Attn: Curt Millar

Dear Mr. Millar:

Re: Transportation Noise & Vibration, Addendum
473 Albert Street, Ottawa
Gradient Wind File 19-215

Following the completion of a transportation noise & vibration assessment for the proposed redevelopment at 473 Albert Street in Ottawa, Ontario (report 19-215-Transportation Noise & Vibration Final, dated December 5, 2019), Gradient Wind Engineering Inc. (Gradient Wind) was provided final coordination drawings in September 2020. This addendum letter is to confirm that setback distances and exposure to transportation noise sources surrounding the study site remain unchanged for the current design. As such, the noise and vibration levels and therefore conclusions and recommendations of our original report remain unchanged.

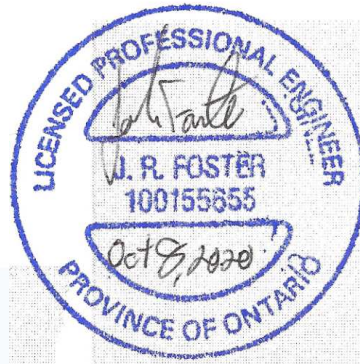

Please contact the undersigned with any questions.

Sincerely,

Gradient Wind Engineering Inc.

Michael Lafortune, C.E.T.
Environmental Scientist

Joshua Foster, P.Eng.
