## Executive Summary

EXP Services Inc. (EXP) was retained by Bryton Capital Corporation to complete a Phase I Environmental Site Assessment (ESA) of the vacant lot located at 16 and 20 Cedarow Court in Ottawa, Ontario, hereinafter referred to as the 'site'. This Phase I ESA serves an update to the Phase I ESAs completed by EXP (formerly Trow Associates Inc.) in 2003 and 2009, and 2014.

The purpose of this Phase I ESA was to determine if past or present site activities have resulted in actual or potential contamination at the site. This Phase I ESA will be used for due diligence. EXP understands this report will not be used to support a City of Ottawa permit application or to submit a Record of Site Condition due to a change in land use.

The work was completed in accordance with the general requirements of CSA Standard Z768-01, November 2001 (as amended), which outlines the protocol for Phase I Environmental Site Assessments. As per Z768-01, the scope of work included a review of historical land use and occupancy records, a visual reconnaissance of the subject site and surrounding properties; and interviews with person(s) having knowledge of past and present site activities.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase I ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

A written response from some of the regulatory agencies typically requires several months to receive. If upon receipt of the response from the regulatory agencies, significant environmental issues are identified, EXP will forward their response to the client as an addendum to this report.

The site is located on the north side of Hazeldean Road and east of Cedarow Court at 16 and 20 Cedarow Court in Ottawa. The PINs for the 2 parcels are 044660067 and 044661799. The first PIN 04466-1799 is legally described as PART OF LOT 27 CONCESSION 12 BEING PART 8 ON PLAN 4R6689 AND PARTS 5 AND 7 ON PLAN 4R30409 SAVE AND EXCEPT PARTS 3 AND 4 ON PLAN 4R25114 AND PART 2 ON PLAN 4R25671 AND SAVE AND EXCEPT PARTS 9 AND 10 ON PLAN 4R30409; TOGETHER WITH AN EASEMENT OVER PART 27 CONCESSION 2 DESIGNATED AS PART 1 4R25671 AS IN OC1328319; SUBJECT TO AN EASEMENT OVER PART 1 ON PLAN 4R25671 IN FAVOUR OF PART OF LOTS 26 AND 27 CONCESSION 12 DESIGNATED AS PARTS 3, 4 AND 5 ON PLAN 4R6689 AS IN OC1328319; SUBJECT TO AN EASEMENT IN GROSS OVER PART 3 ON PLAN 4R25671 AS IN OC1758432; SUBJECT TO AN EASEMENT OVER PARTS 5 AND 7 ON PLAN 4R30409 AS IN OC1891940; SUBJECT TO AN EASEMENT OVER PARTS 5 AND 7 ON PLAN 4R30409 AS IN NS234946; CITY OF OTTAWA; SUBJECT TO AN EASEMENT OVER PARTS 5 AND 7 ON PLAN 4R30409 AS IN NS46082; CITY OF OTTAWA.

The second PIN 04466-0067 is legally described as PCL27-2, SEC GB-12; PT SW ½ LT 27, CON 12, PT 10, 4R6689; GOULBOURN; SUBJECT TO AN EASEMENT IN GROSS OVER PART 5 ON PLAN 4R25671 AS IN OC1759432. The site is zoned AM9 [474] (arterial mainstream).

The site has an area of 3.04 hectares, is currently vacant and is covered with low vegetation and some trees to the north. The property has a gentle slope to the northwest towards Poole Creek, a tributary of the Jock River, to the north. However, a steep downward incline is present when nearing Poole Creek. Access to the site is provided by Cedarow Court, which extends into the property at the western property limits. The site does not have any services such as municipal water and wastewater services. Electricity, cable, and natural gas are also not provided to the site. There are no buildings on the site.

The subject property is located within a mixed agricultural, residential and commercial part of the Stittsville area of Ottawa. The property is bounded: by Poole Creek to the northwest; vacant undeveloped lands to the east; Hazeldean Road followed by sparse residential lands to the south, and service commercial properties to the west. The local groundwater flow direction is anticipated to be northwest towards Poole Creek, 10 to 20 m north of the site.

Based on the results of the Phase I ESA completed at 16 and 20 Cedarow Court in Ottawa, EXP has not identified any areas of potential environmental concern. No additional work in the form of a Phase II ESA is recommended at this time.

*This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.*

# 1. Introduction

EXP Services Inc. (EXP) was retained by Bryton Capital Corporation to complete a Phase I Environmental Site Assessment (ESA) of the vacant lot located at 16 and 20 Cedarow Court in Ottawa, Ontario, hereinafter referred to as the 'site'. This Phase I ESA serves an update to the Phase I ESA completed by EXP (formerly Trow Associates Inc.) in 2003, 2009, and 2014.

At the time of the investigation, the site was owned by the Canadian Mortgage and Housing Corporation and is managed by Bryton Capital Corporation. The owner contact information is provided below:

Company Address: 65 Queen Street West Suite 210  
Toronto, Ontario M5H 2M5

## 1.1 Objective

This Phase I ESA will be used for due diligence purposes. EXP understands this report will not be used to support a City of Ottawa permit application or to submit a Record of Site Condition (RSC) due to a change in land use.

A Phase I ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. The Phase I ESA was completed in general accordance to CSA Standard Z768-01, November 2001 (as amended). Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 8 of this report.

## 1.2 Site Description

The site is located on the north side of Hazeldean Road, and east of Cedarow Court at 16 and 20 Cedarow Court in the Stittsville area of Ottawa, as shown on Figure 1 in Appendix B. The site is located on the north side of Hazeldean Road and east of Cedarow Court at 16 and 20 Cedarow Court in Ottawa. The PINs for the 2 parcels are 044660067 and 044661799. The first PIN 04466-1799 is legally described as PART OF LOT 27 CONCESSION 12 BEING PART 8 ON PLAN 4R6689 AND PARTS 5 AND 7 ON PLAN 4R30409 SAVE AND EXCEPT PARTS 3 AND 4 ON PLAN 4R25114 AND PART 2 ON PLAN 4R25671 AND SAVE AND EXCEPT PARTS 9 AND 10 ON PLAN 4R30409; TOGETHER WITH AN EASEMENT OVER PART 27 CONCESSION 2 DESIGNATED AS PART 1 4R25671 AS IN OC1328319; SUBJECT TO AN EASEMENT OVER PART 1 ON PLAN 4R25671 IN FAVOUR OF PART OF LOTS 26 AND 27 CONCESSION 12 DESIGNATED AS PARTS 3, 4 AND 5 ON PLAN 4R6689 AS IN OC1328319; SUBJECT TO AN EASEMENT IN GROSS OVER PART 3 ON PLAN 4R25671 AS IN OC1758432; SUBJECT TO AN EASEMENT OVER PARTS 5 AND 7 ON PLAN 4R30409 AS IN OC1891940; SUBJECT TO AN EASEMENT OVER PARTS 5 AND 7 ON PLAN 4R30409 AS IN NS234946; CITY OF OTTAWA; SUBJECT TO AN EASEMENT OVER PARTS 5 AND 7 ON PLAN 4R30409 AS IN NS46082; CITY OF OTTAWA.

The second PIN 04466-0067 is legally described as PCL27-2, SEC GB-12; PT SW ½ LT 27, CON 12, PT 10, 4R6689; GOULBOURN; SUBJECT TO AN EASEMENT IN GROSS OVER PART 5 ON PLAN 4R25671 AS IN OC1759432. The site is zoned AM9 [474] (arterial mainstream).

The site has an area of 3.04 hectares, is currently vacant, and is covered with low vegetation and some trees to the north. The property has a gentle slope towards Poole Creek, to the northwest. However, a steep downward incline is present when nearing Poole Creek. Access to the site is provided by Cedarow Court, which extends into the property at the western property limit. The site does not have any services such as municipal water and wastewater services. Electricity, cable, and natural gas are also not provided to the site. There are no buildings on the site.

The subject property is located within a mixed agricultural, residential and commercial portion of Stittsville. The property is bounded: by Poole Creek to the northwest; agricultural lands to the east; Hazeldean Road followed by sparse residential lands to the south and service commercial properties to the west. The local groundwater flow direction is anticipated to be northwest towards Poole Creek, 10 to 20 m north of the site. A site plan is provided in Figure 2 of Appendix B.

## 2. Scope of Investigation

The scope of work the Phase I ESA consisted of the following activities:

- Reviewing the historical occupancy of the subject site through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the subject site and surrounding properties within a 250 metre radius of the site;
- Reviewing available geological maps, well records and utility maps for the vicinity of the subject site;
- Conducting a site reconnaissance of the subject site and building facilities in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated site representative(s) as a resource for current and historical site information, as well as to provide EXP staff with unrestricted access to all areas of the subject site and site buildings;
- Reviewing the current use of the subject site and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the subject site; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses or monitoring of materials. In addition, general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property; however, a detailed review of regulatory compliance issues was beyond the scope of our investigation.

EXP personnel who conducted assessment work for this project included Mark McCalla, P. Geo. and Robert Renaud, M.Sc., P. Geo. An outline of their qualifications is provided in Appendix A.

## 3. Records Review

### 3.1 Phase I ESA Study Area Determination

EXP conducted a records review of available information in accordance with CSA Standard Z768-01 to establish the land use history of the subject site and the adjacent properties.

The Phase I ESA study area consisted of the neighbourhood extending a distance of 250 metres from the subject site. At the time of the site reconnaissance, land usage within 250 metres of the subject site was mixed agricultural, residential and commercial. Figure 2 in Appendix B highlights near-by properties within the study area.

### 3.2 First Developed Use Determination

Based on a review of historical aerial photographs, historical maps, and other records review, it appears the subject site has always been vacant.

### 3.3 Title Search

A title search was not conducted as part of this assessment.

### 3.4 Fire Insurance Plans

The *Catalogue of Canadian Fire Insurance Plans 1875 – 1975* (Catalogue) was used to determine if fire insurance plans (FIPs) for the subject site exist. No FIP were historically produced for the immediate area.

### 3.5 Site Operating Records

No site operating records were provided to EXP for review.

### 3.6 Environmental Reports

The following environmental reports were reviewed:

- *Phase I Environmental Site Assessment, Hazeldean Land, Goulbourn Township, Ottawa, Ontario;* Trow Associates Incorporated, August 2003;
- *Phase I Environmental Site Assessment – Hazeledean Lands, Ottawa, Ontario.* Trow Associates Incorporated, April 2009; and,
- *Phase I Environmental Site Assessment, 16 and 20 Cedarow Court, Ottawa, Ontario;* EXP Services Inc., January 12, 2014.

At the time of these investigations the site was vacant and undeveloped. An automotive garage was observed on the neighbouring site to the west and an automotive sales business was observed 50 m to the southwest. Due to the inferred northwesterly groundwater flow direction and the fact that there were no below ground structures such as underground storage tanks or in-ground hydraulic hoists observed at the automotive garage, no areas of potential environmental concern (APECs) were identified.

In 2015, EXP completed a Phase One and Two ESA for a former service garage and gasoline station located at 5835 Hazeldean Road, approximately 170 m west of the subject site. No soil or groundwater impacts were identified during the assessment.

### 3.7 Regulatory Information Environmental Source Information

The appropriate regulatory agencies at the provincial and municipal levels were contacted to obtain information regarding environmental permits, past or pending environmental control orders or complaints, outstanding environmental regulatory non-compliance issues and Sewer Use By-Law infractions. EXP did not identify the need to contact any federal agencies.

The following agencies were contacted:

- The Ontario Ministry of the Environment and Climate Change (MOECC) Freedom of Information, Protection of Privacy Office;
- The Technical Standards and Safety Authority (TSSA), Fuel Safety Branch, and;
- The City of Ottawa.

A written response from some of the regulatory agencies typically requires several weeks to months. Copies of the requests are included in Appendix D. If upon receipt of the response from these regulatory agencies, significant environmental issues are identified, EXP will forward their response to the client as an addendum to this report.

#### 3.7.1 Ontario Ministry of the Environment and Climate Change Records

Records pertaining to the site were requested from the MOECC through the *Freedom of Information and Protection of Privacy Act* (FOI). A response dated December 29, 2014 indicates that no records were located for this property. A copy of the response is included in Appendix D of this report.

On May 10, 2018, the MOECC Environmental Bill of Rights (EBR) registry website was searched by EXP for postings in the vicinity of the subject site using a 250 m radius. Only one listing was found. Bryton Capital Corporation withdrew their application for a permit to transplant eight Butternut trees (*Juglans cinerea*) for the purpose of constructing a commercial development at the site. The regulation requires the proponent to submit a Butternut health assessor's report and a planting plan which requires between two and 20 seedlings to be planted for every tree removed or harmed (based on the size of tree). Additionally, it requires monitoring, tending and reporting to MNR on the growing progress of the newly planted Butternut. No APECs were identified.

On May 11, 2018, the MOECC Brownfields Registry website was searched by EXP for postings of Records of Site Condition. No postings were listed for the subject site. A RSC was posted for the property on the north side of Poole Creek.

The following on-line sources of information were reviewed searched by Environmental Risk Information Service Limited (ERIS):

- On May 23, 2018, the MOECC Hazardous Waste Information Network (HWIN) database was searched by ERIS for registered waste generators in the vicinity of the subject site. These results are presented in the EcoLog Report and further discussed in Section 3.9.

#### 3.7.2 Municipal Records

##### 3.7.3.1 City Hall Records

A request was made to the City of Ottawa for the Hazardous Land Use Inventory (HLUI). The following entries were identified:

- Carruthers Garage, 5 Cedarow Court (adjacent to southwest) - an automotive service garage listed as in operation in 2005.

- Renwick Auto Sales, 3 Cedarow Court (adjacent to west) - an automotive service garage listed as in operation from 1997 to 2005. Was also listed as Krown Rust Proofing (2001 and 205) and Auto Searchers Ltd.
- Infineon Technologies, 10 Cedarow Court (70 m to west) – electrical and electronic machinery in operation 2001.

Due to the inferred northwesterly groundwater flow direction and the fact that there were no below ground structures such as underground storage tanks or in-ground hydraulic hoists observed at the automotive garages, no APECs were identified. A copy of the response is provided in Appendix D.

### 3.7.3.2 City Directory Search

EXP reviewed city directories at the national archives library in order to identify the occupancy history of the subject site and neighbouring properties for potential environmental concerns. No listings were available for the site because it is a vacant lot.

**Table 3.2: City Directory Search**

Address	Direction/Distance From Subject Site	Years	Name
20 Cedarow Court	Site	1993 - 2011	Not listed
3 Cedarow Court	Adjacent west	1993 1999/2000 2005/2006 2011	Street not listed Auto Searchers Krown Rust Control Hinton Automotive/Krown Rust Control
5 Cedarow Court	Adjacent West	1999 - 2006	Car Wash
10 Cedaow Court	70 m west	1999 2005 - 2011	Restaurant/Hospitality Training Winds of Change

The adjacent properties are considered cross-gradient to the site in terms of groundwater flow and therefore do not represent an APEC to the subject site.

## 3.8 Land Use Documents

A review of the following publications was carried out as part of this Phase I ESA:

1. Waste Disposal Site Inventory (MOE, June 1991);
2. Old Landfill Management Strategy Phase 1 – Identification of Sites, City of Ottawa, Ontario (Golder Associates, October 2004);
3. Inventory of Coal Gasification Plant Waste Sites in Ontario (Intera, April 1987);
4. Mapping and Assessment of Former Industrial Sites – City of Ottawa (Intera, July 1988); and,
5. Ontario Ministry of the Environment; 1993; *Ontario Inventory of PCB Storage Sites*.

### ***Waste Disposal Site Inventory - Ontario MOE (1991) – Active and Closed Landfills***

There were no waste disposal sites identified in this document within 250 m of the subject site.

### **Old Landfill Management Strategy Phase 1 – Identification of Sites - Golder (2004)**

There were no landfills identified in this document within 250 m of the subject site.

### **Inventory of Coal Gasification Plant Waste Sites in Ontario - Ontario MOE (1987)**

There were no coal gasification plants identified in this document within 250 m of the subject site.

### **Mapping and Assess Former Industrial Sites – Intera (1988)**

No former industrial sites were identified within 250 m of the subject site.

### **Ontario Inventory of PCB Storage Sites - Ontario MOE (1993)**

No records pertaining to PCB storage sites were identified within 250 m of the subject site in this document.

## **3.9 EcoLog ERIS Database Search**

A search of provincial and federal databases for records pertaining to the subject site and properties within 250 metres of the subject site was conducted by EcoLog Environmental Risk Information Services (or EcoLog ERIS). EcoLog ERIS is an environmental database and information service provider. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A summary of the more significant findings is provided below. A copy of the EcoLog ERIS report is provided in Appendix C.

**Table 3.2: EcoLog Summary**

<b>Address</b>	<b>Direction/Distance From Subject Site</b>	<b>Site Name</b>	<b>Years Listed</b>	<b>Entries</b>
20 Cedarow Court	Site	Bryton Capital Corporation	2011	EBR – Permit for activities with conditions to achieve overall benefit to the species
3 Cedarow Court	Adjacent west	Auto Searchers Ltd. (Garage)	1995 - Present	GEN – Waste Oil CA – Waste Oil Furnace
5 Cedarow Court	Adjacent west	George Carruthers (Car Wash)	CA approval in 2003, 2016	ECA/CA - Industrial Sewage Works
8 Cedarow Court	60 m west	Deb's Valley Foods Inc.	1990, 2005	SCT CA - Industrial Sewage Works
5731 Hazeldean Road	Adjacent east	Wellings of Stittsville Inc.	2017	EASR – Water Taking during construction

EBR – Environmental Bill of Rights  
GEN – HWIN Registered Waste Generator

SCT – Scott's Manufacturing Directory  
CA – Certificate of Approval

All of the above noted entries are considered cross gradient and/or at large intervening distances from the site. Based on the information reviewed, no APECs were identified.

### 3.10 Physical Setting Review

#### 3.10.1 Aerial Photographs

Aerial photographs from 1968, 1976, 1984, 1992, 1999, 2007 and 2014 were examined in an effort to review the historical land use at the site and adjacent properties.

- In the 1964 and 1976 aerial photographs, the subject property appears to be of an agricultural nature along with other properties in the area. No buildings were observed on the subject site.
- In the 1984 aerial photograph, the parking area for a number of off-site buildings extended into the northwestern portion of the subject property. At the time, the subject property appears to have been of an agricultural nature and it is suspected that the above-noted buildings were for agricultural purposes. The former off-site buildings were not identified in the 1984 aerial photograph.
- Based on 1992 and 1999 aerial photographs, the neighbouring garage and car wash facilities to the west of the property (on Cedarow Court) are present.
- Based on the 2007 to 2014 aerial photographs, several properties occupy Cedarow Court and appear to be small commercial buildings. No evidence of industrial facilities and/or retail fuel outlets were identified.
- In the 2017 aerial photograph, there is a large vehicle parking area located just west of Poole Creek. No other changes are noted for the site or surrounding area.

Based on the review of the aerial photographs, no APECs were noted.

#### 3.10.2 Geology, Hydrogeology and Topography

The following information sources were reviewed to determine the nature of the subsurface materials at the site:

1. *Bedrock Geology of Southern Ontario* – Ontario Geological Survey. Scale 1:50,000. Electronic resource Issued 2003.
2. *Surficial Geology of Southern Ontario* – Ontario Geological Survey. Scale 1:50,000. Electronic resource Issued 2003.
3. Ontario Geotechnical Boreholes – Electronic Resource.
4. MOECC Water Well Records – Electronic Resource.
5. Department of Natural Resources, Topographic Mapping. Electronic Resource.

Based on local mapping, beneath any fill, the surficial geology of the site is characterised by clay and silt. The bedrock geology underlying the subject site consists of limestone of the Bobcaygeon Formation. Local MOECC well records and geotechnical boreholes indicate local geology is sand and silt over limestone bedrock. The depth to bedrock is approximately 2 m below grade.

The site topography has a gentle slope downwards towards Poole Creek. The local groundwater flow direction is anticipated to be north towards Poole Creek, 10-20 m north of the site.

#### 3.10.3 Water Bodies and Areas of Natural Scientific Importance

There are no water bodies on the subject site. The closest body of water is Poole Creek located 10-20 m north of the site. The site is not located near an ANSI.

### 3.11 Summary of Records Review

Based on a review of the available records, no APECs have been identified.

## 4. Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable about both the current and historical site uses. The interviews were conducted in order to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the subject site.

During the completion of this Phase I ESA, Ms. Lorna Pineda of Bryton Capital Corporation was interviewed via email. She indicated that:

- The site has always been vacant and undeveloped.
- There are and never have been any tanks or chemical storage at the site.
- There are no known environmental issues with the site.

## **5. Site Reconnaissance**

### **5.1 General Requirements**

On May 10, 2018, Mark McCalla, P.Geo., of EXP conducted the site visit in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the subject site.

The general environmental management and housekeeping practices at the subject site were reviewed as part of this assessment insofar as they could impact the environmental condition of the property; however, a detailed review of regulatory compliance issues was beyond the scope of EXP's investigation.

Exterior observations of the subject property and surrounding properties were conducted. The exterior observations were recorded by walking over the grounds of the subject site. Adjoining properties were observed from within the grounds of the subject site.

Photographs were taken from the exterior and interior of the building. Photographs are included in Appendix E. Mr. McCalla was unaccompanied during the site visit.

### **5.2 Visual Site Assessment**

#### **5.2.1 Site Description and Buildings**

The site has an area of 3.04 hectares, is currently vacant, and is covered with low vegetation and some trees to the north. The property displays a gentle slope towards Poole Creek, to the northwest. However, a steep downward incline is present when nearing Poole Creek. Access to the site is provided by Cedarow Court, which extends into the property at the western property limits of the site. There are no buildings on the site.

#### **5.2.2 Site Use**

The site was vacant and undeveloped during the site visit.

#### **5.2.3 Heating and Cooling Systems**

The site was not serviced with heating or cooling services.

#### **5.2.4 Site Utilities and Services**

The site was not serviced with any utilities.

#### **5.2.5 Storage Tanks**

##### **5.2.5.1 Underground Storage Tanks**

The site representative indicated they had no knowledge of underground storage tanks (USTs) at the site. EXP did not observe any evidence of USTs during the site reconnaissance. Furthermore, the historical review did not identify any former USTs at the site.

#### **5.2.5.2 Aboveground Storage Tanks**

The site representative indicated they had no knowledge of above ground storage tanks (ASTs) at the site. EXP did not observe any evidence of ASTs during the site reconnaissance. Furthermore, the historical review did not identify any former ASTs at the site.

#### **5.2.6 Drains, Pits and Sumps**

No drains, sumps, or pits were observed at the site during the site inspection.

#### **5.2.7 Chemical Storage and Handling and Floor Condition**

No chemical storage was observed at the site.

#### **5.2.8 Areas of Stained Soil, Pavement or Stressed Vegetation**

No areas of stained soil were present during the site inspection.

#### **5.2.9 Fill, Debris and Methane**

The subject site is at approximately the same elevation as the surrounding properties and as such substantial quantities of fill are not anticipated to be present at the subject site. Methane or radon gas-producing materials were not observed on the subject site.

#### **5.2.10 Air Emissions**

Regulatory control of air emissions in Ontario is the responsibility of the MOE. According to the Environmental Protection Act (EPA), an Environmental Compliance Approval (ECA) (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29th, 1988. Retroactive approval should be sought for equipment installed and unchanged between 1972 and June 29th, 1988 when the requirement for a ECA was added to the EPA. Unless explicitly exempted, most industrial processes or modifications to industrial processes and equipment require a ECA. The EPA provides a list of specific equipment and conditions, which are exempt from ECA (Air) requirements (i.e. fuel burning equipment for comfort heating in a building using natural gas or number 2 fuel oil at a rate of less than 1.5 million British Thermal Units per hour [BTU/hour]).

No air emissions concerns were identified at the time of the site visit.

#### **5.2.11 Odours**

No strong odours were detected during the site visit.

#### **5.2.12 Noise**

No excessive noise was detected at the subject site during the site visit.

#### **5.2.13 Special Attention Items, Hazardous Building Materials and Designated Substances**

Special attention substances such as asbestos, PCBs, lead paint, and urea formaldehyde foam insulation were commonly used in older buildings. Given that the site is vacant (i.e. there are no buildings on the subject property), special attention substances are not present on the site.

#### **5.2.13.6 Radon**

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerels per cubic metre (Bq/m<sup>3</sup>). Where radon gas is present and the annual radon concentration exceeds 200 Bq/m<sup>3</sup> in the normal occupancy area, Health Canada recommends taking the necessary actions to reduce radon levels.

Given the absence of any structure on the site and the geological formation underlying the site, EXP concludes that radon is highly unlikely to pose a direct health concern.

#### **5.2.13.7 Mould**

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow it requires a food source (i.e. gypsum wallboard, carpets, wallpaper, wood, etc.) and moist conditions. Mould can have an impact on human health depending on the species and concentration of the mould. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled "mould guidelines for the Canadian construction industry" and the Environmental Abatement Council of Ontario (EACO) guidelines titled "EACO Mould Abatement Guidelines, Edition 2 (2010)".

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

No visible mould was observed by EXP in the site building during the site visit.

#### **5.2.14 Processing and Manufacturing Operations**

No processing or manufacturing operations take place at the subject site.

#### **5.2.15 Hazardous Materials Use and Storage**

No hazardous materials were observed at the site.

#### **5.2.16 Vehicle and Equipment Maintenance Areas**

No vehicle and equipment maintenance areas were observed at the site.

#### **5.2.17 Oil/Water Separators**

No oil/water separators were observed on the site.

#### **5.2.18 Sewage and Wastewater Disposal**

The subject site was not serviced with sanitary services.

#### **5.2.19 Solid Waste Generation, Storage & Disposal**

Solid waste is not generated on the site. Some minor litter was observed across the site during previous assessments however this does not represent an APEC.

#### **5.2.20 Liquid Waste Generation, Storage & Disposal**

No significant liquid wastes are generated at the site.

#### **5.2.21 Hydraulic Lift Equipment**

Mechanical equipment such as piston type elevators, vehicle in-ground hoists, loading docks and compactors are typically hydraulically operated. As such, these types of equipment contain hydraulic oils which are operated under high pressures and can be released into the environment from leaks or equipment failures.

No stationary hydraulic lift equipment was observed at the subject site.

#### **5.2.22 Mechanical Equipment**

No mechanical equipment was observed at the site.

#### **5.2.23 Abandoned and Existing Wells**

No wells were observed at the site.

#### **5.2.24 Roads, Parking Facilities and Right of Ways**

The subject site has road access from Cedarow Court to the west. No rights-of-way have been registered on the property.

### **5.3 Adjacent and Surrounding Properties**

A visual inspection of the adjacent properties and properties within 250 m of the subject site was conducted from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the subject site. The results of the visual inspection are documented in Figure 2 Appendix B.

North: Vacant followed by residential

South: across Hazeldean Road, parkland followed by residential

East: Seniors residence under construction

West: Commercial (Self Serve Car Wash, Krown Rust Proofing, Automotive Garage (Auto Searchers Ltd.), Fitness Centre, Automotive Sales, Winds of Change Spa)

### **5.4 Summary of Site Reconnaissance**

Based on the site reconnaissance, no APECs have been identified for the site.

## 6. Findings and Recommendations

Based on the results of the Phase I ESA updated conducted at 16 and 20 Cedarow Court, EXP did not identify any APECs. No further work in the form of a Phase II ESA is recommended at this time.

## **8. Limitation of Liability, Scope of Report, and Third Party Reliance**

### **Basis of Report**

This report (“Report”) is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or Bryton Capital Corporation (“the Client”) has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and EXP’s recommendations. Any reduction in the level of services recommended will result in EXP providing qualified opinions regarding the adequacy of the work. EXP can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

### **Reliance on Information Provided**

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to EXP. If new information about the environmental conditions at the Site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

### **Standard of Care**

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

### **Complete Report**

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

## Use of Report

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

# **Appendix A: Qualifications of Assessors**

## Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

**Robert Renaud**, M.Sc., P.Geo. (ON/NU/NT), is a Hydrogeologist and Environmental Geoscientist with over sixteen years' experience in the environmental field. Mr. Renaud is a licensed Professional Geoscientist (P.Geo.) in Ontario, Nunavut and the Northwest Territories. His technical undertakings have included work in the following fields: Phase I, II, and III Environmental Assessments; contaminated site investigations; environmental site characterization; soil and groundwater sampling and data evaluation; data analysis; interpretation and technical report preparation; project coordination; hydrogeological assessments; construction dewatering projects; Class Environmental Assessments; proposal preparation and client liaison.

**Mark McCalla**, P.Geo., is a Senior Project Manager with the Environmental Science and Engineering Services division of EXP, with more than 29 years' experience (15 years with EXP) in environmental investigations, including borehole drilling, monitoring well installation and environmental soil and groundwater sampling, reporting and project management. Mr. McCalla has been involved with many hydrogeological assessments, where pumping tests and analytical testing of wells were carried out. His project experience includes: coordinating, conducting and managing environmental site assessments, remediation programs and landfill monitoring and management programs; technical report preparation and senior review; proposal preparation and client liaison. Mr. McCalla is a Qualified Person for completing Phase I and II Environmental Site Assessments as per Ont. Reg. 153/04.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2017**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Nov 2016**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jan 31, 2018**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2014**

### **Certificates of Approval:**

Provincial

[CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Commercial Fuel Oil Tanks:**

Provincial [CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

**Government Publication Date: Feb 28, 2017**

**Chemical Register:**

Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2018**

**Compressed Natural Gas Stations:**

Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 31, 2012**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Nov 2017**

**Certificates of Property Use:**

Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Feb 28, 2018**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886-Nov 30, 2017**

**Dry Cleaning Facilities:**

Federal [DRYCLEANERS](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2016**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Jan 31, 2018**

**Environmental Registry:**

Provincial **EBR**

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Feb 28, 2018**

**Environmental Compliance Approval:**

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Jan 31, 2018**

**Environmental Effects Monitoring:**

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Feb 28, 2018**

**Environmental Issues Inventory System:**

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**List of TSSA Expired Facilities:**

Provincial **EXP**

List of facilities with removed tanks which were once registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed automatically fall under the expired facilities inventory held by TSSA.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-Mar 2018**

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2017**

**Fuel Storage Tank:**

Provincial

FST

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-December 31, 2017**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2015**

**TSSA Historic Incidents:**

Provincial

HINC

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**TSSA Incidents:**

Provincial **INC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Dec 31, 2013**

**Canadian Mine Locations:**

Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Environmental Penalty Annual Report:**

Provincial **MISA PENALTY**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2017**

**Mineral Occurrences:**

Provincial **MNR**

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2018**

**National Analysis of Trends in Emergencies System (NATES):**

Federal **NATE**

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial **NCPL**

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2016**

**National Defense & Canadian Forces Fuel Tanks:**

Federal **NDFT**

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Aug 2010**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Dec 31, 2017**

**National Energy Board Wells:**

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-December 31, 2017**

**Ontario Oil and Gas Wells:**

Provincial

OGGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Oct 2017**

**Inventory of PCB Storage Sites:**

Provincial [OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial [ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Feb 28, 2018**

**Canadian Pulp and Paper:**

Private [PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009**

**Parks Canada Fuel Storage Tanks:**

Federal [PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial [PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: 1988-Mar 2018**

**TSSA Pipeline Incidents:**

Provincial [PINC](#)

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Feb 28, 2018**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

<b><u>Record of Site Condition:</u></b>	Provincial	<b>RSC</b>
The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).		
<b>Government Publication Date: 1997-Sept 2001, Oct 2004-Nov 2017</b>		
<b><u>Retail Fuel Storage Tanks:</u></b>	Private	<b>RST</b>
This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.		
<b>Government Publication Date: 1999-Jan 31, 2018</b>		
<b><u>Scott's Manufacturing Directory:</u></b>	Private	<b>SCT</b>
Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.		
<b>Government Publication Date: 1992-Mar 2011*</b>		
<b><u>Ontario Spills:</u></b>	Provincial	<b>SPL</b>
This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.		
<b>Government Publication Date: 1988-Feb 2018</b>		
<b><u>Wastewater Discharger Registration Database:</u></b>	Provincial	<b>SRDS</b>
Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).		
<b>Government Publication Date: 1990-Dec 31, 2016</b>		
<b><u>Anderson's Storage Tanks:</u></b>	Private	<b>TANK</b>
The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.		
<b>Government Publication Date: 1915-1953*</b>		
<b><u>Transport Canada Fuel Storage Tanks:</u></b>	Federal	<b>TCFT</b>
List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.		
<b>Government Publication Date: 1970-Aug 2017</b>		
<b><u>TSSA Variances for Abandonment of Underground Storage Tanks:</u></b>	Provincial	<b>VAR</b>
List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.		
<b>Government Publication Date: Feb 28, 2017</b>		
<b><u>Waste Disposal Sites - MOE CA Inventory:</u></b>	Provincial	<b>WDS</b>
The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.		
<b>Government Publication Date: Oct 2011-Jan 31, 2018</b>		

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Mar 31, 2017**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Kathy,

**Re: Information Request  
16 & 20 Cedarow Court, Ottawa, Ontario (“Subject Property”)**

**Internal Department Circulation**

The Planning and Growth Management Department has the following information in response to your request for information regarding the Subject Property:

- Within 5km of the subject property, there are two waste management facilities.

**Search of Historical Land Use Inventory**

**This acknowledges receipt of the signed Disclaimer regarding your request for information from the City’s Historical Land Use Inventory (HLUI 2005) database for the Subject Property.**

A search of the HLUI database revealed the following information:

- There are no activities associated with the Subject Property.

The HLUI database was also searched for activity associated with properties located within 50m of the Subject Property. The search revealed the following:

- There are 6 activities associated with properties located within 50m of the Subject Property: Activity Number 6950; 6950; 3152; 3193; 1500; 7979.

*Shaping our future together

Please note that Activity Numbers 3193 has a PIN Certainty of “2”. This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the Subject Property or on certain properties within 50m of the Subject Property. All database entries with a PIN Certainty of “2” require independent verification as to their precise location.

A site map has been included to show the location of the Subject Property as well as the location of all the activities noted above, including the HLUI database’s location of the Activity Numbers with a PIN Certainty of “2”.

Additional information may be obtained by contacting:

### **Ontario’s Environmental Registry**

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

### **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

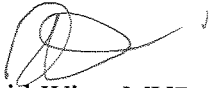

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment for additional information.**

If you have any further questions or comments, please contact Simon Lacoste at 613-580-2424 ext. 24856 or [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

David Wise, MUP, MCIP, RPP
