date: July 27, 2022

file: PG4960-MEMO.02

Paterson Group (Paterson) prepared the following memo to provide our response to the geotechnical-related comment issued by the City of Ottawa. The following memorandum should be read in conjunction with Paterson Group Report PG4960-1 dated July 10, 2019.

Geotechnical Investigation

Comment 1: *Provide a stamped memo indicating that the subsurface investigation along with the recommendations in the report is applicable to the site today and meets or exceeds investigation requirements set out in City of Ottawa Geotechnical Guidelines. This is required due to the report being published in 2019.*

Response: Based on our review of the Paterson Group Report PG4960-1 dated July 10, 2019, and the recommendations provided therein, the original geotechnical report is still applicable for the proposed development with no additional work or changes required from a geotechnical perspective. It should be noted that the aforementioned report including the investigation along with the recommendations is in compliance with today's standards.

We trust that this information satisfies your requirements.

Best Regards,

Paterson Group Inc.

Yashar Ziaeimehr, M.A.Sc.

David J. Gilbert, P.Eng.
