Phase I-Environmental Site Assessment

2046 and 2050 Scott Street
295, 297, 299 and 301 Ashton Avenue
Ottawa, Ontario

Prepared For

Scott Street Developments Inc.

April 24, 2020

Report: PE4892-1R

TABLE OF CONTENTS

List of Appendices

EXECUTIVE SUMMARY

Assessment

Paterson Group was retained by Scott Street Developments Inc. to conduct a Phase I-Environmental Site Assessment (ESA) for the properties addressed 2046 Scott Street, 2050 Scott Street and 295, 297 to 299 and 301 Ashton Avenue, in the City of Ottawa, Ontario. Together these properties comprise the Phase I Property. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and 250m Phase I Study Area, and to identify any environmental concerns with the potential to have impacted the subject land.

According to the historical research, the northern portion of the Phase I Property was first developed for residential purposes circa 1928, while the remainder of the site was vacant, undeveloped land. The northern portion of the Phase I Property, fronting onto Scott Street, was developed for commercial purposes in the 1950's. At this time, the southern portion of the Phase I Property, fronting onto Ashton Avenue, had been developed for residential purposes. According to a 1956 FIP, the property addressed 2050 Scott Street was occupied by an engine shop and Campbell's pump service station, with an underground storage tank (UST) depicted adjacent to the south of the building. The former uses of 2050 Scott Street and the presence of a UST were considered to be potentially contaminating activities (PCAs) resulting in areas of potential environmental concern (APECs) on the Phase I Property. Furthermore, impacted groundwater was identified on this property during a 2018 Phase II ESA conducted by others. No other concerns were identified with the historical use of the Phase I Property.

Based on available historical information, adjacent and neighbouring properties within the Phase I Study Area were developed with a combination of residential, commercial and industrial properties circa 1925. According to the 1956 FIP, a weigh scale and office were present adjacent to the east of the Phase I Property. Based on the limited information available regarding the operations at this property, it was considered to be a PCA resulting in an APEC on the subject land. A reported automotive service garage was present at the adjacent property to the west (323 Winona Avenue), prior to its redevelopment with a residential condominium. This property was also considered to represent an APEC on the Phase I Property.

Additional off-site historical PCAs identified within the Phase I Study Area were not considered to represent PCAs on the Phase I Property based on their separation distances and/or orientations relative to the subject land.

Following the historical research, site visits were conducted. The Phase I Property is currently occupied by an automotive service garage (Bob Peter's Garage) addressed 2046 Scott Street, commercial retail (Chinook Hot Tubs and Saunas) addressed 2050 Scott Street, and residential properties addressed 295, 297 to 299 and 301 Ashton Avenue. The current use of 2046 Scott Street as an automotive service garage is a PCA resulting in an APEC on the Phase I Property. Furthermore, petroleum hydrocarbon impacted soil was identified beneath the northeastern portion of the building during a previous Limited Phase II-ESA Update conducted by others, in addition to lead-impacted fill material. The presence of fill material is also considered to be a PCA resulting in an APEC on the Phase I Property. No other PCAs were identified on the Phase I Property at the time of the site visit.

The current uses of the adjacent and neighbouring properties within the Phase I Study Area include a combination of residential, commercial and community uses. No existing off-site PCAs were identified within the Phase I Study Area at the time of the site visit.

Based on the findings of the Phase I ESA, it is **our opinion that a Phase II-Environmental Site Assessment is required for the Phase I Property.**

Recommendations

Based on the age of the subject buildings addressed 2046 and 2050 Scott Street, potential asbestos containing materials (ACMs) observed include acoustic ceiling tiles and drywall joint compound. Lead-based paints may also be present on original or older painted surfaces beneath more recent coats of paint. Any previous PCB-containing ballasts are considered to have by now been replaced with PCB-free ballasts.

The residential properties on Ashton Avenue were constructed after 1980 at which time potentially hazardous building materials were phased out of use. As such, ACMs and LBPs are not expected to be present in these building structures.

It is our understanding that the subject buildings will be demolished in conjunction with future redevelopment. Prior to any demolition activities, a designated substance survey (DSS) must be conducted for each of the existing building structures, in accordance with Ontario Regulation 490/09 under the Occupational Health and Safety Act.

1.0 INTRODUCTION

At the request of Scott Street Developments Inc., Paterson Group (Paterson) conducted a Phase I-Environmental Site Assessment (Phase I-ESA) for the properties addressed 2046 and 2050 Scott Street, and 295, 297, 299 and 301 Ashton Avenue, in the City of Ottawa, Ontario. Together these properties comprise the Phase I Property. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and properties within the Phase I Study Area to identify any potentially contaminating activities (PCAs) that would result in areas of potential environmental concern (APECs) on the subject land.

Paterson was engaged to conduct this Phase I-ESA by Mr. Jakub Ulak with Scott Street Developments Inc., located at 88 Spadina Avenue, Ottawa, Ontario. Mr. Ulak can be reached by telephone at (613) 255-5507.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared in general accordance with Ontario Regulation (O.Reg.) 153/04, as amended, under the Environmental Protection Act, and complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

2.0 PHASE I PROPERTY INFORMATION

Address:	2046 and 2050 Scott Street, and 295, 297 to 299 and 301 Ashton Avenue, Ottawa, Ontario
Legal Description:	Lots 22, 23, 28, and 29 on Plan 184, RP5R-11217, in the City of Ottawa.
Location:	The Phase I Property, situated approximately 40m east of Winona Avenue, is bounded to the north and south by Scott Street and Ashton Avenue, in the City of Ottawa, Ontario. Refer to Figure 1 - Key Plan in the Figures section following the text.
Property Identification Numbers:	04020-0118 (2046 Scott Street); 04020-0117 (2050 Scott Street); 04020-0109 (295 Ashton Avenue); 04020-0263 and 04020-0264 (297-299 Ashton Avenue); and 04020-0111 (301 Ashton Avenue).
Latitude and Longitude:	45° 23’ 43.49" N, 75° 45' 13.46" W

Site Description:

Configuration:	Irregular
Area:	2,432 m^2 (approximate)
Zoning:	2046 and 2050 Scott Street: TM – Traditional Mainstreet, Mixed-use Zone; and 295 to 301 Ashton Avenue: R4G – Residential 4th Density
Current Use:	The northern portion of the Phase I Property (fronting onto Scott Street) is occupied by two (2) slab-on-grade commercial buildings. The southern portion of the Phase I Property (fronting onto Ashton Avenue) is occupied by three (3) residential buildings.
Services:	The Phase I Property is situated in a municipally serviced area.

3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject properties, and if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of O.Reg. 153/04, as amended, under the Environmental Protection Act, and in compliance with the requirements of CSA Z768-01;
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

4.0 RECORDS REVIEW

4.1 General

Phase I-ESA Study Area Determination

A radius of approximately 250m was determined to be appropriate as a Phase I Study Area for this assignment. Properties outside the 250m radius are not considered to have impacted the subject land, based on their significant distance from the site.

First Developed Use Determination

Based on the historical information available for review and for the purposes of this report, the Phase I Property is considered to have been first developed for residential use circa 1928.

Fire Insurance Plans

Fire Insurance Plans from 1956 were reviewed for the Phase I Property and surrounding lands within the Phase I Study Area. The FIPs depict the northern portion of the Phase I Property as occupied by two (2) commercial buildings: 2046 Scott Street (denoted as “farm supplies”) and 2050 Scott Street (denoted as “pump repair”). The FIPs also indicate the presence of an underground storage tank (UST) to the south of the original portion of the building addressed 2050 Scott Street. According to the FIPs, the southern portion of the Phase I Property was occupied by two (2) residential dwellings addressed 295 and 299 Ashton Avenue.

The former use of 2050 Scott Street and the historical presence of a UST represent potentially contaminating activities (PCAs) on the Phase I Property that are considered to result in areas of potential environmental concern (APECs).

According to the FIPs, surrounding land use within the Phase I Study area was a combination of residential, community, commercial and industrial. The immediately adjacent properties were occupied by a weigh scale and office as well as the Granite Curling Club to the east, a cabinet shop and show room to the west followed by Winona Avenue, Scott Street and the Canadian Pacific Railway main line to the north, and Ashton Avenue followed by residential dwellings to the south.

Off-site historical PCAs identified on properties within the Phase I Study Area are presented in Table 1.

Table 1: Phase I Study Area - Potentially Contaminating Activities 1956 Fire Insurance Plans

Address	Listed Activity	Approximate Distance / Orientation from Site	Result in an APEC on the Phase I Property (Yes/No)
Athlone Avenue			
306	Contractors yard	70m W	No
Churchill Avenue			
303	Industrial (paint shop, planing mill and asphalt manufacturing)	70m to 150m NW	No
305	Underground storage tank (UST)	130m NW	No
McCrae Avenue			
320	Automotive body repairs	240m E	No
Richmond Road			
255	Retail fuel outlet (1 UST) and automotive service garage	230m SE	No
277	Body shop	160m SE	No
Scott Street			
2040	Weigh-scale and office	15m E	Yes
2060	Retail fuel outlet (2 USTs)	80m W	No
2116	Storage shed with 1 UST	190m W	No
NA	Canadian Pacific Railway (CPR)	30m N	No
NA	CPR spur line and coal stoarage	50m N	No
Lanark Avenue			
250	Canadian Broadcasting Company	150m NE	No
Winona Avenue			
326	Automotive repair garage	55m W	No

Limited information is available regarding the nature of the operations on the adjacent property to the east, depicted as a weigh-scale and office on the 1956 FIP. Given its proximity to the Phase I Property it is considered to represent an APEC on the subject land.

No other off-site PCAs identified within the Phase I Study Area during the FIP review, are considered to represent APECs on the Phase I Property based on their respective separation distances and/or orientations relative to the subject land. It should be noted that the regional groundwater is considered to flow towards the north-northwest.

The aforementioned PCAs are shown on Drawing PE4892-2 – Surrounding Land Use Plan. Those that are considered to represent an APEC on the Phase I Property are highlighted in red, while those that are not considered to represent an APEC are shown in green. The resulting APECs on the Phase I Property are shown on Drawing PE4892-1 – Site Plan.

City of Ottawa Street Directories

City directories for the Phase I Property and neighbouring properties in the Phase I Study Area were reviewed in approximate ten (10) year intervals, between 1945 and 2011.

Based on the city directory review, the property addressed 2046 Scott Street was first listed 1961 as Davidson's Lawn & Garden Ltd. The property was later listed as the current tenant, Bob Peter's Garage, Ron Shane Limited and/or Kar Town from 1988/89 through 2011.

The property addressed 2050 Scott Street was first listed in 1961 as Simplex Sales & Distributors Auto Parts. This property was subsequently listed as James B. Equipment & Supplies (1968), Campbell's Pump Service Station and engine shop in 1979 and as the current tenant Chinook Hot Tubs & Saunas (1988/89 through 2011). The current and/or historical uses of the Scott Street properties are considered PCAs resulting in APECs on the Phase I Property.

The Ashton Avenue properties were first listed between 1942 and 1968. These addresses have always been listed as private individuals, indicating residential land use. No concerns were identified with the past use of the Ashton Avenue properties.

According to the directories, surrounding land use within the 250m study area consisted of a combination of residential, commercial, community and industrial uses. A variety of off-site PCAs were identified within the study area, many of which were identified in Table 1 in the previous section. No additional off-site PCAs identified were considered to result in an APEC on the Phase I Property.

As previously noted, off-site PCAs identified during the historical review are presented on Drawing PE4289-2 – Surrounding Land Use Plan.

Chain of Title

Paterson verified the current land title for the Phase I Property with Read Abstracts Limited. Based on the title search, the entire Phase I Property was originally owned by private individuals from 1869 through 1899, when Plan 184 was registered by John Falls. The land was subsequently sold in four (4) parcels to various individuals. At this time the parcels currently addressed 297-299 and 301 Ashton Avenue were one parcel. These lots were later separated in 1988.

The property addressed 2046 Scott Street was owned by private individuals through 1980 when it was purchased by Ron Shane Limited. The property addressed 2050 Scott Street was purchased by Harold Leppard operating as Ottawa Valley Pump Service in 1950. The current owners, 2662118 Ontario Inc. and 347313 Canada Inc. purchased the Scott Street properties in 2019.

According to the chain of title, the Ashton Street properties have always been owned by private individuals.

No PCAs, in addition to those previously discussed, were identified on the Phase I Property during the title search review.

Previous Environmental Reports

- ❒ "Limited Phase I and II Environmental Site Assessment Update, 2046 Scott Street, Ottawa, Ontario," prepared by Geofirma Engineering Ltd. (Geofirma) dated April 27, 2018.

Geofirma conducted a Limited Phase I-Phase II ESA in November of 2011. Based on the findings of the limited Phase I ESA, the property had been occupied by various automotive service garages since 1980. Prior to this time, the property was occupied by a farm equipment sales business. The adjacent site to the west was determined to have been used as a repair garage in the 1980s.

The 2011 Limited Phase II ESA was conducted to address the use of the site and adjacent site to the west as service garages, and consisted of the placement of six (6) boreholes across the property, two (2) of which were advanced into the bedrock to access the groundwater table and were completed as monitoring wells.

Soil and groundwater samples were submitted for analytical testing of benzene, toluene, ethylbenzene, and xylenes (BTEX), petroleum hydrocarbons (PHCs, F1-F4) and/or metals. Metal and PHC F3-F4 parameters identified in the soil were in compliance with the MECP Table 3 standards.

No BTEX or PHC parameters were identified in the groundwater samples submitted for analytical testing. Metal parameters identified were in compliance with the MECP Table 3 with the exception of cobalt concentration identified in one of the monitoring wells. A second groundwater sample was subsequently recovered and analysed for metals; all detected concentrations were in compliance with the MECP Table 3 standards. As such, no further investigative work was recommended and the monitoring wells were abandoned in accordance with O.Reg.903.

As part of the 2018 Limited Phase II-ESA Update, 10 boreholes were advanced across the property to depths ranging from approximately 1.2 to 3.5m below grade; boreholes were completed on bedrock or practical refusal to augering. Soil conditions encountered included fill material, followed by native till over bedrock. Brick and possible ash fragments were identified in the fill material as well as dark staining. No other visual or olfactory signs of potential contamination were observed. Eight (8) soil samples were submitted for analytical testing of BTEX, PHCs, volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs) and/or metals. No VOC or BTEX parameters were identified in any of the soil samples analysed. All parameters identified were in compliance with the MECP Table 3 standards with the exception of a lead concentration in the fill material south of the subject building, and a PHC F3 concentration in the soil beneath the northeastern portion of the subject building. Additional delineation and/or a soil remediation program was recommended.

- ❒ "Phase II Environmental Site Assessment, 2050 Scott Street, Ottawa, Ontario," prepared by Pinchin Ltd. dated December 20, 2018.

The Phase II ESA was reportedly carried out to address potential concerns identified during a previous Phase I ESA completed by Pinchin, including the historical use of the site and adjacent properties to the east and west as automotive service garages.

The Phase II ESA consisted of the placement of three (3) exterior boreholes and one (1) interior borehole on the eastern portion of the property. Each borehole was completed with a monitoring well installation; three (3) wells were installed in the overburden, while the fourth well was installed in the bedrock and screened from approximately 6 to 9m below grade.

Soil and groundwater samples were submitted for analytical testing of BTEX, VOCs, PHCs (F1-F4) and PAHs. Parameters identified in the soil samples analysed were in compliance with the MECP Table 3 standards, with the exception of PHC F1 and/or F2 concentrations identified at MW2 and MW4.

Concentrations of BTEX and PAH parameters were identified in the groundwater samples analysed, at levels below the MECP Table 3 standards. Concentrations of PHC F1, F2, F3 and/or hexane, exceeding the MECP Table 3 standards, were identified in the groundwater samples recovered from each monitoring well location.

Based on the findings of the Phase II ESA, additional delineation and/or remediation was recommended for the property.

Survey Plan

A topographic plan of survey for 2046 and 2050 Scott Street, prepared by Farley, Smith & Denis Surveying Limited, dated July 11, 2019, was reviewed as part of the Phase I ESA. The plan shows the Scott Street and Ashton Avenue properties in their current configurations. A copy of the topographic plan of survey is provided in Appendix 1.

4.2 Environmental Source Information

Environment Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on March 5, 2020. No records were found in the NPRI database for properties within the Phase I Study Area.

An ERIS (Environmental Risk Information Service) search was requested for the Phase I Property and properties within the Phase I Study Area. According to the ERIS search, the property addressed 250 Lanark Avenue (CBC Corporation was listed as an NPRI emitter in 2004 for the release of oxides (nitrogen), hydrofluorocarbon and sulphur dioxide. Based on the nature of the contaminant release and the location of this property approximately 150m NE of the Phase I Property, this site is not considered to represent an APEC on the Phase I Property. A copy of the ERIS report is provided in Appendix 2.

PCB Inventory

A search of national PCB waste storage sites was conducted. No PCB waste storage sites are located within the Phase I Study Area.

Areas of Natural Significance

A search for areas of natural significance and features within the Phase I Study Area was conducted on the website of the Ontario Ministry of Natural Resources (MNR) on March 5, 2020. The search did not reveal any areas of natural significance within the Phase I Study Area.

Ministry of the Environment, Conservation and Parks Freedom of Information Request

An ERIS search was requested in lieu of the Ministry of Environment, Conservation and Parks (MECP) Freedom of Information (FOI) request as part of this Phase I-ESA. A copy of the ERIS report is provided in Appendix 2.

MECP Instruments

An ERIS search was requested for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the Phase I Property and properties within the Phase I Study Area.

According to the ERIS report, a certificate of approval was issued to Bob Peter's Garage Inc. (2046 Scott Street) situated on the northeastern portion of the Phase I Property. The certificate was issued in 1996 for by-product emissions related to a waste oil furnace (model CB-1400). As noted previously the automotive service garage (including associated waste oil products) is considered to be an on-site PCA resulting in an APEC.

Eight (8) certificates of approval and three (3) environmental compliance approvals (ECAs) were issued for properties within the Phase I Study Area. The CAs and ECAs were issued for Municipal and Sewer Works. Based on the nature of these approvals, they are not considered to represent potentially contaminating activities.

No other certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments were identified for the Phase I Property or properties within the Phase I Study Area. A copy of the ERIS report is provided in Appendix 2.

MECP Waste Management Records

According to the ERIS report, no waste management records were found for the Phase I Property.

A total of 55 waste generator reports were identified for properties within the Phase I Study Area. Based on their respective separation distances (over 100m) relative to the Phase I Property, the reported waste generators are not considered to represent areas of potential environmental concern (APECs) on the subject land.

MECP Submissions

Based on a review of the ERIS report, no records pertaining to MECP submissions were identified for the Phase I Property or other properties within the Phase I Study Area.

MECP Incident Reports

According to the ERIS report one (1) environmental incident was reported for the Phase I Property: a release of natural gas at 2046 Scott Street. Based on the nature of the activity, it is not considered to be a potentially contaminating activity (PCA).

The ERIS report identified twelve (12) spill incidents/releases for properties within the Phase I Study Area. All incidents occurred on properties situated more than 50m from the Phase I Property. Based on the volume of the release (less than 10 L) and the nature of the release (natural gas) reported incidents were not considered to represent PCAs, with one exception: a spill record for the property addressed 2070 Scott Street.

According to the ERIS report, the spill record for 2070 Scott Street identifies the name of the business as Bob Peter's Garage, which is situated on the Phase I Property (2046 Scott Street). The report indicates an estimate of 136L of motor oil was released to the ground surface and catch basins were impacted. The historical and or current automotive service garages at each of these properties have been identified as PCAs as shown on Drawing PE4289-2 – Surrounding Land Use Plan. Based on the separation distance of 2070 Scott Street relative to the Phase I Property (over 50m) it is not considered to result in an APEC on the subject land. As previously discussed, the use of 2046 Scott Street as an automotive service garage represents an APEC on the Phase I Property.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted as part of this assessment for the Phase I Property and neighbouring properties within the Phase I Study Area.

No Records of Site Condition (RSCs) were filed for the Phase I Property. An RSC was filed for 309 Athlone Avenue, approximately 120m east of the subject land, by Paterson Group in 2006. Based on the information provided in the ESR and our files, this property is not considered to represent a PCA.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no active or closed waste disposal sites or former manufactured gas or coal tar distillation plants within the Phase I Study Area.

Technical Standards and Safety Authority (TSSA)

The TSSA, Fuels Safety Branch in Toronto was not contacted electronically to inquire about current and former underground storage tanks, spills and incidents for the site and neighbouring properties. Instead, an ERIS search was requested for reports pertaining to environmental incidents, orders, offences, spills and discharges of contaminants regarding the Phase I Property and properties within the Phase I Study Area.

No records pertaining to former or existing fuel storage tanks or fuel releases greater than 10L were identified for the Phase I Property or properties within the Phase I Study Area. As noted previously there is a discrepancy in the ERIS report which identifies at 136L release of used motor oil at 2070 Scott Street over 50m west of the Phase I Property. This property was identified as Bob Peter's garage which is situated on the Phase I Property. Both properties have been identified as PCAs.

ERIS Report

As noted above, an ERIS search was conducted for the Phase I Property and lands within the Phase I Study Area. Based on a review of the ERIS report, records considered to represent potentially contaminating activities are identified on Drawing PE4289-2 – Surrounding Land Use Plan. No new PCAs, in addition to those previously identified, are considered to represent APECs on the Phase I Property.

A copy of the ERIS report is provided in Appendix 2.

City of Ottawa Landfill Document

The document prepared by Golder Associates entitled "Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa", was reviewed. A former landfill site was identified approximately 200m to the east of the Phase I Property, along McRae Avenue.

Based on the age of the site (closed prior to 1940) and its distance from the subject land, this former landfill is not considered to represent an APEC on the Phase I Property.

Former Industrial Sites

The report entitled "Mapping and Assessment of Former Industrial Sites, City of Ottawa" by Intera Technologies Limited was also reviewed. The Intera report did not identify any former industrial sites within the Phase I Property, however the report identified the aforementioned landfill site. As noted above, the former landfill along McRae Avenue is not considered to represent an APEC on the Phase I Property.

City of Ottawa Historical Land Use Inventory (HLUI)

A request for a search of the City of Ottawa's Historical Land Use Inventory (HLUI) database was submitted to the City of Ottawa. A response had not been received at the time of issuing this report. A copy of the search results will be forwarded to the client upon receipt. A copy of the HLUI request form is provided in Appendix 2.

4.3 Physical Setting Sources

Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals. Based on the review, the following observations have been made:

1928 The Phase I Property is vacant with the exception of an apparent residential structure situated on the northwestern portion of the property. A path or road transects the southwestern portion of the site, leading to the building structure. The adjacent land to the north appears to be vacant, followed by a path or rudimentary roadway, and a railway line. Adjacent lands to the west and south appear to be occupied by residential dwellings, while the adjacent lands to the east are vacant.

1958 The northern portion of the Phase I Property has been redeveloped with two commercial buildings, while the southern portion of the site appears to be occupied by residential dwellings.

Scott Street has been constructed immediately north of the site, to the south of the previously noted railway line. The adjacent property to the east has been redeveloped with two buildings which appear to be commercial in nature. The adjacent lands to the west appear to have been developed for commercial (fronting Scott Street) and residential purposes (fronting Winona Avenue and Ashton Avenue). Additional residential development has occurred to the south, across Ashton Avenue.

1965 The Phase I Property and nearby properties appear to remain unchanged from the previous photograph.

1976 No significant changes appear to have been made to the Phase I Property. The smaller of the two commercial buildings previously noted on the adjacent property to the east is no longer present. The rail line further to the north of the Phase I Property appears to have been decommissioned.

1991 An addition appears to have been made to the south of the commercial building on the northwestern portion of the Phase I Property. The parcel of land occupying the southwestern portion of the Phase I Property (301 Ashton Avenue) appears to have been redeveloped, although it remains residential in nature. Otherwise no significant changes appear to have been made to the Phase I Property.

The adjacent land to the west, fronting onto Ashton Avenue, appears to have been redeveloped with a residential building. A transitway has been constructed to the north of Scott Street. No other significant changes appear to have been made to the adjacent and neighbouring properties.

1999 The parcel of land addressed 295 Ashton Avenue, situated on the southeastern portion of the Phase I Property, has been redeveloped with the existing residential building. Otherwise, the Phase I Property remains unchanged from the previous photograph. No significant changes appear to have been made to the immediately surrounding properties.

2002 The Phase I Property and neighbouring lands remain unchanged from the previous photograph.

2011 The Phase I Property appears to remain unchanged from the previous photograph. The adjacent property to the west, at the southeast corner of the intersection of Scott Street and Winona Avenue, has been redeveloped with a residential building. No other changes appear to have been made to the neighbouring lands.

2017 The Phase I Property and surrounding lands appear to remain unchanged from the previous photograph.

Laser copies of selected aerial photographs reviewed are included in Appendix 1.

Physiographic Maps

The Ontario Geological Survey publication 'The Physiography of Southern Ontario, Third Edition' was reviewed as a part of this assessment. According to the publication and attached mapping, the Phase I Property is situated within the Ottawa Valley Clay Plains physiographic region, described as "clay plains interrupted by ridges of rock or sand".

Topographic Maps

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. The topographic maps indicate that the regional topography in the general area of the Phase I Property slopes down towards the north-northwest. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Geological Maps

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock in the area of the site consists of interbedded limestone and dolomite of the Gull River Formation. Based on the maps, the surficial geology consists of plain till with an overburden thickness ranging from 2 to 3 m.

Water Well Records

A well record search was conducted on March 6, 2020 for all drilled wells within 250m of the Phase I Property. No potable well records were identified for the Phase I Property or for properties in the Phase I Study Areas.

Records of two (2) abandoned monitoring wells were identified for the Phase I Property (2046 Scott Street). No other well records were identified for the Phase I Property.

Well records were identified for the following properties within the Phase I Study Area: 475 Richmond Road, 309 Athlone Avenue, 320 Bloomfield Avenue and 250 Lanark Avenue. The well records were dated from 2005 to 2018. PCAs have been identified at these properties as shown on Drawing PE4289-2 – Surrounding Land Use Plan.

As previously discussed, these PCAs are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientation relative to the subject land.

Based on the monitoring well records the general stratigraphy in the area of the Phase I Property consists of fill material and/or sand and gravel followed by limestone bedrock. Bedrock was reportedly encountered at depths ranging from approximately 1.2 to 3.1m below grade. Static water levels were not recorded on the well records. A copy of the well records has been included in Appendix 2.

5.0 INTERVIEWS

Property Owner Representatives

295, 297, 299 and 301 Ashton Avenue

Property owner representatives for each of the Ashton Avenue properties were available for in-person interviews at the time of the site inspection conducted on March 9, 2020. To their knowledge, there are no potential environmental concerns on the subject parcels of land or the immediately adjacent properties. More specific details pertaining to the residential properties are discussed in Section 6.0.

2046 Scott Street

The owner of Bob Peter's Garage and current property tenant, Mr. Keith Park, was interviewed in-person at the time of the site inspection on March 11, 2020. Mr. Park has been the tenant and owner of Bob Peter's Garage since early 2018. Mr. Park indicated that on-site automotive service repairs are limited to oil changes, minor structural/carriage repairs and tire changes. New oil and waste oil are stored on site. Mr. Park is not aware of any potential environmental concerns other than those previously discussed.

2050 Scott Street

The owner of Chinook Hot Tubs and Saunas and current property tenant, Mr. Richard Bielawski, was interviewed in-person at the time of the site inspection on March 11, 2020. Mr. Bielawski has been the tenant and owner of Chinook Hot Tubs and Saunas since the late 1980s. Mr. Bielawski is not aware of any potential environmental concerns other than those previously discussed.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

Site visits were conducted on March 9 and March 11, 2020, by Ms. Mandy Witteman with the Environmental Department of Paterson Group. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were assessed at the time of the site visit from publicly accessible areas.

6.2 Specific Observations at the Phase I Property

Buildings and Structures

The parcel of land addressed 2046 Scott Street is occupied by a one-storey slab-on-grade building occupied by Bob Peter's Garage. The building, considered to have been constructed circa 1950, is of concrete block construction with exterior clad-metal siding and a flat, tar-and-gravel style roof. A small storage structure is present at the southeast corner of this parcel of land.

The parcel of land addressed 2050 Scott Street is also occupied by a one-storey slab-on-grade building occupied by Chinook Hot Tubs and Saunas). The building, considered to have been constructed circa 1950, is of concrete block construction with exterior clad-metal siding and a flat, tar-and-gravel style roof. A shipping container used for starage is situated to the southwest of the building.

The parcel of land addressed 295 Ashton Avenue is occupied by a three-storey residential apartment building with a full basement level. The building, constructed circa 1993-1994, has a poured concrete foundation and is finished on the exterior with red brick and vinyl siding. The roof is sloped and covered with asphaltic shingles.

The parcel of land addressed 297 to 299 Ashton Avenue is occupied by a three (3) storey residential duplex with a full basement level constructed circa 2018. The building has a poured concrete foundation and is finished on the exterior with wood and vinyl siding. The roof is sloped and covered with asphaltic shingles.

The property addressed 301 Ashton Avenue is occupied by a two (2) storey single-family dwelling with a full basement. The dwelling was constructed in 1988 with a poured concrete foundation and is finished on the exterior with brick, vinyl siding and a sloped roof covered with asphaltic shingles.

No other buildings or permanent structures are present on the Phase I Property.

Subsurface Structures and Utilities

The Phase I Property is situated in a municipally serviced area. Underground utility services on the subject land include natural gas, electricity, cable, water and sewer services. Services enter the Phase I Property from both Scott Street and Ashton Avenue.

No potable wells or private sewage systems were observed on the properties at the time of the site visit. Four (4) existing monitoring wells were observed at 2050 Scott Street and an oil-water separator was observed on the interior of 2046 Scott Street. No other subsurface structures were identified at the time of the site visit.

Site Features

The commercial building addressed 2046 Scott Street fronts onto Scott Street and occupies the northeastern portion of the Phase I Property. The remainder of the site is covered with asphaltic concrete. A small storage structure is situated at the southeast corner of this parcel of land, along with bins used to store domestic, non-hazardous waste and recycling. Tires were observed to be stored on the ground adjacent to the waste bins. Five (5) bins used to store oil filters were situated immediately south of the subject building, west of the bay door, along with a 200L drum and a 950L tote for the storage of waste oil. The bins, drum and tote were situated on a concrete slab. No other fuels or chemicals, or signs of underground storage tanks were observed on the exterior of the property at the time of the site visit.

The commercial building addressed 2050 Scott Street fronts onto Scott Street and occupies the northwestern portion of the Phase I Property. The remainder of the site is covered with asphaltic concrete. A shipping container used for storage is situated to the southwest of the building.

Waste bins used to store domestic, non-hazardous waste and recycling are present at the rear of the property. No aboveground storage tanks (ASTs) or evidence of underground storage tanks (USTs) or other fuels or chemicals were observed on the exterior of the property at the time of the site visit. Four (4) monitoring wells were observed at the time of the site visit; two (2) situated in the access laneway east of the subject building and one (1) situated to the south of the building. The fourth monitoring well was present on the interior of the building.

The residential properties fronting onto Ashton Avenue occupy the southern portion of the Phase I Property. The dwellings are centrally located on each parcel of land addressed 295, 297 to 299 and 301 Ashton Avenue. The remainder of the land is occupied by paved laneways (with a parking lot at the rear of 295 Ashton Avenue) and landscaped areas. Waste bins consisting of domestic, non-hazardous waste were stored at the rear of the 295 Ashton Avenue.

Site drainage typically occurs through sheet flow to catch basins located along Scott Street and Ashton Avenue with some infiltration occurring over the landscaped areas. The site is relatively flat and at the grade of Scott Street and Ashton Avenue. The regional topography slopes down to the north-northwest towards the Ottawa River, located approximately 550m west of the Phase I Property at its closest point. The groundwater is also expected to flow towards the north-northwest.

No signs of stressed vegetation, surficial staining or evidence of fill material were noted on the Phase I Property. It should be noted that the site was partially snow-covered at the time of the site visits. Site features are presented on Drawing PE4892-1 – Site Plan, provided in the Figures section following the text.

Interior Assessment

2046 Scott Street

The building addressed 2046 Scott Street (Bob Peter's Garage) is occupied by an office area and automotive service repair bays. A general description of the interior building finishes are as follows:

- ❒ Floors consist of poured concrete;
- ❒ Walls consist of concrete blocks with gysum board finish in the office area;
- ❒ Ceilings consist of unfinished steel decking, with acoustic ceiling tiles in the office area;
- ❒ Lighting is provided by fluorescent fixtures.

Heating is provided by a natural gas-fired suspended furnace and supplemental electrical baseboard heaters. Based on the historical review, heating was previously provided by a waste oil-fired furnace.

The garage consists of two (2) bays, both equipped with electrical hoists. Two (2) floor drains leading to an oil-water separator were observed in the garage. The drains were observed to be dry at the time of the site visit. As previously noted, Mr. Park indicated that automotive service repairs carried out on-site are limited to oil changes, transmission and brake flushes, tire replacement and wheel alignments.

No aboveground storage tanks (ASTs) or were observed on the interior of the garage. Five (5) 200L drums containing new or waste oil were observed on the interior of the garage, in addition to multiple containers (less than 10L) of motor oil, windshield waster fluid, brake fluid and transmission fluid in sealed containers properly stored on shelves. It should be noted that areas of staining were observed on the concrete floor throughout the garage. The concrete floor was in fair condition at the time of the site assessment, with some cracks and pitting observed.

Based on the age of the building (constructed in the 1950's) potential asbestos containing materials (ACMs) observed at the time of the site assessment include drywall joint compound and acoustic ceiling tiles. Lead-based paints (LBPs) may be present on older painted surfaces and beneath more recent coats of paint. Potential ACMs and LBPs were generally in good condition at the time of the site visit. It is considered likely that any polychlorinated biphenyl (PCB) – containing light ballasts would by now have been replaced by PCB-free ballasts.

2050 Scott Street

The building addressed 2050 Scott Street (Chinook Hot Tubs and Saunas) is occupied by a showroom for hot-tubs and custom-built saunas. A general description of the interior building finishes are as follows:

- ❒ Floors consist of carpet and poured concrete;
- ❒ Walls consist of concrete block and gypsum board;
- ❒ Ceilings are finished with suspended ceiling tiles;
- ❒ Lighting is provided by fluorescent fixtures.

The subject building is heated by electrical base-board heaters. No aboveground storage tanks (ASTs) or signs of underground storage tanks (USTs) were observed on the interior of the property at the time of the site visit.

Chlorine and bromine (hot tub sanitizing chemicals) were properly stored in sealed containers (less than 10L in volume) on the interior of 2050 Scott Street. No concerns were noted with chemical storage on-site at the time of the visit.

Based on age of the building (constructed in the 1950's) potential asbestos containing materials (ACMs) observed at the time of the site assessment include drywall joint compound and acoustic ceiling tiles. Lead-based paints (LBPs) may be present on older painted surfaces and beneath more recent coats of paint. Potential ACMs and LBPs were generally in good condition at the time of the site visit. It is considered likely that any polychlorinated biphenyl (PCB) – containing light ballasts would by now have been replaced by PCB-free ballasts.

Ashton Avenue Residential Properties

The residential apartment building addressed 295 Ashton Avenue consists of residential apartment units, and common areas in the basement. A general description of the building interior is as follows:

- Floors consist of a combination of ceramic tile, carpet, hardwood and poured concrete;
- The walls consist of gypsum board and poured concrete;
- The ceilings consist of gypsum board, some of which were finished with stipple plaster;
- Lighting throughout the building is provided by incandescent and fluorescent fixtures.

The subject building is heated by electrical baseboards. No ASTs or evidence of USTs or other fuels or chemicals (other than common household chemicals) were observed at the time of the site visit.

Based on the age of the building (constructed circa 1994), ACMs, LBPs and PCBs are not expected to be present.

A general description of the interior of the residential duplex addressed 297 to 299 Ashton Avenue is as follows:

- The floors throughout the building consist of a combination of hardwood, ceramic tiles, carpet and poured concrete;
- The walls consist of gypsum board and poured concrete;
- The ceilings consist of gypsum board;
- Lighting throughout the building is provided by incandescent fixtures.

The subject building is heated with natural gas fired equipment. No ASTs or evidence of USTs or other fuels or chemicals (other than common household chemicals) were observed at the time of the site visit.

Based on the age of the building (constructed circa 2018), ACMs and LBPs are not expected to be present.

A general description of the single-family dwelling addressed 301 Ashton Avenue is as follows:

- The floors throughout the building consist of a combination of hardwood, ceramic tiles, carpet and poured concrete;
- The walls consist of gypsum board and concrete;
- The ceilings consist of a combination of gypsum board, stipple plaster finish and acoustic ceiling tiles;
- Lighting throughout the building is provided by incandescent fixtures.

The subject building is heated with natural gas fired equipment. No floor drains or sump pits were observed at the time of the site visit. No ASTs or evidence of USTs or other fuels or chemicals (other than common household chemicals) were observed at the time of the site visit.

Based on the age of the building (constructed circa 1988), ACMs and LBPs are not expected to be present.

Fuel and Chemical Storage

The subject buildings are heated with either natural gas-fired equipment and/or electrical baseboard heaters. No ASTs or evidence of USTs were observed on the Phase I Property at the time of the site visit.

Five (5) 200L drums containing new or waste oil were observed on the interior of the automotive service garage at 2046 Scott Street, in addition to multiple containers (less than 10L in volume) of various motor oils, washer fluid, brake fluid and transmission oil. Areas of staining were noted on the concrete floor throughout the garage at the time of the site visit. The concrete floor was observed to be in fair condition, with some cracks and pitting noted at the time of the site visit.

A 200L drum and 950L tote containing waste motor oil were observed on the exterior of this property, situated on a concrete slab. No obvious signs of staining were observed on the exterior of the property around the waste oil storage area; it should be noted that this portion of the property was partially covered with snow and ice at the time of the site visit. The waste oil is reportedly collected and disposed off-site by a licenced contractor as needed.

Chlorine and bromine, hot tub sanitizing chemicals, were properly stored in sealed containers (approximately 20L in volume) on the interior of 2050 Scott Street. No other fuels or chemicals were observed on this property at the time of the site visit.

No chemicals, with the exception of common household cleaning and maintenance chemicals, were observed on the Ashton Avenue residential properties.

Wastewater Discharge

Wastewater discharged from the Phase I Property includes wash water and sewage. Several floor drains were observed on the interior of each of the subject structures. All drains appeared to be dry at the time of the site visit.

The floor drains within the automotive service garage at 2046 Scott Street were reported to lead to an oil-water separator and ultimately drain to the municipal sewer system. According to the property owner, the oil-water separator is cleaned out by a licenced contractor on an as-needed basis.

Waste Management

Non-hazardous waste and recycling are stored in bins on the south side of the Scott Street properties and collected by a licensed contractor on a regular basis. Tires, waste oil and filters stored at 2046 Scott Street are collected and disposed off-site by contractors licenced for these works, on an as-needed basis.

Non-hazardous waste and recycling produced by the residential properties on Ashton Avenue are collected curbside by a licenced contractor on a regular basis.

Neighbouring Properties

An inspection of the neighbouring properties was conducted from publicly accessible areas at the time of the site visits. Land use adjacent to the Phase I Property was as follows:

- North - Scott Street, followed by the Ottawa Carleton Transit Way;
- South: Ashton Avenue, followed by residential;
- East: Community (Granite Curling Club) followed by residential; and
- West: Residential followed by Winona Avenue.

Land use within the Phase I Study is primarily residential with some commercial and community land use.

No concerns were identified with the current use of the surrounding lands. Surrounding land use within the Phase I Study Area is presented on Drawing PE4892-2 – Surrounding Land Use Plan.

6.3 Enhanced Investigation Area

Operations at the Property, Including Processing or Manufacturing

The property addressed 2046 Scott Street, which occupies the northeastern portion of the Phase I Property, has been operated as an automotive service garage since the 1980's. The current tenant, Mr. Keith Park, indicated that he is unfamiliar with historical operations at the site, however current repair services include suspension, undercarriage and brake repair, as well as oil changes, tire changes and wheel replacements, and transmission and brake flushes.

Hazardous Materials Used or Stored at the Phase I Property

As previously noted, five (5) 200L drums of new or waste oil were observed on the interior of the automotive service garage at 2046 Scott Street, in addition to multiple containers (less than 10L in volume) of various motor oils, washer fluid, brake fluid and transmission oil. Areas of staining were noted on the concrete floor throughout the garage at the time of the site visit. The concrete floor was observed to be in fair condition, with some cracks and pitting noted at the time of the site visit.

A 200L drum and 950L tote containing waste motor oil were observed on the exterior of this property, situated on a concrete slab. No obvious signs of staining were observed on the exterior of the property around the waste oil storage area; it should be noted that this portion of the property was partially covered with snow and ice at the time of the site visit. The waste oil is reportedly collected and disposed off-site by a licenced contractor as needed.

Chlorine and bromine, hot tub sanitizing chemicals, were properly stored in sealed containers (less than 10L in volume) on the interior of 2050 Scott Street. No other fuels or chemicals were observed on this property at the time of the site visit.

Products Manufactured at the Phase I Property

No products are manufactured at the Phase I Property.

By-Products and Waste at the Phase I Property

A 200L drum containing waste oil was observed on the interior of the property. Staining as observed on the concrete floor in the vicinity of the waste oil and new oil storage area. A 200L drum and 950L tote containing waste motor oil were observed on the exterior of this property, situated on a concrete slab. No obvious signs of staining were observed on the exterior of the property around the waste oil storage area; it should be noted that this portion of the property was partially covered with snow and ice at the time of the site visit. The waste oil is reportedly collected and disposed off-site by a licenced contractor as needed.

Tires, waste oil drum/tote and filters stored at 2046 Scott Street are collected and disposed off-site by contractors licenced for these works, on an as-needed basis. It should be noted that the waste oil drum/tote and filter containers are situated on a concrete slab.

Raw Materials Handling and Storage Locations at the Phase I Property

No raw materials are handled or stored on the Phase I Property.

Details of Drums, Totes and Bins at the Phase I Property

As previously noted, 5-200L drums of new oil and waste oil are present on the Phase I Property within the automotive service garage at 2046 Scott Street. A 200L drum and 950L tote containing waste motor oil were observed on the exterior of this property, situated on a concrete slab. Five bins containing used filters are also present on the exterior of 2046 Scott Street. No other drums, bins or totes were observed at the time of the site visit.

Details of Oil-Water Separators at the Phase I Property

The floor drains within the automotive service garage at 2046 Scott Street were reported to lead to an oil-water separator and ultimately drain to the municipal sewer system. According to the property owner, the oil-water separator is cleaned out by a licenced contractor on an as-needed basis.

The approximate location of the oil-water separator is shown on Drawing PE4289-1 – Site Plan. The date of installation is unknown.

Vehicle and Equipment Maintenance Areas at the Phase I Property

The automotive service garage, which occupies the majority of the subject building addressed 2046 Scott Street, consists of two (2) service bays, each equipped with an electric hoist. The approximate locations of the vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage and waste storage areas are shown on Drawing PE4289-1 – Site Plan.

Spills at the Phase I Property

Based on the historical review, interviews and site visit, no records of spills were identified. As noted previously a spill of 136L of motor oil was identified in the ERIS report at “Bob Peter’s Garage”, however the address provided was 2070 Scott Street, which was also a former automotive service garage. The location of the spill incident was not confirmed.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Land Use History

The following table outlines the current and past uses of the Phase I Property.

Table 2. Land Use History

Time Period	Name of Owner	Property Use	Description of Property Use	Other Observations from Aerial Photos, FIPs, etc.
Part of Lot 31, Con 1 OF. Nepean				
1869-1878	Richard Birch	Unknown	Agricultural or Other	No information available for this time period.
1878-1890	Patrick G. Lang	Unknown	Agricultural or Other	No information available for this time period.
1890-1906	John Falls	Unknown	Agricultural or Other	Plan 184 registered Mary 30, 1899 by John Falls – Chain of Title.
Lot 22 (PIN 0109) – 295 Ashton Avenue				
1906-1909	Alfred Day	Unknown	Agricultural or Other	No information available for this time period.
1909-1910	George Hall	Unknown	Agricultural or Other	No information available for this time period.
1910-1912	Fred Davis	Unknown	Agricultural or Other	No information available for this time period.
1912-1916	Thomas Ringrose	Unknown	Agricultural or Other	No information available for this time period.
1916-1921	Geoffrey Randales	Unknown	Agricultural or Other	No information available for this time period.
1921-1928	William West Well	Vacant, undeveloped land	Agricultural or Other	Based on 1928 aerial photograph this parcel of the Phase I Property is vacant.
1928-1956	Florence Dyer	Residential	Residential	First listed in 1942 City Directory as John Young
1956-1988	John J. Young	Residential	Residential	Residential dwelling present observed in 1958, 1965, 1976 aerial photographs.
1988-1991	Katherine Gunn	Residential	Residential	No change in land use in 1991 aerial.
1991-2013	E.George Brown Holdings Limited	Residential	Residential	1999 aerial shows existing residential apartment building
2013-present	Jason Winters	Residential	Residential	No changes noted in 2002, 2010, 2017 aerial photographs.
Lot 22 (PIN 2063, 2064, 0111) – 297-299 and 301 Ashton Avenue				
1906-1909	Alfred Day	Unknown	Agricultural or Other	No information available for this time period.
1909-1910	George Hall	Unknown	Agricultural or Other	No information available for this time period.
1910-1914	Fred Davis	Unknown	Agricultural or Other	No information available for this time period.

Table 2. Land Use History

Time Period	Name of Owner	Property Use	Description of Property Use	Other Observations from Aerial Photos, FIPs, etc.
1914-1933	Robert Lamb	Vacant, undeveloped land	Agricultural or Other	Vacant based on 1928 aerial with exception of path or roadway leading to 2050 Scott Street.
1933-1944	Catherine Lamb	Residential	Residential	First listed in 1945 directory as residential.
1944-1949	J. Russell Belway	Residential	Residential	First listed in 1945 directory as residential.
1949-1951	Emmanuel Parent	Residential	Residential	First listed in 1945 directory as residential.
1951-1967	Julia Yade	Residential	Residential	1956 FIP and 1958, 1965 aerials depict residential dwelling.
1967-1972	John J. and Myrtle F. Young	Residential	Residential	Listed as residential in 1968 directory.
1972-1981	Ranee G. and Phyllis M. Miller	Residential	Residential	No changes to land use based on 1976 aerial.
1981-1985	Douglas and Brenda Oliver	Residential	Residential	No information for this time period.
1985-1990 (2063, 2064) 1985-1998	James Flinter	Residential	Residential	No changes based on city directories and 1991 aerial photograph.
Lot 22 (PIN 2063, 2064– 297-299 Ashton Avenue				
1990-2017	Judith Margaret Cowan	Residential	Residential	No changes based on city directories and 1999, 2002, 2010 and 2017 aerial photographs.
2017- present	Robert and Natalie Mariani	Residential	Residential	Property redeveloped with a residential duplex circa 2018 based on site visit and interviews.
Lot 22 (PIN 0111) –301 Aston Avenue				
1988-1994	Richard and Linda Hoekstra	Residential	Residential	Parcel formerly occupied by outbuilding formerly associated with 295-297 Ashton Avenue, has been developed with a single-family residential dwelling.
1994-2001	Rayman and Jolene Palmer	Residential	Residential	301 Ashton Avenue listed in 2001/02 City Directory. No change to land use in 1999 aerial.
2001-2010	Mark Levison	Residential	Residential	No changes noted in 2002 aerial.
2010-2015	Abdelrazek Shar Ghazali	Residential	Residential	No changes noted in 2010 aerial.

Table 2. Land Use History

Time Period	Name of Owner	Property Use	Description of Property Use	Other Observations from Aerial Photos, FIPs, etc.
2015-present	Francis Conliffe and Veeran-Anne	Residential	Residential	No changes noted in 2017 aerial or during site visit.

2002-2006	James Edward Devine			
2006-2010	Khalid Ben Hassan			
2010-2012	Lukus Abraham	Automotive service garage	Commercial	Listed as Safe Auto Repair and Kar Town in 2011 city directory
2012-2019	Bob Peter's Garage	Automotive service garage	Commercial	No change to land use in 2017 aerial.
2019-present	2662118 Ontario Inc.	Automotive service garage	Commercial	Bob Peter's Garage present at time of site visit.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

Based on the findings of the historical review, in combination with personal interviews and site visits, three (3) on-site and two (2) off-site potentially contaminating activities (PCA) as listed in Column A, Table 2 of O.Reg. 153/04 as amended, were considered to result in six (6) APECs on the Phase I Property:

- PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks – this PCA is associated with a former UST situated south of the building addressed 2050 Scott Street on the northwestern portion of the Phase I Property (APEC 3);

- PCA 30 – Importation of Fill Material of Unknown Quality – this PCA is associated with fill material identified at 2046 and 2050 Scott Street, on the northern portion of the Phase I Property, during previous subsurface investigations (APEC 4);

- PCA 52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems – this PCA is associated with a current automotive service garage at 2046 Scott Street on the northeastern portion of the Phase I Property (APEC 1); a former engine shop and "Campbell's pump service station" at 2050 Scott Street on the northwestern portion of the Phase I Property (APEC 2); and a reported former off-site automotive service garage at 323 Winona Avenue (APEC 6).

Although not defined in Table 2 of O.Reg. 153/04, an additional off-site PCA was considered to result in an APEC on the Phase I Property:

- A former weigh-scale was depicted on the adjacent property to the east on the 1956 FIP and a 1965 aerial photograph. Based on the limited information available and unknown nature of the activity in combination with its close proximity to the site, it has been identified as a PCA resulting in APEC 5.

The aforementioned APECs are identified on Drawing PE4892-1 – Site Plan.

The aforementioned PCAs are identified in red on Drawing PE4892-2 – Surrounding Land Use Plan. Additional PCAs identified within the Phase I Study Area and not considered to result in an APEC on the Phase I Property based on their separation distances and/or orientations relative to the subject land, are identified in green on Drawing PE4892-4– Surrounding Land Use Plan.

Contaminants of Potential Concern

Based on the APECs identified on the Phase I Property, the contaminants of potential concern (CPCs) in the soil and/or groundwater beneath the subject land include the following:

- Benzene, ethylbenzene, toluene and xylenes (BTEX);
- Petroleum hydrocarbons (PHCs, Fractions F1-F4);
- Volatile organic compounds (VOCs);
- Polycylcic Aromatic Hydrocarbons (PAHs);
- Metals (including Arsenic, Antimony and Selenium (As, Sb,Se));
- Mercury (Hg); and

- Hexavalent Chromium (CrVI).

7.2 Conceptual Site Model

Geological and Hydrogeological Setting

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock in the area of the site consists of interbedded limestone and dolomite of the Gull River Formation. Based on the maps, the surficial geology consists of plain till with an overburden thickness ranging from 2 to 3 m. The geological setting reported by NRCAN is supported by the findings of previous subsurface investigations.

Based on regional topography, the location of the Ottawa River approximately 530m to the west of the Phase I Property at its closest point, and our knowledge of the Ottawa area, the groundwater flow in the vicinity of the Phase I Property is expected to be to the northwest.

Fill Placement

No evidence of fill placement was observed at the time of the site visit. Based on the findings of a previous subsurface investigation, lead-impacted fill material was identified at 2046 Scott Street. The impacted fill material is expected to be associated with material imported for grading purposes during construction.

Water Bodies and Areas of Natural Significance

No areas of natural significance or water bodies were identified on the Phase I Property or within the Phase I Study Area.

Drinking Water Wells

There are no potable water wells on the Phase I Property or within the Phase I Study Area.

Monitoring Wells

Records of two (2) abandoned monitoring wells were identified for the Phase I Property (2046 Scott Street). No other well records were identified for the Phase I Property, although four (4) monitoring wells were observed on the property addressed 2050 Scott Street at the time of the site visit.

Well records were identified for the following properties within the Phase I Study Area: 475 Richmond Road, 309 Athlone Avenue, 320 Bloomfield Avenue and 250 Lanark Avenue. The well records were dated from 2005 to 2018. PCAs have been identified at these properties as shown on Drawing PE4289-2 – Surrounding Land Use Plan. As previously discussed, they are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientation relative to the subject land.

Based on the monitoring well records the general stratigraphy in the area of the Phase I Property consists of fill material and/or sand and gravel followed by limestone bedrock. Bedrock was reportedly encountered at depths ranging from approximately 1.2 to 3.1m below grade. Static water levels were not recorded on the well records. A copy of the well records has been included in Appendix 2.

Existing Buildings and Structures

The parcel of land addressed 2046 Scott Street is occupied by a one-storey slab-on-grade building occupied by Bob Peter's Garage. The building, considered to have been constructed in the 1950's, is of concrete block construction with exterior clad-metal siding and a flat, tar-and-gravel style roof. A small storage structure is present at the southeast corner of this parcel of land.

The parcel of land addressed 2050 Scott Street is also occupied by a one-storey slab-on-grade building occupied by Chinook Hot Tubs and Saunas). The building, considered to have been constructed in the 1950's, is of concrete block construction with exterior clad-metal siding and a flat, tar-and-gravel style roof. A small storage shed is situated to the southwest of the building.

The parcel of land addressed 295 Ashton Avenue is occupied by a three-storey residential apartment building with a full basement level. The building, constructed circa 1993-1994, has a poured concrete foundation and is finished on the exterior with red brick and vinyl siding. The roof is sloped and covered with asphaltic shingles.

The parcel of land addressed 297 to 299 Ashton Avenue is occupied by a three (3) storey residential duplex with a full basement level constructed circa 2018. The building has a poured concrete foundation and is finished on the exterior with wood and vinyl siding. The roof is sloped and covered with asphaltic shingles.

The property addressed 301 Ashton Avenue is occupied by a two (2) storey single-family dwelling with a full basement. The dwelling was constructed in 1988 with a poured concrete foundation and is finished on the exterior with brick, vinyl siding and a sloped roof covered with asphaltic shingles.

The buildings are heated with natural gas-fired equipment and/or electrical baseboard heaters. No other buildings or permanent structures are present on the Phase I Property.

Subsurface Structures and Utilities

The Phase I Property is situated in a municipally serviced area. Underground utility services on the subject land include natural gas, electricity, cable, water and sewer services. Services enter the Phase I Property from both Scott Street and Ashton Avenue.

No potable wells or private sewage systems were observed on the properties at the time of the site visit. As noted above, four (4) existing monitoring wells were observed at 2050 Scott Street and an oil-water separator was observed on the interior of 2046 Scott Street. No other subsurface structures were identified at the time of the site visit.

Based on the findings of previous subsurface investigations conducted by others, groundwater was present at shallow depths within the overburden, and at deeper depths within the bedrock. Based on the depth of standard service trenches, underground services may have the potential to create preferential pathways for contaminant migration.

Neighbouring Land Use

Neighbouring land use in the Phase I Study Area consists of a combination of residential, commercial (offices and retail) and community (Granite Curling Club, parks).

Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of this report, three (3) on-site and two (2) off-site PCAs are considered to result in 6 APECs on the Phase I Property. The PCAs, APECs and associated contaminants of potential concern (CPCs) are summarized in the Table 3.

Table 3: Areas of Potential Environmental Concern

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
APEC 1: Resulting from automotive service garage at 2046 Scott Street	Northeastern portion of Phase I Property	PCA: 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	On-site	BTEX PHC (F1-F4) VOCs	Soil, Groundwater
APEC 2: Resulting from former engine shop and pump service station	Northwestern portion of Phase I Property	PCA: 52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	On-site	BTEX PHC (F1-F4) VOCs	Soil, Groundwater
APEC 3: Resulting from former underground storage tank and pump service station (UST)	Northeastern portion of the Phase I Property	PCA: 28 - Gasoline and Associated Products Storage in Fixed Tanks	On-site	BTEX PHC (F1-F4)	Soil, Groundwater
APEC 4: Resulting from fill material	Northern portion of Phase I Property	PCA: 30 - Importation of Fill Material of Unknown Quality	On-site	Metals As, Sb, Se, Hg, CrVI PAHs	Soil
APEC 5: Resulting from weigh scale on adjacent property to east	Northeastern portion of Phase I Property	PCA: Other – unknown operations in vicinity of former weigh-scale on adjacent property to the east	Off-site	BTEX PHC (F1-F4)	Groundwater

Table 3: Areas of Potential Environmental Concern

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
APEC 6: Resulting from reported former automotive service garage on adjacent property to the west	Northwestern portion of the Phase I Property	PCA: 52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Off-site	BTEX PHC (F1-F4) VOC	Groundwater

As previously discussed in Section 7.1 and shown in green on Drawing PE4892-2-Surrouding Land Use Plan, additional off-site PCAs were identified within the Phase I Study Area. Based on their separation distances and/or orientations relative to the Phase I Property, they are not considered to represent APECs on the subject land.

Contaminants of Potential Concern

As per Section 7.1 and Table 3, contaminants of potential concern (CPCs) in the soil and/or groundwater beneath the Phase I Property include the following:

- ❒ Benzene, ethylbenzene, toluene and xylenes (BTEX);
- ❒ Petroleum hydrocarbons (PHCs, Fractions F1-F4);
- ❒ Volatile organic compounds (VOCs);
- ❒ Polycylcic Aromatic Hydrocarbons (PAHs);
- ❒ Metals (including Arsenic, Antimony and Selenium (As, Sb,Se));
- ❒ Mercury (Hg); and
- ❒ Hexavalent Chromium (CrVI).

Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I- ESA is considered to be sufficient to conclude that there are historical on-site and off-site PCAs that have resulted in APECs on the Phase I Property. Additional off-site PCAs identified within the study area are not considered to represent APECs on the Phase I Properties based on their separation distances and/or orientations relative to the subject land.

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

8.0 CONCLUSIONS

8.1 Assessment

Paterson Group was retained by Scott Street Developments Inc. to conduct a Phase I-Environmental Site Assessment (ESA) for the properties addressed 2046 Scott Street, 2050 Scott Street and 295, 297 to 299 and 301 Ashton Avenue, in the City of Ottawa, Ontario. Together these properties comprise the Phase I Property. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and 250m Phase I Study Area, and to identify any environmental concerns with the potential to have impacted the subject land.

According to the historical research, the northern portion of the Phase I Property was first developed for residential purposes circa 1928, while the remainder of the site was vacant, undeveloped land. The northern portion of the Phase I Property, fronting onto Scott Street, was developed for commercial purposes in the 1950's. At this time, the southern portion of the Phase I Property, fronting onto Ashton Avenue, had been developed for residential purposes. According to a 1956 FIP, the property addressed 2050 Scott Street was occupied by an engine shop and Campbell's pump service station, with an underground storage tank (UST) depicted adjacent to the south of the building. The former uses of 2050 Scott Street and the presence of a UST were considered to be potentially contaminating activities (PCAs) resulting in areas of potential environmental concern (APECs) on the Phase I Property. Furthermore, impacted groundwater was identified on this property during a 2018 Phase II ESA conducted by others. No other concerns were identified with the historical use of the Phase I Property.

Based on available historical information, adjacent and neighbouring properties within the Phase I Study Area were developed with a combination of residential, commercial and industrial properties circa 1925. According to the 1956 FIP, a weigh scale and office were present adjacent to the east of the Phase I Property. Based on the limited information available regarding the operations at this property, it was considered to be a PCA resulting in an APEC on the subject land. A reported automotive service garage was present at the adjacent property to the west (323 Winona Avenue), prior to its redevelopment with a residential condominium. This property was also considered to represent an APEC on the Phase I Property.

Additional off-site historical PCAs identified within the Phase I Study Area were not considered to represent PCAs on the Phase I Property based on their separation distances and/or orientations relative to the subject land.

Following the historical research, site visits were conducted. The Phase I Property is currently occupied by an automotive service garage (Bob Peter's Garage) addressed 2046 Scott Street, commercial retail (Chinook Hot Tubs and Saunas) addressed 2050 Scott Street, and residential properties addressed 295, 297 to 299 and 301 Ashton Avenue. The current use of 2046 Scott Street as an automotive service garage is a PCA resulting in an APEC on the Phase I Property. Furthermore, petroleum hydrocarbon impacted soil was identified beneath the northeastern portion of the building during a previous Limited Phase II-ESA Update conducted by others, in addition to lead-impacted fill material. The presence of fill material is also considered to be a PCA resulting in an APEC on the Phase I Property. No other PCAs were identified on the Phase I Property at the time of the site visit.

The current uses of the adjacent and neighbouring properties within the Phase I Study Area include a combination of residential, commercial and community uses. No existing off-site PCAs were identified within the Phase I Study Area at the time of the site visit.

Based on the findings of the Phase I ESA, it is **our opinion that a Phase II-Environmental Site Assessment is required for the Phase I Property.**

8.2 Recommendations

Based on the age of the subject buildings addressed 2046 and 2050 Scott Street, potential asbestos containing materials (ACMs) observed include acoustic ceiling tiles and drywall joint compound. Lead-based paints may also be present on original or older painted surfaces beneath more recent coats of paint. Any previous PCB-containing ballasts are considered to have by now been replaced with PCB-free ballasts.

The residential properties on Ashton Avenue were constructed after 1980 at which time potentially hazardous building materials were phased out of use. As such, ACMs and LBPs are not expected to be present in these building structures.

It is our understanding that the subject buildings will be demolished in conjunction with future redevelopment. Prior to any demolition activities, a designated substance survey (DSS) must be conducted for each of the existing building structures, in accordance with Ontario Regulation 490/09 under the Occupational Health and Safety Act.

9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Scott Street Developments Inc. Permission and notification from Scott Street Developments Inc. and Paterson will be required to release this report to any other party.

Paterson Group Inc.

TOPO 2X36

TOPOGRAPHIC PLAN OF SURVEY OF

LOTS 28 AND 29
REGISTERED PLAN 184
CITY OF OTTAWA

FARLEY, SMITH & DENIS SURVEYING LTD. 2019

Scale 1: 200

0 2.5 5 10 15 20 metres

Metric Note

Distances and coordinates on this plan are in metres and can be converted to feet by dividing by 0.3048.

Distance Note

Distances shown on this plan are ground distances and can be converted to grid distances by multiplying by the combined scale factor of 0.99994.

Bearing Note

Bearings hereon are grid bearings derived from the easterly limit of Winona Avenue having a bearing of N 23° 46' 30" W as shown on Ottawa Carleton Standard Condominium Plan No. 865 and are referred to the Central Meridian of MTM Zone 9 (76°30' West Longitude) Nad-83 (Original).

For bearing comparisons, a rotation of 0°34'25" (counter-clockwise) was applied to bearings on P4 and a rotation of 0°45'30" (counter-clockwise) was applied to bearings on P1, P5, P6, P7 and P8.

Elevation Notes

1. Elevations shown are geodetic and are referred to Geodetic Datum CGVD-1928 :1978. (FMW Ref.No.2-184NP).

2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that it's relative elevation and description agrees with the information shown on this drawing.

Utility Notes

1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
2. Only visible surface utilities were located.
3. Underground utility data derived from City of Ottawa utility sheet reference: E-04-04 and as-built drawings 15350 p18 and 15350 p19.
4. Sanitary and storm sewer grades and inverts were compiled from City of Ottawa as-built drawings 15350 p18 and 15350 p19/ field measurements.
5. A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating etc.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2020

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Chemical Register: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Nov 2019

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2019

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jan 31, 2020

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jan 31, 2020

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jan 31, 2020

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jan 31, 2020

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2020

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2018

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Nov 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FED TANKS

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jan 31, 2020

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2019

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2019

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2019

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jan 31, 2020

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Jan 2020

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jan 31, 2020

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2020

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2020

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2019

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jan 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX 3

QUALIFICATIONS OF ASSESSORS

Mandy Witteman, B.Eng., M.A.Sc.

POSITION

Intermediate Environmental Engineer

EDUCATION

Carleton University
M.A.Sc., Environmental Engineering, 2013
B.Eng., Environmental Engineering, 2008

MEMBERSHIPS & AWARDS

Ontario Professional Engineers Association (EIT)
NSERC Industry R&D Scholarship

EXPERIENCE

2018 – Present
Paterson Group Inc.
Consulting Engineers
Geotechnical and Environmental Division
Environmental Engineer

2014 – 2015
Thurber Engineering Limited
Oil Sand Tailings Group
Tailings Engineer

2009 – 2014
Carleton University
Department of Civil & Environmental Engineering
Research Engineer, Research Assistant & Teaching Assistant

2008 – 2009
SLR Consulting Limited
Contaminated Sites
Junior Environmental Engineer

SELECTED LIST OF PROJECTS

Phase I & II Environmental Site Assessments – NRC, Kingston
Remediation – National Capital Region, Saskatchewan
Multi-lift and dry-stacking pilot programs – Northern Alberta
Polymer amended oil sand tailings – Northern Alberta
Hydraulic cut-off wall – Allen, Saskatchewan
Cemented paste backfill systems – Northern Ontario

Karyn Munch, P.ENG.

patersongroup

Geotechnical Engineering

Environmental Engineering

Hydrogeology

Geological Engineering

Materials Testing

Building Science

Archaeological Services

POSITION

Intermediate Environmental Engineer

EDUCATION

Carleton University, B.Eng. 2002
Environmental Engineering

MEMBERSHIPS AND AWARDS

Professional Engineers of Ontario
Ottawa Geotechnical Society

EXPERIENCE

2011-present
Paterson Group Inc.
Consulting Engineers
Geotechnical and Environmental Division
Intermediate Engineer

2009-2010
Department of Indian and Northern Affairs
Contaminated Sites Division
Environment Officer (PC-02)

2003 to 2009
Paterson Group Inc.
Consulting Engineers
Geotechnical and Environmental Division
Intermediate Engineer

2002 to 2003
Dessau Soprin Inc.
Consulting Engineers
Environmental Division
Junior Engineer

SELECT LIST OF PROJECTS

Billings-Hurdman Interconnect Watermain - Ottawa
Telus Building Remediation - Ottawa
Block D Lands Remediation and Redevelopment – Kingston
Gladstone Avenue Reconstruction - Ottawa
Lees Avenue Coal Tar Site - City of Ottawa
Nortel Networks Environmental Monitoring Program
3W Zone Feedermain – Ottawa
Bank Street Reconstruction – Ottawa
Lees Avenue Remediation Program – Ottawa
Colonnade Road North Development – Ottawa
Montreal Road Reconstruction – Ottawa
Designated Substance Surveys – Residential and Commercial Sites - Ottawa
Phase I & II Environmental Site Assessments – Residential, Commercial and Industrial Sites – Ottawa (CSA Z768-01 and O.Reg 269/11)
Brownfields Applications and Records of Site Condition – Residential and Commercial Redevelopment
