## 1.0 EXECUTIVE SUMMARY

Pinchin Ltd. (Pinchin) was retained by Somerset and O'Connor Limited Partnership (Client) to complete a Phase One Environmental Site Assessment (Phase One ESA) of the property located at 311 Somerset Street West & 234 and 236 O'Connor Street in Ottawa, Ontario (hereafter referred to as the Site or Phase One Property). The Phase One Property is presently developed with vacant.

Pinchin conducted this Phase One ESA in accordance with Part VII and Schedule D of the Province of Ontario's *Environmental Protection Act R.S.O. 1990, c. E.19* and *Ontario Regulation 153/04: Records of Site Condition – Part XV.1 of the Act*, and last amended by Ontario Regulation 776/20 on January 1, 2021 (O. Reg. 153/04). The purpose of the Phase One ESA was to assess the potential presence of environmental impacts at the Phase One Property due to activities at and near the Phase One Property.

This Phase One ESA was conducted at the request of the Client as a condition for the future redevelopment of the Phase One Property. It is Pinchin's understanding that the Phase One Property will be redeveloped from its current commercial land use to mixed commercial/residential land use with a 16-storey building and two levels of underground parking. Given that this constitutes a change to a more sensitive land use and the proposed building will be greater than six-storeys, the filing of a Record of Site Condition (RSC) for the Phase One Property with the Ontario Ministry of the Environment, Conservation and Parks (MECP) is a mandatory requirement of O. Reg. 153/04. As such, this Phase One ESA report has been prepared in accordance with O. Reg. 153/04 to support the filing of an RSC for the Phase One Property.

The scope of work for this Phase One ESA was consistent with O. Reg. 153/04 in support of filing an RSC and was comprised of the following:

- **A Records Review:** Reviewed available current and historical information sources pertaining to the Phase One Property and Phase One Study Area including the use of, but not limited to, aerial photographs, city directories, Fire Insurance Plans, chain of title search results, historical environmental assessments relevant to the Phase One Property and a regulatory data base search. Regulatory agencies were also contacted to identify if any records of environmental non-compliance or other information associated with the environmental condition of the Phase One Property exists, including searches of MECP and Technical Standards and Safety Authority records.
- **Interviews:** Conducted interviews with a Site Representative (see Section 5.0) to determine if any current or historical operations have caused a concern with respect to the environmental condition of the Phase One Property and the surrounding properties within the Phase One Study Area.

- Site Reconnaissance: Completed a visual assessment of the Phase One Property and the surrounding properties within the Phase One Study Area (from publicly-accessible areas) including any associated buildings and/or facilities for the purpose of identifying the presence of potentially contaminating activities (PCAs).
- Evaluation: Evaluated the information gathered from the records review, interviews and Site reconnaissance.
- Reporting: Prepared a Phase One ESA report.
- Submission: Submitted the Phase One ESA report to the Client.

The Phase One Property consists of two legal lots at the municipal address 311 Somerset Street West & 234 and 236 O'Connor Street, Ottawa, Ontario and is currently owned by Gemstone Corporation, a subsidiary company of the Client. The Phase One Property is located on the north side of Somerset Street West, as the northwest intersection of Somerset Street West and O'Connor Street. The current and past land uses of the Phase One Property are summarized in Table 1 (all Tables are provided in Appendix A and all appendices are provided in Section 10.0).

A review of the chain of title search results determined that the Phase One Property was owned by various landowners between 1875 and 2015 when it was purchased by Gemstone Corporation. The south portion of the Phase One Property at 311 Somerset Street West was first listed in the city directories in 1883 as being occupied for residential purposes. The 1985 fire insurance plan (FIP) depicts a building structure within each of 234 and 236 O'Connor Street. Therefore, it is Pinchin's opinion that the first developed use of the Phase One Property was sometime prior to 1875.

Based on the findings of this Phase One ESA, Pinchin identified eight PCAs at the Phase One Property (i.e., on-Site) and 88 PCAs within the Phase One Study Area outside of the Phase One Property (i.e., off-Site) as summarized in Table 2. Of the off-Site PCAs, 83 are not considered to result in APECs at the Phase One Property given their distance from the Phase One Property and/or their downgradient or transgradient location with respect to the inferred groundwater flow direction at the Phase One Property. The remaining five off-Site PCAs and the eight on-Site PCAs result in a total of 13 APECs at the Phase One Property. It is Pinchin's opinion that these 13 PCAs may have caused contamination of soil and groundwater at the Phase One Property and, as such, the identified APECs at the Phase One Property warrant further investigation prior to the submission of an RSC.

All APECs identified during the Phase One ESA, as well as their respective PCAs, contaminants of potential concern (COPCs) and the media which could potentially be impacted, are summarized in Table 3.

The COPCs associated with each APEC were determined based on several sources of information including, but not limited to, Pinchin's experience with environmental contamination and hazardous substances, common industry standards for analysis of such contaminants and point sources, literature reviews of COPCs and associated hazardous substances, and evaluations of contaminant mobility and susceptibility for migration in the subsurface.

Pinchin recommends that a Phase Two ESA, defined as an "assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the location and concentration of one or more contaminants in the land or water on, in or under the property", be conducted at the Phase One Property. Pinchin concludes that one or more contaminants originating from PCAs located on the Phase One Property and within the Phase One Study Area outside of the Phase One Property may have affected land or water on, in, or under the Phase One Property. Therefore, Pinchin recommends that a Phase Two ESA be conducted prior to filing an RSC for the Phase One Property.

*This Executive Summary is subject to the same standard limitations as contained in the report and must be read in conjunction with the entire report.*

*This report has been issued without having received a response from the Ontario Ministry of the Environment, Conservation and Parks regarding Pinchin's Freedom of Information request. Once a response from this regulatory body is received, the information will be incorporated into a revised version of this report. Our conclusions and recommendations may be amended based on this information.*

## 2.0 INTRODUCTION

A Phase One ESA is defined as a systematic qualitative process to determine whether a particular property is, or may be subject to, actual or potential contamination. Under the Province of Ontario's *Environmental Protection Act R.S.O. 1990, c. E.19 (EPA)* and *Ontario Regulation 153/04: Records of Site Condition – Part XV.1 of the Act*, and last amended by Ontario Regulation 776/20 on January 1, 2021 (O. Reg. 153/04), the purpose of a Phase One ESA is two-fold:

- To obtain and review records that relate to the Phase One Property, and to the current and past uses of and activities at or affecting the Phase One Property, in order to determine if an area of potential environmental concern (APEC) exists and to interpret any APEC; and
- To obtain and review records that relate to properties in the Phase One Study Area, other than the Phase One Property, in order to determine if a potentially contaminating activity (PCA) exists and interpret whether any such PCA results in an APEC at the Phase One Property.

This Phase One ESA was conducted at the request of the Client as a condition for the future redevelopment of the Phase One Property. It is Pinchin’s understanding that the Phase One Property will be redeveloped from its current commercial land use to mixed commercial/residential land use with a 16-storey building and two levels of underground parking. Given that this constitutes a change to a more sensitive land use, the filing of a Record of Site Condition (RSC) for the Phase One Property with the Ontario Ministry of the Environment, Conservation and Parks (MECP) is a mandatory requirement of O. Reg. 153/04. As such, this Phase One ESA report has been prepared in accordance with O. Reg. 153/04 to support the filing of an RSC for the Phase One Property.

**2.1 Phase One Property Information**

The Phase One Property consists of two legal lots at the municipal address 311 Somerset Street West & 234 and 236 O'Connor Street, Ottawa, Ontario and is currently owned by Gemstone Corporation, a subsidiary company of the Client. The Phase One Property is located on the north side of Somerset Street West, at the northwest intersection of Somerset Street West and O'Connor Street, as shown on Figure 1 (all Figures are provided in Appendix B). A plan showing the Phase One Property is provided as Figure 2, and the Phase One Study Area for which this Phase One ESA applies to is outlined on Figure 3. Photographs of the Phase One Property and surrounding properties are presented in Appendix C. A current legal survey of the Phase One Property is included in Appendix D.

Pertinent details of the Phase One Property are provided in the following table:

### 3.0 SCOPE OF INVESTIGATION

Pinchin conducted this Phase One ESA in accordance with O. Reg. 153/04, in particular Part VII and Schedule D of O. Reg. 153/04. The Phase One ESA scope of work was comprised of the following:

- A Records Review: Pinchin reviewed available current and historical information sources pertaining to the Phase One Property and surrounding properties within the Phase One Study Area including the use of, but not limited to, aerial photographs, city directories, Fire Insurance Plans (FIPs), chain of title search results, historical environmental assessments relevant to the Phase One Property and a regulatory data base search. Regulatory agencies were also contacted to identify if any records of environmental non-

compliance or other information associated with the environmental condition of the Phase One Property exist, including the MECP's Freedom of Information and Protection of Privacy Office and the Technical Standards and Safety Authority (TSSA).

- Interviews: Pinchin conducted an interview with a Site Representative (see Section 5.0) to determine if any current or historical operations have caused a concern with respect to the environmental condition of the Phase One Property and the surrounding properties within the Phase One Study Area.
- Site Reconnaissance: Pinchin completed a visual assessment of the Phase One Property and the surrounding properties within the Phase One Study Area (from publicly-accessible areas) including any associated buildings and/or facilities for the purpose of identifying the presence of significant environmental contaminants of concern.
- Evaluation: Pinchin evaluated the information gathered from the records review, interviews and Site reconnaissance.
- Reporting: Pinchin prepared a Phase One ESA report summarizing the findings of the Phase One ESA.
- Submission: Pinchin submitted the Phase One ESA report to the Client.

## **4.0 RECORDS REVIEW**

### **4.1 General**

Identified on-Site and off-Site PCAs described in this and subsequent report Sections are summarized in Table 2 and their locations are shown on Figure 4 (on-Site PCAs) and Figure 5A, 5B and 5C (off-Site PCAs). APECs at the Phase One Property are illustrated on Figure 6.

Each on-Site PCA is associated with an APEC at the Phase One Property. Each off-Site PCA was characterized as to whether it resulted in an APEC at the Phase One Property. In making this determination, the proximity, location relative to the inferred groundwater flow direction, nature of operations and potential contaminants were considered. In general, PCAs that were relatively close to the Phase One Property and/or were at properties upgradient of the Phase One Property with respect to the inferred groundwater flow direction were considered PCAs resulting in APECs. Conversely, PCAs that were distant from the Phase One Property and/or were at properties downgradient or transgradient of the Phase One Property with respect to the inferred groundwater flow direction were not considered PCAs resulting in APECs. The type of operations and potential contaminants associated with the PCAs were also evaluated. Factors such as whether the PCA had a high probability of contamination (e.g., dry

cleaners, retail fuel outlets (RFOs), automotive service garages, etc.) and mobility of the potential contaminants in the subsurface were considered during the evaluation.

#### *4.1.1 Phase One Study Area Determination*

Based on a review of the available historical information and observations made during the Site reconnaissance for the properties greater than 250 metres (m), but less than 1 kilometre (km), from the Phase One Property boundary, Pinchin did not note or observe any significant potentially contaminating properties that should be included as part of this assessment (e.g., landfills, large industrial manufacturers, etc.). As such, the Phase One Study Area consisted of the Phase One Property, as well as all properties situated wholly, or partly, within 250 m from the nearest point of a boundary of the Phase One Property, in order to meet the minimum requirements set forth in O. Reg. 153/04.

#### *4.1.2 First Developed Use Determination*

The first developed land use of the Phase One Property is defined by O. Reg. 153/04 to be the earlier of:

- The first use of a Phase One Property in or after 1875 that resulted in the development of a building or structure on the property; and
- The first potentially contaminating use or activity on the Phase One Property.

A review of the chain of title search results determined that the Phase One Property was owned by various landowners between 1875 and 2015 when it was purchased by Gemstone Corporation, a subsidiary company of the Client. The south portion of the Phase One Property at 311 Somerset Street West was first listed in the city directories in 1883 as being occupied for residential purposes. The 1895 FIP depicts a building structure at both 234 and 236 O'Connor Street. Therefore, it is Pinchin's opinion that the first developed use of the Phase One Property was sometime prior to 1883.

The date of the first developed use of the Phase One Property was determined through a review of a chain of title search, city directories and FIPs. No other information was reviewed by Pinchin during the records review, or obtained during the Site reconnaissance or interviews which would have resulted in a different interpretation of the date of first developed use of the Phase One Property.

#### *4.1.3 Fire Insurance Plans*

Pinchin contacted Opta Information Intelligence (Opta) to obtain copies of FIPs related to the Phase One Property and the Phase One Study Area. Opta provided Pinchin with copies of the following:

- FIPs dated 1878, 1895, 1901, 1912, 1915, 1922, 1948, 1955 and 1963 for the area including the Phase One Property.

The Opta response and copies of the FIPs are provided in Appendix E.

The following general information, including details regarding the Phase One Property, was noted in the 1878, 1895, 1901, 1912, 1915, 1922, 1948, 1955 and 1963 FIPs:

1878

- The FIP does not include the Phase One Property and only includes small portions of the surrounding properties in the north portion of the Phase One Study Area.

1895

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal address of 311 Somerset Street West and three other municipal addresses on O'Connor Street that cannot be discerned due to the low resolution of the FIP.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and one detached garage in the northwest portion of the Phase One Property.

1901

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal address of 311 Somerset Street West and three other municipal addresses on O'Connor Street that cannot be discerned due to the low resolution of the FIP.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and one detached garage in the northwest portion of the Phase One Property.

1912

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal addresses of 309 Somerset Street West and 234, 236 and 238 O'Connor Street.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property, and three detached garages are located along the western boundary of the Phase One Property.

#### 1915

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The municipal addresses for the Phase One Property cannot be discerned due to the low resolution of the FIP.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and one detached garage in the northwest portion of the Phase One Property.

#### 1922

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal addresses of 309 Somerset Street West and 234, 236 and 238 O'Connor Street.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and three detached garages are located along the western boundary of the Phase One Property.

#### 1948

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal addresses of 309 Somerset Street West and 234, 236 and 238 O'Connor Street.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and three detached garages are located along the western boundary of the Phase One Property.

#### 1955

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal addresses of 309 Somerset Street West and 234, 236 and 238 O'Connor Street.

- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and one detached garage in the northwest portion of the Phase One Property.

#### 1963

- The FIP covers the Phase One Property and surrounding properties to the north, south, east and west of the Phase One Property.
- The Phase One Property has the municipal addresses of 309 Somerset Street West and 236 and 238 O'Connor Street.
- The Phase One Property is occupied by three building structures in the north, central and south portions of the Phase One Property and one detached garage in the northwest portion of the Phase One Property.

Based on Pinchin's review of the information provided in the 1878, 1895, 1901, 1912, 1915, 1922, 1948, 1955 and 1963 FIPs, the following is noted:

- The following PCAs were identified at the Phase One Property that result in APECs:
  - Three building structures were historically present at the Phase One Property that may have contained basements that were infilled following their demolition. Fill materials of unknown quality and quantity are a PCA resulting in an APEC at the Phase One Property. It is noted that fill materials are not expected to be present beneath the historical detached garages located in the west portion of the Phase One Property.
- The following PCAs located within the Phase One Study Area outside of the Phase One Property were identified but are not considered to result in APECs at the Phase One Property:
  - A possible dry cleaning facility was located approximately 190 m northwest of the Phase One Property at 233 Bank Street in 1912.
  - A building structure labeled 'paint' was located approximately 150 m west of the Phase One Property at 298 Bank Street in 1912.
  - A building structure labeled 'paint' was located approximately 150 m west of the Phase One Property at 302 Bank Street in 1912.
  - A possible dry cleaning facility was located approximately 150 m west of the Phase One Property at 304 Bank Street in 1912.

- A possible dry cleaning facility was located approximately 170 m southwest of the Phase One Property at 389 MacLaren Street in 1955.
- A possible dry cleaning and printing facility was located approximately 120 m southwest of the Phase One Property at 301 Bank Street in 1955.
- A rubber manufacturing facility was located approximately 150 m southwest of the Phase One Property at 317 to 321 Bank Street in 1912.
- An automotive repair garage and paint shop was located approximately 170 m southwest of the Phase One Property at 387 MacLaren Street from 1948 to 1963.
- A possible dry cleaning facility was located approximately 175 m southwest of the Phase One Property at 389 MacLaren Street from 1948 to 1963.
- An industrial facility equipped with one underground storage tank (UST) was located approximately 200 m west of the Phase One Property in the approximate current location of 420 Cooper Street from 1922 to 1963. In 1955, two possible USTs were located at this property.
- An automotive garage equipped with up to three USTs was located approximately 220 m northwest of the Phase One Property in the current location of 360 Lisgar Street (historically 346 Lisgar Street) in 1922, 1948 and 1963.
- An automotive repair garage was located approximately 180 m south of the Phase One Property at 384 Gilmour Street from 1948 to 1963.
- An automotive repair garage was located 180 m southwest of the Phase One Property at 381 MacLaren Street in 1963.
- A dry cleaning facility was located approximately 100 m north of the Phase One Property at 302 Lisgar Street in 1922.
- A printing facility was located approximately 100 m west of the Phase One Property at 389 Cooper Street in 1922.
- An automotive repair facility was located approximately 120 m southwest of the Phase One Property at 301 and 305 Bank Street in 1922.
- A possible rubber manufacturing facility was located approximately 240 m west of the Phase One Property at 433 Cooper Street in 1922.
- One UST was located approximately 195 m west of the Phase One Property in the current location of 400 Cooper Street in 1922.
- A building structure labeled 'coal office' was located approximately 200 m northwest of the Phase One Property at 238 Bank Street in 1955.

- A paint shop was located approximately 230 m southwest of the Phase One Property at 364 Bank Street in 1955.
- A printing facility was located approximately 230 m north of the Phase One Property at 171 and 175 Nepean Street in 1955.
- A dry cleaning facility was located approximately 160 m north of the Phase One Property at 146 Nepean Street in 1955 and 1963.
- A paint and glass facility was located approximately 70 m northwest of the Phase One Property at 375 Cooper Street in 1955.
- A shoe manufacturing facility was located approximately 95 m north of the Phase One Property at 294 Lisgar Street in 1955.
- A dry cleaning facility was located approximately 100 m west of the Phase One Property in the current location of 275 Bank Street (historically 287 Bank Street) in 1955.
- A printing facility was located approximately 100 m west of the Phase One Property at 297 Bank Street in 1955.
- An RFO equipped with three USTs was located approximately 240 m north of the Phase One Property at 156 O'Connor in 1963.
- An automobile repair facility was located approximately 250 m west of the Phase One Property in the current location of 450 Cooper Street (historically 446 Cooper Street) in 1963.
- A woodworking facility was located approximately 230 m southeast of the Phase One Property at 387 Lewis Street in 1963.

#### 4.1.4 Chain of Title

The Client provided Pinchin with a chain of title search for the Phase One Property. The chain of title search was completed from the earliest record of land ownership for the Phase One Property (i.e., patent) to the present to determine if ownership information would infer any PCAs at the Phase One Property that should be evaluated.

The chain of title search results have been incorporated into Table 1, which summarizes the current and past land uses of the Phase One Property. Based on Pinchin's review of the chain of title search, nothing was identified with respect to the previous or current ownership that is considered a PCA at the Phase One Property.

The chain of title search results are provided in Appendix F. No chain of title search was conducted for the other properties located within the Phase One Study Area.

#### 4.1.5 Environmental Reports

The following previous environmental reports for the Phase One Property provided by the Client were reviewed by Pinchin:

- Report entitled "*Phase One Environmental Site Assessment, 311 Somerset Street West and 234 & 236 O'Connor Street, Ottawa, Ontario*" prepared for Gemstone Developments, by GHD Limited (GHD), and dated August 28, 2015 (2015 GHD Phase One ESA Report).
- Report entitled "*Phase Two Environmental Site Assessment, 311 Somerset Street West and 234 & 236 O'Connor Street, Ottawa, Ontario*" prepared for Gemstone Developments, by GHD Limited (GHD), and dated September 8, 2015 (2015 GHD Phase Two ESA Report).

Pinchin reviewed the available soil and groundwater sample analytical data provided in the above-referenced reports to assess whether there are any known soil and groundwater impacts at the Phase One Property.

Given the available information on the characteristics of the Phase One Property and its future land use (i.e., residential), the applicable Site Condition Standards, as defined by the MECP in the document "*Soil, Ground Water and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act*", dated April 15, 2011, are:

- *Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Groundwater Condition (Table 3 Standards)* for residential property use (i.e., the proposed future use of the Phase One Property) and medium and fine-textured soils.

As such, the analytical data provided in the previous reports were compared with the *Table 3 Standards* to assess whether there are any known areas on the Phase One Property or in the Phase One Study Area where soil or groundwater has parameter concentrations exceeding the *Table 3 Standards*.

A summary of the salient information identified in the reports is provided below.

### 2015 GHD Phase One ESA Report

The 2015 GHD Phase One ESA Report was completed in general accordance with the requirements of O. Reg. 153/04 in support of future development of the Phase One Property with a multi-storey residential structure and the associated re-zoning and Site Plan Approval application to the City of Ottawa. The Phase One ESA consisted of a Site visit, a review of information presented by a Site representative and a regulatory review. Based on Pinchin's review of the 2015 GHD Phase One ESA, the following salient information was noted:

- The Phase One Property has been used for residential, commercial and industrial purposes since the 1870s.
- At the time of the Site reconnaissance, the Phase One Property was developed with one vacant residential dwelling in the north portion of the Phase One Property (234 O'Connor Street) and the remainder of the property was a commercial parking lot, with exception of a parking lot operator booth. Reportedly, a small fire occurred in the residential dwelling in approximately 2005.
- The historical building structure located at 311 Somerset Street West had reportedly been constructed in the late 1800s and was used for industrial and/or commercial activities (i.e., office space, aluminum products, insulation and a funeral home), prior to being destroyed in a fire in 1976. 311 Somerset Street West formerly held the municipal address of 309 Somerset Street West.
- The historical building structure at 234 O'Connor Street was constructed in the late 1800s and was reportedly used predominately for residential purposes. In 1995, the structure was occupied by Ramset Products, a commercial power tool company. Several 5-gallon pails of paint and a 900-litre heating oil AST were reportedly present in the basement of the building at the time of the Site reconnaissance.

The historical building structure at 236 O'Connor Street was constructed in the late 1800s and was reportedly used as a residential dwelling until approximately 1965 when it was occupied by House of Yen, a jewelry company. The building was reportedly used as a commercial warehouse in 1972. The structure was demolished in 1998 and the land converted into a commercial parking lot. A heating oil AST was reportedly present in the basement of the building and removed prior to 1998.

- Dry cleaning facilities were historically present at 308 and 312 Somerset Street West, located approximately 20 m south of the Phase One Property.
- A battery service garage was historically present at 375 Cooper Street, located approximately 70 m west of the Phase One Property.

- Dominion Rubber Co. Ltd. was historically present at 294 Lisgar Street, located approximately 90 m northwest of the Phase One Property.
- A plastic manufacturing (Canus Plastics Inc.) and a paints and glass manufacturer were historically present at 300 Lisgar Street, located approximately 90 m northwest of the Phase One Property.
- A historical publishing and printing facility (Lowe-Martin Co. Ltd.) was historically present at 175 Nepean Street, located approximately 225 m northwest of the Phase One Property. Various additional manufacturing and/or industrial facilities were identified as PCAs within the Phase One Study Area that do not result in APECs at the Phase One Property. The following properties were listed as historical manufacturing and/or industrial facilities:
  - 356 Cooper Street;
  - 226 O'Connor Street;
  - 315 Somerset Street West;
  - 331 Somerset Street West;
  - 323 Somerset Street West; and
  - 338 Somerset Street West.
- Several registered waste generators were identified as PCAs within the Phase One Study Area that do not result in APECs at the Phase One Property. The following properties were listed as registered waste generators:
  - 270 Somerset Street West;
  - 305 Bank Street;
  - 300 Lisgar Street;
  - 272 Bank Street;
  - 190 O'Connor Street; and
  - 232 Bank Street.
- During the Site reconnaissance, unconsolidated construction debris, including bricks, was observed at ground surface in various locations across the Phase One Property. Reportedly, construction materials were used as fill materials within the historical building footprint at 236 O'Connor Street. In addition, construction material and ash may be present within the historical building footprint at 311 Somerset Street West.

- The following PCAs were identified at the Phase One Property and result in APECs at the Phase One Property:
  - 311 Somerset Street West:
    - Item 30: Importation of Fill Material of Unknown Quality;
    - Item 34: Metal Fabrication; and
    - Item 43: Plastic (including fibreglass) Manufacturing and Processing.
  - 234 O'Connor Street:
    - Item 28: Gasoline and Associated Products Storage in Fixed Tanks.
  - 236 O'Connor Street:
    - Item 28: Gasoline and Associated Products Storage in Fixed Tanks; and
    - Item 30: Importation of Fill Material of Unknown Quality.
- The presence of an historical dry cleaner at 308 and 312 Somerset Street West represents a PCA and an APEC at the Phase One Property (Item 37: Operation of Cry Cleaning Equipment (where chemicals are used));
- Several properties within the Phase One Study Area were identified as PCAs that did not result in APECs at the Phase One Property and are summarized in Table 2 of this report; and
- A Phase Two ESA was recommended at the Phase One Property due to the presence of APECs at the Phase One Property.

#### 2015 GHD Phase Two ESA Report

The GHD Phase Two ESA was completed to determine if soil and/or groundwater contamination was present at the Phase One Property related to APECs identified in the 2015 GHD Phase One ESA report.

GHD drilled five boreholes to depths ranging from 9.8 mbgs to 15.8 mbgs, with four of the boreholes completed as groundwater monitoring wells. Soil stratigraphy at the GHD boreholes locations generally consisted of granular fill material to a maximum depth of 2.5 mbgs. Silty clay, sandy silt and/or silty sand was encountered to a maximum depth 15.8 mbgs. Bedrock was encountered between 14.2 and 15.8 mbgs. Groundwater depths ranged from approximately 5.5 mbgs to 7.4 mbgs.

Soil and groundwater samples were submitted for the laboratory analysis of petroleum hydrocarbons (PHCs) fractions F1 to F4, benzene, ethylbenzene, toluene and xylenes, volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), metals and inorganics, including sodium adsorption ratio (SAR). The results of the laboratory analysis were compared with the *Table 3 Standards* and the following exceedances of the *Table 3 Standards* were identified:

- PHCs F1: Soil sample S-11103129-072315-JP-006 collected from the borehole advanced at the north side of the inactive fuel oil tank in the basement of 234 O'Connor Street (212 micrograms per gram ( $\mu\text{g/g}$ ) vs. the *Table 3 Standard* of 65  $\mu\text{g/g}$ ).
- PHCs F2: Soil sample S-11103129-072315-JP-006 and S-11103129-072315-JP-005 collected from the borehole advanced at the north side of the inactive fuel oil tank in the basement of 234 O'Connor Street and near the fuel oil tank outlet (55,800  $\mu\text{g/g}$  and 30,400  $\mu\text{g/g}$ , respectively vs. the *Table 3 Standard* of 150  $\mu\text{g/g}$ ).
- PHCs F3: Soil sample S-11103129-072315-JP-006 and S-11103129-072315-JP-005 collected from the borehole advanced at the north side of the inactive fuel oil tank in the basement of 234 O'Connor Street and near the fuel oil tank outlet (80,500  $\mu\text{g/g}$  and 69,100  $\mu\text{g/g}$ , respectively vs. the *Table 3 Standard* of 1300  $\mu\text{g/g}$ ).
- Barium:
  - Soil sample SS-7 collected from borehole SB1-15 (444  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
  - Soil sample SS-6 collected from borehole SB2-15 (415  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
  - Soil sample SS-3 collected from borehole SB3-15 (539  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
  - Soil sample SS-3 collected from borehole SB4-15 (533  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
  - Soil sample SS-5 collected from borehole SB4-15 (490  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
  - Soil sample SS-3 collected from borehole SB5-15 (457  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
  - Soil sample SS-5 collected from borehole SB5-15 (412  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 390  $\mu\text{g/g}$ ).
- Chromium:
  - Soil sample SS-3 collected from borehole SB4-15 (163  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 160  $\mu\text{g/g}$ ).
  - Soil sample SS-5 collected from borehole SB4-15 (179  $\mu\text{g/g}$  vs. the *Table 3 Standard* of 160  $\mu\text{g/g}$ ).

- Cobalt:
  - Soil sample SS-7 collected from borehole SB1-15 (27.2 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-4 collected from borehole SB2-15 (27.0 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-4 collected from borehole SB2-15 (27.8 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-3 collected from borehole SB3-15 (29.1 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-3 collected from borehole SB4-15 (32.3 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-5 collected from borehole SB4-15 (32.5 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-3 collected from borehole SB5-15 (28.5 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  - Soil sample SS-5 collected from borehole SB5-15 (26.4 µg/g vs. the *Table 3 Standard* of 22 µg/g).
  
- Vanadium:
  - Soil sample SS-7 collected from borehole SB1-15 (135 µg/g vs. the *Table 3 Standard* of 86 µg/g).
  - Soil sample SS-4 collected from borehole SB2-15 (112 µg/g vs. the *Table 3 Standard* of 86 µg/g).
  - Soil sample SS-4 collected from borehole SB2-15 (133 µg/g vs. the *Table 3 Standard* of 86 µg/g).
  - Soil sample SS-3 collected from borehole SB3-15 (152 µg/g vs. the *Table 3 Standard* of 86 µg/g).
  - Soil sample SS-3 collected from borehole SB4-15 (157 µg/g vs. the *Table 3 Standard* of 86 µg/g).
  - Soil sample SS-5 collected from borehole SB4-15 (156 µg/g vs. the *Table 3 Standard* of 86 µg/g).
  - Soil sample SS-3 collected from borehole SB5-15 (133 µg/g vs. the *Table 3 Standard* of 86 µg/g).

- Soil sample SS-5 collected from borehole SB5-15 (129 µg/g vs. the *Table 3 Standard* of 86 µg/g).
- SAR:
  - Soil sample SS-3 collected from borehole SB4-15 (8.12 µg/g vs. the *Table 3 Standard* of 5 µg/g).
  - Soil sample SS-4 collected from borehole SB2-15 (10.7 µg/g vs. the *Table 3 Standard* of 5 µg/g).
  - Soil sample SS-3 collected from borehole SB5-15 (8.73 µg/g vs. the *Table 3 Standard* of 5 µg/g).
- Various PAH parameters exceeded the *Table 3 Standards* in soil sample SS-1 & -2 collected from borehole SB3-15 and SS-1/-2 collected from borehole SB3-15.

Pinchin notes that the groundwater flow direction determined GHD through an evaluation of groundwater elevations within three groundwater monitoring wells (MW 1-15, MW 4-15 and MW5-15) was indicated to be westerly. However, based on the low recharge of the monitoring wells, the water levels in the wells may not have reached static conditions at the time of the Phase Two ESA and the calculated groundwater flow direction may be inaccurate. The local groundwater flow direction is expected to be in a north-easterly direction towards the Rideau Canal.

Pinchin also notes that a duplicate sample was not collected during groundwater sampling activities for quality assurance and quality control purposes due to low groundwater recharge at the time of sampling. Fill materials were indicated on the borehole logs at borehole MW2-15 to a depth of approximately 2.5 mbgs. No soil sample was submitted to determine the quality of the fill material at this borehole location.

#### *4.1.5.1 Previous Environmental Report Summary*

Based on Pinchin's review of the above-referenced previous environmental reports, the following PCAs were identified within the Phase One Study Area that are considered to result in APECs at the Phase One Property:

- A historical fire within the former building structure at 243 O'Connor Street.
- A historical fire within the former building structure at 311 Somerset Street West.
- Historical industrial activities within 311 Somerset Street West.
- Historical manufacturing of aluminum products within 311 Somerset Street West.
- Historical AST within 234 O'Connor Street.
- Historical AST within 236 O'Connor Street.
- Fill materials throughout the Phase One Property.

- A dry cleaning facility historically located 20 m south of the Phase One Property at 308 and 312 Somerset Street West.
- A dental laboratory located adjacent to the northwest boundary of the Phase One Property at 356 Cooper Street. Dental manufacturing activities may have taken place at this property.
- A platemaking, typesetting and binding facility located adjacent to the north boundary of the Phase One Property at 226 O'Connor Street.
- A platemaking, typesetting and binding facility located adjacent to the west boundary of the Phase One Property at 315 Somerset Street West.

The following additional PCAs were identified in the reviewed reports within the Phase One Study Area that are not presented elsewhere in this report but are not considered to result in APECs at the Phase One Property:

- A tool and die maker located approximately 45 m southwest of the Phase One Property at 338 Somerset Street West.
- A battery service garage located approximately 70 m west of the Phase One Property at 375 Cooper Street.
- A plastic and glass manufacturing facility located approximately 90 m northwest of the Phase One Property at 300 Lisgar Street.
- A rubber manufacturing facility located approximately 95 m northwest of the Phase One Property at 294 Lisgar Street.
- A publishing and printing facility located approximately 230 m northwest of the Phase One Property at 175 Nepean Street.

Based on Pinchin's review of the available documents, the analytical data indicated that concentrations of various PHCs, metals, PAHs parameters and SAR were detected in soil at concentrations above the applicable *Table 3 Standards* and should be considered as contaminants of potential concern at the Phase One Property.

#### **4.2 Environmental Source Information**

Pinchin reviewed the historical use of the Phase One Study Area through the use of publicly available archives and databases, as well as through requesting information from regulatory agencies. The following provides a summary of the information obtained from these sources.

#### *4.2.1 Environmental Database Search – ERIS*

Pinchin retained Environmental Risk Information Services (ERIS) to search all available federal, provincial and private source databases for information pertaining to the Phase One Study Area. Unless otherwise noted, information obtained from the ERIS database search was reviewed for the entire Phase One Study Area. A copy of the ERIS report is provided in Appendix G and the results of the database search are described in the following sections.

##### *4.2.1.1 National Pollutant Release Inventory*

ERIS completed a search of the federal databases for information regarding the National Pollutant Release Inventory (NPRI). This database contains comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances and identifies information such as the approximate location, type and quantity of contaminant, date of release, and media impacted.

Pinchin reviewed the ERIS report for NPRI information and found no records regarding the Phase One Study Area.

##### *4.2.1.2 Ontario Inventory of PCB Storage Sites*

The MECP's Waste Management Branch maintains an inventory of PCB storage sites within Ontario. Ontario Regulation 11/82 and Ontario Regulation 347 (O. Reg. 347), made under the EPA, require the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the MECP. This database contains information on waste quantities, major and minor sites storing liquid or solid waste, and a waste storage inventory.

The ERIS search of the Ontario Inventory of PCB Storage Sites found no information regarding the Phase One Property.

One property within the Phase One Study Area was identified within the Ontario Inventory of PCB Storage Sites database search results. The property at 225 Metcalfe Street was identified as having stored PCBs or PCB-containing equipment (including transformers, capacitors, ballasts, soil and free liquids) within the Phase One Study Area and is an off-Site PCA. PCBs are highly immobile in soils and immiscible in water. The property is located approximately 185 m east and hydraulically downgradient/transgradient of the Phase One Property.

Based on this information, Pinchin concludes that the likelihood of potential impacts to the Phase One Property due to the historical PCB storage at 225 Metcalfe Street is low and this off-Site PCA does not result in an APEC at the Phase One Property.

#### *4.2.1.3 National PCB Inventory*

Environment Canada maintains an inventory of in-use PCB-containing equipment at federal, provincial and private facilities in Canada, and of out-of-service PCB-containing equipment and PCB waste owned by the federal government or federally regulated industries.

The ERIS search of the National PCB Inventory found no information regarding the Phase One Property.

One property within the Phase One Study Area was identified within the National PCB Inventory database search results. The property at 225 Metcalfe Street was identified as having stored PCBs or PCB-containing equipment (including transformers, capacitors, ballasts, soil and free liquids) within the Phase One Study Area and is an off-Site PCA. PCBs are highly immobile in soils and immiscible in water. The property is located approximately 185 m east and hydraulically downgradient/transgradient of the Phase One Property.

Based on this information, Pinchin concludes that the likelihood of potential impacts to the Phase One Property due to the historical PCB storage at 225 Metcalfe Street is low and this off-Site PCA does not result in an APEC at the Phase One Property.

#### *4.2.1.4 Certificates of Approval*

ERIS completed a search of the MECP database for information regarding Certificates of Approval (Cs-of-A). The MECP maintains a database of approved Cs-of-A for Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. Prior to November 1, 2011, the MECP mandated that any facility that released emissions to the atmosphere, discharged contaminants to ground or surface water, provided potable water supplies, or stored, transported or disposed of waste, must have a C-of-A before it could operate lawfully. The MECP no longer issues Cs-of-A, which were replaced by Environmental Compliance Approvals (ECAs) as of November 1, 2011. O. Reg. 153/04 indicates that information from the C-of-A database only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property.

The ERIS search of the C-of-A database identified no information regarding Cs-of-A for the Phase One Property or for properties adjacent to the Phase One Property.

#### *4.2.1.5 Environmental Compliance Approvals, Permits To Take Water and Certificates of Property Use*

ERIS completed a search of the MECP database for information regarding ECAs, permits including Permits To Take Water (PTTWs) and Certificates of Property Use (CPUs). O. Reg. 153/04 indicates that information from these databases only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. Details regarding these databases are provided in the ERIS report in Appendix G.

The ERIS database search identified no information regarding ECAs, PTTWs or CPUs for the Phase One Property and properties adjacent to the Phase One Property.

#### *4.2.1.6 Inventory of Coal Gasification Plants*

ERIS searched the following publications prepared for the MECP by Intera Technologies Inc. for information on industrial sites that formerly operated as coal gasification plants, and industrial sites that produced or used coal tar and other related tars:

- “*Inventory of Coal Gasification Plant Waste Sites in Ontario*”, dated April 1987; and
- “*Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario*”, dated November 1988.

The ERIS search yielded no records of former coal gasification plants or the production or use of coal tar and related tars within the Phase One Study Area.

#### *4.2.1.7 Environmental Incidents, Orders, Offences and Spills*

ERIS completed a search of the various provincial and federal databases for information regarding environmental incidents, orders, offences and spills. O. Reg. 153/04 indicates that information from these databases only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. Details regarding the searched databases are provided in the ERIS report in Appendix G.

The ERIS database search revealed no records of environmental incidents, orders, offences or spills for the Phase One Property and properties adjacent to the Phase One Property with exception of one incident at 231 O'Connor Street where a natural gas pipeline was damaged. This property is located approximately 10 m east of the Phase One Property. Due to the nature of the incident (i.e., natural gas pipeline damage), it is Pinchin's opinion that the incident is not a PCA.

#### *4.2.1.8 Waste Management Records*

##### Waste Generators

ERIS completed a search of the O. Reg. 347 Waste Generators database for information regarding waste generation. O. Reg. 347 defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution, etc. The database search results provide a summary of available waste generation information for the registered sites for all years from 1986 to the present.

O. Reg. 153/04 indicates that information from the Waste Generator database only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. However, in addition to the Phase One Property and adjacent off-Site properties, Pinchin reviewed the database for waste generators within 50 m transgradient and 100 m upgradient of the Phase One Property with respect to the inferred groundwater flow direction. The area reviewed will be referred to as the Waste Generator Database Review Area.

The ERIS search of the O. Reg. 347 Waste Generators database found no information regarding the Phase One Property.

Two properties located within the Waste Generator Database Review Area were listed within the O. Reg. 347 Waste Generators database search results as waste generators and are considered PCAs. Details regarding the types of waste and timeframe when wastes were generated at these properties are provided in the ERIS report in Appendix G.

Based on their location and distance relative to the Phase One Property (i.e., greater than 30 m and/or inferred to be hydraulically downgradient or transgradient of the Phase One Property), it is Pinchin's opinion that hazardous waste generation at these properties has not resulted in APECs at the Phase One Property.

#### Waste Receivers

ERIS completed a search of the O. Reg. 347 Waste Receivers database for information regarding waste receivers. O. Reg. 347 defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database contains registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants.

O. Reg. 153/04 indicates that information from the Waste Receivers database only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. However, in addition to the Phase One Property and adjacent off-Site properties, Pinchin reviewed the database for waste generators within 50 m transgradient and 100 m upgradient of the Phase One Property with respect to the inferred groundwater flow direction. The area reviewed will be referred to as the Waste Receivers Database Review Area.

The ERIS search of the O. Reg. 347 Waste Receivers database found no information regarding the Waste Receivers Database Review Area.

#### **4.2.1.9 Fuel Storage Tanks**

ERIS completed a search of various private, provincial and federal databases for information regarding chemical storage tanks, as well as private and retail fuel storage tanks. It is noted that one property listed within the Ontario Spills database included details regarding a storage tank. Details regarding the searched databases are provided in the ERIS report in Appendix G.

The ERIS search of the chemical, fuel storage tank and Ontario Spills databases found no information regarding the Phase One Property.

The ERIS search of the chemical, fuel storage tank and Ontario Spills databases identified the following properties within the Phase One Study Area with records of fuel storage tanks:

- 154 O'Connor Street.
- 309 Cooper Street.
- 235 Somerset Street West.
- 232 Bank Street.

The 154 O'Connor Street, 309 Cooper Street, 235 Somerset Street West and 232 Bank Street properties are distant from the Phase One Property (i.e. greater than 75 m) and are inferred to be hydraulically downgradient/transgradient of the Phase One Property. As such, Pinchin considers that the likelihood of potential impacts to the Phase One Property due to storage tanks on these properties is low and these PCAs do not result in APECs at the Phase One Property.

#### **4.2.1.10 Notices and Instruments**

The ERIS database search of the Environmental Registry and Record of Site Condition database indicated the following for the Phase One Study Area:

- No records were found in the Environmental Registry and Record of Site Condition database for the Phase One Property.
- No records were found in the Environmental Registry and Record of Site Condition database for other properties within the Phase One Study Area except for the following:
  - An RSC was filed for 300 Lisgar Street, located approximately 90 m northwest of the Phase One Property. None of the available information within the RSC was related to potential impacts on groundwater quality, which is considered the primary pathway of concern for contaminant migration to the Phase One Property. It is noted that a UST removal program report was included in the RSC filing. As such, Pinchin considers it likely that an historical UST was present at the property and is considered a PCA. However, based on the distance of the

property (i.e., greater than 75 m) from the Phase One Property, Pinchin considers the likelihood of potential impacts to the Phase One Property due to the presence of a UST at this property to be low and this PCA does not result in an APEC at the Phase One Property;

- An RSC was filed for 287 Lisgar Street, located approximately 120 m north of the Phase One Property. The RSC included information regarding VOC contamination in groundwater due to an historic off-Site dry cleaning facility that is located outside the Phase One Study Area. Based on the distance of the property (i.e., greater than 100 m) from the Phase One Property, Pinchin considers the likelihood of potential groundwater impacts to the Phase One Property due to the presence of VOC contamination in groundwater at this property to be low and this PCA does not result in an APEC at the Phase One Property; and
- An additional four database search results for filed RSCs. None of the RSCs were related to potential impacts on groundwater quality, which is considered the primary pathway of concern for contaminant migration to the Phase One Property and the properties are located at a distance (i.e., greater than 150 m) from the Phase One Property. As such, the likelihood of potential impacts to the Phase One Property from these four properties is considered low.

#### **4.2.1.11**      *Areas of Natural Significance*

Pinchin reviewed information provided on the Ministry of Natural Resources and Forestry's (MNRF) Natural Heritage Information Centre (NHIC) website to assess whether any parks, wetlands, conservation areas, or other areas of natural significance, are located within the Phase One Study Area. No areas of natural significance were identified within the Phase One Study Area from this information source.

#### **4.2.1.12**      *Landfill Information*

ERIS reviewed available private and provincial databases for records of any current or inactive landfills and waste disposal sites within the Phase One Study Area. Details regarding the searched databases are provided in the ERIS report in Appendix G.

The ERIS search of the landfill and waste disposal sites databases found no information regarding the Phase One Study Area.

#### **4.2.1.13 Other ERIS Databases**

The ERIS database search of the Pesticide Register identified one property within the Phase One Study Area registered as a pesticide vendor and is considered a PCA. Details of the records for this property are provided in the ERIS report in Appendix G. Based on the distance relative to the Phase One Property (i.e., greater than 30 m from the Phase One Property), it is Pinchin's opinion that the pesticide storage at this property has not resulted in an APEC at the Phase One Property.

The ERIS database search of the Ontario Oil and Gas Wells database identified one oil and gas well within the Phase One Study Area. The well is located approximately 140 m west of the Phase One Property and holds the Well Licence Number F01978. The well is registered as a natural gas well presently or formerly used to produce natural gas from a reservoir. Based on the nature of the well (i.e. natural gas), the presence of the well does not represent a PCA.

The ERIS database search of the Dry Cleaning Facilities identified one property within the Phase One Study Area registered as a dry cleaner and is considered a PCA. Details of the records for this property are provided in the ERIS report in Appendix G. Based on the distance relative to the Phase One Property (i.e., greater than 100 m from the Phase One Property), it is Pinchin's opinion that the operation of a dry cleaner at this property has not resulted in an APEC at the Phase One Property.

The ERIS database search of the Scott's Manufacturing Database identified the following additional information for the Phase One Study Area:

- A publishing facility and a computer systems design and software publishing facility was located approximately 45 m southwest of the Phase One Property at 338 Somerset Street West. The property is located upgradient of the Phase One Property in relation to the inferred groundwater flow direction. Based on the nature of operations at the property and the separation distance in relation to the Phase One Property, this property represents a PCA but does not result in an APEC at the Phase One Property.
- A publishing facility was located approximately 85 m west of the Phase One Property at 396 Cooper Street. The property is located transgradient of the Phase One Property in relation to the inferred groundwater flow direction. Based on the nature of operations at the property and the separation distance in relation to the Phase One Property, this property represents a PCA but does not result in an APEC at the Phase One Property.
- A publishing facility was located approximately 70 m west of the Phase One Property at 273 Bank Street. The property is located upgradient/transgradient of the Phase One Property in relation to the inferred groundwater flow direction. Based on the nature of operations at the property and the separation distance in relation to the Phase One

Property, this property represents a PCA but does not result in an APEC at the Phase One Property.

- A plastic products and plastic sheet, sign, fabricated metal and shelving manufacturing facility was located approximately 90 m northwest of the Phase One Property at 300 Lisgar Street. Based the separation distance in relation to the Phase One Property, this property represents a PCA but does not result in an APEC at the Phase One Property.

Twelve other properties located within the Phase One Study Area were listed within the Scott's Manufacturing database search results as manufacturing facilities and are considered PCAs. Details regarding the types of manufacturing and dates of operation at these properties are provided in the ERIS report in Appendix G. Based on their location and distance relative to the Phase One Property (i.e., greater than 30 m and/or inferred to be hydraulically downgradient or transgradient of the Phase One Property) and/or the types of manufacturing at these properties, it is Pinchin's opinion that the manufacturing activities at these properties do not result in APECs at the Phase One Property.

#### *4.2.2 Ministry of the Environment, Conservation and Parks Freedom of Information Search*

The MECP Freedom of Information and Protection of Privacy Office in Toronto, Ontario was contacted to determine if records exist for environmental matters such as orders, spills, previous investigations, prosecutions, registered PCB waste storage sites, waste generators, waste receivers, Cs-of-A and ECAs associated with the Phase One Property.

Searches were requested on January 14 and 21, 2021 and Pinchin has not received responses from the MECP at the time of writing this Phase One ESA report.

Copies of the MECP search requests are provided in Appendix H.

#### *4.2.3 Technical Standards and Safety Authority Search*

The TSSA is the regulatory body that governs the safe handling and storage of fuel in Ontario. All storage of gasoline, diesel and fuel oil is subject to the Technical Standards and Safety Act. The Technical Standards and Safety Act and its relevant documents and regulations (e.g., *Liquid Fuels Handling Code*, *Ontario Regulation 213/01 – Fuel Oil*, *Ontario Regulation 217/01 – Liquid Fuels*) require that all fuel storage devices such as aboveground storage tanks (ASTs) and USTs be registered with the TSSA.

Pinchin contacted the TSSA to determine whether any ASTs or USTs are, or were, registered for the Phase One Property to determine whether any records of regulatory non-compliance exist. E-mail responses were issued by the TSSA on February 2 and 7, 2021 indicating that following a search of the TSSA files, no outstanding instructions, incident reports, fuel oil spills or contamination records, or records of registered ASTs or USTs were found for the Phase One Property.

Copies of the TSSA correspondence are provided in Appendix I.

#### 4.2.4 Property Underwriters' Reports and Plans

Property Underwriters' Reports (PURs) provide detailed information on a site-specific basis, including descriptions of building construction, heating sources, production processes, and the presence of any hazardous chemicals or materials which may have been historically stored on the Phase One Property. They also indicate the presence of environmental hazards such as electrical rooms, transformers, boilers and storage tanks. Information provided on Property Underwriters' Plans (PUPs) includes the location, capacity, and contents of aboveground storage tanks (ASTs), USTs, chemical storage and other forms of environmental hazards.

Pinchin contacted Opta to obtain copies of PURs and PUPs related to the Phase One Property. Responses were received from Opta dated January 20 and 26, 2021 which indicated that no PURs or PUPs for the Phase One Property were available. The Opta responses are provided in Appendix E.

#### 4.2.5 City Directories

City directories for the years 1875 to 2011 were reviewed by Pinchin at the Library and Archives of Canada in Ottawa, Ontario for the area within 100 m of the Phase One Property (City Directory Search Area). It should be noted that no city directories were available for 234 and 236 O'Connor Street or the City of Ottawa subsequent to 2010. A summary of information obtained with respect to the Phase One Property is provided in the following table:

<b>Year(s)</b>	<b>Occupant Listings for Site Address*</b>
1875	Not Listed
1883, 1885, 1894, and 1919	Residential
1899, 1904, 1909, 1914, 1924, 1929, 1934, 1938, 1939, 1944, 1949, 1954, 1959, 1964, 1969, 1974, 1979, 1984, 1989, 1990, 1995, 2000, 2005, 2006, 2010 and 2011	Residential and/or commercial

\*City Directory review for the Phase One Property included 311 Somerset Street West only

Based on Pinchin's review of the above-noted city directories, no PCAs were identified at the Phase One Property.

Off-Site PCAs were identified in the city directories at adjacent properties, or within 50 m transgradient or 100 m upgradient of the Phase One Property with respect to the inferred groundwater flow direction, that are not considered to result in APECs at the Phase One Property, and these are summarized in Table 2.

### 4.3 Physical Setting Sources

#### 4.3.1 Aerial Photographs

Pinchin reviewed aerial photographs of the Phase One Property and surrounding properties within the Phase One Study Area to assess the potential for historical PCAs. Copies of aerial photographs dated 1928, 1938, 1945, 1958, 1965, 1976, 1985, 1999, 2005 and 2015 were obtained from ERIS and reviewed by Pinchin. In addition, Pinchin reviewed satellite images provided by the City of Ottawa GeoOttawa website (<https://maps.ottawa.ca/geottawa/>) dated 1991 and 2019. The 1928 aerial photograph was the earliest available aerial photograph of the Phase One Study Area.

Efforts were made by Pinchin to obtain aerial photographs that:

- Illustrated the period between initial development of the Phase One Property to the present.
- Identified buildings and structures present on the Phase One Property since initial development.
- Identified PCAs within the Phase One Study Area.
- Identified APECs on the Phase One Property.

A summary of information obtained with respect to the Phase One Property from a review of the available aerial photography is provided in the following table:

Year of Photograph	Phase One Property
1928	At least three buildings are visible on the Phase One Property. Two buildings are located in the north portion of the Phase One Property and at least one building is located in the south portion of the Phase One Property.
1938	Same as above.
1945	Same as above.
1958	Same as above.
1965	Same as above. A parking lot is also located in the south portion of the Phase One Property.

<b>Year of Photograph</b>	<b>Phase One Property</b>
1976	Two building structures are visible on the Phase One Property, different in size, shape and orientation than those visible in the 1928 to 1965 aerial photographs. A building structure is visible in each of the central and north portions of the Phase One Property.
1985	Same as above. A parking lot is located in the south portion of the Phase One Property.
1991	Same as above.
1999	A building structure is visible in the north portion of the Phase One Property, similar to that visible in the 1976 to 1991 aerial photographs. The central and south portions of the Phase One Property appear to be a parking lot.
2005	Same as above.
2015	Same as above.
2017	The Phase One Property appears vacant. The central and south portions of the Phase One Property appear to be a parking lot.

Based on the aerial photographs reviewed for the Phase One Property and the surrounding area, it appears that the Phase One Property was developed prior to 1928.

The aerial photograph review did not identify any PCAs within the Phase One Study Area, including the Phase One Property. Copies of the aerial photographs of the Phase One Property and surrounding area are provided in Appendix J.

#### *4.3.2 Topography, Hydrology and Geology*

The elevation of the Phase One Property, based on information obtained from the Ontario Base Map series, is approximately 72 m above mean sea level (mamsl). The general topography in the local and surrounding areas is generally flat with a slight grade downwards in elevation to the east. No bedrock outcrops were observed on-Site or in the surrounding area. Based on data from the 2015 GHD Phase Two ESA Report, the overburden thickness on-Site (i.e., depth to bedrock) is approximately 14 to 15.5 mbgs.

The Phase One Property and the surrounding properties located within the Phase One Study Area are located within marine deposits of clay and silt underlying erosional terraces as the dominant landform with channels of sand and pockets of non-marine silt.

Bedrock is expected to consist of shale, limestone, dolostone and siltstone of the Georgian Bay Formation, Blue Mountain Formation, Billings Formation and Collingwood Formation. The topography is considered to be mainly flat. During previous on-Site environmental investigations, the soil stratigraphy consisted of a granular (topsoil) material overlaying granular fill material to a maximum depth of 2.5 mbgs.

Silty clay, sandy silt and/or silty sand with variations in composition were encountered to a maximum depth 15.5 mbgs. Based on general hydrogeological principles and Pinchin's familiarity with subsurface conditions at and near the Phase One Property and the surrounding properties within the Phase One Study Area, the unconfined groundwater beneath the Phase One Property is expected to flow in a north-easterly direction. No water bodies are located within the Phase One Study Area, and the nearest surface water body is the Rideau Canal approximately 850 m east of the Phase One Property at an elevation of approximately 68 mamsl. The nearest major water body is the Ottawa River, located approximately 1 km northwest of the Phase One Property at an elevation of approximately 50 mamsl.

Copies of pertinent maps, illustrating local topographical, hydrogeological and drainage features are provided in Appendix K

#### *4.3.3 Fill Materials*

According to the 2015 GHD Phase Two ESA report, fill, generally consisting of granular materials and sand and gravel, was encountered at depths up to 2.5 mbgs in each of the borehole locations advanced by GHD at the Phase One Property. As such, Pinchin has concluded that fill material is present across the entire Phase One Property. As noted in Section 4.1.5, samples of fill materials collected at GHD boreholes SB1-15, SB3-15, SB4-15 and SB5-15 had concentrations of SAR, barium, cadmium, chromium and/or vanadium exceeding the *Table 3 Standards*. The presence of fill material is a PCA at the Phase One Property.

Given the known presence of fill material at the Phase One Property, potential future development plans should incorporate the appropriate procedures for the characterization of soils that may require off-Site disposal. Further assessment and/or costs may be incurred through re-development of the Phase One Property and/or change in land use scenarios.

#### *4.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information*

No water bodies were identified on the Phase One Property or on surrounding properties within the Phase One Study Area.

A review of the MNRF's NHIC website did not identify any provincial parks, wetlands, conservation areas, or other areas of natural significance, within the Phase One Study Area.

A review of the City of Ottawa Source Water Protection website indicated that the Phase One Study Area is located within the Mississippi-Rideau Source Protection Region.

The records review did not identify the presence of wells within the Phase One Property or within the Phase One Study Area that currently supply water for human consumption or for agricultural purposes.

#### 4.3.5 Well Records

A search of the Water Well Information System database by ERIS identified one water well record for the Phase One Property. A summary of pertinent information included in the ERIS report with respect to this well is provided in the following table:

<b>MECP Well ID (ERIS ID)</b>	<b>Location</b>	<b>Stratigraphy</b>	<b>Approximate Depth to Bedrock</b>	<b>Approximate Depth to Water Table</b>
A152341	Approximately 7 m north of Somerset Street West and 5 m west of O'Connor Street in the southeast portion of the Phase One Property	Information not provided.	Information not provided.	Information not provided.

The Water Well Information System database search also identified 41 water well records within the Phase One Study Area outside of the Phase One Property. Details regarding these off-Site wells, including stratigraphic information, depth to bedrock and/or depth to the water table, are provided in the ERIS report included in Appendix G.

As documented in the 2015 GHD Phase Two ESA Report, on-Site monitoring wells MW1-15, MW2-15, MW4-15 and MW5-15 were installed in 2015 to a maximum depth of 15.82 mbgs in the overburden, which consisted primarily of silty clay and silty sand. Bedrock was encountered between 14.17 mbgs and 15.82 mbgs during the drilling and groundwater was encountered between 5.46 mbgs and 7.36 mbgs. It is unknown if these water wells currently exist at the Phase One Property or have been decommissioned.

#### 4.4 Site Operating Records

Based on the historical use of the Phase One Property as a former industrial facility, the Phase One Property is classified as an Enhanced Investigation Property (see Section 6.3). As such, O. Reg. 153/04 requires that the following site operating records be reviewed where available:

- Regulatory permits and records related to APECs.
- Material safety data sheets (MSDSs).
- Underground utility drawings.
- Inventories of chemicals, chemical usage and chemical storage areas.
- Inventory of ASTs and USTs.
- Environmental monitoring data.

- Waste management records.
- Process, production and maintenance documents related to APECs.
- Records of spills and contaminant discharges.
- Emergency response and contingency plans.
- Environmental audit reports.
- Site plan of facility.

The Site Representative (see Section 5.0) informed Pinchin that none of the above-listed site operating records were available for review.

## 5.0 INTERVIEWS

Pinchin interviewed an individual knowledgeable of the Phase One Property and its history to obtain or confirm information regarding the environmental condition of the Phase One Property. The following individual provided information regarding the history of the Phase One Property and the surrounding properties within the Phase One Study Area to the best of their knowledge:

<b>Person Interviewed</b>	<b>Relationship to Phase One Property</b>	<b>Date and Place of Interview</b>	<b>Interview Method</b>
Mr. Josh Zaret	Representative of the current owner of Phase One Property.	January 20, 2020	Email correspondence following the Site reconnaissance.

Mr. Zaret was chosen to be interviewed given that he is a representative of the current owner of the Phase One Property and is familiar with the recent history of the Phase One Property. Mr. Zaret is referred to herein as the "Site Representative". Mr. Zaret was interviewed via email following the Site reconnaissance.

Pinchin compared the information obtained from the interviews with information obtained from the historical records. In general, the information provided by the interviewee was corroborated by the available historical records with exception of the presence of industrial activities at the Site. The Site Representative had no knowledge of historical commercial or industrial activities occurring at the Site, with exception of an historical funeral home. While, the 2015 GHD Phase One ESA indicated that former industrial operations and aluminum products manufacturing occurred at 311 Somerset Street West. Pinchin did not review historical or regulatory information that would indicate industrial operations occurred at the Phase One Property. It is possible that the previous environmental report contained information containing an error; however unless additional information becomes available, Pinchin will

consider the information presented in the 2015 GHD Phase One ESA to be accurate and the former industrial operations and metal fabrication to represent PCAs at the Phase One Property and creates reason for the Phase One Property to be an Enhanced Investigation Property.

## 6.0 SITE RECONNAISSANCE

### 6.1 General Requirements

A visual assessment of the Phase One Property and the surrounding properties within the Phase One Study Area was conducted for the purpose of identifying the presence of possible PCAs and associated APECs.

The Site reconnaissance was completed on January 19, 2021 by a Pinchin representative (i.e., Mr. Kurt Frommann), under the direct supervision of Pinchin's QP overseeing this project. Mr. Frommann is a Project Manager with more than 8 years of environmental consulting experience. Pinchin visited the Phase One Property and surrounding properties within the Phase One Study Area to document environmental conditions. During the Site reconnaissance, Pinchin viewed all accessible areas within the Phase One Property and viewed publicly-accessible portions of the adjacent lands for the presence of actual or potential issues of environmental concern.

The Site reconnaissance was conducted between the hours of 1:30 PM and 2:30 PM. During the Site reconnaissance, the weather was overcast and snowing, and the ambient temperature was approximately -8° Celsius. The Phase One Property reconnaissance was conducted on foot and consisted of a full walk-through of the property. There were no access restrictions for Pinchin for the Phase One Property. At the time of the Site reconnaissance, the Phase One Property was vacant.

Photographs taken during the Site reconnaissance that illustrate the Phase One Property and Phase One Study Area are provided in Appendix C.

With reference to Appendix C, the following table provides a summary of photographs that illustrate PCAs observed at other properties within the Phase One Study Area during the Site reconnaissance:

Photograph No.	Orientation	Description
9	Looking west	Dry cleaner located approximately 150 m west of the Phase One property at 282 Bank Street. This property is inferred to be transgradient of the Phase One Property.
10	Looking east	Fill and vent pipes at the property located approximately 60 m west of the Phase One Property at 374 Cooper Street. This property is inferred to be transgradient of the Phase One Property.

Photograph No.	Orientation	Description
11	Looking east	Fill and vent pipes at the property located approximately 15 m west of the Phase One Property at 364 Cooper Street. This property is inferred to be transgradient of the Phase One Property.

## **6.2 Specific Observations at Phase One Property**

### *6.2.1 Description of Buildings and Structures*

There were no buildings or structures present on the Phase One Property at the time of the Site reconnaissance.

### *6.2.2 Description of Below-Ground Structures*

There were no below-ground structures present on the Phase One Property at the time of the Site reconnaissance.

### *6.2.3 Description of Tanks*

During the Site reconnaissance, the Site Representative indicated that a heating oil AST was historically located in the basement of the former building structure at 234 O'Connor Avenue at the Phase One Property. The AST was reportedly removed in 2015, prior to the demolition of the building. No tank removal documents were provided to Pinchin at the time of this Phase One ESA. The presence of a tank represents a PCA at the Phase One Property.

### *6.2.4 Potable and Non-Potable Water Sources*

The Phase One Property is currently not serviced by a municipal water supply.

### *6.2.5 Description and Location of Underground Utilities*

There are currently no active underground utilities at the Phase One Property. According to the Site Representative, all underground utilities are capped. Based on the location of the former building structures at the Phase One Property, it is likely that the underground utilities are capped at O'Connor Street and/or Somerset Street West.

### *6.2.6 Entry and Exit Points*

A fence was located along the north and west boundaries of the Phase One Property at the time of the Site reconnaissance. The Phase one property is accessible from the east and the south property boundaries.

#### *6.2.7 Details of Heating System*

No heating systems were observed at the Phase One Property.

Based on information provided by the Site Representative, the historical building structure at 234 O'Connor Street utilized a heating oil AST as a heating source. The AST was reportedly located in the basement of the former structure.

#### *6.2.8 Details of Cooling System*

No cooling systems were observed at the Phase One Property.

#### *6.2.9 Details of Drains, Pits and Sumps*

No pits, drains or sumps were observed at the Phase One Property.

#### *6.2.10 Unidentified Substances within Buildings and Structures*

There were no buildings or structures present on the Phase One Property at the time of the Site reconnaissance.

#### *6.2.11 Details of Staining and Corrosion*

During the Site reconnaissance, Pinchin did not observe any areas of staining or corrosion. It is noted that the Phase One Property was snow-covered at the time of the Site reconnaissance.

#### *6.2.12 Details of On-Site Wells*

No water supply or groundwater monitoring wells were observed to be on or within the Phase One Property. It is noted that the Phase One Property was snow-covered at the time of the Site reconnaissance.

#### *6.2.13 Details of Sewage Works*

During the Site reconnaissance, Pinchin did not observe any sewage works or evidence of sewage disposal on the Phase One Property.

#### *6.2.14 Details of Ground Cover*

During the Site reconnaissance, Pinchin visually inspected the Phase One Property ground cover. Vegetated areas are located in the north portion of the Phase One Property. The remainder of the Phase One Property exterior consists of an asphalt-paved driveway, access routes and parking areas. It is noted that the Phase One Property was snow-covered at the time of the Site reconnaissance.

#### *6.2.15 Details of Current or Former Railways*

No current or former railway infrastructure was observed on the Phase One Property.

#### *6.2.16 Areas of Stained Soil, Vegetation and Pavement*

During the Site reconnaissance, Pinchin did not observe any areas of stained soil, vegetation or pavement on the Phase One Property. It is noted that the Phase One Property was snow-covered at the time of the Site reconnaissance.

#### *6.2.17 Areas of Stressed Vegetation*

During the Site reconnaissance, Pinchin did not observe any areas of stressed vegetation on the Phase One Property. Significant quantities of vegetation were not observed on-Site. It is noted that the Phase One Property was snow-covered at the time of the Site reconnaissance.

#### *6.2.18 Areas of Fill and Debris Materials*

No obvious areas where fill material or debris have been placed or graded were observed by Pinchin at the Phase One Property.

#### *6.2.19 Potentially Contaminating Activities*

A PCA is defined by O. Reg. 153/04 as a “use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One Study Area” including the Phase One Property.

The PCA identified at the Phase One Property during the Site reconnaissance (i.e., former AST at 234 O'Connor Avenue) is included in Table 2. Details regarding this PCA (e.g., locations, potential contaminants of concern, and rationale for inclusion) are provided in the preceding sections of this report, and are further summarized in Section 7.2.

#### *6.2.20 Unidentified Substances Outside Buildings and Structures*

During the Site reconnaissance, Pinchin did not observe any unidentified substances or storage containers holding unidentified substances on the exterior of the Phase One Property.

#### *6.2.21 Surrounding Land Uses*

During the Site reconnaissance, Pinchin conducted a visual assessment of publicly-accessible portions of the Phase One Study Area for the presence of PCAs. The properties in the Phase One Study Area have various land uses, including residential and commercial. Land use types within the Phase One Study Area are presented on Figure 3.

The following table summarizes the land use on adjacent properties at the time of the Site reconnaissance:

**Phase One Environmental Site Assessment**

311 Somerset Street West & 234 and 236 O'Connor Street, Ottawa, Ontario  
Somerset and O'Connor Limited Partnership

March 8, 2021  
Pinchin File: 246162  
FINAL

<b>Direction Relative to Phase One Property</b>	<b>Location Relative to Inferred Groundwater Flow Direction</b>	<b>Description of Property Use</b>	<b>Property Use</b>	<b>Potential Contribution to PCA and/or APEC</b>
North	Downgradient	Multi-tenant residential land use followed by Cooper Street.	Residential	Land uses are not considered to represent PCAs.
East	Transgradient	O'Connor Street followed by several multi-tenant residential buildings and a commercial parking lot.	Residential/ commercial	Land uses are not considered to represent PCAs.
South	Upgradient	Somerset Street West followed by the Ukrainian Embassy and several multi-tenant residential and/or commercial buildings (i.e., Fernandino hair salon, Ashby House Massage Therapy, Mamma Teresa Ristorante etc.).	Residential/ commercial	Land uses are not considered to represent PCAs.
West	Transgradient	Several multi-tenant residential and/or commercial building structures (i.e., Union Local 613, Prohibition Public House Henry's Photo Shop, etc.). Fill and vent pipes were observed at the exterior of the building structures at 364 and 374 Cooper Street, located approximately 15 and 60 m west of the Phase One Property, respectively. Further west is a dry cleaner located approximately 150 m from the Phase One Property at 282 Bank Street and a dry cleaner approximately 240 m from the Phase One Property at 395 Somerset Street West.	Residential/ commercial	The fill and vent pipes at 364 Cooper Street are likely associated with a tank which is a PCA that results in an APEC at the Phase One Property. The fill and vent pipes at 374 Cooper Street, likely associated with a tank, the dry cleaner located 150 m west of the Phase One Property at 282 Bank Street and the dry cleaner at 395 Somerset Street West are PCAs but do not result in APECs at the Phase One Property given that they are located more than 30 m from the Phase One Property and are transgradient.

Pinchin observed four PCAs at the time of the Site reconnaissance within the rest of the Phase One Study Area that were not identified during the historical information review and noted elsewhere in this report. These additional PCAs (PCA-12, PCA-18, PCA-60 and PCA-95) are summarized in Table 2.

### **6.3 Enhanced Investigation Property**

O. Reg. 153/04 defines an “Enhanced Investigation Property” as a property that is being used or has been used, in whole or in part, in the following manner:

- For an industrial use or;
- For any of the following commercial uses:
  - As a garage;
  - As a bulk liquid dispensing facility, including a gasoline outlet; or
  - For the operation of dry cleaning equipment.

During this Phase One ESA, Pinchin has documented that the Phase One Property was formerly used for industrial purposes and is therefore considered an Enhanced Investigation Property. A Phase Two Environmental Site Assessment (Phase Two ESA) is automatically required at an Enhanced Investigation Property to support the filing of an RSC.

#### *6.3.1 Site Operations*

The Phase One Property was vacant.

#### *6.3.2 Hazardous Materials*

No use or storage of hazardous materials was observed at the Phase One Property during the Site reconnaissance.

#### *6.3.3 Products Manufactured*

No product manufacturing activities were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.4 By-Products and Wastes*

No manufacturing by-products or wastes were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.5 Raw Materials Handling and Storage*

No handling or storage of raw materials was observed at the Phase One Property during the Site reconnaissance.

#### *6.3.6 Drums, Totes and Bins*

No drums, totes or bins were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.7 Oil/Water Separators*

No oil/water separators were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.8 Vehicle and Equipment Maintenance*

No vehicle and equipment maintenance activities were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.9 Spills*

No evidence of spills was observed at the Phase One Property during the Site reconnaissance.

#### *6.3.10 Liquid Discharge Points*

No liquid discharge points were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.11 Processing and Manufacturing Operations/Equipment*

No processing or manufacturing operations or equipment were observed at the Phase One Property during the Site reconnaissance.

#### *6.3.12 Hydraulic Equipment*

No hydraulic equipment (e.g., elevators, in-ground hoists, loading docks) was observed at the Phase One Property during the Site reconnaissance.

#### *6.3.13 Potentially Contaminating Activities*

Based on the information provided in Sections 6.3.1 to 6.3.12, no additional PCAs were identified during the Site reconnaissance that have not been described previously in this report.

### **6.4 Written Description of Investigation**

The Phase One ESA completed by Pinchin included investigations of the Phase One Property and the Phase One Study Area outside of the Phase One Property pursuant to Sections 13 and 14 of Schedule D of O. Reg. 153/04. The main objective of these investigations was to identify PCAs at the Phase One Property or within the Phase One Study Area outside of the Phase One Property that could have resulted in APECs at the Phase One Property.

#### 6.4.1 Phase One Property

The investigation of the Phase One Property consisted of the following components:

- Review of available historical records, including FIPs, chain of title search, previous environmental reports, ERIS regulatory search, information obtained through TSSA requests, city directories and aerial photographs.
- A Site reconnaissance completed on January 19, 2021 by Mr. Kurt Frommann of Pinchin that included an assessment of the Phase One Property.
- Interviews with an individual knowledgeable of the history and operations at the Phase One Property.
- Review of information provided on-line by the MNRF for the presence of areas of natural significance.

Pinchin's investigation of the Phase One Property identified eight PCAs. The descriptions and locations of these PCAs are provided in Table 2. As per O. Reg. 153/04, all identified PCAs at the Phase One Property are considered APECs that will require investigation through the completion of a Phase Two ESA.

No areas of natural significance were identified at the Phase One Property.

Pinchin's investigation did not identify the presence of wells at the Phase One Property that currently supply water for human consumption or for agricultural purposes.

Plans identifying the locations of the on-Site PCAs and APECs for this Phase One ESA are provided as Figures 4 and 6, respectively.

#### 6.4.2 Phase One Study Area Outside of Phase One Property

The investigation of the Phase One Study Area outside of the Phase One Property consisted of the following components:

- Review of available historical records, including FIPs, ERIS regulatory search, city directories and aerial photographs.
- Visual inspection of properties from publicly-accessible areas for evidence of PCAs and water bodies.
- Review of information provided on-line by the MNRF for the presence of areas of natural significance.

Pinchin's investigation of the Phase One Study Area outside of the Phase One Property identified four PCAs that have the potential to impact soil and/or groundwater quality at the Phase One Property given their proximity to the Phase One Property, their upgradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or the nature of operations and potential contaminants related to these operations. The descriptions and locations of these PCAs are provided in Table 2. The APECs associated with these PCAs are summarized in Table 3. A total of 83 additional PCAs were identified within the Phase One Study Area outside of the Phase One Property. These additional PCAs are not considered to result in APECs at the Phase One Property given the distance from the PCAs to the Phase One Property, their downgradient or transgradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or the nature of operations and potential contaminants related to these operations. The descriptions and locations of these PCAs are provided in Table 2.

No areas of natural significance were identified within the Phase One Study Area outside of the Phase One Property.

Pinchin's investigation did not identify the presence of wells within the Phase One Study Area that currently supply water for human consumption or for agricultural purposes.

Based on a cursory review of the properties greater than 250 m (i.e., outside of the Phase One Study Area), but less than 1 km, from the Phase One Study Area, Pinchin did not note or observe any significant contaminating properties that should be included as part of this assessment (i.e., landfills, large industrial manufacturers, etc.).

Plans identifying the locations of the off-Site PCAs and associated APECs for this Phase One ESA are provided as Figures 5 and 6, respectively.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 Current and Past Uses**

The current and past land uses of the Phase One Property are listed in Table 1. The Phase One Property was owned by various individuals from as early as 1875. To the best of Pinchin's knowledge, the Phase One Property was undeveloped until the early 1880s when according to the 1883 city directory. The former buildings at both 234 and 236 O'Connor Street were reportedly used initially for residential purposes and the building at 311 Somerset Street West was reportedly used for residential, commercial and/or industrial purposes. In approximately 1972, the building at 236 O'Connor Street was reportedly used for commercial purposes as a warehouse and was subsequently demolished in 1998. The building at 234 O'Connor Street was demolished in approximately 2015. The building at 311 Somerset Street West may have been destroyed in a fire and reconstructed sometime between 1965 and 1976, and later

demolished between 1991 and 1999. The south and central portions of the Phase One Property have been an asphalt-paved parking lot since at least 1999.

It is Pinchin's opinion that the date of the first developed use of the Phase One Property was sometime prior to 1883. The date of the first developed use of the Phase One Property was determined through a review of a chain of title search, city directories and FIPs. No other historical records were available to Pinchin that provided information for determining the date of first developed use of the Phase One Property.

## **7.2 Potentially Contaminating Activities**

Table 2 summarizes the descriptions and locations of all PCAs as defined by O. Reg. 153/04 that were identified by Pinchin within the Phase One Study Area. The following presents a summary of these PCAs:

- A total of eight PCAs were documented to have occurred at the Phase One Property.
- A total of 88 PCAs were documented to have occurred within the Phase One Study Area outside of the Phase One Property. Of these off-Site PCAs, five were identified that are considered to result in APECs at the Phase One Property given their proximity to the Phase One Property, their upgradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or the nature of operations and potential contaminants related to these operations.
- The remaining 83 off-Site PCAs are not considered to result in APECs at the Phase One Property given the distance from the PCAs to the Phase One Property, their downgradient or transgradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or the nature of operations and potential contaminants related to these operations.

## **7.3 Areas of Potential Environmental Concern**

Table 3 summarizes all APECs identified during the Phase One ESA, as well as their respective PCAs, COPCs and the media which could potentially be impacted. As noted in Table 3, the Phase One ESA identified a total of 13 APECs at the Phase One Property.

The rationale used by the QP in assessing the available information to determine whether PCAs exist or have existed within the Phase One Study Area, including the Phase One Property, that represent an APEC at the Phase One Property has been provided in the preceding report sections. In general, the potential for environmental impacts to the Phase One Property was evaluated using a combined probability for a source to contaminate, and the ability of contaminants to migrate on, or to the Phase One Property. For example, a gasoline UST located on the Phase One Property, or on a property in close

proximity and/or upgradient of the Phase One Property, would exhibit a high potential for contamination (and is therefore considered a PCA resulting in an APEC at the Phase One Property) since gasoline is highly mobile in the subsurface. In contrast, shallow soil/fill with metals impacts located on a property adjacent to the Phase One Property would be considered to have a low potential for contamination given that metals generally have low mobility in the subsurface (and would not be considered a PCA resulting in an APEC at the Phase One Property). Furthermore, non-adjacent properties with PCAs located downgradient or transgradient of the Phase One Property generally do not result in APECs at the Phase One Property. Groundwater is the media through which contaminants typically migrate from property to property, and if the source of the contaminant is downgradient or transgradient of the Phase One Property, contaminated groundwater from this source cannot migrate to the Phase One Property and the downgradient or transgradient PCA would not be considered to result in an APEC at the Phase One Property.

The COPCs listed in Table 3 are APEC-specific and were determined based on several sources of information, including but not limited to, Pinchin's experience with environmental contamination and hazardous substances, common industry standards for analysis of such contaminants and point sources, literature reviews of COPCs and associated hazardous substances, and an evaluation by Pinchin of the mobility and susceptibility for migration of the COPCs in the subsurface.

The evaluation of the presence/absence of APECs at the Phase One Property was based upon the analysis of available documents, records and drawings, and personal interviews. In evaluating the Phase One Property and Phase One Study Area, Pinchin has relied in good faith on information provided by other individuals or sources as noted in this report. Pinchin has assumed that the information provided is factual and accurate, and has no reason to believe that any of the information provided in the available documentation or obtained through interviews is not factual or inaccurate.

Pinchin is not aware of any additional information that would alter the conclusions regarding the presence/absence of APECs at the Phase One Property.

#### **7.4 Phase One Conceptual Site Model**

A conceptual site model (CSM) has been created to provide a summary of the findings of the Phase One ESA. The Phase One CSM is summarized in Figures 1 through 6 which illustrate the following features within the Phase One Study Area, where present:

- Existing buildings and structures.
- Water bodies located in whole or in part within the Phase One Study Area.
- Areas of natural significance located in whole or in part within the Phase One Study Area.

- Drinking water wells located at the Phase One Property.
- Land use of adjacent properties.
- Roads within the Phase One Study Area.
- PCAs within the Phase One Study Area, including the locations of tanks.
- APECs at the Phase One Property.

The following provides a narrative summary of the Phase One CSM:

- The Phase One Property is a rectangular-shaped parcel of land approximately 0.34 acres (0.14 hectares) in size located at the northwest intersection of Somerset Street West and O'Connor Street in the City of Ottawa. The Phase One Property is vacant.
- No water bodies were identified within the Phase One Study Area. The nearest water body is the Rideau Canal, which is located approximately 850 m east of the Phase One Property.
- No areas of natural significance were identified within the Phase One Study Area.
- No drinking water wells were located on the Phase One Property.
- O'Connor Street and Somerset Street West are located adjacent to the east and south of the Phase One Property, respectively. Historical records indicate that the property located adjacent to the north of the Phase One Property has been used for residential purposes and was a historical platemaking, typesetting and binding facility. The properties located adjacent to the northwest and west of the Phase One Property have historically been predominately residential land use with exception to the property at 356 Cooper Street which was historically a dental laboratory with possible dental equipment manufacturing and 315 Somerset Street West which historically operated as a photography studio, a platemaking, typesetting and binding facility and is currently a restaurant.
- A total of 96 PCAs were identified within the Phase One Study Area, consisting of eight PCAs at the Phase One Property and 88 PCAs within the Phase One Study Area, outside of the Phase One Property. As shown on Figures 5A, 5B and 5C, 83 of the off-Site PCAs, which include ink manufacturing, processing and storage facilities, electronic and computer equipment manufacturing, metal treatment, coating, plating and finishing facilities, historical USTs, operation of dry cleaning equipment, paint manufacturing and storage, glass manufacturing, battery manufacturing and storage, hazardous waste generation, plastics manufacturing and processing, chemical manufacturing and storage, metal fabrication, shoe manufacturing, rubber manufacturing and processing, medical

equipment manufacturing, automotive repair facilities, pesticide storage, marker, crayon and pencil manufacturing, PCB storage, machinery wholesalers and distributors, publishers, coal use and/or storage, wood treating and treated wood storage are not considered to result in APECs at the Phase One Property. In making this determination, the proximity, location relative to the inferred groundwater flow direction, nature of operations and potential contaminants were considered. All other PCAs identified within the Phase One Study Area represent APECs at the Phase One Property. Figure 6 provides a detailed summary of the APECs and associated PCAs and COPCs.

- There are currently no active underground utilities at the Phase One Property. According to the Site Representative, all underground utilities are capped at Somerset Street West and/or O'Connor Street. Plans were not available to confirm the location or depths of historical utilities at the Phase One Property but are estimated to have been located approximately 2 to 3 mbgs. Based on information presented in previous environmental reports, groundwater at the Phase One Property is approximately 5.46 mbgs to 7.35 mbgs. If utility lines are still present at the Phase One Property, they are likely located well above the water table and would not act as preferential pathways for contaminant distribution and transport in the event that shallow subsurface contaminants exist at the Phase One Property.
- The Phase One Property and the surrounding properties located within the Phase One Study Area are located within marine deposits of clay and silt underlying erosional terraces as the dominant landform with channels of sand and pockets of non-marine silt. Bedrock is expected to consist of shale, limestone, dolostone and siltstone of the Georgian Bay Formation, Blue Mountain Formation, Billings Formation and Collingwood Formation. Based on data from the 2015 GHD Phase Two ESA Report, the overburden thickness on-Site (i.e., depth to bedrock) is approximately 14 to 15.5 mbgs. Soil stratigraphy consisted of fill materials to a maximum depth of 2.5 mbgs underlain by silty clay, sandy silt and/or silty sand with variations in composition to a maximum depth of 15.5 mbgs.
- The Phase One Property is generally flat with a slight grade downwards in elevation to the east. Local groundwater flow is inferred to be to the northeast, based on the topography of the area surrounding the Phase One Property and the location of the Rideau Canal and Ottawa River.

There were no deviations from the Phase One ESA requirements specified in O. Reg. 153/04 or absence of information that have resulted in uncertainty that would affect the validity of the Phase One CSM.

## **8.0 CONCLUSIONS**

Pinchin conducted this Phase One ESA in accordance with Part VII and Schedule D of O. Reg. 153/04. The purpose of the Phase One ESA was to assess the potential presence of environmental impacts at the Phase One Property due to activities at and near the Phase One Property in support of filing an RSC in accordance with O. Reg. 153/04.

Based on the findings of this Phase One ESA, Pinchin identified eight PCAs at the Phase One Property (i.e., on-Site) and 88 PCAs within the Phase One Study Area outside of the Phase One Property (i.e., off-Site). Of the off-Site PCAs, 83 are not considered to result in APECs at the Phase One Property given their distance from the Phase One Property, their downgradient or transgradient location with respect to the inferred groundwater flow direction at the Phase One Property and/or the nature of operations and potential contaminants related to these operations. The remaining five off-Site PCAs and the eight on-Site PCAs have resulted in a total of 13 APECs at the Phase One Property. It is Pinchin's opinion that these 13 PCAs may have impacted soil and groundwater quality at the Phase One Property and, as such, result in APECs at the Phase One Property that warrant further investigation prior to the submittal of an RSC.

Pinchin recommends that a Phase Two ESA be conducted at the Phase One Property as an "assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the location and concentration of one or more contaminants in the land or water on, in or under the property". Pinchin concludes that one or more contaminants originating from PCAs located on the Phase One Property and within the Phase One Study Area outside of the Phase One Property may have affected land or water on, in, or under the Phase One Property. Therefore, Pinchin recommends that a Phase Two ESA be conducted prior to filing an RSC for the Phase One Property.

It should be noted that the references and sources for the information used in evaluating the Phase One Property are provided in the relevant sections of this report. Specific references are also summarized in Section 9.0.

### **8.1 Signatures**

This Phase One ESA was undertaken under the supervision of Robert MacKenzie, B.Sc., P.Geo., QP<sub>ESA</sub> in accordance with the requirements of O. Reg. 153/04 to support the filing of an RSC for the Phase One Property. The conclusions and recommendations provided in this report represent the best judgement of the assessor based on the Site conditions observed on January 19, 2021, and a review of available historical information and information obtained from interviews.

This report has been issued without having received a response to a request for information from the MECP. Pinchin reserves the right to amend our conclusions and recommendations based on information obtained from the regulatory agencies.

We trust that the information provided in this report meets your current requirements.

## **8.2 Terms and Limitations**

This Phase One ESA was performed in order to identify potential issues of environmental concern associated with the property located at 234 and 236 O'Connor Street & 311 Somerset Street West in Ottawa, Ontario (Site), at the time of the Site reconnaissance. This Phase One ESA was performed in general compliance with currently acceptable practices for environmental site investigations, and specific Client requests, as applicable to this Site. This report was prepared for the exclusive use of Somerset and O'Connor Limited Partnership (Client) subject to the terms, conditions and limitations contained within the duly authorized proposal for this project. Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third parties. Pinchin accepts no responsibility for damages suffered by any third party as a result of decisions made or actions conducted.

If additional parties require reliance on this report, written authorization from Pinchin will be required. Such reliance will only be provided by Pinchin following written authorization from the Client. Pinchin disclaims responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs. No other warranties are implied or expressed. Pinchin will not provide results or information to any party unless disclosure by Pinchin is required by law.

The information provided in this report is based upon analysis of available documents, records and drawings, and personal interviews. In evaluating the Site, Pinchin has relied in good faith on information provided by other individuals noted in this report. Pinchin has assumed that the information provided is factual and accurate. In addition, the findings in this report are based, to a large degree, upon information provided by the current owner/occupant. Pinchin accepts no responsibility for any deficiency, misstatement or inaccuracy contained in this report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or contained in reports that were reviewed. The scope of work for this Phase One ESA did not include a visual or intrusive investigation for designated substances (e.g., asbestos, mould, PCB-containing electrical equipment, etc.) and, therefore, these materials may be present at the Site.

Pinchin makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to, ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to interpretation and these interpretations may change over time.

Ontario Regulation 153/04 does not apply to environmental auditing or environmental management systems. Therefore, with respect to Site operations and conditions, compliance with applicable federal,

provincial or municipal acts, regulations, laws and/or statutes was not evaluated as part of the Phase One ESA.

1949		commercial.	commercial use	portion of the Phase One Property.
1949-1950	A.E. Veitch & Son Limited	Residential and/or commercial.	Residential use and commercial use	The 1949 city directory notes that the land use was residential and/or commercial.
1950-1950	Ainsley C. Shipman	Residential and/or commercial.	Residential use and commercial use	None.
1950-1951	Thomas H.C. Shipman	Residential and/or commercial.	Residential use and commercial use	None.
1951-1955	Allan C. Stinson and William C.G. Collins	Residential and/or commercial.	Residential use and commercial use	The 1954 city directory notes that the land use was residential and/or commercial. The 1955 FIP depicts at least one building structure in this portion of the Phase One Property.
1955-1956	Thomas H.C. Shipman	Residential and/or commercial.	Residential use and commercial use	The 1955 FIP depicts at least one building structure in this portion of the Phase One Property.
1956-1957	Thomas Shipman Limited	Residential and/or commercial.	Residential use and commercial use	None.
1957-1958	Hain Holdings Limited	Residential and/or commercial.	Residential use and commercial use	The 1958 aerial photograph at least one building structure in this portion of the Phase One Property.
1958-2015	Searl Wing Yuen and Doris Mae Yuen	Residential, commercial and/or industrial use.	Residential use, commercial use and industrial use	<p>The city directory listings from 1959 through to 2011 note the land use was residential and/or commercial. The 1963 FIP depicts at least one building structure in this portion of the Phase One Property. The 1958 aerial photograph indicates at least one building structure depicts at least one building structure in this portion of the Phase One Property. This portion of the Phase One Property was a commercial parking lot from 1965 to 2015 because on aerial photographs from 1965 to 2015.</p> <p>Based on information presented in previous environmental reports, the Phase One Property has been used for office space, aluminum product manufacturing, insulation manufacturing and a funeral home or residential purposes since the late 1800's.</p>
2015-Present	Gemstone Corporation	Commercial parking lot.	Commercial use	The 2015 and 2017 aerial photographs indicate this portion of the Phase One Property was a commercial parking lot. Based on information from the Site Representative and observations made during the Site reconnaissance, this portion of the Phase One Property has been a commercial parking lot since at

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc
				least 2015.

\*There is no historical evidence on title of how the property went from Henry McCormick to Tyler & Moberly between 1878 and 1885.

**234 O'Connor Street**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc
Pre-1875	E. Tylee & E. Moberly	Unknown	Agricultural or other use	None.
1875-1877	Henry McCormick	Unknown	Agricultural or other use	None.
1877-1878	Jessie S. Patten (and Alex G.)	Unknown	Agricultural or other use	None.
1878	Henry McCormick*	Unknown	Agricultural or other use	None.
1884	E. Tylee & E. Moberly*	Unknown	Agricultural or other use	None.
1884-1926	Patrick Quinn	Residential.	Residential use	The 1875, 1901, 1915 and 1922 FIPs depict at least one building structure in this portion of the Phase One Property. According to the Site Representative, this portion of the Phase One Property has historically only been used for residential land use.
1926-1946	George A. Quinn	Residential.	Residential use	The 1928, 1938 and 1945 aerial photographs indicate one building structure.
1946-1951	Anna Poulen and James E. Poulen	Residential.	Residential use	The 1948 FIP depicts at least one building structure in this portion of the Phase One Property.
1951-1954	Gertrude C. Smith	Residential.	Residential use	None.
1954-1954	Thomas H.C. Shipman	Residential.	Residential use	None.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc
1954-1959	Bernard B. Bell	Residential.	Residential use	The 1955 FIP and 1958 aerial photograph indicate at least one building structure in this portion of the Phase One Property.
1959-1960	Edifice Holdings Limited	Residential.	Residential use	None.
1960-1964	Belle Gitterman and Sylvia Shinder	Residential.	Residential use	The 1963 FIP depicts at least one building structure in this portion of the Phase One Property.
1964-1965	George A. Gray	Residential.	Residential use	The 1965 aerial photograph indicates one building structure in this portion of the Phase One Property.
1965-1966	Georgia Gray	Residential.	Residential use	None.
1966-1969	Joseph Tchorewski	Residential.	Residential use	None.
1969-1977	William Kereluik and Adele Kereluik	Residential.	Residential use	The 1976 aerial photograph indicates one building structure in this portion of the Phase One Property.
1977-2015	Brian Yuen and Garry Yuen (and Derek Yuen)	Residential.	Residential use	The 1985, 1991, 199, 2005 and 2015 aerial photographs indicate one building structure in this portion of the Phase One Property.
2015-Present	Gemstone Corporation	Vacant.	Residential use	Based on information collected from the Site Representative and during the Site reconnaissance, this portion of the Phase One Property has been vacant and grass covered since 2015.

\*There is no historical evidence on title of how the property went from Henry McCormick to Tyler & Moberly between 1878 and 1884.

### **236 O'Connor Street**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc
Pre-1875	E. Tylee & E. Moberly	Unknown.	Agricultural or other use	None.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc
1875-1877	Henry McCormick	Unknown.	Agricultural or other use	None.
1877-1878	Jessie S. Patten (and Alex G. )	Unknown.	Agricultural or other use	None.
1878	Henry McCormick*	Unknown.	Agricultural or other use	None.
1884	E.Tylee & E. Moberly*	Unknown.	Agricultural or other use	None.
1884-1926	Patrick Quinn	Residential.	Residential use	The 1895, 1901, 1915 and 1922 FIPs depict at least one building structure in this portion of the Phase One Property.
1926-1962	George J. McIlraith	Residential.	Residential use	The 1928, 1938, 1945 and 1958 aerial photographs, and 1948 and 1955 FIPs depict at least one building structure in this portion of the Phase One Property.
1962-2015	Searl Wing Yuen	Residential, commercial warehouse and commercial parking lot.	Residential use and commercial use	The 1963 FIP and 1965 aerial photograph depict at least one building structure in this portion of the Phase One Property. The 1976 and 1985 aerial photographs depict a portion of a building structure in this portion of the Phase One Property. The 1991, 1999, 2005 and 2015 aerial photographs indicate that this portion of the Phase One Property was a commercial parking lot. Based on information provided in a previous environmental report, this portion of the Phase One Property was used as a commercial warehouse from at least 1972 to 1998.
2015-Present	Gemstone Corporation	Commercial parking lot.	Commercial use	The 2015 and 2017 aerial photographs indicate this portion of the Phase One Property was a commercial parking lot. Based on information from the Site Representative and observations made during the Site reconnaissance, this portion of the Phase One Property has been a commercial parking lot since at least 2015.

\*There is no historical evidence on title of how the property went from Henry McCormick to Tyler & Moberly between 1878 and 1884.

*Notes:*

- 1 - for each owner, specify one of the following types of property use (as defined in O.Reg. 153/04) that applies: Agriculture or other use  
Commercial use  
Community use Industrial use  
Institutional use Parkland use  
Residential use
- 2 - when submitting a record of site condition for filing, a copy of this table must be attached

**Table 2 - Table of Potentially Contaminating Activities**

PCA Designation	Location of Potentially Contaminating Activity	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Distance from Phase One Property (metres)	Location Relative to Inferred Groundwater Flow Direction <sup>1</sup>	Contributing to an APEC at the Site	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
PCA-1	North portion of the Phase One Property (234 O'Connor Street)	Other – Historical Fire	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-2	North portion of the Phase One Property (234 O'Connor Street)	Item 28 - Gasoline and Associated Products Storage in Fixed Tanks	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-3	North portion of the Phase One Property (234 O'Connor Street)	Item 39 - Paints Manufacturing, Processing and Bulk Storage	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-4	Central portion of the Phase One Property (236 O'Connor Street)	Item 28 - Gasoline and Associated Products Storage in Fixed Tanks	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-5	South portion of the Phase One Property (311 Somerset Street West)	Other – Historical Fire	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-6	South portion of the Phase One Property (311 Somerset Street West)	Other - Industrial Operations	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-7	South portion of the Phase One Property (311 Somerset Street West)	Item 34 - Metal Fabrication	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil and Groundwater
PCA-8	Entire Phase One Property	Item 30 - Importation of Fill Material of Unknown Quality	On-Site	NA – On-Site PCA	NA - On-Site PCA	Yes	Soil
PCA-9	356 Cooper Street	Other – Dental Products Manufacturing	Off-Site	Northwest adjacent	Upgradient	Yes	Groundwater

PCA-10	226 O'Connor Street	Item 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	North adjacent	Downgradient	Yes	Groundwater
PCA-11	315 Somersset Street West	Item 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	West Adjacent	Upgradient	Yes	Groundwater
PCA-12	364 Cooper Street	Item 28 - Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	10	Upgradient/Transgradient	Yes	Groundwater
PCA-13	308 and 312 Somerset Street West	Item 37 - Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site	20	Upgradient	Yes	Groundwater
PCA-14	300 Somerset Street West	Item 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	25	Transgradient	No	Not Applicable
PCA-15	338 Somerset Street West	Item 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	45	Upgradient	No	Not Applicable
PCA-16	338 Somerset Street West	Item 19 - Electronic and Computer Equipment Manufacturing	Off-Site	45	Upgradient	No	Not Applicable
PCA-17	338 Somerset Street West	Item 33 - Metal Treatment, Coating, Plating and Finishing	Off-Site	45	Upgradient	No	Not Applicable
PCA-18	374 Cooper Street	Item 28 - Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	60	Upgradient/Transgradient	No	Not Applicable
PCA-19	337 MacLaren Street	Item 37 - Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site	70	Upgradient/Transgradient	No	Not Applicable

PCA-20	375 Cooper Street	Item 39 - Paints Manufacturing, Processing and Bulk Storage	Off-Site	70	Transgradient	No	Not Applicable
PCA-21	375 Cooper Street	Item 29 - Glass Manufacturing	Off-Site	70	Transgradient	No	Not Applicable
PCA-22	375 Cooper Street	Item 6 - Battery Manufacturing, Recycling and Bulk Storage	Off-Site	70	Transgradient	No	Not Applicable
PCA-23	273 Bank Street	Item 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	70	Upgradient/Transgradient	No	Not Applicable
PCA-24	325 Cooper Street	Other – Waste Generation	Off-Site	70	Downgradient	No	Not Applicable
PCA-25	396 Cooper Street	Item 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	85	Transgradient	No	Not Applicable
PCA-26	270 Somerset Street West	Other – Waste Generation	Off-Site	90	Transgradient	No	Not Applicable
PCA-27	300 Lisgar Street	Item 28 - Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	90	Transgradient	No	Not Applicable
PCA-28	300 Lisgar Street	Item 43 - Plastics (including Fibreglass) Manufacturing and Processing	Off-Site	90	Transgradient	No	Not Applicable
PCA-29	300 Lisgar Street	Item 8 - Chemical Manufacturing, Processing and Bulk Storage	Off-Site	90	Transgradient	No	Not Applicable

PCA-30	300 Lisgar Street	Item 34 - Metal Fabrication	Off-Site	90	Transgradient	No	Not Applicable

<p>APEC-12 (Fill and vent pipes indicating a possible AST or UST observed at 364 Cooper Street)</p>	<p>Northwest portion of the Phase One Property</p>	<p>Item 28 - Gasoline and Associated Products Storage in Fixed Tanks</p>	<p>Off-Site</p>	<p>PHCs BTEX PAHs</p>	<p>Groundwater</p>

APEC-13 (Former dry cleaning operation at 308 and 312 Somerset Street West)	South portion of the Phase One Property	Item 37 - Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site	VOCs	Groundwater
--	---	--	----------	------	-------------

**Notes:**

- 1 - Areas of potential environmental concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
  - (a) identification of past or present uses on, in or under the phase one property, and
  - (b) identification of potentially contaminating activity.
- 2 - Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
- 3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

**List of Method Groups:**

ABNs	PCBs	Metals	Electrical Conductivity
CPs	PAHs	As, Sb, Se	Cr (VI)
1,4-Dioxane	THMs	Na	Hg
Dioxins/Furans, PCDDs/PCDFs	VOCs	B-HWS	Methyl Mercury
OCs	BTEX	Cl-	Low or high pH,
PHCs	Ca, Mg	CN-	SAR

- 4 - When submitting a record of site condition for filing, a copy of this table must be attached

**LOT 41 (North Somerset Street)**  
**REGISTERED PLAN 12281**  
**CITY OF OTTAWA**

FARLEY, SMITH & DENIS SURVEYING LTD. 2015

Scale 1: 200

**Metric Note**

Distances and coordinates on this plan are in metres and can be converted to feet by dividing by 0.3048.

**Distance Note**

Distances shown on this plan are ground distances and can be converted to grid distances by multiplying by the combined scale factor of 0.9993.

**Bearing Note**

Bearings herein are grid bearings derived from the Smart-Net Real Time Network and are referred to the Central Meridian of MTM Zone 9 (76°30' West Longitude) Nad-83 (Original).

**PART 2**

- REGISTERED RIGHTS-OF-WAY/EASEMENTS**  
No right-of-way or easements were found to be registered against the subject property.
- PROPERTY IMPROVEMENTS**  
Fencing is displaced up to 0.02 metres from the property lines.
- COMPLIANCE WITH MUNICIPAL ZONING BYLAWS**  
Compliance is not certified by this report.
- ADDITIONAL REMARKS**  
The building ties are to the untargeted concrete foundation walls.

**THIS REPORT WAS PREPARED FOR:**  
---XXX--- ("The Client"), the Client's solicitors, mortgages, and other related parties. The undersigned accepts no responsibility for use by other parties. See Part 2 of this Report.

**Surveyor's Certificate**  
I certify that:

- This survey and plan are correct and in accordance with the Surveys Act, the Surveyors Act and the Regulations made under them.
- The survey was completed on the 21st day of July, 2015.

The blue-coloured flags represent inspection reports below that are hyperlinked to their location in this document.

This document is owned by Opta Information Intelligence Inc. and is subject to copyright protection. Please see the full Terms and Conditions at the front of this document.

## Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Use

The Reports are for sole use of the customer. Reports are not to be disassembled, decompiled, copied, reproduced, transmitted, displayed, performed, distributed, rented, sub-licensed, altered, or otherwise used in a manner contrary to the intent of Opta's web delivery service.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

#### BRIEF DESCRIPTION OF LAND:

311 Somerset St W, Ottawa  
Lot 41, Plan 12281, N/S Somerset  
PIN: 04119-0016

LAST REGISTERED OWNER: YUEN, Searl Wing  
YUEN, Doris Mae

JT

#### CHAIN OF TITLE:

Deed 13133 registered Dec 3, 1875  
From E. Tylee & E. Moberly to Henry McCormick

Deed 16128 registered Dec 21, 1877  
From Henry McCormick to Jessie S. Patten

Deed 16316 registered March 1, 1878  
From Alex G. and Jessie S. McCormick to Henry McCormick

Deed 23770 registered June 10, 1885  
From E. Tylee & E. Moberly to William Cherry

Deed 24202 registered Oct 15, 1885  
From William Cherry to Amanda Egleson

Deed 82693 registered Sept 6, 1907  
From Estate of Amanda Cuzner to Charles W. Gorrell

Deed 157891 registered May 5, 1921  
From Estate of Charles W. Gorrell to John E. Craig

Deed 228134 registered June 3, 1939  
From Carleton Craig, Isabel Craig and Ethelwyn Craig to Lillian A. Craig

Deed 268996 registered Jan 19, 1947  
From Lillian A. Craig and Estate of John Craig to Thomas E. Veitch

Deed 278053 registered June 30, 1949  
From Thomas E. Veitch to A. E. Veitch & Son Limited

Deed 287272 registered Nov 30, 1950  
From A. E. Veitch & Son Limited to Ainsley C. Shipman

Deed 287451 registered Dec 8, 1950  
From Ainsley C. Shipman to Thomas H. C. Shipman

Deed 297503 registered Dec 28, 1951  
From Thomas H. C. Shipman to Allan C. Stinson and William C. G. Collins

Deed 333820 registered June 1, 1955  
From Allan C. Stinson and William C. G. Collins to Thomas H. C. Shipman

Deed 342131 registered Jan 16, 1956  
From Thomas H. C. Shipman to Thomas Shipman Limited

Deed 354739 registered Jan 2, 1957  
From Thomas Shipman Limited to Hain Holdings Ltd.

Deed 369143 registered Feb 27, 1958  
From Hain Holdings Limited to Searl Wing Yuen and Doris Mae Yuen

\*\*There is no evidence on title of how the property went from Henry McCormick in deed 16316 to Tyler & Moberly in deed 23770. There were no deed entries in the abstract between these 2 deeds.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

**Description:** On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek

**Location:**  
**Region:**  
**Ministry District:**

Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

**Penalty Imposed:**  
**Description:**

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to pay the fine.

**Investigation 1:**  
**Investigation 2:**  
**Penalty Imposed:**  
**Description:**

**Location:**  
**Region:**  
**Ministry District:**

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Dec 31, 2020**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2018**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Dec 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Dec 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Nov 2020**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Dec 31, 2020**

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial

DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Dec 31, 2020**

**Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Dec 31, 2020**

**Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Oct 31, 2020**

**Environmental Issues Inventory System:**

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Sep 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2018**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Sep 30, 2020**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Dec 31, 2020**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 31, 2020**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Dec 31, 2020**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Nov 2020**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Dec 31, 2020**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Mar 2020; Jul 2020 - Aug 2020**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**APPENDIX H**  
**MECP FOI Search Results**

This form is for requesting documents which are in the Ministry's files on environmental concerns related to properties. Please refer to the guide on the completion and use of this form. Our fax no. is (416) 314-4285.

**ID - Unit ID**      **Unit Name** - Generalized geological unit classification

**Type (All)** - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

**Type (Primary)** - The primary geological unit number or code for the primary rock type in an individual polygon

**Type (Secondary)** - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

**Type (Tertiary)** - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

**Rock Type (Primary)** - Rock type or sub-unit description

**Status (Primary)** - The Stratigraphic unit. Divided into:

- Supergroup (two or more groups and lone formations)
- Group (two or more formations)
- Formation (primary unit of lithostratigraphy)
- Member (named lithologic subdivision of a formation)
- Bed (named distinctive layer in a member or formation)

**Super Eon (Primary)** - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

PRECAMBRIAN (0.542 Ga to <3.85 Ga)

**Eon (Primary)** - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

- ARCHEAN (2.5 Ga to <3.85 Ga)
- PROTEROZOIC (0.542 Ga to 2.50 Ga)
- PHANEROZOIC (Present to 542.0 Ma)

**Era (Primary)** - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

- |   |  |
|---|--|
| MESOARCHEAN (2.8 Ga to 3.2 Ga)              | MESOPROTEROZOIC (1.0 Ga to 1.6 Ga)                     |
| NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga)       | EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga) |
| NEOARCHEAN (2.5 Ga to 2.8 Ga)               | NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga)            |
| PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga)         | PALEOZOIC (251.0 Ma to 542.0 Ma)                       |

**Period (Primary)** - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

- CAMBRIAN (488.3 Ma to 542.0 Ma)
- ORDOVICIAN (443.7 Ma to 488.3 Ma)
- SILURIAN (416.0 Ma to 443.7 Ma)
- DEVONIAN (359.2 Ma to 416.0 Ma)
- MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)
- JURASSIC (145.5 Ma to 199.6 Ma)
- CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)

**Epoch (Primary)** - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

- |                                  |                                      |
|----------------------------------|--------------------------------------|
| LOWER ORDOVICIAN                 | UPPER SILURIAN                       |
| MIDDLE ORDOVICIAN                | LOWER DEVONIAN                       |
| UPPER ORDOVICIAN                 | MIDDLE DEVONIAN                      |
| MIDDLE AND LOWER SILURIAN        | UPPER DEVONIAN                       |
| UPPER SILURIAN TO LOWER DEVONIAN | LOWER CRETACEOUS AND MIDDLE JURASSIC |

**Province (Primary)** - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

- SUPERIOR
- SOUTHERN
- SUPERIOR
- GRENVILLE

**ID** - ID applied to the Unit

**Unit Name** - Name of deposit

**Deposit Type Code** - The geological unit number taken from the original map legend.

**Deposit Age** - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

**Map Number** - Original map series number, eg., 'M2402' or 'P1973'. Each sgu\_point feature is tagged to its original map.

**Map Name** - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

**Source Map Scale** - The scale at which the original map was captured, e.g., '1:50 000'

**Primary Material** - This attribute provides the user with information regarding the most prevalent material present within a given area.

**Primary Material Modifier** - This attribute provides the user with a more refined description of the lithological classification of the primary material.

**Secondary Material** - This attribute provides the user with information regarding subordinate materials present within a given area.

**Primary General** - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

**Primary General Modifier** - This attribute provides the user with a refined interpretation of the primary genetic modifier.

**Veneer** - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

**Sub Episode** - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

**Sub Episode** - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

**Phase** - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

**Stratus Modifier** - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

**Provenance** - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

**Carbon Content** - This attribute provides the user with information regarding the carbonate content of till.

**Formation** - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

**Permeability** - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

**Material Description** - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.

## Property Information

Order Number:	21011400150p
Date Completed:	January 19, 2021
Project Number:	246162
Project Property:	246162 311 Somerset Street West Ottawa ON K2P 0J8
Coordinates:	
Latitude:	45.4162153
Longitude:	-75.6947834
UTM Northing:	5029423.09251 Metres
UTM Easting:	445638.364118 Metres
UTM Zone:	UTM Zone 18T
Elevation:	75.88 m
Slope Direction:	W

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography as well as hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

# Topographic Information

The previous topographic map(s) show general topographic information in the surrounding area of the project property, using Toporama data or a provincial source when available. Below are shaded relief map(s), derived from Digital Elevation data to depict terrain in further detail.

Topographic information at project property:

Elevation: 75.88 m  
Slope Direction: W

# Hydrologic Information

## Wetland

This map shows wetland existence. Data coverage is shown to the right. Gray indicates no data available in the area.

 Marsh

# Geologic Information

## Bedrock Geology

This map shows bedrock geologic units in the area. Please refer to the report for detailed descriptions. Data coverage is shown to the right. Gray indicates no data available in the area.

The block contains a north arrow pointing upwards and the logo for E R I S Environmental Risk Information Services. The logo consists of the letters 'E R I S' in a bold, sans-serif font, with a stylized graphic of three stacked horizontal bars to the right. Below the logo, the text 'ENVIRONMENTAL RISK INFORMATION SERVICES' is written in a smaller font.

## Geologic Information

Detailed bedrock geology information about each unit within the search radius is provided below.

---

### Unit ID 19051

Unit Name:  
Rock Type: Shale, limestone, dolostone, siltstone  
Strata: Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member  
Super Eon:  
Eon: PHANEROZOIC (Present to 542.0 Ma)  
Era: PALEOZOIC (251.0 Ma to 542.0 Ma)  
Period: ORDOVICIAN (443.7 Ma to 488.3 Ma)  
Epoch: UPPER ORDOVICIAN  
Province:  
Tectonic Zone:

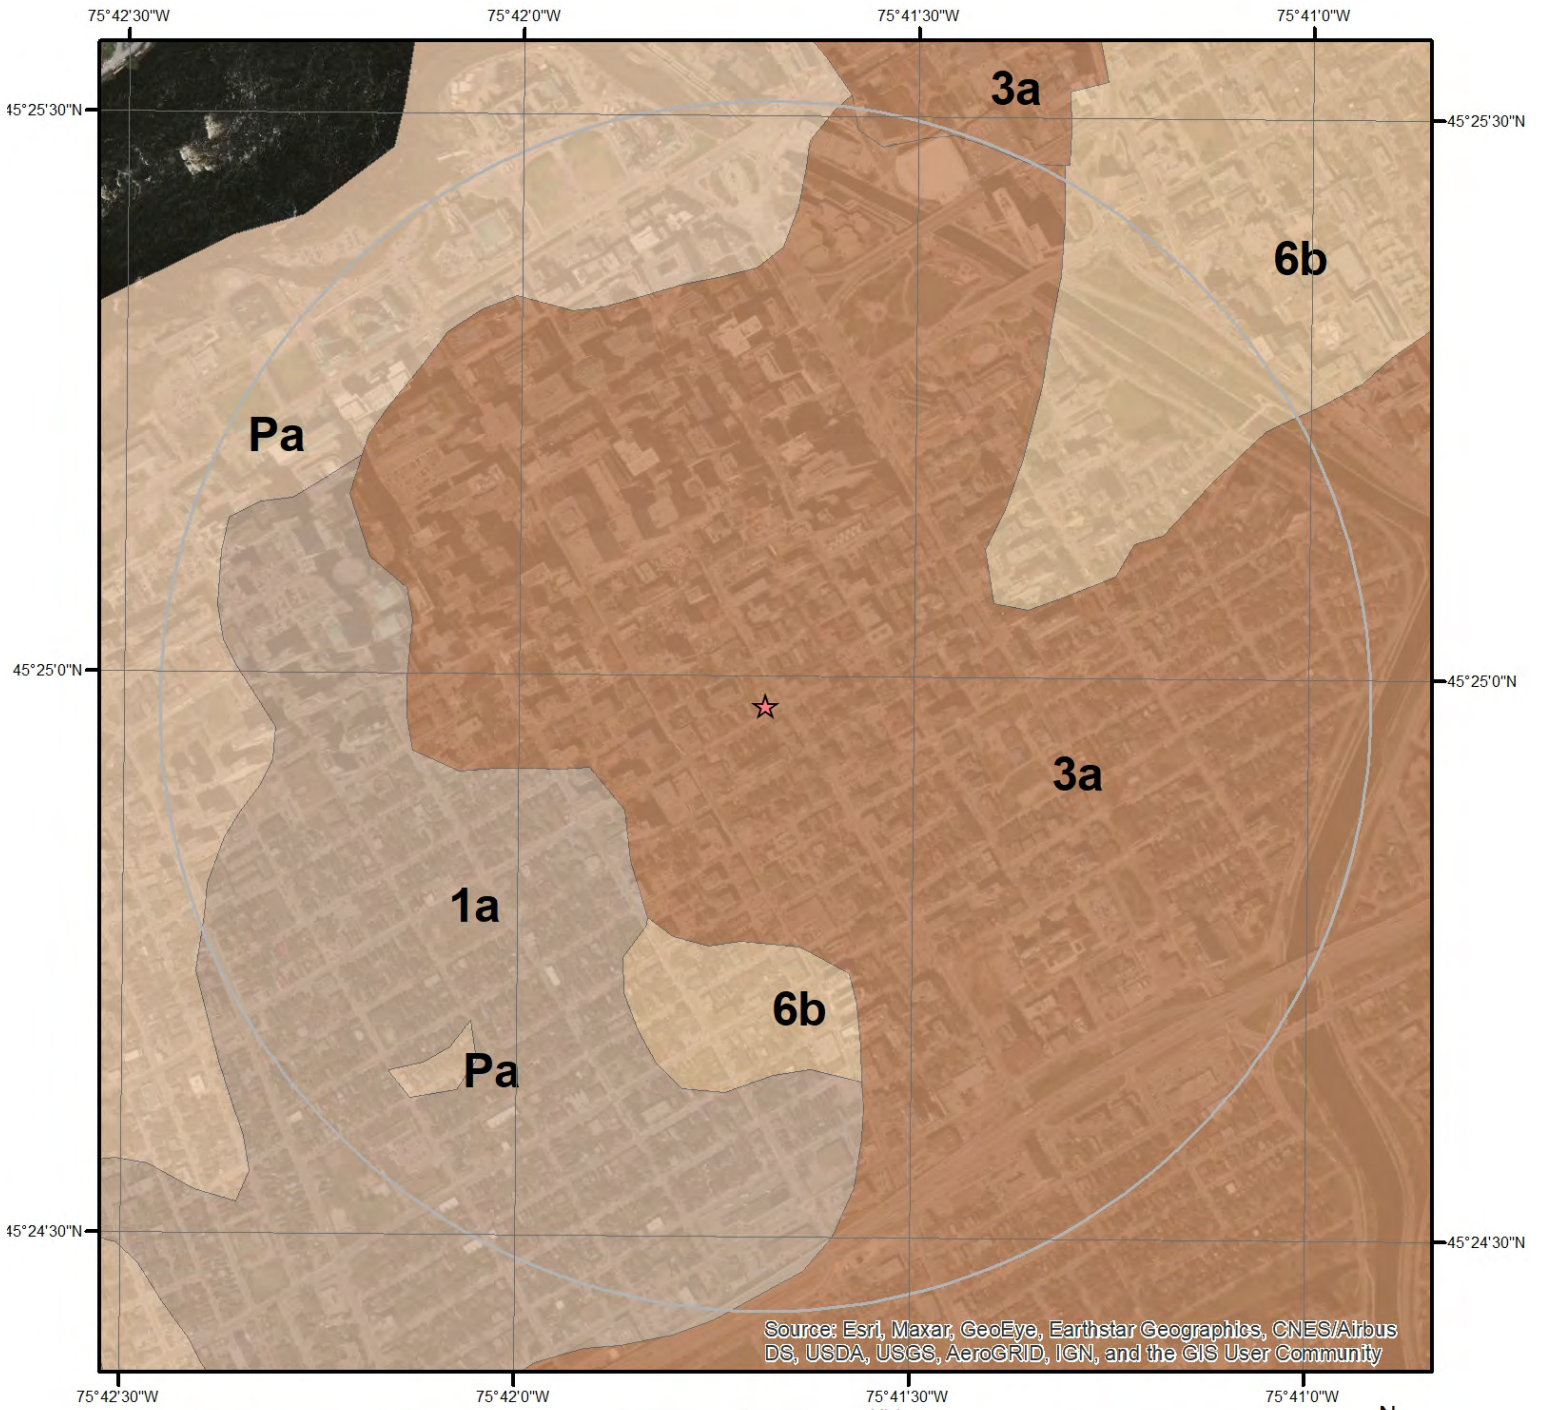

---

### Unit ID 19242

Unit Name:  
Rock Type: Limestone, dolostone, shale, arkose, sandstone  
Strata: Ottawa Group; Simcoe Group; Shadow Lake Formation  
Super Eon:  
Eon: PHANEROZOIC (Present to 542.0 Ma)  
Era: PALEOZOIC (251.0 Ma to 542.0 Ma)  
Period: ORDOVICIAN (443.7 Ma to 488.3 Ma)  
Epoch: MIDDLE ORDOVICIAN (now considered UPPER DEVONIAN)  
Province:  
Tectonic Zone:

# Geologic Information

## Surficial Geology

This map shows surficial geologic labels in the area. Please refer to the report for detailed descriptions. Data coverage is shown to the right. Gray indicates no data available in the area.

A legend box containing a gray square and a brown square. Below the legend is the ERISS logo, which consists of the letters 'ERISS' in a bold, sans-serif font, with 'ENVIRONMENTAL RISK INFORMATION SERVICES' written in smaller text underneath. To the right of the logo is a stylized graphic of three stacked, slightly offset rectangular blocks in shades of green and yellow.

## Geologic Information

Detailed surficial geology information about each unit within the search radius is provided below.

---

### Unit ID Pa

Geological Deposit:	Bedrock
Deposit Age:	Paleozoic
Primary Material:	Paleozoic Bedrock
Secondary Material:	
Primary General:	
Primary General Modifier:	
Veneer:	clay, silt, sand, gravel, diamicton
Episode:	
Sub Episode:	
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	Variable
Material Description:	Limestone, dolomite, sandstone, and locally shale; relatively flat lying; mainly occurring as bare, tabular outcrops; includes areas thinly veneered by unconsolidated Quaternary sediments up to 1 m (3 ft) thick.

---

### Unit ID 3a

Geological Deposit:	Offshore marine deposits
Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	clay, silt
Secondary Material:	
Primary General:	glaciomarine
Primary General Modifier:	foreshore/basinal
Veneer:	silt, sand
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	Low
Material Description:	Clay and silt underlying erosional terraces; upper part of marine deposits removed to variable depths by fluvial erosion so in places clay is uniform blue-grey; unit includes lenses, bars and channel fills to sand and pockets of nonmarine silt that were formed during terrace (or channel) cutting.

---

### Unit ID 6b

Geological Deposit:	Alluvial deposits
Deposit Age:	Recent

## Geologic Information

Primary Material:	sand
Secondary Material:	silt
Primary General:	fluvial
Primary General Modifier:	abandoned floodplain
Veneer:	
Episode:	Hudson
Sub Episode:	
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	Variable
Material Description:	Medium grained stratified sand with some silt; in the form of fluvial terraces and channels cut in marine clay, and bars and spits within abandoned channels.

---

### Unit ID 1a

Geological Deposit:	Till
Deposit Age:	Quaternary
Primary Material:	diamicton
Secondary Material:	
Primary General:	glacial
Primary General Modifier:	
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	N-NE
Carbon Content:	
Formation:	Undifferentiated silty-sandy till on Paleozoic terrain
Permeability:	Low-Medium
Material Description:	Sandy and silty compact diamicton, grey at depth but brown where oxidized; calcareous where derived from sedimentary rocks and not leached; consists dominantly of lodgment till. In areas that lie below marine limit (198 m a.s.l.) it is overlain by a discontinuous lag consisting of gravel, sand and boulders

# Soil Information

## Soil Map

This map shows soil units around the target property. Please refer to the report for detailed soil descriptions.

## Soil Information

Detailed soil information about each unit within the search radius is provided below.

## Radon Information

Detailed radon information for the project property is provided below.

### Radon Zone Information

---

**ID:** 144852 **Radon Rank:** LOW

### Health Canada Radon Information

---

**Health Region:** 3551  
**Health Region Name:** City of Ottawa Health Unit  
**Province or Territory:** ON  
**Number Homes in Survey:** 64  
**% Below 200 Bq/m3:** 93.8  
**% Above 200 Bq/m3:** 6.2  
**200 to 600 Bq/m3:** 6.2  
**% Above 600 Bq/m3:** 0

## Area of Natural and Scientific Interest Information

There is no ANSI unit available in this area.

## Area of Natural and Scientific Interest Information

Detailed ANSI information is provided below.

No records found for the project property or surrounding properties.

## **Federal Sources**

### **Bedrock Geology of Canada**

The Geological Map of Canada is scaled at 1:5,000,000. This map is created by Geological Survey of Canada and published by Natural Resources Canada.

**BEDROCK GEOLOGY**

### **Health Canada Radon Information**

This source is the results from the Cross-Canada Survey of Radon Concentrations in Homes, a two-year study conducted by Health Canada's National Radon Program. The aims of this study were to obtain an estimate of the proportion of the Canadian population living in homes with radon gas levels above the guideline of 200 Bq/m<sup>3</sup>, to identify previously unknown areas where radon gas exposure may constitute a health risk, and to build, over time, a map of indoor radon gas exposure levels across Canada.

**RADON**

### **National Energy Board Wells**

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**NEBP**

### **Soil Landscapes of Canada (SLC)**

Major characteristics of soil and land such as surface form, slope, water table depth, permafrost and lakes.

**SLC**

### **Surficial Geology of Canada**

This map contains information on surficial materials and associated landforms left by the retreat of the last glaciers and non glacial environments. It is based on compilation of existing maps. This data was authored by the Geological Survey of Canada and published by Natural Resources Canada.

**SURFICIAL GEOLOGY**

### **Toporama**

Toporama covers the entire area of Canada's landmass and provides topographic, geo-referenced, and symbolic information in a raster format at 1:50,000 scale. This is a digital topographic reference product made available by Natural Resources Canada (NRCan).

**TOPORAMA**

## **Provincial Sources**

### **Area of Natural and Scientific Interest**

Areas of Natural and Scientific Interest (ANSIs) are lands and waters with features that are important for natural heritage protection, appreciation, scientific study or education. This dataset is made available by Ontario Ministry of Natural Resources.

**ANSI**

### **Bedrock Geology of Ontario**

The Bedrock Geology layer shows the distribution of bedrock units underlying Ontario at a 1:250,000 scale. The geology of the province consists of Precambrian rocks of the Canadian Shield and Phanerozoic sedimentary rocks that overlie the Canadian Shield. This layer was compiled by the Precambrian Geoscience Section of Ontario Geological Survey.

**BEDROCK GEOLOGY**

### **Ontario Detailed Soil Survey (DSS3)**

Soil surveys have been published for most of the agricultural areas, and many surrounding areas, across Canada. Data from these surveys comprise the most detailed soil inventory information in the National Soil DataBase. Data is made available by Agriculture and Agri-Food Canada

**SOIL SURVEY**

### **Ontario Oil and Gas Wells**

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSRLibrary has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**OOGW**

### **Provincial Groundwater Monitoring Network**

**GROUNDWATER**

## Appendix

Groundwater level and chemistry data from monitoring wells that are part of the Provincial Groundwater Monitoring Network (PGMN) Program. Precipitation data (rain) is also available for some sites. This data is provided by Ontario Ministry of Environment and Climate Change.

### **Surficial Geology of Ontario**

The Surficial Geology dataset contains a layer depicting the distribution and characteristics of surficial deposits across southern Ontario. This data set is authored by the Ontario Geological Survey.

**SURFICIAL GEOLOGY**

### **Topographic Map of Ontario**

The Ontario Basic Mapping program provides a relationship between topographic information and the provincial geographical referencing grid, thereby forming the foundation for a comprehensive provincial geographical referencing system. This data is made available by the Ontario Ministry of Natural Resources and Forestry. This is ERIS self-designed topographic map template at 1:10,000.

**TOPOGRAPHIC MAP**

### **Water Well Information System**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**WWIS**

### **Wetlands of Ontario**

The Ministry of Natural Resources and Forestry has made available a database of wetlands in Ontario. Certain attributes identify wetlands that have been evaluated with the Ontario Wetland Evaluation System (OWES), and of those which ones have been designated as Provincially Significant Wetlands (PSW).

**WETLAND**

## **Private Sources**

### **Oil and Gas Wells**

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**OGWE**

### **Radon Zone Information**

The Radon Potential Map is developed by Radon Environmental Management Corporation. Its objective was to illustrate the relative variation of radon risk across the country, and in 2011 it published its first geologic Radon Potential Map of Canada.
