

21 October 2022

Reference No. 21470873-R-001-Rev2

Mr. Robert MacNeil

Ottawa Community Housing Corporation
39 Auriga Drive
Ottawa, Ontario
K2E 7Y8

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT UPDATE
NORTHWEST 0.47-HECTARE PARCEL AT 933 GLADSTONE AVENUE, OTTAWA, ONTARIO**

Mr. MacNeil:

Golder Associates Ltd. (Golder) was retained by Ottawa Community Housing Corporation (OCH) to conduct a Phase One Environmental Site Assessment Update (Phase One ESA Update) to support the filing of a Record of Site Condition (RSC) for the 0.47-hectare parcel located in the northwestern portion of the larger property known municipally as 933 Gladstone Avenue, Ottawa, Ontario (RSC Property). The 0.47-hectare parcel is described as follows:

Firstly:

Former PIN 04107-0032: Part of Lot 8, Block B, Plan 73; Part of Lot 9, Block B, Plan 73; Part Lot 10, Block B, Plan 73, West side of Champagne Avenue, being Parts 8, 9 & 10 on Plan 5R-4993, Ottawa-Nepean.

Secondly:

Former PIN 04107-0035: Part Champagne Avenue, Plan 73 (formerly First Avenue) (closed by judge's order per Inst. No. LT1402120), being Part 1 on Plan 4R-33454 and being Part 1 on Plan 4R-33879, City of Ottawa

Former PIN 04107-0033: Part Laurel Street, Plan 73 (closed by judge's order per Inst. No. LT1402120), being Part 2 on Plan 4R-33454 and being Part 3 on Plan 4R-33879, City of Ottawa

Former PIN 04107-0031: Part Oak Street, Plan 73 (closed by judge's order per Inst. No. LT1402120), being Part 3 on Plan 4R-33454, City of Ottawa.

The purpose of the work was as follows:

- Provide an update of the Phase One ESA conducted previously at the RSC Property, because the original site visit was conducted more than eighteen months ago, property ownership has changed, and the RSC Property boundary has been defined.

- Update the December 2016 Phase One ESA for the RSC Property, including creation of the RSC Property Conceptual Site Model and associated site information.

This report should be read in conjunction with the previous Golder environmental reports:

- Phase One Environmental Site Assessment, 933 Gladstone Avenue, Ottawa, Ontario, dated December 2016, project reference 1661627/1000
- Phase One Environmental Site Assessment Update, 933 Gladstone Avenue, Ottawa, Ontario, dated August 2018, project reference 1897188/1000
- Phase Two Environmental Site Assessment, 933 Gladstone Avenue, Ottawa, Ontario, dated October 2019, project reference 1897188/003.

1.0 SCOPE OF WORK

Activities carried out in association with this Phase One ESA Update consisted of the following:

- A review of the Phase One ESA report by Mr. Eric Wilson, QP(ESA), P.Eng., entitled: *Phase One Environmental Site Assessment, 933 Gladstone Avenue, Ottawa, Ontario*, dated December 2016, project reference 1661627/1000, prepared for the City of Ottawa. (“December 2016 Phase One ESA”).
- A review of the Phase One ESA Update report by Mr. Eric Wilson, QP(ESA), P.Eng., entitled: *Phase One Environmental Site Assessment Update, 933 Gladstone Avenue, Ottawa, Ontario*, dated August 2018, project reference 1897188/1000, prepared for Ottawa Community Housing (OCH). (“August 2018 Phase One ESA”).
- A review of the Phase Two ESA report by Mr. Eric Wilson, QP(ESA), P.Eng., entitled: *Phase Two Environmental Site Assessment, 933 Gladstone Avenue, Ottawa, Ontario*, dated October 2, 2019, project reference 1897188-003Rev2, prepared for Ottawa Community Housing (OCH). (“October 2019 Phase Two ESA”).
- Conducting a site reconnaissance on August 11, 2021, to assess conditions at the RSC Property and changes to the site and site vicinity since 2018 that may affect the environmental condition of the site.
- Preparation of this letter report, which documents the findings of the above and identifies any changes to issues of potential environmental concern and areas of potential environmental concern.

2.0 PREVIOUS REPORTS

2.1 The December 2016 Phase One ESA Report

The following findings are of note based on a review of the December 2016 Phase One ESA Report:

- The RSC Property is in the northwestern portion of the 2016 Phase One Property. The 2016 Phase One Property has an area of 3.3 hectares that includes the 0.47-hectare RSC Property. At the time of the 2016 Phase One ESA, the site was undeveloped land. Historically, the site was part of a larger property that included the immediately adjacent lands to the north that was occupied by a large government owned warehouse structure referred to as the Central Ordnance Depot or Central Supply Depot. The RSC property historically comprised a paved area running along the west side of the warehouse building that was used for

parking and storage. Prior to that the site was used as a lumberyard that included a number of rail spurs. There are no indications that the Phase One Property was used for any of the following commercial uses: vehicle garage, bulk liquid dispensing facility, or dry cleaning facility.

- At the time of the 2016 Phase One ESA, the neighbouring properties within the Phase One Study Area included residential, commercial, and light industrial land uses. Many of the neighbouring properties in the Phase One Study Area were used for industrial purposes as well as the following commercial uses: vehicle garage, fuel dispensing facility, or dry cleaning facility.
- Soil at the site consists primarily of till plain deposits of silt and clay and limestone bedrock. The physiography of the soils is till plains. Borehole records for the Site and Study Area from previous environmental studies indicate the presence of wide-spread fill material and silty sand underlain by silty clay, clay, and grey limestone at a depth of approximately 1 - 5 m on Site.
- Local groundwater is anticipated to flow towards the north-northeast based on topography and previously completed subsurface investigations that evaluated groundwater flow direction based on water levels measured in groundwater monitoring wells. Regional groundwater is anticipated to flow in a northern direction towards the Ottawa River, which is approximately 1 km north of the site.

Based on the information obtained and reviewed as part of the 2016 Phase One ESA, a total of 15 areas of potential environmental concern (APEC) were identified at the 2016 Phase One Property, of which two were located on the RSC Property and several others were site wide. The APEC were grouped into the following general categories:

- Waste/Debris – Areas of debris were noted during the site visit in multiple locations. Potential contaminants of concern include metals, PAH, PHC and VOCs.
- Fill – Fill materials of unknown origin and quality are present on the Site. Potential contaminants of concern include metals, PAH (polycyclic aromatic hydrocarbons), PHC (petroleum hydrocarbons) and VOCs (volatile organic compounds).
- Gasoline and Associated Products Storage – Current and historical ASTs associated with the Site and adjacent lands. Potential contaminants of concern include PHC, PAH, and BTEX (benzene, toluene, ethylbenzene and xylenes).
- Past Site Uses – The Site has been used for commercial printing, ammunition, oil, paint, chemicals and flammable materials storage, vehicle maintenance and repair, a private fuel outlet, and lumberyard. Each of these site uses is associated with a PCA (potentially contaminating activity), and the contaminants of potential concern include metals, PAH, PHC, BTEX, and VOCs.
- Waste Generator – The Site has numerous waste generator tags associated with its previous use as a warehouse. Additionally, the Phase One Study Area is populated with industrial and commercial properties with dozens of different waste generator registrations. The contaminants of potential concern include metals, PAHs, PHC, BTEX, and VOCs.
- Fires – The former lumberyard was destroyed by fire in 1900, and there were numerous fires at the warehouse on-site in the early 1950s. It is likely that designated substances and chemicals stored in the former building may have contaminated the Site during the fire via the water used to extinguish the fire. Contaminants of potential concern include metal, PAH, PHC, BTEX, and VOCs.

- Transformer – The former warehouse had transformers within the building. The contaminants of potential concern include PCB and PHC.
- Flammable Storage Room Sump – A 2500 gallon sump was installed in the 1970s as a drainage area for the Flammable Storage room. Chemicals collected in the sump may have entered the subsurface in the event that the integrity of the sump and connected piping was compromised. Contaminants of concern are PHC, BTEX, and VOCs.
- Off-Site PCAs – A metal fabrication facility located adjacent to the Site at 17 Larch Street was identified as likely to contribute to an APEC on site given its close proximity to the east of the site. The contaminant of potential concern is metals, PHC and VOCs.

A Phase Two ESA was required to be completed for the site to investigate the potential for subsurface impacts to soil and groundwater at the site related to the identified APECs.

2.2 The August 2018 Phase One ESA Update Report

The 2018 Update was prepared for the parcel located immediately adjacent to the east boundary of the RSC Property meaning that the Site covered by the 2018 Update is the eastern and northeastern section of the 2016 Phase One Property. The 2016 Phase One Property has an area of 3.3 hectares and the 2018 Phase One Update Site has an area of 2.83 hectares. At the time of the 2018 Update, the site was still undeveloped land. No significant changes between 2016 and 2018 were reported.

Based on the information obtained and reviewed as part of the 2018 Phase One ESA Update, the same 15 areas of potential concern (APECs) were identified including several that were site wide and two APECs located on the RSC Property.

The 2018 Phase One ESA Update concluded that a Phase Two ESA was required to be completed for the site to investigate the potential for subsurface impacts to soil and groundwater at the site related to the identified APECs.

2.3 The October 2019 Phase Two ESA Report

The 2019 Phase Two was prepared for the 2.83-hectare parcel covered by the 2018 Phase One ESA Update that is located immediately adjacent to the east boundary of the RSC Property. This Phase Two ESA was undertaken to address the 15 APECs identified in the August 2018 Phase One Update.

The results of this Phase Two ESA indicated that no soil or groundwater impacts associated with the fifteen APECs were identified in any of the analyzed soil and groundwater samples collected from the boreholes and the monitoring wells completed at the Site. The concentrations of the contaminants of concern (including petroleum hydrocarbons, volatile organic compounds, polycyclic aromatic hydrocarbons, metals and polychlorinated biphenyls) in soil and/or groundwater associated with the fifteen APECs were all below the applicable generic site condition standards, with the exception of elevated levels of vanadium found in the soil. The elevated levels of vanadium present in the native clay/silty clay exceeded the MECP Table 3 Standards at the Site; this exceedance was deemed to be naturally occurring background conditions and not the result of a PCA or APEC.

The October 2019 Phase Two ESA and associated conceptual site model were used to support the filing of a Record of Site Condition for the 2.83 hectare parcel based on generic site condition standards (RSC number 226204). The RSC demonstrates that historic activities and associated PCAs and APEC did not impact soil or groundwater quality on the 2.83-hectare parcel.

3.0 PROPERTY USE INFORMATION

Based on the August 11, 2021 site visit, the only change identified to the study area since 2016 was the start of the construction for the Ottawa Train (O-Train) Light Rail Transit (LRT) Line 2 Corso Italia Station and an associated staging area located approximately 60 metres to the southeast of the RSC Property.

3.1 Records Review

Golder contracted EcoLog Environmental Risk Information Services Ltd. (EcoLog ERIS) to search available federal, provincial, and private-sector environmental databases for the Site and the surrounding area. The complete database report is included in Attachment A. An EcoLog ERIS search was conducted, both for the 2016 and the 2021 Phase I reports. Only the newest changes in the report are noted below.

- Waste generation at 145 Loretta Ave. (70 m southwest) of waste oils & lubricants (WC252), Petroleum distillates (WC 213) and Waste oils/sludges (petroleum based) (WC 251 L).
- Spill 131 m southeast at 949 B Gladstone Ave. of 2L of hydraulic oil and 0.5 L to gravel, contained. Evaluated to have a health/environmental consequence rating of 2 – Minor Environment.
- Spill 195 m ESE at 248 Preston St., paint spilled to two catch basins, cleaned. Evaluated to have a health/environmental consequence rating of 2 – Minor Environment.
- Waste generation at 250, 270, 290 City Centre Ave., 201 m NNW, of other specified inorganic sludges, slurries or solids (WC141 L and 141 T) halogenated solvents (WC 241 L), and light fuels (WC 221 L).
- Spill 216 m WNW at 1035 Somerset St., 550L of diesel to ground.
- Waste generation at 270 City Centre Ave., 216 m NW, of waste oils/sludges (petroleum based) (WC 251 L).
- Waste generation at 270 City Centre Ave., 231 m NW, of halogenated solvents (WC 241) and other polymeric wastes (WC233) from a dry cleaning and laundry service.

In the opinion of the QP(ESA), the results of the updated records review do not identify additional Potentially Contaminating Activities or issues of potential environmental concern that were not previously identified by the 2016 Phase One ESA.

3.2 Regulatory Requests

A request was submitted to the Ministry of the Environment, Conservation, and Parks (MECP) for information on historical spills, orders, investigations or prosecutions, waste generation and Certificates of Approval with respect to the Site. At the time of writing this report, no response had been received from the MECP. The absence of this information is unlikely to be a significant limitation to the report based on the other sources of information that were available for review.

In addition, the Technical Standards & Safety Authority (TSSA), Fuels Safety Division maintains records related to registered fuel storage tanks and other petroleum-related infrastructure. On August 24, 2021, TSSA reported via e-mail that there were no records on file pertaining to the Phase One Property.

4.0 SITE VISIT AND INTERVIEW

Ms. Claire Woodfield (Junior Environmental Consultant) of Golder visited the RSC Property on August 11, 2021, along with Mr. Eric Wilson (P.Eng., Environmental Engineer, QP(ESA)). The Site visit consisted of a walk-around the Site. The weather conditions were sunny, and the temperature was approximately 32°C. Golder was unaccompanied at the time of the Site visit.

The original interviews for the 2016 Phase One Property were conducted with Mr. Peter Slobodian of Brookfield Global Integrated Solutions (former property manager), who was interviewed at the Site on October 5, 2016. Mr. Robert MacNeil of OCH (Site Representative) was interviewed on various occasions in April and May 2018 to discuss site conditions in conjunction with a separate preliminary geotechnical investigation carried out by Golder and again in January 2022 as part of this Phase One ESA Update. Pursuant to the requirements of O. Reg. 153/04, the Site Representative was interviewed as the “current owner” with knowledge of current Site operations.

The following was noteworthy based on the results of the Site visit:

- The RSC property is currently vacant with no structures or activities taking place on the property other than grass cutting. The northern portion of the parcel (approximately 2/3rd of the area) is paved with asphalt while the southern 1/3rd is grass covered along with a narrow patch of grass along the eastern property boundary. Some stockpiles of aggregate and debris (old metal fencing, concrete blocks) were observed on the paved portion of the Site.
- No other significant changes to the Site or surrounding property use since the 2016 visit were observed at the time of the August 11, 2021 Site visit, aside from the staging area for the construction of the LRT Corso Italia Station that is located approximately 60 metres to the southeast of the Site. Observations from the periphery of the yard indicated that it was being used for storage of equipment and supplies for building construction as well as modular offices and vehicle parking. The LRT staging area is considered a Potentially Contaminating Activity.

5.0 REVIEW AND EVALUATION OF INFORMATION

5.1 Current and Past Uses of the Site

The following summarizes the current and past uses of the RSC Property:

Year(s)	Owner’s Name	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to February 25, 1809	Crown	Undeveloped	Agricultural or Other use	No Aerial photos prior to 1928. Fire Insurance plans show the Site as undeveloped (i.e., no buildings) prior to 1948 but was occupied by a
February 25, 1809 to May 23, 1837	Robert Randall	Undeveloped	Agricultural or Other use	
May 23, 1837 to August 18, 1837	Peter Ayler Vallely	Undeveloped	Agricultural or Other use	

Year(s)	Owner's Name	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
August 18, 1837 to May 2, 1844	William Price, Peter Mcbill, Nathaniel Gould & James Daries	Undeveloped	Agricultural or Other use	lumber yard starting in 1894 until sometime prior to 1928 where it appeared vacant. The surrounding area is entirely residential until commercial and light industrial businesses begin to build up along Gladstone Avenue, Loretta Avenue North and Preston Street subsequent to 1930 that continue to present day.
May 2, 1844 to December 16, 1875	Nicholas Sparks	Undeveloped	Agricultural or Other use	
December 16, 1875 to Nov 10, 1894	Esther Slater	Undeveloped	Agricultural or Other use	
Nov 10, 1894 to May 27, 1921	John R. Booth	Lumberyard with rail spurs but no buildings.	Commercial / industrial use	
May 27, 1921 to August 17, 1942	J.R. Booth Ltd.	Lumberyard with rail spurs but no buildings.	Commercial / industrial use	
August 17, 1942 to March 2015	His Majesty the King (Crown)	Warehouse (Central Ordnance Depot). Also used as a Commercial Printer.	Commercial / industrial use	The RSC Property is a paved area located immediately adjacent to a warehouse that covers most of the adjacent Gladstone property. Parking lot is to the south of the building. A boiler room with ASTs outside can be seen along the western edge of the warehouse, near the southern tip of the RSC Property.

Year(s)	Owner's Name	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
March 2015 to May 11, 2017	His Majesty the King (Crown)	Vacant land with small area used for storage.	Commercial / industrial use	The northern (paved) portion of the RSC Property is used for storage.
May 11, 2017 to present (Lands referred to under Firstly-Part of 933 Gladstone)	Ottawa Community Housing Corporation (current owner)	Vacant land.	Commercial / industrial use	The northern (paved) portion of the RSC Property is used for storage, currently for stockpiles of aggregate and debris (old metal fencing, concrete blocks).
October 14, 2021 to present (Lands referred to under Secondly-Part of several former municipal road allowances)	Ottawa Community Housing Corporation (current owner)	Vacant land.	Commercial / industrial use	The northern (paved) portion of the RSC Property is used for storage, currently for stockpiles of aggregate and debris (old metal fencing, concrete blocks).

5.2 Potentially Contaminating Activities (PCAs)

The following tables summarize the PCAs for the RSC Property. Figure 1 indicates the location of identified PCAs.

Table 1: Summary of PCAs within the RSC Property

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
1	On-Site (Entire Site)	PCA 46: Rail Yards, Tracks, and Spurs (Former on-Site rail spurs running in several locations across the entire property during lumberyard use. Rail spurs running to east side of boiler room and along the west side of the depot building)	Aerial photos, FIP, Site Visit, Pinchin 2015 Phase One ESA	As per Reg. 153/04. All PCAs found on the RSC Property are considered APECs.

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
2	On-Site (Entire Site)	PCA 30: Importation of Fill Material of Unknown Quality (Footprint of old building was built up with fill following 2015 demolition. Layer of fill was also identified across Site prior to demolition, which included waste products. Fill origin unknown)	Site observations, Pinchin 2015 Phase One ESA Trow 2005 Phase I & II ESA	As per Reg. 153/04. All PCAs found on the RSC Property are considered APECs.
3	On-Site (Entire Site)	PCA 59: Bulk Storage of Treated and Preserved Wood Products (Former lumber yard on-Site)	FIP, Chain of Title, Pinchin 2015 Phase One ESA	
4a 4b 4c	On-Site (Entire Site)	(a) PCA: Other – Petroleum Product (oil) Storage in non-fixed tanks (drums) (b) PCA 20: Explosives and Ammunition Manufacturing, Processing and Bulk Storage (c) PCA 39: Paints Manufacturing, Processing, and Bulk Storage (Site used as Central Ordnance Depot for 50 years including reported storage of paint, oils, ammunition/ordnance and assorted military stores)	FIP, HLUI, Pinchin 2015 Phase One ESA	
5	On-Site (Unknown, assume entire site)	PCA: Other – Waste Generator (Waste generator codes for Petroleum distillates, waste oils and lubricants, light fuels, chemicals, and pharmaceuticals)	EcoLog ERIS, Pinchin 2015 Phase One ESA	
6	On-Site (North and south ends of former warehouse, as well as two fires in unknown locations)	PCA: Other - Fires (Numerous fires in the 1950's burned down portions of the depot which may have released contaminants including oil and paint across the property)	1900 Ottawa-Hull Fire Map, 1950's Depot Fire Articles, Trow 2005 Phase I & II ESA	
7	On-Site (NW corner)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (Dyed Diesel AST)	2018 Golder Phase One ESA	

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
8	On-Site (NW corner)	PCA: Other – Storage of Debris and Chemical Waste (Parking/storage area contains empty bulk liquid totes of unknown sources, 5 buckets (25 L each) marked “Hydraulic Fluid – Must be disposed of” on wooden pallet in paved area, soil piles, asphalt pile, empty drums.	2018 Golder Phase One ESA	

Table 2: Summary of PCAs within the Phase One Study Area but not on the Phase One Property

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
PCAs North of Site				
9	1040 Somerset Street	PCA 10: Commercial Autobody Shop (Paradise Auto Repair)	HLUI	This PCA is not considered likely to contribute to an APEC on Site. This is due the PCA being down-gradient of the Site according to the local inferred groundwater flow.
10	1010 Somerset Street	PCA: Other – Drums of Unknown Contents (Several drums of unknown contents noted in 2001 in maintenance yard)	Aqua Terre 2001 Phase I ESA, Pinchin 2015 Phase One ESA	This PCA is considered likely to contribute to an APEC on Site. This is due to the PCA being directly adjacent to the north portion of the Site.
11	969 Somerset Street	PCA 31: Ink Manufacturing, Processing, and Bulk Storage (Genesove press Limited – Printers)	HLUI	These PCAs North of the RSC Property are not considered likely to contribute to an APEC on Site. This is due these PCAs being down-gradient of the Site according to the local inferred groundwater flow.
12	903 Somerset Street	PCA 37: Operation of Dry Cleaning Equipment (Expert Cleaner and Dyer) PCA 17: Dye Manufacturing, Processing, and Bulk Storage (Expert Cleaner and Dyer)	HLUI	
13	896 Somerset Street	PCA 10: Commercial Autobody Shop (Johnny Closs – Auto repair)	HLUI	These PCAs North of the RSC Property are not

This is due to their distance from the Site (>100 m) and their position cross-gradient of the Site according to the local inferred groundwater flow.
35	153 Preston Street	PCA 59: Bulk Storage of Treated and Preserved Wood Products (Preston & Lieff Glass – Lumber Wholesale)	HLUI	
36	17 Larch Street	PCA 34: Metal Fabrication (Venice Iron Works, V Steel Works Limited)	EcoLog ERIS, Street Directory, HLUI	

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
PCAs South of Site				
37	933 Gladstone Avenue (off-site)	PCA: Other – LRT Staging Area (Staging area for the LRT Corso Italia Station includes construction equipment and materials storage as well as modular office trailers and vehicle parking.)	August 2021 Site Observations	This PCA southeast of the RSC Property is not considered likely to contribute to an APEC on Site. While this PCA is within 75 m of the Site, its position places it cross-gradient of the Site according to the local inferred groundwater flow.
38	241 Preston Street	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (Preston Auto Centre, Mazzocato Service Station, Pannuccio BP Service Station, Petro Canada Service Station – one UST) PCA 10: Commercial Autobody Shop (Preston Auto Centre, Jason Auto Centre, Preston Garage)	EcoLog ERIS, Street Directory, HLUI	These PCAs southeast of the RSC Property on Preston Street are not considered likely to contribute to an APEC on Site. This is due to their distance from the Site (>100 m) and their position cross-gradient of the Site according to the local inferred groundwater flow.
39	284 Preston Street	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (C Corp (Ontario) – one UST) (Top Value Gasmart, Mac’s Convenience Stores Inc.)	EcoLog ERIS, Street Directory, HLUI	These PCAs southeast of the RSC Property on Preston Street are not considered likely to contribute to an APEC on Site. This is due to their distance from the Site (>100 m) and their position cross-gradient of the Site according to the local inferred groundwater flow.
40	280 Preston Street	PCA 37: Operation of Dry Cleaning Equipment (Superior Cleaners – Dry cleaning)	Street Directory, HLUI	These PCAs all are southeast of the RSC Property, and because of this, are not considered likely to contribute to an APEC on Site. While these PCAs are within 100 m of the Site, their positions place them cross-gradient of the Site rather than up-gradient, according to the local inferred groundwater flow.
41	916 Gladstone Avenue	PCA 10: Commercial Autobody Shop (R+M Automotive Finishes, Aberousal Body Repair) (Khera Auto Repair, A V I Auto Centre, P B Auto Centre, Dragon Auto Service)	Street Directory, HLUI	These PCAs all are southeast of the RSC Property, and because of this, are not considered likely to contribute to an APEC on Site. While these PCAs are within 100 m of the Site, their positions place them cross-gradient of the Site rather than up-gradient, according to the local inferred groundwater flow.
42	910 Gladstone Avenue	PCA 10: Commercial Autobody Shop (Sal Auto & Truck Service Centre.)	Street Directory, HLUI	These PCAs all are southeast of the RSC Property, and because of this, are not considered likely to contribute to an APEC on Site. While these PCAs are within 100 m of the Site, their positions place them cross-gradient of the Site rather than up-gradient, according to the local inferred groundwater flow.
43	203 Louisa Street	PCA 31: Ink Manufacturing, Processing, and Bulk Storage (L’Ora Di Ottawa – Newspaper Printer)	EcoLog ERIS, HLUI	These PCAs all are southeast of the RSC Property, and because of this, are not considered likely to contribute to an APEC on Site. While these PCAs are within 100 m of the Site, their positions place them cross-gradient of the Site rather than up-gradient, according to the local inferred groundwater flow.

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
44	188 Louisa Street	PCA 10: Commercial Autobody Shop (Motorworks – Auto Repair)	Street Directory	These PCAs are up gradient of the Site but are considered unlikely to contribute to an APEC due to their distance from the Site >100 m away.
45	West end of St. Anthony Street	PCA 41: Petroleum-derived Gas Manufacturing, Processing, and Bulk Storage (British American Oil Co. Limited)	1988 Intera Report	
46	952 Gladstone Avenue	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (Lyle Blackwell Limited – one gasoline UST) PCA 37: Operation of Dry Cleaning Equipment (Lyle Blackwell Limited Cleaners & Dyers) PCA 17: Dye Manufacturing, Processing, and Bulk Storage (Lyle Blackwell Limited Cleaners & Dyers)	FIPs (1948), HLUI	
47	940 Gladstone Avenue	PCA 34: Metal Fabrication (Hodgins Bros. Limited – Heating equipment manufacturing)	HLUI	
48	175 Loretta Avenue North	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (General Supply Co. of Canada Limited – One gasoline UST, City of Ottawa – Two historic USTs) PCA 39: Paints Manufacturing, Processing, and Bulk Storage (General Supply Co. Of Canada Limited) PCA 57: Vehicles and Associated Parts Manufacturing (General Supply Co. Of Canada Limited, City of Ottawa)	EcoLog ERIS, Street Directory, HLUI, TSSA, 2016 175 Loretta Ave. N. Monitoring Report	
PCAs West of Site				
49	West of Site	PCA 46: Rail Yards, Tracks, and Spurs (Multiple rail lines historically running in north-south direction immediately west of Site)	Aerial photos, FIP, Site Visit, Pinchin 2015 Phase One ESA	This PCA is considered likely to contribute to an APEC on Site. This is due to the PCA being directly adjacent to the Site.

ID on Fig. 1	Location	Potentially Contaminating Activities as per Table 2 of Reg.153/04	Information Sources	Rationale for the PCA to Contribute to an APEC on the Site
50	975 Gladstone Avenue	PCA 31: Ink Manufacturing, Processing, and Bulk Storage (British American Bank Note Co. Limited, BA Banknote Inc.)	EcoLog ERIS, Street Directory, HLUI, 1988 Intera Report, FIPs (1948, 1956)	PCAs west of the RSC Property are not considered likely to contribute to an APEC on Site. This is due to their positions cross-gradient of the Site rather than up-gradient, according to the local inferred groundwater flow and their distance from the Site >75 m away.
51	971 Gladstone Avenue	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (Mr Gas Limited – one UST)	EcoLog ERIS	
52	951 Gladstone Avenue	PCA 31: Ink Manufacturing, Processing, and Bulk Storage (Love Printing Service Limited)	HLUI	
53	949 Gladstone Avenue	PCA 34: Metal Fabrication (Vesuvio Iron Works) PCA 10: Commercial Autobody Shop (Mario Garage, Orville's Auto Electric)	EcoLog ERIS, Street Directory, HLUI	These PCAs southwest of the RSC Property are up gradient of the Site but are considered unlikely to contribute to an APEC due to their distance from the Site >75 m away.
54	157 Loretta Avenue North	PCA 52: Storage, Maintenance, Fuelling and Repair of Vehicles (City Queensway Taxi – Auto fleet repair and storage)	Street Directory

56	145 Loretta Avenue North	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (Bell Telephone Co. Of Canada Limited – One gasoline UST)	HLUI, FIP (1956)	
57	131 Loretta Avenue North	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks (Hall Fuel Limited – One gasoline UST)	HLUI, FIP (1956)	
58	111 Breezehill Avenue North	PCA 10: Commercial Autobody Shop (907462 Ontario Limited, Grandtech Auto – Auto repair)	HLUI	

5.3 Areas of Potential Environmental Concern

The following table summarizes the APECs for the RSC Property. Figure 2 indicates the location of identified APECs.

Table 3: Summary of APECs affecting the RSC Property

APEC #	Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on RSC Property	Potentially Contaminating Activity	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or Sediment)
1	PCA ID# 1-Former on-Site rail tracks as well as rail line adjacent to the west.	Entire Site	PCA 46: Rail Yards, Tracks, and Spurs.	On-Site	Metals, PAHs, PHC*	Soil
2	PCA ID# 2-Footprint of old buildings was built up with fill following 2015 demolition. Layer of fill was also identified across Site prior to demolition, which included waste products. Fill origin unknown.	Entire Site	PCA 30: Importation of Fill Material of Unknown Quality.	On-Site	Metals*, PAHs, PHC, VOC	Soil
3	PCA ID# 3-Former lumber yard on-Site.	Entire Site	PCA 59: Bulk Storage of Treated and Preserved Wood Products.	On-Site	Metals*, PAHs, VOCs	Soil
4a	PCA ID# 4a-Site used as Central Ordnance Depot for 50 years including storage of oils in drums.	Entire Site	PCA: Other – Petroleum Product (oil) Storage in non-fixed tanks (drums).	On-Site	PHC, BTEX	Groundwater and Soil
4b	PCA ID# 4-Site used as Central Ordnance Depot for	Entire Site	PCA 20: Explosives and Ammunition	On-Site	Metals*, PAHs, PHC, VOCs	Groundwater and Soil

APEC #	Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on RSC Property	Potentially Contaminating Activity	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or Sediment)
	50 years including storage of paints, oils, munitions and assorted military stores.		Manufacturing, Processing and Bulk Storage.			
4c	PCA ID# 4c-Site used as Central Ordnance Depot for 50 years including storage of paints.	Entire Site	PCA 39: Paints Manufacturing, Processing, and Bulk Storage.	On-Site	Metals*, VOCs	Groundwater and Soil
5	PCA ID# 5-Waste generator codes for petroleum distillates, waste oils and lubricants, light fuels, chemicals, and pharmaceuticals	Entire Site	PCA: Other – Waste Generator.	On-Site	PHC, VOC	Groundwater and Soil
6	PCA ID# 6- Numerous fires in the 1950's burned down portions of the depot which may have released contaminants including oil and paint across the property	Entire Site	PCA: Other – Fires.	On-Site	PHC, Metals*, PAH, VOCs	Groundwater and Soil
7	PCA ID# 7-Dyed Diesel AST.	Storage yard, northwest corner of the Site	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	On-Site	PHC and BTEX	Groundwater and Soil

APEC #	Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on RSC Property	Potentially Contaminating Activity	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or Sediment)
8	PCA ID# 8-Parking area contains empty bulk liquid totes of unknown sources, 5 buckets (25 L each) marked "Hydraulic Fluid – Must be disposed of" on wooden pallet in paved area, soil piles, asphalt pile, empty drums. Several drums of unknown contents noted in 2001 in maintenance yard immediately adjacent to north.	Storage yard, northwest portion of the Site	PCA: Other - Storage of Debris and Chemical Waste.	On-Site	Metals*, PHC, PAH, VOCs	Groundwater and Soil
9	PCA ID# 10- Several drums of unknown contents noted in 2001 in maintenance yard.	Storage area directly adjacent to north portion of RSC Property	PCA: Other – Drums of Unknown Contents.	Off-Site	PHC, VOC	Groundwater

* Metals includes MECP method groups Metals, As, Sb, Se
 PHC – petroleum hydrocarbon fractions 1 to 4
 BTEX – benzene, toluene, ethylbenzene and xylenes
 PAH – polycyclic aromatic hydrocarbons
 VOC – volatile organic compounds

5.4 Conceptual Site Model

A Conceptual Site Model (CSM) for the larger 933 Gladstone Avenue property, which is relevant to the RSC Property located in the northwestern portion, is presented in a series of figures in the December 2016 Phase One ESA. The following updates the Phase One ESA Conceptual Site Model (CSM) for the RSC Property:

- The Site is a 0.47-hectare parcel located in the northwestern portion of the larger property known municipally as 933 Gladstone Avenue. At the time of the initial Site reconnaissance for the entire 3.3-hectare parcel, conducted on October 5, 2016, the Site consisted of undeveloped land. No buildings or structures were noted on the Phase One Property. Based on the August 11, 2021 Site reconnaissance, Site conditions for the 0.47 hectare RSC Property have not changed since the December 2016 Phase One ESA.
- An OC Transpo light rail line is in a trench near the west perimeter of the Site. No areas of natural significance were identified on or within the Phase One Study Area.
- No active water source is reportedly available at the Site. Potable water is provided to the Study Area by the City of Ottawa.
- At the time of the Phase One ESA Update, the Site was undeveloped land. Historically, the Site was part of a larger property that included the immediately adjacent lands to the north that was occupied by a large government owned warehouse structure referred to as the Central Ordnance Depot or Central Supply Depot. Prior to that the Site was used as a lumberyard. There are no indications that the Phase One Property was used for any of the following commercial uses: vehicle garage, bulk liquid dispensing facility, or dry cleaning facility.
- At the time of the Phase One ESA Update, the neighbouring properties within the Phase One Study Area included vacant land, residential, commercial, and light industrial land uses. The immediately adjacent parcel to the east, comprising the remaining 2.83-hectare portion of the property known as 933 Gladstone Avenue, was subject to a Record of Site Condition filing in 2019 (RSC number 226204). The RSC demonstrates that historic activities and associated PCAs and APEC did not impact soil or groundwater quality on the 2.83-hectare parcel. Many of the neighbouring properties in the Phase One Study Area were used for industrial purposes as well as the following commercial uses: vehicle garage, fuel dispensing facility, or dry cleaning facility.
- Fifty-eight (58) PCAs were identified in the Phase One Study Area, eight (8) of which were on the RSC Property, as shown on Figure 1. Based on site characteristics and the locations of the off-Site PCA, a total of nine (9) Areas of Potential Environmental Concern were identified for the RSC Property as shown on Figure 2.
- Utility connections to the former building were abandoned during demolition, including water, sewer, electrical, natural gas, cable and telephone. Utility mains, including storm sewers observed during the site reconnaissance continue to be present.

- Soil at the Site consists primarily of till plain deposits of silt and clay; and limestone bedrock. The physiography of the soils is till plains. Borehole records for the Site and Study Area from previous environmental studies indicate the presence of wide-spread fill material and silty sand underlain by silty clay, clay, and grey limestone at a depth of approximately 1 - 5 m on Site.
- Local groundwater is anticipated to flow towards the east-northeast based on topography and previously completed subsurface investigations that evaluated groundwater flow direction based on water levels measured in groundwater monitoring wells. Groundwater flow in the western portion of the Site is expected to be influenced by the nearby trench for the OC Transpo rail line. Regional groundwater is anticipated to flow in a northern direction towards the Ottawa River, which is approximately 1 km north of the Site.

6.0 CONCLUSIONS

This Phase One ESA Update has identified no new APECs for the Site. Based on the presence of APEC 1 through 9 as described above, a Phase Two ESA is required to support the submission of a RSC for the Site.

7.0 LIMITATIONS AND USE OF REPORT

This report was prepared for the exclusive use of Ottawa Community Housing Corporation. This report is intended to provide an assessment of the potential environmental conditions for the 0.47-hectare parcel located in the northwestern portion of the larger property known municipally as 933 Gladstone Avenue, Ottawa, Ontario. The Report summarizes Golder's review of available data in accordance with the principal components of CSA Z768-01 *Phase I Environmental Site Assessment*, as well as Ontario Regulation 153/04 *Records of Site Condition*, as amended. The Report is based on data and information collected at the time of this assessment and must be considered in its entirety. It is based solely on the conditions on the Site encountered at the time of the Site visit on October 5, 2016 and August 11, 2021, as reported herein. Except as otherwise may be requested, Golder disclaims any obligation to update this Report for events taking place, or with respect to information that becomes available to Golder after the time during which Golder conducted the work. No soil, water, liquid, gas, product or chemical sampling and analytical testing other than that described herein at or in the vicinity of the Site was conducted as part of this Work.

In evaluating the property, Golder has relied in good faith on information provided by other individuals, companies or government agencies noted in the Report. Golder has assumed that the information provided is factual and accurate and Golder has not independently verified the accuracy or completeness of such information. Golder accepts no responsibility for any deficiency, misstatement or inaccuracy contained in this Report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted. Golder makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to, ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to periodic amendment. In addition, regulatory statutes are subject to interpretation and these interpretations may change over time.

The scope and the period of Golder's assessment are described in this Report, and are subject to restrictions, assumptions and limitations.

Golder did not perform a complete assessment of all possible conditions or circumstances that may exist at the Site. Conditions may therefore exist which were not detected given the nature of the inquiry Golder was retained to undertake with respect to the Site. Accordingly, additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the Report. Golder's opinions are based upon information that existed at the time of the writing of the Report. It is understood that the services provided for in the scope of work allowed Golder to form no more than an opinion of the actual conditions at the Site at the time the Site was visited and cannot be used to assess the effect of any subsequent changes in any laws, regulations, the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. If a service is not expressly indicated, do not assume it has been provided.

Any use which a third party makes of this Report, or any reliance on or decisions to be made based on it, are the sole responsibility of the third parties. Golder disclaims responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

8.0 CLOSURE

We trust the above meets with your current requirements. Should you have any comments, questions, or require additional information, please do not hesitate to contact this office.

Yours truly,

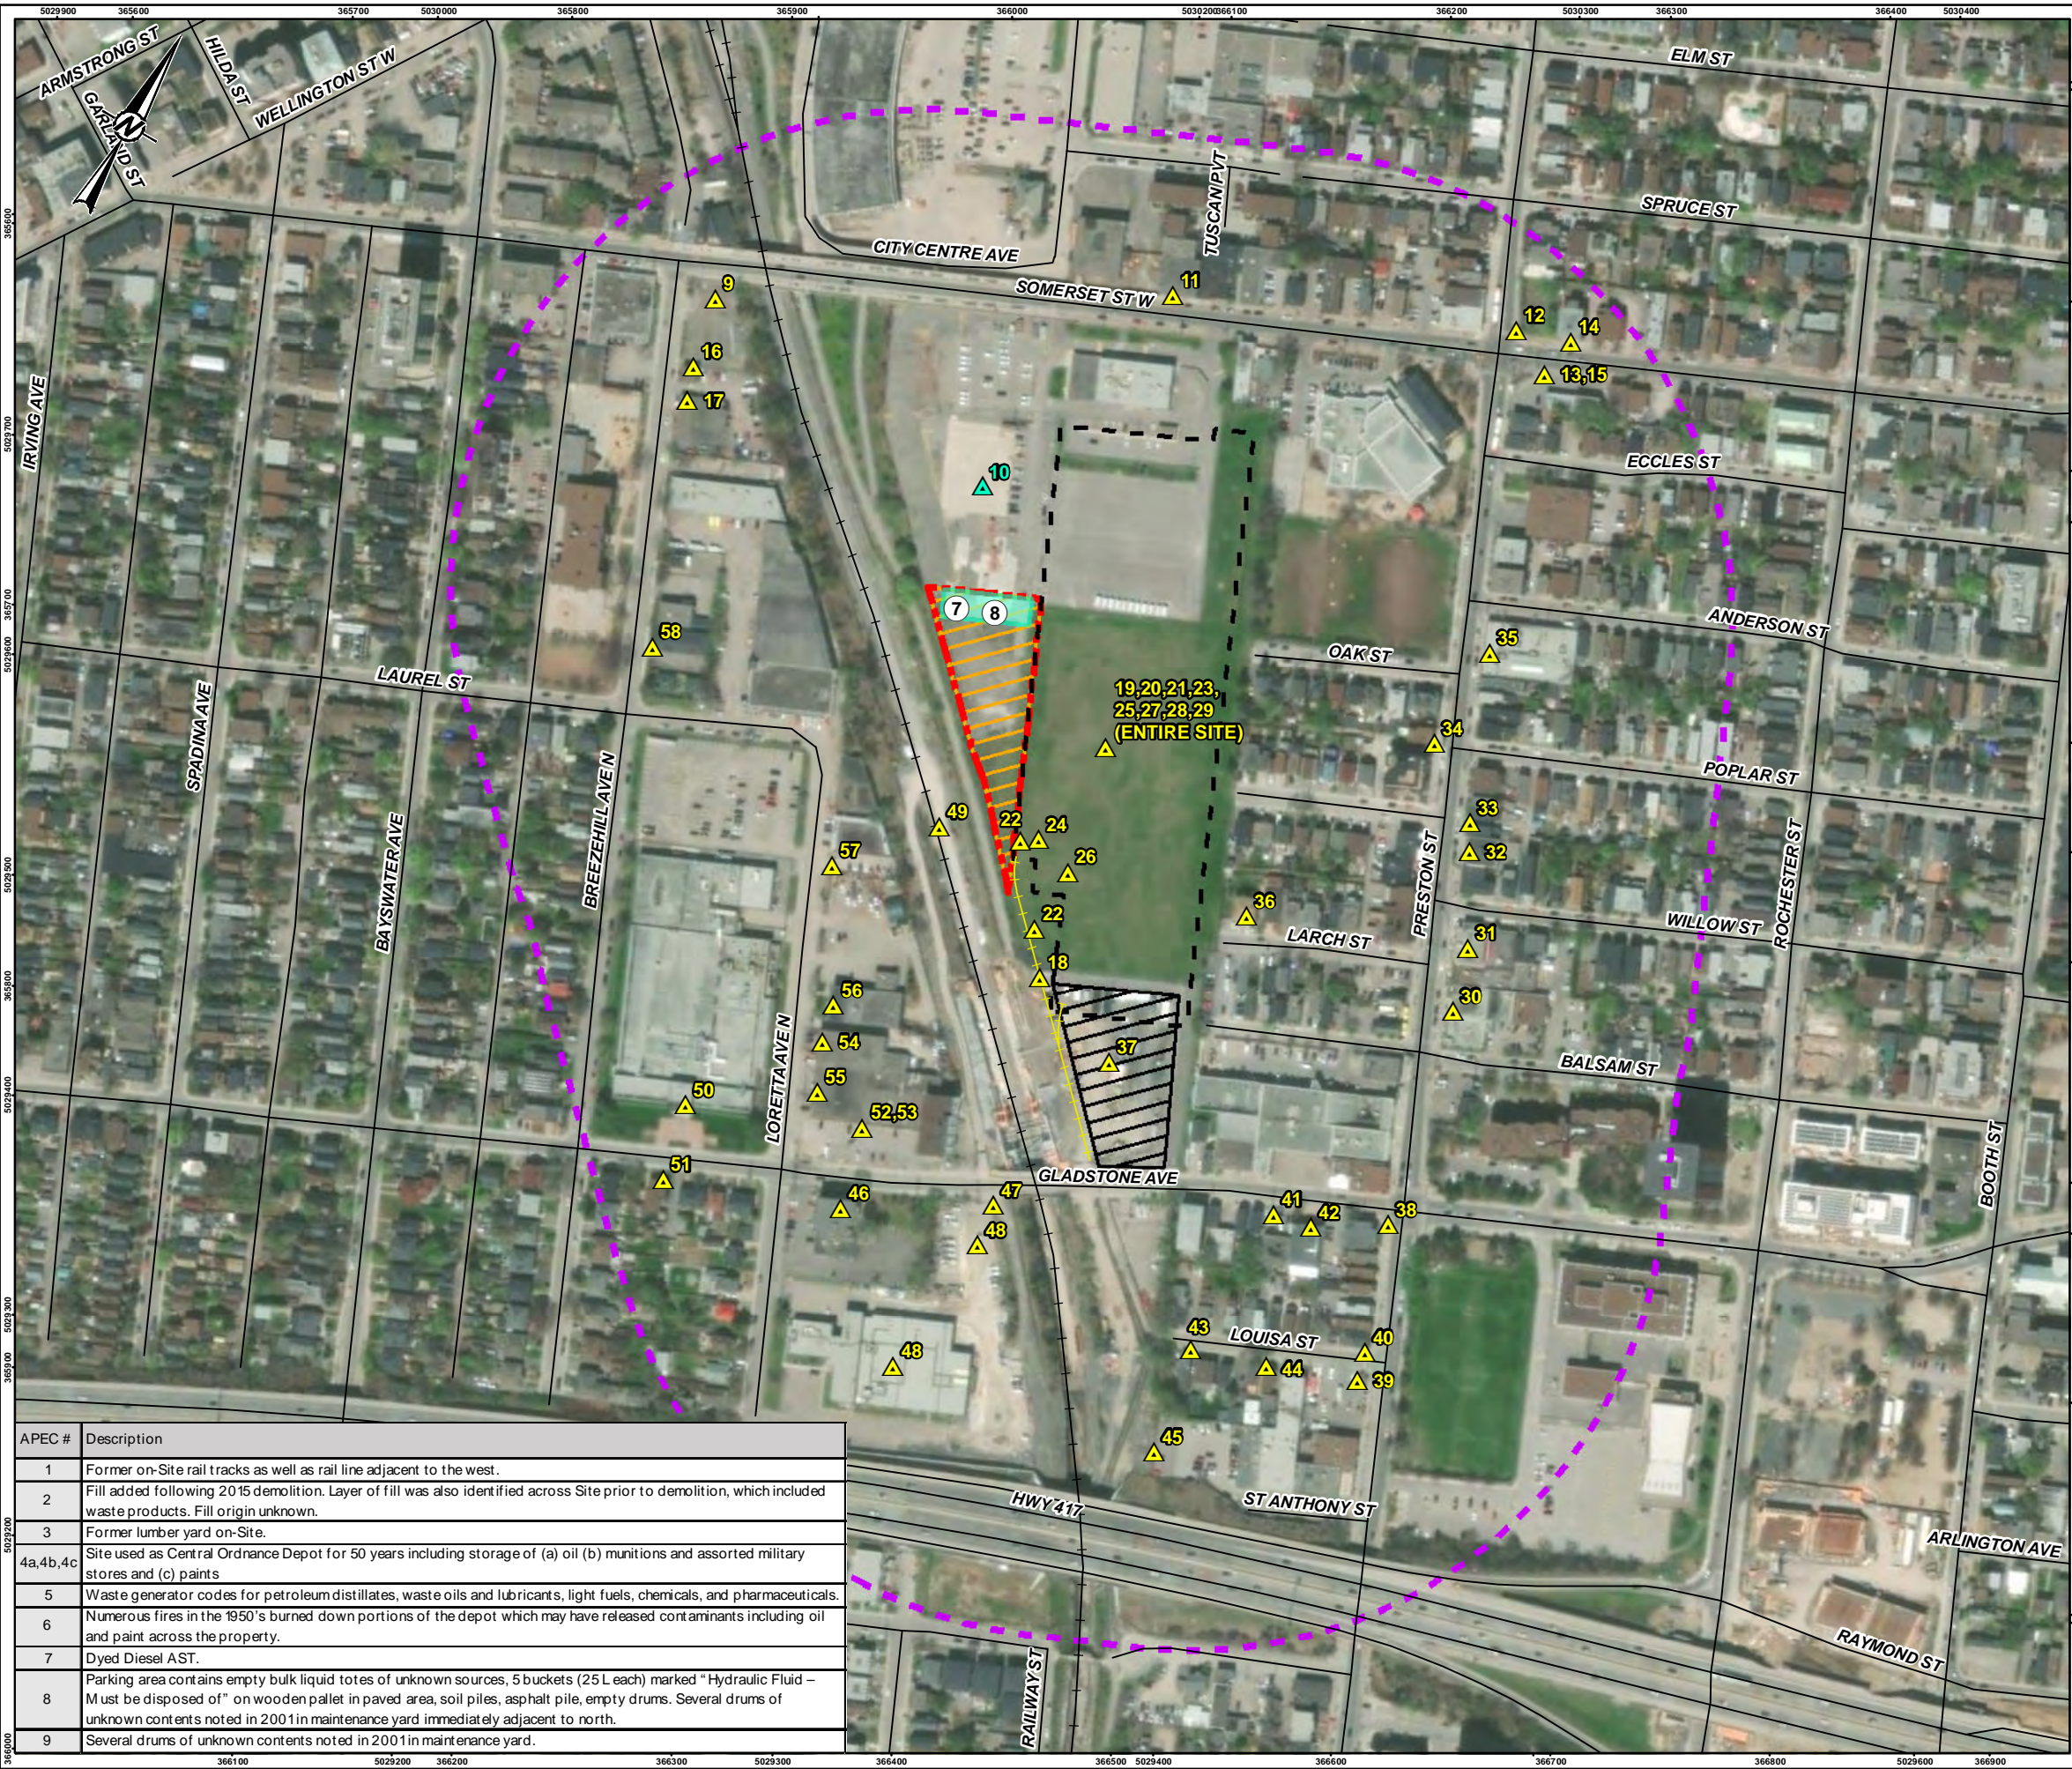

Golder Associates Ltd.

Eric Wilson, P.Eng., PMP
Senior Environmental Engineer

Description:

An Ottawa waste services company was fined \$100,000 for depositing waste on an unapproved site and failing to decontaminate a tanker contrary to a ministry approval and the Environmental Protection Act. "Polluters should be aware that the ministry's Investigations and Enforcement Branch will vigorously pursue charges when our

environmental laws are broken," said Environment Minister Jim Bradley. 349977 Ontario Ltd., operating as Lacombe Waste Services operates a waste transportation services under a ministry approval for a waste management system. The facility is located on Power Road in the City of Ottawa. The company was contracted to provide roll-off containers for a retrofit project to remove toilets and transport them for disposal. An investigation found the toilets were taken to the company's transfer facility located on Power Road in Ottawa and later transferred to a former quarry on Bank Street. Lacombe deposited two loads of approximately 500 toilets wrapped in garbage bags, including materials that were not inert fill on Bank Street, a property that was not an approved waste disposal site. A separate investigation also found Lacombe failed to properly decontaminate tankers used to transport various liquid wastes. Ministry approval requires the tankers to be cleaned when different types of waste are to be hauled. The company failed to do so leaving a load of wastewater contaminated with industrial fuels and oils. In a global resolution, Lacombe was fined a total of \$100,000 plus victim fine surcharges of \$25,000. All fines were paid immediately after the conviction.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994- Jun 30, 2021

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jun 30, 2021

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994- Jun 30, 2021

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jun 30, 2021

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jun 30, 2021

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2021

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jun 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994- Jun 30, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jun 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
