1.0 EXECUTIVE SUMMARY

Stantec Consulting Ltd. (Stantec) conducted a Phase One Environmental Site Assessment (ESA) of the property on the southern part of the property municipally identified as 2210 Bank Street in Ottawa, Ontario, hereinafter referred to as the "Phase One Property" or the "Site". The Phase One Property comprises three parcels of land with an approximate collective area of 3.33 hectares (8.24 acres), legally described as follows:

- 2210 Bank Street, PIN 04064-0006, Parcel 2-1, Section 4M-944. Block 2 on Subdivision Plan 4M-944, City of Ottawa;
- 2210 Bank Street, PIN 04064-0019 (LT), Parcel 15-1, Section 4M-944. Block 15 on Subdivision Plan 4M-944, City of Ottawa, City of Ottawa;
- 1131 Hunt Club Road, PIN 04064-0279 (LT), Part Lot 5, Concession 3, Rideau Front, being Designated as Part 1 and 2 on Reference Plan 4R-12807, City of Ottawa.

The Phase One ESA was conducted for Calloway REIT (South Keys) Inc. (the "Client") in support of the proposed a Record of Site Condition (RSC) with the Ontario Ministry of the Environment, Conservation and Parks (MECP) in accordance with Ontario Regulation 153/04 (O.Reg. 153/04). Stantec understands that the filing of the RSC is required by the MECP because the Phase One Property was historically used for commercial purposes and the future land use is anticipated to be residential, which is considered a more sensitive land use. The purpose of the Phase One ESA was to identify Potentially Contaminating Activities (PCAs) within the study area, if present, and assess if these activities have contributed to Areas of Potential Environmental Concern (APECs) at the Phase One Property, as a result of current or past activities on the Phase One Property and/or neighbouring properties within 250 m of the Phase One Property (herein referred to as the "Phase One Study Area").

A site location map is provided in **Figure No. 1, Appendix A** and the Phase One Study Area and Phase One Property are illustrated in **Figures No. 2 and 3** respectively, in **Appendix A**.

Phase One Property Information

The Phase One Property is situated at the southern end of the South Keys Shopping Centre at the southwestern corner of Daze Street and the southern entrance to the South Keys Shopping Centre in the City of Ottawa.

At the time of the initial site reconnaissance in 2021, the Phase One Property generally consisted of two site buildings (Commercial Building (Cineplex and vacant retail), Commercial restaurant (Montana's)), concrete and asphalt surfaces, and grassed areas.

Historical and/or current activities on adjacent and/or neighbouring properties include underdeveloped, agricultural, and commercial retail and parking, commercial office and parking, and transitway.

The Phase One Property was formerly undeveloped or agricultural until 1995 when the current commercial retail development was constructed. No potential contaminating activities (PCAs) have been

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

identified on the Phase One Property. No PCAs on the adjacent/neighbouring properties were identified that would be expected to contribute to an area of potential environmental concern (APEC) at the Phase One Property.

Conclusions and Recommendations

The Phase One ESA did not identify PCAs that would be expected to contribute to an APEC at the Phase One Property.

Based on the findings of this Phase One ESA, a Phase Two ESA is not required before an RSC can be filed upon completion of the outstanding title search (pending).

The statements made in this Executive Summary are subject to the project conditions described in the Closure (**Section 9.0**), and are to be read in conjunction with the remainder of this report.

2.0 INTRODUCTION

2.1 PHASE ONE PROPERTY INFORMATION

Stantec Consulting Ltd. (Stantec) conducted a Phase One Environmental Site Assessment (ESA) of the southern portion of the property municipally identified as at 2210 Bank Street in Ottawa, Ontario, hereinafter referred to as the "Phase One Property" or the "Site". The Phase One Property comprises three parcels of land with an approximate collective area of 3.33 hectares (8.24 acres), legally described as follows:

- 2210 Bank Street, PIN 04064-0006, Parcel 2-1, Section 4M-944. Block 2 on Subdivision Plan 4M-944, City of Ottawa;
- 2210 Bank Street, PIN 04064-0019 (LT), Parcel 15-1, Section 4M-944. Block 15 on Subdivision Plan 4M-944, City of Ottawa, City of Ottawa;
- 1131 Hunt Club Road, PIN 04064-0279 (LT), Part Lot 5, Concession 3, Rideau Front, being Designated as Part 1 and 2 on Reference Plan 4R-12807, City of Ottawa.

The Phase One ESA was conducted for Calloway REIT (South Keys) Inc. (the "Client") in support of the proposed a Record of Site Condition (RSC) with the Ontario Ministry of the Environment, Conservation and Parks (MECP) in accordance with Ontario Regulation 153/04 (O.Reg. 153/04). Stantec understands that the filing of the RSC is required by the MECP because the Phase One Property was historically used for commercial and industrial purposes and the future land use is anticipated to be residential, which is considered a more sensitive land use. The purpose of the Phase One ESA was to identify Potentially Contaminating Activities (PCAs) within the study area, if present, and assess if these activities have contributed to Areas of Potential Environmental Concern (APECs) at the Phase One Property, as a result of current or past activities on the Phase One Property and/or neighbouring properties within 250 m of the Phase One Property (herein referred to as the "Phase One Study Area").

A site location map is provided in **Figure No. 1, Appendix A** and the Phase One Study Area and Phase One Property are illustrated in **Figures No. 2 and 3** respectively, **Appendix A**.

A legal survey of the Phase One Property has been included in **Appendix B-1**.

3.0 SCOPE OF INVESTIGATION

3.1 PHASE ONE ESA SCOPE OF WORK

Stantec understands that the filing of a RSC under O.Reg.153/04 will be required; therefore, the scope of this project was developed to meet the requirements of O.Reg.153/04. The objectives of the Phase One ESA were as follows:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property
- To assess the need for a Phase Two ESA
- To provide a basis for carrying out a Phase Two ESA, if necessary
- To provide adequate preliminary information about environmental conditions in the land or water on, in, or under the Phase One Property to conduct a risk assessment following completion of a Phase Two ESA, if necessary

The Phase One ESA is intended to reduce, but not necessarily eliminate, uncertainty regarding the potential for contamination at a property. The Phase One ESA carried out by Stantec on this property satisfied the requirements of O.Reg.153/04, and consisted of the following:

- A review of records that included, but was not limited to, the following where available:
 - Publicly available city directories, aerial photographs, fire insurance plans, geological and topographic maps
 - Records on file with the MECP pertaining to the Phase One Property and selected adjacent/neighbouring properties received in 2018 and review of MECP databases searched by Ecolog ERIS Ltd. (ERIS)
 - An Environmental Risk Information Service report consisting of a search of databases within a 250 m search radius from the perimeter of the Phase One Property provided by ERIS completed in 2018 and an updated report completed in 2021
 - An historical title search back to Crown award for the parcels forming the Phase One Property
 - Other available environmental databases and records, as applicable
 - Previous environmental reports and existing title searches, if available
- Interviews with persons having specific knowledge of the Phase One Property, if available
- A site reconnaissance in 2021 to identify PCAs associated with:
 - Current on-site operations
 - Waste generation
 - Fuel, chemical and waste storage
 - Exterior conditions including surface features, fill material and wells
 - Off-site activities and operations in the Phase One Study Area
- Evaluation of information from records reviewed, interviews and site reconnaissance
- Preparation of the draft Phase One ESA report.
- The submission of the Phase One ESA report to the Client of the Phase One Property

A Phase One ESA does not include sampling or testing of air, soil, ground water, surface water or building materials. This assessment did not include a review or audit of compliance with any

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

SCOPE OF INVESTIGATION

October 26, 2021

environmental legislation applicable to the Phase One Property, or of any environmental management systems that may exist for the Phase One Property.

The initial site reconnaissance was conducted by Mr. Allen MacGarvie, CET of Stantec on August 5, 2021, following a review of historical and environmental information for the Phase One Property and Phase One Study Area. The Phase One Property and readily visible and publicly accessible portions of adjoining and neighbouring properties within the Phase One Study Area were observed for PCAs. Stantec was accompanied by Keith King of King Maintenance during the site reconnaissance.

The findings of the Phase One ESA were used to develop a conceptual site model, which is depicted on **Figure No. 3, Appendix A**.

3.2 REGULATORY FRAMEWORK

In Ontario, the roles and powers of the MECP when dealing with contaminated sites are outlined primarily in the Environmental Protection Act (R.S.O. 1990). The MECP has a mandate to address conditions where there is an adverse effect, or the likelihood of an adverse effect, associated with the presence or discharge of a contaminant. O.Reg.153/04 provides roles and responsibilities for property owners and consultants to use when assessing the environmental condition of a property when determining whether or not restoration is required and in determining the kind of restoration needed to allow continued use or reuse of a property. The regulation includes generic numerical standards for soil and ground water quality for specific land and ground water uses. A Phase One ESA is an initial step in the site assessment process, which may lead to the requirement for restoration work if areas of potential environmental contamination are identified. During a Phase One ESA, samples are not collected; however, if there are previous soil or ground water sample results available, the results are compared to applicable O.Reg.153/04 site condition standards.

4.0 RECORDS REVIEW

4.1 GENERAL

4.1.1 Phase One Study Area Determination

The Phase One Study Area included the Phase One Property, properties immediately adjoining the Phase One Property, and neighbouring properties located wholly or partially within 250 m from the boundary of the Phase One Property. The presence or absence of landfills and/or coal gasification plants within approximately 1 km of the Phase One Property was also evaluated. Based on the available information, it was concluded that a boundary of 250 m from the nearest point on the boundary of the Phase One Property was appropriate for the Phase One Study Area.

4.1.2 First Developed Use Determination

The former use of the Phase One Property was determined through a review of the historical sources and additional resources as listed in **Table 14** in **Section 10.0**:

The historical title search was completed on October 22, 2021, for the Phase One Property. The historical title search indicated that the Phase One Property was granted to Margaret Henderson from the Crown in 1802 for PIN 04064-0005 (LT), PIN 04064-006 (LT), and PIN 04064-0270 (LT).

Based on aerial photographs and city directories the Phase One Property was vacant agricultural or undeveloped property prior to 1950 up to 2005 when it was developed by the South Keys Shopping Centre. A complete summary of the chain of title information, and aerial photograph observations are provided in **Sections 4.1.5** and **4.3.1**, respectively. The chain of title documentation is provided in **Appendix B-1** and summarized in **Table 4**.

4.1.3 Environmental Reports

The following environmental reports related to the Phase One property were reviewed by Stantec:

- Phase I Environmental Review, Proposed South Keys Commercial Development, Ottawa, Ontario, Jacques Whitford Environment Limited, June 17, 1994. JWEL Project No. 10519 (JWEL, 1994a)
- Limited Phase II Environmental Assessment, South Keys Commercial Development, Ottawa, Ontario, Jacques Whitford Environment Limited, November 12, 1994. JWEL Project No. 10519 (JWEL, 1994 b)
- Phase I and Limited Phase II Environmental Site Assessment, Property Between 1145 Hunt Club Road and South Keys Shopping Centre, Ottawa, Ontario, Jacques Whitford Environment Limited, January 29, 1997. JWEL Project No. 10857 (JWEL, 1997)
- Phase I Environmental Site Assessment, south Keys Shopping Centre, 2210 Bank Street, Ottawa, Ontario, Jacques Whitford Environment Limited, June 27, 2002. JWEL Project No. 62315 (JWEL, 2002)
- Geotechnical Investigation, Proposed Multi-Storey building – Phase I, 2210 Bank Street, Ottawa, Ontario, completed by the Paterson Group Inc., dated May 15, 2020 (Paterson, 2020).

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

RECORDS REVIEW
October 26, 2021

Relevant findings are included in the following sections as applicable.

4.1.4 Fire Insurance Plans

A request was made to Opta Information Intelligence Inc. (Opta) for any FIPs, inspection reports, and site-specific plans pertaining to the Phase One Property in 2018. A reply from Opta indicated that no FIP records were available for the Phase One Property.

4.1.5 Chain of Title

A chain of title search was ordered through ERIS. Relevant information from the chain of title was used to determine the first developed use of the Phase One Property as discussed in **Section 4.1.2**. Chain of title information from 1802 to 2019 was obtained from the ERIS reports. The parcel identified as PIN 04064-0005 (LT) changed ownership between various private individuals from 1802 until 1973 at which point ownership was held by several corporations (Mervin Greenberg Limited, Campeau Corporation, Camdev Properties Inc.) until the parcel was deeded to South Keys Shopping Centres Limited in 1994 and later Canadian Property Holdings (South Keys) Inc. in 2002 and Calloway Reit (South Keys) Inc. in 2005, the current owners. The parcel identified as PIN 04064-0006 (LT) changed ownership between various private individuals from 1802 until 1973 at which point ownership was held by several corporations (Mervin Greenberg Limited, Campeau Corporation, Camdev Properties Inc.) until the parcel was deeded to South Keys Shopping Centres Limited, in 1994 and later Canadian Property Holdings (South Keys) Inc. in 2002 and Calloway Reit (South Keys) Inc. in 2005, the current owners. The parcel identified as PIN 04064-0270 (LT) changed ownership between various private individuals from 1802 until the 1987 at which point ownership was held by several corporations (Huntpark Holdings Ltd., Candarel Corporate Centre (Ottawa) Inc.) until the parcel was deeded to South Keys Shopping Centres Limited in 1994 and later Canadian Property Holdings (South Keys) Inc. in 2002 and Calloway Reit (South Keys) Inc. in 2005, the current owners. .

The chain of title search results are included in **Appendix B-1**. A table of current and past land uses is summarized in **Table 7.1** and **7.2** in **Section 7.1**.

4.1.6 City Directories

A request for available city directories was made to ERIS to assist in determining the development history of the Site and selected adjacent or neighbouring lands within the Phase One Study Area. The city directories searched are included in **Table 14, Section 10.0**. Relevant records returned for the Site and surrounding properties are summarized in **Table 2, Section 4.2.13**.

4.1.7 Property Underwriters' Reports and Plans

A request to Opta completed in 2018 indicated that no property underwriter reports or plans were available for the Phase One Property. A reply from Opta indicated that the following records were found, and were purchased for the Site:

- Cope Report - 1998 First Professional Management INC, 2210 Bank St, Ottawa, ON K1V 1J5

RECORDS REVIEW
October 26, 2021

- Sprinkler Report - 1998 South Keys Shopping Centre, 2210 Bank St, Ottawa, ON K1V 1J5

The full records are included in **Appendix B-2**.

Relevant records returned for the Phase One Property and surrounding properties are summarized in **Table 2, Section 4.2.13**.

4.2 ENVIRONMENTAL SOURCE INFORMATION

Environmental databases and records were searched to determine if the Phase One Property and adjacent/neighbouring properties within the Phase One Study Area were listed. The databases and search results are presented in the following subsections. Unless otherwise noted in the sections below, the databases and records were searched using the services of ERIS. The ERIS report is provided in **Appendix B-3**. Relevant records for the Site are summarized below and relevant records for adjoining/neighbouring properties are discussed in **Table 2, Section 4.2.13**

4.2.1 National Pollutant Release Inventory (NPRI)

The Phase One Property and properties within the Phase One Study Area were not listed in the National Pollutant Release Inventory (NPRI) databases.

4.2.2 PCB Storage Sites and Inventory Databases

The Phase One Property and neighbouring/adjacent properties within 250 m of the Site were not listed in the National PCB Inventory and the Ontario Inventory of PCB Storage Sites databases. The relevant findings are discussed further in **Table 2, Section 4.2.13**.

4.2.3 Certificate of Approval / Environmental Compliance Approval

The Phase One Property was not listed in the Certificates of Approval and Environmental Compliance Approval databases. Five neighbouring/adjacent properties within 250 m of the Site were listed in the Certificates of Approval and Environmental Compliance Approval databases. The relevant findings are discussed further in **Table 2, Section 4.2.13**.

4.2.4 MECP Freedom of Information Requests

Stantec submitted a freedom information request to the MECP for the Phase One Property in August 2018. Records received pertained mainly to the operation of commercial tenants located in the plaza properties adjacent to the Site to the north, and were consistent with understanding of operations on that property. No PCAs were identified in the records associated with the Phase One Property. A copy of the requests submitted and confirmations from the MECP are provided in **Appendix B-4**.

RECORDS REVIEW
October 26, 2021

4.2.5 Coal Gasification Plant Waste Sites

Stantec reviewed the reports Inventory of Coal Gasification Plant Waste Sites in Ontario, (Volumes I and II), dated April 1987, prepared by Intera Technologies Ltd. for the MECP. The reports include an inventory of known coal gasification plants historically operating in Ontario. No properties were identified within 1 km of the Phase One Property as a known coal gasification plant.

4.2.6 Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars

Stantec reviewed the report entitled Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, (Volumes I and II), dated November 1988, prepared by Intera Technologies Ltd. for the MECP. The documents identify industrial sites that produced and/or continue to produce or use coal tar and other related tars. No properties were identified within 1 km of the Phase One Property as a former producer of coal tar.

4.2.7 Hazardous Waste Generators and Receivers

ERIS searched the Ontario Regulation 347 Waste Generators and the Ontario Regulation 347 Waste Receivers databases for the Phase One Study Area.

The Phase One Property was not listed as a generator and/or receiver of hazardous waste in the ERIS searches. Various properties within the Phase One Study Area were listed in the ERIS report as generators of hazardous waste. The relevant findings are discussed further in **Table 2, Section 4.2.13**.

4.2.8 Technical Standards and Safety Authority (TSSA)

ERIS searched relevant TSSA and fuel storage databases for the Phase One Study Area. The Phase One Property and and/or the neighbouring/adjoining properties within 250 m of the Site were not listed in the relevant TSSA and fuel storage databases searched.

4.2.9 Environmental Registry

ERIS searched the MECP Environmental Registry databases for the Phase One Study Area.

The Phase One Property and/or the neighbouring/adjoining properties within 250 m of the Site were not listed in the Environmental Registry databases.

4.2.10 Records of Site Condition (RSC)

ERIS searched the MECP Record of Site Condition database for the Phase One Study Area and/or the neighbouring/adjoining properties within 250 m of the Site were not listed in this database.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

RECORDS REVIEW
October 26, 2021

4.2.11 Areas of Natural Significance

Stantec searched the Ontario Ministry of Natural Resources and Forestry's (MNRF's) Natural Heritage online database. No areas of natural or scientific interest (ANSIs) were identified within 1 km of the Phase One Property.

4.2.12 Waste Disposal Sites

Stantec reviewed the information contained in the MECP document titled Waste Disposal Site Inventory, dated June 1991. The report includes a list of known active and closed waste disposal sites in Ontario, as of October 31, 1990. Based on a search of the UTM coordinate locations provided in the report, there are no active or closed waste disposal sites within 1 km of the Phase One Property.

In addition, included in the ERIS reports were searches of the Waste Disposal Sites – MECP CA Inventory database (data compiled from the MECP CofA database) and the Anderson's Waste Disposal Sites database (which includes sites that are missing from the MECP Waste Disposal Site Inventory) for properties within the Phase One Study Area. Based on the information provided, no waste disposal sites (WDS) were identified within the Phase One Study Area.

4.2.13 Records Review Findings

Records of environmental significance from the ERIS report, the municipal directory search, and MECP search records for properties within the Phase One Study Area are summarized in **Table 2** below. The ERIS report is included in **Appendix B-3**.

Table 1: Records Review Findings for the Phase One Study Area

Location	Summary
Phase One Property	
1131 Hunt Club Road (PIN 04064-0279)	Commercial retail space (Cineplex) with asphalt parking lot operating from 1995, no PCAs identified. A reported garbage/grease release was identified by ERIS from the Cineplex garbage compactor in October of 2019; however, based on the nature of the release was not expected to represent a PCA. Current and historical activities on this property were not anticipated to contribute to an APEC at the Phase One Property.
2210 Bank Street (PIN 04064-0006)	Commercial retail space (part of Cineplex, Montana's and part of vacant commercial) with asphalt parking lot operating from 1995 and 2003, no PCAs identified. Current and historical activities on this property were not anticipated to contribute to an APEC at the Phase One Property.
2210 Bank Street (PIN 04064-0019)	Commercial retail space (part of vacant commercial) with asphalt parking lot operating from 1995, no PCAs identified. Current and historical activities on this property were not anticipated to contribute to an APEC at the Phase One Property.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

RECORDS REVIEW
October 26, 2021

Location	Summary
Phase One Study Area	
2400 Bank Street (neighbouring property to the east)	Commercial retail space with asphalt parking lot operating from 2003, no PCAs identified. This property is not anticipated to contribute to an APEC at the Phase One Property.
40 Mountain Crescent property to the east)	Commercial retail space with asphalt parking lot operating from 2008, no PCAs identified. This property is not anticipated to contribute to an APEC at the Phase One Property.
1135 Hunt Club Road (neighbouring property to the south)	Air photos identify commercial office space with asphalt parking lot operating from the early 1980s, no PCAs identified. This property is not anticipated to contribute to an APEC at the Phase One Property.
OC Transpo Transitway (neighbouring property to the west)	Aerial photos identify the OC Transpo Transitway operating from the mid-1990s, no PCAs identified. This property is not anticipated to contribute to an APEC at the Phase One Property.
2210 Bank Street (neighbouring property to the north)	Records received from the MECP FOI provided spill reports for spills that occurred at the neighbouring Loblaws, OC Transpo and Walmart (South Keys Shopping Centre) parking lots. Based on the information reviewed in these records, volumes, material released an/or location of the releases, these spills are not expected to contribute to an APEC at the Phase One Property. The ERIS report indicated that the Site occupant to the north of the Phase One Property (Walmart Canada Corp.) has been registered for the generation of various wastes under generator number ON1881550 since 1998. Waste classes included waste oils & lubricants, organic and inorganic laboratory chemicals, paint/pigment/coating residues, chemical fertilizer wastes, acid and alkaline wastes, halogenated pesticides and waste compressed gases. Additionally, Wal-mart Canada was registered as a waste generator under ON7705029 from 2002 to 2004 for paint/pigmentation/coating residues and waste compressed gases. While considered PCAs, based on the inferred ground water flow direction to the north, this property is likely located down-gradient of the Site and therefore historical waste generation records for this property were not expected to contribute to an APEC at the Phase One Property.

The remaining listings in the ERIS reports and activities identified in supporting historical documentation were not considered to contribute to an APEC based on the nature of their operations and/or the separation distance of these properties from the Phase One Property.

4.3 PHYSICAL SETTING SOURCES

4.3.1 Aerial Photographs

Aerial photographs were obtained from the sources outlined in **Section 4.1.2** and reviewed to determine the historical activities at the Phase One Property. The aerial photographs referenced are provided in **Appendix B-6**. The earliest available photograph reviewed was from 1958, which were sourced through ERIS based on a review of the National Air Photo Library (NAPL) of Natural Resources Canada archive.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

RECORDS REVIEW
October 26, 2021

Table 2: Observations on the Phase One Property

Date and Scale	Observations on the Phase One Property
1958 Scale not listed	Undeveloped or agricultural property use
1965 Scale not listed	Undeveloped or agricultural property use
1976 Scale not listed	Undeveloped or agricultural property use
1991 Scale not listed	Undeveloped or agricultural property use
1999 Scale not listed	Area is developed, the Cineplex and Montanas are constructed the remaining area is asphalt parking.
2002 Scale not listed	Retail spaced has been added to the north side of the Cineplex building.
2005 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2007 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2008 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2010 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2011 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2014 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2015 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.
2017 Scale not listed	The configuration of the Phase One Property remains unchanged from the 2002 aerial photograph.

Additional information pertaining to the Phase One Study Area gleaned from the aerial photography is presented in **Section 6.2.13**.

4.3.2 Topography, Hydrology, and Geology

4.3.2.1 Topography and Regional Drainage

At the time of the site reconnaissance, the observed topography across the Phase One Property was relatively flat, sloping from the south to the north. Based on observed site topography, information accessed from the MNR Natural Heritage Areas on-line mapping and the Ontario Base Map (provided in **Appendix B-5**), the regional surface drainage (and anticipated shallow ground water flow direction) is expected to flow to the northwest toward the Rideau River, approximately 3.0 km west of the Phase One Property. Localized ground water flow may also be directed towards the northwest toward Sawmill Creek, situated approximately 130 m west of the Phase One Property.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

RECORDS REVIEW

October 26, 2021

The direction of the shallow ground water flow in limited areas can also be influenced by the presence of underground utility corridors or other features and is not necessarily a reflection of regional or local ground water flow or a replica of the Phase One Property or area topography.

4.3.2.2 Hydrology and Surface Water Drainage

At the time of the site reconnaissance, the surface of the Phase One Property was primarily comprised of concrete and asphalt surfaces, and grassed areas. Storm water was anticipated to drain by overland flow toward catch basins that extend along the central portion of the Phase One Property, which are assumed to be connected to municipal infrastructure.

4.3.2.3 Surficial Geology

Based on information obtained from the Ontario Geological Survey layer in Google EarthPro, entitled Surficial Geology of Southern Ontario, the surficial geology in the vicinity of the Phase One Property generally consists of glaciolacustrine deposits, which typically consist of abandoned river channel deposits consisting of silt and clay, commonly including lenses of sand. The characteristic permeability of these soils is moderate.

Borehole and well records provided in the ERIS report and historical documents reviewed by Stantec indicated that boreholes drilled in the Phase One Study Area generally encountered sand overlying silty clay overlying clay till overlying gravel a maximum depth of approximately 22 m BGS. These observations are consistent with the presence of till as described in the surficial mapping above.

4.3.2.4 Bedrock Geology

Based on information obtained from the Ontario Geological Survey layer in Google *EarthPro*, entitled *Bedrock Geology of Ontario*, the Phase One Property is an area where the main bedrock type is reported to consist of limestone and shale interbeds of the Carlsbad Formation and black shale with some brown shale of the Billings Formation. The depth to bedrock varies over the site at 15 to 50 m.

The ERIS report and historical documents did not encounter bedrock in the wells or boreholes drilled in the Phase One Study Area to a maximum depth of 28 m BGS.

4.3.3 Fill Materials

No evidence of imported fill material was observed. The Site generally appeared to be at grade with the adjacent roadways and adjoining properties, being slightly lower than the transitway to the west. Therefore, it is unlikely that significant quantities of fill materials were brought onto the Site to accommodate current site development. The Phase I ESA completed by Jacques Whitford in 1994 identified the potential presence of fill material of unknown quality on the Site and the adjoining plaza property to the north and a Phase II ESA was subsequently completed. Fill material was identified at depths up to 1.5 m below ground surface (m BGS) and soil samples were collected from three boreholes for analysis of metals, inorganics and total oil and grease (JWEL, 1994b). Fill material was confirmed to be mainly sand and gravel and concentrations of analyzed parameters were less than the then-applicable

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

INTERVIEWS
October 26, 2021

standards and where standards exist, would be less than the current O.Reg.153/04 Table 3 Site Condition Standards for a residential land use. Several stockpiles of fill material were identified on the Site during the 1997 Phase I and II ESA completed by Jacques Whitford and concentrations of metals, inorganics and oil and grease analyzed in two soil samples collected from this fill in 1997 were less than the then-applicable site condition standards and where standards exist, would be less than the current O.Reg.153/04 Table 3 Site Condition Standards for a residential land use (JWEL, 1997). Fill material was subsequently identified at the Site in the geotechnical investigation completed by Paterson, identified as silty sand with some crushed stone up to depths of 1.8 m BGS, consistent with the 1994 and 1997 findings. Given that the quality of the fill material at the Site and adjacent property to the north had been previously characterized, and concentrations of analyzed parameters were found to meet the current O.Reg.153/04 Table 3 Site Condition Standards for residential land use, fill at the Site was not considered to be of unknown quality and therefore not considered to be a PCA at the Phase One Property.

4.3.4 Water Bodies and Areas of Natural Significance

No water bodies or areas of natural significance were identified on the Phase One Property following a review of historical aerial photographs, topographic maps, and a search of the MNRF Natural Heritage Areas on-line mapping (as provided in **Appendix B-5**).

4.3.5 Well Records

Information included in the ERIS report indicated that three water well records were identified within 250 m of the Phase One Property in the Water Well Information System (WWIS) database searched by ERIS. These wells were reportedly installed in 1950 for domestic water supply purposes. It is unlikely any of these wells are still active, as the entire area has been redeveloped and drinking water to the area is supplied by the City of Ottawa municipal system. The ERIS report indicated that no water wells were reportedly drilled within the Phase One Property boundary.

The stratigraphy described in the records is included in the surficial and bedrock geology sections above and is presented in detail in Appendix B-5.

4.4 SITE OPERATING RECORDS

Site operating records were not provided to Stantec for review. Given the historical use of the Phase One Property is not considered to be an Enhanced Investigation Property, as defined in O.Reg.153/04. Additional operating records were requested from the Client pertaining to the following:

5.0 INTERVIEWS

An interview was completed with Mr. Keith King, the site maintenance manager, at the time of the site reconnaissance on August 5, 2021. Mr. King has been associated with the operations at 2210 Bank Street since 2017.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

INTERVIEWS

October 26, 2021

According to the site contact, the property at 2210 Bank Street has operated as commercial retail space since at least 1995 with no history of any spills.

No other interviews were completed at the time of the issuance of the report.

Information gathered during the interviews and received during the reporting process has been included in the applicable sections throughout this report.

6.0 SITE RECONNAISSANCE

6.1 GENERAL REQUIREMENTS

The initial site reconnaissance was conducted by Mr. Allen MacGarvie of Stantec, on August 5, 2021 between approximately 9:00 and 11:00 AM. The weather was clear and the temperature was approximately 26°C. The Phase One Property and readily visible and publicly accessible portions of adjoining and neighbouring properties within the Phase One Study Area were observed for PCAs.

Assessor qualifications are provided in **Appendix C**.

Stantec was accompanied by Mr. Keith King during the site reconnaissance assessment of the Phase One Property and portions of adjoining and neighbouring properties within the Phase One Study Area. All site buildings were accessed during the site reconnaissance.

Observations of the Phase One Property and surrounding properties are indicated on **Figures No. 2 and No. 3, Appendix A**, while selected photographs of the Phase One Property are included in **Appendix C**.

6.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

6.2.1 Property Information

The Phase One Property is situated at the northeastern corner of Daze Street and the southern entrance to the South Keys Shopping Centre in Ottawa, Ontario. At the time of the site reconnaissance, the Phase One Property generally consisted of two site buildings, concrete and asphalt surfaces, and grassed/treed areas. The buildings consisted of a Cineplex with vacant retail space located on the northern side of the Cineplex building and a Montana's located at the northeastern portion of the Phase One Property.

The Phase One Property is located in an area of mixed commercial and residential property uses, and is bounded by Daze Street to the east (commercial properties beyond); commercial office building and parking lot to the south; OC Transpo Transitway to the west, and South Keys Shopping Centre commercial property (multi retail tenants).

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

SITE RECONNAISSANCE
October 26, 2021

6.2.2 Property Buildings & Structures

The following provides a summary of buildings that were observed at the Phase One Property at the time of the site reconnaissance.

Table 3: Site Buildings at the Phase One Property

Site Buildings Location	General Summary
Cineplex and Vacant Retail	The Cineplex operates as a movie theater. The Cineplex and vacant retail space was constructed as a slab on grade steel framed building with concrete panels. The Cineplex has an approximate area of 3,800 square metres and the vacant retail space has an approximate area of 1,600 square meters. The site contact was not aware of the approximate construction age of the building; however, aerial photographs indicated that the Cineplex appeared to have been constructed on the Phase One Property in 1995 and the vacant retail space in 2003.
Montana's	The Montana's operates as restaurant. The Montana's was constructed as a slab on grade steel framed building with brick and wood siding. Montana's has an approximate area of 440 square metres. The site contact indicated the Montana's was constructed in 1995.

6.2.3 Aboveground and Underground Storage Tanks

No USTs or chemical or fuel ASTs were identified or reported to be present at the Phase One Property at the time of the site reconnaissance. Further, no other vent or fill pipes indicating the potential presence of an abandoned or decommissioned UST were observed.

6.2.4 Underground Utilities and Services

Utility locates for work that included ground disturbance were reviewed for the Phase One Property. Utility locations are based on as-built drawings or utility clearances provided by third parties. Utilities present at the Site include, but are not limited to, hydro, gas, communications, cable, water and sewer services.

No other underground utilities were observed at the Phase One Property at the time of the 2018 and 2021 site reconnaissance visits.

SITE RECONNAISSANCE
October 26, 2021

6.2.5 Site Buildings Interior Features

Table 4: Interior Features of Buildings at the Phase One Property

Site Buildings	General Summary of Interior Features
Cineplex and vacant retail space	The Cineplex and vacant retail space was reported to be provided with heating and cooling via natural gas roof top units. No ASTs, vent or fill pipes, or oil staining were observed at the Cineplex and vacant retail space. Washrooms or floor drains were observed within the Cineplex and vacant retail space and are connected the municipal sanitary sewer system. The Cineplex also has two a grease pits that are cleaned on a regular basis by Carleton Environmental Services. There was no staining observed around the grease pits.
Montana's	The Montana's was reported to be provided with heating and cooling via natural gas roof top units. No ASTs, vent or fill pipes, or oil staining were observed at the Montana's. Washrooms or floor drains were observed within the Montana's are connected the municipal sanitary sewer system. The Montana's also has a grease pit that is not connected to the municipal sanitary sewer system and is cleaned on a regular basis, grease collected from the grease trap is stored in 2 - 205 litre drum stored in the outside garbage storage area and pick up every couple of week by Roslin Enterprises every two weeks. There was not staining observed around the grease drums.

6.2.6 Wells

During the site reconnaissance, no ground water monitoring wells were observed on or adjacent to the Phase One Property.

No other existing or abandoned wells (e.g., ground water monitoring, potable water, oil, gas or disposal) were observed on the Phase One Property at the time of the site reconnaissance visits.

6.2.7 Sewage Works

Storm sewage works were observed in the parking lot at the Phase One Property during the site reconnaissance. Storm water was anticipated to drain by overland flow toward the catch basins that extend along the central portion of the Phase One Property, which are assumed to be connected to the municipal infrastructure. Sanitary sewer lines were anticipated to be connected to the municipal infrastructure.

6.2.8 Surface Features

At the time of the site reconnaissance, the surfaces of the Phase One Property generally consisted of concrete and asphalt surfaces, and grassed/treed areas.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

SITE RECONNAISSANCE
October 26, 2021

6.2.9 Current or Former Railway Lines or Spurs

No current or former railway lines or spurs were observed or reported on the Phase One Property at the time of the site reconnaissance visits and through a historical information search.

6.2.10 Surface Staining and Stressed Vegetation

No surface staining or stressed vegetation was observed or reported at the Phase One Property, with the exception of a large rust stained area coming from the waste bin on the west side of the Cineplex building.

6.2.11 Imported Fill and Debris

As discussed previously in **Section 4.3.3**, no fill or debris was observed during the site reconnaissance.

6.2.12 Enhanced Investigation Property

Given the historical use of the Phase One Property is not considered to be an Enhanced Investigation Property, as defined in O.Reg.153/04.

6.2.13 Phase One Study Area

The current activities on adjacent and neighbouring properties observed at the time of the site reconnaissance visits are summarized below and in Table 5.

6.2.13.1 North

2210 Bank Street

During the site reconnaissance, a multi-tenant commercial retail shopping centre was observed to the north of the site. The Walmart store is the only retail store within 250 m of the Site. The Walmart was constructed in 1995. A tire and lube centre operated in the southern portion of the Walmart building, closest to the Site; however, based on the inferred groundwater flow direction and the limited nature of the operations on this property, they were not expected to contribute to an APEC at the Phase One Property.

6.2.13.2 West

OC Transpo Transitway

During site reconnaissance, a roadway used as the transitway for OC Transpo (City of Ottawa buses), the lite rail line and undeveloped land and the Airport Parkway were observed directly west of the Phase One Property. Aerial photographs identified this area to have consisted of undeveloped or agricultural until

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

SITE RECONNAISSANCE

October 26, 2021

approximately 1995 when transitway was constructed, with the exception of the rail line which was constructed prior to the 1950's and the Airport Parkway which was constructed in the 1970's.

Based on the separation distance (approximately 50 m) and cross-gradient location of the transitway from the Phase One Property, operations on this property are not expected to contribute to an APECat the Phase One Property.

6.2.13.3 East

Daze Street

During the site reconnaissance, a city street was observed directly east of the Phase One Property with commercial properties beyond.

Aerial photographs identified this area to have consisted of undeveloped/agricultural land use up to 1995 when the Phase One Property was developed. The commercial properties to the further east were developed between 2003 and 2008.

Based on the site use the properties to the east are not considered a potential concern to the Phase One Property.

6.2.13.4 South

1150 Hunt Club Road

During the site reconnaissance, a multi-tenant commercial building and parking lot was observed directly south of the Phase One Property with commercial, with Hunt Club Road beyond.

Aerial photographs identified this area to have consisted of undeveloped/agricultural land use up to the mid 1980's.

Based on the site use the properties to the east are not considered a potential concern to the Phase One Property.

6.3 WRITTEN DESCRIPTION OF INVESTIGATION

Section 4.0 presents the findings of the records review for the Phase One Property and **Section 5.0** presents the findings of the interviews with the site contacts. **Section 6.2** presents the findings of the site reconnaissance of the Phase One Property and the Phase One Study Area. No additional investigations were undertaken during the Phase One ESA to assess potential environmental concerns noted or identified during the site reconnaissance or records review. A summary of the relevant findings to the existence of APECs at the Phase One Property is provided below in **Section 7.3**.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 CURRENT AND PAST USES

The current and former owners of the Phase One Property, and a general description of the associated activities occurring at that time, are presented in the table below:

Table 5.1: Current and Past Uses of 2210 Bank Street, PIN 04064-0005 (LT) and PIN 04064-0006 (LT)

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
Prior to 1802	Crown	The land use is assumed to be undeveloped.	Agriculture or other use	This property use is inferred based on the information provided in the historical title search.
1802 to 1831	Margaret Henderson	The land use is assumed to be agricultural use.	Agriculture or other use	This property use is inferred based on the information provided in the historical title search.
1831 to 1831	Sheriff MacDonald	The land use is assumed to be agricultural use.	Agriculture or other use	This property use is inferred based on the information provided in the historical title search.
1831 to 1832	G.C. Rankin	The land use is assumed to be agricultural use.	Agriculture or other use	This property use is inferred based on the information provided in the historical title search.
1832 to 1834	William Anderson	The land use is assumed to be agricultural use.	Agriculture or other use	This property use is inferred based on the information provided in the historical title search.
1834 to 1842	John B. Forsyth	The land use is assumed to be agricultural use.	Agriculture or other use	This property use is inferred based on the information provided in the historical title search.

(50%)	The land has been occupied by commercial retail	Commercial use	Based on the 1999 to current aerial photographs and site visit findings the Site has been occupied by two commercial retail and restaurant buildings and associated parking areas. No PCAs were identified on the Site.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

REVIEW AND EVALUATION OF INFORMATION

October 26, 2021

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
2005 to present	Calloway REIT (south Keys) Inc. (50%)	The land has been occupied by commercial retail	Commercial use	Based on the 1999 to current aerial photographs and site visit findings the Site has been occupied by two commercial retail and restaurant buildings and associated parking areas. No PCAs were identified on the Site.

7.2 POTENTIALLY CONTAMINATING ACTIVITIES

No PCAs, as defined in O.Reg.153/04, were identified to have been present currently or historically on the Phase One Property. or within the Phase One Study Area

7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

No APECs have been identified on the Phase One Property.

7.4 PHASE ONE CONCEPTUAL SITE MODEL

In developing the Conceptual Site Model for the Phase One Property and Phase One Study Area, the following physical characteristics/pathways were evaluated to assess whether PCAs have contributed to an APEC at the Phase One Property (see Table 12).

Table 7: Conceptual Site Model

Physical Characteristics/ Pathways	Description
Subsurface Soils	<p>Based on information obtained from the Ontario Geological Survey layer in Google EarthPro, entitled <i>Surficial Geology of Southern Ontario</i>, the surficial geology in the vicinity of the Phase One Property generally consists of glaciolacustrine deposits, which typically consist of abandoned river channel deposits consisting of silt and clay, commonly including lenses of sand. The characteristic permeability of these soils is moderate.</p> <p>Borehole and well records provided in the ERIS report and historical documents reviewed by Stantec indicated that boreholes drilled in the Phase One Study Area generally encountered sand overlying silty clay overlying clay till overlying gravel a maximum depth of approximately 22 m BGS. These observations are consistent with the presence of till as described in the surficial mapping above.</p>
Bedrock	<p>Based on information obtained from the Ontario Geological Survey layer in Google <i>EarthPro</i>, entitled <i>Bedrock Geology of Ontario</i>, the Phase One Property is an area where the main bedrock type is reported to consist hale, and limestone and shale interbeds of the Carlsbad Formation and black shale with some brown shale of the Billings Formation. The depth to bedrock varier over the site at 15 to 50 m.</p> <p>The ERIS report and historical documents did not encounter bedrock in the wells or boreholes drilled in the Phase One Study Area to a maximum depth of 28 m BGS.</p>
Inferred Ground Water Flow Direction	<p>Based on observed site topography, information accessed from the MNR Natural Heritage Areas on-line mapping and the Ontario Base Map (provided in Appendix B-5), the regional surface drainage (and</p>

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

REVIEW AND EVALUATION OF INFORMATION

October 26, 2021

Physical Characteristics/ Pathways	Description
	<p>anticipated shallow ground water flow direction) is expected to flow to the northwest toward the Rideau River, approximately 3.0 km west of the Phase One Property. Localized ground water flow may also be directed towards the northwest toward Sawmill Creek, situated approximately 130 m west of the Phase One Property.</p> <p>The direction of the shallow ground water flow in limited areas can also be influenced by the presence of underground utility corridors or other features and is not necessarily a reflection of regional or local ground water flow or a replica of the Phase One Property or area topography.</p>
Underground Utilities	<p>Utility locations are based on as-built drawings or utility clearances provided by third parties. Utilities present at the Site include, but are not limited to, hydro, gas, communication lines, cable, water and sewer services. No other underground utilities were observed at the Phase One Property at the time of the site reconnaissance.</p>

The figures provided in **Appendix A** include features and details in relation to the Phase One Study Area and the Phase One Property. In general, the figures illustrate the following where applicable: road names and existing buildings and structures, water bodies, location of areas of natural significance (if present), presence of drinking water wells at the Phase One Property (if known), property usage types on adjoining properties, APECs, locations and types of known tanks (if present), general inferred direction of ground water flow in the vicinity of the Phase One Property, and the approximate locations of underground utilities or structures, if known.

CONCLUSIONS
October 26, 2021

8.0 CONCLUSIONS

8.1 WHETHER PHASE TWO ENVIRONMENTAL SITE ASSESSMENT REQUIRED BEFORE RECORD OF SITE CONDITION SUBMITTED

Based on the findings of this Phase One ESA, a Phase Two ESA is not required before an RSC can be filed.

An RSC can be filed based solely on the findings of this Phase One ESA.

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
SOUTHERN PART OF 2210 BANK STREET, OTTAWA, ONTARIO**

CONCLUSIONS
October 26, 2021

8.2 SIGNATURES

The initial site reconnaissance and preparation of the draft report were completed by Allen MacGarvie, CET on August 5, 2021. The Phase One ESA was completed under the supervision of Erika Ryter, M.A.Sc., P.Eng., QPESA. Credentials of the project team members are provided in Appendix D.

All of which is respectfully submitted,

STANTEC CONSULTING LTD.

CLOSURE
October 26, 2021

9.0 CLOSURE

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential liabilities associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the identified portion of the property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information. All information received from the Client or third parties in the preparation of this report has been assumed by Stantec to be correct. Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

The opinions in this report can only be relied upon as they relate to the condition of the portion of the identified property that was assessed at the time the work was conducted. Activities at the property subsequent to Stantec's assessment may have significantly altered the property's condition. Stantec cannot comment on other areas of the property that were not assessed.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition. This report should not be construed as legal advice.

Subject to the limitations contained in this report and subject to the terms of the contract under which this report was prepared, this report may be relied upon by the Client.

This report has been prepared for the exclusive use of the Client identified herein and the parties identified above, and any use by any third party, is prohibited. Stantec assumes no responsibility for losses, damages, liabilities or claims, howsoever arising, from third party use of this report.

The report is limited by the following:

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures are not guaranteed. If future work is planned, the exact location of all such utilities and structures should be confirmed and Stantec assumes no liability for damage to them.

The conclusions are based on the site conditions encountered by Stantec at the time the work was performed. Due to the nature of the investigation and the limited data available, Stantec does not warrant against undiscovered environmental liabilities. As the purpose of this report is to identify site conditions which may pose an environmental risk, the identification of non-environmental risks to structures or people on the site is beyond the scope of this assessment. Should additional information become

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Description:

An Ottawa waste services company was fined \$100,000 for depositing waste on an unapproved site and failing to decontaminate a tanker contrary to a ministry approval and the Environmental Protection Act. "Polluters should be aware that the ministry's Investigations and Enforcement Branch will vigorously pursue charges when our environmental laws are broken," said Environment Minister Jim Bradley. 349977 Ontario Ltd., operating as Lacombe Waste Services operates a waste transportation services under a ministry approval for a waste management system. The facility is located on Power Road in the City of Ottawa. The company was contracted to provide roll-off containers for a retrofit project to remove toilets and transport them for disposal. An investigation found the toilets were taken to the company's transfer facility located on Power Road in Ottawa and later transferred to a former quarry on Bank Street. Lacombe deposited two loads of approximately 500 toilets wrapped in garbage bags, including materials that were not inert fill on Bank Street, a property that was not an approved waste disposal site. A separate investigation also found Lacombe failed to properly decontaminate tankers used to transport various liquid wastes. Ministry approval requires the tankers to be cleaned when different types of waste are to be hauled. The company failed to do so leaving a load of wastewater contaminated with industrial fuels and oils. In a global resolution, Lacombe was fined a total of \$100,000 plus victim fine surcharges of \$25,000. All fines were paid immediately after the conviction.

**Investigation 2:
Penalty Imposed:
Description:**

On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

Description:

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

Description:

Santaro Development LLC has been fined \$10,000 plus a victim fine surcharge, and Waste Services (CA) Inc. has been fined \$7,500 plus a victim fine surcharge, after pleading guilty on November 13, 2008 to violations under the Environmental Protection Act. Santaro Development LLC pleaded guilty to operating a Waste Management System without a Certificate of Approval, and Waste Services (CA) Inc. pleaded guilty to arranging for the use of equipment, namely transport trucks, for the handling and transportation of waste that was not part of a Waste Management System for which a Certificate of Approval had been issued. The companies were given 60 days to pay. The Court heard that Santaro Development LLC is a New York Based trucking company. Waste Services (CA) Inc. is an Ontario company that operates waste disposal sites, transfer facilities and waste management systems, including a facility in Ottawa. During a ministry surveillance program, Santaro trucks were observed crossing the border into Canada, picking up waste at the Waste Services facility in Ottawa, and crossing back into the United States to dispose of the waste. At the time, Santaro did not have an approval from the ministry for a Waste Management System, and Waste Services did not ensure that Santaro had the necessary approval prior to arranging for it to transport waste from its facility. Santaro Development LLC and Waste Services (CA) Inc. were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994- Jun 30, 2021

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jun 30, 2021**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994- Jun 30, 2021**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jun 30, 2021**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jun 30, 2021**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial **HINC**

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial **INC**

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2021

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jun 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994- Jun 30, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jun 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
