425 Legget Drive	15 m south	SR Telecom Solectron EMS Canada	<p>Listed as a waste generator (ON2171800) during the years 1996 to 2006 for one or more of the following: inorganic laboratory chemicals, organic laboratory chemicals, aliphatic solvents, paint/pigment/coating residues, other specified inorganics, waste compressed gases, waste oils &amp; lubricants, aromatic solvents, polymeric resins, halogenated solvents, amines, detergents/soaps, graphic art wastes, petroleum distillates, emulsified oils, aliphatic solvents.</p> <p>Listed in Scott's Manufacturing Directory for radio and television broadcasting and communications equipment in 1986.</p> <p>Listed in Scott's Manufacturing Directory for semiconductor and other electronic component manufacturing in 1977.</p>
303 Terry Fox Drive	190 m east	March Networks COM DEV Ltd.	<p>Listed as a waste generator (ON4978988) during the years 2007 to 2012 for one or more of the following: alkaline wastes – heavy metals, other specified inorganics, petroleum distillates, acid waste – heavy metals, aliphatic solvents.</p> <p>Listed as a waste generator (ON5522674) during the years 2009 to 2021 for one or more of the following: waste oils &amp; lubricants, organic laboratory chemicals, aliphatic solvents, waste compressed gases, paint/pigment/coating residues.</p> <p>Listed in Scott's Manufacturing Directory for measuring, medical and controlling devices manufacturing, computer and peripheral equipment manufacturing, computer, and peripheral equipment manufacturing in 1986.</p>

The unplotable report summary was reviewed to determine if any of the records were located on the Site or within the Study Area. The entries were only located geographically by concession, lot number, or company. Due to the uncertainty related to the location of the entries, which could not be confirmed as being present within the study area, these activities were not summarized in this report.

Based on the above, the following PCAs were identified:

- OT.1: Listed as a waste generator
- OT.2: Listed in Scott's Manufacturing Directory
- OT.3: Listed as a spill

#### 4.2.2 City Directories

A review of the city directories from 1991 to 2023 was completed for the Site and the surrounding properties. A summary of relevant information based on a review of the city directory information is provided in the table below. A copy of the city directory records is provided in Appendix F.

Civic Address	City Directory information
515 Legget Drive	Clearford Water Systems Inc – Wastewater Treatment (2012 - 2023)
303 Terry Fox Drive	March Networks Corp – Security control equipment & systems wholesale (2017 - 2023) Honeywell Aerospace - Space Components & Systems manufacturers (2021 - 2023) COM DEV Canada – unclassified (2012 - 2017)
2500 Solandt Road	Pronto Forms Inc/Corp – Printers manufacturers (2021)
415 Legget Drive	CMC Electronic Inc (2006 – 2007) Canadian Marconi Company (1991 - 2007)

Based on the above records review, no PCAs were identified.

#### 4.2.3 Technical Standards and Safety Authority (TSSA)

The TSSA was contacted for available records for properties listed below. The response, dated December 18, 2025, indicated that there were no records available for the following properties:

- 2500, 2505, 2707 Solandt Road;
- 415, 425, 515 Legget Drive; and,
- 303 Terry Fox Drive.

A copy of the search requests and the response from the TSSA are provided in Appendix G. Based on the above, no PCAs were identified.

#### **4.2.4 Ontario Ministry of Environment, Conservation and Parks (MECP)**

A Freedom of Information was submitted to MECP for a search of environmental records relating to the Site on November 28, 2025. No records were received at the time of this report. A copy of the request is provided in Appendix H.

#### **4.2.5 Mapping of Federally Contaminated Sites**

A Government of Canada, Treasury Board of Canada Secretariat, interactive map illustrating the database of over 4,000 federally contaminated sites was reviewed. The database did not identify any federally contaminated sites located within the Phase One Study Area.

#### **4.2.6 Landfills**

The MECP published maps entitled “Small Landfill Sites List” and “Large Landfill Sites Map” published March 2014 – Updated October 2021. The publication includes information to identify old landfill sites for potential environmental considerations within the boundary of the province of Ontario. No landfills were identified within the Phase One Study Area.

#### **4.2.7 Historic Land Use Inventory**

A Historical Land Use Inventory (HLUI) request for the subject Site was submitted to the City of Ottawa on December 1, 2025, at the time of writing no response had been received. A copy of the HLUI request is provided in Appendix I.

Should the HLUI return any relevant information the Phase One ESA will be updated.

### **4.3 Physical Setting Sources**

#### **4.3.1 Aerial Photographs**

Aerial photographs were provided to GEMTEC by ERIS and were obtained from various sources including the National Air Photo Library (NAPL), and/or Maxar Technologies (Maxar). Aerials were selected for review considering suitable scale for analysis and coverage area. The earliest photograph obtained was from 1946. Observations made with respect to the reviewed aerial photographs are summarized in the table below.

Date	Photograph Source	Observations (Phase One Property)	Observations (Surrounding Properties)
1934	NAPL	The Site appears to be agricultural fields.	<p>North: Agricultural fields and associated/residential structures and community use roadways.</p> <p>East: Agricultural fields and associated/residential structures and community use roadways.</p> <p>West: Agricultural fields and community use roadways.</p> <p>South: Agricultural fields and associated/residential structures and community use roadways.</p>
1946	NAPL	There are no significant changes compared to the 1934 aerial photographs.	There are no significant changes compared to the 1934 aerial photographs.
1955	NAPL	There are no significant changes compared to the 1946 aerial photographs.	There are no significant changes compared to the 1946 aerial photographs.
1964	NSPL	There are no significant changes compared to the 1955 aerial photographs.	There are no significant changes compared to the 1955 aerial photographs.
1976	GeoOttawa	Ground disturbances are present on the southern portion of the Site.	A dirt path extends from the south of the Site to the west of the Site along with a ground disturbance to the east.
1983	NAPL	The ground disturbance is no longer present and is mainly covered in vegetation.	A large structure to the south is present.
1991	GeoOttawa	A pathway intersects the Site from east to west.	Two large structures are present south of the Site. A pathway is present south and east of the Site. A possible water body is present north of the Site.
2002	GeoOttawa	A waterbody is present on the northern portion of the Site.	Large structures and associated parking lots are present east, south, and west of the Site. A golf course with several ponds are present east, north, and west from the Site.
2011	GeoOttawa	A parking lot replaced the northern waterbody.	An additional parking lot is present south of the Site.

Date	Photograph Source	Observations (Phase One Property)	Observations (Surrounding Properties)
2017	GeoOttawa	A small ground disturbance and small stockpiles are present on the northern portion of the Site. A small stockpile of likely salt is located on the western portion of the Site.	There are no significant changes compared to the 2011 aerial photographs
2025	MAXAR	Stockpiled material is present on the northern portion of the Site.	There are no significant changes compared to the 2017 aerial photographs

Photographs provided by ERIS are included in Appendix J. Aerial photographs reviewed through GeoOttawa as part of the investigation are not reproduced in this report due to copyright limitations.

Based on the above, and inconsideration of information discussed in Section 4.1.5, the following PCAs were identified:

- PCA #30: Importation of Fill Material of Unknown Quality

#### 4.3.2 Topography, Hydrology and Geology

Topic	Description	Comment / Source
<b>Topography of Site and Surrounding Area</b>	The Site is at an elevation of 76 to 79 m above sea level (asl). Based on topographic mapping, the Site is relatively flat. The Site generally appears to be at grade with the most properties located adjacent to the Site.	Google Earth
<b>Overburden Soils</b>	Older alluvial deposits consisting of clay, silt, sand, gravel, and organic remains; organic deposits of peat, muck, marl.	Ontario Geologic Survey
<b>Type of Bedrock</b>	Dolostone and sandstone. Listed as Beekmantown Group.	Ontario Geologic Survey
<b>Depth to Bedrock</b>	No reported bedrock depth within the Phase One Study area. The closest wells to the Study	Well Records

Topic	Description	Comment / Source
	area indicate bedrock depths between 0.30 to 4.87 m bgs.	
<b>Inferred Near Surface Groundwater Flow</b>	Regional groundwater flow is inferred to be north towards the Ottawa River, located approximately 2.55 kilometers (km) north of the Site. A small watercourse is present on the southwestern portion of the Site; a waterbody is present approximately 135 m northwest of the Site with another waterbody approximately 185 m east of the Site. Shallow groundwater flow often reflects topographic features and typically flows toward nearby lakes, rivers, and wetland areas. Based on this, the two waterbodies is anticipated to influence the groundwater flow direction to the west.	GeoOttawa
<b>Site Grade Relative to the Adjoining Properties</b>	Based on topographic mapping, the Site appears to follow the topography of the area and is at grade with respect to most properties located adjacent to the Site.	ERIS report
<b>Depth to Groundwater</b>	Approximately 0.30 to 2.13 m bgs in overburden.	ERIS report Well Records

#### 4.3.3 Fill Materials

Topic	Description	Comment / Source
<b>Fill Materials</b>	Small stockpiles of sand and gravel were observed on the northern portion of the Site. This material is imported from aggregate distributors that was previously used on Site.	Site Reconnaissance Site Representative

#### 4.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

Topic	Description	Comment / Source
<b>Nearest Open Water Body</b>	A small watercourse is present on the southwestern portion of the Site; a waterbody is present approximately 135 m northwest of the Site; another waterbody is approximately 185 m east of the Site.	GeoOttawa
<b>Areas of Natural and Scientific Interest ("ANSI")</b>	None identified within the Phase One Study area.	Ministry of Natural Resources
<b>Provincial Parks or Conservation Reserves</b>	None identified.	Ministry of Natural Resources
<b>Provincially Significant Wetlands or Designated Wilderness Areas</b>	None provincially significant wetlands were identified. An unevaluated wetland is present on the northern portion of the Site.	Ministry of Natural Resources
<b>Environmentally Significant Areas per Municipal Official Plan(s)</b>	N/A	N/A
<b>Threatened or Endangered Species Habitat</b>	N/A	N/A
<b>Wellhead Protection Areas</b>	None identified.	Ministry of the Environment, Conservation and Parks; City of Ottawa Official Plan

Topic	Description	Comment / Source
<b>Municipal Drinking Water Distribution Systems</b>	A formal municipal service check was not completed. Based on the nature of the area, municipal water is expected.	No source

#### 4.3.5 Well Records

Topic	Description	Comment / Source
<b>Wells (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table)</b>	<p>No well records were registered in the Phase One Property.</p> <p>The wells in the Phase One Study Area indicated the following: The wells were used for domestic, irrigation, and monitoring purposes. The wells were advanced between 1983 and 2021 and the maximum end depths ranged from 16.8 and 55.8 m bgs. In general, the stratigraphy was characterized as till or brown sand underlain by clay underlain by limestone, sandstone, and/or granite. The closest wells to the Study area indicate bedrock depths between 0.30 to 13.71 m bgs. Static groundwater was reported to be encountered at a depth of 0.30 to 2.13 m bgs in overburden.</p> <p>The location of potable water wells, where known or observed, are indicated on Figure A.1, Appendix A.</p>	ERIS report, MECP well records

## 5.0 INTERVIEWS

Richard Goldstein (hereinafter referred to as the “Site Representative”), with approximately 20 years of site knowledge, was interviewed on December 18, 2025, along with Lisa Bowley and Greg Winters. Pursuant to the requirements O. Reg 153/04, the Site Representative was interviewed with knowledge of current Site operations. Relevant information obtained during the interview and site visit, including that relating to PCAs and APECs, is provided in Section 6.0.

## 6.0 SITE RECONNAISSANCE

### 6.1 General Requirements

The Site reconnaissance was completed by Mr. Jeffrey Gauthier, B.Eng, of GEMTEC on December 9, 2025, from approximately 10:45 AM to 11:45 AM. The weather at the time of the Site reconnaissance was sunny and approximately -7 degrees Celsius.

The Site reconnaissance was completed to identify any PCAs associated with the current activities on the Site and/or within the Study Area.

At the time of the Site reconnaissance, the Site was occupied by a parking lot with small stockpiles of aggregate and an undeveloped/vacant lot.

Photographs of the Site were taken during the Site reconnaissance to document the general condition of the Site and any PCAs. The relevant photographs are presented in Appendix K.

### 6.2 Specific Observation at Phase One Property

The following observations were made during the Site reconnaissance:

Topic	Observations	Source
Number and Age of Buildings on the Site	No structures identified.	Site observation
General Descriptions of Each Building (including improvements)	No structures identified.	Site observation
Approximate Building Areas	No structures identified.	Site observation
Number of Floors Above Ground	No structures identified.	Site observations
Number, Age, and Depth of Levels Below Ground Level	No structures identified.	Site observation
Number and Details of all Aboveground Storage Tanks (ASTs)	No ASTs observed at the time of site reconnaissance.	Site representative, site observation

Topic	Observations	Source
Number and Details of all Underground Storage Tanks (USTs)	No USTs observed at the time of site reconnaissance.	Site representative, Site observation
<u>Underground Utilities</u>		
Potable and Non-Potable Water Sources	The Site is serviced by municipal hydro.	Site representative, Site observation
Utility Lines Present (i.e., Electrical, Natural Gas, other)	No utility drawings are available for the Site.	Site observations, Site representative
Sanitary/Process Wastewater Receptor	No wastewater is generated.	Site observations, Site representative
Sanitary Sewer Connection	Site is not connected to the municipal sewer.	Site observations
Septic Systems	None identified or reported.	Site observations
Storm Water Flow	Overland flow to natural depressions and infiltration.	Site observations
Storm Sewer Connection	Stormwater ditch connected to storm sewer located on Site.	Site observations
<u>Interior of Structures</u>		
Entry and Exit Points for Site Buildings	No structures identified.	Site observations
Existing and Former Heating System(s) (include fuel type / source)	None observed.	Site observations
Existing and Former Cooling System(s) (include fuel type / source)	None observed.	Site observations
Drains, Pits, and Sumps (include current use, if any, and former use)	None observed.	Site observations
Unidentified Substances	None observed.	Site observations

Topic	Observations	Source
Floor Stains or Corrosion Located near a Potential Discharge Location	None observed.	Site observations
<u>Miscellaneous Exterior</u>		
Location of any Current and Former Wells	None identified or reported.	Site observations
Ground Cover (i.e., grass, gravel, soil, or pavement, etc.)	At the time of the Site reconnaissance the majority of the Site was covered in vegetation, asphalt, or snow.	Site observations
Current or Former Railway Lines or Spurs	None observed.	Site observations
Presence of Stained Soil, Vegetation, or Pavement	None observed. Snow cover limited observations.	Site observations
Presence of Stressed Vegetation	None observed. Snow cover limited observations.	Site observations
Areas Where Fill and/or Debris Materials Appear to Have Been Placed	Fill material (sand and gravel) are stockpiled on the northern portion of the Site. Fill materials with waste debris noted during a 2005 geotechnical were present under the site	Site observations, Site representative
Unidentified Substances	None observed.	Site observations, Site representative
Potentially Contaminating Activity	At the time of the Site visit, no PCAs (based on O. Reg. 153/04, Table 2 – Potentially Contaminating Activities) were observed and/or reported.	Site observations, Site representative

### 6.2.1 Enhanced Investigation Property

Based on the information reviewed as part of this Phase One ESA, the Site is not an enhanced investigation.

### 6.2.2 Surrounding Land Use

During the Site visit, a visual reconnaissance of the outdoor operations in the Phase One Study Area was carried out from the Site and publicly accessible areas. The surrounding properties include residential, community, commercial, and parkland land uses, as illustrated in Figure A.1, in Appendix A.

**North (cross-gradient):** Commercial golf course.

**East (down-gradient):** Community use roadways, commercial buildings, and commercial golf course.

**West (down-gradient):** Commercial buildings and commercial golf course.

**South (cross-gradient):** Community use roadways and commercial buildings.

### 6.3 Written Description of Investigation

At the time of the Site reconnaissance, conducted on December 9, 2025, the Site was occupied by a parking lot and vacant/undeveloped vegetative lot. The surrounding properties within the Phase One Study Area included community and commercial.

The findings from the Site reconnaissance did not indicate the presence of PCAs contributing to APECs.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Current and Past Uses

Current and past uses of the Phase One Property since the date of first developed use are summarized in the table below.

Owners Name	Dates of Ownership
PIN 04517-1589 (LT) – 2505 Solandt Road	
C-Mac Kanata Inc.	Prior to November 23, 1999
Kanata Research Park Corporation/ Wesley Clover International Corporation	November 23, 1999, to present
PIN 04517-1992 (LT) – 2707 Solandt Road	
Solandt Road Property GP Inc.	Prior to January 16, 2015
Solandt Road Property, Limited Partnership	
Kanata Research Park Corporation/ Wesley Clover International Corporation	January 16, 2015, to Present

### 7.2 Potentially Contaminating Activity

As per O. Reg 153/04, a potentially contaminating activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred on the Phase One Property

or in the Phase One Study Area. As per the regulation, a PCA located on the Phase One Property or in the Phase One Study Area may require the identification of an APEC. As per the regulation, an APEC means the area on, in or under the Phase One Property where one or more contaminants are potentially present, as determined through the identification of past or present uses on, in or under the Phase One Property and the identification of a PCA.

A summary of the identified PCAs and the rationale for the identification of PCAs as an APEC are provided in the table below. PCA locations are shown on Figure A.2, Appendix A.

PCA Reference # on Figure A.2	Address/ Location	PCA ID	Distance from Site	Description	APEC Rationale
30-1	2707 Solandt Road	#30. Importation of Fill Material of Unknown Quality	On-Site	Historic use of fill remaining for infill of wetland after select area removals	Yes. PCA is located on the Phase One Property and must be identified as an APEC, as per O. Reg. 153/04.
OT.1-1 OT.2-1 OT.3-1	515 Legget Drive	OT.1. Listed as a waste generator OT.2. Listed in Scott's Manufacturing Directory OT.3. Listed as a spill	Directly west of the Site	Listed as a waste generator, in Scott's Manufacturing Directory and as a spill	No. Due to the distance of operations and watercourse between properties.
OT.1-2 OT.2-2	425 Legget Drive	OT.1. Listed as a waste generator OT.2. Listed in Scott's Manufacturing Directory	15 m south	Listed as a waste generator and in Scott's Manufacturing Directory	No. Due to the distance of operations.
OT.1-3 OT.2-3	415 Legget Drive	OT.1. Listed as a waste generator OT.2. Listed in Scott's Manufacturing Directory	30 m east	Listed as a waste generator and in Scott's Manufacturing Directory	No. Due to the distance of operations.
OT.1-4 OT.2-4	303 Terry Fox Drive	OT.1. Listed as a waste generator OT.2. Listed in Scott's Manufacturing Directory	190 m east	Listed as a waste generator and in Scott's Manufacturing Directory	No. Due to the distance of operations.

### 7.3 Areas of Potential Environmental Concern

A summary of the APECs identified at the Phase One Property is provided in the table below. The APEC locations are presented in Figure 4, Appendix A. Contaminants of potential concern (COPCs) are specified using the method groups as identified in the MECP document "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act and Excess Soil Quality", dated February 19, 2021.

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
APEC 1 – Historic use of fill for infill of wetland	Northern portion of the Site	#30. Importation of Fill Material of Unknown Quality	On-Site	M&I, PAH, PHC, BTEX	Soil

**Notes:**

M&I – Metals and inorganics

PHCs – Petroleum hydrocarbon fractions F1 to F4

BTEX - Benzene, toluene, ethylbenzene, toluene, xylenes

PAH – Polycyclic Aromatic Hydrocarbons

EC – Electrical conductivity

SAR – Sodium adsorption ratio

### 7.4 Phase One Conceptual Site Model

The following key features (as required by O. Reg 153/04) are presented in Figures A.1, A.2, and A.3, Appendix A:

- All water bodies located in the Phase One Study Area;
- Drinking water wells and monitoring wells on the Phase One Property;
- Roads (including names) within the Phase One Study Area;
- Uses of properties adjacent to the Phase One Property;
- Location of identified PCAs in the Phase One Study Area (including any storage tanks); and,
- Location of identified APECs in the Phase One Study Area.

The following describes the Phase One ESA Conceptual Site Model (CSM) based on the information obtained and reviewed as part of this Phase One ESA:

- The Site consists of two property parcels which form a combined area of 10.07 acres (4.08 hectares) of land located at 2505 and 2707 Solandt Road in Ottawa, Ontario.
- At the time of the Site reconnaissance, the Site was occupied by a parking lot and vacant/undeveloped vegetative lot;

- Historically, the Phase One Property was agricultural from the earliest aerial photograph in 1934;
- Current surrounding land uses include commercial and community;
- The Phase One Property is serviced with municipal hydro;
- The Site is at an elevation of approximately 76 to 79 masl. Based on topographic mapping, the Site is relatively flat. The Site generally appears to be at grade with the surrounding properties;
- Surficial soil conditions are primarily characterized by Older alluvial deposits consisting of clay, silt, sand, gravel, and organic remains; organic deposits of peat, muck, marl.;
- Bedrock geology consists of dolostone and sandstone. The closest wells to the Study area indicate bedrock depths between 0.30 to 4.87 m bgs;
- Based on the well records, the wells reported a static groundwater was encountered at depths between 0.30 to 2.13 mbgs in the overburden;
- Regional groundwater flow is inferred to be north towards the Ottawa River, located approximately 2.55 kilometers (km) north of the Site. A small watercourse is present on the southwestern portion of the Site; a waterbody is present approximately 135 m northwest of the Site with another waterbody approximately 185 m east of the Site. Based on this, the watercourse and waterbodies will likely influence local groundwater flow direction to the west.
- No areas of natural and scientific interest (ANSIs) were identified on the Site or within the Study Area. The Site is not situated within a provincially significant wetland;
- Based on available information, buried services are likely present on-Site. Given this, these buried services, may influence the distribution of contamination, if any, at the Site.
- Based on the Phase One ESA findings, PCAs were identified resulting in the following APECs:
  - APEC 1 – Historic use of fill for infill of wetland. Contaminants of Potential Concern (COPCs) include M&I, PAH, PHC, and BTEX;

#### **7.4.1 Uncertainty and Absence of Information**

There are no material deviations to the Phase One ESA requirements set out in O. Reg 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One ESA CSM or the findings of this Phase One ESA.

## **8.0 CONCLUSIONS**

### **8.1 Whether Phase Two ESA Required**

Based on the information obtained and reviewed as part of this Phase One ESA which is considered as fulfilling the specific objectives and requirements of Parts II through V of Schedule D to O. Reg 15/304, two APECs were identified at the Phase One Property. Based on the identification of the APEC associated with the Site, a Phase Two ESA would be recommended.

## 10.0 LIMITATIONS AND USE OF REPORT

This report was prepared for the exclusive use of Silk Development Group Limited and is based on data and information collected during the Phase One ESA of the Site conducted by GEMTEC. This report may not be relied upon by any other person or entity without the express written consent of GEMTEC and Silk Development Group Limited. In evaluating this Site, GEMTEC has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others. GEMTEC disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of GEMTEC's assessment are described in this report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within GEMTEC's proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. GEMTEC did not perform a complete assessment of all possible conditions or circumstances that may exist at the Site referenced in the report. Conditions may therefore exist which were not detected given the limited nature of the assessment. GEMTEC was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the report. It is understood that the services provided for in the scope of work allowed GEMTEC to form no more than an opinion of the actual conditions at the Site at the time of the Site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. If a service is not expressly indicated, do not assume it has been provided. The conclusions provided herein represent the best judgment of GEMTEC based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the Phase One ESA is sufficient to identify existing and/or potential environmental liabilities that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the Site was carried out as part of this assessment. The Phase One ESA does not include a program of intrusive observation/testing. These activities would be carried out as part of a Phase Two ESA. This environmental assessment included only a cursory overview of the neighbouring land uses from public right of ways and from the Site and does not constitute a complete assessment of the adjacent sites.

## 11.0 SIGNATURES

The undersigned Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust this report provides sufficient information for your present purposes. If you have any questions concerning this report, please do not hesitate to contact our office.

## **APPENDIX B**

### Qualifications of Assessors

## **QUALIFICATION OF ASSESSORS**

### **Jeffrey Gauthier, B.Eng – Environmental Technologist**

The primary assessor for this Phase One Environmental Site Assessment (ESA) was Mr. Jeffrey Gauthier, Environmental Technologist with GEMTEC. Jeffrey has Bachelor of Environmental Engineering. Mr. Gauthier's formal education and work experience in environmental consulting with GEMTEC has provided him with the knowledge and expertise to identify sources of environmental concern and evaluate their potential to cause adverse environmental impacts.

### **Mike Kosiw, B.Sc (Hons), EP, CESAI, A.Ag – Contaminated Sites Lead**

The Phase One ESA was carried out under the supervision of Mr. Mike Kosiw, B.Sc (Hons), EP, CESAI, A.Ag. Mr. Kosiw has over 12 years of experience in the completion of Phase I and Phase II Environmental Site Assessments (ESAs) in accordance with the CSA Group Standards and Phase One and Two ESAs completed in accordance with O.Reg. 153/04.

### **Daniel Elliot, B.Sc., P.Geo., QP<sub>ESA</sub> – Senior Environmental Geoscientist**

The Phase One ESA was carried out under the oversight of Mr. Daniel Elliot. Daniel has 14 years of experience in the environmental sector in jurisdictions across Canada and the United States. His early career with the Morwick G360 Groundwater Research Institute saw him carrying out research projects developing and using cutting edge techniques and technology. Since moving into consulting, he has gained extensive experience providing various environmental services including Phase One and Two Environmental Site Assessments, contaminant and hydrogeological site characterization, remedial planning, and implementation; risk assessment; filing of Records of Site Conditions; compliance and contract support; and waste and excess soil characterization/management. Daniel is a practicing member of the Association of Professional Geoscientists of Ontario and is a "qualified person" under Ontario Regulation 153/04 and Ontario Regulation 406/19.

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Executive Summary: Summary By Data Source

### **CA - Certificates of Approval**

A search of the CA database, dated 1985-Oct 30, 2011\* has found that there are 10 CA site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Kanata Research Park Corporation	515 Legget Drive Ottawa ON	145.3	<a href="#"><u>10</u></a>
Kanata Research Park Corporation	2500 Sandlot Drive Ottawa ON	163.4	<a href="#"><u>12</u></a>
Dell Canada Inc.	2500 Solandt Road, Kanata Ottawa ON	163.4	<a href="#"><u>12</u></a>
CMC Electronics Inc.	415 Legget Drive Ottawa ON	218.1	<a href="#"><u>21</u></a>
415 Legget Leaseholds Inc.	415 Legget Drive Ottawa ON	218.1	<a href="#"><u>21</u></a>
Samina - SCI	415 Legget Drive Ottawa ON	218.1	<a href="#"><u>21</u></a>
Sitel Teleservices Canada Inc.	415 Leggat Drive Ottawa ON	218.1	<a href="#"><u>21</u></a>
Kanata Research Park Corporation	303 Terry Fox Dr Ottawa ON	247.7	<a href="#"><u>26</u></a>
Kanata Research Park Corporation	303 Terry Fox Drive Ottawa ON	247.7	<a href="#"><u>26</u></a>

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Kanata Research Park Corporation	411 Legget Drive Ottawa ON	247.9	<a href="#"><u>27</u></a>

### **EASR - Environmental Activity and Sector Registry**

A search of the EASR database, dated Oct 2011 - Sept 31, 2025 has found that there are 3 EASR site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
WESLEY CLOVER INTERNATIONAL CORPORATION	525 Legget DR Ottawa ON K2K 2W2	217.3	<a href="#"><u>20</u></a>

<a href="#">21</a>	1 of 64	S/218.1	79.7 / 3.92	<b>Samina - SCI 415 Legget Drive Ottawa ON</b>	CA
<b>Certificate #:</b> 5768-5BJFS3 <b>Application Year:</b> 02 <b>Issue Date:</b> 10/7/02 <b>Approval Type:</b> Industrial air <b>Status:</b> Approved <b>Application Type:</b> New Certificate of Approval <b>Client Name:</b> SCI Brockville Corp. <b>Client Address:</b> 415 Legget Drive <b>Client City:</b> Ottawa <b>Client Postal Code:</b> <b>Project Description:</b> This applicaton is for approval of the following sources discharging to the atmosphere from various processes, chemical handling areas and heating units: -Molten Solder - this process removes parts (transformer, pops, pins) from circuit boards and emissions include particulate matter; -Fluid Transformer Fume Hood - This fume hood is used mostly for transferring propanol from a large bottle to smaller bottles. Parafin wax is also used under this fume hood as a lubricant to fit parts together; -Wave Solder Process - this process consists of spraying of circuit boards with 951 flux under a fume hood; -Drying Parts - this process involves the removal of humidity from small parts (chips) and negligible amounts of water vapour are exhausted to atmosphere; -BTU Oven - this process involves fixing components to circuit boards by using paste or glue and they are then put in an oven. Emissions include vapours of solder glue and EPIBOND glue; -Ultrasonic Cleaner Smart Sonic and Ultrasonic Evaporator - this cleaner is used to clean small amounts of solder paste and glue from silk screens. Emissions include traces of					

Map Key	Number of Records	Direction/ Distance (m)	Elev/Diff (m)	Site	DB
				<p>small amounts of solder paste and glue; -Electrical Discharge Machine - this machine is used for vaporising metal and uses graphite (some times copper) as a burning material (electrode) to make metal pieces; -a laser is used to cut steel, aluminum and plastic. Nitrogen is used as a cutting gas to reduce oxidation and push material away. The gas and fumes are exhausted after being filtered by an air filter; -Welding Area - welding is done for maintenance purposes only and some smoke comprising particulate matter is exhausted; and -Plastic Injection Machine - two (2) identical plastic injection machines are used to make plastic parts. In this process, plastic pellets (Lexan 920) are dried in a dryer (no exhaust) and then inserted into a hopper that feeds into a barrel where they are heated. The melted plastic then goes through a runner in the machine and into a mold. It is then cooled down and the parts are pushed out of the machine.</p> <p><b>Contaminants:</b> <b>Emission Control:</b></p>

Note:	Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.				
	For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

#### **Primary NAICS Details**

<b>NAICS Code:</b>	334410	<b>Start Date:</b>	2012
<b>Record Year:</b>	2012	<b>End Date:</b>	2016
<b>Key Indus Sector En:</b>	Other Manufacturing		
<b>Key Indus Sector Fr:</b>	Autres fabrication		
<b>NAICS Title En:</b>	Semiconductor and other electronic component manufacturing		
<b>NAICS Title Fr:</b>	Fabrication de semi-conducteurs et d'autres composants électroniques		

#### **NAICS Description En:**

This Canadian industry comprises establishments primarily engaged in manufacturing semiconductors and other electronic components. The following activities involving printed circuit boards are undertaken in this industry: the production of the laminate material; the manufacture of the bare (rigid or flexible) printed circuit boards without mounted electronic components; and the loading of electronic components onto the boards.

#### **NAICS Description Fr:**

Cette classe canadienne comprend les établissements dont l'activité principale est la fabrication de semi-conducteurs et d'autres composants électroniques. Cette classe couvre les activités suivantes touchant les plaquettes de circuits imprimés : la production de matière stratifiée; la fabrication de plaquettes nues de circuits imprimés (rigides ou flexibles) sans composants électroniques; le chargement des composants électroniques sur les plaquettes.

<b>NAICS Code:</b>	334410	<b>Start Date:</b>	2002

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

**Government Publication Date: Up to Nov 2024**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-May 2025**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Apr 30, 2025**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2023**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Apr 30, 2025**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Sep 2025**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Aug 2025**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Sep 30, 2025**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Jul 2025****Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Oct 2023****Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011 - Sept 31, 2025****Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Sep 30, 2025****Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011 - Sept 31, 2025****Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Aug 31, 2025****Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date:** Apr 30, 2022

**Environmental Offenders Registry:**

Federal

EOR

The Environmental Offenders Registry, enforced by Environment and Climate Change Canada and Parks Canada, tracks corporations convicted under specific federal environmental laws. The registry includes corporate convictions resulting from court proceedings. Court prosecutions are one of several enforcement measures used when violations or potential violations are detected. Other measures like tickets, warning letters, or compliance orders may also be employed to restore compliance. Although not affected by the Environmental Enforcement Act, convictions obtained by Environment and Climate Change Canada under the Species at Risk Act and the Pollution Prevention Provisions of the Fisheries Act are also included.

**Government Publication Date:** Mar 31, 2025

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2024

**Excess Soil Registry:**

Provincial

ESNR

The Excess Soil Registry is made available by the Resource Productivity and Recovery Authority (RPRA). Excess soil is soil dug up mainly during construction and excavation activities that must be removed from the development site because it cannot or will not be reused. The Minister of the Environment, Conservation and Parks directed the RPRA to establish and maintain the Excess Soil Registry, enabling regulated parties to comply with registration and filing notice requirements, the ministry to access data, and the public to view information from those filings. From January 1, 2023, construction and development project leaders, as well as operators and owners of soil Reuse Sites, and Residential Development Soil Depot sites, must file notices detailing how excess soil is reused and disposed of in compliance with Ontario's Excess Soil Regulation.

**Government Publication Date:** Aug 31, 2025

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 2023

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Sep 2025

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: Oct 31, 2021**

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Mar 31, 2025**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Feb 2025**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Historical Business Activity Risk:**

Federal

HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this list does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including BC Directories, Hendersons, Mights, Sun Directories, Vernons, and Wrights; spanning roughly 1920s through 1960 depending on information available by city.

This list is currently limited to sites as reported in the following provinces: Alberta, British Columbia, Saskatchewan.

**Government Publication Date: 1920s - 1960**

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1950-Aug 2003\*

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 2023

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date:** Mar 31, 2022

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date:** 1998-2009\*

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date:** 1846-Feb 2025

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date:** 1974-1994\*

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

**Government Publication Date:** Dec 31, 2023

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date:** Up to May 2001\*

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Nov 2023**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Aug 31, 2025**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

**Government Publication Date: Feb 2024**

**National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2025**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

**Government Publication Date: 1800-May 2025**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Sep 30, 2025**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011 - Sept 31, 2025**

**Ontario PFAS Spills:**

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024**

**NPRI Reporters - PFAS Substances:**

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

**Government Publication Date: Feb 2024**

**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

**Government Publication Date: Feb 2024**

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

**Government Publication Date:** Jun 30, 2024

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - Sep 30, 2025

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2021

**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

**Government Publication Date:** 1997-Sept 2001, Oct 2004 - 31 Oct, 2025

**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Apr 30, 2025

**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Aug 2024; Oct 2024-Jul 2025

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2023**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2024**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011 - Sept 31, 2025**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database consists of information submitted by well contractors detailing locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table. The database is provided by the Ontario Ministry of Environment, Conservation and Parks.

**Government Publication Date: Jul 31, 2025**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## **APPENDIX F**

### City Directory Records

---

# CITY DIRECTORY

**Project Property:** *Phase One ESA - 2505 and 2707 Solandt Road, Ottawa, Ontario  
2505 Solandt Rd  
Kanata, ON K2K 3G5*

**Project No:** *104638.001*

**Requested By:** *GEMTEC Consulting Engineers and Scientists Limited (Ontario)*

**Order No:** *25112000497*

**Date Completed:** *December 05, 2025*

December 05, 2025  
RE: CITY DIRECTORY RESEARCH  
2505 Solandt Rd  
Kanata, ON K2K 3G5

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

450-550 of Legget Dr  
ALL of Solandt Rd  
300-400 of Terry Fox Dr

**Search Notes:**

Kanata, Ottawa is last listed in 1991.

## Search Results Summary

**Data from 2012 to 2017 does not include residential information**

**RE: TSSA Search - Solandt**

---

From Public Information Services <publicinformationsservices@tssa.org>

Date Thu 12/18/2025 1:49 PM

To Jeffrey Gauthier <jeffrey.gauthier@gemtec.ca>

Hello ,

**NO RECORDS FOUND IN CURRENT DATABASE:**

- We confirm that there are NO **fuels records** in our database at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the [TSSA Client Portal](#) to complete an Application for Release of Public Information.

Please refer to [Training \(tssa.org\)](#) for instructions on how to use the portal. Please refer to [How to Submit a Public Information Request \(tssa.org\)](#) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org).

Kind regards,

**Slavka Zahrebelny | Public Information & Records Agent**

### FOI Records

December 2, 2025

Jeffrey Gauthier  
GEMTEC  
32 Steacie Drive  
Kanata(Ottawa), Ontario K2K 2T5  
jeffrey.gauthier@gemtec.ca

Dear Jeffrey Gauthier:

**RE: MECP FOI A-2025-08216, Your Reference 104638.001 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

2505 Solandt Road(Lot 8, Concession 4), Ottawa

2707 Solandt Road(Lot 8, Concession 4), Ottawa

Timeframe: January 1, 1985 to November 28, 2025

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned. This file is now closed.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Maham Imtiaz at [maham.imtiaz@ontario.ca](mailto:maham.imtiaz@ontario.ca).

Yours truly,  
Maham Imtiaz

for  
Josephine DeSouza

☒ No

### Required Fees

Please don't hesitate to visit the [Historic Land Use Inventory website](#) more information. Fees must be paid in full at the time of application submission.

Planning Fee

\$196.00

### Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Development and Building Services Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

**Disclaimer**  
**For use with HLUI Database**

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Jeffrey Gauthier ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.
