1.0 EXECUTIVE SUMMARY

Golder Associates Ltd. (Golder) was retained by Dream Impact Master LP (Dream) to conduct a Phase One Environmental Site Assessment (“Phase One ESA”) of the property referred to as 665 Albert Street, located north of Albert Street, east of Booth Street, south of the Fleet Street Aqueduct (open aqueduct), and west of the site of the future Ottawa Public Library – Library and Archives Canada Joint Facility in Ottawa, Ontario (the “Phase One Property”). Currently the Pimisi LRT station and LRT line crosses the Phase One Property; however, it is expected that these features will not be transferred to Dream and have been considered off-Site structures/features.

At the time of the site reconnaissance, conducted on January 26, 2022, the Phase One Property consisted of a 1.11 hectare parcel of undeveloped land with no buildings or structures. It is understood that the Phase One Property is to be developed with a mixed-use development including two towers of 30 and 35 storeys, each with a four-storey terraced podium. The Phase One Property is currently owned by the National Capital Commission (government of Canada) and is being purchased by Dream LeBreton, which is a partnership between Dream Asset Management Corporation and Dream Impact Master LP.

The Phase One ESA was completed in accordance with O.Reg. 153/04 and included a review of available current and historical information, a site visit, evaluation of readily available information, and reporting, subject to the limitations outlined in Section 9.0 of this report. The Phase One Property is considered an enhanced investigation property as defined by O.Reg. 153/04. The date of the site visit was January 26, 2022.

Based on the information obtained and reviewed as part of this Phase One ESA, 37 potentially contaminating activities (PCA) were identified contributing to six areas of potential environmental concern (APEC). Accordingly, a Phase Two ESA is required for the submission of a Record of Site Condition (RSC), if an RSC is required.

A response to Golder’s request for information from the Ministry of the Environment, Conservation and Parks (MECP) was not available at the time of report preparation. A plan of survey was not available for review and is required to satisfy the requirements of O.Reg. 153/04.

2.0 INTRODUCTION

2.1 Phase One Property Information

Golder Associates Ltd. (Golder) was retained by Dream Impact Master LP “Dream”) to conduct a Phase One Environmental Site Assessment “Phase One ESA”) of the following property:

Information	Description
Property Identification Number	All of PIN 04112-0242(LT)
Legal Description	PART OF WELLINGTON STREET (CLOSED BY BY-LAW INST. NO. LT1243128), PLAN NO. 2, BEING PARTS 1 TO 4, ON PLAN 4R-32303; PART OF WELLINGTON STREET, CLOSED BY LT1243128 & OC1457912, PLAN NO. 2, BEING PARTS 11 TO 17, PLAN 4R-32006; SUBJECT TO AN EASEMENT IN GROSS OVER PARTS 15 & 16 4R32006 AND PART 3 4R32303 AS IN OC2376918; CITY OF OTTAWA
Property Identification Number	All of PIN 04112-0244(LT)
Legal Description	PART LLOYD STREET, PLAN NO. 2, BEING PART 9, PLAN 4R-32006; S/T LT1243142; CITY OF OTTAWA

Information	Description
Property Identification Number	All of PIN 04112-0250(LT)
Legal Description	PARTS OF LOTS 6 & 7, PART OF THE WATER WORKS RESERVE, PART ALLEY CLOSED BY BY-LAW LT1243120 PLAN 9481, BEING PART 2 ON 4R-32006; CITY OF OTTAWA
Property Identification Number	All of PIN 04112-0251(LT)
Legal Description	LOTS 1, 2, 3, 4, 5, 6, 7 & 8 PLAN 9481, WATER WORKS RESERVE ON PLAN 9481, ALLEY ON PLAN 9481 (CLOSED BY BY-LAW LT1243120), EXCEPT PART 40 PLAN 5R13914, PART 10 PLAN 4R23452, PART 1 4R30019, PARTS 20, 21, 22, 25 & 41 ON 4R32151 AND PARTS 2, 23 & 25 ON 4R32006; SUBJECT TO AN EASEMENT IN GROSS OVER PARTS 3, 24 & 26 ON 4R32006 AND PARTS 23, 26, 27, 29, 37, 38 & 42 ON 4R32151 AS IN OC2177774; SUBJECT TO AN EASEMENT IN GROSS OVER PART LOTS 1, 2 & 3 PLAN 9481, PART 5, 4R32006 AND PARTS 27 & 28, 4R32151 AS IN OC2376919; CITY OF OTTAWA
Property Identification Number	Part of PIN 04112-0263(LT)
Legal Description	Final description to be updated at closing pending registration of new reference plan

The location of the Phase One Property is provided in Figure 1. A plan illustrating the Phase One Property and Phase One Study Area is provided in Figure 2.

The contact information for the Phase One Property is:

Owner / Client	Address	Contact Information

3.0 SCOPE OF INVESTIGATION

A Phase One ESA is a preliminary qualitative assessment of the environmental condition of a property, based on a review of current activities and historical information for the Phase One Property and a review of relevant and readily available environmental information for the surrounding properties located within a 250 metre (m) radius of the boundary of the Phase One Property (collectively referred to as the "Phase One Study Area"). The boundary of the Phase One Study Area is presented in Figure 2.

According to Ontario Regulation (O.Reg.) 153/04 *Records of Site Condition*, the objectives of a Phase One ESA are to:

- 1) Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property;
- 2) Determine the need for a Phase Two Environment Site Assessment (ESA);

- 3) Provide a basis for carrying out a Phase Two ESA;
- 4) Provide adequate preliminary information about environmental conditions in the land or water on, in or under the Site for the conduct of a risk assessment following completion of a Phase Two ESA; and,
- 5) Identify and report on evidence of actual and/or potential contamination on the Phase One Property from current and historical activities at the Phase One Property or the surrounding area.

4.0 RECORDS REVIEW

4.1 General

4.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Phase One Property. Based on Golder's review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the site visit, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA.

4.1.2 First Developed Use Determination

The date of first developed use of the Phase One Property was determined based on review of the Fire Insurance Plans, aerial photographs, and ERIS Report. Because of the size and history of the Phase One Property, it was previously divided into several different parcels that belonged separate owners. According to Fire Insurance Plans, parcels within the Phase One Property have been owned by private individuals from at least 1878 when several residential dwellings, a primary school, and a small storefront were present on the Phase One Property. Both the primary school and the store were present in the northwest portion of the Phase One Property. Accordingly, the first developed land use of the Phase One Property is at least 1878.

4.1.3 Insurance Records

Golder conducted a search of available Fire Insurance Plans (FIPs) for the Site and the surrounding properties within a 250-metre radius of the Site. FIPs from 1878, 1888, 1902 revised 1912, 1922, 1925 revised 1948, and 1956 were available for the Site and surrounding area. Noteworthy findings are summarised in Table 1.

Table 1: Fire Insurance Plans, Property Underwriters' Reports, and Property Underwriters' Plans

Year / Record	Phase One Property	Surrounding Properties
1878 FIP	The Site is bounded by the Water Works Aqueduct to the northwest and Wellington St. to the northeast. Wellington runs through the central and western portion of the Site. The Site is bounded to the south by Maria St. (now Albert) and to the west by Bridge St. (now Booth). The Site is developed with several residential dwellings and a primary school. A store is present at the intersection of Bridge and Wellington.	Neighbouring properties are used primarily for residential purposes. The Water Works Aqueduct runs past the northern edge of the Site. The Canada Central Railway Depot Grounds are approximately 200 m to the west of the Site, beyond Broad St. which no longer exists.

Year / Record	Phase One Property	Surrounding Properties
1888 and 1888 Revised 1901 FIP	Largely similar in property use to 1878. A church is now present on the southwestern portion of the Site.	Neighbouring properties are still primarily developed with residential dwellings. The Railway Depot is still present and has expanded to become a more extensive railway yard with several tracks, and an associated passenger depot is now present. The Canada Atlantic Railway runs next to the northern edge of the Phase One Property. To the east of Bridge St. is the J.R. Booth Water Works Yard which appears to be used to store lumber.
1902 Revised 1912	The Continental Bag & Paper Co. Ltd. is now present in the northwest corner of the Site at 305 Bridge St. (now Booth). The primary school that was there previously is no long present. At the southeast corner of the intersection of Bridge and Wellington, a Chinese Laundry is listed, which may have been a dry-cleaning establishment. A public school is present at 50 Wellington St.	The Canada Atlantic Railway is now listed as the Grand Trunk Railway. On the western side of Bridge St. at 336 Bridge St. is the S.L. Kyle Wood Working Factory. Approximately 127 m northwest of the Site at 25-27 Ottawa St. (no longer exists) is the Laurentian Foundry with a moulding shop and coke house. To the south of the Water Works Aqueduct west of Bridge St., are the Corporation Work Shops, which include a smithy and machine shop approximately 145 m west southwest of the Phase One Property. The General Electric Co. MigaWorks is present approximately 140 m southwest of the Site at 95 Albert.
1925 Revised 1948	The Continental Bag & Paper Co. Ltd. is now called the Continental Paper Products Company Limited. Otherwise, the site is largely the same as in the previous FIP	The Grand Trunk Railway is now called the Canadian National Railways. To the immediate west of the Site at 146 Booth St. is A. Palmer Plumbing & Heating Tinsmith. To the immediate northeast of the site is a gasoline and service station at 610 Wellington along with two USTs. Approximately 80 m southwest of the Site, at 683-685 Wellington St. is a Machine and Radio Repair Shop. Slightly further to the southwest at 689 and 691 Wellington are The Ottawa Paint Works Ltd., including paint storage, an Auto Accessories and Garage, and two USTs. On the south side of Albert, approximately 140 m to the southwest of the Site is the Ottawa Paper Box Co. Ltd. To the immediate north of the Site at 629 Wellington St. Red Rock of Canada Ltd. has two USTs which are noted to be fuel oil tanks with a capacity of 2500 gallons. Approximately 130m northwest of the Site, at 80 Ottawa St. is Capital Commercial Laundry, which may have been a dry-cleaning establishment. Approximately 120 m to the east, the St. Vincent

Year / Record	Phase One Property	Surrounding Properties
		<p>Hospital for Incurables has a laundry facility, which may include dry-cleaning. Approximately 145 m to the northwest of the Site, at 110 Booth St. is an auto washing & oiling establishment with two USTs. Approximately 225 m north of the Site, at 65 Queen West St. (now Fleet), is Garland & Ritchie Limited which is a vehicle repair garage with one UST containing gas.</p>
1956 FIP	Largely unchanged from previous FIP	<p>Approximately 60 m north of the Site, at 137 Booth there is now an Auto Radiator Servicing establishment. The auto washing & oiling establishment at 106-110 Booth St. from 1925 is now only at 110 Booth St. and the USTs are no longer listed. A third UST has joined the two near the gasoline and service station to the immediate northeast of the Site. Further northeast, at 584 Wellington St. there is now a brake and clutch service station. Just south of Albert St., to the south of the Site at the intersection of Booth and Albert, there is an oiling and greasing station.</p> <p>Approximately 185 north northwest of the Site is Therien Co. Rug Cleaning, which may use dry-cleaning equipment. Approximately 200 m north of the Site, Blair Equipment Ltd. has a UST and garage. Approximately 200 m southwest of the Site, at 703 Wellington, there is an oiling and greasing auto service and adjacent to a UST. Approximately 220 m north of the Site, at 87-91 Fleet St., Garland & Ritchie Limited has become Rovale Service Station, which offers oiling & greasing services; one UST is still present. Approximately 240 m northwest of the Site is the Ottawa Boiler & Steelworks neighbouring the Thomas Lawson & Sons Foundry & Machining Shop approximately 250 m northwest of the Site. The Canadian Pacific Railway yard is still present at this time to the west of Broad St.</p>

4.1.4 Chain of Title

Because the Phase One Property was historically divided into several different parcels with different landowners it has been divided into three sections for the purpose of summarising previous ownership. These sections include the north, the southeast, and the southwest. All of these sections merged between 1962 and 1966 because of the acquisition of LeBreton Flats by the National Capital Commission during that period. From that point on, the Phase One Property is considered one property. Because of the many individual parcels that would need to be searched, a Chain of Title search was not undertaken; however, information was drawn from FIPs, the HLUI, and aerial imagery to estimate ownerships over time. This information is summarised in Tables 2 through 4.

Table 2: Phase One Property Northern Section Ownership History

Owner's Name	Dates of Ownership
Crown	Prior to 1878 at the latest.
Victoria Ward Primary School	By 1878 until sometime before 1902
Individual Residential Dwellings	By 1878 until sometime before 1902
Unnamed Store	By 1878 until sometime before 1902
The Continental Bag & Paper Co. Ltd. / The Continental Paper Products Limited	1902-1960
National Capital Commission	By at least 1966 to Present

Table 3: Phase One Property Southwestern Section Ownership History

Owner's Name	Dates of Ownership
Crown	Prior to 1878 at the latest.
Individual Residential Dwellings	By 1878 until at least 1956
St. Mark French Presbyterian Church / St. Mark French Protestant Church (United Church of Canada)	By 1888 until at least 1956
Chinese Laundry	By 1902 until at least 1956
National Capital Commission	By at least 1966 to present

Table 4: Phase One Property Southeastern Section Ownership History

Owner's Name	Dates of Ownership
Crown	Prior to 1878 at the latest.
Individual Residential Dwellings	By 1878 until at least 1956
Wellington Street Public School	By 1902 until at least 1956
National Capital Commission	By at least 1966 to present

4.1.5 City Directories

Golder completed a review of the city street directories for the current and surrounding addresses currently in place. Based on a review, it was determined that there were no listings for many addresses with the only listings attributed to the Phase One Property (665 Albert Street), 555, and 615 Albert Street, which included residential listings as far back as 1875 with no listings in 1870. It is noted that the Phase One Property and surrounding lands consist of several historical lots that have been undeveloped for several decades and the current addresses may not reflect the historical addresses on the site or surrounding lands.

4.1.6 Environmental Reports

The following environmental reports (ordered from oldest to most recent) related to the Phase One Property were provided to Golder. Golder consulted these reports to develop an understanding of the environmental conditions at the Phase One Property and surrounding properties.

- *“Soil and Groundwater Sampling Investigation LeBreton/Bayview Planning Study Group I and Group II Sites: Ottawa, Ontario”*, project number 921-2783, prepared by Golder Associates Ltd for National Capital Commission, dated March 1993 (“1993 Soil and Groundwater Investigation”).
- *Untitled Summary of Subsurface Conditions*, project number 92-072, prepared by Raven Beck Environmental Ltd. for National Capital Commission, dated March 1993 (“1993 Summary of Subsurface Conditions”).
- *“Supplementary Environmental Site Assessment LeBreton Flats: Ottawa, Ontario”*, project number 97-142, prepared by Aqua Terre Solutions Inc. for National Capital Commission, dated March 1998 (“1998 Supplementary Environmental Site Assessment”).
- *“Limited Phase I Environmental Site Assessment: LeBreton Flats and Vicinity: Ottawa, Ontario”*, project number ONO11359-1, prepared by Jacques Whitford Environment Limited for Robinson Consultants Inc., dated January 2001 (“2001 Limited Phase I”).
- *“LeBreton Flats Infrastructure and Remediation Project: Ottawa, Ontario: Supplementary Phase II Environmental Site Assessment”*, project number 480000-165-EN-0001-02, prepared by Dessau-Soprin Inc. for National Capital Commission, dated April 2003 (“2003 Supplementary Phase II”).
- *“LeBreton Flats Infrastructure and Remediation Project: Ottawa, Ontario: Site Decontamination and Post Remediation Verification: Blocks I, P, Q, R, S, U, T, Lett, Lloyd and Fleet Streets”*, project number 480000-514-EN-0001-0B, prepared by Dessau-Soprin Inc. for National Capital Commission, dated March 2005 (“2005 Site Decontamination”).
- *“2007 – 2008 Monitoring and Sampling Program LeBreton Flats Remediation and Development Program Ottawa, Ontario”*, project number 97-142H, prepared by Aqua Terre Solutions Inc. for National Capital Commission, dated January 2009 (“2009 Monitoring and Sampling Program”).
- *“Remediation of Block O/N LeBreton Flats, Ottawa, Ontario”*, project number 05-215-40, prepared by Intera Engineering Ltd. for National Capital Commission, dated February 2009 (“2009 Remediation”).
- *“Supplemental Phase II Environmental Site Assessment: South LeBreton Flats Blocks B1, B2, C1, C2, E1, E2, E3, G, H1 and H2, Ottawa, Ontario”*, project number 11-1122-0199/1000, prepared by Golder Associates Ltd. for National Capital Commission, dated February 2012 (“2012 Supplemental Phase II”).

- *“Groundwater Monitoring: South LeBreton Flats Blocks B1, B2, C1, C2, E1, E2, E3, G, H1, H2, Ottawa, Ontario”*, project number 11-1122-0199/2000, prepared by Golder Associates Ltd. for National Capital Commission, dated May 2012 (“2012 Groundwater Monitoring”).
- *“Remediation of LeBreton Flats North, Ottawa, Ontario”*, project number 12-1122-0198, prepared by Golder Associates Ltd. for National Capital Commission, dated December 2014 (“2014 Remediation, LeBreton Flats North”).

While technical peer reviews of the reports were not completed, noteworthy findings from these reports are summarized in the following sections.

1993 Soil and Groundwater Investigation

- Soil and groundwater sampling was carried out at 15 former industrial sites located in the LeBreton/Bayview area. Sampling was intended to quantify the extent and levels of suspected or confirmed organic and inorganic remnants from former industrial land uses
- Of the 15 sites investigated, sites numbered 16, 17, 19, 20, 32, 35, 38, and 41 are within the study area for this Phase One ESA.
- Site 16 (Unnamed Service Station and Bus Garage): Located approximately 25 m northeast of the Site. Stratigraphy consists of fill overlying glacial till. Fill consists of silty sand with gravel, cobbles, brick, concrete, mortar, and traces of organic matter. The thickness of the fill layer ranges from 0.3 to 2.4 m. The till layer consists of silty sand with some gravel, cobbles, and boulders. The till layer continues to at least 3 mbgs. Combustible and organic vapour concentrations taken in the field were relatively low. Groundwater seepage was noted in one test pit. Others were dry upon completion.
- Site 17 (Continental Paper Products Ltd.): Located on northwestern portion of the Site. Stratigraphy consists of fill materials overlying glacial till. Fill consists of silty sand with some gravel, overlying rubble fill composed mainly of boulders, brick, mortar, concrete, and wood. The thickness of the fill layer ranges from 2.4 to greater than 3.7 mbgs. The glacial till layer was encountered on the west side of the site at a depth of 3.2 mbgs. Other boreholes encountered refusal in the rubble fill. Combustible and organic vapour concentrations taken in the field were relatively low, with one exception where the concentration of combustible vapour was measured at 10% LEL.
- Site 19 (Therein Co. Ltd. Rug Cleaners): Located approximately 180 m north northwest of the Site. Stratigraphy consists of fill overlying limestone bedrock. The fill consists of silty sand with some gravel, boulders, brick, organics, coal, and ash. Combustible and organic vapour concentrations taken in the field were relatively low. Groundwater levels ranged from 1.65 to 2.1 mbgs.
- Site 20 (A. Palmer Plumbing Ltd.): Located approximately 50 m west southwest of the Site. Stratigraphy consists of fill overlying silty sand/sandy silt and glacial till. Fill consists of silty sand with gravel and some rubble (concrete, brick, and ash). The fill layer ranges in thickness from 1.8 to 2.6 mbgs. The underlying native silty sand to sandy silt layers have a total thickness ranging from 3.2 to 3.8 mbgs. Combustible and organic vapour concentrations taken in the field were relatively low.
- Site 32 (Ottawa Boiler and Steel Works): Located approximately 240 m northwest of the Site. Stratigraphy consists of fill overlying bedrock. The fill consists of silty sand with cobbles, gravel, concrete, brick, ash, and wood. Combustible and organic vapour concentrations taken in the field were relatively low. Test pits were noted to be dry.

- Site 35 (Department of Transport and Radio, Machine Shop): Located approximately 100 m southwest of the Site. Stratigraphy consists of fill overlying topsoil and sandy silt or silty sand followed by glacial till. The fill layer ranges in thickness from 1.3 to 3.0 mbgs and consists of silty sand to sandy silt with gravel, boulders, cobbles, brick, and concrete. The layer of topsoil has a thickness ranging from 0.15 to 0.20 m. Underlying glacial till ranges from 3.3 to at least 5.2 mbgs. The glacial till consists of sandy silt with some gravel, trace clay, and occasional cobbles. Combustible and organic vapour concentrations taken in the field were relatively low with one exception where combustible vapour was measured at a concentration of eight and nine percent LEL in two samples.
- Sites 38, 41, and 43 (Massey-Maple Leaf Warehouses, CPR Yards, and Snow Dump): Covers large swathes of land located between 185 m west southwest and 570 m west southwest of the Site, and stretching 420 m west northwest of the Site. Fill consists of silty sand with clay, gravel, cobbles, concrete fragments, brick, boulders, organic matter, wood, and ash. The fill layer ranged in thickness from 2.85 to 4.60 m. Combustible and organic vapour concentrations in the field were relatively low except for at four sampling locations where combustible vapour concentrations were measured at five percent LEL.
- Soil and groundwater samples were not compared to any Standards in this report; however, for Site 17 which is the only listing that was on the Phase One Property, six soil samples were analysed, and it was noted during this review that elevated levels of total oil & grease, barium, cadmium, lead, zinc, and mercury present in the fill at the Phase One Property which may still be present.

1993 Summary of Subsurface Conditions

- The purpose of this report is to summarise subsurface conditions along the (at the time) proposed transitway alignment in LeBreton Flats. The summary is based on investigations completed between November 1990 and March 1993.
- The former land uses for the area are summarised and listed as sites including the same titles as in the previous report plus two additional sites: Site 15 – Langlier Ltd. – Heating Supplies, which is located approximately 55 m north northwest of the Site and Site 36 – Ottawa Paint Works, which is located approximately 150 m southeast of the Site.
- Overburden along the proposed transitway averages three to five metres in thickness and generally consists of 1.5 to 3.0 m of fill overlying one to two metres of native silty sand and some clay till. The fill is comprised of sand, silt, bricks, mortar, and concrete. The underlying bedrock is black shaley limestone of the Ottawa Formation or Eastview Formation.
- In the western portions of the proposed transitway route, groundwater is found at depths of about three metres near the contact between the fill and native silty sand. Near Booth St. and east of Booth St., the water table is deeper, reflecting drainage to the aqueducts and possibly several deep sewers in the vicinity of Booth and Wellington. Groundwater flow along most of the transitway route moves northwards towards the aqueducts.
- Soil samples were compared against CCME remediation criteria for commercial/industrial land use as well as oil & grease and nitrogen standards from MOE decommissioning guidelines.
- Three of the 27 soil samples submitted for analysis of heavy metals had elevated levels of lead. This lead was detected within fill between 1 and 3 mbgs at Sites 16 and 17. Pockets of heavy metal contamination may be related to imported fill.

- Six soil samples showed exceedances of Standards for zinc, antimony, nitrogen, or sodium absorption ratio (SAR). Exceedances for zinc were found in the same areas as those for lead. Exceedances for antimony and nitrogen were detected at Site 36.
- Four samples were analysed for PAH, one of which, located at Site 20, exceeded the Standard.
- Generally, only minor exceedances of remediation criteria were detected along the proposed transitway route, all of which were within pockets of fill.
- Groundwater was analysed for various inorganic and organic parameters. A plume of BTEX at Site 36 appears to be the only significant groundwater contamination. The plume, which is derived from buried paint solvents, appears not to have migrated offsite at the time of this report. This Site is located 150 metres southwest of the Site.

1998 Supplementary Environmental Site Assessment

- The purpose of this investigation is to assess non-industrial properties for specific issues, including the presence of ash, soil with heavy metals, and coal/fire debris and to revise estimates of soil exceeding criteria for both the current and previous investigations. In total, ten sites were investigated, six of which are entirely in the Phase One Study Area, and two of which are partially within the Phase One Study Area. Sites M and N are to the east of the Phase One Property and Sites E, F, G, H, I, and J are to the north and northwest of the Site. Sites H and J are the ones which are only partially within the Phase One Study Area.
- Soil samples were analysed for heavy metals PAHs. Monitoring wells were not installed, as previous investigations did not identify any exceedances of MOE criteria at the time.
- Ash-containing soil exceeding the MOEE (1997) Table B residential criteria for heavy metals was found at all ten investigated sites.
- Soil with heavy metals exceeding the MOEE (1997) Table B residential criteria was found on seven of ten sites. Lead and copper were the metals most often exceeding the guidelines, but zinc and barium occasionally exceeded criteria as well.
- A discontinuous layer containing coal/fire debris and generally exceeding the MOEE (1997) Table B residential criteria for PAHs was found over five of ten sites.
- According to the analysis of samples taken during this investigation as well as other investigations that were reviewed during the preparation of this report, Aqua Terre prepared a figure indicating the approximate extent of contaminated areas.
 - The Phase One Property is shown to be contaminated with petroleum and heavy metals in the northwest corner, heavy metals in the northeast corner, ash (likely with heavy metals) on the south side just west of centre and petroleum on the south side just east of centre.
 - In the surrounding properties, sites are shown to be contaminated with overlapping zones of each of the four categories of contaminants: heavy metal containing soil, ash (likely with heavy metals), petroleum impacted soil, and coal/fire debris (likely containing PAHs).

2001 Limited Phase I

- The purpose of this assessment is to evaluate the possible environmental risks posed by both the historical and current activities on properties within the subject area. Sites of concern were identified, of which, one (42) is on the Site and 15 are within the Study Area of this Phase One ESA:
 - 17, 24, 25, 26, 27, 39, 40, 41, 42, 43, 44, 45, 46, 51, 52, and 53.
- Site 42 (645 Wellington Street – Continental Paper Products Ltd.): contaminants of concern are heavy metals.
- Site 17 (542 Wellington Street – Ottawa Brass Manufacturing Co.): contaminants of concerns are heavy metals and moulding sands.
- Site 24 (158 Fleet Street – Ottawa Boiler and Steel Works): Contaminants of concern are foundry coke, fly ash, slag, moulding sands, core sands, core oils, foundry facings, heavy metals, asbestos, paint, oil, and varnish.
- Site 25 (74 to 88 Ottawa Street – Laurentian Foundry): contaminants of concern are foundry coke, fly ash, slag, chemicals in moulding sands and binders, and facings.
- Site 26 (687 Wellington Street – Ottawa Paint Works): contaminants of concern are aromatic and aliphatic hydrocarbons, paint sludge, heavy metals (mainly lead, cadmium, and chromium), coal tar, mercury, and benzene.
- Site 27 (91 Booth Street – Therien & Co. Ltd. Rug Cleaning Works): contaminants of concern are dye liquors, cleaning solvents, and chlorinated solvents.
- Site 39 (65 to 91 Fleet Street – Rovale Motors): contaminants of concern are petroleum hydrocarbons and metals.
- Site 40 (629 to 61 Wellington Street – Langelier Ltd.): contaminants of concern are petroleum hydrocarbons and metals.
- Site 41 (610 Wellington Street – Automotive Service Station): contaminant of concern is heavy metals.
- Site 43 (137 Booth Street – Imperial Radiator Servicing): contaminants of concern are petroleum hydrocarbons and metals.
- Site 44 (681 Wellington Street, 146 Booth Street – A. Palmer Plumbing Supply Ltd.): contaminants of concern are petroleum hydrocarbons and metals.
- Site 45 (62 Ottawa Street – Queen Auto Service): contaminants of concern are petroleum hydrocarbons and metals.
- Site 46 (108 to 110 Booth Street – Chaudiere Plating Works): contaminants of concern are heavy metals and oils & grease.
- Site 51 (141 to 145 Broad Street – Junk Yard): contaminants of concern are petroleum hydrocarbons and metals.

- Site 52 (683 to 685 Wellington Street – Department of Transport and Radio, Machine Shop): contaminants of concern are heavy metals.
- Site 53 (703 Wellington Street – J. Doherty Service Station): contaminants of concern are petroleum hydrocarbons and metals.

2003 Supplementary Phase II

- The purpose of this assessment is to supplement previous reports on the LeBreton Flats area. The investigated sites consist mainly of parts of LeBreton Flats south of LeBreton Boulevard route (proposed at that time), including Booth Street between Fleet Street and Albert Street, an area west of Booth Street, and an area east of Booth Street. This investigation generally covers areas north of the Study Area of this Phase One ESA; however, its southernmost extent, along Booth Street, borders the west side of the Site.
- The field investigation including gathering samples from test pits, boreholes, and monitoring wells. A piezometric survey and permeability tests were also undertaken, along with measurement of light and dense non-aqueous phase liquids (LNAPLs and DNAPLs, respectively).
- The investigation concluded that the overburden in the area consists of unconsolidated deposits of heterogenous backfill material overlying bedrock. The average thickness of the overburden is two metres. Construction debris was often observed in the fill material. Generally, the water table was near the bedrock surface, typically located within fractured bedrock in the central part of LeBreton Flats but rising into the overburden towards the edges, particularly in the west. Groundwater was generally flowing towards the periphery of LeBreton Flats in September 2002.
- Soil samples with concentrations of heavy metals and PAHs in exceedance of the CCME soil criteria for residential/parkland land use and/or MOE Table B surface soil criteria for residential/parkland use and non-potable groundwater were encountered in most of the areas investigated. Soil contaminated with PHCs were encountered locally in the investigated sites.
- Soil leachate samples were analysed for heavy metals, benzo(a)pyrene, PCBs, phenols, and VOCs. Results were not in exceedance of MOE leachate toxic limit set by MOE Regulation 558/00 (Schedule 4 Leachate Quality Criteria). Therefore, contaminated soils may be disposed of in a sanitary landfill. None of the soil sampled containing PHCs in concentrations exceeding 10,000 mg/kg were analysed for leachate.
- Analysis of groundwater revealed concentrations of PAHs exceeding MOE Table B groundwater criteria for residential/parkland land use and non-potable groundwater in two of six investigated monitoring wells. Lead contamination was detected in one well as well.
- Combined with results from previous investigations, it is noted that groundwater in only four of 36 wells installed by DSI as of December 2002 were found to be contaminated by metals, PAHs, or VOCs. The nature and extent of groundwater contamination seem to be related to the fill material contaminated by industrial activities over time.

2005 Site Decontamination

- The purpose of this report is to provide background, remediation, and site verification information prior to the completion of a Record of Site Condition. The subject area of this report is bounded in the north by Wellington Street (in its present location), Booth Street in the west, and the aqueduct on the south and east. Therefore, it encompasses a large section of the northeastern portion of the Study Area of this Phase One ESA.
- The area was excavated to bedrock between 2002 and 2005.
- The Fleet Street right of way (ROW) was fitted with various services, backfilled, and finished with asphalt. Approximately 200 mm of fill was placed and graded in the remaining areas. Backfill consisted of soils from other work areas within LeBreton Flats as well as imported materials. On-site materials included sand from the Ottawa Parkway – Booth Street overpass approaches, excavated materials from the Booth Street ROW, and rock blasted during the construction of Wellington Street. Off-site material included stone dust, granular A, and granular B, type II from Boyce Quarry.
- Sampling and analysis were undertaken both during and after completion of the initial remediation work, and samples were compared to *Table 3 – Full Depth Generic Site Conditions Standards in a non-potable Ground Water Condition Under Part XV.1 of the Environmental Protection Act*. Three samples were found to exceed the Standards, so delineation of contamination and further remediation were carried out. Afterwards, the previously contaminated areas were no longer in exceedance of the standards.
- Contaminated groundwater (in exceedance of Table B Criteria) was found in one monitoring well during initial assessments, and it was concluded that any such contamination was localised. Remediation efforts did not specifically include groundwater remediation.
- Water encountered during remediation proceedings was pumped to the on-site sedimentation pond for discharge to the sanitary sewer. Two samples were taken from independent deep depressions while remediation work was ongoing for comparison against the City of Ottawa Sewer Discharge Criteria. Water samples, samples of materials left within the subject area, and final verification samples all met Table 3 standards.

2009 Monitoring and Sampling Program

- The purpose of this program was to address recommendations made as part of a previous report. Field investigations were completed between November 2007 and August 2008. In total, 40 groundwater samples and five surface water samples were collected and analysed. The southern portion of the study area for the 2009 Monitoring and Sampling Program corresponds to the northwestern portion of the Study Area for this Phase One ESA.
- The stratigraphy consists of sand and gravel fill. Bedrock was encountered between 0.8 and 11.1 mbgs. Groundwater elevations were found between 1.0 and 7.3 mbgs. The apparent direction of shallow groundwater was generally towards the Ottawa River; however, it is noted that underground services may influence groundwater flow locally.
- Groundwater samples were analysed and compared against MOE (2004) Table 3 standards for residential/parkland/institutional property use in coarse-grained soil. Concentrations of metals, PAHs, and F1-F4 PHCs were found below those standards.

- The report notes that concentrations of metals, PAH, and F1-F4 PHC satisfy MOE (2004) Table 3 standards in all analysed groundwater samples. Furthermore, risk assessments previously completed for lands within LeBreton Flats generally recommended two years of monitoring and sampling, which, at the time of writing the 2009 report, had been achieved. Therefore, no further sampling is required. It should be noted that the portion of the LeBreton Flats covered by the 2009 Monitoring and Sampling Program covers only a portion of the Study Area for this Phase One ESA, and the recommendation may not apply to the entirety of the Study Area.

2009 Remediation

- The purpose of this report is to assess the remediation of Block O/N in LeBreton Flats. Blocks O and N are located south of the Ottawa River Parkway, north of the aqueduct, between Booth and Broad Streets. The region considered in the 2009 Remediation report corresponds to the northwestern portion of the Study Area for this Phase One ESA.
- The remediation of Blocks O and N consisted of the complete removal of contaminated fill and soil to bedrock within site boundaries. Activities began in September 2007 and were completed in May 2008.
- Intera collected 13 verification soil samples after remediation activities were completed, including emplaced fill material and residual dust/soil adhering to the bedrock surface following excavation. Analytical results were compared to MOE Ontario Regulation 153/04, Table 3 full depth generic site condition standards in a non-potable groundwater condition for residential/parkland/institutional property use. No exceedances were noted.

2012 Supplemental Phase II

- The purpose of this report was to document the investigation of three parcels of land, one of which (B1 and B2) is within the Phase One Property and another of which (C1 and C2) is within the Phase One Study Area. These parcels are bordered to the north by the light rail transit alignment, to the east by the former transitway, to the south by Albert St., and to the west by the former alignment of Broad St.
- The investigation included the analysis of soil samples taken from 36 boreholes. Samples were tested for PAHs, select metals, PHCs, and BTEX. Specifically, 8 boreholes were completed on the Phase One Property.
- The investigation revealed that the subsurface materials in the investigated area can be divided into five distinct layers:
 - Construction debris
 - Black sand fill
 - Other soils/fill
 - Organics
 - Native/glacial till
- The upper two metres (approximately) consist of either a sand and gravel fill with demolition debris (construction debris) or the black sand layer. Both of these layers contain elevated concentrations of metals, PAHs, and some PHCs above residential land use standards (MOE Table 3 and CCME Soil Quality Guidelines), including in the boreholes on the Phase One Property.
- Soil underlying the upper two metres largely consists of either more construction debris fill or other soils/fill, which consists of sand, gravel, and possible re-worked native material. This layer generally presents fewer exceedances of standards.

- Very few exceedances were found in samples from the native/glacial till layer underlying the construction and other soils/fill layers.
- Organic soils were not found frequently, and the only layer of organics found within the Phase One Study Area are close to its western edge.

2012 Groundwater Monitoring

- The purpose of this report was to document groundwater monitoring within the same area as described in the summary of the above-listed report.
- Groundwater samples were collected from seven monitoring wells, two of which (MW06-24 and MW06-26) are within the Phase One Study Area. MW06-24 is located approximately 64 m west southwest of the Phase One Property and MW06-26 is located approximately 118 m west southwest of the Phase One Property. Samples were analysed for metals and PAHs.
 - MW06-24 had levels of antimony, benzo[a]pyrene, chrysene, and pyrene in exceedance of MOE Table 1 standards as well as benzo[a]anthracene, benzo[a]pyrene, chrysene, fluoranthene, and pyrene in exceedance of Federal Interim Groundwater Quality (FIGQ) Table 2 guidelines. None of the parameters exceeded the MOE Table 3 Standards.
 - MW06-26 had a level of cadmium that exceeded FIGQ Table 2 guidelines but were below the MOE Table 3 Standards.
- Because of historic activities within the report's study area include USTs and paint works, the report recommended that the presence of VOCs and BTEX be evaluated in future investigations.

2014 Remediation, LeBreton Flats North

- The purpose of this report was to document the remediation completed in support of a Record of Site Condition for the lands bound by Booth Street, Wellington Street, Aqueduct and the extension of Preston Street. This includes a portion of the Study Area to the northwest.
- The remediation included the removal off all overburden to bedrock followed by the completion of a Record of Site Condition to MOE Ontario Regulation 153/04, Table 3 full depth generic site condition standards.

4.2 Environmental Source Information

Golder contracted EcoLog Environmental Risk Information Services Ltd. ("ERIS") to conduct a search of environmental sources, including federal, provincial and private sector databases, for information on the Phase One Property and Phase One Study Area. The ERIS report is provided in Appendix A. The search included the following databases:

Anderson's Waste Disposal Sites; Certificates of Approval; Environmental Registry; TSSA Commercial Fuel Oil Tanks; Coal Gasification Plants; TSSA Fuel Storage Tanks; National Defence & Canadian Forces Fuel Storage Tanks, Spills, and Waste Disposal Sites; National PCB Inventory; National Pollutant Release Inventory; Ontario Inventory of PCB Storage Sites; Ontario Regulation 347 Waste Receivers Summary; Record of Site Condition; Retail Fuel Storage Tanks; Private and Retail Fuel Storage Tanks; Ontario Spills; Anderson's Storage Tanks; Waste Disposal Sites – MOE CA Inventory; Waste Disposal Sites – MOE 1991 Historical Approval Inventory; Water Well Information Systems, Databases; Boreholes; and the Ontario Regulation 347 Waste Generators Summary.

The ERIS report identified 154 individual listings within the study area including:

- Twenty-one (21) permitting records including Environmental compliance approvals, permit to take water, records of site condition, etc.
- Fourteen (14) previous ERIS searches
- Eight (8) listings under the Federal Contaminated Sites Inventory
- Forty-six (46) spill records
- Thirty-four (34) waste generators
- Eleven (11) pipeline incidents
- Twenty (20) borehole and water well records.

The following is a summary of the noteworthy listings present on the Site:

- LeBreton Flats, including the Phase One Property, was listed under the Contaminated Sites of Federal Land database for being contaminated with PAHs and metals in the soil and groundwater and PHCs in the soil.
- Several small spills were reported in connection with the construction of the Ottawa LRT, including spills of concrete washout, oil, and fuel possibly connected to refueling construction equipment on-site. The Phase One Property was used as a construction laydown yard for the LRT.

The following is a summary of the noteworthy listings for off-site within the Phase One Study Area:

- Five off-site listings were recorded under the Contaminated Sites of Federal Land database for LeBreton Flats. Contaminants include PAHs and metals in the soil and groundwater, and PHCs in the soil. The listings vary in distance and direction from the Site, but are generally to the north, northwest, and west of the Site.
- In 2008, a liquid fuel spill of approximately 200 L occurred at 54 Primrose Avenue, located 234 m southeast of the Site.
- In 2008, an unknown volume of fuel leaked from a UST connected to Rivermont Investments at 54 Primrose Avenue, located 234.1 m southeast of the Site.

4.2.1 Ministry of the Environment

A standard freedom of information request was submitted to the MECP. At the time of preparation of this report, the MECP had not issued a response to this request.

4.2.2 The City of Ottawa Correspondence

Golder completed a review of the City of Ottawa Historical Land Use Inventory (HLUI) for the Phase One Property and surrounding area. Based on the review of the City of Ottawa HLUI, there was one record identified for the Phase One Property, which is listed below. HLUI records from the Phase One Study Area that were deemed noteworthy are listed following the on-Site records according to their position with respect to gradient.

On-Site:

- 645 Wellington Street: The Continental Paper Products Limited operated under various names, including the Continental Paper Products Ltd., Public Service Cup Company of Canada, and Victoria Paper Co. between 1912 and 1960. This property is located on the northwestern portion of the Site. The HLUI notes one above-ground storage tank (AST) with a 15,000-gallon capacity and unknown contents.

Upgradient:

- Unknown address: An unnamed gas station operated in 1956. Corroborating with the 1956 FIP, this gas station is known to have been on the southeast corner of the intersection of Albert St. and Booth St. It is approximately 45 m south of the Site.

Cross-gradient:

- Unidentified address: Laurentian Foundry operated an iron foundry between 1910 and 1912. This record was identified in the review of FIPs and found to be approximately 127 m northwest of the Site at 25-27 Ottawa St., which no longer exists.
- 764 Albert Street: The Ottawa Paper Box Co. operated within the paper box and bag industries between 1922 and 1965. This property is approximately 95 m southwest of the Site.
- 80 Ottawa Street: The Capital Commission Laundry operated at this property between 1948 and 1956. This report is noteworthy, as these operations may have included dry-cleaning. This property is located approximately 130 m west of the Site and is on the north side of the aqueduct.
- 80 Ottawa Street: M. Levinson Salvage Co. Limited operated as a wholesaler of waste materials. The years of operation are noted as from 1920 to 1922 and 1960. This property is located approximately 130 m west of the Site.
- 80 Ottawa Street: Merner's Yard – JR Booth operated within the sawmill, planning mill and shingle mill products industry in 1901. This property is located approximately 130 m west of the Site.
- 62 Ottawa Street: Queen Auto Service operated a motor vehicle repair shop between 1948 and 1960. This property is located approximately 84 m west of the Site
- Unknown address on Booth Street: Imperial Radiators operated a vehicle repair shop with two gasoline USTs. This property is identified in the 1925 FIP at 110 Booth Street, which is approximately 145 m northwest of the Site. The USTs are not present in the 1956 FIP; however, the HLUI indicates that Imperial Radiators was in operation between 1948 and 1960.
- 110 Booth Street: MacCormack's Garage is operating a motor vehicle repair shop. This is likely at the same property as the previous entry; however, USTs are not listed. The HLUI indicated operation in 1940.
- Unknown address: Thomas Lawson & Sons Limited operated within the Copper and Copper Alloy Rolling, Casting and Extruding Industry between 1956 to 1965 to the west of the Site, north of the aqueduct.

- Unknown address on Wellington Street: O’Keefe Brewing Company operated here between 1948 and 1963 under several names, including Brading’s Capital Brewing, O’Keefe Brewing Co., and Department of Transport & Radio-Government Stores. One UST is noted as being on the property, which is located approximately 200 m west southwest of the Site. The UST for this property, according to the 1956 FIP is located on the far western side of the building however, and was outside of the Phase One Study Area.
- 703 Wellington Street: An unnamed garage operated between 1956 and 1963. This address no longer exists in the place indicated by the HLUI; however, it is in the same general area as the previous entry, approximately 200 m west southwest of the Site.
- Unknown address on Broad Street: Ottawa Iron and Brass Foundry operated in 1956. This property is thought to be approximately 240 m northwest of the Site.
- Unknown address on Fleet Street: Ottawa Boiler & Steel Works operated from 1920 to 1965. This property is thought to be approximately 230 m northwest of the Site.
- 141 Broad Street: The Sachs Brothers Junk Yard operated from 1912 to 1956. This property is located approximately 215 m west northwest of the Site.
- 542 Wellington Street: The Ottawa Brass Manufacturing Co. operated from 1920 to 1970. This property is located approximately 195 m northeast of the Site.
- Unknown address on Wellington Street: William Freedman operated within the paper box and bag industry in 1920. This property would be between 74 m and 250 m northeast of the Site.
- 610 Wellington Street: The Capital Coach Lines operated as Capital Coach Lines and as Tapp’s Garage from 1948 to 1956. Three USTs were located on this property, which is approximately 25 m northeast of the Site.
- 584 Wellington Street: The National Brake & Clutch Service operated a motor vehicle repair shop between 1956 and 1960. This property is located approximately 90 m northeast of the Site.
- 691 Wellington Street: The Chaudiere Garage operated a motor vehicle repair shop from 1920 to 1950. This property is located approximately 160 m southwest of the Site.
- Unknown address on Wellington Street: Ottawa Paint Works operates a motor vehicle wholesale at this property. Two USTs are present as well. This property is located approximately 140 m southwest of the Site based on corroboration with the 1956 FIP.

Downgradient:

- 137 Booth Street: Imperial Radiator Co. operated a motor vehicle repair shop between 1948 and 1960. This property is located approximately 60 m north of the Site.
- 108 Booth Street: Chaudiere Plating Works operated in 1940. This property is located approximately 140 m north northwest of the Site.
- Unknown address on Fleet Street: The Garland and Ritchie Ltd. and later The Rovale Service Station operates a motor vehicle repair shop between 1920 and 1956. One UST is present. This record matches the 1956 FIP finding at 87-91 Fleet Street approximately 220 m north of the Site.

- Unknown address of Booth Street: The Ottawa Steel & Casting Company Limited operated an iron foundry between 1900 and 1910. While this property is known to be north of the Site based on the HLUI polygons, its exact distance and heading from the Site is not known.
- 629 Wellington Street: Ferro Enamels (Canada) Limited operated within the paint and varnish industry from 1930 to 1940. This property is approximately 20 m north of the Site.
- 629 Wellington Street: Red Rock of Canada Limited operated within the soft drink industry from 1922 to 1956. This property is noted as having two USTs for fuel oil, each with a capacity of 2,500 gallons. This property is located approximately 45 m north of the site; however, the USTs were at the northern end of the property, approximately 40 m north of the Site.
- 65 Fleet Street: Ottawa Electric Railway operated at this location in 1912. This property has one UST, which appears to be the same UST as was found under records for Garland and Ritchie Ltd. and later The Rovale Service Station in 1925 and 1956. This property is located approximately 220 m north of the Site.
- Unknown address on Fleet Street: Blair Equipment Limited operated a motor vehicle repair shop under the names Standard Brands Ltd. and Blair Equipment Ltd. between 1948 and 1956 at this property. One UST is present as well. This property is located approximately 220 m north of the Site.
- Unknown address on Fleet Street: The RCMP operated an RCMP garage to repair motor vehicles between 1940 and 1950. This property is located between 105 m and 220 m north of the Site.
- 6 Commissioner Street: An unnamed scrap yard sold waste materials in 1922. This property is located 240 m northeast of the Site.
- Unknown address on Fleet Street: Best Boxes Limited operated between 1920 and 1922 under the names Canada Cheese Box Company Ltd. and Best Boxes Ltd. This property is located approximately 185 m north northwest of the Site.
- Unknown address on Fleet Street: Therien Co. Limited operated a rug cleaning and upholstering shop between 1948 and 1956. This property is located approximately 185 north northwest of the Site according to corroboration with the 1956 FIP (91 Booth St. / 118 Fleet St.)

4.2.3 Technical Standards and Safety Authority, Fuel Safety Division Records

The Technical Standards and Safety Authority (TSSA) maintains records related to registered underground storage tanks (USTs) for petroleum-related products. The TSSA was contacted to establish the status of the Phase One Property and to identify outstanding instructions, incident reports, fuel oil spills or contamination records. On February 14, 2022, the TSSA reported via e-mail that there were no records on file pertaining to the Phase One Property.

4.3 Physical Setting Sources

4.3.1 Aerial Imagery

Aerial imagery for the Phase One Property and the surrounding area obtained from geoOttawa was reviewed by Golder. The earliest image available for the Phase One Property was taken in 1928. Images were reviewed from 1928, 1965, 1976, 1991, 2002, 2011, and 2019. The image from 1958 was not reviewed given its poor quality and lack of coverage of the northern portion of the Phase One Property and Study Area. Information obtained from the review of the aerial photographs is summarized in the following table.

Year	Phase One Property	Surrounding Area
1928	The Site appears to be developed with residential dwellings and a school. Wellington St. runs through the site from its northeast corner through the centre of the eastern edge.	<p>North: Rail line which passes adjacent to the northwest corner of the Site. Water Works Aqueduct runs north of the Site. Further northern properties appear to be mostly residential and industrial</p> <p>East: Mostly appears to be residential dwellings. To the southeast is a hospital</p> <p>South: Development appears to be mostly residential and industrial</p> <p>West: To the immediate west are residential dwellings. Further west is a rail yard.</p>
1965	Large portions of the Site have been cleared of buildings, but some dwellings remain along with some larger buildings in the northwest corner. There is a parking lot on the west side adjacent to Booth St. Wellington St. still runs through the Site.	<p>North: Many properties to the north and northwest of the Site have been cleared of developments.</p> <p>East: Appears to be mostly residential. The hospital complex is still present.</p> <p>South: There is a large building southwest of the intersection of Wellington St. and Booth St. Otherwise, most buildings appear to be residential.</p> <p>West: Some buildings west of Booth St. which appear to be apartments followed by the rail yards.</p>
1976	The Phase One Property has now been entirely cleared of buildings and appears to be a parking lot on the south side of Wellington St. and grassland north of Wellington.	<p>North: The buildings that had not been cleared by 1965 have now been cleared away apart from the Water Works Pumping Station at the end of the Water Works Aqueduct.</p> <p>East: The buildings immediately northeast of the Phase One Property have been removed. The southeastern portion of the Study Area remains largely unchanged from 1965.</p> <p>South: Land to the southwest, particularly to the west of Rochester has been cleared of buildings.</p> <p>West: The rail yards and O'Keefe Brewing building have been cleared away. Most of LeBreton Flats now consists of fields with some roadways.</p>

Year	Phase One Property	Surrounding Area
1991	A bus lane (transitway) wraps from the northwestern corner to the southeastern corner of the Phase One Property. Otherwise, the Phase One Property remains largely unchanged from 1976.	<p>North: Similar to 1976.</p> <p>East: To the northeast, the area bordered by Wellington Street in the north and Commissioner Street to the east has been cleared of what few buildings remained in 1976.</p> <p>South: The properties south of Albert St. from Rochester St. in the west to Empress Ave. N. in the east have been developed with more residential dwellings.</p> <p>West: To the southwest, the land west of Rochester Street has been developed with residential dwellings.</p>
2002	Similar to 1991.	Largely similar to 1991. Some buildings have been developed north of the intersection of Booth St. and the Water Works Aqueduct to the northwest of the Site.
2011	Similar to 2002.	<p>North: A condominium complex has been constructed approximately 230 m north of the Site. Otherwise, similar to 2002.</p> <p>East: Similar to 2002.</p> <p>South: Similar to 2002.</p> <p>West: Northwest of the Site, Wellington St. has been redirected to its present location.</p>
2019	Wellington St. no longer runs through the Site and Pimisi LRT station has been constructed. The LRT railway tracks have been constructed through the northern portion of the Site, replacing the previously emplaced bus lane.	<p>North: The properties around the condominium complex have been developed with a parking lot south of Fleet St. and another condominium complex south of the previously constructed one. Pindigen Park has also been developed.</p> <p>East: The property northeast of the Site has been stripped in preparation for construction.</p> <p>South: Similar to 2011.</p> <p>West: LRT line has replaced bus lane.</p>

Based on the aerial photographs, the Phase One Property appears to have included residential and institutional developments since at least 1926. Afterwards, the lands in and around the Phase One Property were developed with mostly industrial and commercial properties to the northwest, north, and northeast, and rail yards to the west. The southern portion of the Study Area remained mostly residential with some commercial and institutional buildings as well. By at least 1965, lands in and to the northwest, north, and northeast of the Phase One Property were cleared of their buildings and mostly converted into fields and/or parking lots. Wellington Street’s route was moved north and a transitway was put in place before the LRT took its position by 2019.

4.3.2 Topography, Hydrology and Geology

Topography, hydrology, and geology were investigated by Golder. Findings are summarised below.

Topic	Conditions	Comment / Source
Topography of Site and Surrounding Area	The topography of the Site and surrounding areas was generally flat.	Site and surrounding area observations
Overburden Soils	A prior investigation reported that the soil overlying bedrock within LeBreton Flats consisted of a layer of unconsolidated deposits of heterogeneous backfill with construction debris often observed in the fill material. This layer of fill was underlain by glacial till soils extending to bedrock.	Previous investigations.
Type of Bedrock	Lindsay Formation – limestone; nodular to black laminated	Armstrong, D.K. and Dodge, J.E.P. (2007). Paleozoic Geology of Southern Ontario
Depth to Bedrock	Previous boreholes on the Phase One Property indicated bedrock present between 5 and 10 mbgs, except for some locations between extending upwards of 15 mbgs.	Previous investigations
Inferred Near Surface Groundwater Flow	For the Phase One Property, groundwater is estimated to be flowing generally northeast towards the aqueduct and Ottawa River.	Previous investigations
Site Grade Relative to the Adjoining Properties	The Site appears to follow the topography of the area and is at grade with respect to properties located adjacent to the Site, with the exception of a steep decrease in grade on the northern portion of the Phase One Property adjacent to the LRT line.	Site observations
Depth to Groundwater	A prior investigation reported that the water table was between four and six metres in the area of the Phase One Property. It is noted that several deep infrastructure programs have been completed to the east of the Site that may affect groundwater locally.	Previous Investigations.

4.3.3 Fill Materials

Topic	Conditions	Comment / Source
Fill Materials	A prior investigation reported that the soil overlying bedrock within LeBreton Flats consisted of unconsolidated deposits of heterogeneous backfill with construction debris often observed in the fill material. Fill was noted to be between two and three metres thick on the Phase One Property.	Previous investigations.

4.3.4 Water Bodies, Areas of Natural Significance, and Groundwater Information

Topic	Conditions	Comment / Source
Nearest Open Water Body	The nearest water body is the Fleet Street Aqueduct (20-30 m north). It is noted that the aqueduct is not necessarily considered a waterbody under the Regulation.	Google Maps
Areas of Natural and Scientific Interest (ANSI)	No ANSI are present within the Phase One Property or the Study Area. The nearest ANSI is the Victoria Island ANSI, located approximately 677 m north northwest of the Phase One Property.	Ministry of Natural Resources and Forestry Natural Heritage Areas on-line database. Areas of Natural & Scientific Interest Map
Provincial Parks or Conservation Reserves	Not present.	Ministry of Natural Resources and Forestry Natural Heritage Areas on-line database. Areas of Natural & Scientific Interest Map
Provincially Significant Wetlands or Designated Wilderness Areas	Not present.	Ministry of Natural Resources and Forestry Natural Heritage Areas on-line database. Areas of Natural & Scientific Interest Map
Environmentally Significant Areas per Municipal Official Plan(s)	Not present.	Ministry of Natural Resources and Forestry Natural Heritage Areas on-line database. Areas of Natural & Scientific Interest Map
Areas Designated Under the Niagara Escarpment Plan or the Oak Ridges Moraine Conservation Plan	Not present.	Ministry of Natural Resources and Forestry Natural Heritage Areas on-line database. Areas of Natural & Scientific Interest Map
Threatened or Endangered Species Habitat	A natural heritage report was not available for review.	
Wellhead Protection Areas	The Phase One Study Area is not located within a well-head protection area or other area identified by a municipality in its official plan for the protection of ground water.	MECP Source Protection Information Atlas, Rideau Valley Conservation Authority.
Municipal Drinking Water Distribution Systems	A municipal service check was not completed; however, the Phase One Property exists in an area that is serviced by Municipal Drinking Water.	

4.3.5 Well Records

The following table presents information about wells that are used or are potentially used for human consumption or agricultural use and are located at the Phase One Property and the surrounding area.

Topic	Conditions (Well Record No.)	Comment / Source
Wells (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table)	There are no wells at the Phase One Property other than monitoring wells. There are no wells in the Phase One Study Area other than monitoring wells.	ERIS Report and Site observations

4.4 Site Operating Records

At the time of the site visit, the Phase One Property was undeveloped. No operating records were provided for review.

Topic	Title of the information or document	Information Relevant to the Phase One ESA
Regulatory Permits and Records	Not available.	None.
Materials Safety Data Sheets (MSDS)	Not available.	None.
Underground utility drawings	Not available.	None.
Inventory of ASTs and USTs	Not available.	None.
Environmental monitoring data, including data created in response to an order or request of the Ministry	Not available.	None.
Waste management records, including current and historical waste storage location and waste receiver information maintained by the Ministry	Not available.	None.
Process, production, and maintenance documents related to APECs	Not available.	None.
Records of spills and records of discharges of contaminants, including records of spills and records of discharges of contaminants of which notice is required to be given to the Ministry under the Act and records of such spills and discharges required to be kept pursuant to O.Reg. 675/98	Not available.	None.
Emergency response and contingency plans, including spill prevention and contingency plans prepared pursuant to section 91.1 of the Act, and O.Reg. 224/07	Not available	None
Environmental audit reports	Not available	None
A Site plan of the facility	Not available	None

5.0 INTERVIEWS

The Phase One Property has been vacant since at least 1976 according to a review of aerial imagery. As such, there is no knowledgeable person who may be reached for an interview. The client received all available information on the Phase One Property from the previous owner, the National Capital Commission, and all of that information has been incorporated into this report. Therefore, the requirement for an interview of a knowledgeable person is considered to have been met.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

Mr. Eric Bruce (Environmental Consultant) of Golder visited the Phase One Property for 1.5 hours on January 26, 2022 at 9:45 am. The site visit consisted of a walk-around of the Phase One Property along with a cursory inspection of surrounding properties from the Phase One Property and publicly accessible areas. The weather conditions were cold and sunny, with a temperature of approximately -23°C. The Phase One Property was undeveloped and unused at the time of the site visit.

Photographs of relevant features noted during the site visit are provided in Appendix B.

6.2 Specific Observations at Phase One Property

The specific observations made during the Site visit are presented in the following sections. Currently the LRT and Pimisi station are within the site limits but for the purpose of the Phase One ESA they have been excluded and considered off-Site as it is expected that these features will not be transferred from the NCC to the client.

Topic	Observations	Source
Structures		
Number and Age of Buildings on the Site	No buildings or structures were present at the Phase One Property.	Site observations.
General Descriptions of Each Building (including improvements)	No buildings or structures were present at the Phase One Property	Site observations.
Building Areas	No buildings or structures were present at the Phase One Property	Site observations.
Number of Floors (include all levels, whether above or below ground)	No buildings or structures were present at the Phase One Property	Site observations.
Number, Age, and Depth of Levels Below Ground Level	No buildings or structures were present at the Phase One Property	Site observations.
Number and Details of all Aboveground Storage Tanks (ASTs)	No ASTs were observed or reported on the Phase One Property.	Site observations.
Number and Details of all Underground Storage Tanks (USTs)	No USTs were observed or reported on the Phase One Property.	Site observations.

Topic	Observations	Source
<u>Underground Utilities</u> Potable and Non-Potable Water Sources	No buildings or structures were present at the Phase One Property, so it is not currently serviced with potable water; however, the Phase One Property is in an area where potable water is provided to the area by the Site by the City of Ottawa.	geoOttawa.
Utility Lines Present (i.e. Electrical, Natural Gas, other)	A combination utility (possibly storm water and sanitary) line is present running along the former Wellington Street ROW, slightly northwest of the Site's centre, south of the LRT line. It runs from Booth Street northeast to the LRT line.	USL-1 Public Utility Locate Report.
Sanitary/Process Wastewater Receptor	No sanitary or process wastewater is generated on-Site.	Site observations
Sanitary Sewer Connection	A sanitary sewer utility is present in the northeastern portion of the Phase One Property along the former Wellington Street ROW south of the LRT line. It runs from Booth Street northeast to the LRT line.	USL-1 Public Utility Locate Report.
Septic Systems	None identified.	Site observations.
Storm Water Flow	One storm inlet is present on the Phase One Property slightly west of the Site's centre.	geoOttawa.
Storm Sewer Connection	A storm sewer utility is present in the northeastern portion of the Phase One Property along the former Wellington Street ROW south of the LRT line. It runs from Booth Street northeast to the LRT line. It is further northwest (closer to the corner) than the sanitary sewer utility.	USL-1 Public Utility Locate Report.
<u>Interior of Structures</u> Entry and Exit Points for Site Buildings	No buildings or structures were present at the Phase One Property	Site observations.
Existing and Former Heating System(s) (include fuel type / source)	As no buildings or structures were present at the Phase One Property there were no existing heating systems observed or reported.	Site observations.
Existing and Former Cooling System(s) (include fuel type / source)	As no buildings or structures were present at the Phase One Property there were no existing cooling systems observed or reported.	Site observations.
Drains, Pits, and Sumps (include current use, if any, and former use)	As no buildings or structures were present at the Phase One Property there were no drains, pits, or sumps observed or reported.	Site observations.
Unidentified Substances	None identified.	Site observations.
Floor Stains or Corrosion Located near a Potential Discharge Location	None identified.	Site observations

Topic	Observations	Source
Miscellaneous Exterior		
Location of any Current and Former Wells	None identified.	Site observations
Ground Cover (i.e. grass, gravel, soil, or pavement, etc.)	The majority of the Phase One Property was covered with snow during the Site Reconnaissance visit. The most recent aerial images reveal that the Phase One Property is likely covered with grass and some bushes/shrubs.	Site observations and geoOttawa.
Current or Former Railway Lines or Spurs	As early as 1888, but not as early as 1878, the Canada Atlantic Railway (later the Grand Trunk Railway and later the Canadian National Railway) line ran adjacent to the northern portion of the Phase One Property. Presently, the Ottawa LRT railway runs through the northwestern portion of the Phase One Property separating its northwestern corner from the rest of the Phase One Property. The LRT is considered off-site for the purpose of this report.	Site observations, aerial images, and FIPs.
Presence of Stained Soil, Vegetation, or Pavement	None observed.	Site observations
Presence of Stressed Vegetation	None observed.	Site observations
Areas Where Fill and/or Debris Materials Appear to Have Been Placed	It appears that significant filling has taken place as part of the Booth Street overpass and LRT construction, as the Phase One Property previously sloped downwards to the south and was not flush with Albert Street.	Site observations.
Potentially Contaminating Activity	The presence of filling on the Site is considered as a PCA. The off-Site rail line was observed but is not considered to be a PCA.	Site observations.
Unidentified Substances	None identified.	Site observations.

6.2.1 Enhanced Investigation Property

The Phase One Property is considered to be an enhanced investigation property based on former uses. The investigation was conducted in a manner consistent with the requirements for enhanced investigation properties as described in subsection 13(3) of O.Reg. 153/04. Relevant information is reported in the following table:

Topic	Observations	Source
Operations at the property, including processing or manufacturing	The Phase One Property is currently vacant; however, some of its previous uses fall within the categories of industrial and commercial land uses. Specifically, the Continental Bag & Paper Co. Ltd. and Chinese Laundry, noted in the 1902 Revised 1912 and later FIPs fall under the industrial and commercial categories, respectively.	Site observations, HLUI, and FIPs.
Hazardous materials used or stored at the Phase one property	None observed or reported.	Site observations.
Products manufactured at the Phase one property;	None observed or reported.	Site observations.
By-products and wastes at the Phase one property	None observed or reported.	Site observations.
Raw materials handling and storage locations at the Phase one property	A 30,000-gallon rooftop tank was observed at the location of the Continental Paper Projects Company Ltd. Its contents were not noted.	FIPs
Location and contents of drums, totes and bins at the Phase one property	None observed or reported.	Site observations.
The location, installation date, source of incoming liquid and effluent discharge location for all oil-water separators	None observed or reported.	Site observations.
All vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas	None observed or reported.	Site observations.
Details of all spills including the dates, locations, materials involved, and volumes of material spilled;	The Site was briefly used as a construction laydown area for the construction of the LRT and there were several small quantity spills reported in the ERIS report associated with this use.	ERIS report
Details of liquid discharge points such as water and French drains, including their locations	None observed or reported.	Site observations.
Details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks	None observed or reported.	Site observations.

6.3 Surrounding Land Use

During the Phase One Property visit, a visual reconnaissance of the outdoor operations in the Phase One Study Area was carried out from the Site and publicly accessible areas.

The surrounding properties include residential and community land as well as a construction site on the east.

North (downgradient): The Phase One Property is bordered to the north by the Ottawa LRT line. The northwestern portion of the Phase One Property is separated from the main portion by the LRT line. Beyond the northwestern portion is a parking lot, Lett and Lloyd Streets, and an empty field.

East (cross-gradient): The Phase One Property is bordered to the east by an active construction site.

West (cross gradient): The Phase One Property is bordered on the west by Booth Street. Beyond Booth Street is vacant land. Pimisi Station (LRT station) is located off of Booth Street over the northwestern portion of the Phase One Property (considered off-Site).

South (upgradient): The Phase One Property is bordered on the south by Albert Street. Beyond Albert Street are mostly residential dwellings.

6.4 Written Description of Investigation

At the time of the site reconnaissance, conducted on January 26, 2022, the Phase One Property consisted of a 1.11-hectare parcel of undeveloped land. No buildings or structures were noted on the Phase One Property. The surrounding properties within the Phase One Study Area included residential and community land uses.

There were no findings from the site reconnaissance that indicate a PCA at Phase One Property or the Phase One Study Area other than the evidence of fill placement on the Site which is a listed PCA and will result in an APEC on the Phase One Property. Given how recently the LRT line was installed, it is not considered to constitute a PCA under the railway tracks and spurs definition under the regulation and as such not an APEC.

No water wells were identified within the Phase One Study Area.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses of the Phase One Property

Because of the many parcels into which the Phase One Property was divided before its acquisition by the NCC between 1962 and 1966, the precise owners and uses of each parcel is not known. Information was taken from a review of FIPs, HLUI, and aerial photography to summarise owners and property uses. In order to provide a more precise history, the Phase One Property is divided into three sections, including northern, southwestern, and southeastern. The northern section is north of Wellington Street's historical pathway and west of Lloyd Street.

Table 5: Phase One Property Northern Section Current and Past Uses

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to 1878 at the latest	Crown	Unknown	Unknown	No coverage available before 1878.
By 1878 until prior to 1902	Victoria Ward Primary School	Primary school	Institutional	School appears in 1878 and 1888 FIPs but not in the 1902 revised 1912 FIP
By 1878 until prior to 1902	Various private owners	Residential dwellings	Residential	Residential dwellings appear in the northern section of the Phase One Property in FIPs from 1878 and 1888, but not in the 1902 revised 1912 FIP.
By 1878 until prior to 1902	Unknown	One small store selling unknown products	Commercial	One store appears on the northeastern corner of the intersection of Wellington and Bridge (now Booth) Streets in FIPs from 1878 and 1888, but not in the 1902 revised 1912 FIP.
By 1902 until 1960	The Continental Paper Products Company Limited	Warehouse and factory for the storage and production of paper products	Industrial	The Continental Paper Products Company Limited first appears in the 1902 revised 1912 FIP and appears until the 1956 FIP. The HLUI lists the company as active until 1960.
No earlier than 1962 until Present	National Capital Commission	Unused / construction zone	Industrial, based on the last developed use.	The building in which the Continental Paper Products Company Limited operated appears in aerial imagery up to and including 1965. In the next available aerial image, taken in 1976, the building is no longer present, and the area is covered in grass. From 2015 to at least 2017, as shown in aerial images, the Phase One Property was used by the Ottawa LRT constructors as a construction yard. Pimisi Station cuts into the Phase One Property and separates the northwestern tip from the remainder of the property.

Table 6: Phase One Property Southwestern Section Current and Past Uses

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to 1878 at the latest	Crown	Unknown	Unknown	No coverage available before 1878.
By 1878 until 1956	Various private owners	Residential dwellings	Residential	Residential dwellings appear in the southwestern section of the Phase One Property in FIPs from 1878 to 1956
By 1888 until at least 1956	St. Mark French Presbyterian Church / St. Mark French Protestant Church (United Church of Canada)	A church	Institutional	The St. Mark French Presbyterian / St. Mark French Protestant Church (United Church of Canada) first appears in the 1888 FIP and is present up to and including the 1956 FIP. It is not mentioned in the HLUI, but the building is still present in the aerial image taken in 1965.
By 1902 until at least 1956	Unknown	Chinese Laundry (possibly a drycleaner)	Commercial	A Chinese Laundry is noted on the 1902 revised 1912 FIP and appears in FIPs up to and including 1956.
No earlier than 1962 until Present	National Capital Commission	Unused / parking lot / construction zone	Mixture of Commercial, institutional and residential based on the last developed use.	Some buildings appear in the aerial images up to and including 1965; however, no buildings remain in 1976. Instead, the southern sections of the Phase One Property have been converted into a parking lot. From 2015 to at least 2017, as shown in aerial images, the Phase One Property was used by the Ottawa LRT constructors as a construction yard. Pimisi Station cuts into the Phase One Property and separates the northwestern tip from the remainder of the property.

Table 7: Phase One Property Southeastern Section Current and Past Uses

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to 1878 at the latest	Crown	Unknown	Unknown	No coverage available before 1878.
By 1878 until 1956	Various private owners	Residential dwellings	Residential	Residential dwellings appear in the southeastern section of the Phase One Property in FIPs from 1878 to 1956
By 1902 until 1956	Wellington Street Public School	Public school	Institutional	The Wellington Street Public School appears in FIPs from 1902 revised in 1912 until and including 1956. The building appears in the aerial image from 1928, but not 1965.
No earlier than 1962 until present	National Capital Commission	Unused / parking lot / construction zone	Residential and Institutional based on last developed use	Some buildings appear in the aerial images up to and including 1965; however, no buildings remain in 1976. Instead, the southern sections of the Phase One Property have been converted into a parking lot. From 2015 to at least 2017, as shown in aerial images, the Phase One Property was used by the Ottawa LRT constructors as a construction yard. Pimisi Station cuts into the Phase One Property and separates the northwestern tip from the remainder of the property.

The Phase One Property was previously used for residential, commercial, institutional and industrial uses since at least 1878. The Phase One Property is currently vacant with no buildings or structures.

7.2 Potentially Contaminating Activity

Any PCA on the Phase One Property or in the Phase One Study Area may require the identification of an area of potential environmental concern (APEC) and trigger the need for a Phase Two ESA to support the filing of a Record of Site Condition. The PCAs identified at the Phase One Property and in the Phase One Study Area are provided in the following table. The PCA locations are presented in Figure 3.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Phase One Property	#30 Importation of Fill Material of Unknown Quality.	ERIS Report, previous reports, and site observation.	The PCA is located on the Phase One Property and must be identified as an APEC.
	#37 Operation of Dry Cleaning Equipment (where chemicals are used) – A Chinese Laundry that may have use dry cleaning equipment operated in the southwestern section of the Phase One Property.	FIPs.	The PCA is located on the Phase One Property and must be identified as an APEC.
	#45 Pulp, Paper and Paperboard Manufacturing and Processing – The Continental Paper Products Company Limited operated in the northwestern section of the Phase One Property.	FIPs and HLUI.	The PCA is located on the Phase One Property and must be identified as an APEC.
Phase One Study Area (excluding the Phase One Property)	#30 Importation of Fill Material of Unknown Quality.	ERIS and previous reports.	Soil on-site falls under this PCA as well and is already considered to be an APEC; therefore, this additional information does not constitute an additional APEC.
	#46 Railyards, Tracks and Spurs – A Canada Atlantic Railway (later Grand Trunk Railway, later Canadian National Railways) corridor is located immediately north of the Phase One Property.	FIPs and aerial images.	The part of the railway line that passes adjacent to the Phase One Property would have been remediated during construction of the Ottawa LRT track. Furthermore, the rail line is downgradient of the Phase One Property. The presence of this PCA is not considered to constitute and APEC.
	#46 Railyards, Tracks and Spurs – A Canada Atlantic Railway (later Grand Trunk Railway, later Canadian National Railways) yard is located approximately 190 m west southwest of the Phase One Property.	FIPs and aerial images.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#34 Metal Fabrication – Laurentian Foundry with a moulding shop and coke house operated 127 m northwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#34 Metal Fabrication – Corporation Work Shops including a smithy and machine shop operated 145 m west southwest of the Phase One Property.	FIPs.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
	#10 Commercial Autobody Shops, #28 Gasoline and Associated Products Storage in Fixed Tanks, and #52 Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems – Capital Coach Lines / Tapp's Garage operated with three USTs approximately 25 m northeast of the Phase One Property.	FIPs and HLUI.	Given its proximity to the Phase One Property, this PCA is considered to constitute an APEC.
	#39 Paints Manufacturing, Processing and Bulk Storage – the Ottawa Paint Works Ltd. operated approximately 140 m west southwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops and #28 Gasoline and Associated Products Storage in Fixed Tanks – The Chaudiere Garage with two USTs operated approximately 160 m west southwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#45 Pulp, Paper and Paperboard Manufacturing and Processing – Ottawa Paper Box Co. Ltd. operated approximately 140 m southwest of the Phase One Property.	FIPs.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#28 Gasoline and Associated Products Storage in Fixed Tanks – Two USTs were at the site of Red Rock of Canada Ltd approximately 45 m north of the Phase One Property	FIPs and HLUI.	Based on the down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC. Furthermore, this land likely would have been remediated when the Ottawa LRT line was constructed.
	#37 Operation of Dry Cleaning Equipment (where chemicals are used) – Capital Commercial Laundry, which may have used dry cleaning equipment operated approximately 130 m northwest of the Phase One Property	FIPs.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
	#10 Commercial Autobody Shops and #28 Gasoline and Associated Products Storage in Fixed Tanks – An auto washing & oiling establishment with two USTs operated approximately 145 m northwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops and #28 Gasoline and Associated Products Storage in Fixed Tanks – Garland & Ritchie Limited (later Rovale Service Station) with one UST operated approximately 225 m north of the Phase One Property.	FIPs and HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops – An auto radiator servicing establishment operated approximately 60 m north of the Phase One Property.	FIPs.	Based on the down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops – the National Brake and Clutch Service operated approximately 90 m northeast of the Phase One Property.	FIPs and HLUI.	Based on the down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops – An oiling and greasing station operated approximately 40 m south of the Phase One Property.	FIPs and HLUI.	Based on the up-gradient location of this PCA with respect to the Phase One Property, it is considered to constitute an APEC.
	#10 Commercial Autobody Shops and #28 Gasoline and Associated Products Storage in Fixed Tanks – Blair Equipment Ltd. operated a garage with a UST approximately 200 m north of the Phase One Property.	FIPs and HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops and #28 Gasoline and Associated Products Storage in Fixed Tanks – An oiling and greasing auto service operated with a UST approximately 200 m southwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#28 Gasoline and Associated Products Storage in Fixed Tanks – A spill of unknown of fuel from a UST occurred 234 m southeast of the Phase One Property in 2008.	ERIS.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
	#45 Pulp, Paper and Paperboard Manufacturing and Processing – The Ottawa Paper Box Co. operated approximately 95 m southwest of the Phase One Property.	HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#49 Salvage Yard, including automobile wrecking – M. Levinson Salvage Co. operated approximately 130 west of the Phase One Property.	HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops – Queen Auto Service operated approximately 84 m west of the Site.	HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#34 Metal Fabrication – Thomas Lawson & Sons operated approximately 250 m northwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#34 Metal Fabrication – Ottawa Iron and Brass Foundry / Ottawa Boiler and Steel Works operated approximately 240 m northwest of the Phase One Property	FIPs and HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#49 Salvage Yard, including automobile wrecking – The Sachs Brothers Junk Yard operated approximately 215 m west northwest of the Phase One Property.	HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#34 Metal Fabrication – The Ottawa Brass Manufacturing Co. operated approximately 195 m northeast of the Phase One Property.	HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#45 Pulp, Paper and Paperboard Manufacturing and Processing – William Freedman (paper box and bag) operated at an unknown address on Wellington St. between 74 and 250 m northeast of the Phase One Property.	HLUI.	Based on the distance and cross-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
	#33 Metal Treatment, Coating, Plating and Finishing – Chaudiere Plating Works operated approximately 140 m north northwest of the Phase One Property.	HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#39 Paints Manufacturing, Processing and Bulk Storage – Ferro Enamels Canada (paint and varnish) operated approximately 20 m north of the Phase One Property.	HLUI.	Based on the down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#10 Commercial Autobody Shops – The RCMP operated an auto garage at an unknown address between 105 and 220 m north of the Phase One Property.	HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#49 Salvage Yard, including automobile wrecking – Unnamed scrap yard operated approximately 240 m northeast of the Phase One Property.	HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#45 Pulp, Paper and Paperboard Manufacturing and Processing – Best Boxes Limited / Canada Cheese Box Company Ltd. / Best Boxes Ltd. operated approximately 185 m north northwest of the Phase One Property.	HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.
	#37 Operation of Dry Cleaning Equipment (where chemicals are used) – Therien Co. Limited (rug cleaning and upholstery) operated at an unknown address approximately 185 m north northwest of the Phase One Property.	FIPs and HLUI.	Based on the distance and down-gradient location of this PCA with respect to the Phase One Property, it is not considered to constitute an APEC.

7.3 Areas of Potential Environmental Concern

The APECs identified at the Phase One Property are provided in the following table. The APEC locations are presented in Figure 4.

Area of Potential Environmental Concern ¹	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern ³	Media Potentially Impacted (Groundwater, soil and/or Sediment)
APEC 1 – Fill Material of Unknown Quality	Entire Phase One Property	#30. Importation of Fill Material of Unknown Quality	On-Site	BTEX, PHC, metals, and PAHs	Soil
APEC 2 – Possible operation of dry cleaning equipment at Chinese Laundry noted in FIPs	Southwestern portion of Phase One Property.	#37 Operation of Dry Cleaning Equipment (where chemicals are used)	On-Site	VOCs	Soil and Groundwater
APEC 3 – The Continental Paper Products Company Limited	Northwestern portion of Phase One Property	#45 Pulp, Paper and Paperboard Manufacturing and Processing	On-Site	BTEX, PHC, metals	Soil and Groundwater
APEC 4 – Capital Coach Lines / Tapp's Garage operated with three USTs	Approximately 25 m northeast of the Phase One Property	#10 Commercial Autobody Shops, #28 Gasoline and Associated Products Storage in Fixed Tanks, and #52 Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Off-Site	BTEX, PHC	Soil and Groundwater
APEC 5 - Oiling and greasing station	Approximately 40 m south of the Phase One Property	#10 Commercial Autobody Shops	Off-Site	BTEX, PHC	Soil and Groundwater

Notes:

- 1 Area of potential environmental concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through, •(a) identification of past or present uses on, in or under the phase one property, and •(b) identification of potentially contaminating activity
- 2 Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
- 3 Contaminants of potential concern specified using the method groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011

7.4 Conceptual Site Model

The following key features (as required by O.Reg. 153/04) are presented in Figures 1, 2, 3, and 4:

- Existing buildings and structures;
- Water bodies and areas of natural significance located in the Phase One Study Area;
- Drinking water wells on the Phase One Property;
- Roads (including names) within the Phase One Study Area; and,
- Location of identified PCAs in the Phase One Study Area (including any storage tanks).

The following describes the Phase One ESA CSM based on the information obtained and reviewed as part of this Phase One ESA:

- The Phase One Property consists of two parcels of land that are 2.74 acres (1.11 hectares) in area. No buildings were present, noting that the Pimisi Station and LRT line cross the Phase One Property currently, however, are not expected to be transferred to Dream and thus are considered off-site.
- The nearest body of water to the Phase One Property is the Fleet Street Aqueduct located approximately 20-30 m north. It is noted the Fleet Street aqueduct may not be considered a surface water body, as defined in the regulation but a stormwater control feature. The Ottawa River, northeast of the Fleet Street Pump Station is the closest true waterbody. No areas of natural significance were identified on or within 250 m of the Phase One Property.
- Potable water in the vicinity of the Phase One Property is provided by the City of Ottawa and is obtained from the Ottawa River. No potable water wells were identified on the Phase One Property.
- At the time of the Phase One ESA, no roads ran through the Phase One Property; however, Wellington Street historically ran through the Phase One Property until it was moved prior to or during 2005. The pavement remained until 2015 at the latest.
- At the time of the Phase One ESA, the Phase One Property was undeveloped and unused. Historically, the Phase One Property has been used for residential, institutional, and commercial since 1878 and industrial purposes since prior to or during 1902. The Phase One Property may have been used for dry cleaning between 1902 and 1956.
- At the time of the Phase One ESA, the properties within the Phase One Study Area consisted of vacant lands as well as residential, institutional, parkland, and commercial land uses. There are no indications of a potentially contaminating activity or area of potential environmental concern in association with this use. Historically some properties in the Phase One Study Area were used for industrial uses and the following commercial uses: vehicle garage and dry cleaning facility;

- The following APECs and the associated contaminants of concern were identified:

Area of Potential Environmental Concern ¹	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity ²	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern ³	Media Potentially Impacted (Groundwater, soil and/or Sediment)
APEC 1 – Fill Material of Unknown Quality	Entire Phase One Property	#30. Importation of Fill Material of Unknown Quality	On-Site	BTEX, PHC, metals, and PAHs	Soil
APEC 2 – Possible operation of dry cleaning equipment at Chinese Laundry noted in FIPs	Southwester portion of Phase One Property.	#37 Operation of Dry Cleaning Equipment (where chemicals are used)	On-Site	VOCs	Soil and Groundwater
APEC 3 – The Continental Paper Products Company Limited	Northwestern portion of Phase One Property	#45 Pulp, Paper and Paperboard Manufacturing and Processing	On-Site	BTEX, PHC, metals	Soil and Groundwater
APEC 4 – Capital Coach Lines / Tapp's Garage operated with three USTs	Approximately 25 m northeast of the Phase One Property	#10 Commercial Autobody Shops, #28 Gasoline and Associated Products Storage in Fixed Tanks, and #52 Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Off-Site	BTEX, PHC	Soil and Groundwater
APEC 5 - Oiling and greasing station	Approximately 40 m south of the Phase One Property	#10 Commercial Autobody Shops	Off-Site	BTEX, PHC	Soil and Groundwater

Notes:

- Area of potential environmental concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through, (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activity
- Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
- Contaminants of potential concern specified using the method groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011

- Three underground utilities are known to be present at the Phase One Property: one sanitary utility, one storm utility, and one combination utility.
- Soil at the Phase One Property consists primarily of fill overlying glacial till to bedrock which is situated between 10-15 metres depth.
- Groundwater in the Phase One Study Area is anticipated to flow in a northerly direction towards the Fleet Street Aqueduct (20-30 m north).

A response to Golder's request for information from the Ministry of the Environment, Conservation and Parks was not available at the time of report preparation. A plan of survey was not available for review and is required to satisfy the requirements of O.Reg. 153/04.

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

8.0 CONCLUSIONS

8.1 Need for a Phase Two ESA

Based on the information obtained and reviewed as part of this Phase One ESA, five APECs were identified at the Phase One Property. Accordingly, a Phase Two ESA is required to support the submission of an RSC.

10.0 LIMITATIONS AND USE OF REPORT

This report (the “Report”) was prepared for the exclusive use of Dream Impact Master LP (“Dream”) for the express purpose of providing advice with respect to the environmental condition of the Site. In evaluating the Site, Golder Associates Ltd. (“Golder”) has relied in good faith on information provided by others as noted in the Report. We have assumed that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatement or inaccuracy contained in this Report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or incomplete or inaccurate historical information from the various agencies. Any use which a third party makes of this Report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third party. If a third party requires reliance on this Report, prior written authorization from Golder is required. Golder disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of Golder’s assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within Golder’s proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. Golder did not perform a complete assessment of all possible conditions or circumstances that may exist at the site referenced in the Report. Conditions may therefore exist which were not detected given the limited nature of the assessment Golder was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the Report. Golder’s opinions are based upon information available to Golder as of the date of the Site visit. It is understood that the services provided for in the scope of work allowed Golder to form no more than an opinion of the actual conditions at the Site at the time of the site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. Consult with a natural heritage specialist to confirm whether an area of natural significance may be present. If a service is not expressly indicated, do not assume it has been provided.

The results of an assessment of this nature should in no way be construed as a warranty that the Site is free from any and all contamination from past or current practices.

11.0 CLOSURE

The Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust that the information presented in this report meets your current requirements. Should you have any questions or concerns, please do not hesitate to contact the undersigned.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Act:
Act(s):
First Matter:
Second Matter:
Investigation 1:
Investigation 2:
Penalty Imposed:
Description:

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Nov 2021

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Sep 30, 2021

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2019

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Sep 30, 2021

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Dec 31, 2021

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Nov 30, 2021**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Dec 31, 2021**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Nov 30, 2021**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2021**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Nov 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Nov 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2021

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jan 2021

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Dec 31, 2021

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Nov 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Dec 31, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Sep 30, 2021

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Sep 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Nov 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX B

Site Photographs

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

NO RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at <https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?mid=392> and email the completed form to publicinformationsservices@tssa.org along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Sherees

Hello,

May you please perform a TSSA database record search for any underground storage tanks, registered fuel tanks, outstanding instructions, incident reports, fuel oil spills or contaminations records for the following locations. We found additional information that led us to this address:

- 665 Albert Street, Ottawa, Ontario

Thanks,

Jaime
