## Executive Summary

Golder Associates Ltd. (Golder) was retained by the City of Ottawa (the “City”) to conduct a Phase One Environmental Site Assessment (Phase One ESA) for the proposed Central Library property located at 555 Albert Street, Ottawa, Ontario (the “Site” and the “Phase One Property”). Golder understands that this Phase One ESA was undertaken by the City of Ottawa to support the planning application for the new Central Library project. The City’s Planning Services Department has indicated that a Record of Site Condition is not required to support Site development.

The Site is an irregular shaped parcel of land bordered by Commissioner Street to the northeast, Albert Street to the southeast, the former Brickhill Road allowance to the southwest, the former Wellington Street road allowance to the northwest, and the west border of the Site is located adjacent to the Ottawa Light Rail Transit (“OLRT”) rail corridor. The Site covers an area of approximately 0.95 hectares that is currently vacant land, formerly used as a construction staging area by the Ottawa Light Rail Transit Constructors (“OLRT-C”), except for the northern portion of the Site that is occupied by a temporary pre-fabricated building for telecommunication infrastructure. The south and southwestern portions of the Site are currently being used as a parking area and soil stockpile storage area respectively, by the Combined Sewage Storage Tunnel (“CSST”) construction contractor. Based on the earliest available aerial images, FIPs, and city directories, the Site was primarily developed with residential buildings and some commercial activities including grocery stores and warehouses prior to 1878. The presence of a mixture of commercial, residential and industrial properties continued until the 1950s. Following 1960, buildings associated with commercial or industrial activities occupied the northern portion whereas the southern portion was vacant and used for parking.

The Phase One ESA was completed in general accordance with Ontario Regulation 153/04, as amended (O. Reg. 153/04), and included a review of available current and historical information, a site visit, an interview, evaluation of readily available information, and reporting, subject to the limitations outlined in this report. The Phase One Property is not considered an enhanced investigation property as defined by O.Reg. 153/04.

The information obtained as part of this Phase I ESA was evaluated to identify relevant environmental conditions with the potential for contamination to be present in environmental media or building materials. Environmental conditions that do not present a threat to human health or the environment and that generally would not be the subject of regulatory enforcement were not considered to represent an issue of potential environmental concern. Some land uses or activities in the surrounding area were not specifically identified as an issue of potential environmental concern based on their separation distance from the Site, the inferred hydrogeologic conditions and/or the absence of evidence of a contaminant release to the subsurface associated with the off-Site land use or activity.

Based on the information obtained as part of this Phase One ESA, thirty-three (33) Potentially Contaminating Activities (PCAs) were identified in the Phase One Study Area, eight of which were on the Phase One Property. Based on site characteristics and the locations of the PCAs, a total of thirteen (13) Areas of Potential Environmental Concern (APECs) were identified for the Phase One Property. A Phase Two ESA would be required to confirm the presence and extent of related impacts.

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

## 1.0 INTRODUCTION

### 1.1 Background and Objective

Golder Associates Ltd. (Golder) was retained by the City of Ottawa (the “City”) to conduct a Phase One Environmental Site Assessment (Phase One ESA) for the proposed Central Library property located at 555 Albert Street, Ottawa, Ontario (the “Site” and the “Phase One Property”). The location, surroundings, and layout of the Site are shown on Figure 1 – Key Plan. For the purpose of this report, Albert Street is considered as the north-south axis.

The Site is an irregular shaped parcel of land bordered by Commissioner Street to the northeast, Albert Street to the southeast, the former Brickhill Road allowance to the southwest, the former Wellington Street road allowance to the northwest, and the west border of the Site is located adjacent to the Ottawa Light Rail Transit (“OLRT”) rail corridor. The Site covers an area of approximately 0.95 hectares that is currently vacant land, formerly used as a construction staging area by the Ottawa Light Rail Transit Constructors (“OLRT-C”), except for the northern portion of the Site that is occupied by a temporary pre-fabricated building for telecommunication infrastructure. The south and southwestern portions of the Site are currently being used as a parking area and soil stockpile storage area respectively, by the Combined Sewage Storage Tunnel (“CSST”) construction contractor. Based on the earliest available aerial images, FIPs, and city directories, the Site was primarily developed with residential buildings and some commercial activities including grocery stores and warehouses prior to 1878. The presence of a mixture of commercial, residential and industrial properties continued until the 1950s. Following 1960, buildings associated with commercial or industrial activities occupied the northern portion whereas the southern portion was vacant and used for parking.

The property information for the Site is as follows:

<b>Municipal Address</b>	555 Albert Street, Ottawa
<b>Property Identification Number</b>	04112-0027, 04112-0029 and part of 04112-0154
<b>Legal Description</b>	All of Lots A & B, all of Lots 5, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17 & 18, Block L, Plan 2 & Part of Lot 6, Block L, Plan 2, City of Ottawa, subject to Easement No. OC1749431. PIN 04112-0027.

Authorization to proceed with this investigation was provided by the City under purchase order 46506549. The contact information for the Site is:

<b>Client</b>	<b>Address</b>	<b>Contact Information</b>
City of Ottawa	110 Laurier Avenue West 5 <sup>th</sup> Floor Ottawa, Ontario K1P 1J1	Erin Tait Phone: 613-580-2424 x12958 Email: Erin.Tait@Ottawa.ca

## 2.0 SCOPE OF WORK

A Phase One ESA is a preliminary qualitative assessment of the environmental condition of a property, based on a review of current activities and historical information for the Site and a review of relevant and readily available environmental information for the surrounding properties located within a 250 metre (m) radius of the boundary of the Site (collectively referred to as the “Phase One Study Area”). The boundary of the Phase One Study Area is presented in Figure 2.

According to Ontario Regulation (O.Reg.) 153/04 *Records of Site Condition*, as amended, the objectives of a Phase One ESA are to:

- 1) Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Site
- 2) Determine the need for a Phase Two Environment Site Assessment (ESA)
- 3) Provide a basis for carrying out a Phase Two ESA
- 4) Provide adequate preliminary information about environmental conditions in the land or water on, in or under the Site for the conduct of a risk assessment following completion of a Phase Two ESA
- 5) Identify and report on evidence of actual and/or potential contamination on the Site from current and historical activities at the Site or from adjacent properties

Golder understands that this Phase One ESA was undertaken by the City of Ottawa to support the planning application for the new Central Library project. The City’s Planning Services Department has indicated that a Record of Site Condition is not required to support Site development.

In preparing this Phase One ESA, Golder has applied professional judgement in considering readily available information and has relied in good faith on information provided by others. This level of effort is a method of risk reduction rather than risk elimination. This assessment included a cursory overview of the neighbouring land uses and does not constitute a complete assessment of neighbouring land uses. Further reductions in risk can be achieved through a program of intrusive testing at the Site, including sample collection and analysis.

## 3.0 RECORDS REVIEW

### 3.1 General

#### 3.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Site. Based on Golder’s review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the Site visit, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Site was sufficient to achieve the objectives of the Phase One ESA.

#### 3.1.2 First Developed Use Determination

The date of first developed use of the Phase One Property was determined based on review of the aerial photographs, fire insurance plans (FIPs), City of Ottawa HLUI (Historical Land Use Inventory) and information provided by the Site representative. The earliest available document, a fire insurance plan from 1878, indicates

that the Phase One Property was developed with various buildings, primarily used for residential purposes and some commercial activities.

Aerial photographs from subsequent years indicate that the buildings present on the southern portion of the Site were demolished sometime in the 1950s and 1960s followed by buildings on the northern portion of the Site, which were demolished in the 1980s. The Site was vacant and used as a parking lot through the 1990s and 2000s. The Site was most recently used as a construction yard for OLRT construction activities between 2014 and 2018.

### 3.1.3 Fire Insurance Records

Golder reviewed its internal fire insurance plans (FIPs) database for any records relating to the Site and Study Area. The following records were available:

Year/Record	Site	Surrounding Properties
1878 FIP	Site was primarily occupied by residential dwellings with a hotel, bake house, drug store on the northern portion of the Site. Northeast portion of the Site is marked as 'specially hazardous', likely associated with a commercial activity, but details are not provided on the FIP.	<ul style="list-style-type: none"> <li>- - Methodist church followed by a pump house, located north of the Site.</li> <li>- - Foundry with a machine shop and moulding shop located approximately 250 m northeast at 428 Wellington St</li> <li>- - Bounded by Wellington Street, Brickhill Street, and Albert Street along the west, south and east Site perimeter.</li> </ul>
1888 (revised 1901) FIP	No major changes to land uses compared to 1878 FIP, except that the hazardous sign is not visible on-Site.	<ul style="list-style-type: none"> <li>- Similar to 1878 FIP except for a paint shop located east of the Site (across Albert Street).</li> <li>- The "Canadian Atlantic Railway" runs roughly adjacent to the aqueduct, approximately 80m northwest of site.</li> <li>- House of Mercy Maternity Hospital shown at 42 Cambridge Street (180m south of site).</li> </ul>
1902 (revised 1912) FIP	Similar land use with some additional commercial/industrial buildings including Mica Dominion warehouse, office buildings, and a mattress factory.	<ul style="list-style-type: none"> <li>- Storage for builder supplies southwest and residential apartments west of the Site</li> <li>- "Chinese Laundry" located at 1 Division Street (220m west of the Site)</li> <li>- Railway line is now listed as "Grand Trunk Railway"</li> <li>- Continental Bag &amp; Paper Co Ltd located at 305 Bridge St (160m west of site)</li> <li>- A glass factory is located at 106 Queen Street West, 250m northwest of site.</li> <li>- "Chinese Laundry" located at 104 Queen Street West, 230m northwest of Site.</li> </ul>

Year/Record	Site	Surrounding Properties
1922 FIP	Northern portion of the Site included several commercial/industrial buildings such as City Iron and Bottles Co.; oxyacetylene welding, machine and brass works. A bottles and metal junk pile was located on the northeast portion of the Site.	<ul style="list-style-type: none"> <li>- Similar to 1912 FIP.</li> </ul>
1925 revised 1948 FIP	The Northern corner of the site is occupied by McCormicks Ltd Biscuit Warehouse, as well as several stores. Notable is a mattress factory and Machine Brass Works.	<ul style="list-style-type: none"> <li>- RCMP Garage northwest of site located at 42-46 Queen Street West (150m northwest of Site)</li> <li>- Gasoline service station to the west of site, with two USTs, at 610 Wellington St (90m southwest of Site)</li> <li>- Red Rock of Canada Ltd beverage concentrates located at 629 Wellington St (120m west of site) with two 2,500 gallon furnace oil tanks</li> <li>- Casting of Ottawa Ltd located at 422 – 426 Slater Street (210m east of Site), including metal castings and a furnace room</li> <li>- Garage and repairs located at 537 Laurier Avenue with a UST (215m southeast of Site)</li> </ul>
1956 FIP	No major changes to 1948 FIP except the western corner of Site is occupied by National Brake & Clutch Service.	<ul style="list-style-type: none"> <li>- Similar to 1948 FIP except:</li> <li>- The gasoline service station at 610 Wellington St (90m southwest of Site) now has three USTs instead of two, and a bus garage, including oiling and greasing services</li> <li>- Upholstering located 50m to the West of site</li> <li>- Blair Equipment Ltd located to the North of the Site, with one UST, which includes a boat warehouse and a garage.</li> <li>- There is a gasoline service station under construction on the lot at the corner of Booth Street and Albert Street (250m southwest of Site), with “oiling and greasing” services.</li> <li>- Two buildings belong to Rovale Motors. One is labelled “Garage and Repairs” and includes a gasoline UST, and one is labelled “Service Centre”. They are located on Fleet Street between Lloyd and Duke (185m west of Site)</li> <li>- O’Keefe’s Brewery is located at the corner of Wellington and Bronson (200m north of Site), and includes a UST.</li> </ul>

The FIPs showed several historic activities within the Phase One Study Area that are considered Potentially Contaminating Activities, as discussed further in Section 6.2.

### 3.1.4 Chain of Title

Chain of title information for the Phase One Property was obtained from Wentzell Titles. A copy of the chain of title information is provided in Appendix A.

The Site was initially a single piece of property with the following chain of title.

Owner	Dates of Ownership
Crown	Prior to Feb 25, 1809
Robert Randall	Feb 25, 1809 to Dec 20, 1820
John Lebreton	Ownership of lots varies based on dates of sale.

Following this, John Lebreton subdivided the property into 20 lots, shown on a figure attached to the Chain of Title in Appendix A. Lots 1 – 4 are not part of the current Phase One Site, but the Site includes Lots 5 through 18, and Lots A and B. Given the complexity of the chain of title, only transactions involving corporations are described in detail. Transactions between private individual owners are summarized for each lot, with further details provided in Appendix A.

#### Lot 5

Ownership	Dates of Ownership
Deed from John Lebreton to Robert Watchorn	September 17, 1845
Various private individual owners	September 17, 1845 to May 5, 1965
Deed to National Capital Commission (NCC)	May 5, 1965

#### Lot 6

Ownership	Dates of Ownership
Deed from John Lebreton to Robert Reid	August 26, 1845
Various private individual owners	August 26, 1845 to March 4, 1908
Independent Order of Foresters	March 4, 1908 to November 23, 1908
Various private individual owners, including:	November 23, 1908 to July 18, 1956
<ul style="list-style-type: none"> <li>■ Lease to McCormicks Limited from Morris Zagerman</li> <li>■ Lease to McCormicks Limited from Shirley Brodie</li> </ul>	<ul style="list-style-type: none"> <li>■ September 14, 1944</li> <li>■ January 26, 1951</li> </ul>
Deed to National Capital Commission (NCC)	July 18, 1965

#### Lot 7

Ownership	Dates of Ownership
Deed from John Lebreton to William Jamieson	December 9, 1846

Ownership	Dates of Ownership
Various private individual owners	December 9, 1846 to September 2, 1885 (East half of Lot 7) September 2, 1885 to October 30, 1946 (East half of Lot 7 and Lot 8) December 9, 1846 to December 8, 1953 (West half of Lot 7)
Vail's Limited (East half of Lot 7 and Lot 8)	October 30, 1946 to July 8, 1947
Harold G. Vail (East half of Lot 7 and Lot 8)	July 8, 1947 to December 8, 1953
Vail's Limited (all of Lot 7 and Lot 8)	December 8, 1953 to November 21, 1956
Basil F. McEnery	November 21, 1956 to February 4, 1957
Gestetner (Canada) Ltd.	February 4, 1957 to December 19, 1965
Deed to National Capital Commission (NCC)	December 19, 1965

### Lot 8

Ownership	Dates of Ownership
Deed from John Lebreton to William Jamieson	July 17, 1848
Various private individual owners	September 2, 1885 to October 30, 1946 (East half of Lot 7 and Lot 8)
Vail's Limited (East half of Lot 7 and Lot 8)	October 30, 1946 to July 8, 1947
Harold G. Vail (East half of Lot 7 and Lot 8)	July 8, 1947 to December 8, 1953
Vail's Limited (all of Lot 7 and Lot 8)	December 8, 1953 to November 21, 1956
Basil F. McEnery	November 21, 1956 to February 4, 1957
Gestetner (Canada) Ltd.	February 4, 1957 to December 19, 1965
Deed to National Capital Commission (NCC)	December 19, 1965

### Lot 9

Ownership	Dates of Ownership
Deed from John Lebreton to William Ashfield (Part of Lot 9)	December 4, 1846
Deed from John Lebreton to John Anderson (Part of Lot 9)	December 4, 1846
All parts of Lot 9 sold to James Brough	August 12, 1848
Various private individual owners	August 12, 1848 to April 3, 1956 (Part of Lot 9) August 12, 1848 to March 26, 1963 (Part of Lot 9)
Vail's Limited (Part of Lot 9, Lot 11, Lot 13, and Lot 14)	April 3, 1956 to September 11, 1958
Crown (Part of Lot 9, Lot 11, Lot 13, and Lot 14)	September 11, 1958 to March 28, 1963

Ownership	Dates of Ownership
Deed to National Capital Commission (NCC)	March 26, 1963 (Part of Lot 9, from private individual owner) March 28, 1963 (Part of Lot 9, Lot 11, Lot 13, and Lot 14, from Crown)

### Lot 10

Ownership	Dates of Ownership
Sheriff Sale to Henry Thomas	May 19, 1862
Various private individual owners	May 19, 1862 to March 20, 1967
Deed to National Capital Commission (NCC)	March 20, 1967

### Lot 11

Ownership	Dates of Ownership
Will from John Lebreton to Jane Eccles (Lot 11, Lot 13, Lot 15, and Lots A & B)	July 5, 1848
John Woodwill (Lot 11, Lot 13, Lot 15, and Lots A & B)	July 5, 1848 to October 22, 1853 (Lot 11, Lot 15) July 5, 1848 to March 25, 1854 (Lot 13, Lots A & B)
Various private individual owners (Lot 11 only)	October 22, 1853 to December 8, 1953
Vail's Limited (Lot 11, Lot 13, and Lot 14)	December 8, 1953 to April 3, 1956
Vail's Limited (Part of Lot 9, Lot 11, Lot 13, and Lot 14)	April 3, 1956 to September 11, 1958
Crown (Part of Lot 9, Lot 11, Lot 13, and Lot 14)	September 11, 1958 to March 28, 1963
Deed to National Capital Commission (NCC)	March 28, 1963

### Lot 12

Ownership	Dates of Ownership
Deed from John Lebreton to John Egan (Lot 12 and Lot 14)	March 29, 1851
Various private individual owners (Lot 12 only)	March 29, 1851 to May 7, 1964
Deed to National Capital Commission (NCC)	May 7, 1964

### Lot 13

Ownership	Dates of Ownership
Will from John Lebreton to Jane Eccles (Lot 11, Lot 13, Lot 15, and Lots A & B)	July 5, 1848
John Woodwill (Lot 11, Lot 13, Lot 15, and Lots A & B)	July 5, 1848 to October 22, 1853 (Lot 11, Lot 15) July 5, 1848 to March 25, 1854 (Lot 13, Lots A & B)
Various private individual owners (Lot 13 only)	March 25, 1854 to December 8, 1953
Vail's Limited (Lot 11, Lot 13, and Lot 14)	December 8, 1953 to April 3, 1956

Ownership	Dates of Ownership
Vail's Limited (Part of Lot 9, Lot 11, Lot 13, and Lot 14)	April 3, 1956 to September 11, 1958
Crown (Part of Lot 9, Lot 11, Lot 13, and Lot 14)	September 11, 1958 to March 28, 1963
Deed to National Capital Commission (NCC)	March 28, 1963

Whole of Lot 14 transferred to Vail's Limited on December 8, 1953 with Lot 11 and Lot 13.

### Lots A & B

Ownership	Dates of Ownership
Will from John Lebreton to Jane Eccles (Lot 11, Lot 13, Lot 15, and Lots A & B)	July 5, 1848
John Woodwill (Lot 11, Lot 13, Lot 15, and Lots A & B)	July 5, 1848 to October 22, 1853 (Lot 11, Lot 15) July 5, 1848 to March 25, 1854 (Lot 13, Lots A & B)
Various private individual owners (Lots A & B only)	March 25, 1854 to July 16, 1958
Moorvale Limited	July 16, 1958 to March 9, 1964
Deed to National Capital Commission (NCC)	March 9, 1964

**Lot 18**

Ownership	Dates of Ownership
Deed from John Lebreton to James B. Hely	April 29, 1846
Various private individual owners	April 29, 1846 to February 24, 1880
Civil Service Building Society (Power of Sale)	February 24, 1880 to May 29, 1886
Various private individual owners, including: <ul style="list-style-type: none"> <li>■ Lease to National Brake &amp; Clutch Service Ltd. from Lazarus Mirsky</li> </ul>	May 29, 1886 to July 2, 1965, including: <ul style="list-style-type: none"> <li>■ October 3, 1955</li> </ul>
Deed to National Capital Commission (NCC)	July 2, 1965

All lands included in the chain of title were expropriated by the National Capital Commission (NCC), first on April 18, 1962, and then registered owners subsequently signed deeds that are included in the tables above to release their interest. Following land transfer to the NCC, all land on Site has the same chain of title:

Owner	Dates of Ownership
National Capital Commission	Varies depending on the lot
The Regional Municipality of Ottawa-Carleton	March 9, 1999 until October 29, 2015
City of Ottawa (current owner)	October 29, 2015 to present
Enbridge Gas Distribution Inc. (Easement)	December 14, 2015 to present

Overall, the title search shows that land was first provided to Robert Randall through a Crown patent on February 25, 1809. John Lebreton started proceedings to purchase the land on December 20, 1820 and purchased the land in full on August 27, 1828. Following this, the land was subdivided into several lots, which were sold to a variety of primarily residential and commercial owners. The land was expropriated by the NCC on April 18, 1962, and lands were eventually transferred to the NCC from respective owners. Following this, the City of Ottawa obtained the land on October 29, 2015, and remains the current owner.

### 3.1.5 City Directories

City directories ordered as part of a previous Phase One ESA conducted by Golder in May 2015 were reviewed for this report. City directories listings are typically reviewed in five- to ten-year intervals. Noteworthy findings are discussed below:

#### On-Site

- Residential properties are first listed in the 1875 city directory.
- Capital Welding Co., located at 524-526 Wellington Street, is listed on the Site in 1920. Peebles Service Station is listed at 524 Wellington Street in 1925. McCormick's Ltd. is listed at 526 Wellington Street in 1944, 1949, 1954 and 1959. Boyd Moving and Storage Ltd. is listed at 526 Wellington Street in 1964. 524- 526 Wellington Street was located in the northwest corner of the Site at the southwest corner of Wellington Street and Commissioner Street.
- Jamieson & Co. Bakers, located at 532 Wellington Street, is listed on the Site in 1905. 532 Wellington Street was located near the northwest corner of the Site.
- The West End Club, located at 534 Wellington Street, is listed on the Site in 1890-91. The Dominion Mica Co. Ltd. is listed at this address in 1910. Freedman Wm Bag Maker is listed at this address in 1920. Loughborough Mining Co. Ltd. is listed at this address in 1925. 532 Wellington Street was located near the northwest corner of the Site.
- The Kennedy Hotel, located at 542 Wellington Street, is listed on the Site in 1890-91, 1895/96, 1900, 1905 and 1910. Ottawa Brass Mfg. Co. is listed at this address in 1920, 1925, 1930, 1935, 1940, 1944, 1949, 1954, 1959 and 1964. 542 Wellington Street was located on the north side of Wellington Street approximately 50 m southwest of Commissioner Street.
- Ottawa Feather Mattress & Steam Cleaning, located at 548 Wellington Street, is listed on the Site in 1915, 1920, 1925, 1930, 1935, 1940, 1944, 1949, 1954 and 1959. 548 Wellington Street was located on the north side of Wellington Street approximately 60 m southwest of Commissioner Street.

- National Brake & Clutch Service Ltd., located at 584 Wellington Street, is listed on the Site in 1959. 584 Wellington Street was located on the southeast corner of Wellington Street and Brickhill Street.

### Off-site

- Tapp's Garage, located at 610 Wellington Street is listed in 1949. Capital Coach Lines and Green's Garage are listed at this address in 1954. Capital Coach Lines Co. Ltd. is listed at this address in 1959. 610 Wellington Street was located 90m southwest of Site.
- Howe J G & Sons Painters, located at 548 Albert Street (30 m southeast of the Site), is listed in 1920. Harris Ice Cream Parlour is listed at this address in 1935.
- Burrows Refining Company, located at 629 Wellington Street (120 m west of the Site), is listed in 1920. Ferro Enamels Co. of Canada Ltd. is listed at this address in 1930, 1935, 1940 and 1944. Travers Aprons Ltd. is listed at this address in 1954.

The street directories indicate that the Site was developed as early as 1875 with primarily residential properties, and that there have been several residential, commercial, and industrial businesses on site. Properties in the surrounding area have included residential, institutional, commercial, and industrial listings. The city directories showed historic activities within the Phase One Study Area that qualify as Potentially Contaminating Activities, discussed further in Section 6.2.

### 3.1.6 Previous Reports

Golder previously completed the following reports for the Client related to the Site. Golder consulted these reports to develop an understanding of the environmental conditions at the Site and surrounding properties.

- **"2015 Phase I ESA"**, Phase I Environmental Site Assessment, 557 and Part of 584 Wellington Street, Ottawa, Ontario, dated May 2015
- **"2015 Phase II ESA"**, Summary of Phase II Environmental Site Assessment Results, 584 Wellington Street and Part of Adjacent Property, Ottawa, Ontario, dated May 13, 2015
- **"Summary Report Card"**, Summary Report Card, OLRT Temporary Lease Property Report Card, prepared for City of Ottawa, no date

### 2015 Phase I ESA

This Phase I ESA was completed in general accordance with O.Reg. 153/04 and included the entire Site and an additional parcel of land located southwest of the Site (addressed 584 Wellington Street). The 2015 Phase I ESA was carried out to support potential future redevelopment of the Site and the noteworthy findings are discussed below:

- The Site was being used for construction staging, equipment and building supplies storage, office trailers, shop/garage building, water treatment system and chemical storage for tunnelling operations as part of the OLRT construction work.
- The surrounding lands of the Site primarily consisted of residential properties and office buildings to the east; the OLRT construction area and associated access ways to the underground tunneling operations adjacent to the west and north of the Site; and, OLRT construction related storage area consisting of excess rock cuttings stockpile, sea containers for equipment storage, and, construction of associated storm and sanitary sewage treatment tunnel.

- The following areas of potential environmental concern (“APECs”) were identified:
  - **APEC 1** – Presence of fill containing waste with metals, polycyclic aromatic hydrocarbon (PAH) and petroleum hydrocarbon (PHC) impacts across the Site.
  - **APEC 2** – Former automotive garage with underground storage tanks (USTs) on the southwest portion of the Site.
  - **APEC 3** – Former gasoline service station with USTs and a garage and bus lines depot at 610 Wellington Street (near the west of the Site).
  - **APEC 4** – Three documented spills of PHC-containing substances on the northwest side of the shop/ warehouse/garage building.
  - **APEC 5** – Presence of an active diesel aboveground storage tank with reported spills located near Albert Street and Brickhill Street.
  - **APEC 6** – Documented contaminated sites on the Site southwest of Brickhill Street.
  - **APEC 7** – Former commercial/industrial land uses and a documented spill of furnace oil within 250 m of the Site.

## 2015 Phase II ESA

This Phase II ESA was completed in general accordance with O.Reg. 153/04 to address APECs as identified by the 2015 Phase I ESA mentioned above. The field investigation program for the Phase II ESA was completed between February 28 and March 9, 2015. It involved drilling four (4) boreholes, which were completed as groundwater monitoring wells, and collecting soil and groundwater samples from each for laboratory analysis of various contaminants of potential concern including metals, petroleum hydrocarbons fractions 1 through 4 (PHC F1-F4), volatile organic compounds (VOC) and/or polycyclic aromatic hydrocarbons (PAH). Based on the review of the report, the following items were noted:

- The subsurface conditions encountered at the Site generally consisted of fill material comprised of silty sand to sand and gravelly sand with brick, ash or wood identified in some areas. The fill thickness was interpreted to be generally less in the southern portion of the Site (generally 1 to 2 m) and was greatest along the western property boundary north of Brickhill Street (generally 3 to 5 m in this area). The fill layer was underlain by native soil consisting of silty sand with some gravel (glacial till).
- The interpreted depth to bedrock was shallowest in the northern portion of the Site (generally 6 to 9 m in this area) and deepest along the eastern property boundary in the southern portion of the Site (generally 12 to 14 m in this area).
- Fill samples at the Site were characterised by concentrations of contaminants of concern (COCs) above Ontario Table 1 Background Standards including various PAHs, mercury, barium, copper, lead and silver, PHC F1, F2 and F3 and ethylbenzene and xylenes. Fill samples at the Site were also characterised by concentrations of COCs above Ontario Table 3 Residential Standards including various PAHs, mercury, barium, lead, and PHC F1-F3. Fill samples at the Site were further characterised by concentrations of selected COCs above Ontario Table 3 Commercial Standards including various PAHs, lead, and PHCs F1-F3.

- Native glacial till at the Site was generally not impacted by COCs at concentrations above the Ontario Table 1 Background and Table 3 Residential and Commercial Standards with the exception of Ontario Table 1 Background and Table 3 Residential Standards exceedance of mercury, and Ontario Table 1 Background Standard exceedance of PHC F2. These impacts were identified in the native soil located directly below the fill layer.
- The fill material encountered at the Site contained debris (brick fragments, wood) and ash in some areas, and had concentrations of PAHs, PHCs and/or metals exceeding the applicable Ontario Table 3 Residential and Commercial Standards. It was identified that the fill should be disposed of at a licenced disposal facility in the event that it is removed. It was expected that approximately the upper 2.5 to 4.0 m of fill material would require off-Site disposal.
- Groundwater at the Site was interpreted to be flowing to the northwest towards the aqueduct. Groundwater samples collected met the Ontario Table 3 Standards with the exception of sodium at one well. The sodium impacts were interpreted to be related to the use of road salt on nearby roads.
- It was identified that additional investigation was warranted should filing of a Record of Site Condition be required and/or in order to improve the accuracy of the soil volume estimates for management and disposal options at the Site. It was noted that the 2015 Phase I ESA was not completed prior to commencing the drilling program for the Phase II ESA; therefore, the Phase II ESA did not fully address all APECs identified in the 2015 Phase I ESA. Specifically, soil testing in the area of the former automotive garage (named APEC 2) was not completed, and the quality of fill at the northern end of the site (APEC 1) was not assessed.

## Summary Report Card

The Summary Report Card was provided to the City of Ottawa as part of the leasing of the lands for the ongoing OLRT construction. The Temporary lease started February 15, 2013, with the lease scheduled to end March 29, 2019. The report also included several relevant appendices. Items to note from the Summary Report Card include:

- The baseline conditions for the Site are listed as “Various metals exceeding MOE Table 1 / Table 3 Standards, PAHs exceeding MOE Table 3 Standards, PHC MOE Table 1 Standard exceedances. Area is not well defined however there is a long history of light to heavy industrial use prior to OLRTC activities which are typical to have metals, PAHs and PHCs exceeding MOE Standards.”
- There were 17 spill reports filed to the City on behalf of the OLRT Constructors and the Rideau Transit Group. Copies of each spill report were attached to the Summary Report Card. Spills were recorded between August 6, 2013 and May 24, 2017. Spills ranged in quantity and substance but were mostly small quantities of slurry water (concrete grout), concrete washout water, antifreeze, windshield washer fluid, hydraulic oil, Aluminex 1 coagulant, diesel fuel. Most spills were small volumes (< 5L) while a few were of unknown quantities or larger volumes (20 L to 223 L). All spills were reported and cleaned promptly after identifying the spill.
- Soil was imported to Site on five reported instances starting in July 2017 and ending in October 2017. A total of approximately 21,225 m<sup>3</sup> of soil were imported to Site. Some of this soil was imported from the Maintenance and Storage Facility (MSF) on Belfast Road. This soil was compliant with Table 3 site conditions standards. As evidence, one report was attached to the Report Card: “SNCL Report, April 12, 2017 – Environmental testing MSF Soil Berm Lab results from MSF and Shed extension work: 1730229 DRAFT 28 July 17 1847; 1735395”. The report summarized the following:

- Report on a soil berm constructed using soil from the Maintenance and Storage Facility (MSF) on Belfast Road. The quality of the soil used in constructing the berm was not monitored or documented. This report documents soil quality in the berm and recommendations for managing the soil.
- Sampled soil met Ontario Table 1 Site Conditions Standards at three (of six) sampling locations, and Ontario Table 3 Site Conditions Standards at five (of six) sampling locations. One part of the berm exceeded Table 3 standards and should be considered contaminated and disposed off-site. There were no exceedances of sampled soil when compared to O.Reg. 347 Schedule 4 leachate criteria, such that the soil would be considered a non-hazardous waste at a licensed landfill.
- There are two soil and groundwater sampling reports attached to the Summary Report Card
  - January 11, 2018 – Environmental Site Assessment at OLRTC West Portal (SLE-70-2-WPTU-REP-0001)
    - This report outlines the remediation efforts following a fuel spill at the OLRTC facility that was reported on May 25, 2017. A TSSA Order required a report to delineate the full extent of the petroleum impacts to both soil and groundwater.
    - 3 boreholes were drilled in the area of remediated soil impacts and completed as monitoring wells. Soil and groundwater samples were submitted for laboratory testing and compared to MOE Table 3 site condition standards (commercial property use, coarse textured soil).
    - Soil and groundwater samples were all below Table 3 site conditions standards. The report concluded that there was no evidence of residual petroleum hydrocarbon impacts in the vicinity of the remediated petroleum spill.
  - March 1, 2019 – 2018 Environmental Investigation at the Confederation Line West Portal, 529 Albert Street, Ottawa, Ontario (SLE-70-2-0000-REP-0007)
    - This report outlines a soil assessment of an area of the Site, targeted to the southern portion of the West Portal property, in the areas immediately north and west of the former OLRTC maintenance garage. One test pit was also excavated southwest of the garage, west of Brickhill Street, in the area of OLRTC's former stockpiling area for rock removed from the downtown tunnel.
    - The work involved test pit excavation and soil sampling at five (5) locations to a maximum depth of approximately 1 metre below ground surface, and submission of samples for laboratory testing.
    - Results were compared to MOE Table 3 Site Condition Standards (commercial property use, coarse textured soil). All soil samples satisfied these standards, with detectable concentrations of PHC F2, F3 and/or F4 noted at two test pits.
    - The report concluded there was not any significant impacts by PHCs, BTEX, VOCs, and/or pH from OLRTC's use of the site in the investigated areas.

## Summary of Findings from Review of Previous Reports

The previous environmental reports showed several current and historic activities within the Phase One Study Area that qualify as Potentially Contaminating Activities, discussed further in Section 6.2. Furthermore, the 2015 Phase II ESA identified concentrations of several COCs in soil above the applicable site condition standards.

### 3.2 Environmental Source Information

#### 3.2.1 ERIS Report

Golder contracted ERIS to conduct a search of environmental sources, including federal, provincial, and private sector databases, for information on the Phase One Property and Study Area. The ERIS report is provided in Appendix B.

The following is a summary of the findings as identified within the ERIS report for the Site and for the surrounding properties within the Phase One Study Area:

#### On-Site

The EcoLog ERIS report identified following noteworthy records with respect to the Site:

- Boreholes (BORE): There was one borehole record on site, drilled August 9, 1983 to a depth of 4.8 m for a geotechnical investigation.
- Ontario Regulation 347 Waste Generator Summary (GEN): There were 9 records of waste generators on Site. Four records were issued to the City of Ottawa as part of the proposed rail corridor in 2011 through 2014, for generation of waste oils and lubricants, PCBs, light fuels, and other specified inorganics. Five records were issued to the Rideau Transit Group annually starting in 2013, for the generation of aliphatic solvents and residues; light fuels; waste oils and lubricants; waste compressed gases including cylinders; misc. waste organic chemicals; alkaline solutions; other inorganic acid wastes; and other specific inorganic sludges, slurries, or solids.
- Ontario Spills (SPL): Sixteen records of spills were identified with following details:
  - The OLRT Constructors reported a spill of 200L of shotcrete accelerator on December 4, 2013. This was listed as having been cleaned.
  - SNC-Lavalin Constructors reported a spill of 619L of aluminum sulphate solution to soil on June 30, 2014
  - SNC-Lavalin Constructors reported a spill of 5L of diesel to gravel on August 28, 2014. This was listed as having been cleaned.
  - SNC-Lavalin Constructors reported a spill of 5L of diesel to gravel on October 7, 2014. The ERIS report did not include any information on spill cleanup.
  - The OLRT Constructors reported a spill of 2L of petroleum product to soil on December 2, 2014. The ERIS report did not include any information on spill cleanup.
  - The OLRT Constructors reported a spill of 50L of concrete washout water on February 17, 2015. The ERIS report did not include any information on spill cleanup.
  - The OLRT Constructors reported a spill of 20L of hydraulic fluid to the soil on July 1, 2015. The ERIS report did not include any information on spill cleanup.

- The OLRT Constructors reported a spill of 10L of glycol to pavement on July 6, 2015. This was listed as having been cleaned.
- The ORLT Constructors reported a spill of 10L of glycol to a paved surface on July 9, 2015. This was listed as having been cleaned.
- The OLRT Constructors reported a spill of 3L of sediment laden water to land on August 10, 2015. The ERIS report did not include any information on spill cleanup.
- The OLRT Constructors reported a spill of an unspecified quantity of sediment water to a catchbasin on August 20, 2015. This was listed as having been cleaned.
- The OLRT Constructors reported a spill of 3L of concrete washout water to land on August 31, 2015. This was listed as having been cleaned.
- The OLRT Constructors reported a spill of 2L of hydraulic oil to the ground on September 21, 2015. This was listed as having been cleaned.
- The OLRT Constructors reported a spill of an unspecified quantity of sediment water to a catchbasin on March 20, 2016. This was listed as having been cleaned.
- 100L of petroleum-based used oil was reported as spilled to land on April 22, 2016. The ERIS report did not include any information on spill cleanup.
- 5L of diesel fuel was reported spilled to land on May 25, 2017. The ERIS report did not include any information on spill cleanup.
- Water Well Information System (WWIS): There were three records on WWIS on Site. Two monitoring and test holes were drilled February 28, 2015 to a depth of 8.23 metres below ground surface (mbgs) and 9.75mbgs, respectively. One monitoring and test hole was drilled March 1, 2015 to a depth of 7.01mbgs.

### ***Surrounding Properties within 250 metres of the Site***

The EcoLog ERIS report identified various records with respect to properties surrounding the Site within the Phase One Study Area. Based on the review of the EcoLog ERIS report, the noteworthy findings are discussed below:

- Boreholes (BORE): A total of eighty (80) borehole records were found in the Phase One Study Area. The details of dates, depth, geology and other information are provided in the ERIS in Appendix B.
- Certificates of Approval (CA): Fifteen (15) CAs were issued, mostly for municipal and private sewage works, and municipal water, with the following noteworthy records:
  - The Fleet Street Pumping Station (10 Fleet St, 85m N of Site) has several CA's for air, and municipal/private sewage works.
  - The Saint Vincent Hospital (60 Cambridge St North, 165m SE of Site) has two CA's on record, one for municipal sewage in 1996, and one in 1993 for industrial air emissions and the operation of a scrubber.
  - The Garden of the Provinces Park was listed with a single CA in 2001 to install a granulated activated carbon scrubber to draw air from a shaft and treat the odorous gases prior to release into the

environment. This listing was considered “unplottable” by ERIS, however it is believed that it is over 250m from the Site and was not further considered.

- **Environmental Compliance Approval (ECA):** A total of twenty-three (23) records of ECA were found in the Phase One Study Area. Most were for municipal and private sewage works, or municipal drinking water systems. Of note is the Fleet Street Pumping Station (10 Fleet St, 85m N of Site), which had 4 ECA’s for air emissions in 2008, municipal drinking water systems in 2005, and municipal and private sewage works in 2008 and 2010.
- **Contaminated Sites on Federal Land (FCS):** A total of eight (8) FCS records were found in the Phase One Study Area. All eight records were for LeBreton Flats. The 2018 record lists the site as “closed” and described detailed testing having been completed, with a Phase III ESA and Preliminary Quantitative Risk Assessment (PQRA) under review by Health Canada, and Environment Canada. The site management parameters were listed as additional assessment and continuous monitoring, with contaminants of potential concern (COPC) listed as PAHs, PHCs, and metals, in both soil and groundwater.
- **Fuel Storage Tank Historic (FSTH):** Two records were listed, both for the Public Works Canada Central Heating Plant (120m NW of Site). Both are for a license for a liquid fuel single wall diesel UST, installed in 1977. One record pertained to issuing the license in 1994, and one record reaffirmed the license being active as of 2008.
- **Ontario Regulation 347 Waste Generator Summary (GEN):** A total 53 listings for waste generation were available; however, after considering the type of business, waste type, site geology, and inferred groundwater flow direction, a subset of the waste generators listed for the surrounding properties were considered noteworthy:

Company	Location	Years	Waste Description
Donalco Inc	10 Fleet Street, 85m N of Site	2017	Other specific inorganic sludges, slurries, or solids
City of Ottawa	3 Fleet Street, 95m NW of Site	2013	Light fuels
Malhorta Construction Ltd.	300 Lett Street, 110m NW of Site	2015	Light fuels
Government of Canada, Public Works Canada, Cliff Heating and Cooling Plant	1 Fleet Street, 120m NW of Site	1986-1990, 1992-1997, 1998-2008, 2009, 2010, 2011, 2013, 2014, 2015, 2016, 2018	Heavy fuels, halogenated solvents, waste oils & lubricants, other specific inorganics, alkaline wastes, paint/pigment/coating residues, light fuels, PCB’s, acid wastes, latex wastes, inorganic and organic laboratory chemicals, aliphatic solvents, petroleum distillates, oil skimmings & sludges, waste compressed gases, amines
Veolia ES Canada Inc.	1 Fleet Street, 120m NW of Site	2010, 2011	Aliphatic solvents, heavy fuels, alkaline wastes, waste oils & lubricants, other specific inorganics

Company	Location	Years	Waste Description
Farm Credit Corporation	434 Queen Street, 160m NE of Site	1989, 1992-1998	Halogenated solvents, graphic art wastes, paint/pigment/coating residues, petroleum distillates
Government of Canada, Property, Material Management	473 Albert Street, 160m NE of Site	1986-1990, 1992- 1998	Halogenated solvents, photoprocessing wastes
Bruyere Continuing Care Inc / Saint Vincent Hospital / SCO Health Service	60 Cambridge St North, 165m SE of Site	1986-1990, 1992- 2015, as of Dec 2018	Acid Wastes – heavy metals Alkaline Wastes – heavy metals Aliphatic Solvents Paint/Pigment/Coating Residues Other Specified Inorganics Inorganic laboratory chemicals Photoprocessing Wastes Petroleum distillates Light fuels Heavy fuels Oil skimmings & sludges Waste oils & lubricants Pharmaceuticals Organic laboratory chemicals Pathological wastes Waste compressed gases
Ottawa-Carleton District School Board / Ottawa Technical High School	440 Albert St, 230m NE of Site	1986-1990, 1992- 2001, 2003-2006, 2009-2016, as of Dec 2018	Alkaline Wastes – heavy metals Aliphatic Solvents Inorganic laboratory chemicals Light fuels Other specific inorganics Oil skimmings & sludges Organic laboratory chemicals Petroleum distillates Waste oils & lubricants Wastes from the use of pigments, coatings, and paints
Atomic Energy of Canada Ltd. Chalk River Nuclear Laboratories	275 Slater St	1989-1990	This record was discarded as it's believed to be a permit for Chalk River Nuclear Laboratories which is not within 250 m of the Site.
Government of Canada	Parliament Hill: East, West, Centre Block & Library	1992-1997	Acid waste – other metals Aliphatic solvents Inorganic laboratory chemicals Other specified inorganics Organic laboratory chemicals Petroleum distillates

Company	Location	Years	Waste Description
			PCBs Waste oils & lubricants

- Greenhouse Gas Emissions from Large Facilities (GHG): A single record was found for the Cliff Central Heating and Cooling Plant at 1 Fleet Street (85m NW of Site). It reported greenhouse gas emissions of over 37,000 tonnes of carbon dioxide equivalent (CO<sub>2e</sub>) in 2016.
- TSSA Historic Incidents (HINC): There were two records of HINC in the Phase One Study Area. The first was at 1 Fleet Street (120m NW of Site) for a spill on federal property, with no dates or quantities specified. The second was at 42 Empress Avenue (215m S of Site), for a near miss, with no dates or quantities specified.
- TSSA Incidents (INC): There was a single record in the INC database for 1 Fleet Street (120m NW of Site), for a boiler explosion. This is believed to correspond with the widely publicized boiler explosion that occurred at this site in October 2009.
- National Pollutant Release Inventory (NPRI): There are 9 records in the NPRI database, all associated with the Cliff Central Heating and Cooling Plant (1 Fleet Street, 120m NW of Site), for the years 2002 through 2010. Emissions reported include particulate matter (PM<sub>2.5</sub> and PM<sub>10</sub>), carbon monoxide, sulfur dioxide, and nitrogen oxides.
- TSSA Pipeline Incidents (PINC): There were 6 records of PINC in the Phase One Study Area. All were related to natural gas pipeline strikes during excavation, and no environmental impact was reported.
- Private and Retail Fuel Storage Tanks (PRT): There is a single record for the Public Works Canada Central Heating Plant located at 1 Fleet Street (120m NW of site).
- Scott's Manufacturing Directory (SCT): There is a single SCT record for "Planetary Association for Clean Energy", located at 100 Bronson Ave (65m NE from Site). Established in 1975, it is listed as a periodical and book publisher, as well as environmental consulting and social advocacy.
- Ontario Spills (SPL): Sixty-eight (68) records of spills were identified surrounding this site. The following notable spills were considered noteworthy:
  - Varying quantities of refrigerant gas (freon, R11, R12, R22, R134A, and other unspecific refrigerant gases) were leaked to air at the power plant at 1 Fleet Street (120m NW of Site) in from 2000 to 2017. Possible air contamination was reported during the spills in 2001, 2003, 2004, 2005, and 2006; and confirmed air impact was reported during the spills in 2000, 2002, 2004, and 2011.
  - 60 L of refrigerant oil was spilled at the power plant at 1 Fleet Street (120m NW of Site) in 2000. Possible soil contamination was reported.
  - 12,000 L of bunker fuel oil was spilled to the soil in 1994 at the power plant at 1 Fleet Street (120m NW of Site). Soil contamination was confirmed.
  - 1,000 L of bunker fuel oil was spilled to the soil in 2007 by a tank truck at 1 Fleet Street (120m NW of Site). Soil contamination was not anticipated.

- 500 L of bunker fuel oil was spilled to the soil in 2004 by Drain-All Ltd at 1 Fleet Street (120m NW of Site). Soil contamination was not anticipated.
- 20 L of bunker fuel oil was spilled to the soil in 2001 by a tank truck at 1 Fleet Street (120m NW of Site). Soil/water contamination was listed as possible.
- 1,400 L of propylene glycol was spilled in 2014 by Broccolini Construction at 443 Queen St West (170m NE of Site) during the construction of a new condo development. Environmental impact (surface water pollution) was confirmed.
- 900 L of furnace oil was spilled in 1996 at a private residence at 553 Laurier Street West (180m E of site) due to vandalism. Soil contamination was confirmed
- Water Well Information System (WWIS): A total of 13 well records were identified by the ERIS report. The details of well construction, surficial geology and other information are provided in the ERIS in Appendix B.

It should be noted that the Cliff Heating and Cooling Plant is listed at 1 Fleet Street, 120m NW of Site. However, upon further examination in Google Maps, the property is quite large, and the actual heating and cooling plant is located approximately 600m NW of Site. Because of this, records associated with the heating and cooling plant were not further considered, unless these records suggested they may have occurred on the roadway or near the property boundary closest to the Site.

The ERIS report showed several current and historic activities within the Phase One Study Area that qualify as Potentially Contaminating Activities. Despite the quantity of waste generator registrations near the Site, the generation of waste, in itself, is not considered an issue, and was not retained as a PCA. The PCAs are discussed in more detail in Section 6.2.

### 3.2.2 Ontario Ministry of Environment, Conservation and Parks

A Freedom of Information (FOI) request was submitted to the Ontario Ministry of the Environment, Conservation and Parks (MECP) in writing with the following questions:

- Has the MECP ever issued any approvals, permits, or licenses for the Site?
- Has the MECP ever issued any control orders or violation notices with respect to the Site?

The MECP replied on May 16, 2019; their letter shows that no orders or records were found (refer to copy of correspondence in Appendix C).

### 3.2.3 City of Ottawa

Golder completed a review of the City of Ottawa HLUI (Historical Land Use Inventory) provided for the previous Phase I ESA in 2015 for the Site and surrounding area. Based on the review of the City of Ottawa HLUI the following was noted:

#### On-Site

A review of the City of Ottawa HLUI indicates that McCormick's Ltd. bakery was listed on-Site at 524-526 Wellington Street sometime between 1900 and 1950.

## Off-Site

A review of the City of Ottawa HLUI identifies numerous properties/activities with the Phase I Study Area. Based on previous reports and as discussed in section 3.3.2, the inferred groundwater flow direction is northwesterly towards the open aqueduct located 50 m to the northwest of and running parallel to, the northwest boundary of the Site. Several of the off-Site activities listed below are noted to be located down-gradient of the Site and/or were located on the opposite side of the open aqueduct that would act as a barrier to the migration of off-Site impacts. Since groundwater flow is inferred to be towards the northwest, properties/activities that were located on the south, west and east of the Site and inferred up-gradient of the Site that may be considered issues of potential environmental concern include:

- 2M Laser Supply Inc. was listed as a waste materials, wholesale industry located at 425 Gloucester Street (230 m east of the Site) listed in 1998 and 2001
- The property located at 422-426 Slater Street (110 m east of the Site) has had various industrial/commercial uses over the years including the Ottawa Car Co. and a brass foundry (1920), Ottawa Electric Co. and Ottawa Car Mfg. Co. Ltd. (1912-1922), Plant 2M (1948) and Ottawa Technical High School (1963)
- Ferro Enamels (Canada) Ltd. was listed as a paint and varnish industry located at 629 Wellington Street (120 m west of the Site) sometime between 1900 and 1940. The address was listed as Burrows Refining Co. in 1920 and Ballad Appreciation Society in 1950
- J.G. Howe & Son Painters was an interior and finishing work industry located at 548 Albert Street (30 m southeast of the Site) sometime between 1901-1921
- An unnamed gasoline service station was located on the southeast corner of Booth Street and Albert Street (250 m southwest of the Site) in 1955
- An unnamed gasoline service station was located at 603-607 Wellington Street (30 m north of the Site) in 1991
- An unnamed gas pump and auto repair garage was located at 465 Slater Street (130 m east of the Site) sometime between 1920 and 1964

The following properties/activities are located on the north side of the open aqueduct and/or down-gradient of the Site and are not considered issues of potential environmental concern for the Site:

- Brading Breweries Ltd. was listed at 451-463 Wellington Street (150 m north of the Site) sometime between 1899 and 1956 as a commercial printing industry with one UST adjacent to Baldwin Street and two centrally located boilers. It is possible that the brewery had printing operations related to bottle labelling. It occupied the entire area between Wellington Street/Bronson Avenue and Baldwin Street. The 1922 FIP indicates a garage, brew house, bottle washing, ale shed, storage, washing and cleaning and photo gelatine printing in this area on Site
- Alexander Fleck Limited was an iron foundry located at 416-428 Wellington Street (250 m northeast of the Site) sometime between 1900 and 1956
- Civic Garage was listed as a motor vehicle repair shop located at Fleet Street (185m west of Site) with one UST sometime between 1920 and 1956. The address is listed as waterworks press house in 1900-1910;

- General Bearing Service Ltd. was listed as other machinery and equipment industries located at 70 Fleet Street (170 m northwest of the Site) sometime between 1958 and 1980
- Goodyear Tire and Rubber Co. Of Canada Ltd. was listed as a tire and tube industry located at 87 Fleet Street (215 m northwest of the Site) sometime between 1960 and 1980
- Imperial Radiators Co. was a motor vehicle repair shop located at 137 Booth Street (200 m west of the Site) sometime between 1920 and 1956. The address is listed as residential in 1948

The City of Ottawa HLUI showed several historic activities within the Phase One Study Area that qualify as Potentially Contaminating Activities, discussed further in Section 6.2.

### 3.2.4 Technical Standards & Safety Authority, Fuels Safety Division

The Technical Standards & Safety Authority (“TSSA”) Fuels Safety Division maintains records related to registered fuel storage tanks and other petroleum-related infrastructure. The TSSA was contacted on June 18, 2019 to identify whether any active, decommissioned, or in-service storage tanks were present on the Site, and to search for outstanding instructions, incident reports, spills, or contamination records.

TSSA responded on June 18, 2019, identifying two active records at 1 Fleet & Wellington for a private self-service fuel outlet, and a liquid fuel tank.

Based on the review of the TSSA records, there are several current and historic activities within the Phase One Study Area that qualify as Potentially Contaminating Activities, discussed further in Section 6.2.

## 3.3 Physical Setting Sources

### 3.3.1 Aerial Photographs

Aerial photographs of the Site and vicinity were obtained from the National Air Photo Library (Natural Resources Canada) for the years 1925, 1938, 1945, 1953, 1968, 1986, and 1994, and reviewed by Golder. In addition, the aerial photographs for 1976, 2002, and 2017 from the City of Ottawa geo-map (<http://maps.ottawa.ca/geoOttawa/>) were reviewed on-line. Golder selected aerial photographs based on availability and date intervals to help develop an understanding of the history of the development of the Phase One Property and Phase One Study Area. The information obtained from the aerial photographs was limited by the quality and scale of the available aerial photographs. The aerial photographs from are included in Appendix D.

Information obtained from the review of the aerial photographs is summarized in the following table:

Year	Site	Surrounding Area
1925	The entire area of the Site is developed with building structures, likely used primarily as residential homes and some commercial activities.	<p><b>North:</b> Bounded by Commissioner Street followed by primarily residential buildings. Northwest of the Site consists of an aqueduct and water works/pump station as well as large buildings further away from the Site.</p> <p><b>East:</b> Bounded by Albert Street followed by residential properties, with Bronson Avenue located further away from the Site.</p> <p><b>South:</b> Bounded by part of Albert Street and Laurier Avenue West with primarily residential properties located in between.</p> <p><b>West:</b> Bounded by Brickhill Avenue and Wellington Avenue with primarily residential buildings.</p>
1938	No major changes compared to 1925 aerial image.	<p><b>North:</b> As per 1925 aerial image.</p> <p><b>East:</b> As per 1925 aerial image.</p> <p><b>South:</b> As per 1925 aerial image.</p> <p><b>West:</b> As per 1925 aerial image.</p>
1945	No major changes compared to 1938 aerial image.	<p><b>North:</b> As per 1938 aerial image.</p> <p><b>East:</b> As per 1938 aerial image.</p> <p><b>South:</b> As per 1938 aerial image.</p> <p><b>West:</b> As per 1938 aerial image.</p>
1953	No major changes compared to 1945 aerial image.	<p><b>North:</b> Similar to 1945 aerial image.</p> <p><b>East:</b> Similar to 1945 aerial image except that Slater Street has been extended.</p> <p><b>South:</b> Similar to 1945 aerial image except that extension of Slater Street intersects with Albert Street south of the Site. A new addition is visible on the Bruyere hospital on Cambridge St North.</p> <p><b>West:</b> Similar to 1945 aerial image.</p>

Year	Site	Surrounding Area
1968	Southern portion of the Site appears to be vacant land with some trees, with no evidence of previous buildings. Northern portion of the Site consists of several buildings, likely for residential and/or commercial uses. The central portion of the Site appears to be a parking lot.	<p><b>North:</b> An apartment building appears across Commissioner Street with vacant land further away from the Site (formerly consisted of large buildings).</p> <p><b>East:</b> Larger buildings, likely commercial or multi-unit residential, instead of former residential homes. For purposes appear in place of residential homes. Some lands appear to be vacant</p> <p><b>South:</b> Similar to 1953 aerial image.</p> <p><b>West:</b> A parking lot is located directly west where there previously were buildings. Lands to the northwest are vacant, which previously had residential and light commercial buildings. The 1968 photograph is cut off before the 250m boundary to the West.</p>
1976 (Geo Ottawa)	The trees formerly on the southern portion of the Site have been removed, and the entire southern half of the site is used as a parking lot. Otherwise similar to the 1968 aerial image.	<p><b>North:</b> Similar to 1968 aerial image.</p> <p><b>East:</b> Similar to 1968 aerial image.</p> <p><b>South:</b> Similar to 1968 aerial image.</p> <p><b>West:</b> Similar to 1968 aerial image.</p>
1986	Similar to 1976 aerial image.	<p><b>North:</b> Areas to the northwest have been converted to parking lots. These could be temporary as they appear unpaved.</p> <p><b>East:</b> Aerial image has limited coverage to the East of site. Visible areas are similar to 1976 aerial image.</p> <p><b>South:</b> Increase in density of residential developments.</p> <p><b>West:</b> There is a road connecting Slater Street to Booth Street, located at the intersection of Slater Street and Empress Avenue. This road runs along the aqueduct and continues past Booth Street.</p>
1994	Former buildings on site have been demolished. The entire site is being used as a parking lot.	<p><b>North:</b> No evidence of parking lots previously observed to the northwest.</p> <p><b>East:</b> Similar to 1986 aerial image.</p> <p><b>South:</b> Similar to 1986 aerial image.</p> <p><b>West:</b> Similar to 1986 aerial image.</p>

Year	Site	Surrounding Area
2002	The Site appears vacant and unpaved.	<p><b>North:</b> Similar to 1994 aerial image.</p> <p><b>East:</b> Similar to 1994 aerial image.</p> <p><b>South:</b> Similar to 1994 aerial image.</p> <p><b>West:</b> Former parking lot is a vacant unpaved area.</p>
2017	The Site is an active construction site, known to be the Light Rail Transit (LRT) construction, with site trailers, construction equipment, and vehicles.	<p><b>North:</b> Several multi-use residential buildings have been constructed to the northwest, with significant construction ongoing in that area.</p> <p><b>East:</b> Similar to 2002 aerial image.</p> <p><b>South:</b> Similar to 2002 aerial image.</p> <p><b>West:</b> Street that formerly ran North from the corner of Empress and Albert is gone. The entire area to the southwest of the Site is part of the LRT construction area, bounded by Albert Street to the south. To the northwest, there is construction ongoing in the formerly vacant LeBreton Flats lands.</p>

The review of aerial photographs of the Site and surrounding area indicates that the Site was developed prior to the first available aerial photograph in 1925. At the time, the Site was primarily residential and light commercial, with some light industrial activities in the surrounding areas. Sometime between 1953 and 1968, the Site and the majority of the residential and light commercial development to the northwest (on LeBreton Flats) were demolished. The Site was used as a parking lot with a few buildings until sometime after 2002. Since 2017, the Site has been an active construction site. Areas in LeBreton Flats remained undeveloped until sometime after 2002, when construction of multi-unit residential buildings began. As of 2017, construction is ongoing at LeBreton Flats. Areas to the east and south have changed much less, with the construction of larger high-rise buildings and an increase in the density of residential development. Roadways have undergone significant re-routing in the area, including the extension of Slater Street to join Albert Street between 1945 and 1953, and terminating Wellington Street at Commissioner Street between 2002 and 2017.

Based on the review of the aerial photography, there are some historic activities within the Phase One Study Area that qualify as Potentially Contaminating Activities, discussed further in Section 6.2.

### 3.3.2 Topography, Hydrology and Geology

The following records were reviewed to identify topographic, geologic and hydrogeological conditions at the Site. A topographic map (Ontario Base Map) showing the Site and the Phase One Study Area and the location of any water bodies is provided in Figure 3. Additional information on Site features, as observed at the time of the Site visit, is provided in Section 6.

Topic	Conditions	Comment / Source
<b>Topography of Site and Surrounding Area</b>	The Site generally slopes downward toward the aqueduct to the northwest. South of the Site the ground is sloped steeply upward to the southeast. Commissioner Street is sloped to the northwest with a steep rocky cliff on the east side of the street.	Site and surrounding area observations; 2015 Phase II ESA; and Figure 3 – Topographic Map and Areas of Natural Significance.
<b>Overburden Soils</b>	Site: Fill materials overlying glacial till and Paleozoic Bedrock, made of limestone, dolomite, sandstone & local shale.	2015 Phase II ESA; and Bélanger, J. R. 2008 Urban Geology of The National Capital Area, Geological Survey of Canada, Open File 5311, 1 DVD.
<b>Type of Bedrock</b>	Verulam formation: limestone and shale, interbedded	Bélanger, J. R., Urban Geology of The National Capital Area, Geological Survey of Canada, Open File D3256, 2001.
<b>Depth to Bedrock</b>	The depth to bedrock across the Site is expected to be shallowest in the northern portion of the Site (generally 6 to 9 mbgs) and deepest along the eastern property boundary in the southern portion of the Site (generally 12 to 14 mbgs).	2015 Phase II ESA
<b>Inferred Near Surface Groundwater Flow</b>	Regional groundwater flow in the underlying soil aquifers is interpreted to be northwest towards the aqueduct.	2015 Phase II ESA
<b>Site Grade Relative to the Adjoining Properties</b>	The Site is relatively higher grade than the lands to the north and west. The Site is relatively lower grade than the lands to the south and east.	Site and surrounding area observations, 2015 Phase II ESA; and Figure 3 – Topographic Map and Areas of Natural Significance
<b>Depth to Groundwater</b>	Previous reports found the piezometric surface (groundwater level) was located in the glacial till between 4.5 and 5.5 mbgs.	2015 Phase II ESA

Local groundwater flow may be influenced by wells, the construction of the LRT, or buried underground services such as services or utility trenches in the vicinity of the Site. If a more accurate description of geology, groundwater flow and groundwater quality is required, a subsurface investigation would be required.

### 3.3.3 Fill Materials

Topic	Conditions	Comment / Source
<b>Fill Materials</b>	The Site has fill overlying native glacial till and bedrock. The origin of the fill material is unknown.	2015 Phase II ESA, Site observations

### 3.3.4 Water Bodies and Areas of Natural Significance

Topic	Conditions	Comment / Source
<b>Nearest Open Water Body</b>	The nearest permanent watercourse is an open aqueduct located approximately 35m west of Site. The aqueduct is water routed from the nearby Ottawa River through the adjacent pump house.	Figure 1– Key Plan
<b>Areas of Natural Significance</b>	No areas of natural and scientific interest (ANSI) are known to be located on the Site or on the Phase One Study Area.	Figure 3 (Topographic Map and Areas of Natural Significance)

### 3.3.5 Well Records

Topic	Conditions	Comment / Source
<b>Water Wells on Site</b> (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling date, use)	Four monitoring wells (MW15-1 through MW15-4) were installed on Site as part of the 2015 Phase II ESA. None of these wells were observed during the Site visit. They have likely been damaged or decommissioned with the construction of the LRT. Three monitoring wells (MW-1, MW-2, MW-3) were installed on site in December 2017 and January 2018, as outlined in the “Summary Report Card” (see section 3.1.6). All three wells were reportedly abandoned during construction in April 2018.	ERIS report, 2015 Phase II ESA, and Site observations
<b>Water Wells on the Neighbouring Properties</b> (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling rate, use)	No water wells were observed; however, the ERIS report had records of 13 other wells within Phase One Study Area for domestic water supply and monitoring and test purposes.	ERIS report and Site observations

### 3.4 Site Operating Records

No Site operating records were provided to Golder for review.

## 4.0 INTERVIEWS

At the time of the Site visit, Golder conducted an interview with Ms. Erin Tait (Specialist, Environmental Remediation) of City of Ottawa and Mr. Cory van Hoof (Environmental & Sustainability Manager) of the OLRT Constructors (the “Site Representatives”) to discuss information about the historical and current activities carried out on the Site.

Relevant information obtained during the interview and Site visit is provided in Section 5.0.

## 5.0 SITE RECONNAISSANCE

### 5.1 General Requirements

Mr. Shihan Chowdhury, EIT (the “Site Assessor”) visited the Site on May 14, 2019 and walked through and observed accessible areas of the exterior of the Site, observed surrounding properties, and photographed representative Site features (Appendix E). The weather condition was cloudy, and the temperature was approximately 8°C. The Site Assessor was accompanied at the time of the Site visit by the Site Representatives. The following sections summarize the Site Assessor’s observations and information provided by the Site Representative.

Photographs of relevant features noted during the Site visit are provided in Appendix E.

### 5.2 Specific Observations

The specific observations made during the Site visit are presented in the following sections.

Topic	Observations	Source
<b><u>Structures</u> Number, Age and General Description of Buildings on the Site</b>	No buildings located on-Site; however, temporary pre-fabricated buildings (constructed in 2018) for telecommunication infra-structure were located on the northern portion of the Site. The Site Representative indicated that these temporary structures will likely be moved within proposed Central Library building footprint.	Site observations and Site Representatives
<b>Building Areas</b>	No buildings located at the Site except for temporary pre-fabricated telecommunication structure.	Site observations
<b>Number of Floors (include all levels, whether above or below ground)</b>	Not applicable, as no permanent buildings present at the Site.	Site observations and Site Representatives
<b>Number, Age, and Depth of Levels Below Ground Level</b>	Not applicable, as no permanent buildings present at the Site.	Site observations and Site Representatives

Topic	Observations	Source
<b>Number and Details of all Aboveground Storage Tanks (ASTs)</b>	No evidence (fill/vent pipes extending through walls or slabs/ground surface, no staining or any obvious odours) was observed at the time of the Site visit, to indicate the current or former presence of fuel or chemical ASTs on the Site. However, the Site Representatives confirmed oil ASTs were present on the southern portion of the Site and chemical ASTs were located on the eastern portion of the Site.	Site observations and Site Representatives
<b>Number and Details of all Underground Storage Tanks (USTs)</b>	No evidence (fill/vent pipes extending through slabs/ground surface, no staining or any obvious odours) was during the Site visit to indicate the current or former presence of fuel or chemical USTs on the Site. The Site Representative confirmed that there are no current or former USTs on site.	Site observations and Site Representatives
<b>Polychlorinated Biphenyls (PCB) Containing Materials and Equipment</b>	No evidence was observed during the Site visit to indicate the current or former presence of PCB containing materials or equipment. Given that no permanent buildings were present at the Site, PCB-containing electrical caulking and equipment are likely not present on-Site.	Site observations
<b>Asbestos-Containing Materials (ACMs)</b>	Given that no permanent buildings were present at the Site, ACMs are not considered to be an issue of concern at the Site.	Site observations
<b>Lead-Based Paints (LBPs)</b>	Given that no permanent buildings were present at the Site, LBPs are not considered to be an issue of concern at the Site.	Site observations
<b><u>Underground Utilities</u> Potable and Non-Potable Water Sources</b>	The Site is serviced by municipal water supply, according to the City of Ottawa mapping system, as well as a private water main on Site.	Site observations and Site Representative
<b>Utility Lines Present (i.e. Electrical, Natural Gas, other)</b>	Electrical lines are buried underground, and gas lines were not identified.	Site observations and Site Representative
<b>Sanitary/Process Wastewater Receptor</b>	Sanitary wastewater is discharged to the municipal sanitary system.	Site observations and Site Representative
<b>Sanitary Sewer Connection</b>	The Site is connected to the municipal sanitary sewer.	Site observations and Site Representative
<b>Septic Systems</b>	None identified or reported.	Site observations and Site Representative

Topic	Observations	Source
<b>Storm Water Flow</b>	Storm water infiltrates through gravel area or flows to nearby catch basins on adjacent roadways and is discharged into municipal sewer network.	Site observations and Site Representative
<b>Storm Sewer Connection</b>	Stormwater discharges to municipal combined storm and sanitary sewers.	Site observations and Site Representative
<b><u>Interior of Structures</u> Entry and Exit Points for Site Buildings</b>	Not applicable; no buildings were present on-Site.	Site observations
<b>Existing and Former Heating System(s) (include fuel type / source)</b>	Not applicable; no buildings were present on-Site.	Site observations
<b>Existing and Former Cooling System(s) (include fuel type / source)</b>	Not applicable; no buildings were present on-Site.	Site observations
<b>Drains, Pits, and Sumps (include current use, if any, and former use)</b>	Not applicable; no buildings were present on-Site.	Site observations
<b>Unidentified Substances</b>	None identified.	Site observations
<b>Floor Stains or Corrosion Located near a Potential Discharge Location</b>	None identified.	Site observations
<b><u>Miscellaneous Exterior</u> Location of any Current and Former Wells</b>	<p>No monitoring wells were observed on-Site at the time of the Site reconnaissance. However, ERIS report identified two monitoring wells completed at the Site in 2015, likely associated with the 2015 Phase II ESA.</p> <p>In addition, ERIS indicated 13 well records in the surrounding lands to the Site associated with monitoring and investigation activities.</p>	Site observations, 2015 Phase II ESA, ERIS Report
<b>Ground Cover (i.e., grass, gravel, soil, or pavement, etc.)</b>	The exterior areas of Site consisted primarily of gravel and aggregate covered area with the exception of a small strip of landscaping on the northern portion of the Site.	Site observations and Site Representative
<b>Current or Former Railway Lines or Spurs</b>	Current LRT spur lines were located adjacent north of the Site (below grade level) running parallel to the northern Site boundary.	Site observations and Site Representative
<b>Presence of Stained Soil, Vegetation, or Pavement</b>	None observed.	Site observations

Topic	Observations	Source
<b>Presence of Stressed Vegetation</b>	None observed.	Site observations
<b>Areas Where Fill and/or Debris Materials Appear to Have Been Placed</b>	The Site Representatives indicated that clean aggregate (granular A), associated with Combined Sewage Storage Tunnel (CSST) construction, was stockpiled on the northern portion of the Site.  In addition, aggregate was used to grade the Site during mid 2010s for use by OLRT-C.	Site observations and Site Representative
<b>Potentially Contaminating Activity</b>	No additional PCAs identified.	Site observations and Site Representative
<b>Unidentified Substances</b>	None identified.	Site observations

### 5.2.1 Enhanced Investigation Property

The Site is currently occupied by vacant land which formerly included buildings and structures associated with the OLRT construction yard including trailer offices, supplies and chemical storage shed, workshop/garage building, and water treatment system. Historically, based on reviewed FIPs, the Site was occupied by variety of commercial activities including auto service garage as well as oxyacetylene welding, machine and brass works, and, a metal junk pile. As such, the Site is considered as an enhanced investigation property as defined by O. Reg. 153/04, due to presence of former auto service garage.

## 5.3 Surrounding Land Use

Golder observed the neighbouring properties from publicly accessible areas and from the Site. The properties surrounding the Site includes primarily commercial land uses and some residential buildings. The Site Assessor made the following observations of neighbouring properties:

**West (inferred to be hydraulically cross-gradient of the Site):** A tunnel and construction area associated with CSST was located adjacent west of the Site followed by large transformer panel associated with LRT tunnel infrastructure. LRT spur lines appear at surface further away of the Site.

**North (inferred down-gradient):** Bounded by Commissioner Street followed by a large residential apartment building to the northeast. A green space occupies the majority of the lands further away from the Site including a church, some residential apartments and office buildings. Northwest of the Site consists of OLRT tunnels below grade followed by a vegetated slope towards an open aqueduct. Also, a pumping station was observed northwest of the Site followed by a large residential apartment complex.

**South (inferred up -gradient):** Unpaved driveway off Albert Street adjacent to the Site followed by construction area for CSST consisting of temporary office buildings and construction equipment storage yard. Further away from the Site, vacant lands and residential homes located north and south of Albert Street respectively.

**East (inferred cross-gradient):** Bounded by Albert Street followed by undeveloped green space, followed by Slater Street. Further away from the Site, lands consist of residential and institutional property uses.

## 5.4 Written Description of Investigation

At the time of the site visit, the Site consisted of a slightly irregular rectangular shaped property bordered by Commissioner Street to the northeast, Albert Street to the southeast, the former Brickhill Road allowance to the southwest, the former Wellington Street road allowance to the northwest, and the west border of the Site is located adjacent to the Ottawa Light Rail Transit (“OLRT”).

The Site consists of vacant land, formerly used as construction staging area by the Ottawa Light Rail Transit Constructors, whereas the northern portion of the Site consists of temporary pre-fabricated building for telecommunication infra-structure. The south and southwestern portions of the Site are currently being used for parking and as a soil/fill stockpile storage area respectively, by the Combined Sewage Storage Tunnel construction project. The surrounding properties within the Phase One Study Area include residential, commercial and light industrial land uses.

Based on the Site and surrounding area reconnaissance, the site visit supports the information previously obtained to identify PCAs, discussed further in section 6.2.

## 6.0 REVIEW AND EVALUATION OF INFORMATION

### 6.1 Current and Past Uses of the Site

The following summarizes the current and past uses of the Phase One Property:

Year(s)	Name of Owner(s)	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to Feb 25, 1809	Crown	Undeveloped	Agricultural or other use	No aerial photograph coverage available for prior to 1925. No FIPs available prior to 1878. No city directories available prior to 1875.
Feb 25, 1809 to Dec 20, 1820	Robert Randall	Undeveloped	Agricultural or other use	No aerial photograph coverage available for prior to 1925. No FIPs available prior to 1878. No city directories available prior to 1875.
Dec 20, 1820 - August 26, 1845	John Lebreton	Undeveloped	Agricultural or other use	No aerial photograph coverage available for prior to 1925. No FIPs available prior to 1878. No city directories available prior to 1875.
August 26, 1845 - April 18, 1962	Various private individuals /corporations	Residential, Commercial, and Industrial buildings	Residential / Commercial / Industrial	No aerial photograph coverage available for prior to 1925. The aerial photograph from 1925 shows the entire area of the Site is developed with building structures. The same is seen in the aerial photographs from 1938, 1945, and 1953. No FIPs available prior to 1878. The 1878 FIP shows primarily residential dwellings, with some commercial development (hotel, bake

Year(s)	Name of Owner(s)	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
				house, pharmacy). Commercial and industrial development continues in the 1901, 1912, and 1922, and 1925 (revised 1948) FIPs. The 1956 shows fewer residential developments and more commercial and industrial properties. No city directories available prior to 1875. The 1875 city directory shows residential properties. Future city directories show a mixture of commercial and industrial listings. The City of Ottawa HLUI shows commercial properties on site between 1900 and 1950. The chain of title shows the site has been subdivided into several lots and sold to different individuals and corporations.
April 18, 1962 - March 9, 1999	National Capital Commission	Vacant land, parking lot, and commercial /residential buildings	Residential / Commercial	The aerial photograph from 1968 shows vacant forested land on the Southern portion of the Site. The northern portion of the Site consists of several buildings, likely for residential and/or commercial uses. The central portion of the Site appears to be a parking lot. The 1964 city directory lists commercial properties including moving and storage, and Ottawa Brass Manufacturing Company. No city directory listings are available after 1964.
March 9, 1999 until October 29, 2015	The Regional Municipality of Ottawa-Carleton	Parking lot	Commercial	The aerial photograph from 2002 shows the site being used as a parking lot.
October 29, 2015 to present	City of Ottawa (current owner)	Construction staging area	Commercial	The aerial photograph from 2017 shows the site is being used as the staging area for the construction of the LRT.

## 6.2 Potentially Contaminating Activity

Any Potentially Contaminating Activity (PCA) on the Phase One Property or in the Phase One Study Area may require the identification of an area of potential environmental concern (“APEC”) and trigger the need for a Phase Two ESA to support the filing of a Record of Site Condition. The following PCAs were identified on the Phase One Property or in the Phase One Study Area, also shown on Figure 2:

PCA #	Location	PCA	Information Source	Rationale for Potential Contribution of the PCA to an APEC
1	Phase One Study Area	<b>34. Metal Fabrication:</b> Former foundry with a machine shop and moulding shop	1878 FIP	Based on the distance from the Site and the location down-gradient from the Site, this PCA is not considered as an APEC for the Site.
2	Phase One Study Area	<b>39. 13	Phase One Site	<b>10. Commercial Autobody Shop; 28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Former National Brake & Clutch Service, automotive garage with USTs	1956 FIP, Chain of title, City Directories, 2015 Phase I ESA	Since this PCA is on-site, it is automatically considered an APEC for the Site.
14	Phase One Study Area	<b>10. Commercial Autobody Shops; 27. Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles; 28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Former Blair Equipment Ltd. including a UST, boat warehouse, and garage	1956 FIP	Based on the location across an aqueduct and down-gradient from the Site, this PCA is not considered as an APEC for the Site.
15	Phase One Study Area	<b>10. Commercial Autobody Shops; 28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Former gasoline service station and garage	1956 FIP, City of Ottawa	Based on the distance from the Site and the location cross-gradient from the Site, this PCA is not considered as an APEC for the Site.

PCA #	Location	PCA	Information Source	Rationale for Potential Contribution of the PCA to an APEC
16	Phase One Study Area	<b>10. Commercial Autobody Shop; 28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Former automotive garage and repairs, with a UST	1956 FIP, City of Ottawa	Based on the location across an aqueduct and down-gradient from the Site, this PCA is not considered as an APEC for the Site.
17	Phase One Study Area	<b>28. Gasoline and Associated Products Storage in Fixed Tanks; 31. Ink Manufacturing, Processing and Bulk Storage:</b> Former brewery with a UST and commercial printing	1956 FIP, City of Ottawa	Based on the distance from the Site and the location down-gradient from the Site, this PCA is not considered as an APEC for the Site.
18	Phase One Site	<b>10. Commercial Autobody Shops; 34. Metal Fabrication:</b> Former welding company and automotive service station	City Directories	Since this PCA is on-site, it is automatically considered an APEC for the Site.
19	Phase One Study Area	<b>33. Metal Treatment, Coating, Plating, and Finishing:</b> Former refining and enamel manufacturing	City Directories, City of Ottawa	Based on the location cross-gradient from the Site and the nature of impacts associated with this PCA which are unlikely to migrate through groundwater, this PCA is not considered as an APEC for the Site.
20	Phase One Site	<b>30. Presence of Fill of Unknown Quality:</b> Presence of fill containing waste with metals, polycyclic aromatic hydrocarbon ("PAH") and petroleum hydrocarbon ("PHC") impacts across the Site.	2015 Phase I ESA, 2015 Phase II ESA, Summary Report Card	Since this PCA is on-site, it is automatically considered an APEC for the Site.

PCA #	Location	PCA	Information Source	Rationale for Potential Contribution of the PCA to an APEC
21	Phase One Study Area	<b>28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Documented spill of 900L of furnace oil	2015 Phase I ESA	Based on the up-gradient location of this PCA to the Site, and the nature of impacts associated with this PCA which may migrate through groundwater, the presence of this PCA may impact the Phase One Property.
22	Phase One Study Area	<b>N/A</b> - Spill of 1,400L of propylene glycol in 2014, with confirmed environmental impact	ERIS report	Based on the distance from the Site and the location cross- to down-gradient from the Site, this PCA is not considered as an APEC for the Site.
23	Phase One Study Area	<b>33. Metal Fabrication; 57. Vehicles and Associated Parts Manufacturing:</b> Former car manufacturing, brass foundry, and electrical company	City of Ottawa	Based on the distance from the Site and the location cross-gradient from the Site, this PCA is not considered as an APEC for the Site.
24	Phase One Study Area	<b>10. Commercial Autobody Shops:</b> Former gas pump and auto repair garage	City of Ottawa	Based on the up-gradient location of this PCA to the Site, and the nature of impacts associated with this PCA which may migrate through groundwater, the presence of this PCA may impact the Phase One Property.
25	Phase One Study Area	<b>28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Former gasoline service station	City of Ottawa	Based on the cross- to down-gradient location of this PCA to the Site, this PCA is not considered as an APEC for the Site.
26	Phase One Study Area	<b>10. Commercial Autobody Shops:</b> Former automotive garage	City of Ottawa	Based on the location across an aqueduct and down-gradient from the Site, this PCA is not considered as an APEC for the Site.
27	Phase One Study Area	<b>10. Commercial Autobody Shops:</b> Former motor vehicle repair shop	City of Ottawa	Based on the location across an aqueduct and down-gradient from the Site, this PCA is not considered as an APEC for the Site.
28	Phase One Site	<b>N/A</b> - Registered Federal Contaminated Sites, that include the Site and surrounding areas, including	ERIS report, former environmental reports	Since this PCA is on-site, it is automatically considered an APEC for the Site.

PCA #	Location	PCA	Information Source	Rationale for Potential Contribution of the PCA to an APEC
		PHC, PAH, and metal contamination in soil and/or groundwater		
29	Phase One Study Area	<b>29. Glass Manufacturing:</b> Former glass manufacturing facility	1912 FIP	Based on the location across an aqueduct and down-gradient from the Site, this PCA is not considered as an APEC for the Site.
30	Phase One Study Area	<b>37. Operation of Dry Cleaning Equipment (where chemicals are used):</b> Former drycleaners	1912 FIP	Based on the location across an aqueduct and down-gradient from the Site, this PCA is not considered as an APEC for the Site.
31	Phase One Site	<b>28. Gasoline and Associated Products Storage in Fixed Tanks:</b> Multiple oil ASTs located on Site	Previous Reports, Site Representatives, 2015 Phase I ESA	Since this PCA is on-site, it is automatically considered an APEC for the Site.
32	Phase One Site	<b>8. Chemical Manufacturing, Processing, and Bulk Storage:</b> Various storage drums and/or ASTs for chemicals stored on Site	Previous Reports, Site Representatives, 2015 Phase I ESA	Since this PCA is on-site, it is automatically considered an APEC for the Site.
33	Phase One Study Area	<b>8. Chemical Manufacturing, Processing, and Bulk Storage:</b> Former upholstery shop located 50m west of Site	1956 FIP	Based on the distance from the Site and the location cross-gradient from the Site, this PCA is not considered as an APEC for the Site.

### 6.3 Areas of Potential Environmental Concern

A summary of the Areas of Potential Environmental Concern (APECs) identified at the Phase One Property is provided in the following table. The APEC locations are presented in Figure 2.

Area of Potential Environmental Concern <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity <sup>2</sup>	Location of PCA	Contaminants of Potential Concern <sup>3</sup>	Media Potentially Impacted
<b>APEC 1:</b> PCA ID #2 – Former paint shop	Eastern portion of the Site, see Figure 2	PCA 39: Paints Manufacturing, Processing and Bulk Storage	Off-Site	VOC, BTEX	Ground water
<b>APEC 2:</b> PCA ID #6 – Former "City Iron & Bottle Co."	Northwestern portion of the Site, see Figure 2	PCA 29: Glass Manufacturing PCA 32: Iron and Steel Manufacturing and Processing PCA 33: Metal Treatment, Coating, Plating, and Finishing	On-Site	Metals, VOC	Soil and Ground water
<b>APEC 3:</b> PCA ID #7 – Former "Machine and Brass Works".	Northwestern portion of the Site, see Figure 2	PCA 33: Metal Treatment, Coating, Plating, and Finishing	On-Site	Metals, VOC	Soil and Ground water
<b>APEC 4:</b> PCA ID #11 – Former metal castings and moulding shop.	Northeastern portion of the Site, see Figure 2	PCA 33: Metal Treatment, Coating, Plating, and Finishing	On-Site	Metals, VOC	Soil and Ground water
<b>APEC 5:</b> PCA ID #28 – Registered Federal Contaminated Sites, that include the Site and surrounding areas.	Entire Site, see Figure 2	N/A	On-Site	PHC, PAH, Metals	Soil and Ground water

Area of Potential Environmental Concern <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity <sup>2</sup>	Location of PCA	Contaminants of Potential Concern <sup>3</sup>	Media Potentially Impacted
<b>APEC 6:</b> PCA ID #12 – Former automotive garage and repairs, with a UST.	Northeastern portion of the Site, see Figure 2	PCA 10: Commercial Autobody Shop PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHC, BTEX, VOC	Ground water
<b>APEC 7:</b> PCA ID #13 – Former National Brake & Clutch Service, automotive garage with USTs.	Southern portion of the Site, see Figure 2	PCA 10: Commercial Autobody Shop PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	On-Site	PHC, BTEX, VOC	Soil and Ground water
<b>APEC 8:</b> PCA ID #18 – Former welding company and automotive service station.	Northern portion of the Site, see Figure 2.	PCA 10: Commercial Autobody Shop PCA 34: Metal Fabrication	On-Site	PHC, BTEX, VOC, Metals	Soil and Ground water
<b>APEC 9:</b> PCA ID #20 – Presence of fill containing waste with metals, polycyclic aromatic hydrocarbon (“PAH”) and petroleum hydrocarbon (“PHC”) impacts across the Site.	Entire Site	PCA 30: Importation of Fill of Unknown Quality	On-Site	Metals, PAH, PHC, VOC	Soil
<b>APEC 10:</b> PCA ID #21 – Documented spill of 900L of furnace oil.	Northeastern portion of the Site, see Figure 2.	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHC, BTEX, VOC	Ground water
<b>APEC 11:</b> PCA ID #24 – Former gas pump and auto repair garage.	Northeastern portion of the Site, see Figure 2.	PCA 10: Commercial Autobody Shop	Off-Site	PHC, BTEX, VOC	Ground water

Area of Potential Environmental Concern <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity <sup>2</sup>	Location of PCA	Contaminants of Potential Concern <sup>3</sup>	Media Potentially Impacted
<b>APEC 12:</b> PCA ID #31 – Multiple oil ASTs located on Site.	Southern portion of the Site, see Figure 2.	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	On-Site	PHC, BTEX, VOC	Soil and Ground water
<b>APEC 13:</b> PCA ID #32 – Various storage drums and/or ASTs for chemicals stored on Site.	Eastern portion of Site, see Figure 2.	PCA 8: Chemical Manufacturing, Processing, and Bulk Storage	On-Site	PHC, BTEX, VOC, PAH	Soil and Ground water

**Notes**

- 1 Area of potential environmental concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through, •(a) identification of past or present uses on, in or under the phase one property, and •(b) identification of potentially contaminating activity
- 2 Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
- 3 Contaminants of potential concern specified using the method groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011

## 6.4 Conceptual Site Model

A Conceptual Site Model of the Phase One Study Area (as required by O.Reg. 153/04) is presented in a series of Figures 1 to 3 (Figure 1: Key Plan, Figure 2: Site Plan, Figure 3: Topographic Map and Areas of Natural Significance).

The combined set of figures shows:

- Existing buildings and structures (if present)
- Water bodies and Areas of Natural Significance (if present) located in the Phase One Study Area
- Roads (including names) within the Phase One Study Area
- Uses of properties adjacent to the Phase One Property

The following describes the Phase One ESA Conceptual Site Model (CSM) for the Site based on the information obtained and reviewed as part of this Phase One ESA:

- The Site is an irregular shaped parcel of land bordered by Commissioner Street to the northeast, Albert Street to the southeast, the former Brickhill Road allowance to the southwest, the former Wellington Street road allowance to the northwest, and the west border of the Site is located adjacent to the Ottawa Light Rail Transit (“OLRT”). The Site covers an area of approximately 0.95 hectares with vacant land, formerly used as construction staging area during Ottawa Light Rail Transit construction whereas the northern portion of the Site consists of temporary pre-fabricated building for telecommunication infra-structure. The south and southwestern portions of the Site are currently being used for parking and as a stockpile storage area respectively, by the Combined Sewage Storage Tunnel (“CSST”) construction project.
- Based on the earliest available aerial images, FIPs, and city directories, the Site was primarily developed with residential buildings and some commercial activities including grocery stores and warehouses prior to 1878. The presence of a mixture of commercial, residential and industrial properties continued until the 1950s. Following 1960, buildings associated with commercial or industrial activities occupied the northern portion whereas the southern portion was vacant and used for parking.
- There are records of four monitoring wells installed on Site as part of the 2015 Phase II ESA. None of these wells were observed during the Site visit. They have likely been damaged or decommissioned with the construction of the LRT. Three monitoring wells installed on site in December 2017 and January 2018 were reportedly abandoned during construction in April 2018. None of these wells are used for water supply and potable water is provided to the Site and Study Area by the City of Ottawa.
- The nearest permanent watercourse is an open aqueduct located approximately 35m northwest of Site. The aqueduct is water routed from the nearby Ottawa River through the adjacent pump house.
- Local groundwater is anticipated to flow towards the northwest based on previously completed subsurface investigations that evaluated groundwater flow direction based on water levels measured in groundwater monitoring wells. Regional groundwater is anticipated to flow in a northern direction towards the aqueduct and Ottawa River.
- No areas of natural and scientific interest (ANSI) are known to be located on the Site or on the Phase One Study Area;

- At the time of the Phase One ESA, the surrounding properties within the Phase One Study Area included:
  - **West:** A tunnel and construction area associated with CSST was located adjacent west of the Site followed by large transformer panel associated with LRT tunnel infrastructure. LRT spur lines appear at surface further away of the Site.
  - **North:** Bounded by Commissioner Street followed by a large residential apartment building to the northeast. A green space occupies the majority of the lands further away from the Site including a church, some residential apartments and office buildings. Northwest of the Site consists of OLRT tunnels below grade followed by a vegetated slope towards an open aqueduct. Also, a pumping station was observed northwest of the Site followed by a large residential apartment complex.
  - **South:** Unpaved driveway off Albert Street adjacent to the Site followed by construction area for CSST consisting of temporary office buildings and construction equipment storage yard. Further away from the Site, vacant lands and residential homes located north and south of Albert Street respectively.
  - **East:** Bounded by Albert Street followed by undeveloped green space, followed by Slater Street. Further away from the Site, lands consist of residential and institutional property uses.
- Thirty-three (33) Potentially Contaminating Activities (PCAs) were identified in the Phase One Study Area, eight of which were on the Phase One Property, as shown on Figure 2. Based on site characteristics and the locations of the PCAs, a total of thirteen (13) Areas of Potential Environmental Concern (APECs) were identified for the Phase One Property as shown on Figure 2.
- There are no buildings on site, and thus no active utility connections. The Site is serviced by municipal water, electricity, and sanitary wastewater. Storm water infiltrates on Site or collects in catch basins that discharge to municipal combined storm and sanitary sewers located on adjacent roadways south and east of the Site.
- Soil at the Site consists primarily of fill materials overlying glacial till and Paleozoic Bedrock, made of limestone, dolomite, sandstone & local shale. Bedrock consists of interbedded limestone and shale. Previous environmental studies indicate subsurface conditions generally consisted of fill material comprised of silty sand to sand and gravelly sand with brick, ash or wood identified in some areas. The fill thickness was interpreted to be generally less in the southern portion of the Site (generally 1 to 2 m) and was greatest along the western property boundary north of Brickhill Street (generally 3 to 5 m in this area). The fill layer was underlain by native soil consisting of silty sand with some gravel (glacial till). The interpreted depth to bedrock was shallowest in the northern portion of the Site (generally 6 to 9 mbgs in this area) and deepest along the eastern property boundary in the southern portion of the Site (generally 12 to 14 mbgs in this area).

#### 6.4.1 Uncertainty and Absence of Information

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

## 7.0 CONCLUSIONS

The information obtained as part of this Phase I ESA was evaluated to identify relevant environmental conditions with the potential for contamination to be present in environmental media or building materials. Environmental conditions that do not present a threat to human health or the environment and that generally would not be the subject of regulatory enforcement were not considered to represent an issue of potential environmental concern. Some land uses or activities in the surrounding area were not specifically identified as an issue of potential environmental concern based on their separation distance from the Site, the inferred hydrogeologic conditions and/or the absence of evidence of a contaminant release to the subsurface associated with the off-Site land use or activity.

Based on the information obtained as part of this Phase One ESA, thirty-three (33) Potentially Contaminating Activities (PCAs) were identified in the Phase One Study Area, eight of which were on the Phase One Property. Based on site characteristics and the locations of the PCAs, a total of thirteen (13) Areas of Potential Environmental Concern (APECs) were identified for the Phase One Property. A Phase Two ESA would be required to confirm the presence and extent of related impacts.

## 9.0 LIMITATIONS AND USE OF REPORT

This report (the “Report”) was prepared for the exclusive use of the City of Ottawa (“the City” and the “Client”) for the express purpose of providing advice with respect to the environmental condition of the Site. In evaluating the Site, Golder Associates Ltd. (“Golder”) has relied in good faith on information provided by others as noted in the Report. We have assumed that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatement or inaccuracy contained in this Report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or incomplete or inaccurate historical information from the various agencies. Any use which a third party makes of this Report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third party. If a third party requires reliance on this Report, prior written authorization from Golder is required. Golder disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of Golder’s assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions of Golder’s proposal. Golder did not perform a complete assessment of all possible conditions or circumstances that may exist at the Site referenced in the Report. Conditions may therefore exist which were not detected given the limited nature of the assessment Golder was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the Report. Golder’s opinions are based upon information that existed at the time of the writing of the Report. It is understood that the services provided for in the scope of work allowed Golder to form no more than an opinion of the actual conditions at the Site at the time the Site was visited, and cannot be used to assess the effect of any subsequent changes in any laws, regulations, the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. If a service is not expressly indicated, do not assume it has been provided.

The results of an assessment of this nature should in no way be construed as a warranty that the Site is free from any and all contamination from past or current practices.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Executive Summary: Summary By Data Source

### **BORE - Borehole**

A search of the BORE database, dated 1875-Jul 2014 has found that there are 81 BORE site(s) within approximately 0.25 kilometers of the project property.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2018**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jan 31, 2019**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2014**

## **Certificates of Approval:**

Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal

CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial

CFOT

List of commercial underground fuel oil tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Note: the Fuels Safety Division does not register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of commercial fuel tanks in the province. The TSSA updates information in its system on an ongoing basis; this listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Chemical Register:**

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2019**

**Compressed Natural Gas Stations:**

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Mar 2019**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Mar 2019**

**Certificates of Property Use:**

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Mar 31, 2019**

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2018**

**Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Mar 31, 2019**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Mar 31, 2019**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Mar 31, 2019**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jan 31, 2019**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial [EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2018**

**List of TSSA Expired Facilities:**

Provincial [EXP](#)

List of facilities and tanks - for which there was once a registration - no longer registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed from the ground are included in the expired facilities inventory held by the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal

**FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal

**FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-Oct 2018**

**Fisheries & Oceans Fuel Tanks:**

Federal

**FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2018**

**Fuel Storage Tank:**

Provincial

**FST**

List of registered private and retail fuel storage tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel storage tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial

**FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

**GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Dec 31, 2018**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

**GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2016**

**TSSA Historic Incidents:**

Provincial

**HINC**

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**TSSA Incidents:**

Provincial

INC

List of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC) and made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Sep 30, 2017**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2018**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2017**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Dec 31, 2018**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Feb 28, 2019**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-May 2018**

**Inventory of PCB Storage Sites:**

Provincial [OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial [ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Mar 31, 2019**

**Canadian Pulp and Paper:**

Private [PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal [PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial [PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: 1988-Sep 2018**

**TSSA Pipeline Incidents:**

Provincial [PINC](#)

List of pipeline incidents (strikes, leaks, spills) made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of pipeline incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Mar 31, 2019**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial **RSC**

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2019**

**Retail Fuel Storage Tanks:**

Private **RST**

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jan 31, 2019**

**Scott's Manufacturing Directory:**

Private **SCT**

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial **SPL**

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Dec 2018**

**Wastewater Discharger Registration Database:**

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2016**

**Anderson's Storage Tanks:**

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**TSSA Variances for Abandonment of Underground Storage Tanks:**

Provincial **VAR**

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of tank variances in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Mar 31, 2019**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Dec 31, 2017**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Ottawa, ON K2H 5B7

Dear Robyn Chatwin-Davies:

RE: ***Freedom of Information and Protection of Privacy Act Request***  
**Our File # A-2019-03295, Your Reference 191207025**

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 555 Albert Street, Ottawa

After a thorough search through the files of the Ministry's Ottawa District Office, Investigations and Enforcement Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment.**

To conduct a search through the files of the Environmental Assessment and Permissions Branch requires an additional 8 hours. If you would like us to search for Environmental Compliance Approvals/Certificates of Approval at the Environmental Assessment and Permissions Branch (EAPB), please forward to me at the above address payment by money order or cheque (made payable to the "Minister of Finance (FOI)") or by credit card in the amount of \$240.00. Please note that there is no guarantee any records will be located responsive to your request. Credit card forms are available on the Ministry's website <http://www.ontario.ca/environment-and-energy/freedom-information-request-form>. Please note, a request for records must usually be answered within 30 calendar days, however Section 27 allows for time extensions under certain circumstances. If you choose to have the search conducted at the Environmental Assessment and Permissions Branch, the time for answering your request will be extended for an additional 30 days.

**When remitting payment please quote our file number or attach a copy of this letter.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Junyi Cai at 416-314-4075.

Yours truly,

A handwritten signature in black ink, appearing to read 'Janet Dadufalza', written in a cursive style.

Janet Dadufalza

## EXTERNAL EMAIL

Hello Robyn,

Thank you for your request for confirmation of public information.

I have searched the below noted addresses and I have located the following record:

Inst Number	Context	Address	City	Province	Postal Code	Status
9348773	FS PRIVATE FUEL OUTLET - SELF SERVE	1 FLEET & WELLINGTON	OTTAWA	ON	K1A 0M3	Active
10902791	FS LIQUID FUEL TANK	1 FLEET & WELLINGTON	OTTAWA	ON	K1A 0M3	Active

For a further search in our archives, or for copies of documents, please complete our release of public information form found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid\\_=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392) and email the completed form to [publicinformationservices@tssa.org](mailto:publicinformationservices@tssa.org) or through mail along with the appropriate fee. TSSA's fee schedule can be found at: [https://www.tssa.org/en/about-tssa/resources/Documents/Public-Information-Fee-Schedule\\_Jan\\_2018.pdf](https://www.tssa.org/en/about-tssa/resources/Documents/Public-Information-Fee-Schedule_Jan_2018.pdf). The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Yalini

**Subject:** 19120705 TSSA information request

Good afternoon,

Could you please perform a TSSA database search for any underground storage tanks, registered fuel tanks, outstanding instructions, incident reports, fuel oil spills or contaminations records for the following addresses:

- 557 Wellington Street, Ottawa ON
- 526 Wellington Street, Ottawa ON
- 555 Albert Street, Ottawa ON
- 1 Fleet Street, Ottawa ON
- 553 Laurier Street West, Ottawa ON
- 451 Wellington Street, Ottawa ON
- 463 Wellington Street, Ottawa ON
- 629 Wellington Street, Ottawa ON
- 41 Booth Street, Ottawa ON
- 17 Duke Street, Ottawa ON

Please let me know if you have any questions!

Kindest regards,

Robyn

**Vacation alert: I will out of office from June 24<sup>th</sup> to July 5<sup>th</sup>, inclusive.**
