**Subject:** Site lighting plan - Certification letter  
2 Via Modugno Place, Ottawa, Ontario

Dear Sir or Madam,

'2 Via Modugno Place' site lighting has been designed based on Canada Occupational Health and Safety Regulations SOR/86-304, OESC 27th Edition and local municipal regulations.

Modern sharp cut-off fixtures used for Photometric light modeling will provide sufficient light intensity on designated areas and minimal light spillage on adjoining properties (maximum 0.5 fc).

Trusting the above is to your satisfaction, we remain.

Yours truly,

Boris Altman, P.Eng.  
President
