## **EXECUTIVE SUMMARY**

Paterson Group was retained by Surface Developments to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the property addressed 1619 Carling Avenue, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the site and study area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical information reviewed, the Phase I Property was initially developed with the present-day 2-storey commercial building circa 1961. The subject building has always been used for commercial retail purposes. It was reported in a previous environmental report that a former furnace oil UST was situated on the northwest portion of the site. The historical presence of the UST on-site is considered a potentially contaminating activity (PCA) resulting in an area of potential environmental concern (APEC).

Historical land use of the neighbouring properties in the Phase I Study Area consists primarily of commercial along Carling Avenue and residential along the adjacent streets. Several PCAs were identified, including retail fuel outlet (RFO), garages and a potential dry cleaner; however, based on their separation distances, these PCAs are not considered to represent APECs. An RFO located immediately east of the subject site (1607-1621 Carling Avenue). Past environmental programs conducted on-site identified groundwater impact along the eastern property boundary, abutting the RFO. Groundwater remediation was carried out on-site, and analytical results complied with the selected MECP Table 7 Standards; however, the RFO remains on the adjacent property to the east, and as such, is considered represent a current APEC on the Phase I Property.

Following the historical review, a site inspection was conducted on November 16, 2020. The Phase I Property is currently occupied by a slab-on-grade 2-storey commercial building that is occupied by retailers. No additional PCAs that result in APECs were identified with respect to the current use of the Phase I Property.

The surrounding land use consisted primarily of commercial retailers (dealerships with services garages, retailers and restaurants) along Carling Avenue and residential along the adjacent street. The service garages/dealerships are considered PCAs, however, based on a separation distance of more 60 m, these PCAs are not considered to represent APECs on the Phase I Property.

## **Recommendations**

Based on the results of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment is required for the property.**

## **1.0 INTRODUCTION**

At the request of Surface Developments, Paterson Group (Paterson) conducted a Phase I - Environmental Site Assessment (Phase I ESA) for the property addressed 1619 Carling Avenue, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the Phase I Property and study area as well as to identify any environmental concerns with the potential to have impacted the Phase I Property.

Paterson was engaged to conduct this Phase I-ESA by Mr. Jakub Ulak, of Surface Developments. The head office of Surface Developments is located at 88 Spadina Avenue, Ottawa, Ontario. Mr. Ulak can be reached by telephone at (613) 255-5065.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared in general accordance with the requirements of Ontario Regulation 153/04, as amended, under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

## **2.0 PHASE I PROPERTY INFORMATION**

Address:	Part of 1619 Carling Avenue, in Ottawa Ontario.
Location:	The Phase I Property is located on the north side of Carling Avenue, approximately 45 m west of Churchill Avenue, in the City of Ottawa, Ontario. Refer to Figure 1 - Key Plan in the Figures section following the text.
Legal Description:	Part of Lot 30, Concession 1 Ottawa River, Nepean, now in the City of Ottawa, Ontario.
Latitude and Longitude:	45° 22' 50" N, 75° 44' 52" W
<b>Site Description:</b>	
Configuration:	Irregular
Site Area:	0.11 hectares (approximate)
Zoning:	AM10 – Mixed-Use Zone
Current Use:	The Phase I Property is occupied by a vacant 2-storey commercial building.
Services:	The Phase I Property is situated in a municipally serviced area.

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the Phase I Property and, if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of Ontario Regulation 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01;
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I ESA Study Area Determination**

A radius of approximately 250 m was determined to be appropriate as a Phase I ESA study area for this assignment. Properties located outside the 250 m radius are not considered to have impacted the Phase I Property, based on their significant distance from the site.

#### **First Developed Use Determination**

Based on our historical review, the Phase I Property was developed circa 1961 for commercial purposes.

#### **Fire Insurance Plans**

The 1957 Fire Insurance Plans (FIPs) were reviewed for the Phase I Property and properties within the Phase I Study Area as part of this assessment. The Phase I Property was depicted as vacant, undeveloped land at that time. Neighbouring lands consisted of residential to the north, commercial to the west (Aladdin Motel), east (retail fuel outlet) and south (dealership and commercial office). Four (4) potentially contaminating activities were identified on surrounding lands, which included three (3) retail fuel outlets (RFOs) and associated service garages immediately east, across Churchill Avenue and across Carling Avenue to the southeast. A cleaner (Vails Clean-O-Mat), although not specified as a dry-cleaners was also depicted approximately 80 m southeast of the subject land. The PCAs identified during the review of the 1956 FIPs are provided in Table 1.

<b>Table 1. Potentially Contaminating Activities Fire Insurance Plans Review Summary</b>			
<b>Address</b>	<b>Listed Activity</b>	<b>Approximate Distance / Orientation from Site</b>	<b>Area of Potential Environmental Concern (Y/N)</b>
<b>Carling Avenue</b>			
1572	Vails Clean-O-Mat (potential dry cleaners)	158 m SE	No
1593-1599	Retail fuel outlet with 2 USTs and service garage	67 m E	No
1596	Retail fuel outlet with 2 USTs and service garage	68 m SE	No
1621*	Retail fuel outlet with 2 USTs and service garage	Immediately east	Yes
* Now addressed 1607 Carling Avenue			

With the exception of the RFO located immediately east, all other PCAs identified in the surrounding area are not considered to represent areas of potential environmental concern (APECs) on the Phase I Property. The RFO immediately east is considered to result in an APEC.

City directories were reviewed in approximately ten (10) year intervals back to the 1960.

The Phase I Property was first listed in 1970 under various commercial listings (business offices and retailers) until 2011. No PCAs were identified with the former use of the Phase I Property. Surrounding lands along Carling Avenue were listed as various car dealerships, retailers, motels and restaurants. The PCAs identified during the city directories review are provided in Table 2.

<b>Table 2. Potentially Contaminating Activities City Directories Review Summary</b>				
<b>Address</b>	<b>Years Listed</b>	<b>Listed Activity</b>	<b>Approximate Distance / Orientation from Site</b>	<b>Area of Potential Environmental Concern (Y/N)</b>
<b>Carling Avenue</b>				
1572	1960-1980	Vails Clean-O-Mat (potential dry cleaners)	158 m SE	No
1593-1599	1960-2005	Retail fuel outlet with 2 USTs and service garage	67 m E	No
1596	1960-1980	Retail fuel outlet with 2 USTs and service garage	68 m SE	No
1621*	1960-2011	Retail fuel outlet with 2 USTs and service garage	Immediately east	Yes
1622	1990-2011	Car dealership and garage	60 m SW	No
1638	1990-2011	Car dealership and garage	120 m SW	No
1660	2007-2011	Automotive repair garage	140 m SW	No
1667	1960-1980	Retail fuel outlet and automotive repair garage	150 m W	No
* Now addressed 1607 Carling Avenue				

Based on the separation distances, these PCAs are not considered to represent APECs on the Phase I Property, aside from the RFO at 1607-1621 Carling Avenue, which was previously identified as an APEC.

**Chain of Title**

Paterson did not request a Chain of Title for the subject site as it was determined that sufficient information was gathered from other sources, such as personal interviews, city directories and previous engineering reports.

**Plan of Survey**

A plan of survey was not provided for review.

**Previous Engineering Reports**

An environmental report, entitled *“Phase III – ESA and Groundwater Treatment Program, 1619 Carling Avenue, Ottawa, Ontario,”* prepared by A & A Consultants Inc. (A&A), dated July 30, 2018, was reviewed as part of this assessment.

A&A reported that a Phase I-ESA was completed for the subject site by Golder Associates in 2001. According to the report, the subject building was formerly heated by means of an underground fuel oil tank situated on the northwest portion of the subject site. A subsequent Phase II-ESA was completed by Golder to assess the potential impact of the former UST. It was reported that groundwater was encountered in the bedrock. At that time, groundwater was observed to be impacted by heating oil. No reported soil impact was identified in the area of the former UST.

In 2002, a Phase III ESA and Groundwater Treatment Program was conducted on the subject site. The soil analytical data collected at the monitoring well locations did not indicate the presence of a significant contaminant source at the subject site. The groundwater analytical data indicated that the groundwater contaminant concentrations in the monitoring wells at the east property boundary of the site were significantly higher than the concentrations detected in the monitoring wells at the west property boundary, as well as, at the location of the former UST. This, along with other documented evidence, suggested that the retail fuel outlet (Shell) located immediately east of the site was the source of contamination found along the east property boundary.

In 2017-2018, A & A conducted a Phase III ESA and Groundwater Treatment Program, during which six (6) monitoring wells were installed to address these concerns. A & A indicated that the groundwater flows in a westward direction.

Additional groundwater recovery and injection wells were installed on site for a pump and treat program and subsequent oxidant injection program were completed from March to June of 2018. Groundwater sampling in June 2018 indicated that the water complied with the MECP Table 7 Standards. It was recommended that further groundwater testing be completed to confirm the results of the testing program.

Based on test results provided, it appears that two (2) additional groundwater testing events were completed in November and December of 2018, when eight (8) and six (6) wells were tested, respectively. The test results were all reported as non-detected.

Regardless of the previous work conducted on the Phase I Property, it is our opinion that the retail fuel outlet immediately east currently represents an APEC on the Phase I Property.

## **4.2 Environmental Source Information**

### **Environment Canada**

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on November 13, 2020. No records were found in the NPRI database; however, according to the ERIS search, 17 properties located more than 140 m away from the Phase I Property were listed in the NPRI. Due to the significant separation distances of these identified properties relative to the subject land, they are not considered potential environmental concerns. A copy of the ERIS report is included in Appendix 2.

### **PCB Inventory**

A search of national PCB waste storage sites was conducted. No records pertaining to PCB waste storage sites were found for properties within the Phase I Study Area.

### **Areas of Natural Significance**

A search for areas of natural significance and features within the Phase I Study Area was conducted on the website of the Ontario Ministry of Natural Resources (MNR) on November 13, 2020. No areas of natural significance were identified within the Phase I Study Area.

### **Ministry of the Environment, Conservation and Parks (MECP) Instruments**

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site. A response from the MECP had not been received at the time this report was issued; however, a copy of the response will be forwarded to the client once received. A copy of the request form is provided in Appendix 2.

### **MECP Submissions**

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the property. A response from the MECP had not been received at the time this report was issued; however, a copy of the response will be forwarded to the client once received.

### **MECP Incident Reports**

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the site or adjacent properties. A response from the MECP had not been received at the time this report was issued; however, a copy of the response will be forwarded to the client once received.

### **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted electronically on November 13, 2020 for the subject and neighbouring properties. No Record of Site Condition (RSC) was identified on the Phase I Property. An RSC property was identified at 1650-1666 Carling Avenue, approximately 120 m southwest of the subject land. Based on the separation distance and cross-gradient orientation, this RSC property is not considered to have posed a risk to the Phase I Property.

### **MECP Waste Management Records**

A request was submitted to the MECP Freedom of Information office for information with respect to waste management records. At the time of this report, the MECP FOI search results had not been received. A response from the MECP had not been received at the time this report was issued; however, a copy of the response will be forwarded to the client once received.

### **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no former waste disposal sites located within the Phase I Study Area.

### **MECP Coal Gasification Plant Inventory**

The Ministry of the Environment, Conservation and Parks document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I Study Area.

### **Technical Standards and Safety Authority (TSSA)**

An ERIS search was conducted in lieu of contacting the TSSA, Fuels Safety Branch in Toronto to inquire about current and former underground storage tanks, spills and incidents for the subject site and neighbouring properties. Based on the TSSA response, there was one expired tank identified at the historical RFO at 1599 Carling Avenue, approximately 67 m east of the subject site. Based on the separation distance, this former RFO is not considered to represent an APEC.

Several other expired and active records were identified for an RFO located immediately east of the subject site. As previously discussed in this report, this RFO is considered to represent an APEC on the Phase I Property. A copy of the ERIS Report is included in Appendix 2.

### **City of Ottawa Landfill Document**

The document entitled “Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa”, was reviewed. No former landfills were identified in the Phase I Study Area.

### **City of Ottawa Historical Land Use Inventory (HLUI)**

A search request for the City of Ottawa’s Historical Land Use Inventory (HLUI 2005) database was requested as part of this assessment. A response from the City had not been received at the time this report was issued. A copy of the response will be forwarded to the client if it contains any pertinent information.

### **Environmental Risk Information Services (ERIS) Report**

An ERIS (Environmental Risk Information Service) Report was obtained for the Phase I Property and properties within the Phase I Study Area.

According to the ERIS report, there were two (2) records associated with the Phase I Property, specifically related to waste generation approvals from 2003, 2004, 2006 and 2009 listed under Hakim Optical Inc. These waste generation records identified light fuels as the waste stream. It is expected that the approvals for those years were issued at the time when Golder and others conducted remediation work on-site to remove the impacted groundwater from the former tank nest location.

The ERIS search identified a furnace oil leak from a UST at Hakim Optical (on the subject site) in 1993. This is associated with the previously identified UST at the rear of the site, which is considered to represent an APEC on the Phase I Property.

Several records were identified on properties within the Phase I Study Area, which included Environmental Approvals and Registry records, TSSA related records (i.e. delisted, expired and registered retail and private fuel storage tanks), waste generation records and spill records.

Based on our review, most of the environmental records identified within the 250 m search area are considered non-issues as they relate to infrastructure approvals. Several TSSA related records, spill records and waste generator records were identified for the RFO located immediately east of the Phase I Property at 1607 Carling Avenue, which has been already identified as a PCA resulting in an APEC. Several waste generation records were identified for 1655 Carling Avenue, immediately west of the subject land. These records reported light fuels and oil skimming during 2002 to 2009. It should be noted that this particular property is vacant and has been since the late 1990s. It is expected that the reported waste approvals were associated with the remediation/clean up conducted at this property. Based on the nature of the waste stream and down-gradient orientation, it is unlikely that the reported activity has impacted the Phase I Property.

The remaining records identified in the ERIS report are not considered potential concerns to the Phase I Property based on the separation distances of more than 70 m from the subject land and as such, no new PCAs that would result in APECs on the Phase I Property were identified in the ERIS report. A copy of the report is included in Appendix 2.

## **4.3 Physical Setting Sources**

### **Aerial Photographs**

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals, commencing with the earliest available photograph. Based on the review, the following observations have been made:

- |      |   |
|------|---|
| 1928 | The subject site and surrounding lands are vacant and undeveloped at this time.   |
| 1945 | The subject site remains unchanged from the previous photograph. Some residential lands can be seen along Churchill Avenue. |
| 1958 | The subject site remains vacant and undeveloped. The neighbouring lands are developed and appear to be occupied by          |

- commercial properties along Carling Avenue with some residential on the adjacent streets.
- 1962      The subject site is occupied by the present-day commercial building, while the surrounding lands appear unchanged from the previous photograph.
- 1976      No apparent changes are noted with the subject land and surrounding properties.
- 2002      The subject site and surrounding lands appear unchanged from the previous photograph, with the exception of the parking lot immediately west of the site, which was previously occupied by a motel.
- 2011      The subject site and surrounding lands appear unchanged from the previous photograph.
- 2017      No significant changes are apparent with respect to the subject site or neighbouring lands.

Copies of selected aerial photographs reviewed are included in Appendix 1.

### **Topographic Maps**

Topographic information was obtained from Natural Resources Canada – The Atlas of Canada website. The topographic maps indicate that the elevation of the subject site is approximately 77 m above sea level.

The regional topography in the general area of the Phase I Property slopes down in a northerly direction. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

### **Physiographic Maps**

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website, as a part of this assessment. According to the publication and mapping, the Phase I Property is situated within the St. Lawrence Lowlands. According to the description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.” The Phase I Property is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

## **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock within the area of the subject land consists of limestone interbedded with dolomite of the Gull River Formation. The overburden consists of plain till with a drift thickness on the order of 1 to 3 m.

## **Areas of Natural Significance and Water Bodies**

No areas of natural significance or water bodies were identified within the Phase I Study Area.

## **Water Well Records**

A well record search was conducted on November 17, 2020 for all drilled wells within 250 m of the subject site. The search returned fifty-three (53) well records, of which, 2 were domestic wells, 11 abandonment wells and 40 monitoring wells.

One monitoring well record was identified on the Phase I Property, which was drilled to a maximum depth of approximately 3.05 mbgs. The reported soil profile on-site consisted of a granular fill material underlain by clay, followed by limestone bedrock at approximately 1.22 mbgs. No other wells records were identified for the Phase I Property.

Two (2) domestic wells drilled in 1952 and 1956 were identified on the northeast corner of Carling Avenue at Churchill Avenue and immediately west of the site, respectively. The wells were drilled to depths ranging from 30 to 76 mbgs, in which bedrock was encountered at depths of 0.61 to 1.22 mbgs. All wells were drilled to fresh water. No abandonment well records were identified for these properties, however, it is expected that they are no longer in-use as the area is municipally serviced.

Eleven (11) abandonment well records were identified in the study area. One was identified at the Carling Avenue and Churchill Avenue intersection and ten (10) records were for 1599 Carling Avenue, which is located at the northeast corner of the Carling Avenue at Churchill Avenue intersection. It should be noted that this property was previously occupied by a retail fuel outlet.

The majority of the 40 monitoring well records were identified in the immediate vicinity of 1575 Carling Avenue, 1599 Carling Avenue and 727 Churchill Avenue. Although there was no additional information provided in the well records, it is

expected that these well records pertain a subsurface investigation related to the former use of the 1599 Carling Avenue and potential impact it may have had on the adjacent properties. Based on the separation distance and cross-gradient orientation, this former RFO is not expected to pose a risk to the Phase I Property. No other pertinent information was provided in these records. A copy of the well records is appended to this report.

## **5.0 PERSONAL INTERVIEWS**

Mr. Zvi Gross, the current property owner was interviewed as part of this assessment during the site visit. Mr. Gross purchased the property in 2018 and utilized the majority of the commercial building for retail and storage of speciality furniture. According to Mr. Gross, there are no asbestos-containing materials present in the building. Mr. Gross is not aware of any potential environmental concerns with the exception of the retail fuel outlet immediately east of the subject site. Other details gather during the interview are discussed in the appropriate sections of this report.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

The site inspection was conducted on November 16, 2020 by environmental personnel from Paterson, Ms. Mandy Witteman. Weather conditions were sunny with a high of 4 degrees Celsius. In addition to the Phase I Property, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site.

### **6.2 Specific Observations at the Phase I Property**

#### **Existing Buildings and Structures**

The Phase I Property is occupied by a 2-storey commercial building with two (2) tenants utilizing the space as a retailer of salon products and furniture. The second level is used for storage space by the furniture store. The building was constructed circa 1962 with a slab-on-grade foundation, finished in concrete blocks and a flat-tar and gravel style roof. The subject building is heated by natural gas fired furnaces and cooled by central air-conditioning units.

## **Site Features**

The subject building is centrally located on the subject land with an access laneway fronting Carling Avenue along the eastern side of the property. Customer parking is located on the north and south sides of the building. The site is relatively flat with a slight slope down towards the north and is situated slightly above the grade of Carling Avenue. Site drainage consists of sheet flow to catch basins located on the northeast corner of the lot and along Carling Avenue.

Six (6) groundwater monitoring wells were noted on-site at the time of the site visit. Three (3) monitoring wells were located on the eastern and western property boundaries.

No ponded water was observed on the subject site. No signs of staining or indications of potential sub-surface contamination were observed at the time of the site visit. A depiction of the Phase I Property is presented on Drawing PE4987-2 – Site Plan, in the Figures section of this report.

## **Subsurface Structures and Utilities**

The Phase I Property is serviced by natural gas, electricity, municipal water and sewer. A catch basin on-site is situated on the northeastern corner of the property and leaves the site from Churchill Avenue into the municipal stormwater drainage. All other services enter the Phase I Property from Carling Avenue.

## **Potential Environmental Concerns**

### **Fuels and Chemical Storage**

No above ground storage tanks (ASTs), signs of underground storage tanks (USTs) or chemicals were observed on the exterior of the Phase I Property at the time of the site visit.

### **Hazardous Materials and Unidentified Substances**

No hazardous materials, unidentified substances, surficial staining, abnormal odours, or indications of potential sub-surface contamination were observed on the Phase I Property at the time of the site inspection.

### **Transformer Oil and Polychlorinated Biphenyls (PCBs)**

No transformers or other sources of PCBs were observed on the Phase I Property at the time of the site inspection.

**Waste Management**

Waste materials were observed on the Phase I Property at the time of the site inspection, which consisted mostly of office waste and recyclables. No hazardous waste was noted at the time of the site visit.

**Interior Assessment**

A general assessment of the subject building interior is as follows:

- The floors consisted of poured concrete.
- The walls consisted of concrete block walls and drywall.
- The ceiling consisted of drywall and steel decking.
- Lighting throughout the building was a mixture of fluorescent and incandescent fixtures.

The building is heated by natural gas furnaces and exterior wall mounted air-conditioning/compressor units.

**Potentially Hazardous Building Products**

**Ozone Depleting Substances (ODSs)**

Refrigerators and fire extinguishers may be potential sources of ozone depleting substances (ODSs) on site. These appliances should be regularly serviced and maintained by certified contractors.

**Potentially Hazardous Building Materials**

Based on the age of the building there is the potential for Asbestos Containing Materials (ACMs) to have been used in the construction. These materials include drywall joint compound, which appeared to be in good condition. Lead-based paints may also be present on-site.

**Other Potential Environmental Concerns**

**Storage Tanks**

No signs of aboveground or underground fuel storage tanks were noted at the time of the site visit.

## **Wastewater Drainage**

Wastewater drainage from the building is expected to drain into the City of Ottawa sewer system.

## **Neighbouring Properties**

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection. Land use adjacent to the Phase I Property was observed to be as follows:

North: Residential, followed by Tillbury Avenue.

South: Carling Avenue followed by a car dealership.

East: Shell service station, followed by Churchill Avenue.

West: Parking lot, followed by commercial retailers and restaurants.

The RFO immediately east has already been identified as a PCA. The car dealerships with associated automotive service garages, located across Carling Avenue are considered PCAs, located approximately 70 m or more away from the Phase I Property, and as such, they are not considered to represent APECs. The neighbouring land use as well as off-site PCAs within the Phase I Study Area are illustrated on Drawing PE4987-3 – Surrounding Land Use Plan.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 Land Use History**

The Phase I Property was first developed circa 1961 with the present-day, 2-storey commercial building and has always been used for commercial retail purposes. With the exception of the former UST on-site, no other potentially contaminating activities were identified with the former and current use of the Phase I Property.

#### **Potentially Contaminating Activities**

Based on our historical review, a potentially contaminating activity (PCA) was identified off-site, resulting in an area of potential environmental concern (APEC) on the Phase I Property. As per Column A of Table 2 of the O.Reg. 153/04, as amended, the following on-site PCAs that have resulted in APECs on the Phase I Property are:

- PCA 28 – “*Gasoline and Associated Products Storage in Fixed Tanks*” associated with a former UST situated on the north side of the subject building on the Phase I Property (APEC 1).
- PCA 28 – “*Gasoline and Associated Products Storage in Fixed Tanks*” associated with the retail fuel outlet immediately east of the Phase I Property at 1607 Carling Avenue (APEC 2).

No other PCAs were identified on or off-site that would result in APECs on the Phase I Property.

### **Areas of Potential Environmental Concern**

The aforementioned PCAs resulting in APECs are:

- APEC 1: Resulting from the historical presence of an underground storage tank on the Phase I Property (PCA 28).
- APEC 2: Resulting from the current operation of a retail fuel outlet at 1607 Carling Avenue (PCA 28).

The aforementioned APECs are shown on the Phase I Property on Drawing PE4987-2–Site Plan.

### **Contaminants of Potential Concern**

Based on the APECs identified on the Phase I Property, the contaminants of potential concern (CPCs) are:

- Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX).
- Petroleum hydrocarbons (PHCs, Fractions F<sub>1</sub>-F<sub>4</sub>).

The CPCs are expected to be present in the soil and/or groundwater of the Phase I Property.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

According to the Geological Survey of Canada website, the bedrock in the area of the Phase I Property is reported to consist of limestone interbedded with dolomite of the Gull River Formation. The overburden is reported to consist of plain till with a drift thickness of 1 to 3 m across the site.

Based on the previous environmental work conducted on-site, groundwater beneath the site is expected to flow in a westerly direction.

### **Existing Buildings and Structures**

The Phase I Property is occupied by a 2-storey commercial building with two (2) tenants utilizing the space as a retailer of salon products and furniture. The second level is used for storage space by the furniture store. The building was constructed circa 1961 with a slab-on-grade foundation, finished in concrete blocks and a flat-tar and gravel style roof. The subject building is heated by natural gas fired furnaces and cooled by central air-conditioning units.

### **Drinking Water Wells**

There are no domestic wells on-site.

### **Monitoring Water Wells**

Six (6) groundwater monitoring wells were noted on-site at the time of the site visit. Three (3) monitoring wells were located on the eastern and western property boundaries.

### **Subsurface Structures and Utilities**

The Phase I Property is serviced by natural gas, electricity, municipal water and sewer. A catch basin on-site is situated on the northeastern corner of the property and drains to Churchill Avenue. All other services enter the Phase I Property from Carling Avenue.

### **Areas of Natural Significance and Water Bodies**

No areas of natural significance or water bodies were identified within the Phase I Study Area.

### **Neighbouring Land Use**

Neighbouring land use in the Phase I Study Area consists of commercial along Carling Avenue and residential on the adjacent streets.

### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

As per Section 7.1 of this report, two (2) PCAs were considered to result in APECs on the Phase I Property. These APECs have been summarized in Table 3, along

with their respective locations and contaminants of potential concern (CPCs) on the Phase I Property.

<b>Table 3: Areas of Potential Environmental Concern</b>					
<b>Area of Potential Environmental Concern</b>	<b>Location of Area of Potential Environmental Concern</b>	<b>Potentially Contaminating Activity</b>	<b>Location of PCA (on-site or off-site)</b>	<b>Contaminants of Potential Concern</b>	<b>Media Potentially Impacted (Groundwater, Soil, and/or Sediment)</b>
APEC 1: Resulting from the former presence of a UST	Northwestern portion of the Phase I Property	PCA 28 – <i>“Gasoline and Associated Products Storage in Fixed Tanks.”</i>	On-site	BTEX PHCs	Soil and/or Groundwater
APEC 2: Resulting from the current retail fuel outlet	Entire Phase I Property	PCA 28 – <i>“Gasoline and Associated Products Storage in Fixed Tanks.”</i>	Off-site	BTEX PHCs	Soil and/or Groundwater

**Contaminants of Potential Concern**

As per the APEC identified in Section 7.1, the contaminants of potential concern (CPCs) in soil and/or groundwater include:

- Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX).
- Petroleum hydrocarbons (PHCs, Fractions F<sub>1</sub>-F<sub>4</sub>).

**Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I- ESA is considered to be sufficient to conclude that there are PCAs that have resulted in APECs on the Phase I Property.

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **8.0 CONCLUSION**

### **Assessment**

Paterson Group was retained by Surface Developments to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the property addressed 1619 Carling Avenue, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the site and study area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical information reviewed, the Phase I Property was initially developed with the present-day 2-storey commercial building circa 1961. The subject building has always been used for commercial retail purposes. It was reported in a previous environmental report that a former furnace oil UST was situated on the northwest portion of the site. The historical presence of the UST on-site is considered a potentially contaminating activity (PCA) resulting in an area of potential environmental concern (APEC).

Historical land use of the neighbouring properties in the Phase I Study Area consists primarily of commercial along Carling Avenue and residential along the adjacent streets. Several PCAs were identified, including retail fuel outlet (RFO), garages and a potential dry cleaner; however, based on their separation distances, these PCAs are not considered to represent APECs. An RFO located immediately east of the subject site (1607-1621 Carling Avenue). Past environmental programs conducted on-site identified groundwater impact along the eastern property boundary, abutting the RFO. Groundwater remediation was carried out on-site, and analytical results complied with the selected MECP Table 7 Standards; however, the RFO remains on the adjacent property to the east, and as such, is considered represent a current APEC on the Phase I Property.

Following the historical review, a site inspection was conducted on November 16, 2020. The Phase I Property is currently occupied by a slab-on-grade 2-storey commercial building that is occupied by retailers. No additional PCAs that result in APECs were identified with respect to the current use of the Phase I Property.

The surrounding land use consisted primarily of commercial retailers (dealerships with services garages, retailers and restaurants) along Carling Avenue and residential along the adjacent street. The service garages/dealerships are considered PCAs, however, based on a separation distance of more 60 m, these PCAs are not considered to represent APECs on the Phase I Property.

## **Recommendations**

Based on the results of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment is required for the property.**

## 9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared under the supervision of a Qualified Person in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Surface Developments. Permission and notification from Surface Developments and Paterson Group will be required to release this report to any other party.

Well Owner's Information

First Name: Suncor Energy Products, Last Name / Organization: Suncor Energy Products, Mailing Address: 3275 Rebeca St., Municipality: Oakville, Province: ON, Postal Code: L6L6N5

Well Location

Address of Well Location: 1599 Carling Ave, Township: Oakville, City/Town/Village: Oakville, Province: Ontario, UTM Coordinates: NAD 83 18 441 527 502 5544

Overburden and Bedrock Materials/Abandonment Sealing Record

Table with columns: General Colour, Most Common Material, Other Materials, General Description, Depth (m/ft) From, To. Includes entries for gravel, clay, limestone, sand, gravel, loose soil, layered.

Annular Space

Table with columns: Depth Set at (m/ft) From, To, Type of Sealant Used (Material and Type), Volume Placed (m³/ft³). Includes entries for concrete/plushmount, bentonite, filter sand.

Results of Well Yield Testing

Table with columns: After test of well yield, water was: (Clear and sand free, Other), Draw Down (Time, Water Level), Recovery (Time, Water Level). Includes pumping rate, duration, and final water level data.

Method of Construction

Well Use

Method of Construction:  Boring,  Air percussion. Well Use:  Test Hole,  Monitoring.

Construction Record - Casing

Status of Well

Construction Record - Casing table with columns: Inside Diameter, Open Hole OR Material, Wall Thickness, Depth (m/ft) From, To. Status of Well:  Test Hole,  Observation and/or Monitoring Hole.

Construction Record - Screen

Construction Record - Screen table with columns: Outside Diameter, Material, Slot No., Depth (m/ft) From, To.

Water Details

Hole Diameter

Water Details table with columns: Water found at Depth (m/ft), Kind of Water, Gas, Other. Hole Diameter table with columns: Depth (m/ft) From, To, Diameter (cm/in).

Well Contractor and Well Technician Information

Business Name of Well Contractor: Sfrata Drilling Group, Well Contractor's Licence No.: 12411, Business Address: 165 Shields Court, Municipality: Markham, Province: ON, Postal Code: L3R8V2, Business E-mail Address: sfrata@soil.com, Name of Well Technician: McEoy, JAME, Well Technician's Licence No.: 3655, Date Submitted: 2014/10/30

### Required Fees

Please don't hesitate to visit [the Historic Land Use Inventory website](#) more information. Fees must be paid in full at the time of application submission.

Planning Fee

\$125.00

### Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Infrastructure and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

**Disclaimer**  
**For use with HLUI Database**

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Paterson Group ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requester indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jun 30, 2020**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Jun 30, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Sep 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Dec 2019**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Sep 30, 2020**

**Drill Hole Database:**Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2019****Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020****Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Oct 31, 2020****Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Sep 30, 2020****Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Oct 31, 2020****Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2020****Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Apr 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2018**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Mar 31, 2020**

**National Energy Board Wells:**

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Sep 30, 2020**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011-Oct 31, 2020**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Sep 30, 2020**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2020**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jun 30, 2020**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Nov 2019**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Oct 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
