Appendix H: Site Photographs

1. EXECUTIVE SUMMARY

Geosyntec Consultants International, Inc. (Geosyntec) was retained by Amazon Canada Fulfillment Services, ULC (Amazon) to conduct a Phase One Environmental Site Assessment (ESA) for the property located at 2625 Sheffield Road in Ottawa, Ontario (hereinafter referred to as the “Phase One Property” or the “Site”). A Phase One Property Location Map is presented on **Figure 1 of Appendix A**.

The Phase One ESA was undertaken in accordance with the prescribed requirements of Ontario Regulation 153/04, as amended (O. Reg. 153/04). It is Geosyntec’s understanding that Amazon intends to redevelop this Site for use as a warehouse under a ground lease agreement with CP REIT Ontario Properties Limited (the Site Owner) and that this Phase One ESA is required by the City of Ottawa (City) to support the Site Plan Control application for redevelopment. As there is no proposed change to a more sensitive land use, it is Geosyntec’s understanding that in accordance with the Ontario *Environmental Protection Act* (EPA) and O. Reg. 153/04, a Record of Site Condition (RSC) is not required. The scope of work for this Phase One ESA included a review of readily available relevant records, a Site reconnaissance, interviews, and a review of information and reporting. The Site reconnaissance included a visual inspection of exterior areas on-Site and adjoining properties.

The Phase One Property measures approximately 7.06 hectares (17.4 acres) in size. The Site is located at the northeast corner of Sheffield Road and Humber Place and is developed with an approximately 33,472 square metre (sq. m.) commercial warehouse building (the “Site building”) initially constructed in 1967. The Site building is currently vacant but was formerly occupied by various grocery retailers, most recently Loblaw Properties Limited (Loblaw), and utilized for grocery distribution activities. A Phase One Property Layout Plan is presented on **Figure 2 of Appendix A**.

The Phase One Property is located in an area that is developed with a mix of commercial, industrial and undeveloped/forested land. The Phase One Property is bounded by an industrial/commercial property to the north; a railway line followed by undeveloped/forested land and Green’s Creek to the east; Humber Place followed by an industrial/commercial property and vacant lot to the south; and Sheffield Road followed by industrial/commercial properties to the west. The Phase One Study Area is presented on **Figure 3 of Appendix A**.

According to historical records, the Phase One Property was developed for agricultural use (inferred cropland) prior to 1946. According to historical aerial photographs and information provided by Loblaw, the Site building was constructed in approximately 1967 in the central portion of the Phase One Property, with additions completed circa 1974, 1975, 1992, and 1997.

Based on the results of the Phase One ESA, the following potentially contaminating activities (PCAs) were identified on-Site and/or on other properties located within the Phase One Study Area

and have contributed to areas of potential environmental concern (APECs) on the Phase One Property:

PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	Location of PCA
#30 – Importation of Fill Material of Unknown Quality	On-Site (PCAs #1, #4B, #5B, #7)
#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site (PCAs #2, #4A, #5A)
#11 – Commercial Trucking and Container Terminals	On-Site (PCA #3) Off-Site (PCAs #17, #19)
#46 – Rail Yards, Tracks, and Spurs	On-Site (PCA #6) Off-Site (PCA #13)
#6 – Battery Manufacturing, Recycling, and Bulk Storage	On-Site (PCA #8)
#8 – Chemical Manufacturing, Processing, and Bulk Storage	On-Site (PCA #9)
No PCA # – Impacts from a Fire	On-Site (PCA #10)
No PCA # - Impacts from a Diesel Spill	On-Site (PCA #11)
#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site (PCAs #12, #17)
#49 – Salvage Yard including automobile wrecking	Off-Site (PCA #12)
#34 – Metal Fabrication	Off-Site (PCAs #14, #16)
#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site (PCAs #14, #17)
#19 – Electronic and Computer Equipment Manufacturing	Off-Site (PCA #15)
#33 – Metal Treatment, Coating, Plating, and Finishing	Off-Site (PCA #16)
#10 – Commercial Autobody Shops	Off-Site (PCAs #17, #20)
#54 – Textile Manufacturing and Processing	Off-Site (PCA #17)
#31 – Ink Manufacturing, Processing and Bulk Storage	Off-Site (PCA #20)

The above PCAs are considered to represent the following APECs on the Phase One Property:

- **APEC #1** – Fill material of unknown quality across the entire Phase One Property;
- **APEC #2** – Private fuel outlet with two diesel underground storage tanks (USTs) installed in 1978 in the north-central portion of the Phase One Property;
- **APEC #3** – Former truck repair and maintenance activities within the northwestern portion of the Site building;
- **APEC #4A** – Former waste oil and supply oil USTs installed in 1976 and removed in 1999 along the northwestern exterior of the Site building;
- **APEC #4B** – Material of unknown quality used to backfill the former waste oil and supply oil USTs in 1999 along the northwestern exterior of the Site building;
- **APEC #5A** – Two former 10,000-gallon heating oil USTs located in the vicinity of the western portion of the Site building;
- **APEC #5B** – Material of unknown quality used to backfill the former heating oil USTs located in the vicinity of the western portion of the Site building;

- **APEC #6** – Former rail spurs located in the central portion of the Phase One Property;
- **APEC #7** – Material of unknown quality used to backfill the former building located in the southern portion of the Phase One Property;
- **APEC #8** – Forklift battery washing and storage activities in the north-central portion of the Site building;
- **APEC #9** – Chemicals/wastes stored in the forklift repair area in the northwestern portion of the Site building;
- **APEC #10** – On-Site fire that occurred in 2011 along the southwestern exterior of the Site building;
- **APEC #11** – On-Site diesel spill that occurred in 2021 in the northeastern portion of the Phase One Property;
- **APEC #12A** – Former dry cleaning operations to the north of the Phase One Property at 2575 Sheffield Road;
- **APEC #12B** – Current and former end of life vehicle waste disposal site operations to the north of the Phase One Property at 2575 Sheffield Road;
- **APEC #13** – Current railway on the adjoining lands to the east of the Phase One Property;
- **APEC #14A** – Current metal fabrication operations to the south of the Phase One Property at 1350 Humber Place;
- **APEC #14B** – Former waste processing facility to the south of the Phase One Property at 1350 Humber Place;
- **APEC #15** – Current and/or former electronics manufacturing operations to the northwest of the Phase One Property at 2574 Sheffield Road;
- **APEC #16A** – Former metal plating operations to the west of the Phase One Property at 2590 Sheffield Road;
- **APEC #16B** – Former metal fabrication operations to the west of the Phase One Property at 2590 Sheffield Road;
- **APEC #17** – Current and/or former automotive repair operations to the west of the Phase One Property at 2600-2616 Sheffield Road and 1325 Humber Place;
- **APEC #18** – Current and/or former commercial trucking operations to the west of the Phase One Property at 2612 and 2660 Sheffield Road;
- **APEC #19** – Current and/or former commercial printing operations to the west of the Phase One Property at 1335 Humber Place;
- **APEC #20A** – Former dry cleaning operations to the west of the Phase One Property at 2616 Sheffield Road;

- **APEC #20B** – Former textile restoration operations to the west of the Phase One Property at 2616 Sheffield Road; and
- **APEC #20C** – Current and former organic waste processing and transfer facility operations to the west of the Phase One Property at 2612 Sheffield Road.

The PCAs and APECs are shown on **Figures 4 and 5 of Appendix A**, respectively. Based on the presence of APECs on the Phase One Property, a Phase Two ESA is required to support the City Site Plan Control redevelopment application.

2. INTRODUCTION

2.1 Phase One Property Information

Geosyntec Consultants International, Inc. (Geosyntec) was retained by Amazon Canada Fulfillment Services, ULC (Amazon) to conduct a Phase One Environmental Site Assessment (ESA) for the property located at 2625 Sheffield Road in Ottawa, Ontario (hereinafter referred to as the “Phase One Property” or the “Site”). A Phase One Property Location Map is presented on **Figure 1 of Appendix A**.

CP REIT Ontario Properties Limited (CP REIT) is the owner of the Phase One Property, which is located within the City of Ottawa (City). A Site Location Map and Site Plan are provided on **Figure 1 and Figure 2**, respectively, in **Appendix A**. Copies of plans of survey for the Phase One Property are provided in **Appendix B**.

Phase One Property Information	
Phase One Property Addresses:	2625 Sheffield Road, Ottawa, ON K1B 3V6
Property Identification Numbers (PINs):	04262-0111 (LT), 04262-0112 (LT)
Legal Description:	PT BLK A, PL 783, AS IN N282567 T/W OT70637; OTTAWA/GLOUCESTER PT BLK A, PL 783, PART 1 & 2, 5R1419, S/T OT70637; OTTAWA/GLOUCESTER
Ownership:	CP REIT Ontario Properties Limited
Site Contact Information:	Andrew Reial andrew.reial@choicereit.com 416-324-7913

The Phase One Property measures approximately 7.06 hectares (17.4 acres) in size. The Site is located at the northeast corner of Sheffield Road and Humber Place and is developed with an approximately 33,472 square metre (sq. m.) commercial warehouse building (the “Site building”) initially constructed in 1967. The Site building is currently vacant but was formerly occupied various grocery retailers, most recently by Loblaw Properties Limited (Loblaw), and utilized for

grocery distribution activities. The Phase One Property may be accessed from Sheffield Road to the west and Humber Place from the south. There are no on-Site surface water bodies.

Geosyntec understands that Amazon intends to redevelop the Phase One Property for commercial/industrial use as a warehouse under a ground lease agreement with CP REIT. It is Geosyntec's understanding that this Phase One ESA is required by the City to support Site redevelopment. As there is no proposed change to a more sensitive land use, in accordance with the Ontario *Environmental Protection Act* (EPA) and O. Reg. 153/04, a Record of Site Condition (RSC) is not required.

Geosyntec notes that the property (1360 Humber Place) located south of the Phase One Property is also owned by CP REIT and leased by Amazon. Geosyntec included 1360 Humber Place as part of the original version of this Phase One ESA (dated August 2022) for due diligence purposes on behalf of Amazon. This Phase One ESA (Revised October 2022) has excluded 1360 Humber Place as it is not part of the Site Plan Control application submission to the City.

2.2 Significant Assumptions

Geosyntec took no significant assumptions into account as part of this project, except as noted in the proposal.

2.3 Limitations, Deviations, and Exceptions

This Phase One ESA was conducted according to the agreed upon scope of work and includes the following essential components: a Site description and history; a review of database and historical records; a summary of visual observations made during the Site reconnaissance; and a summary of information obtained during interviews of persons with knowledge of Site conditions. Geosyntec was not provided with and did not identify owner contact information prior to the current Site owner as part of this Phase One ESA; however, Geosyntec did talk to the previous Site owner as part of environmental due diligence activities conducted on behalf of Amazon in 2020 and since relevant historical documents were obtained, this limitation is not considered to be significant.

This Phase One ESA did not include sampling rock, soil, groundwater, surface water, soil vapour, air, or on-Site substances or materials. Therefore, it is not possible to confirm the presence or absence of contaminants in the environments associated with the Phase One Property.

The findings and conclusions presented in this Phase One ESA are the result of professional interpretation of the information collected at the time of this study. Specified information contained in this report has been obtained from publicly available sources and other secondary sources of information. Although care has been taken in compiling this information, Geosyntec has not independently validated this information and provides no warranty as to its accuracy or completeness. The Phase One ESA does not necessarily include an exhaustive search of all

available records nor does it include a detailed assessment of all Phase One ESA findings. Therefore, Geosyntec cannot “certify” or guarantee that any property is free of environmental impairment; no warranties regarding the environmental quality of the property are expressed or implied.

2.4 Special Terms and Conditions

Geosyntec’s assignment was conducted in accordance with the scope of work outlined in Geosyntec’s proposals to Amazon dated 23 December 2021, 16 May 2022, and 27 September 2022 and Amazon’s purchase order 5Z-07380566 dated 24 January 2022 revised on 19 May 2022 and 4 October 2022, as well as with the terms and conditions described in the Amazon Services, Inc. and Geosyntec Consultants, Inc. Master Services Agreement dated 10 January 2018. No special contractual terms or conditions were taken into account as part of this project, except as noted in the proposal.

2.5 User Reliance

This Phase One ESA report has been prepared solely for the benefit of Geosyntec’s Client, Amazon Canada Fulfillment Services, ULC (Amazon) and its subsidiaries and affiliated entities. Geosyntec has issued the Phase One ESA report to Amazon, and grants the right to Amazon Canada Fulfillment Services, ULC, and its subsidiaries and affiliated entities to rely on the report contents. Except as specifically set forth in Geosyntec’s proposal to Client to perform this work, no other party shall have the right to rely on Geosyntec’s opinions rendered in connection with the Services without Geosyntec’s written consent which may be conditioned on the third party’s agreement to be bound to acceptable conditions and limitations similar to this Agreement. Please note that Geosyntec’s consent to provide a right-to-rely on this report is subject to Client’s approval and to agreement to Geosyntec’s terms and conditions associated with Geosyntec’s performance of this specific scope of work.

3. SCOPE OF INVESTIGATION

The Phase One ESA was prepared in accordance with the requirements of O. Reg. 153/04, as amended, and included the following tasks conducted by Geosyntec:

- A review of readily available records as listed in Part II of Schedule D of O. Reg. 153/04, as amended. The following types and sources of information were obtained and reviewed as part of the records review, where applicable, available, and as reasonably accessible:
 - General records (Section 4.1), including fire insurance plans (FIPs), property underwriter reports (PURs), property underwriter plans (PUPs), chain of title search, previous environmental site assessment reports, and city directory records;
 - Environmental source information (Section 4.2), including a review of a environmental database report prepared by Environmental Risk Information Services Ltd. (ERIS),

- which included a search of federal, provincial, and private database records for the Phase One Property and adjoining/neighbouring properties within at least 250 metres (m) of the Phase One Property (“Phase One Study Area”);
- Regulatory records (Section 4.3), including submission of requests to the Ontario Ministry of the Environment, Conservation and Parks (MECP) and the Technical Standards and Safety Authority (TSSA);
 - Physical setting sources (Section 4.4), including aerial photographs, topographic maps, physiographic maps, geological maps, and well records; and
 - Site operating records (Section 4.5), including regulatory permits and records, material safety data sheets, underground utility drawings, inventories of chemical uses and chemical storage areas, and inventories of aboveground and underground storage tanks (ASTs/USTs).
- Conducting interviews with key personnel and designated Site representative(s), including representatives of the current Phase One Property owner, as a resource for current and historical information pertaining to the Site (Section 5);
 - Conducting a Site reconnaissance of the Phase One Property in order to identify any land use practices that may have impacted the environmental condition of the Site (Section 6);
 - A review and evaluation of the information obtained from the above tasks to identify PCAs at the Site and within the Phase One Study Area, and to assess whether each PCA is considered to contribute to an APEC on the Phase One Property, where one or more contaminants of potential concern (COPCs) may be present (Section 7); and
 - Preparation of this Phase One ESA report in accordance with the requirements described within Part VI of Schedule D of O. Reg. 153/04, Schedule D.

This Phase One ESA was conducted under the supervision of Paula Hutchison, P.Eng., the Qualified Person for Environmental Site Assessment (QP_{ESA}), in accordance with O. Reg. 153/04, as amended, for this Phase One ESA report. Under her direction and oversight, the Site visit was conducted on 12 April 2022 by Mikaela Rae Peet and Berend Jan Velderman of Geosyntec. The report was drafted by Brooke Wallace and reviewed by Paula Hutchison of Geosyntec. The professional qualifications of the individuals above are presented in Section 8.2.

4. RECORDS REVIEW

4.1 General

4.1.1 Phase One Study Area Determination

The Phase One Property is located at 2625 Sheffield Road in Ottawa, Ontario and includes the entire property. The Phase One Study Area includes those properties, wholly or partly located within at least 250 m of the boundary of the Phase One Property. The Qualified Person (QP_{ESA}),

Paula Hutchison, confirms that the conventional distance of 250 m from the boundary of the Phase One Property was sufficient for defining the purpose of the Phase One Study Area for the records reviewed. The Phase One Property and Phase One Study Area are shown on **Figure 3** of **Appendix A**.

4.1.2 First Developed Use Determination

Based on a review of historical aerial photographs, the Phase One Property was developed prior to 1946 for agricultural purposes. Therefore, the first developed use of the Phase One Property is considered to be the use of the Site for agricultural purposes beginning prior to the mid-1940s. Based on the records review presented herein, the original Site building was constructed in 1967, for grocery distribution and related activities, which remained in operation until February 2022.

4.1.3 Fire Insurance Plans, Property Underwriter Reports, and Property Underwriter Plans

A request for FIPs, PURs, and PUPs covering the Phase One Study Area was submitted to OPTA Information Intelligence (OPTA) through ERIS. No PURs and PUPs pertaining to the Site, and no FIPs pertaining to the Phase One Study Area, were identified by OPTA. One PUR (the “1980 Inspection Report”) was returned for the property located at 2620-2630 Sheffield Road within the Phase One Study Area. Pertinent information regarding this off-Site property is summarized below. The OPTA Enviroscan Report is provided in **Appendix C**.

1980 Inspection Report (2620-2630 Sheffield Road)

A review of the inspection report identified the following:

- At the time of the inspection, the property was occupied by the Federal Government Department of Indian Affairs and consisted of offices with a wood working shop;
- The operations consisted of office space, and the storage and restoration of antique furniture. A woodworking shop with an associated dust collector and an “*occasionally used*” spray booth located within the building; and
- Flammable liquids storage at the property was noted to include 10 22.7-Litre (L) cans of lacquer thinner and 100 4.54-L cans of oil-based paints.

Due to the presence of woodworking, a spray booth, and chemical storage at this property, it is considered to represent an off-Site PCA that does not result in an APEC at the Phase One Property due to the minimal quantities of chemicals stored and lack of database listings (e.g., no environmental compliance approvals, no waste management records, etc.) in the ERIS report (see Section 4.2).

4.1.4 Chain of Title

Geosyntec retained ERIS to provide a chain of title report summarizing the historical ownership of the Phase One Property dating back to Crown ownership. Two PINs are associated with the Phase One Property:

- 04262-0111 (LT) pertains to the northern portion of the Phase One Property; and
- 04262-0112 (LT) pertains to the southern portion of the Phase One Property.

The results of the search are as follows:

PIN #	Date	Party From	Party To
200 acres including: 04262-0111 (LT) 04262-0112 (LT)	27 April 1809	Crown	John Fox
	6 June 1833	Sheriff MacDonell (John Fox defaulted on taxes)	Donald MacDonell
	22 February 1834	Donald MacDonell	George Auldgo
	18 August 1848	Louis Auldgo (George Auldgo Estate)	Andrew Carrier
	18 August 1848	Andrew Carrier	Damase Bourgois
	12 July 1855	Damase Bourgois	Jean B. Pascore
	9 January 1857	Jean B. Pascore	Charles Cristy
	23 July 1898	Charles Christy	Charles J. A. Christie
	22 September 1950	Charles J. A. Christie	His Majesty the King
	16 February 1954	His Majesty the King	Federal District Commission
	5 June 1956	Charles J. A. Christie Estate	The Dominion Bridge Company Limited
	16 January 1957	Federal District Commission	Dominion Bridge Company, Limited
	4 August 1959	Dominion Bridge Company, Limited	The Hydro-Electric Power Commission of Ontario
	7 December 1961	The Hydro-Electric Power Commission of Ontario	National Capital Commission
04262-0112 (LT)	14 September 1965	National Capital Commission	Freebro Leaseholds Limited
04262-0111 (LT)	31 May 1972	National Capital Commission	Ottawa Regional Hospital Linen Services Incorporated
	14 November 1975	Ottawa Regional Hospital Linen Services Incorporated	National Trust Company Limited
	26 May 1978	National Trust Company Limited	Wittington Leased Properties Limited
04262-0112 (LT)	2 May 1980	Admiral Leaseholds Limited (formerly Freebro Leaseholds Limited)	Loblaws Limited
04262-0111 (LT)	11 April 1985	Wittington Leased Properties Limited	Loblaw Associated Properties, Inc.

PIN #	Date	Party From	Party To
04262-0111 (LT)	7 April 2021	Loblaw Associated Properties, Inc.	Loblaw Properties Limited
04262-0112 (LT)	7 April 2021	Loblaws Limited	Loblaws Inc.
04262-0111 (LT)	12 April 2021	Loblaw Properties Limited	Loblaws Inc.
04262-0111 (LT) 04262-0112 (LT)	28 February 2022	Loblaws Inc.	CP REIT Ontario Properties Limited

Summary

Based on a review of the ERIS chain of title report, the Phase One Property was owned by various private individuals from 1809 through approximately 1957. The Phase One Property was owned by various commercial/government entities from 1957 through 2022. The Phase One Property was acquired by the present-day property owner (CP REIT Ontario Properties Limited) on 28 February 2022.

Geosyntec notes that Ottawa Regional Hospital Linen Services Incorporated is listed as the property owner of the northern parcel (PIN 04262-0111) of the Phase One Property from 1972 to 1975. Ottawa Regional Hospital Linen Services occupied the adjoining property to the north (i.e., 2575 Sheffield Road) from 1975 to 2006 according to the city directories (see Section 4.1.6) and was listed in the ERIS report as a generator of various hazardous wastes at 2575 Sheffield Road as of 1986 (including halogenated solvents; see Section 4.2.6). Based on the following rationale, Ottawa Regional Hospital Linen Services was not considered to represent an on-Site PCA at the Phase One Property:

- Based on the review of the chain of title, the original parcel of land including PIN 04262-0111 was 200 acres. It is assumed that this original parcel was subdivided over time among various owners. Since 2575 Sheffield Road is adjoining the northern parcel of the Phase One Property, it is possible that a larger parcel of land was owned by Ottawa Regional Hospital Linen Services Incorporated, including both the northern portion of the Phase One Property and 2575 Sheffield Road;
- Based on the city directories reviewed, National Grocers Ltd. was listed as the occupant of the Phase One Property from 1970 to 2001/02 (see Section 4.1.6);
- No evidence indicating that any portion of the Site was previously occupied by Ottawa Regional Hospital Linen Services was provided in any of the prior environmental reports or other reviewed documentation for the Phase One Property;
- Based on the interview with the Site representatives (both with over 20 years of experience with the Site; see Section 5), the Phase One Property was occupied by Loblaw (formerly National Grocers) since its development in approximately 1967.

In summary, the listing of Ottawa Regional Hospital Linen Services in the title search does not indicate an on-Site PCA and therefore a discrepancy in the occupancy of the Site during this time frame exists, Geosyntec notes that this represents a data gap (see Section 7.4.4).

A copy of the chain of title search and chain of title report for the Phase One Property is provided in **Appendix D**.

4.1.5 Environmental Reports

The following environmental assessment documents were provided by Loblaw as part of environmental due diligence efforts conducted by Amazon in 2020:

- *Phase I Assessment, National Grocers Distribution Centre, 2625 Sheffield Road, Ottawa, Ontario, K1G 3L5*, prepared by Bluewing Environmental Services Inc. (Bluewing) for National Grocers, dated 03 October 1992;
- *Phase I Assessment Follow-Up Report, National Grocers Distribution Centre, 2625 Sheffield Road, Ottawa, Ontario, K1G 3L5*, prepared by Bluewing for National Grocers, dated 26 January 1995;
- *Phase I Environmental Site Assessment, Vacant Lot, 2692 Sheffield Drive, Ottawa, ON*, prepared by Jacques Whitford Environmental Ltd. (Jacques Whitford) for Loblaw, dated 06 November 2008;

- *Geotechnical Investigation and Pavement Design Report, DYT3 – 2625 Sheffield Road, Ottawa, ON, K1B 3V6*, prepared by AECOM for Amazon, dated 7 October 2021.

In addition, the following environmental assessment documents were provided by CP REIT:

- *Phase I Environmental Site Assessment, 2625 Sheffield Road, Ottawa, Ontario*, prepared by EXP Services Inc. (EXP) for Loblaw and Choice Properties Limited Partnership, dated 17 July 2020;
- *Phase II Environmental Site Assessment, 2625 Sheffield Road, Ottawa, Ontario*, prepared by EXP for Loblaw and Choice Properties Limited Partnership, dated 8 October 2020;
- *Screening Level Risk Assessment, 2625 Sheffield Road, Ottawa, Ontario*, prepared by EXP for Loblaw and Choice Properties Limited Partnership, dated 4 December 2020;
- *Delineation Program, 2625 Sheffield Road, Ottawa, Ontario*, prepared by EXP for Loblaw and Choice Properties Limited Partnership, dated 18 January 2021; and
- *Emergency Clean-up Assessment after a Diesel Spill – Paved Area facing Door #17, Ottawa Distribution Center – 2625 Sheffield Road, Ottawa, Ontario*, prepared by Englobe Corp. (Englobe) for Loblaw and Choice Properties Limited Partnership, dated 18 March 2021.

The following environmental assessment documents were prepared by Geosyntec for the Phase One Property:

- *Phase I Environmental Site Assessment, Amazon Site Code DYT3, 2625 Sheffield Road and 1360 Humber Place, Ottawa, Ontario, K1B 3V6*, prepared by Geosyntec for Amazon, dated 2 September 2020;
- *Limited Environmental Site Assessment, Amazon Site Code DYT3, 2625 Sheffield Road, Ottawa, Ontario, Canada*, prepared by Geosyntec for Amazon, dated 27 October 2020; and
- *Pre-Renovation Designated Substances and Hazardous Building Materials Investigation Report, 2625 Sheffield Road, Ottawa, Ontario*, prepared by Milosh Environmental Inc. for Geosyntec, dated 30 October 2020.

A summary of above-noted reports is provided below.

Geosyntec notes that the property (1360 Humber Place) located south of the Phase One Property is also owned by CP REIT and leased by Amazon. Geosyntec included 1360 Humber Place as part of the original version of this Phase One ESA (dated August 2022) for due diligence purposes on behalf of Amazon. This Phase One ESA (Revised October 2022) has excluded 1360 Humber Place as it is not part of the Site Plan Control application submission to the City.

1992 and 1995 Bluewing Assessments (Bluewing, 1992; Bluewing, 1995)

The 1992 assessment completed by Bluewing included a historical records review and evaluated environmental compliance matters pertaining to the Phase One Property. At the time of the assessment, the Phase One Property was occupied by National Grocers. The assessment included the surveying of indoor air, sewer effluent, and building materials for asbestos. A follow-up assessment was completed by Bluewing in 1995 following the implementation of recommendations outlined in Bluewing's 1992 report. Based on Geosyntec's review, the following pertinent information was noted in the reports:

- Two 22,730 L (6,000 gallon) diesel USTs were located on the north end of the Phase One Property. The USTs were of fiberglass construction and installed in August 1992. It is noted that the database records for the Phase One Property indicate that the USTs in this area are 35,000 L (9,250 gallon) in capacity. As such, it is inferred that the smaller capacity USTs replaced previous USTs, which were installed in 1978. During the UST replacement activities, Bluewing was advised that four truckloads of contaminated soil were removed from the area. One AST was also observed in this area by Bluewing, and was noted to be utilized for temporary storage during the USTs replacement activities.
- Two 1,900 L (500 gallon) USTs, which stored waste oil and supply oil, were also reportedly located on the Phase One Property, near the northwest corner of the Site building. The USTs were of single-wall steel construction and installed in 1976.
- Three catch basins were observed in former truck repair garage within the Site building, which connected to an oil-water separator. In addition, three catch basins were observed in a battery room, and were utilized to discharge of battery wash water (after neutralizing with baking soda). Two catch basins were also located in a compactor room and were utilized to capture wastewater from floor washers. Dye testing of the sewer system confirmed that effluent captured at these locations were discharged to the municipal sanitary sewer system (and not the storm system).
- Chemicals stored at the Phase One Property were noted to include household hazardous products, pool chemicals, pesticides, and fertilizers, packaged for retail sale. Hazardous wastes generated at the Phase One Property included waste petroleum naphtha generated in a parts washer, waste oil, and interceptor sludge. It was noted that hazardous waste was removed for off-Site disposal by licensed waste haulers.
- A transformer was located in a locked vault within the Site building which could not be accessed. Bluewing noted that Ottawa Hydro had indicated that the transformer was not '*[polychlorinated biphenyl] PCB contaminated*'. Fluorescent light bulbs removed for replacement were managed by an electrical contractor.
- Mechanical insulation on pipe elbows and valves, as well as sprayed ceiling insulation was observed and sampled for asbestos analysis. It is noted that a more comprehensive asbestos surveys have been subsequently conducted as summarized below.

- One 40 to 50 L spill had reportedly occurred at an unspecified location on the Phase One Property in 1990. The spill was noted to have been reported to the Ministry of the Environment¹. No further details were provided.

2692 Sheffield Road Investigations (2008-2009)

The 2008/2009 Jacques Whitford environmental reports and 2009 Paterson review letter were prepared for 2692 Sheffield Road, located approximately 30 m to the southwest of the Phase One Property. The property was a vacant lot owned by Loblaw at the time. Presently, this location is developed with a commercial/industrial building occupied by Dragona Flooring. The work was completed in relation to the divestiture of this property by Loblaw.

Issues of potential environmental concern identified during a Phase I ESA for this property included on-Site suspect fill materials, on-Site snow disposal activities, and the off-Site storage of waste oil in near proximity to the property. A Phase II ESA was subsequently completed to assess these findings, and included the advancement of three boreholes, each of which was installed as a monitoring well. Soil quality conditions were further evaluated in a subsequent supplemental soil investigation which included the advancement of 11 test pits.

The results of groundwater elevation contouring conducted at this location indicated the direction of groundwater flow at this property was generally east/northeast (i.e., towards the Phase One Property).

Jacques Whitford compared the analytical data for the submitted soil and groundwater concentrations to numerical criteria presented in the MECP² documented entitled '*Soil, Ground Water and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act*', dated March 9, 2004 (2004 MECP Standards). Based on Site-specific considerations, Jacques Whitford concluded that the MECP Standards applicable to the Phase One Property were those identified as the *Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Ground Water Condition* for industrial/commercial/community land uses and coarse-textured soils (2004 Table 3 SCS).

With respect to soil conditions, the results of the borehole and test pit investigations identified localized salt-related impacts, and barium concentrations exceeding generic background criteria. No concentrations of contaminants greater than the 2004 Table 3 SCS were identified in groundwater, which were submitted for laboratory analysis of volatile organic compounds

¹ Now the MECP.

² Formerly the Ministry of the Environment and Climate Change (MOECC), previously the Ministry of the Environment (MOE).

(VOCs), petroleum hydrocarbons (PHCs) fractions F1-F4 (F1-F4), polycyclic aromatic hydrocarbons (PAHs), metals, and inorganic parameter³ analyses.

2009 Trow Phase I ESA Report (Trow, 2009)

The Phase I ESA completed at the Phase One Property by Trow in December 2009 included a review of historical and regulatory information, a Site reconnaissance, and interviews. At the time of the 2009 Phase I ESA, the configuration of the Phase One Property was generally consistent with present day. The Phase One Property was occupied by Loblaw. Based on the results of the Phase I ESA, Trow identified the following APECs:

- Bulk fuel storage in USTs on the north end of the Phase One Property;
- A former waste oil UST(s) to the northwest of the Site building. Trow was advised that the oil UST(s) was/were removed in approximately 1999;
- A level monitoring indicator indicating the suspected presence of a heating oil UST was observed in the partial basement beneath the office portion of the Site building;
- An oil-water separator located in the truck repair garage of the Site building, which had been in use for more than 40 years;
- Petroleum staining on the concrete floor slab was observed in the wash bay area of the Site building. Cracks were observed in the concrete floor slab;
- An off-Site railway located adjacent to the east of the Phase One Property; and
- A historical building located in the area which is now occupied by the south extension (former freezer area) of the Site building. Specifically, demolition practices and unknown former use of this building were identified as a concern.

Based on the findings of the Phase I ESA, Trow recommended the completion of a Phase II ESA at the Phase One Property. Based on Geosyntec's review of the Trow report, the following additional pertinent information is noted:

- Two 205 L (45 gallon) drums of mechanical oil and one 205 L (45 gallon) drum of washer fluid were observed in the wash bay.
- A forklift repair area was located in the northwest portion of the Site building, west of the battery bay. Chemicals/wastes observed in this area included hydraulic oil in several 20 L

³ Metals and inorganics parameters included antimony, arsenic, barium, beryllium, boron, cadmium, chromium, hexavalent chromium, cobalt, copper, iron, lead, mercury, molybdenum, nickel, selenium, silver, sodium (groundwater only), thallium, vanadium, zinc, electrical conductivity (soil only), free cyanide (soil only), pH (soil only), and sodium adsorption ratio (soil only).

(5 gallon) pails, waste oil in two 205 L (45 gallon) drums, waste liquid (unspecified) in a parts washer basin, as well as solvents and paints in a locked storage unit.

- A workshop related to building maintenance activities was located in the northwestern portion of the Site building. Limited quantities of spray paint, cleaning solution, and mechanical oil were observed to be stored in this area.
- Wash water generated during the washing of batteries was captured in a wash basin, then transferred to a metal container for eventual removal by a third party. White discoloration was observed on the concrete floor surface adjacent to the wash basin.
- A mechanical scrubber was utilized to wash the floors of the facility. The waste wash water from the scrubber was discharged to a drain that connected to a holding tank in the wash bay. Sediment filtered from the wash water in the holding tank was collected by a third party. The filtered liquid was discharged to the oil-water separator in the garage. It was further noted that the oil-water separator was connected to catch basins in the old garage, and truck wash bay, and that the unit was serviced twice a year.

2009 GGI Shear-wave Velocity Sounding Report (GGI, 2009)

The report describes the results of a geophysical survey completed at the Phase One Property. The purpose of the work was not clear in the report; however, appeared to be conducted for geotechnical purposes. Based on the results of the survey, the overburden at the Phase One Property was characterized as ‘very dense soil and soft rock’.

2010 Trow Phase II ESA Report (Trow, 2010)

A Phase II ESA conducted by Trow at the Phase One Property in February 2010 focused on investigating some of the APECs identified during the 2009 Phase I ESA. Specifically, the Phase II ESA assessed soil and groundwater conditions in the areas of the on-Site private fuel outlet and the location of the former on-Site building. Soil was also investigated at the adjoining property to the south (1360 Humber Place) to investigate the adjacent railway to the east of the Phase One Property. APECs identified within the interior of the Site building during Trow’s Phase I ESA including the oil-water separator, and petroleum staining in the wash bay, were not investigated as part of the Phase II ESA.

The Phase II ESA included the advancement of six boreholes (i.e., MW10-1, BH10-2, MW10-3 to MW10-6), four of which were advanced near the private fuel outlet. Five of the six boreholes were completed as monitoring wells. The locations of the boreholes/monitoring wells are presented on **Figure 2**. Geosyntec notes that MW10-1 was advanced off-Site at 1360 Humber Place.

Based on the results of field screening, one soil sample from each of the borehole locations was selected and submitted for laboratory analysis of one or more COPCs which included benzene, toluene, ethylbenzene, and xylenes (collectively ‘BTEX’), PHCs F1-F4, polycyclic aromatic

hydrocarbons (PAHs), and metals⁴. Groundwater samples collected from each of the monitoring wells were also submitted to for analysis of one or more of the COPCs.

The Phase II ESA also included a review of a previous report entitled *Removal of Underground Storage Tank, 2625 Sheffield Road, Ottawa, ON*, prepared by Oliver, Mangione & McCalla (OMMA), dated 11 October 2000, which was unavailable at the time of Trow's Phase I ESA. This report was not provided for Geosyntec review. A brief summary of this report by Trow noted that a former waste oil UST to the northwest of the Site building was removed in 2000, and no petroleum impacts were identified during confirmatory sampling. Based on these findings, Trow no longer considered this finding an APEC and, as such, subsurface investigation activities were no longer necessary in this area. Geosyntec notes that a later Phase I ESA report completed by EXP (described below) indicated that two USTs (one waste oil tank and one motor oil tank) were removed by from this area during the UST removal program.

The Phase II ESA also included a geophysical survey over a 20 m by 20 m area in vicinity of the suspected heating fuel UST identified in the 2009 Phase I ESA. The report indicated that no evidence of an existing UST in this area was observed. It was also that a '*potential buried object and a pipe/linear object were noted in the corner. Based on the above, it is anticipated that any former storage tank that may have serviced the boiler room would have thus been removed prior to installing the gas line*'. Subsurface impacts were not investigated in the area by Trow due to safety concerns associated with the buried utilities in the area. It is further noted that the geophysical survey was limited due to buried electrical utility and parked cars.

Trow compared the analytical data for the submitted soil and groundwater samples to the 2004 Table 3 SCS. The report indicated that all reported contaminant concentrations in the submitted soil and groundwater samples met the 2004 Table 3 SCS, with the exception of PHC F2 in soil, and silver in groundwater, both of which were detected near the on-Site private fuel outlet.

2019 Pinchin Asbestos Report (Pinchin, 2019)

The 2019 Pinchin report summarizes an assessment of the condition of known ACM in the Site building materials, as part of an annual inspection program implemented at the Phase One Property. The report indicated that an asbestos survey was conducted in 2008, and identified the following ACMs in the Site building:

- Friable aircel insulation on piping in the maintenance office washroom and electrical room;

⁴ Metals parameters included antimony, arsenic, barium, beryllium, boron (groundwater only), cadmium, chromium, cobalt, copper, iron (groundwater only), lead, molybdenum, nickel, selenium, silver, sodium (groundwater only), thallium, vanadium, and zinc.

- Friable paring cement insulation on pipe fittings in the maintenance office washroom, electrical room, maintenance room, the workshop, and basement boiler room;
- Non-friable 12” by 12” vinyl floor tile and mastic in the maintenance room and hydro vault;
- Non-friable paper in interior core of fire doors located in the outside garage, cafeteria stairs, and in the wash bay under the stairway; and
- Non-friable ceiling tiles in various areas could not be accessed, and were assumed to be ACMs.

It should be noted that the report indicated that the survey was conducted for the long-term management of ACMs at the Phase One Property and was not completed for construction or renovation purposes. Based on the results of the condition assessment, no recommendations for immediate remedial action were provided in this report.

2020 AECOM Geotechnical Study Report (AECOM, 2020)

The Geotechnical Study completed at the Phase One Property by AECOM in June 2020 included a review of available Site information to identify expected subsurface conditions and a Site reconnaissance to review on-Site pavement conditions.

AECOM recommended that a field geotechnical investigation for pavement design purposes be completed at the Phase One Property. The geotechnical investigation was to include the drilling of 20 boreholes to provide Site specific geotechnical and subgrade information.

2020 Draft EXP Phase I ESA Report (EXP, 2020a)

The Phase I ESA completed for the Phase One Property by EXP in July 2020 included a review of historical and regulatory information, a Site reconnaissance, and interviews. Geosyntec notes that the Phase I ESA also included a review of the 1999 UST removal report by OMMA, several UST inspection documents, geotechnical reports, building material assessment reports (beyond the 2019 Pinchin Asbestos report noted above), and spill reports, all of which were not available for Geosyntec review.

With respect to the 1999 OMMA UST removal activities, further details were provided in the EXP report. It was noted that OMMA had removed a waste oil UST and a new oil UST from this location. Each of the USTs had an estimated capacity of 2,250 L (600 gallons). Four soil samples collected from each of the sidewalls of the location (no sampling of the excavation base was noted), and a water sample (presumably from the excavation cavity) were collected and submitted for laboratory analysis. The analytical suite for the samples was not specified. The report indicated that the soil samples met guidance criteria available at the time, and hydrocarbon concentrations in the water sample were non-detectable.

Based on the results of the Phase I ESA, EXP identified the following issues of potential environmental concern:

- Existing fuel USTs on the north end of the Phase One Property, as well as the 2004 Table 3 SCS exceedances of PHC F2 in soil, and silver in groundwater, previously identified at this location during the 2010 Trow Phase II ESA;
- Former oil USTs located to the northwest of the Site building. It was noted that confirmatory soil and groundwater samples collected during the removal of these USTs in 1999 were compared to regulatory criteria which has since been revised. Due to changes in the fractional speciation and analysis of hydrocarbon compounds since this time, it could not be confirmed whether concentrations met the current 2011 Table 3 SCS expressed as PHCs F1-F4;
- EXP was advised that fill material of unknown origin was imported during the development of the Phase One Property. In addition, the report noted that fill material of unknown origin was utilized to backfill the excavation of the former oil USTs, and identified fill materials related to on-Site historical railway spurs; and
- Former and current commercial/industrial operations in the vicinity of the Phase One Property.

Based on the results of the Phase I ESA, EXP recommended the completion of a Phase II ESA at the Phase One Property.

2020 Geosyntec Phase I ESA (Geosyntec, 2020a)

Geosyntec prepared a Phase I ESA for the Phase One Property and adjoining property to the south (1360 Humber Place) in September 2020, which included a review of historical and regulatory documents, a Site reconnaissance, and interviews. At the time of the Phase I ESA, the Phase One Property was occupied by Loblaw for grocery distribution activities.

Based on the results of the Phase I ESA, Geosyntec identified the following findings:

- Operation of a truck repair/maintenance area within the Site building, which was active through 2000. An oil-water separator associated with this activity appears to have been in operation since the construction of the Site building;
- Documented hazardous materials storage/handling activities including: various oils, washer fluid, waste oils, solvents, battery wash water, and wastes extracted from on-Site settling tanks;
- Numerous spill records were identified in database records for the Phase One Property. A total of 25 database listings pertained to diesel fuel releases ranging in volume from less than 1 L (0.3 gallons) to 500 L (130 gallons) and another four records pertained to oil/hydraulic fluid releases ranging in volume from 4 L (1 gallon) to 48 L (13 gallons);

- Two rail spurs were historically located in the central portion of the Phase One Property;
- In 2011, a fire occurred in the southern portion of the Site building. It was not documented to what extent the fire damaged the building or how the fire was brought under control. Geosyntec notes that fires often result in subsurface contamination issues due to PAHs, dioxins, and/or firefighting agents (the type of material used to extinguish the fire is not known);
- Existing fuel USTs on the north end of the Phase One Property, as well as the 2011 Table 3 SCS exceedances of PHC F1 and F2 in soil, and silver in groundwater, previously identified at this location during the 2010 Trow Phase II ESA;
- Former oil USTs located to the northwest of the Site building and evidence of a possible third heating oil UST (indicated by a level monitoring indicator in a basement and suspected exterior fill and vent pipes) identified during previous Phase I ESAs by others;
- Commercial/industrial land usage in the Phase One Study Area has been conducted since the 1960s. Numerous operations listed as waste generators, identified as dry cleaning operations generating halogenated solvents, and/or identified in spill records were identified at properties located hydraulically upgradient or adjacent to the Phase One Property; and
- Re-worked fill material was noted in the 2010 Trow Phase II ESA at six borehole locations. In addition, poor quality fill material may have also been associated with two railway spurs historically located in the central portion of the Phase One Property.

Geosyntec also noted that the Phase One Property was historically utilized for agricultural purposes and that a railway was located on the adjoining property to the east.

2020 EXP Phase II ESA (EXP, 2020b)

A Phase II ESA conducted by EXP in August 2020 at the Phase One Property and adjoining property to the south (1360 Humber Place) focused on investigating the APECs identified during the 2020 EXP Phase I ESA. Specifically, the Phase II ESA assessed soil and/or groundwater conditions in the areas of the on-Site private fuel outlet, former waste oil USTs, former interior truck repair garage, presence of fill material and former on-Site rail spurs and off-Site industrial operations to the north, west, and south of the Phase One Property.

The Phase II ESA included the advancement of nine boreholes (i.e., BH/MW101 to BH/MW106, BH107, BH108, and BH/MW109). Seven boreholes were completed as monitoring wells. The locations of the boreholes/monitoring wells are presented on **Figure 2**. Geosyntec notes that BH/MW109 was advanced off-Site at 1360 Humber Place.

Based on the results of field screening, one or more soil samples from each of the borehole locations was selected and submitted for laboratory analysis of one or more COPCs which included

BTEX, VOCs, PHCs F1-F4, PAHs, and metals⁵. Groundwater samples collected from each of the newly installed monitoring wells as well as three of the existing monitoring wells (i.e., MW10-3, MW10-4, and MW10-6) were also submitted to for analysis of one or more of the COPCs.

EXP compared the analytical data for the submitted soil and groundwater concentrations to the MECP *Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Ground Water Condition* for industrial/commercial/community land uses and medium to fine-textured soils (the 2011 Table 3 SCS).

The report indicated that all reported contaminant concentrations in the submitted soil and groundwater samples met the 2011 Table 3 SCS, with the exception of the following:

- PHC F2 concentrations (370, 540, and 990 µg/g vs. the 2011 Table 3 SCS of 250 µg/g) for soil samples BH/MW103-S2, S4, and S5, collected in the vicinity of the oil-water separator located in the northwest corner of the Site building at depths between 1.2 m to 3.7 m bgs, exceeded the 2011 Table 3 SCS. Hydrocarbon odour and staining were reported to have been observed at these depths during the field investigation. A fourth soil sample BH/MW103-S7 at a depth of 4.3 m to 4.9 m bgs was submitted for PHC/BTEX analysis. The concentrations in this sample met the 2011 Table 3 SCS; and
- A PHC F2 concentration (660 µg/g vs. the 2011 Table 3 SCS of 250 µg/g) for the duplicate soil sample of BH107-S2, collected south of the fueling USTs in the vicinity of a former PHC F2 soil exceedance between 0.9 m and 1.5 m bgs. Hydrocarbon odour and staining were reported to have been observed at this depth interval during the field investigation. A second soil sample BH107-S3 at a depth of 1.5 m to 2.3 m bgs was submitted for PHC/BTEX analysis. The concentrations in this sample met the 2011 Table 3 SCS.

Concentrations of ethylbenzene in soil sample BH/MW103-S4, select PAHs in soil sample BH108-S1B, and various metals in several boreholes were also detected at concentrations below the 2011 Table 3 SCS. Non-detectable concentrations of BTEX, VOCs, PHCs F1-F4, and PAHs, were reported for the remainder of the submitted soil and groundwater samples. Geosyntec notes MW10-4, which had an elevated concentration of silver during the 2010 Trow Phase II ESA, was re-sampled for metals parameters by EXP and silver was not detected.

2020 Geosyntec Limited ESA (Geosyntec, 2020b)

Geosyntec conducted a Limited ESA at the Phase One Property in October 2020 to evaluate potential vapour intrusion to indoor air risk within the existing Site building footprint. The Limited ESA included the installation of seven sub-slab vapour pins within the Site building (SSV-01,

⁵ Metals parameters included antimony, arsenic, barium, beryllium, boron, hot water soluble boron (soil only) cadmium, chromium, hexavalent chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, sodium (groundwater only), thallium, vanadium, uranium, and zinc.

SSV-02 and SSV-04 to SSV-08) to facilitate sub-slab vapour sample collection. Proposed sub-slab vapour sample SSV-03 was not collected as the concrete slab in this location was beyond the length of the drill bit available at the time of the field work.

Two sub-slab vapour samples were collected and submitted to the analytical laboratory for VOC analysis by United States Environmental Protection Agency (USEPA) Method TO-15. Analytical results for sub-slab vapour samples were compared to the MECP Residential and Commercial Soil Vapour Screening Levels (SVSLs) and the USEPA Residential and Commercial Vapour Intrusion Screening Levels (SLs).

The sub-slab vapour results can be summarized, as follows:

- The following VOC concentrations exceeded the MECP Commercial SVSLs and/or the USEPA Commercial SLs:
 - Chloroform concentrations at SSV-02 ($610 \mu\text{g}/\text{m}^3$) exceeded the USEPA Commercial SL (18 micrograms per cubic meter [$\mu\text{g}/\text{m}^3$]); and
 - Trichloroethylene (TCE) concentrations at SSV-01 ($106 \mu\text{g}/\text{m}^3$) exceeded the USEPA Commercial SL ($100 \mu\text{g}/\text{m}^3$).
- The following VOCs had concentrations that exceeded the MECP Residential SVSLs and/or the USEPA Residential SLs: 1,3-butadiene (SSV-06); benzene (SSV-05 and SSV-06); bromodichloromethane (SSV-02); chloroform (SSV-01 and SSV-07); dichlorodifluoromethane (SSV-06); ethylbenzene (SSV-06); and tetrachloroethylene (SSV-01 and SSV-02).
- Various other VOCs were detected at low levels; however, none of the detected concentrations exceeded either the MECP Residential and Commercial SVSLs or USEPA Residential and Commercial SLs.
- Methane was detected at low concentrations (between 0.0 and 0.2% by volume [%vol]) during screening at the sub-slab sample locations, which is below the lower explosive limit of methane (5%vol).

2020 Milosh Pre-Renovation DSS & HM Survey (Milosh, 2020)

Geosyntec (on behalf of Amazon) subcontracted Milosh to prepare a Pre-Renovation Designated Substances and Hazardous Building Materials Investigation Report (DSS&HM Survey) for the Phase One Property. Milosh surveyed 11 designated substances within building materials at the Site, as defined by Section 30 of the Ontario *Occupational Health and Safety Act* (OHSA) and Ontario Regulation 490/09, as follows: asbestos, lead, mercury, silica, isocyanates, vinyl chloride monomer, benzene, acrylonitrile, coke oven emissions, arsenic, and ethylene oxide. Other hazardous materials assessed as part of the investigation included PCBs, ozone depleting substances (ODS), mould, and radioactive materials.

A total of 59 samples were collected from 17 different Site building materials for analysis of ACM. Based on the analytical laboratory data, the following ACM was detected at the Phase One Property:

- Drywall joint compound in the northwest corner of the 1967 portion of the Site building (2% chrysotile asbestos);
- Grey caulking located around exterior perimeter doors (2% chrysotile asbestos);
- Rooftop exhaust vents on the 1967 portion of the Site building (3% chrysotile asbestos); and
- Black caulking located around inner windows of the 1967 portion of the Site building (3% chrysotile asbestos).

Milosh also summarized previously sampled and identified ACM as describe in the 2019 Pinchin Asbestos Report:

- White air-cell mechanical pipe insulation throughout 1967 and 1976 portions of the Site building in ceiling spaces and wall cavities (60% chrysotile asbestos);
- Grey parging cement insulation throughout 1967 to 1976 portions of the Site building in ceiling spaces and wall cavities (40% chrysotile asbestos);
- Mastic beneath 12" x 12" brown vinyl floor tiles located in main office (0.5% to 5% chrysotile asbestos);
- 12" x 12" salmon vinyl floor tiles and mastic located in the main office beneath existing beige floor tiles (0.5% to 5% chrysotile asbestos); and
- Packing material within fire doors located in the 1967 to 1974 portions of the Site building (40% chrysotile asbestos).

Milosh identified building materials at the Site building that were presumed to be ACM (but were not sampled) that including potential ACM associated with knuckle joint connections of the cast-steel water pipe drainage systems and the roof. Milosh noted that the investigation was limited-intrusive in nature. As such, it was recommended that during renovation or demolition of the Site building, if suspect ACMs are identified, work should stop and the materials should be tested to confirm asbestos content.

Six samples of suspected lead-based paint (LBP) applications were collected and submitted for total lead analysis. Based on the laboratory analysis, the following LBP was detected at concentrations >0.1% lead content at the Phase One Property:

- Cream paint located in the main office (0.1170%);
- Reddish brown paint located in the basement mechanical rooms, maintenance shop, garage bay areas (0.4760%); and

- Yellow paint located throughout warehouse areas (0.3980%).

Milosh also indicated that although not tested or observed, lead may also be present in wiring connectors, electric cable sheathing, solder joints on copper piping, ceramic glazes, lead sheeting, and masonry mortar at the Site.

Based on the age of the building and observations made during the survey, Milosh provided a summary of the potential or presumed presence of the other assessed designated substances and hazardous substances in the Site building materials and provided recommendations for the abatement and management of these materials during a renovation or demolition of the Site building.

2020 EXP Delineation Report (EXP, 2020c)

A Phase II ESA conducted by EXP at the Phase One Property in November 2020 focused on horizontally delineating the PHC F2 exceedances beneath the northwestern portion of the Site building and in the vicinity of the on-Site private fuel outlet.

The Phase II ESA included the advancement of eight boreholes (i.e., BH201 to BH208). Four boreholes were completed around each identified soil exceedance. The locations of the boreholes are presented on **Figure 2**.

One soil sample from each of the borehole locations was selected and submitted for laboratory analysis of BTEX and PHCs F1-F4. EXP compared the analytical data for the submitted soil concentrations to the 2011 Table 3 SCS.

The report indicated that all reported contaminant concentrations in the submitted soil samples were less than the 2011 Table 3 SCS.

2020 EXP SLRA Report (EXP, 2020d)

A screening level risk assessment (SLRA) conducted by EXP in December 2020 focused on evaluating the risk of known contaminant of concern (COC), PHC F2 in soil, to potential human and ecological receptors at the Phase One Property.

A component value screening was completed based on Site-specific factors. EXP noted that due to the shallow groundwater encountered at the Phase One Property (at a depth of 1.52 m bgs) as a conservative approach, volatile groundwater parameters were compared to the MECP 2011 *Table 7: Generic Site Condition Standards for Shallow Soils in a Non-Potable Groundwater Condition* (the “2011 Table 7 SCS”). EXP did not identify any further COCs upon comparison of the groundwater analytical results to the 2011 Table 7 SCS.

The results of the SLRA were reported as follows:

- No unacceptable risks were identified for direct contact with soil by Site visitors, long-term workers, or construction/subsurface workers;
- No unacceptable risks were identified for outdoor air inhalation by Site visitors, long-term workers, or construction/subsurface workers;
- No unacceptable risks were identified for direct or indirect contact with soil by plants, soil invertebrates, mammals or birds;
- No unacceptable risks were identified for indirect contact with soil by aquatic organisms as a result of contaminant leaching from soil to groundwater and migration to off-Site water bodies; and
- Potential risks were identified for indoor air inhalation by Site visitors and long-term workers within the Site building.

EXP recommended that a sub-slab vapour or indoor air quality assessment be completed to assess whether the COC (PHC F2) present in soil beneath the Site building represents a health risk to occupants.

EXP further noted that no risk management measures (RMMs) were required for on and off-Site ecological receptors.

2021 Englobe Emergency Diesel Spill Clean-up Letter (Englobe, 2021)

An emergency clean-up assessment was conducted by Englobe Corp. (Englobe) to assess on-Site conditions after a diesel spill clean-up at the Phase One Property. The spill occurred on 2 January 2021, in which a trailer reefer fuel tank was punctured resulting in a release of approximately 335 L of diesel fuel to the asphalt pavement in the northeastern portion of the Phase One Property (near Door #17).

A specialized contractor was retained by Loblaw. A vacuum truck was used to recover the spilled diesel and the asphalt pavement was cleaned with degreaser. The area was pressure washed to remove any additional diesel. All pumped diesel and wash water were collected for off-Site disposal.

Englobe conducted a visual reconnaissance of the release area on 12 January 2021. Englobe observed some cracks in the asphalt in the area of the spill. It was concluded that the area was sufficiently cleaned the deep cleaning of the asphalt and seasonal frozen soil conditions prevented migration of diesel into the subsurface.

Geosyntec notes that no soil testing was completed as part of the spill response or Englobe's assessment.

2021 AECOM Geotechnical Investigation Report (AECOM, 2021)

The 2021 AECOM geotechnical investigation included the advancement of 16 boreholes (BH-1 to BH-3, BH-7, BH-10 to BH-12, and BH-14 to BH-22) throughout the Phase One Property to depths ranging between 1.37 m and 5.18 m bgs in January 2021. No groundwater monitoring wells were installed as part of this investigation.

The soil stratigraphy at the Phase One Property was characterized as follows:

- The ground surface was comprised of a layer of asphalt in all boreholes (except one) ranging in thickness from 40 to 180 millimetres (mm). The existing asphalt varied in condition between very poor to good. One borehole (i.e., BH-22) was advanced within a grassed area at the Phase One Property. A layer of topsoil with a thickness of 50 mm was encountered at this location;
- A layer of granular base consisting of sand and gravel was encountered beneath the asphalt in all boreholes ranging in thickness from 330 mm to 1.42 m;
- Fill material was encountered beneath the granular base. The fill thickness was approximately 800 mm; and
- A native clayey silt layer was encountered beneath the fill material. The thickness of this layer ranged from 600 mm to 1.4 m. All boreholes were completed in this unit.

Soil quality samples were collected from two boreholes (BH-7 and BH-18) and were submitted to the analytical laboratory for laboratory analysis of chloride, sulphate, pH, electrical conductivity (EC), resistivity, and redox potential.

The depth to groundwater was visually recorded by AECOM at one borehole location (i.e., BH-7) at a depth of approximately 4 m bgs.

AECOM noted that no abnormal odours or staining were observed during the geotechnical investigation.

Summary

Based on the information provided in the prior environmental reports, the following on-Site PCAs resulting in APECs were identified (see **Figure 4** of **Appendix A**):

- The presence of historical and current private fuel outlet with diesel USTs (north end of Phase One Property), former waste oil and supply oil USTs (northwest corner of Site building), and the potential presence of a former heating oil UST(s) (below office portion of the Site building) (Gasoline and Associated Products Storage in Fixed Tanks; PCAs #2, #4A, and #5A);

- Former truck repair and maintenance activities in the Site building, including the presence of an oil-water separator which generated sludge waste (Commercial Trucking and Container Terminals; PCA #3);
- Potential fill material placement during initial site development, backfill of former waste oil, supply oil, and heating oil UST excavations, and the demolition of a former on-Site building (Importation of Fill Material of Unknown Quality; PCAs #1, #4B, #5B, and #7);
- The presence of former rail spurs in the central portion of the Phase One Property (Rail Yards, Tracks and Spurs; PCA #6);
- Forklift battery washing and storage activities in the north-central portion of the Site building (Battery Manufacturing, Recycling, and Bulk Storage; PCA #8);
- Chemicals/wastes stored in the forklift repair area and workshop in the northwestern portion of the Site building including hydraulic oil, waste oil, waste liquid (unspecified), solvents, paints, and waste petroleum naphtha generated from a parts washer (Chemical Manufacturing, Processing, and Bulk Storage; PCA #9);
- Potential subsurface impacts from a fire that occurred along the southern portion of the Site building in 2011 (No O. Reg. 153/04 PCA Category; PCA #10); and
- Potential subsurface impacts from a diesel fuel release in the northeastern portion of the Phase One Property in 2021 (No. O. Reg. 153/04 PCA Category; PCA #11).

The following operations outlined in the prior environmental reports were considered to not represent on-Site PCAs:

- The presence of an on-Site utility-owned transformer located within the northwestern portion of the Site building. According to the 1992 and 1995 Bluewing Assessments, Ottawa Hydro had indicated that the transformer was not '*PCB contaminated*'. As such, this is not considered an on-Site PCA at the Phase One Property;
- Historical agricultural usage of the Phase One Property prior to 1967. It is possible that hazardous pesticides or herbicides were used on-Site; however, no evidence of significant pesticide/herbicide usage was available through the records review; and
- Jacques Whitford conducted prior subsurface investigations at 2692 Sheffield Road (located approximately 30 m to the southwest of the Phase One Property) related to suspect fill materials and snow disposal activities at the property and off-Site storage of waste oil at an adjoining property. Due to the distance of this property from the Phase One Property, fill materials and snow disposal activities are not considered to represent a concern. Furthermore, although salt-related and metals parameters exceeded the applicable SCS in soil, no groundwater concentrations greater than the applicable SCS were identified. As such, this property is not considered to represent an off-Site PCA.

4.1.6 City Directories

Geosyntec contracted ERIS to complete a search of city directory listings for the Phase One Property and for other properties located within the Phase One Study Area. City directories were available for the following years: 1960, 1965, 1970, 1975, 1980, 1984, 1992, 1996/97, 2001/02, 2006/07, and 2011. Information was provided for the following addresses:

- 2180 – 2195 Bantree Street;
- 2535 – 2675 Blackwell Street;
- 1290 – 1360 Humber Place; and
- 2540 – 2755 Sheffield Road.

The city directories are provided in **Appendix E**.

City directory listings for the Phase One Property are provided in the following table:

Year	Phase One Property Listings
1960 to 1965	<i>Address Not Listed</i>
1970 to 1992	National Grocers Ltd.
1996/97	National Grocers Ltd. and CCG Security Inc.
2001/02	National Grocers Ltd.
2006/07 to 2011	Loblaws Companies Ltd.

City directory listings were reviewed for references that could infer the potential presence of an off-Site PCA that may or may not result in an APEC. City directory listings located within the Phase One Study Area are provided in the following table:

Property Address	Location Relative to the Phase One Property	Listings	Years Present
2575 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Ottawa Carleton Regional Hospital Linen Service / Ottawa Regional Hospital Linen Services Inc.	1975, 1980, 1984, 1992, 1996/97, 2001/02, 2006/07
2574 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	C Com Satellite Systems	2011
2590 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Midon Holdings Ltd., Hull Ottawa Plating Ltd., and Valley Hard Chrome Ltd.	1970
		Zenith Plating Div. of TKM Ottawa	1975, 1980, 1984
		Roofers World Inc.	2011

Property Address	Location Relative to the Phase One Property	Listings	Years Present
2600 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	M&G Manufacturers & Sales (truck bodies and work repair)	1970, 1975, 1980, 1984, 1992
		Nova Mobility, M&G Sales, Vielleux Parts Ltd.	1996/97
		P&H Automotive	2001/02, 2006/07, 2011
2612 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Organic Resource Management Inc.	2011
2616 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Sonny Tire Bandage Ltd.	1970, 1975, 1980, 1984, 1987
		Ottawa Tire Retreading	1992
		Capital City Tire, Ottawa Tire Retreading	1996/97
		Capital Textile Restoration	2011
2644 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Mack Trucks Canada Ltd./ Ottawa Mack Inc. / Capital Mack Inc.	1970, 1975, 1980, 1984, 1992
		City of Ottawa Metro Towing and Recovery	1996/97
2658 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Lanthier JL Machinery Ltd.	1980
		Capital Mack Inc.	1992
2660 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Ryder JH Machinery Co	1970
2715 Sheffield Road	Located approximately 90 m to the south of the Phase One Property and inferred hydraulically crossgradient.	Beechwood Steel Supply Ltd., Paul's Transfer & Delivery, Canada Cement & Lafarge Ltd. / Lafarge Canada Inc.	1980, 1984, 1987, 1992
		Day & Ross Transport	1987
		Daily Motor Freight	1996/97
		Daily Transport Canada, Consolidated Fast Freight	2001/02
2716 Sheffield Road	Located approximately 100 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	Canadian Trailmobile Ltd.	1970, 1975
		Pullman Trailmobile Canada Ltd.	1980
		Ottawa Truck Centre	1984, 1987, 1992, 1996/97, 2001/02, 2006/07, 2011

Summary

Based on Geosyntec's review of the city directory listings, the Phase One Property was occupied for grocery distribution services from at least 1970 to 2011.

The city directories indicated that the properties located within the Phase One Study Area have been predominantly developed with commercial and industrial land usage since at least 1970. The following off-Site PCAs resulting in an on-Site APEC were identified from Geosyntec's review (see **Figure 4** of **Appendix A**):

- 2575 Sheffield Road (located on the adjoining property to the north and inferred hydraulically cross/downgradient of the Phase One Property) was occupied by Ottawa Regional Hospital Linen Services Inc. from 1975 to 2011 (Operation of Dry Cleaning Equipment [where chemicals are used]; PCA #12);
- 2574 Sheffield Road (located approximately 25 m to the northwest of the Phase One Property and inferred hydraulically crossgradient) was occupied by C-COM Satellite Systems Inc. in 2011 (Electronic and Computer Equipment Manufacturing; PCA #15);
- 2590 Sheffield Road (located approximately 25 m to the west and inferred hydraulically upgradient of the Phase One Property) was occupied by various metal and/or chrome plating operations from 1970 to 2011 (Metal Treatment, Coating, Plating, and Finishing; PCA #16);
- 2600 Sheffield Road (located approximately 25 m to the west and inferred hydraulically upgradient of the Phase One Property) was occupied by M&G Sales (truck sales and repair) from 1975 to 1996/97 and P&H Automotive from 2001/02 to 2011 (Commercial Autobody Shops; PCA #17);
- 2612 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Organic Resource Management Inc. (organic waste transfer and processing) in 2011 (Waste Disposal and Waste Management; PCA #17);
- 2616 Sheffield Road (located approximately 25 m to the west and inferred hydraulically upgradient of the Phase One Property) was occupied by various automotive repair shops from 1970 to 1996/97 and Capital Textile Restoration in 2011 (Commercial Autobody Shops and Textile Manufacturing and Processing; PCA #17);
- 2644 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Mack Trucks Canada Ltd. (commercial trucking) from 1970 to 1992 (Commercial Trucking and Container Terminals; PCA #19);

- 2658 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Capital Mack in 1992 (Commercial Trucking and Container Terminals; PCA #19); and

None of the remaining listings are considered to represent off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the nature of operations and/or distances and/or directions relative to the projected direction of groundwater flow (to the east).

4.2 Environmental Source Information

Geosyntec contracted ERIS in January 2022 to conduct a search of federal, provincial, and private source environmental databases (database publication dates included in parentheses) for records pertaining to the Phase One Property and for other properties located within the Phase One Study Area. The ERIS report was generated based on a search area of 300 m from the Phase One Property boundary (which at the time of request also included 1360 Humber Place). It is noted that, for the purposes of this Phase One ESA, only listings for those properties located within the Phase One Study Area (i.e., located within 250 m of the Phase One Property boundaries) were evaluated as part of Geosyntec’s review based on the QP’s judgement related to the Phase One Study Area (see Section 4.1.1).

A copy of the ERIS database report is provided in **Appendix E**.

4.2.1 National Pollutant Release Inventory

A search of the ‘*National Pollutant Release Inventory*’ (NPRI) (1993 – May 2017) database, maintained by Environment Canada, did not identify any listings for the Phase One Property.

The following 9 NPRI listings were identified for other properties located within the Phase One Study Area:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
2612 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One NPRI listing for Walker Environmental Group. The facility reported for the year 2014. The air pollutants were not specified in the listing.	No
		Two EBR listings for Organic Resource Management Inc. for approval of a waste disposal site, approved in 2009 and 2013.	Yes

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
2590 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One NPRI listing for Weston Bakeries Limited. The facility reported air pollutants including carbon dioxide, sulphur dioxide, volatile organic compounds (VOCs), nitrous oxide, carbon monoxide, and total particulate matter for the year 2004.	No
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Seven NPRI listings for Arcelormittal Ottawa. The facility reported for the years 2008 to 2014. The air pollutants were not specified in the listing.	No

Summary

The following off-Site PCA resulting in an on-Site APEC was identified (see **Figure 4 of Appendix A**):

- 2612 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Organic Resource Management Inc. for use as a waste disposal site (Waste Disposal and Waste Management; PCA #17).

The remaining listings identified in the NPRI database are compliance-related in nature and pertain to gaseous releases of pollutants (i.e., are not indicative of releases to soil and groundwater); therefore, these listings are not considered to represent off-Site PCAs.

4.2.2 PCB Information

A search of the 'National PCB Inventory' (NPCB) (1988 – 2008) and 'Ontario Inventory of PCB Storage Sites' (OPCB) (1987 – October 2004; 2012 – December 2013) databases, maintained by Environment Canada and the MECP, respectively, did not identify any listings for the Phase One Property.

The following 4 NPCB and 6 OPCB listings were identified for properties located within the Phase One Study Area:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
2715 Sheffield Road	Located approximately 90 m to the south of the Phase One Property and inferred hydraulically crossgradient.	Three NPCB listings for Lorimar Investments for having askarel stored for disposal in 1996. Six OPCB listings for the years 1995, 1998, 1999, 2000, 2003, and 2004.	No

Summary

Due to the distance from the Phase One Property, the above listing is not considered to represent an off-Site PCA contributing to an on-Site APEC at the Phase One Property.

4.2.3 Environmental Compliance Approvals, Certificates, and Permits

A search of the ‘*Certificates of Approval*’ (CA) (1985 – October 30, 2011), ‘*Environmental Activity and Sector Registry*’ (EASR) (October 2011 – November 30, 2021), ‘*Environmental Registry*’ (EBR) (1994 – December 31, 2021), ‘*Environmental Compliance Approval*’ (ECA) (October 2011 – November 30, 2021), ‘*Non-Compliance Reports*’ (NCPL) (December 31, 2018), ‘*Pesticide Register*’ (PES) (October 2011 – November 30, 2021), and ‘*Permit to Take Water*’ (PTTW) (1994 – December 31, 2021) databases identified the following listings for the Phase One Property:

- One EBR record dated 2004, one CA record dated 2005, and one ECA record dated 2005 were listed in relation to environmental approvals for air discharges by Loblaw Properties Limited. Environmental approval documentation available online⁶ indicated the operation of natural gas-fired heating equipment, one 4,500 L (1,190 gallon) diesel AST, two 35,000 L (9,250 gallon) diesel USTs, banana ripening exhaust systems, an exhaust fan for occasional welding and painting in a maintenance shop, and one compactor; and
- Six PES records listing Loblaw Companies Limited as a vendor of pesticides.

In addition, 18 CA listings, five EASR listings, 14 EBR listings, 16 ECA listings, and three PES listings were identified for other properties located within the Phase One Study Area, as follows:

⁶ <https://www.accessenvironment.ene.gov.on.ca/instruments/5402-66BSDL-14.pdf>

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
Sheffield Road and Leeds Avenue (now Humber Place)	Located on the adjoining intersection to the southwest of the Phase One Property and inferred hydraulically up/crossgradient.	Two CA listings for IPCF Properties Inc. for municipal sewage and water, approved in 1990 and 1991, respectively.	No
2616 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One CA listing and one ECA listing for Furniture Majic Inc. for industrial air pertaining to the installation of a paint spray booth, both approved in 2002.	No
2600 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One CA listing for 844301 Ontario Inc. for industrial air pertaining to the installation of a waste oil furnace, approved in 1994.	No
1325 Leeds Avenue (now Humber Place)	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One CA listing, one EBR listing, and one ECA listing for 1470261 Ontario Inc./Landstar Automotive for industrial air pertaining to the installation of a paint spray booth, all approved in 2005.	Yes
		One CA listing for Renova Manufacturing for industrial air (with ammonia), approved in 1985.	No
2692 Sheffield Road	Located approximately 30 m to the southwest of the Phase One Property and inferred hydraulically upgradient.	One ECA listing for 1075748 Ontario Inc. for industrial sewage works, approved in 2010.	No
2716 Sheffield Road	Located approximately 100 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One CA listing for Kemptville Truck Centre Limited for industrial air pertaining to the installation of a waste oil furnace, approved in 1994.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Two CA listings, two EBR listings, and one ECA listing for Bakermat Inc. for industrial air (including a waste oil furnace), approved in 1997 and 2004.	No
		One EBR listing and two ECA listings for American Iron & Metal Company Inc. for industrial sewage works, approved in 2017 and 2021.	No
2548 Sheffield Road	Located approximately 115 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	One CA listing for Kamal Beydoun for industrial air pertaining to a paint spray booth for an autobody shop, approved in 1995.	No
2555 Blackwell Street	Located approximately 120 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	One CA listing and one EBR listing for Waste Care Services Ltd. for industrial air, approved in 2001 (noted to have been cancelled) and 2002. One EBR listing for Waste Care Services Ltd. for approval for a waste disposal site, approved in 2001.	No
2575 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	One EASR listing for 6331947 Canada Inc. for the operation of an automotive refinishing facility, registered in 2012.	No
2615 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	One CA listing for Abbatec Limited for industrial air pertaining to mercury reclaiming equipment, approved in 1991.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
2655 Blackwell Street	Located approximately 145 m to the west of the Phase One Property and inferred hydraulically upgradient.	One EASR listing for K and R Auto Body for the operation of an automotive refinishing facility, registered in 2012.	No
2675 Blackwell Street	Located approximately 145 m to the west of the Phase One Property and inferred hydraulically upgradient.	Three PES listings for 1041365 Ontario Inc./The Weed Man for an operator pesticide licence.	No
2535 Blackwell Street	Located approximately 145 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One CA listing, one EBR listing, and one ECA listing for Joseph Maurice Gilles Miner for industrial air pertaining to the installation of a paint spray booth, approved in 2003.	No
		Two CA listings and two ECA listing for Multi-Drain Inc. for a waste management system, approved in 2002.	No
		One EBR listing and two ECA listings for Royal City Paint & Wallpaper Inc. for industrial air pertaining to the installation of a paint spray booth, approved in 2015.	No
		One EBR listing and one ECA listing for S.L. Ross Environmental Research for industrial air pertaining to several exhaust stacks, approved in 2016.	No
2191 Bantree Street	Located approximately 200 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One EASR listing for 2575293 Ontario Inc. for the operation of an automotive refinishing facility, registered in 2018.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to on-Site APEC?
		One ECA listing for 1075748 Ontario Inc. for industrial sewage works, approved in 2017.	No
1280 Leeds Avenue (now Humber Place)	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	Two EASR listing for ADMNS Leeds Investment Corporation for a heating system, registered in 2016.	No
		Two EBR listings for Stericycle, Inc./Stericycle ULC for an ECA for waste, approved in 2012 and 2016.	No
Bantree Street, Leeds Avenue and Blackwell Street	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	One CA listing for municipal sewage, approved in 1991.	No
1275 Leeds Avenue (now Humber Place)	Located approximately 240 m to the west of the Phase One Property and inferred hydraulically upgradient.	One CA listing and one ECA listing for 1275 Leeds Avenue Property Inc. for industrial sewage works, both approved in 2002.	No
2570 Blackwell Street	Located approximately 245 m to the northwest of the Phase One Property and inferred hydraulically up/crossgradient.	One CA listing, one EBR listing, and one ECA listing for 718013 Ontario Ltd. for industrial air pertaining to the installation of a paint spray booth, all approved in 2008.	No

Summary

Based on the information provided in the listings, the following on-Site PCA resulting in an APEC was identified (see **Figure 4** of **Appendix A**):

- Environmental approval documentation for the operation of one 4,500 L diesel AST and two 35,000 L diesel USTs at the Phase One Property (Gasoline and Associated Products Storage in Fixed Tanks; PCA #2).

Based on the information provided in the listings, the following off-Site PCA resulting in on-Site APEC was identified (see **Figure 4 of Appendix A**):

- 1325 Leeds Avenue (now Humber Place) (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Landstar Automotive with environmental approval documentation for the installation of a paint spray booth (Commercial Autobody Shops; PCA #20).

None of the remaining listings are considered to represent off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the type of operations, nature of the listings (i.e., pertaining to compliance, municipal sewage/water permits, or industrial air emissions), and/or distances, and/or directions relative to the projected direction of groundwater flow.

4.2.4 Coal Gasification Plants Inventory Information

A search of the ‘*Coal Gasification Plants and Coal Tar Sites*’ (COAL) (April 1987 and November 1988) database did not identify any listings for the Phase One Property or for other properties located within the Phase One Study Area.

4.2.5 Records of Environmental Incidents, Orders, Offences, Spills, Discharges, or Inspections

A search of the ‘*Compliance and Convictions*’ (CONV) (1989 – July 2021), ‘*Fuel Oil Spills and Leaks*’ (INC) (May 31, 2021), ‘*National Environmental Emergencies System (NEES)*’ (NEES) (1973 – 2003), ‘*Orders*’ (ORD) (1994 – December 31, 2021), ‘*TSSA Pipeline Incidents*’ (PINC) (May 31, 2021), and the ‘*Ontario Spills*’ (SPL) (1988 – September 2020) identified the following listings for the Phase One Property:

- 49 spill records were identified for the Phase One Property. Of these records, 26 pertained to diesel fuel releases ranging in volume between less than 1 L and 500 L. Four of the records pertained to oil/hydraulic fluid/antifreeze releases ranging in volume between 4 L and 48 L. The remaining 19 spill records were related to atmospheric discharges of chlorofluorocarbon (CFC) refrigerants. The diesel, oil, antifreeze, and hydraulic fluid spills were reported to have been released on to land, ground or pavement. No further specific details concerning the spills were available in the spill records.

In addition, one PINC listing, and 19 SPL listings were identified for properties located within the Phase One Study Area, as follows:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
Sheffield Road and Leeds Avenue (now Humber Place)	Located on the adjoining intersection to the southwest of the Phase One Property and inferred hydraulically up/crossgradient.	One SPL listing for a release of an unspecified quantity of diesel fuel to land in 2003. Environmental impact (soil) contamination was possible.	No
2575 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	One SPL listing for a release of 1,200 L of hydrogen peroxide in 2004. Environmental impact was possible.	No
		One SPL listing for American Iron & Metal GP Inc. for a release of an unspecified quantity of hydrocarbon fluid to surface water in 2017.	Yes
2660 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One SPL listing for “Construction Company” for a release of 40 L of motor oil to a ditch in 1997. Environmental impact (soil/water) contamination was possible.	No
2600 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One SPL listing for United Rentals for a release of 100 L of diesel fuel to land in 2016.	No
2630 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One SPL listing for Waste Management of Canada for a release of 5 L of hydraulic oil to road in 2015.	No
2715 Sheffield Road	Located approximately 90 m to the south of the Phase One Property and inferred hydraulically crossgradient.	One SPL listing for Paul’s Transfer & Delivery Ltd. for a release of 400 L of diesel fuel to land in 1991. Environmental impact (soil) contamination was possible.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2716 Sheffield Road	Located approximately 100 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One SPL listing for Waste Management of Canada Corporation for a release of an unspecified quantity of hydraulic oil in 2011. Environmental impact was not anticipated.	No
2675 Sheffield Road (address does not exist)	Located approximately 100 m to the south of the Phase One Property and inferred hydraulically crossgradient.	One SPL listing for Clark Leasing for a “reefer tank leaking” in 2002. Environmental impact (land/water) was possible.	No
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Six SPL listings for Baker Mat Inc./ArcelorMittal Ottawa Inc. for releases of diesel/oil/transformer oil/transmission oil ranging from 12 to 200 L. Three listings noted that environmental impact was confirmed or possible, and one listing noted that it was not anticipated. One listing was for a fire/explosion in 2010. Environmental impact was confirmed.	No
2535 Blackwell Street	Located approximately 145 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One SPL listing for Mr. Refill International Inc. for a release of windshield fluid to catch basin in 2005. Environmental impact (surface water) was possible.	No
2740 Sheffield Road	Located approximately 175 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One SPL listing for Day & Ross Inc. for a release of an unknown quantity of waste oil in 2010. Environmental impact was not anticipated.	No
Sheffield Road and Bantree Street	Located approximately 180 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One SPL listing for 4Refuel Canada Ltd. for a release of 20 L of diesel fuel in 2018.	No
1280 Leeds Avenue (now Humber Place)	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One PINC listing for a natural gas pipeline strike in 2011.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
1275 Leeds Avenue (now Humber Place)	Located approximately 240 m to the west of the Phase One Property and inferred hydraulically upgradient.	One SPL listing for Thermal King for a release of 2 L of diesel in 2006. Environmental impact was not anticipated.	No

Summary

The on-Site fluid releases are indicative of operations associated with the following on-Site PCAs resulting in APECs (see **Figure 4 of Appendix A**):

- Releases of diesel fuel are presumed to be indicative of on-Site diesel fueling operations (Gasoline and Associated Products Storage in Fixed Tanks; PCA #2); and
- Releases of oil/hydraulic/antifreeze fluids are presumed to be indicative of on-Site trucking operations (Commercial Trucking and Container Terminals; PCA #3).

The atmospheric release listings for the Phase One Property are not indicative of subsurface contamination and therefore are not considered to be on-Site PCAs.

Based on the information provided in the listings, one off-Site release is presumed to be indicative of operations associated with the following off-Site PCA resulting in an on-Site APEC (see **Figure 4 of Appendix A**):

- 2575 Sheffield Road (located on the adjoining property to the north and inferred hydraulically cross/downgradient of the Phase One Property) was occupied by American Iron & Metal GP Inc. with a listing for a release of an unspecified quantity of hydrocarbon fluid (Salvage Yard; PCA #12).

None of the remaining listings are considered to represent on or off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the nature of the listings (i.e., pertaining to gaseous releases, releases of hazardous substances of miniscule quantities (i.e., ≤ 10 L), indicate that environmental impact was ‘not anticipated’, or are not considered to be indicative of releases [e.g., fire/explosions]) and/or distances, and/or directions relative to the projected direction of groundwater flow.

4.2.6 Waste Management Records

A search of the ‘*Ontario Regulation 347 Waste Generators Summary*’ (GEN) (1986 – November 30, 2021) and ‘*Ontario Regulation 347 Waste Receivers Summary*’ (REC) (1986 – 2019) databases identified 18 GEN listings for the Phase One Property:

- National Grocers Company Limited/Loblaws Inc. was registered as a Generator (#ON0129101) of various hazardous wastes including petroleum distillates and waste oils and lubricants from 1986 to 2020. This operation was also listed as a generator of oil skimmings and sludges from 1992 to as of November 2021, and as a generator of wastes from the use of pigments, coatings and paints, alkaline solutions – containing heavy metals, pathological wastes, acid solutions – containing other metals and non-metals, misc. wastes and inorganic chemicals, acid solutions – containing heavy metals, light fuels, inert organic wastes, PCBs, waste compressed gases including cylinders, misc. wastes organic chemicals, other specified inorganic sludges, slurries or solids, alkaline solutions – containing other metals and non-metals (not cyanide) from 2000 to as of November 2021. It is noted that regulatory requirements for reporting waste generation was initiated in 1986 and, as such, hazardous waste generation by this operation may precede this date.

In addition, 308 GEN listings, and 6 REC listings were identified for properties located within the Phase One Study Area, as follows:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2575 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Nine GEN listings for American Iron & Metal Company Inc./American Iron and Metal LP (#ON7925570/#ON3828897) for various hazardous wastes including emulsified oils, transfer station oils wastes, aliphatic solvents, light fuels, waste oils & lubricants, acid wastes, other specified inorganics, and oil skimmings & sludges from 2012 and as of November 2021.	Yes
		Two GEN listings for Colautti Construction Ltd. (#ON5167964) for various hazardous wastes including aliphatic solvents, polymeric resins, paint/pigment/coating residues, alkaline wastes, waste oils & lubricants, and amines from 2016 to 2017.	No
		Three GEN listings for Greenbelt R.W. Tomlinson Ltd. (#ON8246981) for various hazardous wastes including acid solutions, aliphatic solvents, and inorganic and organic chemicals from 2018 to 2019.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		Two GEN listings for J. Connelly Rental Ltd. (#ON6524186) from petroleum distillates and waste oils & lubricants in 2020 and as of November 2021.	No
2575 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Five GEN listings for Ottawa Regional Hospital Linen Service Inc./O.R.H.L.S. Inc. (#ON2209700/ON#0982200) for various hazardous wastes including petroleum distillates, pathological wastes, waste oils & lubricants, organic and inorganic laboratory chemicals, other polymeric wastes, halogenated solvents, amines, paint/pigment/coating residues, waste compressed gases, acid and alkaline wastes, reactive anion wastes, aliphatic solvents from 1986* to 2009.	Yes
		One GEN listing for Sheffield Limited Partnership (#ON4766695) for aliphatic solvents.	No
2585 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	One GEN listing for Hospital Food Services Ontario Inc. (#ON2025400) for various hazardous wastes including alkaline wastes, light fuels, paint/pigment/coating residues, aliphatic solvents, waste compressed gases, petroleum distillates, waste oils & lubricants, and pathological wastes from 1995 to 2006.	No
1350 Leeds Avenue (now Humber Place)	Located approximately 25 m to the south of the Phase One Property and inferred hydraulically crossgradient.	One GEN listing for Canadian Waste Services Inc. (#ON2160036) for various hazardous wastes including oil skimmings & sludges, aromatic solvents, aliphatic solvents, petroleum distillates, and waste oils & lubricants from 1997 to 2001.	Yes
		Three GEN listings for Laidlaw Waste Systems (#ON0111722) for waste oils & lubricants from 1990 to 1998.	Yes

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		Two GEN listings for Modern Niagara Group, a (#ON9470742) for various hazardous wastes including waste oils & lubricants, graphic arts wastes, aliphatic solvents, miscellaneous organic and inorganic chemicals, and paint/pigment/coating residues from 2020 to as of November 2021.	Yes
		One GEN listing for Rideau Auctions (#ON3226618) for waste oils & lubricants and paint/pigment/coating residues in 2013.	No
2590 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Two GEN listings for Advance Coring & Cutting Ltd. (#ON6386886) for waste oils & lubricants in 2020 and 2021.	No
		Two GEN listings for Roofers World Inc. (#ON6581840) for aromatic solvents in 2013 and 2014.	No
		One GEN listing for Weston Foods (#ON6081084) for various hazardous wastes including acid and alkaline wastes, paint/pigment/coating residues, other specified inorganics, inorganic and organic laboratory chemicals, oil skimmings & sludges, waste oils & lubricants, and waste compressed gases from 2002 to 2004.	No
2612 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One GEN listing for B.J. Maheral Trucking Ltd. (#ON4388943) for aliphatic solvents and waste oils & lubricants from 2002 to 2004.	Yes
		One GEN listing for Multi-Drain Inc. (#ON7477660) for waste oils & lubricants from 2005 to 2008.	No
		10 GEN listings for Organic Resource Management Inc./Walker Environmental Group Inc. (#ON2607297) for various hazardous wastes including alkaline phosphates, organic chemicals, inorganic acid wastes, and waste	Yes

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		oils & lubricants from 2010 and as of November 2021.	
2616 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Nine GEN listings for 9752935 Canada Inc./Capital Textile Restoration Ottawa Inc., (dry cleaning and laundry services; #ON7307394) for petroleum distillates from 2011 and as of November 2021.	Yes
		One GEN listing for Commercial Finishing and Cabinetry Inc./Furniture Medic (#ON1613494) for aromatic solvents from 2003 to 2006.	No
2644 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One GEN listing (#ON2141000) for waste oils & lubricants from 1996 to 2001.	No
2660 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Four GEN listings for BNR Equipment/754643 Ontario Limited (#ON0900503) for petroleum distillates and waste oils & lubricants from 1990 to 2000	No
		One GEN listing for Sun Serve Enterprises Limited (bulk dry trucking; ON#0968300) for various hazardous wastes including petroleum distillates, halogenated solvents, oil skimmings & sludges, and waste oils & lubricants from 1988 to 1998.	Yes
2660 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	13 GEN listings for United Rentals of Canada Inc. (ON#2395013) for various hazardous wastes including petroleum distillates, alkaline wastes, light fuels, heavy fuels, oil skimmings & sludges, aliphatic solvents, and waste oils & lubricants from 1999 and as of November 2021.	No
1335 Leeds Avenue (now Humber Place)	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One GEN listing for 614785 Ontario Inc. (#ON2586406) for waste oils & lubricants for the year 2017.	No
		Two GEN listings for Roto-Rooter (#ON0152201) for unspecified wastes from 1988 to 1994.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2540 Sheffield Road	Located approximately 25 m to the northwest of the Phase One Property and inferred hydraulically up/crossgradient.	Three GEN listings for Novatech Disaster Restoration Inc. (#ON3599866) for detergents/soaps and paint/pigment/coating residues from 2003 to 2009.	No
1325 Leeds Avenue (now Humber Place)	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Two GEN listings for Ottawa Lift Truck Limited (#ON0991801) for aliphatic solvents, petroleum distillates, waste oils & lubricants from 1994 to 2001.	No
2715 Sheffield Road	Located approximately 90 m to the south of the Phase One Property and inferred hydraulically crossgradient.	13 GEN listings for Cardinal Couriers Ltd. (#ON9999297) for various hazardous wastes including laboratory chemicals, paint/pigment/coating residues, waste compressed gases, and heavy metal wastes from 2006 and as of November 2021.	No
		One GEN listing for Lorimar Inv (#ON1803600) for PCBs from 1993 to 1998.	No
		One GEN listing for Paul's Transfer & Delivery Ltd. (#ON1501900) for petroleum distillates from 1992 to 1998.	No
1308 Leeds Avenue (now Humber Place)	Located approximately 95 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	Nine GEN listings for Advance Cutting & Coring Ltd. (#ON2024900) for oil skimmings & sludges and waste oils & lubricants from 1995 to 2016.	No
2675 Sheffield Road (address does not exist)	Located approximately 100 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	Two GEN listings for Cooperative-Federe De Quebec (#ON1272400) for waste oils & lubricants from 1989 to 1998.	No
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	16 GEN listings for Arcelormittal Ottawa Inc./Bakermet Inc./American Iron & Metal Company Inc./ American Iron & Metal LP (#ON0583201) for various hazardous wastes including waste compressed gases, emulsified oils, oil skimmings & sludges, petroleum distillates, PCBs, waste oils & lubricants, light fuels, and acid wastes from 1986* and as of November 2021.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2548 Sheffield Road	Located approximately 115 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	Two GEN listings for Metcan Fabricators Inc. (#ON1199701) for aliphatic solvents from 1989 to 1998.	No
		Four GEN listings for T E S Limited (#ON0383000) for paint/pigment/coating residues and waste oils & lubricants from 1986* to 1998.	No
		One GEN listing for W.J. Mowat (#ON0594706) for aliphatic solvents, petroleum distillates, and waste oils & lubricants from 1995 to 1998.	No
2555 Blackwell Street	Located approximately 120 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	One GEN listing for GPM Inc. BridgePort Property Management (#ON8513467) for various hazardous wastes including aromatic solvents, oil skimmings & sludges, waste compressed gases, waste oils & lubricants, and paint/pigment/coating residues in 2013.	No
		Two GEN listings for Mytek (#ON1467100) for alkaline wastes and petroleum distillates from 1992 to 1998.	No
		One GEN listing for Waste Care Services Ltd. (#ON2474501) for various hazardous wastes including petroleum distillates, oil skimmings & sludges, waste oils & lubricants, transfer station oils wastes, paint/pigment/coating residues, and aliphatic solvents from 2001 to 2004. One REC listing for Waste Care Services Ltd. which listed this operation as a transfer station for the years 2001 to 2008.	No
1310 Leeds Avenue (now Humber Place)	Located approximately 125 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	One GEN listing for National Concrete Accessories (#ON4095755) for various hazardous wastes including organic and inorganic chemicals, polymeric resins, paint/pigment/coating	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		residues, acid solutions, waste oils & lubricants, waste compressed gases, and aromatic solvents as of November 2021.	
		Two GEN listings for Duron Services Ltd. (#ON4089544/#ON1195598) for heavy fuels, oil skimmings & sludges, and waste oils & lubricants from 2003 to 2008.	No
		One GEN listing for William Neilson Ltd. (#ON0392201) for unspecified wastes from 1986* to 1994.	No
2595 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	One GEN listing for Abbatec Limited (#A460208) for unspecified wastes in 1986*. One REC listing for Abbatec Limited which listed this operation as a reclaimer/reuse PCB destruction facility for the years 1987 to 1998.	No
		Three GEN listing for Aristotec Generator Services (#ON0869201) for petroleum distillates and waste oils & lubricants from 1988 to 2001.	No
		Two GEN listings for Dynacare Laboratories Limited (#ON0245636) for organic and inorganic laboratory chemicals and pathological wastes from 1993 to 2001.	No
2615 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	Three GEN listings for Abbatec Ltd. (#ON1949000) for photoprocessing wastes in 1986* and from 1994 to 2001. Two REC listings for Abbatec Limited which listed this operation as a reclaimer/reuse PCB destruction facility for the years 1999 to 2008 and a receiver of photoprocessing wastes from 1987 to 2008.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		One GEN listing for Liumar Technologies Corp. Ltd. (#ON4246849) for petroleum distillates from 2002 to 2004.	No
2635 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	Three GEN listings for ArjoHuntleigh Canada Inc. (#ON9794721) for pathological wastes from 2013 to 2015.	No
		Two GEN listings for Black & Decker Canada (#ON9601123) for waste oils & lubricants from 2018 to 2020.	No
		Two GEN listings for KCI Medical Canada, Inc. (#ON4968830) for pathological wastes from 2010 to 2012.	No
2655 Blackwell Street	Located approximately 145 m to the west of the Phase One Property and inferred hydraulically upgradient.	Two GEN listings for Ascot Alternator (#ON1118600) for petroleum distillates from 1988 to 1998.	No
		Three GEN listings for Filtran Microcircuits Inc. (electronic parts and computers manufacturing; #ON0437000) for acid wastes from 1986* to 1998.	No
		Two GEN listings for K&K Enterprises (1999) Inc. (#ON2486872/ON#2677800) for petroleum distillates and waste oils & lubricants from 2001 to 2004.	No
2655 Blackwell Street	Located approximately 145 m to the west of the Phase One Property and inferred hydraulically upgradient.	One GEN listing for Kirouac Fluid Industries Inc. (#ON2775262) for waste oils & lubricants for the year 2006.	No
2675 Blackwell Street	Located approximately 145 m to the west of the Phase One Property and inferred hydraulically upgradient.	Three GEN listings for Bizerba (#ON1082402) for waste oils & lubricants from 1990 to 1998.	No
2575 Blackwell Street	Located approximately 145 m to the west of the Phase One Property and inferred hydraulically up/crossgradient.	Two GEN listings for Colonnade Bridgeport ITF GPM for waste oils & sludges for 2020 and 2021.	No
		One GEN listing for Rideau Bathtub Reglazing (#ON4262858) for petroleum distillates in 2007 and 2008.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2535 Blackwell Street	Located approximately 145 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One GEN listing for 1649330 Ontario Inc. (#ON3626982) for waste oils & lubricants for the year 2017.	No
		One GEN listing for A. Valley Insulation Ltd. (#ON8862845) for unspecified wastes for the year 2004.	No
		Two GEN listings for Capital Hydraulics and Pneumatics (#ON1326800) for petroleum distillates from 1992 to 1998).	No
		Eight GEN listings for Chroma Wood Finishing (#ON9006595) for paint/pigment/coating residues from 2012 and as of November 2021.	No
		One GEN listing for Colonnade Bridgeport (#ON8278461) for light fuels for the year 2016.	No
2535 Blackwell Street	Located approximately 145 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One GEN listing for Fiera Real Estate Investments Limited (#ON3647901) for waste oils & lubricants as of November 2021.	No
		Four GEN listings for Liftow Ltd. (#ON0221204) for petroleum distillates and waste oils & lubricants from 1986* to 1990 and 1998.	No
		Two GEN listings for Mak's Machining Inc. (#ON3115794) for emulsified oils in 2020 and 2021.	No
		Two GEN listings for Mowat Express (courier service; #ON0594703) for petroleum distillates, aliphatic solvents, and waste oils & lubricants from 1992 to 1998.	No
		One GEN listing for Mr. Refill (#ON6248983) for light fuels in 2013.	No
		Two GEN listings for Mytek Power Tools Service (#ON1467101) for oil skimmings & sludges, alkaline	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		wastes, and petroleum distillates from 1995 to 2009.	
		Four GEN listings for PCL General Holdings Ltd. (#ON7889789) for various hazardous wastes including aromatic and aliphatic solvents, emulsified oils, paint/pigmentation/coating residues, inorganic and organic laboratory chemicals, and waste oils & lubricants from 2002 to 2011.	No
2535 Blackwell Street	Located approximately 145 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	14 GEN listings for S.L. Ross Environmental Research Limited (#ON0303900) for aromatic and aliphatic solvents, halogenated solvents, heavy fuels, and oil skimmings & sludges from 1986* and as of November 2021.	No
1290 Leeds Avenue (now Humber Place)	Located approximately 160 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	One GEN listing for Mountain Press Incorporated (#ON1984134) (other ornamental and architectural metal products manufacturing) for unspecified wastes for the year 2004.	No
		Six GEN listings for Foil Impressions Incorporated (#ON4532264) for acid wastes from 2006 to 2014.	No
2755 Sheffield Road	Located approximately 165 m to the south of the Phase One Property and inferred hydraulically crossgradient.	One GEN listing for Unimix (#ON0418627) for PCBs from 1997 to 2001.	No
2740 Sheffield Road	Located approximately 175 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One listing for Brazeau Transport Inc. / Transport Cabano Inc. (#ON0702906) for waste oils & lubricants and petroleum distillates from 1986* to 1998.	No
		Three GEN listings for Day and Ross Transportation Group (#ON6809623) for acid waste and waste oils & lubricants from 2009 to 2011.	No
		One GEN listing for Grant P. McDonald Holdings (#ON7040064) for various hazardous wastes including	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		aliphatic solvents, petroleum distillates, light fuels, oil skimmings & sludges, and waste oils & lubricants from 2004 to 2006.	
		Two GEN listings for Pauls Transfer and Delivery Ltd. (#ON1501901) for petroleum distillates and waste oils & lubricants from 1992 to 1998.	No
		One GEN listing for Rush Truck Centres of Canada (#ON6042271) for other specified inorganics in 2021.	No
1280 Humber Place	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	Eight GEN listings for Stericycle, ULC (#ON4839367) for various hazardous wastes including aromatic and aliphatic solvents, inorganic and organic chemicals, polymeric resins, pharmaceuticals, detergents and soaps, photoprocessing wastes, other specified inorganics, polymeric wastes, inert organic wastes, halogenated and non-halogenated pesticides, acid, alkaline, and neutral solutions, paint/pigment/coating residues, inorganic and organic acid wastes, halogenated solvents, petroleum distillates, waste oils & lubricants, waste compressed gases, pathological wastes, latex wastes, light fuels, emulsified oils from 2012 and as of November 2021. Two REC listings for Stericycle, ULC which listed this operation as a transfer station for the years 2011 to 2019.	No
		12 GEN listings for The Salvation Army Eastern Ontario Recycling Centre (#ON9882294) for various hazardous wastes including inorganic acid wastes, amines, paint/pigment/coating residues, inorganic and organic chemicals,	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		waste oils & lubricants, acid and alkaline solutions, aliphatic solvents, non-halogenated pesticides, waste compressed gases, petroleum distillates as of November 2021.	
1270 Leeds Avenue (now Humber Place)	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One GEN listing for Etrilum Light Inc. (#ON3242910) for PCBs for the year 2017.	No
		Two GEN listings for YRC Freight/YRC Reimer Express Lines Ltd. (#ON9844571/#ON3669211) for waste oils & lubricants and oil skimmings & sludges in 2013 and 2018.	No
1275 Leeds Avenue (now Humber Place)	Located approximately 240 m to the west of the Phase One Property and inferred hydraulically upgradient.	Two GEN listings for GC Surplus (#ON8146536) for organic and inorganic laboratory chemicals from 2016 to 2018.	No
		One GEN listing for Industry Canada (#ON8823523) for unspecified wastes in 2012.	No
		Six GEN listings for Public Works and Government Services Canada (#ON9970168) for halogenated pesticides and organic laboratory chemicals from 2007 to 2014.	No
2570 Blackwell Street	Located approximately 240 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	One GEN listing for ECr Elevator Cab Renovations (#ON3668465) for paint/pigment/coating residues and oils, skimmings & sludges as of November 2021.	No
		Three GEN listings for Roto-Rooter / Sewer Rootter Ltd. (#ON0152202) for waste oils & lubricants from 1992 to 2001.	No

Notes:

* It is noted that regulatory requirements for reporting waste generation was initiated in 1986 and, as such, hazardous waste generation by this operation may precede this date.

Summary

Based on the information provided in the listings, the hazardous wastes generated at the Phase One Property are indicative of operations associated with the following on-Site PCA resulting in an APEC (see **Figure 4** of **Appendix A**):

- The generation of various hazardous waste streams from 1986 to 2021 associated with the operation of a grocery distribution centre with vehicle maintenance (Commercial Trucking and Container Terminals; PCA #3).

Based on the information provided in the listings, hazardous waste generation is indicative of operations associated with the following off-Site PCAs resulting in on-Site APECs (see **Figure 4** of **Appendix A**):

- 2575 Sheffield Road (located on the adjoining property to the north and inferred hydraulically cross/downgradient of the Phase One Property) was occupied by Ottawa Regional Hospital Linen Service Inc. This operation was registered as a generator of various hazardous wastes including halogenated solvents associated with laundry and dry cleaning services. Furthermore, this property was occupied by American Iron & Metal Company. This operation was registered as a generator of various hazardous wastes associated with scrap metal operations (Operation of Dry Cleaning Equipment and Salvage Yard; PCA #12);
- 1350 Humber Place (located approximately 25 m to the south of the Phase One Property and inferred hydraulically crossgradient) was occupied by Canadian Waste Services Inc. and Laidlaw Waste Systems. Both operations were registered as generators of various hazardous wastes associated with the operation of a waste transfer station. Furthermore, this property was occupied by Modern Niagara Group. This operation was registered as a generator of various hazardous wastes associated with sheet metal manufacturing (Waste Disposal and Waste Management and Metal Fabrication; PCA #14)
- 2612 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by B.J. Maheral Trucking Ltd. This operation was registered as a generator of various hazardous wastes associated with commercial trucking. Furthermore, this property was occupied by Organic Resource Management Inc. / Walker Environmental Group Inc. This operation was registered as a generator of various hazardous wastes associated with an organic waste processing facility (Commercial Trucking and Container Terminals and Waste Disposal and Waste Management; PCA #17);
- 2616 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Capital Textile Restoration. This operation was registered as a generator of petroleum distillates associated with laundry,

dry cleaning and textile processing operations (Operation of Dry Cleaning Equipment and Textile Manufacturing and Processing; PCA #17); and

- 2660 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Sun Serve Enterprises Limited. This operation was registered as a generator of various hazardous wastes associated with commercial trucking. (Commercial Trucking and Container Terminals; PCA #19).

None of the remaining listings are considered to represent off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the nature of the operations, and/or distances, and/or directions relative to the projected direction of groundwater flow.

4.2.7 Records Submitted to the Ministry

A search of the ‘*Certificates of Property Use*’ (CPU) (1994 – December 31, 2021), ‘*Environmental Effects Monitoring*’ (EEM) (1992 – 2007), ‘*Environmental Issues Inventory System*’ (EIIS) (1992 – 2001), ‘*Contaminated Sites on Federal Land*’ (FCS) (June 2000 – November 2021), and ‘*Waste Water Discharger Registration Database*’ (SRDS) (1990 – December 31, 2018) databases did not identify any listings for the Phase One Property.

In addition, one FCS listing was identified for a property located within the Phase One Study Area, as follows:

Property Address	Location Relative to the Phase One Property	Listing	O. Reg. 153/04 Schedule D Table 2	Off-Site PCA that Contributes to an on-Site APEC?
Walkley & Highway 417	Located approximately 30 m to the east of the Phase One Property and inferred hydraulically downgradient.	One FCS listing for metals in soil, groundwater, and surface water and PAHs in surface water. The Site status is active. According to the listing, detailed testing has been completed and a remedial action plan is under development. The listing also notes that contamination is ‘ <i>Not a Priority for Action</i> ’.	NA	No

Summary

Due to the distance from the Phase One Property and the direction relative to the projected direction of groundwater flow, the off-Site listing above is not considered to represent an off-Site PCA contributing to an on-Site APEC at the Phase One Property.

4.2.8 Fuel Storage Tanks Information

A search of the ‘Aboveground Storage Tanks’ (AST) (May 31, 2014), ‘Commercial Fuel Oil Tanks’ (CFOT) (May 31, 2021), ‘Delisted Fuel Tanks’ (DTNK) (May 31, 2021), ‘List of Expired Fuels Safety Facilities’ (EXP) (May 31, 2020), ‘Fuel Storage Tank’ (FST) (May 31, 2021), ‘Fuel Storage Tank – Historic’ (FSTH) (Pre-January 2010), ‘TSSA Historic Incidents’ (HINC) (2006 – June 2009), ‘Private and Retail Fuel Storage Tanks’ (PRT) (1989 – 1996), ‘Retail Fuel Storage Tanks’ (RST) (1999 – September 30, 2021), ‘Anderson’s Storage Tanks’ (TANK) (1915 – 1953), and ‘TSSA Variances for Abandonment of Underground Storage Tanks’ (VAR) (May 31, 2021), identified two FST, two FSTH, and one PRT listing for the Phase One Property:

- Two FST and two FSTH records were identified for the Site for two 35,000 L (9,246 gallon) diesel USTs operated by National Grocers Co Ltd (National Grocers). The records indicated that the USTs were of single-walled fiberglass construction and were installed in 1993. The records further indicated that the USTs were active as of December 2008; and
- One undated PRT record pertaining to National Grocers for the operation of a private, 45,460 L (12,010 gallon) capacity fuel tank. No further details, including whether the tank is/was aboveground or underground, were provided in the record.

The following 17 DTNK listings, six FST listings, one FSTH listing, and six PRT listings were identified for other properties located within the Phase One Study Area:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2660 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Four DTNK listings for BNR Equipment Rentals for an expired propane cylinder refill centre as of March 2012. One PRT listing for a retail fuel facility with an expiry date of 31 March 1992.	No
		Two DTNK listings for United Rentals – Ottawa Branch for an expired propane cylinder refill centre as of March 2012.	No
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	One FST listing for Bakermet Inc. for one 4,540 L diesel AST. The AST was of single-walled steel construction. One PRT listing for a private 68,190 L fuel tank.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2755 Sheffield Road	Located approximately 165 m to the south of the Phase One Property and inferred hydraulically crossgradient.	<p>Three DTNK listings for Miron Canada Inc. for an expired self-serve private fuel outlet and associated piping as of March 2012.</p> <p>One FST listing for Miron Canada Inc. for one 45,400 L diesel UST. The UST was of single-walled fiberglass construction and was installed in 1992. The UST was active as of August 2007.</p> <p>One PRT listing for Miron Canada Inc. for a private 45,000 L fuel tank.</p>	No
2740 Sheffield Road	Located approximately 175 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	<p>Three DTNK listings for Cabano Transport Inc. for an expired self-serve private fuel outlet and associated piping as of March 2012.</p> <p>One FST listing for Cabano Transport Inc. for one 25,000 L diesel UST. The UST was of single-walled steel construction and was installed in 1984.</p> <p>One PRT listing for Cabano Transport Inc. for a private 25,000 L fuel tank.</p>	No

Summary

Based on the information provided in the listings, the following on-Site PCA resulting in an APEC was identified (see **Figure 4** of **Appendix A**):

- Approval documentation for the operation of two single-walled 35,000 L diesel USTs at the Phase One Property and one record pertaining to the operation of a private 45,460 L fuel tank. (Gasoline and Associated Products Storage in Fixed Tanks; PCA #2).

None of the listings within the Phase One Study Area are considered to represent off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the nature of the listings (i.e., pertaining to a propane refill centre), and/or distances, and/or directions relative to the projected direction of groundwater flow.

4.2.9 Notices and Instruments, including Records of Site Condition

A search of the 'Record of Site Condition' (RSC) (1997 – September 2021; October 2004 – December 2021) databases did not identify any listings for the Phase One Property or for other properties located within the Phase One Study Area.

4.2.10 Landfill Information

A search of the 'Anderson's Waste Disposal Sites' (ANDR) (1860s – Present), 'Landfill Inventory Management Ontario' (LIMO) (February 28, 2019), 'Waste Disposal Sites – MOE CA Inventory' (WDS) (October 2011 – November 30, 2021), and 'Waste Disposal Sites – MOE 1991 Historical Approval Inventory' (WSDH) (Up to October 1990) databases did not identify any listings for the Phase One Property; however, 2 ANDR listings and 13 WDS listings were identified for other properties within the Phase One Study Area:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2575 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Two WDS listings for American Iron & Metal Company Inc. in relation to the operation of an end of life vehicle waste disposal site.	Yes
1350 Humber Place	Located approximately 25 m to the south of the Phase One Property and inferred hydraulically crossgradient.	Two WDS listings for Canadian Waste Services Inc. in relation to the operation of a processing facility. According to the listings, the site ceased processing waste materials in March 2000 and the property was vacant by April 2000.	Yes
2612 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Four WDS listings for Organic Resource Management Inc./Walker Environmental Group Inc. in relation to the operation of a grease and food waste processing and transfer facility.	Yes
2555 Blackwell Street	Located approximately 120 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	One WDS listing for Waste Care Services Ltd. in relation to the operation of a solid and liquid industrial waste processing and transfer facility.	No
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Two ANDR listings for 'Sheffield Junkyard' operated by Baker Bros Iron & Metal Co Ltd. According to the listing, this facility operated from 1972 to 1980.	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
1280 Leeds Avenue (now Humber Place)	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	Four WDS listings for Stericycle, ULC in relation to the operation of a biomedical and hazardous and non-hazardous industrial waste processing facility.	No

Summary

The following off-Site PCAs resulting in an on-Site APECs were identified (see **Figure 4** of **Appendix A**):

- 2575 Sheffield Road (located on the adjoining property to the north and inferred hydraulically cross/downgradient of the Phase One Property) was occupied by American Iron & Metal Company Inc. for the operation of an end of life vehicle disposal site (Salvage Yard; PCA #12);
- 1350 Humber Place (located approximately 25 m to the south of the Phase One Property and inferred hydraulically crossgradient) was occupied by Canadian Waste Services Inc. for the operation of a waste processing facility (Waste Disposal and Waste Management; PCA #14); and
- 2612 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Organic Resource Management Inc. / Walker Environmental Group Inc. for the operation of an organic waste processing facility (Waste Disposal and Waste Management; PCA #17).

None of the remaining listings are considered to represent off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the distances and/or directions relative to the projected direction of groundwater flow.

4.2.11 Chemical Use Information

A search of the *'Dry Cleaning Facilities'* (CDRY) (January 2004 – December 2019), *'Chemical Manufacturers and Distributors'* (CHEM) (1999 – January 31, 2020), and *'Chemical Register'* (CHM) (1999 – September 30, 2021) databases did not identify any listings for the Phase One Property, or for other properties located within the Phase One Study Area.

4.2.12 Aggregate and Mining Information

A search of the *'Abandoned Aggregate Inventory'* (AAGR) (September 2002), *'Aggregate Inventory'* (AGR) (Up to November 2021), *'Abandoned Mine Information System'* (AMIS) (1800 – October 2018), *'Canadian Mine Locations'* (MINE) (1998 – 2009), and the *'Mineral*

Occurrences' (MNR) (1846 – December 2020) databases did not identify any listings for the Phase One Property, or for other properties located within the Phase One Study Area.

4.2.13 Other Database Listings

A search of the '*Automobile Wrecking & Supplies*' (AUWR) (1999 – September 30, 2021), '*ERIS Historical Searches*' (EHS) (1999 – November 30, 2021), '*Canadian Pulp and Paper*' (PAP) (1999, 2002, 2004, 2005, 2009 – 2014), and '*Scott's Manufacturing Directory*' (SCT) (1992 – March 2011) databases identified 13 EHS listings for the Phase One Property:

- The Phase One Property is listed for EHS reports dated 2003, 2009, and 2020 were identified for the Site.

In addition, a total of 66 EHS listings were identified for other properties located within the Phase One Study Area, which are potentially indicative of previous historical or environmental investigation efforts.

A total of 7 AUWR listings and 41 SCT listings were identified for other properties located within the Phase One Study Area, as follows:

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
2585 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Two SCT listings for Hospital Food Service Ontario Inc. under NAICS codes 2038 (Frozen Specialties), 2099 (Food Preparations), 311410 (Frozen Food Manufacturing), and 311990 (All Other Food Manufacturing).	No
		One SCT listing for Healthcare Food Service under NAICS codes 311410 (Frozen Food Manufacturing) and 311990 (All Other Food Manufacturing).	No
2575 Sheffield Road	Located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient.	Two SCT listings for Active Scale Manufacturing Inc. under NAICS codes 417910 (Office and Store Machinery and Equipment Wholesaler-Distributors), 417230 (Industrial Machinery, Equipment and Supplies Wholesaler-Distributors), 417930 (Professional Machinery, Equipment and Supplies Wholesaler-Distributors).	No
2574 Sheffield Road	Located approximately 25 m to the northwest of the Phase One Property and	One SCT listing for C-COM Satellite Systems Inc. under NAICS codes 334210 (Telephone Apparatus	Yes

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
	inferred hydraulically crossgradient.	Manufacturing), and 334220 (Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing).	
2590 Sheffield Road	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Two SCT listings for Bronson Bakery Ltd. under NAICS codes 413190 (Other Specialty-Line Food Wholesaler-Distributors), 2051 (Bread and Other Bakery Products), and 311814 (Commercial Bakeries and Frozen Bakery Product Manufacturing).	No
		One SCT listing for Canmade Metal Products Inc. under NAICS codes 332329 (Other Ornamental and Architectural Metal Product Manufacturing) and 332999 (All Other Miscellaneous Fabricated Metal Product Manufacturing).	Yes
		One SCT listing for Roofers World Inc. under NAICS codes 238160 (Roofing Contractors), 444130 (Hardware Stores), 416390 (Other Specialty-Line Building Supplies Wholesaler-Distributors), and 332510 (Hardware Manufacturing).	No
		One SCT listing for Soprema Inc. under NAICS codes 418410 (Chemical and Allied Product Wholesaler-Distributors) and 416310 (General-Line Building Suppliers Wholesaler-Distributors).	No
1325 Leeds Avenue (now Humber Place)	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	One AUWR listing for Sheffield Auto Service in relation to the operation of an automobile parts and supplies facility.	Yes
		One SCT listing for Rapco Equipment Inc. under NAICS codes 417210 (Construction and Forestry Machinery, Equipment and Supplies Wholesaler-Distributors), 416390 (Other Specialty-Line Building Supplies Wholesaler-Distributors), and 416310 (General-Line Building Supplies Wholesaler-Distributors).	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
1335 Leeds Avenue (now Humber Place)	Located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient.	Two SCT listings for Tera Reproduction Inc./Terra Reproductions Inc. under NAICS codes 323115 (Digital Printing), 323119 (Other Printing), 323120 (Support Activities for Printing), 541430 (Graphic Design Services), 334110 (Computer and Peripheral Equipment Manufacturing), and 511210 (Software Publishers)	Yes
2715 Sheffield Road	Located approximately 90 m to the south of the Phase One Property and inferred hydraulically crossgradient.	One SCT listing for Beechwood Steel Supply under NAICS code 3441 (Fabricated Structural Metal)	No
1308 Leeds Avenue (now Humber Place)	Located approximately 95 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	One SCT listing for Advance Cutting & Coring Ltd. under NAICS codes 213117 (Contract Drilling) and 238299 (All Other Building Equipment Contractors).	No
2555 Sheffield Road	Located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient.	One AUWR listing for AIM Recycling Group Inc. in relation to the operation of a scrap metal facility.	No
		Three AUWR listings for Bakermat Inc. in relation to the operation of a scrap metal facility.	No
2548 Sheffield Road	Located approximately 115 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	One SCT listing for Canadian Braille Press Inc. under NAICS code 323119 (Other Printing).	No
2555 Blackwell Street	Located approximately 120 m to the northwest of the Phase One Property and inferred hydraulically crossgradient.	Two SCT listings for Dimension Cabinet & Millwork under NAICS codes 337215 (Showcase, Partition, Shelving, and Locker Manufacturing), 321919 (Other Millwork), 337123 (Other Wood Household Furniture Manufacturing), 337110 (Wood Kitchen Cabinet and Counter Top Manufacturing), and 321911 (Wood Window and Door Manufacturing).	No
		One SCT listing for Xpress Printing Service under NAICS codes 323115 (Digital Printing), 323119 (Other Printing), and 323114 (Quick Printing).	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
1310 Leeds Avenue (now Humber Place)	Located approximately 125 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	One SCT listing for Braycor Ltd. under NAICS codes 321999 (All Other Miscellaneous Wood Product Manufacturing), 418410 (Chemical and Allied Product Wholesaler-Distributors), 325520 (Adhesive Manufacturing), 332210 (Cutlery and Hand Tool Manufacturing), 332329 (Other Ornamental and Architectural Metal Product Manufacturing), 327910 (Abrasive Product Manufacturing), 417230 (Industrial Machinery, Equipment, and Supplies Wholesaler-Distributors), 332910 (Metal Valve Manufacturing), 416120 (Plumbing, Heating, and Air-Conditioning Equipment and Supplies Wholesaler-Distributors), 325999 (All Other Miscellaneous Chemical Product Manufacturing), and 238110 (Poured Concrete Foundation and Structure Contractors).	No
2595 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	One AUWR listing for Recycling Trans-Cat in relation to the operation of a scrap metal facility.	No
		One SCT listing for Canadian Braille Press Inc. under NAICS code 323119 (Other Printing).	No
		Two SCT listings for Graphix Inc. under NAICS code 339950 (Sign Manufacturing).	No
2595 Blackwell Street	Located approximately 140 m to the west of the Phase One Property and inferred hydraulically upgradient.	One SCT listing for Spincraft Electric Boats Ltd. under NAICS codes 811310 (Commercial and Industrial Machinery and Equipment Repair and Maintenance) and 336612 (Boat Building)	No
		One SCT listing for The Print Shack Ltd. under NAICS codes 323114 (Quick Printing), 323115 (Digital Printing), and 323119 (Other Printing).	No
2655 Blackwell Street	Located approximately 145 m to the west of the Phase	One SCT listing for Ascot Alternator under NAICS codes 333611 (Turbine and Turbine	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
	One Property and inferred hydraulically upgradient.	Generator Set Unit Manufacturing) and 336320 (Motor Vehicle Electrical and Electronic Equipment Manufacturing).	
		One SCT listing for Kirouac Fluid Industries Inc. under NAICS codes 326220 (Rubber and Plastic Hose and Belting Manufacturing) and 332810 (Coating, Engraving, Heat Treating and Allied Activities).	No
2535 Blackwell Street	Located approximately 145 m to the northwest of the Phase One Property and inferred hydraulically cross/upgradient.	One AUWR listing for Japan Power in relation to the operation of an automobile parts & supplies (tire, battery, parts, and accessories) facility.	No
		Two SCT listings for Alltech Machine Shop & Welding under NAICS code 332710 (Machine Shops)	No
		One SCT listing for Mr. Refill International Inc. under NAICS codes 325610 (Soap and Cleaning Compound Manufacturing), 325999 (All Other Miscellaneous Chemical Product Manufacturing), and 325190 (Other Basic Organic Chemical Manufacturing).	No
		One SCT listing for The Print Shack Ltd. under NAICS codes 323115 (Digital Printing), 323119 (Other Printing), and 323114 (Quick Printing).	No
1290 Leeds Avenue (now Humber Place)	Located approximately 160 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient.	One SCT listing for Foil Impressions Inc. under NAICS codes 323115 (Digital Printing), 323119 (Other Printing), 323120 (Support Activities for Printing), and 323114 (Quick Printing).	No
1280 Leeds Avenue (now Humber Place)	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One SCT listing for Cape Marketing Enterprises under NAICS code 419120 (Wholesale Trade Agents and Brokers).	No
		Two SCT listings for Saputo Foods Ltd./Saputo Inc. - Cheese Division under NAICS codes 5143 (Dairy Products, Except Dried or Canned), 5147 (Meat and Meat Products),	No

Property Address	Location Relative to the Phase One Property	Listing	Off-Site PCA that Contributes to an on-Site APEC?
		5149 (Groceries & Related Products, Not Elsewhere Classified), 413120 (Dairy and Milk Products Wholesaler-Distributors), 413160 (Red Meat and Meat Product Wholesaler-Distributors), and 413190 (Other Specialty-Line Food Wholesaler-Distributors).	
1270 Leeds Avenue (Now Humber Place)	Located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient.	One SCT listing for Warnaco of Canada Company under NAICS codes 315229 (Other Men's and Boys' Cut and Sew Clothing Manufacturing) and 315239 (Other Women's and Girls' Cut and Sew Clothing Manufacturing).	No
1275 Leeds Avenue (now Humber Place)	Located approximately 240 m to the west of the Phase One Property and inferred hydraulically upgradient.	One SCT listing for Saputo Dairy Products Canada under NAICS codes 413120 (Dairy and Milk Products Wholesaler-Distributors), 413160 (Red Meat and Meat Product Wholesaler-Distributors), and 413190 (Other Specialty-Line Food Wholesaler-Distributors).	No

Summary

The EHS listings for the Phase One Property are indicative of previous historical or environmental investigation efforts but are not necessarily indicative of chemical/waste storage activities or releases. Therefore, these listings are not considered to represent an on-Site PCA.

The following off-Site PCAs resulting in on-Site APECs were identified (see **Figure 4** of **Appendix A**):

- 2574 Sheffield Road (located approximately 25 m to the northwest of the Phase One Property and inferred hydraulically crossgradient) was occupied by C-COM Satellite Systems Inc. for various communications electronic manufacturing operations (Electronic and Computer Equipment Manufacturing; PCA #15);
- 2590 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Canmade Metal Products Inc. for various metal product manufacturing operations (Metal Fabrication; PCA #16);
- 1325 Leeds Avenue (now Humber Place; located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Sheffield Auto

Service for automobile parts and supplies operations (Commercial Autobody Shops; PCA #20); and

- 1335 Leeds Avenue (now Humber Place; located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient) was occupied by Tera Reproduction Inc. / Terra Reproductions Inc. for commercial printing operations (Ink Manufacturing, Processing, and Bulk Storage; PCA #20).

None of the remaining listings are considered to represent off-Site PCAs contributing to on-Site APECs at the Phase One Property due to the nature of operations and/or distances and/or directions relative to the projected direction of groundwater flow.

4.3 Regulatory Records

4.3.1 Ontario Ministry of the Environment, Conservation and Parks (MECP)

Geosyntec submitted a request to the MECP under the Freedom of Information and Protection of Privacy Act (FOI) for information pertaining to the Phase One Property on 7 July 2022. A response regarding whether there was information on file for the Phase One Property was outstanding at the time of writing of this report. A copy of the FOI request is provided in **Appendix F**.

4.3.2 Technical Standards and Safety Authority (TSSA)

A request for records related to registered ASTs or USTs storing petroleum-related products, outstanding instructions, incident reports, fuel/oil spills, and/or contamination was submitted to the TSSA on 7 July 2022. Records from the TSSA received on 14 July 2022 indicated that the following USTs are present at the Phase One Property:

Inventory Number	Address	City	Province	Postal Code	Status	Asset Class / Inventory Context
10906767	2625 Sheffield Rd	Ottawa	ON	K1G 3L2	Active	FS Liquid Fuel Tank
10906788	2625 Sheffield Rd	Ottawa	ON	K1G 3L2	Active	FS Liquid Fuel Tank
9242648	2625 Sheffield Rd	Ottawa	ON	K1G 3L2	Active	FS Private Fuel Outlet – Self Serve

Geosyntec notes that these records are consistent with those reviewed in the ERIS database report (see Section 4.2.8) and represent an on-Site PCA resulting in an APEC (PCA #2; see **Figure 4** of **Appendix A**). Copies of the TSSA records are included in **Appendix F**.

4.3.3 Historical Land Use Inventory (HLUI)

Geosyntec submitted a HLUI request to the City for information pertaining to the Phase One Property on 13 October 2022. A response regarding whether there was information on file for the Phase One Property was outstanding at the time of writing of this report. A copy of the HLUI request is provided in **Appendix F**.

4.4 Physical Setting Sources

4.4.1 Aerial Photographs

Aerial photographs covering the Phase One Property and Phase One Study Area were obtained from the ERIS for the years 1946 and 1953. The aerial photographs can be found in **Appendix G**. Additional aerial photographs and satellite images were reviewed online on the City of Ottawa interactive mapping program⁷ for the years 1965, 1976, 1991, 1999, 2002, 2008, 2014, and 2019. Geosyntec’s observations with respect to the Phase One Property are noted as follows:

Year of Aerial Photograph	Phase One Property
1946	The Phase One Property appears to consist of agricultural land (i.e., croplands).
1953	Similar to 1946.
1965	Similar to 1946 but with some ground disturbance (inferred to be related to early grading/development activities).
1976	Two inferred commercial/industrial buildings are evident on the north/central and south portions of the Phase One Property. The northmost building resembles the present-day Site building, absent a later addition to the south side. Rail spurs extending from a main railway on the adjoining lands to the east of the Phase One Property appear to service the south side of the north building, and north side of the south building.
1991	Generally similar to 1976, with the exception that the inferred rail spurs on the central portion of the Phase One Property are no longer observed.
1999	The historical building on the south portion of the Phase One Property is no longer observed, and an addition appears to have been constructed on the south side of the present-day Site building.
2002	Features resembling an AST and two concrete pads (inferred to be related to USTs) are observable on the north central portion of the Phase One Property boundary.
2008	Similar to 2002.
2014	Similar to 2002.
2019	Similar to 2002.

The following table summarizes observations with respect to the surrounding properties located within the Phase One Study Area:

Year of Aerial Photograph	Phase One Study Area
1946	<u>North</u> : Agricultural and residential land usage. <u>East</u> : Linear features are evident in the area of the present-day railway adjacent to the east of the Phase One Property. Green’s Creek is also noted to the east of the Phase One Property.

⁷ <https://maps.ottawa.ca/geottawa/>

Year of Aerial Photograph	Phase One Study Area
	<p><u>South:</u> Agricultural and residential land usage.</p> <p><u>West:</u> Agricultural and residential land usage.</p>
1953	<p><u>North:</u> Similar to 1946.</p> <p><u>East:</u> Similar to 1946.</p> <p><u>South:</u> Similar to 1946.</p> <p><u>West:</u> Similar to 1946.</p>
1965	<p><u>North:</u> Similar to 1953.</p> <p><u>East:</u> Similar to 1953.</p> <p><u>South:</u> Similar to 1953. Humber Place appears to have been constructed on the adjoining lands to the south of the Phase One Property.</p> <p><u>West:</u> Similar to 1953. Sheffield Road appears to have been constructed on the adjoining lands to the west.</p>
1976	<p><u>North:</u> The majority of the present-day commercial/industrial buildings to the north of the Phase One Property appear to have been constructed. Stockpiles of indiscernible materials appear to be stored on the north and central portions of present-day 2575 Sheffield Road.</p> <p><u>East:</u> Similar to 1965.</p> <p><u>South:</u> The majority of the present-day commercial/industrial buildings to the south of the Phase One Property appear to have been constructed.</p> <p><u>West:</u> The majority of the present-day commercial/industrial buildings to the west of the Phase One Property appear to have been constructed.</p>
1991	<p><u>North:</u> Generally similar to present-day, with the exception of an inferred former commercial/industrial building adjacent to the north of the Phase One Property on the southeast portion of present-day 2575 Sheffield Road.</p> <p><u>East:</u> Generally similar to present-day.</p> <p><u>South:</u> Generally similar to present-day.</p> <p><u>West:</u> Generally similar to present-day.</p>
1999	<p><u>North:</u> Similar to 1991.</p> <p><u>East:</u> Similar to 1991.</p> <p><u>South:</u> Similar to 1991.</p> <p><u>West:</u> Similar to 1991.</p>
2002	<p><u>North:</u> Similar to 1991.</p> <p><u>East:</u> Similar to 1991.</p> <p><u>South:</u> Similar to 1991.</p> <p><u>West:</u> Similar to 1991.</p>
2008	<p><u>North:</u> Similar to 1991.</p> <p><u>East:</u> Similar to 1991.</p> <p><u>South:</u> Similar to 1991.</p> <p><u>West:</u> Similar to 1991.</p>
2014	<p><u>North:</u> Similar to 1991, with the exception of the former building located on the southeast portion of present-day 2575 Sheffield Road appears to have been demolished. In addition, the south portion of the present-day building on the southwest portion of this property is no longer observed.</p> <p><u>East:</u> Similar to 1991.</p> <p><u>South:</u> Similar to 1991.</p> <p><u>West:</u> Similar to 1991.</p>

Year of Aerial Photograph	Phase One Study Area
2019	<u>North</u> : Similar to 2014.
	<u>East</u> : Similar to 2014.
	<u>South</u> : Similar to 2014.
	<u>West</u> : Similar to 2014.

Summary

Based on Geosyntec’s review of the aerial photographs, the Phase One Property was developed for agricultural purposes (i.e., croplands) prior to 1946 until approximately 1965. The Site was developed for commercial/industrial purposes between 1965 and 1976. The following on-Site PCAs resulting in on-Site APECs were identified (see **Figure 4 of Appendix A**):

- Visible ground disturbance assumed to be associated with early grading/development was observed in 1965 (Importation of Fill Material of Unknown Quality; PCA #1);
- The presence of a private fuel outlet visible from at least 2002 to present day (Gasoline and Associated Products Storage in Fixed Tanks; PCA #2);
- The presence of rail spurs in the central portion of the Phase One Property from at least 1976 until 1991 (Rail Yards, Tracks, and Spurs; PCA #6);
- The demolition of a former on-Site building in the southern portion of the Phase One Property sometime between 1991 and 1999 (Importation of Fill Material of Unknown Quality; PCA #7).

The aerial photographs indicated that the properties located within the Phase One Study Area have been predominantly developed with commercial and industrial land usage since at least 1976. The following off-Site PCAs resulting in an on-Site APEC were identified from Geosyntec’s review of the aerial photographs (see **Figure 4 of Appendix A**):

- The presence of a railway on the adjoining lands to the east of the Phase One Property constructed prior to 1946 (Rail Yards, Tracks, and Spurs; PCA #13).

4.4.2 Topography, Hydrology, Geology

The Phase One Property is located in Universal Transverse Mercator (UTM) Zone 18, with approximate coordinates at the centre of the Site of Easting 452705 m and Northing 5028039 m. ERIS generated maps detailing the topography, physiography, and geology of the Phase One Study Area, with a search radius of 2,000 m from the Phase One Property boundary (provided in **Appendix G**). Details of these sources and the information provided herein are outlined in the table below.

Topic	Observations	Source
Topography	The Phase One Property is situated at an elevation of approximately 65 m above mean sea level (amsl). Topographic elevation contours show the Phase One Property and Phase One Study Area to be generally flat.	<ul style="list-style-type: none"> ERIS: 'Ontario Base Map (OBM)', Ontario Ministry of Natural Resources, 2010. Google Earth™.
Physiography	The overburden characterizing the Phase One Study Area (including the Phase One Property) consists of clay plains of the Ottawa Valley Clay Plains.	<ul style="list-style-type: none"> ERIS: 'Physiography of Southern Ontario', Chapman, L.J. and Putnam, D.F., 2007. The Physiography of Southern Ontario; OGS, Miscellaneous Release—Data 22.
Surficial Geology	The Phase One Study area is located in a region comprised of one overburden unit which consists of offshore marine deposits (clay and silt).	<ul style="list-style-type: none"> ERIS: 'The Surficial Geology of Southern Ontario', OGS, 2010. Surficial geology of southern Ontario, OGS, Miscellaneous Release—Data 128—Revised.
Bedrock Geology	Bedrock in the Phase One Study Area is comprised of shale, limestone, dolostone, and siltstone of the Georgian Bay Formation, Blue Mountain Formation, Billings Formation, Collingwood Member, and Eastview Member.	<ul style="list-style-type: none"> ERIS: 'Bedrock Geology of Ontario', OGS, 2011. 1:250,000 scale bedrock geology of Ontario; OGS, Miscellaneous Release—Data 126—Revision 1.
Hydrology	<p>Based on a review of information available in the well records from the 'Water Well Information System' (WWIS) database, the depth to the upper groundwater surface at the Phase One Property is expected to be approximately 1.0 to 3.30 m below ground surface (bgs).</p> <p>Previous investigations at the Phase One Property and an adjoining property indicated the following:</p> <ul style="list-style-type: none"> Four groundwater monitoring wells were installed at the Phase One Property during the 2010 Trow Phase II ESA. Depths to groundwater measured in the monitoring wells at the time of the investigation ranged between approximately 2.1 and 2.3 m bgs. The direction of groundwater flow across the Site was not confirmed as part of the Trow Phase II ESA; A report which included groundwater elevation contouring was provided by Loblaw for a nearby property (2692 Sheffield Road located approximately 30 m to the southwest of the Phase One Property) indicated that the inferred groundwater flow direction was to the east/northeast; and 	<ul style="list-style-type: none"> ERIS: 'Water Well Information System', dated September 30, 2021. Limited Phase II Environmental Site Assessment of 2692 Sheffield Road, Ottawa, ON, prepared by Jacques Whitford for Loblaw, dated 14 November 2008. Phase II Environmental Site Assessment, 2625 Sheffield Road, Ottawa, ON, prepared by Trow for Loblaw, dated February 2010. Phase II Environmental Site Assessment, 2625 Sheffield Road, Ottawa, Ontario, prepared by EXP for Loblaw, dated 8 October 2020.

Topic	Observations	Source
	<ul style="list-style-type: none"> <li data-bbox="415 247 993 506">Six groundwater monitoring wells were installed at the Phase One Property during the 2020 EXP Phase II ESA. Depths to groundwater measured in the monitoring wells at the time of the investigation ranged between approximately 1.56 and 4.98 m bgs. The direction of groundwater flow was determined to be toward the southwest. <p data-bbox="415 548 993 911">There are no on-Site water bodies. The nearest body of water relative to the Site is Green’s Creek, located approximately 60 m east of the Phase One Property. Green’s Creek generally flows from south to north and discharges into Ottawa River, located approximately 6.5 kilometers (km) north of the Site. Based on the groundwater contouring completed at the adjoining property to the west, the topography of the Site area, and the location of Green’s Creek, groundwater flow across the Phase One Property area is projected to be generally east/northeast.</p>	

4.4.3 Fill Materials

According to prior reports (see Section 4.1.5) and a review of aerial photographs (see Section 4.4.1) fill material is present at the Phase One Property.

Based on the review of the borehole logs provided in the 2010 Trow Phase II ESA and the 2020 EXP Phase II ESA and Delineation Investigation, fill material and/or suspected re-worked material was noted in all borehole locations completed at the Phase One Property. According to the 2009 Trow Phase I ESA, a historical building was located in the area which is now occupied by the south extension (former freezer area) of the Site building and demolition practices associated with the building’s removal were identified as a concern. According to the 2020 EXP Phase I ESA, EXP was reportedly advised that fill material of unknown origin was imported during the development of the Phase One Property. In addition, the report noted that fill material of unknown origin was utilized to backfill the excavation of the former oil USTs formerly located at the northwest corner of the Site building and identified fill materials related to the removal of the former on-Site railway spurs in the central portion of the Phase One Property.

According to the aerial photograph review, the following observations are assumed to be associated with potential fill materials of unknown quality:

- Ground disturbance assumed to be associated with early grading/development was observed at the Phase One Property in 1965; and

- A former building observed in the southern portion of the Phase One Property appeared to have been constructed sometime between 1965 and 1976 and was demolished by 1999.

Based on the above information, the presence of on-Site fill material of unknown quality in the above-noted areas at the Phase One Property are considered to represent on-Site PCAs (i.e., PCAs #1, #4B, #5B, #7).

4.4.4 Water Bodies, Areas of Natural Significance, and Groundwater Information

The Phase One Property does not include a water body. The nearest body of water relative to the Site is Green's Creek, located approximately 60 m east of the Phase One Property. Green's Creek generally flows from south to north and discharges into Ottawa River, located approximately 6.5 km north of the Site. According to the Rideau Valley Conservation Authority (RVCA) interactive mapping program⁸, Ministry of the Natural Resources and Forestry (MNR) significant woodlands are present between approximately 40 and 60 m to the east of the Phase One Property and a non-provincially significant wetland is present approximately 200 m to the east of the Phase One Property.

The Phase One Property is not located within an area of natural and scientific interest (ANSI), nor does it include or is it adjacent to or is within 30 m of an ANSI, as defined in Section 41(1)(a) of O. Reg. 153/04, as amended. A map illustrating the lack of ANSI within the Phase One Study Area is included with the ERIS report in **Appendix G**. Geosyntec notes that one ANSI (i.e., Borthwick Springs) is present approximately 1,545 m to the southeast of the Phase One Property.

The Phase One Property and Phase One Study Area are serviced by the City of Ottawa municipal drinking water system, which obtains its water from a surface water source (the Ottawa River)⁹. Based on a review of the WWIS database (see Section 4.4.5), no water wells located within the Phase One Study Area are utilized for human consumption and/or agricultural usage; however, there are at least two potentially active water supply wells for commercial and industrial purposes located within the Phase One Study Area (i.e., #1511776 and #7277670) with several additional wells with unknown water use and status. Further details are presented in Section 4.4.5.

4.4.5 Well Records

The 'Water Wells Information System' (WWIS) database (September 30, 2021) is a provincial database that describes the locations and characteristics of water wells found within Ontario, in accordance with O. Reg. 903. Based on Geosyntec's review of the ERIS database report, eight well records were identified in the WWIS database on the Phase One Property and a total of 37 records were identified for other properties located within the Phase One Study Area.

⁸ <https://www.rvca.ca/regulations-planning/map-a-property>

⁹ <https://ottawa.ca/en/living-ottawa/drinking-water-stormwater-and-wastewater/drinking-water>

- Four well records dated 2010 were identified for the Phase One Property. The well records were noted to be monitoring and test holes to depths of 5.49 m bgs. These records correspond with the monitoring wells installed as part of the Phase II ESA conducted at the Phase One Property in 2010 by Trow (see Section 4.1.5).
- Four well records dated 2020 were identified for the Phase One Property. No further information on the use or construction of these wells was provided. These records correspond with the monitoring wells installed as part of the Phase II ESA conducted at the Phase One Property in 2020 by EXP (see Section 4.1.5).

It should be noted that, two additional well records (#7128488 and #7134998), listed as monitoring wells, were identified by ERIS on the Phase One Property based on coordinate data submitted with the well records (accurate to 30 m to 100 m). However, the additional details provided in these records indicated that these wells were installed at 2575 and 2585 Sheffield Road (adjoining property to the north).

The well location markers presented in the ERIS report are based on coordinates of varying accuracy. Geosyntec notes that select well location markers listed in the ERIS report were located beyond the Phase One Study Area, and as such, were not included. Furthermore, well information present in the ERIS report was supplemented with information provided on the Ontario Well Records website¹⁰ where available. A summary of the information gleaned from the well records located within the Phase One Study Area is provided in the following table:

Well ID	Location	Primary Water Use	Final Well Status	Installation Year	Well Depth (m bgs)	Static Water Level (m bgs)

The well records indicate that the shallow groundwater surface within the Phase One Study Area is located at a depth of approximately 1.0 to 3.30 m bgs and deeper groundwater is located at a depth of approximately 12.2 to 38.0 m bgs. Based on the above information, there appears to be at least two potentially active water supply wells for commercial and industrial purposes located within the Phase One Study Area (i.e., #1511776 and #7277670) with several additional wells with unknown water use and status.

4.5 Site Operating Records

Site operating records must be reviewed where the Phase One Property is an ‘*enhanced investigation property*’, as defined under O. Reg. 153/04, Section 32.1 (1) and Schedule D, subsection 13 (3) if: (i) the property was used at any time, in whole or in part, for industrial use;

or, (ii) the property was used at any time, in whole or in part, for any of the following commercial uses:

- a) As a garage.
- b) As a bulk liquid dispensing facility, including a gasoline outlet.
- c) For the operation of dry-cleaning equipment.

Based on the information obtained from Geosyntec's records review, the Phase One Property has been used as a bulk liquid dispensing facility with two diesel USTs since 1978; as such, the Phase One Property is considered to be an enhanced investigation property, as defined under O. Reg. 153/04, as amended.

The following Site operating records were reviewed as part of this Phase One ESA:

- Office and Warehouse Alterations and Additions Floor Plans, prepared by Internorth Construction Limited for National Grocers Company Limited, dated 14 March 1975;
- Vacuum Leak Test Reports (USTs and Fuel Lines) for the years 2016 and 2018;
- Vacuum Leak Test Report (AST) for the year 2018;
- Preventative Maintenance Inspection Reports (USTs, AST, and Fuel Lines) for the year 2018;
- ATC System Evaluation (Fuel Dispensers) for the years 2018 and 2020; and
- Dispenser Calibration Maintenance Evaluation (Fuel Dispensers) for the years 2018 and 2020.

A summary of above-noted records is provided below.

1975 Internorth Construction Plans

Geosyntec reviewed construction plans pertaining to proposed alterations and additions to the Site building in 1975. A portion of the plan shows the proposed alterations to the office area, electrical rooms, and heating system. A 10,000-gallon heating oil UST was shown beneath the northwestern portion of the Site building (i.e., the former office) with piping extending out of the building to the north and traveling along the northern exterior of the office portion in an east-west orientation. The construction plan proposed to remove this existing storage tank and install a new 10,000-gallon heating oil storage tank along the western exterior of the office portion of the Site building. The proposed piping would run along the northern exterior of the Site building and connect with existing piping. The fill and vent pipes associated with this heating oil UST were to be installed along the northern exterior of the office portion of the Site building.

A schematic detail of the oil storage tank and piping was also included. The tank was noted to be a 10,000-gallon UST measuring 9 ft in diameter and 26 ft long. It was shown to be secured on a buried concrete pad with hoisting hooks, anchor bolts, turnbuckles and hold down straps.

2016 and 2018 UST Vacuum Leak Test Reports

In 2016, the tank leak tests were conducted by Tanknology Canada (Tanknology) on the two 35,000 L double-walled fiberglass USTs and the associated fuel lines. The USTs were utilized to store clear and coloured diesel fuel. The results of the vacuum tests indicated that the USTs and associated fuel lines passed the leak tests.

In 2018, the tank leak tests were conducted by Cantest Solutions Inc. (Cantest) on the two 35,000 L double-walled fiberglass USTs and the associated fuel lines. The interstitial space was also tested. The results of the vacuum tests indicated that the USTs, interstitial spaces, and associated fuel lines passed the leak tests.

2018 AST Vacuum Leak Test Report

In 2018, the tank leak test was conducted by Cantest on the interstitial space of the one 4,540 L double-walled steel AST. The AST was utilized to store clear diesel fuel. The results of the vacuum test indicated that the AST passed the leak test.

2018 Preventative Maintenance Inspection Report

The preventative maintenance inspection was conducted by Cantest and included review of equipment operating problems, emergency shut off switches, fire extinguishers, tank monitoring system and sump sensors, dispensers, underground storage tanks and equipment, hydrocarbon and water levels, monitoring wells, fill pipe components, over fill prevention devices, turbine sumps and manways, dispensers and auxiliary equipment, dispenser sump, pipe riser and connections, and vertical check and emergency valves. No tank leak tests were conducted as part of the maintenance inspection. The results of the inspection indicated that the private fuel outlet was in good condition with no maintenance required.

2018 and 2020 Dispenser Calibration Maintenance Reports

In 2018, the dispenser calibration was conducted by Cantest on the fuel dispenser attached to the 4,540 L double-walled steel AST. To perform the test, a known amount of clear diesel was pumped from the AST. The results of the calibration test indicated that the AST dispenser was in good condition with no maintenance required.

In 2020, the dispenser calibration was conducted by Cantest on the fuel dispensers attached to the two 35,000 L double-walled fiberglass USTs and the 4,540 L double-walled steel AST. The results of the calibration test indicated that all dispensers were in good condition with no maintenance required. Cantest noted that the AST dispenser did not have automatic temperature compensation

(ATC) components and therefore could not be certified. Cantest further noted that the UST dispensers had only one decimal place and the ATC components could not be certified. According to updated comments added 27 April 2020, ATC component certification was reported to not be required as the fuel outlet was for private usage only.

2018 and 2020 ATC Evaluation Reports

In 2018, the ATC evaluation was conducted by Cantest on the fuel dispensers attached to the two 35,000 L double-walled fiberglass USTs. The results of the ATC test indicated that the UST dispensers passed the test.

In 2020, the ATC evaluation was conducted by Cantest on the fuel dispensers attached to the two 35,000 L double-walled fiberglass USTs. The results of the ATC test indicated that the UST dispensers failed the test. Cantest did not provide recommendations or corrective actions.

Summary

Based on the information provided in the provided in the site operating records, the following on-Site PCAs resulting in a APECs were identified (see **Figure 4 of Appendix A**):

- The presence of a current private fuel outlet with diesel USTs, and two former heating oil USTs (Gasoline and Associated Products Storage in Fixed Tanks; PCAs #2 and #5A).

5. INTERVIEWS

As part of environmental due diligence activities conducted by Geosyntec on behalf of Amazon in 2020, Berend Jan Velderman of Geosyntec conducted an interview with Ian Stiller and Serge Delorme of Loblaw (each with over 20 years of experience with the Phase One Property; hereafter referred to as the “Site representatives”). At this time, the Site representatives were identified as the persons most knowledgeable with respect to the historic operations at the Phase One Property and were selected to be interviewed as part of this Phase One ESA. The interview was conducted on 21 July 2020. The Site representatives indicated the following pertinent information with respect to the Phase One Property, beyond that which was already known through records review:

- The Site building was constructed in 1967 with additions completed circa 1974, 1975, 1992, and 1997.
- To their knowledge, the Phase One Property was always occupied by Loblaw (formerly National Grocers).
- Hazardous materials stored with the Site building during Loblaw’s occupancy included: a 100 L tank of lead and acid containing battery wash liquid, two 205 L drums of waste oil, and a 1,000 L plastic tote of diesel exhaust fluid.

- Variable amounts (<100 L per month) of registrable wastes including alkaline wastes, paint/pigment/coating residues, miscellaneous inorganic chemicals, inert organic wastes, waste crankcase oils and lubricants, and waste compressed gases were removed from the Phase One Property by Drain-All Ltd., a licensed contractor.
- Solid waste was stored in a metal bin. The refuse was removed for off-Site disposal by Waste Management Inc. Paper products, batteries, electronic wastes, and universal waste were separated for off-Site recycling by various specialized contractors.
- Electricity was provided to the Phase One Property by Ottawa Hydro via utility-owned transformers located within the Site building. The Site representatives were not aware of the PCB content of the on-Site transformers.
- The Phase One Property had an asbestos management plan (AMP) in place due to known ACM present.
- In 2011, a fire occurred in the south side of the Site building. It is not documented to what extent the fire damaged the building or how the fire was brought under control.

Brooke Wallace of Geosyntec conducted an interview with Signe Klein, Stefania Sottile, and Farid Malek of CP REIT (representatives of the current Site Owner with approximately 6 months of experience with the Phase One Property; hereafter referred to as the “Owner representatives”). The Owner representatives were identified as the persons most knowledgeable with respect to the current operations at the Phase One Property and were selected to be interviewed as part of this Phase One ESA. The interview was conducted on 11 April 2022. The Owner representatives indicated the following pertinent information with respect to the Phase One Property, beyond that which was already known through records review:

- CP REIT took ownership of the Phase One Property in February 2022;
- Loblaw operations ceased sometime in 2021 and Loblaw vacated the Phase One Property in February 2022;
- To the knowledge of the Owner representatives, the USTs and AST associated with the private fuel outlet in the northern portion of the Phase One Property are empty. At the request of Amazon, the Owner representatives indicated that all components of the private fuel outlet are scheduled for removal prior to Amazon’s occupancy of the Phase One Property;
- At the request of Amazon, the Owner representatives indicated that the existing three stage oil-water separator located in the northwestern portion of the Site building is scheduled for removal prior to Amazon’s occupancy of the Phase One Property;
- The Owner representatives did not have any knowledge of former heating oil USTs at the Phase One Property;

- The Owner representatives indicated that all walk-in coolers located within the Site building were decommissioned prior to Loblaw vacating the Phase One Property; and
- The Owner representatives did not have any knowledge or information related to the fire that occurred at the Phase One Property in 2011.

Summary

No evidence of additional PCAs beyond those identified through records review was identified during the interview with the Site or Owner representatives. The information provided by both representatives was consistent with the records review conducted as part of this Phase One ESA and, as such, is considered reliable for the purposes of this assessment.

6. SITE RECONNAISSANCE

6.1 General Requirements

Mikaela Rae Peet and Berend Jan Velderman of Geosyntec completed the reconnaissance of the Phase One Property on 12 April 2022. During the visit, the temperature was approximately 11°C and the weather conditions were sunny, and the ground surface was clear. The Site reconnaissance was conducted between approximately 9:00 am and 11:00 am. Berend Jan Velderman has over 25 years of experience conducting Phase One ESAs for industrial, commercial and residential properties. Mikaela Rae Peet and Berend Jan Velderman conducted the reconnaissance under the supervision of Paula Hutchison of Geosyntec. Paula Hutchison is a licensed Professional Engineer (P. Eng.) in the Province of Ontario, and is the Qualified Person, Environmental Site Assessment (QP_{ESA}), as defined by O. Reg. 153/04, as amended for this Site.

As part of the Site reconnaissance, Geosyntec looked for evidence of the presence of hazardous substances used, stored, or discarded, and inspected the Phase One Property for areas of disturbed or discolored soil, suspect equipment and/or building materials which may contain hazardous substances, areas of distressed vegetation, wastewater discharge areas, storage tanks/septic systems, waste management/disposal areas, lagoons, pits, sumps, surface water management areas, and stained surfaces. In addition, a cursory review of surrounding properties within the Phase One Study Area was conducted from publicly accessible locations. Select photographs taken during the reconnaissance are included in **Appendix H**.

6.2 Specific Observations at the Phase One Property

6.2.1 Structures

The Phase One Property is developed with an approximately 33,472 sq. m. commercial warehouse building. The one-storey Site building was constructed of a combination of concrete block, steel framing and metal siding with a concrete slab on grade ground surface. The western portion of the Site building consisted of former office space. A boiler/furnace room was located in a partial

basement in the northwestern portion of the Site building. A former freezer area was located in the southern portion of the Site building. A former forklift maintenance area was located in the northwestern portion of the Site building. The battery bay, utilized for forklift battery washing was located in the north-central portion of the Site building. A former truck repair garage was located in the northwestern portion of the Site building. Former shipping and receiving areas with loading docks were present in the northern and southern portions of the Site building.

Below-Ground Structures

During the Site reconnaissance, Geosyntec observed one catch basin situated in the southeast portion of the Phase One Property. The catch basin is inferred to be associated with the City of Ottawa municipal storm sewer system. No additional below ground structures are present on the Phase One Property based on the records review, interview, and observations made during the Site reconnaissance.

Details of Tanks

During the Site reconnaissance, Geosyntec observed a private fuel outlet with two diesel USTs and one diesel AST in the north-central portion of the Phase One Property. According to the Owner representatives, the USTs and AST are currently empty and are scheduled to be decommissioned and removed for off-Site disposal. The existing USTs were in use from 1992 until Site operations ceased in 2021. During Site operation, Geosyntec was advised that the diesel USTs were formerly used for delivery transport truck refueling. The USTs, AST, fuel lines, and dispensers were leak tested and/or calibrated on a regular basis by Loblaw (see Section 4.5). The USTs and fuel lines passed the most recent leak test (conducted in 2018).

Geosyntec notes the following with respect to information gleaned from prior reports (see Section 4.1.5):

- Two diesel USTs were initially installed at the Phase One Property in 1978. The current USTs were installed in 1992. According to the 1992 and 1995 Bluewing Assessments, four truckloads of contaminated soil were removed from the area during UST replacement activities; and
- Two 1,900 L USTs, which stored waste oil and supply oil, were also reportedly located on the Phase One Property, near the northwest corner of the Site building. The USTs were of single-wall steel construction and installed in 1976. The USTs were removed between 1999 and 2000. Reportedly, no petroleum impacts were identified during confirmatory sampling conducted during the tank removal.

At the request of Amazon, the Owner representatives indicated that all components of the private fuel outlet are scheduled for removal prior to Amazon's occupancy of the Phase One Property.

Potable and Non-Potable Water Sources

Based on the Site reconnaissance and Geosyntec's interviewing effort, the Phase One Property is serviced by the City of Ottawa municipal water supply and sanitary and storm sewer systems. It is expected that the surrounding properties located within the Phase One Study Area are also serviced by the City of Ottawa municipal water supply and sanitary and storm sewer systems.

6.2.2 Underground Utilities

Based on the Site reconnaissance and Geosyntec's interviewing effort, active buried underground utilities located on the Phase One Property consist of electricity, potable water, sanitary and storm sewers, communications, and natural gas. Reportedly, no utility plans are available for the Phase One Property.

6.2.3 Interior of Structures

Exit and Entry Points

Based on the Site reconnaissance, vehicle and pedestrian access to the Phase One Property is provided from Sheffield Road to the west and Humber Place to the south. There were four interior exit and entry points on the northern face of the Site building, four on the eastern face, three on the southern face, and seven on the western face observed during the Site reconnaissance.

Existing and Former Heating Systems

Geosyntec observed forced air heating and cooling in the office portion of the Site building provided by natural gas-fired rooftop heating, ventilation, and air conditioning (HVAC) units. Natural gas-fired ceiling mounted unit heaters were observed in a number of locations within the warehouse portion of the Site building.

Geosyntec observed an oil-fired furnace (not in use) in the boiler/furnace room located in a partial basement in the northwestern portion of the Site building. Geosyntec observed possible cut off fill and vent pipes along the northern exterior of the western portion of the Site building (i.e., the former office portion).

Geosyntec notes the following with respect to information gleaned from prior reports (see Section 4.1.5) and site operating records (see Section 4.5):

- According to the 1975 Internorth Construction Plans (see Section 4.5), a 10,000-gallon heating oil storage tank was shown beneath the western portion of the Site building (i.e., the former office) with piping extending out of the building to the north and traveling along the northern exterior of the office portion in an east-west orientation. The construction plan proposed to remove the existing storage tank and install a new 10,000-gallon heating oil storage tank along the western exterior of the office portion of the Site building. The

proposed piping would run along the northern exterior of the Site building and connect with existing piping. The fill and vent pipes associated with this heating oil UST were to be installed along the northern exterior of the office portion of the Site building (i.e., which corresponds with the location of the cut off fill and vent pipes observed during the Site reconnaissance); and

- According to the 2009 Trow Phase I ESA, a level monitoring indicator was observed in the partial basement beneath the office portion of the Site building. Geosyntec presumes that this level monitoring indicator might have been associated with the initial 10,000-gallon heating oil UST present beneath the western portion of the Site building.

Geosyntec notes that a geophysical survey should be conducted to confirm the presence or absence of USTs in these areas.

Cooling Systems

As noted above, the Site building is currently equipped with natural gas-fired rooftop HVAC units in the western portion of the Site building (i.e., the office portion). According to the Site representatives, a former freezer area was located within the southern portion of the Site building. At the time of the Site reconnaissance, cooling and refrigeration capabilities had been removed throughout the Site building and refrigerants had been removed from any units remaining in place.

Geosyntec notes that 19 spill records related to atmospheric discharges of CFC refrigerants were listed for the Phase One Property in the ERIS Report (see Section 4.2.5).

Drains, Pits, and Sumps

Geosyntec observed floor drains throughout the warehouse portion of the Site building. According to the Site representatives, during Loblaw's occupancy, these floor drains were previously connected to a liquid solid separator located in the former truck repair garage in the northwestern portion of the Site building prior to draining to the sanitary sewer. At the time of the Site reconnaissance, the liquid solid separator was no longer present. Furthermore, Geosyntec observed two sumps in the boiler/furnace room. No odors or sheens were observed on the surface of the sump water.

Unidentified Substances (Interior)

Geosyntec did not observe any unidentified containers within the Site building. Geosyntec's interviewing effort addressed but did not identify such containers.

Staining and Corrosion on Floor Surfaces

Geosyntec observed staining on floor surfaces in several areas within the Site building:

- Staining from an unknown source was visible on the floors in former storage areas. The concrete slab appeared to be in good condition with no cracks or floor drains observed in the vicinity of the staining;
- An area of staining from an unknown source was observed in the interior portion of the northern shipping and receiving area. Minor cracking of the concrete slab was observed in the vicinity of this staining; however, no floor drains were observed; and
- Apparent petroleum product staining was visible on the concrete floor of the former truck repair garage. Although the concrete slab appeared to be fair condition, a drainage trench was observed in the vicinity of the staining.

6.2.4 Miscellaneous

Current and Former Wells

Based on a review of well records contained in the WWIS database (Section 4.4.5), one well record was identified in the WWIS database for the Phase One Property.

- Four well records dated 2010 were identified for the Phase One Property. The well records were noted to be monitoring and test holes to depths of 5.49 m bgs. These records correspond with the monitoring wells installed as part of the Phase II ESA conducted at the Phase One Property in 2010 by Trow (see Section 4.1.5).
- Four well records dated 2020 were identified for the Phase One Property. These records correspond with the monitoring wells installed as part of the Phase II ESA conducted at the Phase One Property in 2020 by EXP (see Section 4.1.5).

It should be noted that, two additional well records (#7128488 and #7134998), listed as monitoring wells, were identified by ERIS on the Phase One Property based on coordinate data submitted with the well records (accurate to 30 m to 100 m). However, the additional details provided in these records indicated that these wells were installed at 2575 and 2585 Sheffield Road (adjoining property to the north).

During the Site reconnaissance, Geosyntec observed groundwater monitoring wells throughout the Phase One Property. These monitoring wells correspond to some of the locations noted in the 2010 Trow Phase II ESA and 2020 EXP Phase II ESA.

Sewage Works

The Phase One Property is serviced by the City of Ottawa municipal sanitary sewer system. According to the Site representatives, wastewater from the floor drains drained to an aboveground

septic tank with a three stage interceptor prior to draining to the sanitary sewer. At the time of the Site reconnaissance, the septic tank was no longer present.

No evidence of current or former septic systems was observed during the Site reconnaissance. Information pertaining to former septic systems on the Phase One Property was not available for Geosyntec's review.

Ground Surface Cover

The exterior portions of the Phase One Property were observed to be comprised of asphalt parking areas and driveways with landscaped (grassed) portions along the western perimeter.

Current or Former Railway Lines

An existing railway line was observed on the adjoining property to the east of the Phase One Property (oriented from north to south). Geosyntec observed the railway to be situated at a similar elevation to the Phase One Property.

Based on the historical records review, two rail spurs were historically located in the central portion of the Phase One Property. The rail spurs were visible from approximately 1976 to 1991.

6.2.5 Exterior Observations

Areas of Stained Soil, Vegetation or Pavement

Geosyntec observed a minor area of stained pavement adjacent to the east of the diesel USTs in the north-central portion of the Phase One Property. The stained area appeared to be covered with absorbent material. No major asphalt cracks or catch basins were observed in the vicinity of the staining. No other areas of stained soil, vegetation or pavement were observed during the Site reconnaissance.

Stressed Vegetation

Geosyntec did not observe stressed vegetation during the Site reconnaissance.

Fill and Debris

At the time of the Site reconnaissance, no evidence of fill material was observed at the Phase One Property. Geosyntec's interviewing effort addressed but did not identify any imported fill materials.

According to prior reports (see Section 4.1.5) and a review of aerial photographs (see Section 4.4.1) fill material is present at the Phase One Property. Based on the review of the borehole logs provided in the 2010 Trow Phase II ESA and the 2020 EXP Phase II ESA and Delineation Investigation, fill material and/or suspected re-worked material was noted in all

borehole locations completed at the Phase One Property. According to the 2009 Trow Phase I ESA, a historical building was located in the area which is now occupied by the south extension (former freezer area) of the Site building. Demolition practices associated with the building's removal were identified as a concern. According to the 2020 EXP Phase I ESA, EXP was reportedly advised that fill material of unknown origin was imported during the development of the Phase One Property. In addition, the report noted that fill material of unknown origin was utilized to backfill the excavation of the former oil USTs formerly located at the northwest corner of the Site building and identified fill materials related to the removal of the former on-Site railway spurs in the central portion of the Phase One Property.

Potentially Contaminating Activities

The following on-Site PCAs were observed during the Site reconnaissance (see **Figure 4** of **Appendix A**):

- The presence of a private fuel outlet with diesel USTs, and evidence of former heating oil USTs (Gasoline and Associated Products Storage in Fixed Tanks; PCAs #2 and #5A); and
- The former truck repair and maintenance activities (Commercial Trucking and Container Terminals; PCA #3).

Water Bodies

No on-Site water bodies were observed at the time of the Site reconnaissance.

Areas of Natural Significance

As discussed in Section 4.4.4, a review of an ANSI map prepared by ERIS for the area within 2,000 m of the Phase One Property did not identify any ANSI at the Phase One Property. Geosyntec notes that one ANSI (i.e., Borthwick Springs) is present approximately 1,545 m to the southeast of the Phase One Property. Furthermore, no land that would be considered as an ANSI was observed on the Phase One Property or within the Phase One Study Area during the Site reconnaissance. The ANSI map is included in **Appendix G**.

Unidentified Substances (Exterior)

No unidentified substances were observed on the exterior of the Phase One Property during the Site reconnaissance.

6.2.6 Enhanced Investigation Property

A property is considered an '*enhanced investigation property*' as defined under O. Reg. 153/04, Section 32.1 (1) and Schedule D, subsection 13 (3) if: (i) the property was used at any time, in whole or in part, for industrial use; or, (ii) the property was used at any time, in whole or in part, for any of the following commercial uses:

- a) As a garage.
- b) As a bulk liquid dispensing facility, including a gasoline outlet.
- c) For the operation of dry-cleaning equipment.

Based on the information obtained from Geosyntec's records review, the Phase One Property has been used as a bulk liquid dispensing facility with two diesel USTs since 1978; as such, the Phase One Property is considered to be an enhanced investigation property, as defined under O. Reg. 153/04, as amended.

Operations

Geosyntec notes that the Phase One Property was vacant at the time of the Site reconnaissance.

According to information obtained from the records review, the Phase One Property was formerly occupied by National Grocers/Loblaw for use as a grocery distribution centre from 1967 until ceasing operations in 2021. Based on information obtained from previous reports and provided by the Site representatives, operations at the Phase One Property consisted of temperature controlled storage, shipping and receiving, forklift maintenance, vehicle repair (which ceased in 2000), truck refueling, and office activities. According to the Owner representatives, Loblaw vacated the Phase One Property in February 2022.

Hazardous Materials Used or Stored

Geosyntec did not identify any hazardous materials at the Phase One Property at the time of the Site reconnaissance.

According to the Site representatives, hazardous materials stored with the Site building during Loblaw's occupancy included: a 100 L tank of lead and acid containing battery wash liquid and two 205 L drums of waste oil stored in the battery bay in the north-central portion of the Site building, and a 1,000 L plastic tote of diesel exhaust fluid. Geosyntec observed the empty plastic tote in the former truck repair garage in the northwestern portion of the Site building.

According to information obtained from prior reports, additional chemicals/wastes during Loblaw's occupancy were located in the forklift repair area in the northwestern portion of the Site building. Chemicals observed in this area included hydraulic oil in several 20 L pails, waste oil in two 205 L drums, waste liquid (unspecified) in a parts washer basin, and solvents and paints in a locked storage unit.

No staining was observed to be present in Site building areas where hazardous materials were reportedly stored.

Products Manufactured

Geosyntec did not identify any on-going manufacturing activities at the Phase One Property at the time of the Site reconnaissance.

According to the information obtained from the records review, the Phase One Property was formerly occupied by National Grocers/Loblaw for use as a grocery distribution centre from 1967 until February 2022. As such, no manufacturing activities took place at the Phase One Property.

By-Products and Wastes

No industrial by-products or wastes were observed to be generated at the Phase One Property at the time of the Site reconnaissance.

According to the ERIS report (Section 4.2.6), National Grocers Company Limited/Loblaws Inc. was registered as a Generator (#ON0129101) of various hazardous wastes including petroleum distillates and waste oils and lubricants from 1986 to 2020. This operation was also listed as a generator of oil skimmings and sludges from 1992 to as of November 2021, and as a generator of wastes from the use of pigments, coatings and paints, alkaline solutions – containing heavy metals, pathological wastes, acid solutions – containing other metals and non-metals, misc. wastes and inorganic chemicals, acid solutions – containing heavy metals, light fuels, inert organic wastes, PCBs, waste compressed gases including cylinders, misc. wastes organic chemicals, other specified inorganic sludges, slurries or solids, alkaline solutions – containing other metals and non-metals (not cyanide) from 2000 to as of November 2021. It is noted that regulatory requirements for reporting waste generation was initiated in 1986 and, as such, hazardous waste generation by this operation may precede this date.

According to the Site representatives, registrable wastes including alkaline wastes, paint/pigment/coating residues, miscellaneous inorganic chemicals, inert organic wastes, waste crankcase oils and lubricants, and waste compressed gases were removed from the Phase One Property by Drain-All Ltd., a licensed contractor.

Raw Materials Handling and Storage Locations

No raw materials were identified at the Phase One Property during the Site reconnaissance.

Drums, Totes, and Bins

As mentioned above, one plastic tote of unknown capacity formerly used to store diesel exhaust fluid was observed in the former truck repair garage in the northwestern portion of the Site building.

No drums, totes, or bins were identified at the Phase One Property during the Site reconnaissance.

As noted above, historical waste oil storage drum locations included the battery bay located in the north-central portion of the Site building and the forklift maintenance area located in the northwestern portion of the Site building. Information pertaining to additional historical drum, tote, and/or bin storage locations on the Phase One Property was not available for Geosyntec's review.

Oil-Water Separators

Geosyntec observed a three stage oil-water separator (not in use) within the floor in the former truck repair garage located in the northwestern portion of the Site building.

At the request of Amazon, the Owner representatives indicated that the existing three stage oil-water separator located in the northwestern portion of the Site building is scheduled for removal prior to Amazon's occupancy of the Phase One Property.

Vehicle and Equipment Maintenance Areas

Two former vehicle and equipment maintenance areas were identified at the Phase One Property during the Site reconnaissance. A former truck repair garage with a three stage oil-water separator and an adjoining wash bay was located in the northwestern portion of the Site building. A forklift repair area was also formerly located in the northwestern portion of the Site building.

As noted previously, staining was observed to be present on the concrete in the former truck repair garage. A drainage trench was observed to be present in the vicinity of the staining. No staining was observed in the former forklift repair area.

Spills

Geosyntec did not observe evidence of spills at the Phase One Property during the Site reconnaissance.

According to the prior report review (Section 4.1.5), approximately 335 L of diesel fuel was released to the asphalt pavement in the northeastern portion of the Phase One Property (near Door #17) after a trailer reefer fuel tank was punctured in January 2021. A vacuum truck was used to recover the spilled diesel and the asphalt pavement was cleaned with degreaser. The area was pressure washed to remove any additional diesel. Geosyntec notes that no residual staining was observed in this area at the time of the Site reconnaissance.

According to the ERIS report (Section 4.2.5), 49 spill records were identified for the Phase One Property. Of these records, 26 pertained to diesel fuel releases ranging in volume between less than 1 L and 500 L. Four of the records pertained to oil/hydraulic fluid/antifreeze releases ranging in volume between 4 L and 48 L. The remaining 19 spill records were related to atmospheric discharges of CFC refrigerants. The diesel, oil, antifreeze, and hydraulic fluid spills were reported

to have been released on to land, ground or pavement. No further specific details concerning the spills were available in the spill records.

Liquid Discharge Points

No liquid discharge points, or generation of industrial wastewater, were observed at the Phase One Property during the Site reconnaissance.

Information pertaining to historical liquid discharge points on the Phase One Property was not available for Geosyntec’s review.

Hydraulic Lift Equipment

Geosyntec observed 62 loading docks along the northern and southern portions of the Site building. According to the Site representatives, levelers associated with each loading dock consisted of a combination of hydraulic and compressed air. All hydraulic dock leveler components had been removed from the Site building at the time of the Site reconnaissance. No staining was observed in the vicinity of the loading docks.

No additional hydraulic lift equipment, including elevators or in-ground hoists, was observed at the Phase One Property during the Site reconnaissance.

6.3 Phase One Study Area Observations

The Phase One Property is located in an area that is developed with a mix of industrial/commercial, and forested properties. Based on Geosyntec’s visual observations from publicly accessible areas, a general assessment of the current uses of the adjacent properties and notable land uses within the Phase One Study Area is summarized in the table below.

Direction	Geosyntec’s Observations	Comments
North	The Phase One Property is bounded to the north by J. Connelly Rental (equipment rental) at 2575 Sheffield Road followed by American Iron & Metal Recycling (scrap metal recycler) at 2555 Sheffield Road.	Though not observed during the Site reconnaissance, American Iron & Metal Recycling and J. Connelly Rental were listed in the ERIS report for manufacturing and/or waste generation activities at 2555 and 2575 Sheffield Road.
East	The Phase One Property is bounded to the east by a railway line followed by forested lands (including Green’s Creek).	Rail spurs have the potential to contain poor quality fill materials and railway ties treated with chemicals have the potential to result in subsurface impacts. Green’s Creek is located approximately 60 m to the east of the Phase One Property.
South	The Phase One Property is bounded to the south by Humber Place followed by Modern Niagara	Though not observed during the Site reconnaissance, Modern Niagara was listed in the ERIS report for waste generation activities.

Direction	Geosyntec's Observations	Comments
	(metal fabrication) at 1350 Humber Place and 1360 Humber Place (vacant lot).	
West	The majority of the Phase One Property is bounded to the west by Sheffield Road followed by several commercial/industrial businesses including a commercial/industrial building at 1325-1335 Humber Place (including several automotive repair shops), United Rentals (equipment rental) at 2644-2660 Sheffield Road, a Parks Canada office building at 2620-2630 Sheffield Road, a multi-tenant commercial/industrial building at 2600-2616 Sheffield Road (including Simplex Automotive and Walker Environmental [grease and food waste processing]), and a multi-tenant commercial/industrial building at 2590 Sheffield Road (Advance Coring & Cutting [saw blade maintenance] and Roofers World).	<p>Though not observed during the Site reconnaissance, several businesses at 1325-1335 Sheffield Road were listed in the ERIS report for manufacturing, environmental compliance approvals for automotive repair, and waste generation activities.</p> <p>Though not observed during the Site reconnaissance, Walker Environmental was listed in the ERIS report for operation of a waste disposal site related to grease and food waste processing.</p> <p>Though not observed during the Site reconnaissance, Advance Coring & Cutting and Roofers World were listed in the ERIS report for waste generation activities.</p>

6.4 Written Description of Investigation

A Site reconnaissance was conducted by Berend Jan Velderman and Mikaela Rae Peet of Geosyntec on 12 April 2022, which included the following:

- A walk-through of all portions of the Phase One Property. During the walk-through, an investigation was conducted to obtain and document information pursuant to all items presented in Schedule D, subsection 13 of O. Reg. 153/04. The results of the Site investigation are presented in Section 6.2 of this report;
- A review of surrounding properties located within the Phase One Study Area from publicly accessible areas to locate and document off-Site PCAs, water bodies, and areas of natural significance;
- The Site reconnaissance was documented with photographs. The following on-Site PCAs were observed during the Site reconnaissance, and are considered to result in APECs on the Phase One Property (see **Figure 4 of Appendix A**):
 - The presence of a private fuel outlet with diesel USTs, and evidence of former heating oil USTs (Gasoline and Associated Products Storage in Fixed Tanks; PCAs #2 and #5A); and
 - The former truck repair and maintenance activities (Commercial Trucking and Container Terminals; PCA #3).
- No on-Site water bodies were identified during the Site reconnaissance. No ANSIs were observed within the Phase One Study Area during the Site reconnaissance;

- The following off-Site PCAs were noted with respect to the surrounding properties observed within the Phase One Study Area during the Site reconnaissance, and are considered to represent on-Site APECs as described above in Section 6.3 (see **Figure 3** of **Appendix A**):
 - A railway line is present on the adjoining lands to the east of the Phase One Property. Based on the close proximity, this off-Site PCA is noted to represent an off-Site PCA contributing to an on-Site APEC at the Phase One Property (PCA #13);
 - Modern Niagara is present at 1350 Humber Place (located approximately 25 m to the south of the Phase One Property and inferred hydraulically crossgradient). This operation was observed to be a sheet metal manufacturer (Metal Fabrication; PCA #14);
 - Simplex Automotive is present at 2600 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient; Commercial Autobody Shops; PCA #17); and
 - Walker Environmental is present at 2612 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient). This operation was observed to be a grease and food waste disposal and transfer station (Waste Disposal and Waste Management; PCA #17).

7. REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses

The past property uses were determined for the Phase One Property from the chain of title (Section 4.1.4), city directories (Section 4.1.6), aerial photographs (Section 4.4.1), and other historical sources. A summary of current and past uses at the Phase One Property is presented in the following table:

Year	Name of Owner(s) and/or Occupants	Description of Property Use	Property Use	Other Observations from Chain of Title, Aerial Photographs, Fire Insurance Plans, etc.
Prior to 1946	Various private individuals	Inferred to be utilized for agricultural or other purposes; however, this cannot be confirmed.	Agricultural or other use	The 1946 to 1965 aerial photographs indicate that the Phase One Property was utilized for agricultural purposes (inferred cropland).
1946 to 1967	The Dominion Bridge Company, The Hydro-Electric Power Commission of Ontario, National	The Phase One Property was presumed to be utilized for agricultural purposes.		The address was not listed in the 1960 and 1965 city directories.

Year	Name of Owner(s) and/or Occupants	Description of Property Use	Property Use	Other Observations from Chain of Title, Aerial Photographs, Fire Insurance Plans, etc.
	Capital Commission			
1967 to 1980	Freebro Leaseholds Limited/Admiral Leaseholds Limited, Ottawa Regional Hospital Linen Services Incorporated, National Trust Company Limited (Phase One Property occupied by National Grocers Co Ltd.)	The Phase One Property consisted of two industrial/commercial buildings in the northern and southern portions.	Industrial/commercial use	<p>National Grocers Co Ltd. was listed in the city directories at the Phase One Property from available records from 1970 to 1980.</p> <p>The 1976 aerial photograph indicated that the Phase One Property was developed with two industrial/commercial buildings in the northern and southern portions.</p> <p>According to information provided by Loblaw, the Site building was constructed in approximately 1967 in the central portion of the northern parcel of the Phase One Property, with additions completed circa 1974, 1975, 1992, and 1997.</p>
1980 to 2022	Loblaws Limited/Loblaw Associated Properties, Inc./Loblaw Properties Limited/Loblaws Inc.	<p>The building located in the southern portion of the Phase One Property was demolished between 1991 and 1999. An expansion was added to the northern building.</p> <p>The Phase One Property consisted of one large industrial/commercial building similar in size and orientation to the present day Site building.</p>		<p>National Grocers Co Ltd. was listed in the city directories at the Phase One Property from available records from 1980 to 2001/02.</p> <p>Loblaw Companies Ltd. was listed in the city directories at the Phase One Property from 2001/02 to 2011.</p> <p>The 1999 aerial photograph indicated that the building located in the southern portion of the Phase One Property had been demolished and an expansion had been added to the northern building. Parking areas and laneways were present on the exterior portions of the Phase One Property. No further changes to the Phase</p>

Year	Name of Owner(s) and/or Occupants	Description of Property Use	Property Use	Other Observations from Chain of Title, Aerial Photographs, Fire Insurance Plans, etc.
2022 to Present	CP REIT Ontario Properties Limited			<p>One Property were noted in the 2002 to 2019 aerial photographs.</p> <p>Loblaw ceased operations at the Phase One Property in 2021 and vacated the Phase One Property in February 2022.</p> <p>The Phase One Property was purchased by CP REIT in February 2022 and has remained vacant ever since.</p>

7.2 Potentially Contaminating Activity

Based on the results of this Phase One ESA, the following PCAs were identified on the Phase One Property, all of which are considered to represent APECs on the Phase One Property:

PHASE ONE PROPERTY			
PCA	PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	PCA Description	Location of PCA
1	#30 – Importation of Fill Material of Unknown Quality	Based on information obtained from prior reports, fill material of unknown origin was imported during the development of the Phase One Property. Based on the aerial photograph review, ground disturbance assumed to be associated with early grading/development was observed at the Phase One Property in 1965. Based on a review of the borehole logs provided in the 2010 Trow Phase II ESA, fill material and/or suspected re-worked material was noted in all borehole locations completed at the Phase One Property.	Entire Phase One Property
2	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on information obtained from the records review and the site reconnaissance, a private fuel outlet with two diesel USTs and one diesel AST is currently present in the north-central portion of the Phase One Property. According to information obtained from prior reports, two diesel USTs were initially installed in 1978. The original USTs were replaced in 1992. Four truckloads of contaminated soil were reportedly removed from this area during the UST replacement activities. According to SPL listings, several diesel spills associated with refueling activities have occurred at the Phase One Property.	North-central portion of the Phase One Property

PHASE ONE PROPERTY			
PCA	PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	PCA Description	Location of PCA
3	#11 – Commercial Trucking and Container Terminals	Based on information obtained from the records review, the Phase One Property has been occupied by National Grocers/Loblaw for grocery distribution services since its development in 1967. The activities included a truck maintenance and repair area with a wash bay and three-stage oil-water separator located in the northwest portion of the Site building. Truck maintenance and repair activities reportedly took place at the Phase One Property for over 40 years. The Phase One Property was listed as a generator of various hazardous wastes associated with trucking activities from 1986 to 2021. In addition, according to the SPL listings, several oil/hydraulic fluid/antifreeze releases associated with trucking activities have occurred at the Phase One Property.	Northwest portion of the Site building
4A	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on information obtained from prior reports, two USTs (one for waste oil and one for supply oil) were installed in 1976 along the northwest exterior of the Site building. The USTs were removed in 1999. According to a UST removal report summarized in the 2020 EXP Phase I ESA, four confirmatory soil samples from the walls of the excavation and one water sample (presumably from the excavation cavity) were collected and submitted for laboratory analysis. Geosyntec notes that although the concentrations in all samples were less than the guidance criteria at the time, no sample was submitted from the base of the excavation and the analytical suite for the samples was not specified.	Northwest exterior of the Site building
4B	#30 – Importation of Fill Material of Unknown Quality	Based on information obtained from prior reports, fill material of unknown origin was utilized to backfill the excavation of the former oil USTs.	Northwest exterior of the Site building
5A	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on information obtained from prior reports and site operating records, two former heating oil USTs were present at the Phase One Property. In the 1975 Construction Plan, a 10,000-gallon heating oil storage tank was shown beneath the northwestern portion of the Site building (i.e., the former office). The 2009 Trow Phase I ESA noted that a level monitoring indicator for a heating oil UST was observed in the partial basement beneath the office portion of the Site building. Furthermore, the 1975 Construction Plan proposed to remove the existing storage tank and install a new 10,000-gallon heating oil storage tank along the western exterior of the office portion of the Site building. The fill and vent pipes associated with this heating oil UST were to be installed along the northern exterior of the office portion of the Site building. Geosyntec observed these fill	Western interior and exterior portion of the Site building

PHASE ONE PROPERTY			
PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Location of PCA
		and vent pipes in this location during the Site reconnaissance.	
5B	#30 – Importation of Fill Material of Unknown Quality	Based on the evidence observed of potential former heating oil USTs, Geosyntec notes that fill material of unknown origin might have been utilized to backfill any former heating oil UST excavations (if present).	Western interior and exterior portion of the Site building
6	#46 – Rail Yards, Tracks, and Spurs	Based on the aerial photograph review, two rail spurs extending from the main railway on the adjoining lands to the east were present in 1976, which serviced the present-day Site building and a former building in the southern portion of the Phase One Property. The rail spurs were no longer observed in the 1991 aerial photograph.	Central portion of the Phase One Property
7	#30 – Importation of Fill Material of Unknown Quality	Based on the aerial photograph review and prior reports, a former on-Site building was located in the southern portion of the Phase One Property from at least 1976 to 1999. Demolition practices utilized (e.g., backfilling with construction debris) to remove this building are unknown.	South-central portion of the Phase One Property
8	#6 – Battery Manufacturing, Recycling, and Bulk Storage	Based on information obtained from prior reports, a forklift battery bay was present in the north-central portion of the Site building. Neutralized battery wash water was reportedly discharged to the sanitary sewer via a catch basin in this area.	North-central portion of the Site building
9	#8 – Chemical Manufacturing, Processing, and Bulk Storage	Based on information obtained from prior reports, a forklift repair area was located in the northwestern portion of the Site building, west of the battery bay. Chemicals/wastes observed in this area included hydraulic oil, waste oil, waste liquid (unspecified), solvents, and paints.	Northwestern portion of the Site building
10	No PCA #	Based on information obtained from prior reports, a fire occurred along the southern portion of the Site building in 2011.	Southern exterior portion of the Site building
11	No PCA #	Based on information obtained from prior reports, a 335 L diesel spill occurred in the northeastern portion of the Phase One Property in 2021.	Northeastern portion of the Phase One Property

It is acknowledged that application of de-icing salt on the paved surfaces present on the exterior portions of the Site, for the purposes of safety for vehicular and pedestrian traffic during the winter months occurred at the Phase One Property and on the adjacent right-of-ways (i.e., Sheffield Road and Humber Place). An exemption under O. Reg. 153/04, Section 49.1, Paragraph 1 will be relied

upon for any salt-related contaminants identified during subsequent Phase Two ESA investigations.

Based on the results of this Phase One ESA, the following off-Site PCAs were identified within the Phase One Study Area and only certain PCAs were considered to result in an APEC, with the rationale presented in the following table:

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Considered to Result in an APEC
12	2575 Sheffield Road (located on the adjoining property to the north of the Phase One Property and inferred hydraulically cross/downgradient)	#37 – Operation of Dry Cleaning Equipment (where chemicals are used) #49 – Salvage Yard including automobile wrecking	This property was occupied by Ottawa Regional Hospital Linen Services Inc. from 1975 to 2006/07 according to the city directories. This operation was registered as a generator of various hazardous wastes (including halogenated solvents) from 1986 to 2009. This property is occupied by American Iron & Metal Company for use as a scrap metal recycling facility. This operation was listed in the WDS database for the operation of an end of life vehicle waste disposal site. This operation was registered as a generator of various hazardous wastes from 2012 to 2021. Furthermore, the operation was listed in the SPL database for a release of hydrocarbon fluid.	Yes, due to the close proximity of this property relative to the Phase One Property.
13	No address (adjoining lands to the east of the Phase One Property and inferred hydraulically downgradient)	#46 – Rail Yards, Tracks, and Spurs	A railway is present on the adjoining lands to the east of the Phase One Property. This railway was constructed prior to 1946 according to the aerial photograph review.	Yes, due to the close proximity of this property relative to the Phase One Property.
14	1350 Humber Place (located approximately 25 m	#34 – Metal Fabrication	This property is occupied by Modern Niagara Group for sheet metal	Yes, due to the close proximity of this

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Considered to Result in an APEC
	to the south of the Phase One Property and inferred hydraulically crossgradient)	#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	<p>manufacturing according to the site reconnaissance. This operation was registered as a generator of various hazardous wastes in 2020 and 2021.</p> <p>This property was occupied by Canadian Waste Services Inc. and Laidlaw Waste Systems. These operations were listed in the WDS database for the operation of a waste processing facility that ceased processing waste in 2000. These operations were registered as generators of various hazardous wastes from 1990 to 2001.</p>	property relative to the Phase One Property.
15	2574 Sheffield Road (located approximately 25 m to the northwest of the Phase One Property inferred hydraulically crossgradient)	#19 – Electronic and Computer Equipment Manufacturing	This property is currently occupied by C-COM Satellite Systems Inc. according to the site reconnaissance and has been present since at least 2011 according to the city directories. This operation was listed in the SCT database under Telephone Apparatus Manufacturing, Radio and Television Broadcasting, and Wireless Communications Equipment Manufacturing.	Yes, due to the close proximity and upgradient location of this property relative to the Phase One Property.
16	2590 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient)	<p>#33 – Metal Treatment, Coating, Plating, and Finishing</p> <p>#34 – Metal Fabrication</p>	<p>This property was occupied by various metal and/or chrome plating operations from 1970 to 2011 according to the city directories.</p> <p>This property was occupied by Canmade Metal Products Inc. and was listed in the SCT database under Other</p>	Yes, due to the close proximity and upgradient location of this property to the Phase One Property.

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Considered to Result in an APEC
			Ornamental and Architectural Metal Product Manufacturing, and All Other Miscellaneous Fabricated Metal Product Manufacturing.	
17	2600-2616 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient)	<p>#10 – Commercial Autobody Shops</p> <p>#11 – Commercial Trucking and Container Terminals</p> <p>#37 – Operation of Dry Cleaning Equipment (where chemicals are used)</p> <p>#54 – Textile Manufacturing and Processing</p> <p>#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners</p>	<p>This property was occupied by various automotive repair shops from 1970 to 2011 according to the city directories.</p> <p>This property was occupied by B.J. Maheral Trucking Ltd. This operation was registered as a generator of various hazardous wastes from 2002 to 2004.</p> <p>This property was occupied by Capital Textile Restoration in 2011 according to the city directories. This operation was listed as dry cleaning and laundry services and was registered as a generator of petroleum distillates from 2011 to 2021.</p> <p>This property is occupied by Walker Environmental Group Inc. and was formerly occupied by Organic Resource Management Inc. in 2011 according to the city directories. These operations were listed in the EBR and WDS databases as having approval for a grease and food waste processing and transfer facility. These operations were registered as generators of various</p>	Yes, due to the close proximity and upgradient location of this property relative to the Phase One Property.

PHASE ONE STUDY AREA

			hazardous wastes from 2010 to 2021.	
18	2620 – 2630 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient)	#39 – Paints Manufacturing, Processing and Bulk Storage	<p>According to the 1980 Inspection Report, this property was occupied by the Federal Government Department of Indian Affairs.</p> <p>The operations consisted of office space, and the storage and restoration of antique furniture. A woodworking shop with an associated dust collector and an “occasionally used” spray booth located within the building. Flammable liquids storage at the property was noted to include 10 22.7-L cans of lacquer thinner and 100 4.54-L cans of oil-based paints.</p> <p>No waste generation or environmental compliance approval listings were identified in the ERIS Report.</p>	No, due to the minimal quantities of chemicals stored and lack of database listings in the ERIS report.
19	2644-2660 Sheffield Road (located approximately 25 m to the west of the Phase One Property and inferred hydraulically upgradient)	#11 – Commercial Trucking and Container Terminals	This property was occupied by Mack Trucks Canada Ltd. from 1970 to 1992 according to the city directories. This property was also occupied by Sun Serve Enterprises Limited, was listed as bulk dry trucking and was registered as a generator of various hazardous wastes (including halogenated solvents) from 1988 to 1998.	Yes, due to the close proximity and upgradient location of this property relative to the Phase One Property.
20	1325-1335 Humber Place (located approximately 25 m to the west of the	#10 – Commercial Autobody Shops	This property was occupied by Landstar Automotive. This operation was listed in the CA, ECA, and EBR	Yes, due to the close proximity and upgradient location of

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	PCA Description	Considered to Result in an APEC
	Phase One Property and inferred hydraulically upgradient)	#31 - Ink Manufacturing, Processing, and Bulk Storage	<p>databases for the installation of a paint spray booth. This property was also occupied by Sheffield Auto Service. This operation was listed in the AUWR database for the operation of an automobile parts and supplies facility.</p> <p>This property was occupied by Tera Reproduction Inc./Terra Reproductions Inc. This operation was listed in the SCT database under Digital Printing, Other Printing, and Support Activities for Printing.</p>	this property relative to the Phase One Property.
21	2715 Sheffield Road (located approximately 90 m to the south of the Phase One Property and inferred hydraulically crossgradient)	<p>#11 – Commercial Trucking and Container Terminals</p> <p>#34 – Metal Fabrication</p> <p>#55 – Transformer Manufacturing, Processing, and Use</p>	<p>This property was occupied by various commercial trucking operations from 1980 to 2001/02 according to the city directories. These operations were registered as a generator of various hazardous wastes from 1992 to 1998 and 2006 to 2021, respectively. Paul’s Transfer & Delivery Ltd. was listed in the SPL database for a release of 400 L of diesel fuel to land in 1991.</p> <p>This property was occupied by Beechwood Steel Supply from 1980 to 1992 according to the city directories. This operation was listed in the SCT database under Fabricated Structural Metal.</p> <p>This property was occupied by Lorimar Investments. This operation was listed in the NPCB database as an</p>	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	PCA Description	Considered to Result in an APEC
			askarel storage facility from 1995 to 2004 and was registered as a generator of PCBs from 1993 to 1998.	
22	2716 Sheffield Road (located approximately 100 m to the southwest of the Phase One Property and inferred hydraulically crossgradient)	#11 – Commercial Trucking and Container Terminals	This property was occupied by various commercial trucking operations including Ottawa Truck Centre from 1970 to 2011 according to the city directories. This property was also occupied by Kemptville Truck Centres and was listed in the CA database for the installation of a waste oil furnace in 1994.	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.
23	2755 Sheffield Road (located approximately 165 m to the south of the Phase One Property and inferred hydraulically crossgradient)	#28 – Gasoline and Associated Products Storage in Fixed Tanks #12 – Concrete, Cement, and Lime Manufacturing	This property is listed in the DTNK, FST, and PRT databases as having a private fuel facility with one single-walled UST with a capacity of 45,400 L. This property is occupied by Hanson Ready Mix (concrete supplier) according to the site reconnaissance. This property was formerly occupied by Unimix (concrete supplier). This operation was registered as a generator of PCBs from 1997 to 2001.	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.
24	2555 Sheffield Road (located approximately 105 m to the north of the Phase One Property and inferred hydraulically cross/downgradient)	#28 – Gasoline and Associated Products Storage in Fixed Tanks #49 – Salvage Yard, including automobile wrecking	This property is listed in the PRT database as having a private fuel facility with a capacity of 68,190 L. The property also is listed in the FST database as having a single-walled AST with a capacity of 4,540 L. This property was occupied by Baker Bros Iron & Metal	No, due to the distance and inferred cross/downgradient location of this property relative to the Phase One Property.

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Considered to Result in an APEC
			Co Ltd./Bakermat Inc./AIM Recycling Group Inc. and was listed in the ANDR and AUWR databases as a 'junkyard' and scrap metal facility, respectively. These operations were registered as generators of various hazardous wastes from 1986 to 2021. The property is listed in the SPL database for several releases of diesel/oil/transformer oil/transmission oil.	
25	2540 – 2552 Sheffield Road (located approximately 115 m to the northwest of the Phase One Property and inferred hydraulically crossgradient)	#10 – Commercial Autobody Shops #11 – Commercial Trucking and Container Terminals #31 – Ink Manufacturing, Processing and Bulk Storage #34 – Metal Fabrication	This property was occupied by Kamal Beydoun for the operation of an autobody shop. This operation was listed in the CA database for the installation of a paint spray booth. This property was occupied by W.J. Mowat. This operation was listed as a courier service and was registered as a generator of various hazardous wastes from 1995 to 1998. This property was occupied by Canadian Braille Press Inc. and was listed in the SCT database as Other Printing. This property was occupied by Metcan Fabricators Inc. This operation was listed as truck and bus body manufacturers and was registered as a generator of aliphatic solvents from 1989 to 1998.	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	PCA Description	Considered to Result in an APEC
26	2555 Blackwell Street (located approximately 120 m to the northwest of the Phase One Property and inferred hydraulically crossgradient)	#31 – Ink Manufacturing, Processing and Bulk Storage #58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	This property was occupied by Xpress Printing Service. This operation was listed in the SCT database under Digital Printing, Other Printing, and Quick Printing. This property was occupied by Waste Care Services Inc. and was listed in the EBR and WDS databases as a solid and liquid industrial waste processing and transfer facility.	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.
27	1310 Humber Place (located approximately 125 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient)	#12 – Concrete, Cement, and Lime Manufacturing #34 – Metal Fabrication	This property is occupied by National Concrete Accessories (concrete products). This operation was registered as a generator of various hazardous wastes in 2021. This property was formerly occupied by Duron Services Ltd. (concrete products). This operation was registered as a generator of various hazardous wastes from 2003 to 2008. This property was occupied by Braycor Ltd. This operation was listed in the SCT database for various manufacturing activities including Other Ornamental and Architectural Metal Product Manufacturing.	No, due to the distance of this property relative to the Phase One Property.
28	2575 Blackwell Street (located approximately 140 m to the west of the Phase One Property and inferred hydraulically up/crossgradient)	#10 – Commercial Autobody Shops #31 – Ink Manufacturing, Processing and Bulk Storage	This property was occupied by various automotive operations from 1996/97 to 2011 according to the city directories. This property was occupied by 6331947 Canada Inc. This operation was listed in the EASR	No, due to the distance of this property relative to the Phase One Property.

			<p>database under Machine Shops.</p> <p>This property was occupied by Royal City Paint and Wallpaper. This operation was listed in the ECA database for the installation of a paint spray booth in 2015.</p> <p>This property was occupied by Japan Power for the operation of an automobile parts & supplies (tire, battery, parts, and accessories) facility according to the AUWR database.</p>	
33	1290 Humber Place (located approximately 160 m to the southwest of the Phase One Property and inferred hydraulically cross/upgradient)	<p>#31 – Ink Manufacturing, Processing and Bulk Storage</p> <p>#34 – Metal Fabrication</p>	<p>This property was occupied by Foil Impressions Incorporated. This operation was listed in the SCT database under Digital Printing, Other Printing, and Quick Printing. This operation was registered as a generator of acid wastes from 2006 to 2014.</p> <p>This property was occupied by Mountain Press Incorporated (other ornamental and architectural metal products manufacturing). This operation was registered as a generator of unspecified wastes in 2004.</p>	No, due to the distance of this property relative to the Phase One Property.
34	2740 Sheffield Road (located approximately 175 m to the southwest of the Phase One Property and inferred	<p>#11 – Commercial Trucking and Container Terminals</p> <p>#28 – Gasoline and Associated Products Storage in Fixed Tanks</p>	This property was occupied by several commercial trucking operations (Day & Ross Inc., Brazeau Transport, Cabano Transport, Paul’s Transfer & Delivery Ltd., and Rush	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Considered to Result in an APEC
	hydraulically crossgradient)		<p>Truck Centres). These operations were registered generators of various hazardous wastes from 1986 to 2011 and 2021. Day & Ross Inc. was listed in the SPL database for a release of an unknown quantity of waste oil in 2010.</p> <p>This property was occupied by Cabano Transport Inc. This operation was listed in the DTNK, FST, and PRT databases as having a private fuel facility with one 25,000 L diesel UST and associated piping installed in 1984.</p>	
35	2191 Bantree Street (located approximately 200 m to the northwest of the Phase One Property and inferred hydraulically crossgradient)	#10 – Commercial Autobody Shops	This property was occupied by 2575293 Ontario Inc. This operation was listed in the EASR database as an automotive refinishing facility in 2018.	No, due to the distance and inferred crossgradient location of this property relative to the Phase One Property.
36	1270-1280 Humber Place (located approximately 225 m to the southwest of the Phase One Property and inferred hydraulically crossgradient)	<p>#11 – Commercial Trucking and Container Terminals</p> <p>#54 – Textile Manufacturing and Processing</p> <p>#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners</p>	<p>This property was occupied by YRC Freight/YRC Reimer Express Lines Ltd. This operation was registered as a generator of various hazardous wastes from 2013 and 2018.</p> <p>This property was occupied by Warnaco of Canada Company. This operation was listed in the SCT database under Other Men's and Boys' Cut and Sew Clothing Manufacturing and Other Women's and Girls' Cut and Sew Clothing Manufacturing.</p>	No, due to the distance of this property relative to the Phase One Property.

PHASE ONE STUDY AREA				
PCA	Location of PCA	PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	PCA Description	Considered to Result in an APEC
			This property was occupied by Stericycle ULC. This operation was listed in the ECA, REC, and WDS databases as a biomedical and hazardous and non-hazardous industrial waste processing facility. This operation was registered for the generation of various hazardous wastes from 2012 to 2021.	
37	1275 Humber Place (located approximately 240 m to the west of the Phase One Property and inferred hydraulically upgradient)	#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	This property was occupied by Public Works and Government Services Canada. This operation was registered as a generator of halogenated pesticides and organic laboratory chemicals from 2007 to 2014.	No, due to the distance of this property relative to the Phase One Property.
38	2570 Blackwell Street (located approximately 240 m to the northwest of the Phase One Property and inferred hydraulically crossgradient)	#10 – Commercial Autobody Shops	This property was occupied by two automotive repair shops (Auto Expert Ctr and LGL Transmission Ltd.) according to the city directories. This property was listed in the EBR, CA, and ECA databases for the installation of a paint spray booth in 2008.	No, due to the distance of this property relative to the Phase One Property.

The locations of the PCAs identified in the Phase One Study Area are shown on **Figure 4**.

Therefore, to summarize the information presented in the tables above, the following PCAs are considered to represent APECs on the Phase One Property:

PCA Classification (Table 2 of Schedule D, O. Reg. 153/04)	Location of PCA
#30 – Importation of Fill Material of Unknown Quality	On-Site (PCAs #1, #4B, #5B, #7)
#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site (PCAs #2, #4A, #5A)
#11 – Commercial Trucking and Container Terminals	On-Site (PCA #3) Off-Site (PCAs #17, #19)
#46 – Rail Yards, Tracks, and Spurs	On-Site (PCA #6)

PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	Location of PCA
	Off-Site (PCA #13)
#6 – Battery Manufacturing, Recycling, and Bulk Storage	On-Site (PCA #8)
#8 – Chemical Manufacturing, Processing, and Bulk Storage	On-Site (PCA #9)
No PCA # – Impacts from a Fire	On-Site (PCA #10)
No PCA # - Impacts from a Diesel Spill	On-Site (PCA #11)
#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site (PCAs #12, #17)
#49 – Salvage Yard including automobile wrecking	Off-Site (PCA #12)
#34 – Metal Fabrication	Off-Site (PCAs #14, #16)
#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site (PCAs #14, #17)
#19 – Electronic and Computer Equipment Manufacturing	Off-Site (PCA #15)
#33 – Metal Treatment, Coating, Plating, and Finishing	Off-Site (PCA #16)
#10 – Commercial Autobody Shops	Off-Site (PCAs #17, #20)
#54 – Textile Manufacturing and Processing	Off-Site (PCA #17)
#31 – Ink Manufacturing, Processing and Bulk Storage	Off-Site (PCA #20)

7.3 Areas of Potential Environmental Concern

A summary of APECs identified at the Phase One Property is presented in the following table:

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
APEC #1 – Fill material of unknown quality	Entire Phase One Property	#30 – Importation of Fill Material of Unknown Quality	On-Site (PCA #1)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-, low or high pH, EC, and SAR	Soil
APEC #2 – Private fuel outlet with two diesel USTs installed in 1978	North-central portion of the Phase One Property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site (PCA #2)	BTEX, PHCs	Soil and groundwater

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
APEC #3 – Former truck repair and maintenance activities	Northwest portion of the Site building	#11 – Commercial Trucking and Container Terminals	On-Site (PCA #3)	VOCs, BTEX, PHCs	Soil and groundwater
APEC #4A – Former waste oil and supply oil USTs installed in 1976 and removed in 1999	Northwest exterior of the Site building	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site (PCA #4A)	BTEX, PHCs	Soil and groundwater
APEC #4B – Material of unknown quality used to backfill the former waste oil and supply oil USTs in 1999	Northwest exterior of the Site building	#30 – Importation of Fill Material of Unknown Quality	On-Site (PCA #4B)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-, low or high pH, EC, and SAR	Soil
APEC #5A – Two former heating oil USTs	Western interior and exterior portion of the Site building	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site (PCA #5A)	BTEX, PHCs, PAHs	Soil and groundwater
APEC #5B – Material of unknown quality used to backfill the former heating oil USTs	Western interior and exterior portion of the Site building	#30 – Importation of Fill Material of Unknown Quality	On-Site (PCA #5B)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-, low or high pH, EC, and SAR	Soil
APEC #6 – Former rail spurs	Central portion of the Phase One Property	#46 – Rail Yards, Tracks, and Spurs	On-Site (PCA #6)	PHCs, PAHs, Metals	Soil

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
				(including As, Sb, Se)	
APEC #7 – Material of unknown quality used to backfill the former building	South-central portion of the Phase One Property	#30 – Importation of Fill Material of Unknown Quality	On-Site (PCA #7)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-, low or high pH, EC, and SAR	Soil
APEC #8 – Forklift battery washing and storage activities	North-central portion of the Site building	#6 – Battery Manufacturing, Recycling, and Bulk Storage	On-Site (PCA #8)	Metals (including As, Sb, Se)	Soil
APEC #9 – Chemicals/wastes stored in the forklift repair area	Northwestern portion of the Site building	#8 – Chemical Manufacturing, Processing, and Bulk Storage	On-Site (PCA #9)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-	Soil
APEC #10 - On-Site fire that occurred in 2011	Southern exterior portion of the Site building	No PCA # - Impacts from a Fire	On-Site (PCA #10)	PHCs, PAHs, Metals (including As, Sb, Se), PFAS	Soil
APEC #11 – On-Site diesel spill that occurred in 2021	Northeastern portion of the Phase One Property	No PCA # - Environmental Spill	On-Site (PCA #11)	BTEX, PHCs	Soil
APEC #12A – Former dry cleaning operations to the north of the Phase One Property at 2575 Sheffield Road	Northern portion of the Phase One Property	#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site (PCA #12)	VOCs	Groundwater

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
APEC #12B – Current and former end of life vehicle waste disposal site operations to the north of the Phase One Property at 2575 Sheffield Road	Northern portion of the Phase One Property	#49 – Salvage Yard including automobile wrecking	Off-Site (PCA #12)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-	Groundwater
APEC #13 – Current railway on the adjoining lands to the east of the Phase One Property	Eastern portion of the Phase One Property	#46 – Rail Yards, Tracks, and Spurs	Off-Site (PCA #13)	PHCs, PAHs, Metals (including As, Sb, Se)	Groundwater
APEC #14A – Current metal fabrication operations to the south of the Phase One Property at 1350 Humber Place	Southeast portion of the Phase One Property	#34 – Metal Fabrication	Off-Site (PCA #14)	Metals (including As, Sb, Se, Cr [VI], Hg)	Groundwater
APEC #14B – Former waste processing facility to the south of the Phase One Property at 1350 Humber Place	Southeast portion of the Phase One Property	#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site (PCA #14)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-, Na, Cl-	Groundwater
APEC #15 – Current and/or former electronics manufacturing operations to the northwest of the Phase One Property	Northwestern portion of the Phase One Property	#19 – Electronic and Computer Equipment Manufacturing	Off-Site (PCA #15)	VOCs, BTEX, PHCs, Metals (including As, Sb, Se, Cr [VI], Hg)	Groundwater

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
at 2574 Sheffield Road					
APEC #16A – Former metal plating operations to the west of the Phase One Property at 2590 Sheffield Road	Northwestern portion of the Phase One Property	#33 – Metal Treatment, Coating, Plating, and Finishing	Off-Site (PCA #16)	VOCs, Metals (including As, Sb, Se, Cr [VI], Hg)	Groundwater
APEC #16B – Former metal fabrication operations to the west of the Phase One Property at 2590 Sheffield Road	Northwestern portion of the Phase One Property	#34 – Metal Fabrication	Off-Site (PCA #16)	Metals (including As, Sb, Se, Cr [VI], Hg)	Groundwater
APEC #17 – Current and/or former automotive repair operations to the west of the Phase One Property at 2600-2616 Sheffield Road and 1325 Humber Place	Western portion of the Phase One Property	#10 – Commercial Autobody Shops	Off-Site (PCAs #17 and #20)	VOCs, BTEX, PHCs	Groundwater
APEC #18 – Current and/or former commercial trucking operations to the west of the Phase One Property at 2612 and 2660 Sheffield Road	Western portion of the Phase One Property	#11 – Commercial Trucking and Container Terminals	Off-Site (PCAs #17 and #19)	VOCs, BTEX, PHCs	Groundwater

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
APEC #19 – Current and/or former commercial printing operations to the west of the Phase One Property at 1335 Humber Place	Western portion of the Phase One Property	#31 - Ink Manufacturing, Processing, and Bulk Storage	Off-Site (PCA #20)	VOCs	Groundwater
APEC #20A – Former dry cleaning operations to the west of the Phase One Property at 2616 Sheffield Road	Western portion of the Phase One Property	#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site (PCA #17)	VOCs	Groundwater
APEC #20B – Former textile restoration operations to the west of the Phase One Property at 2616 Sheffield Road	Western portion of the Phase One Property	#54 – Textile Manufacturing and Processing	Off-Site (PCA #17)	VOCs, BTEX, PHCs, Metals (including As, Sb, Se, Cr [VI], Hg)	Groundwater
APEC #20C – Current and former organic waste processing and transfer facility operations to the west of the Phase One Property at 2612 Sheffield Road	Western portion of the Phase One Property	#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site (PCA #17)	VOCs, BTEX, PHCs, PAHs, Metals (including As, Sb, Se, Cr [VI], Hg), B-HWS, CN-, Na, Cl-	Groundwater

Notes:

VOCs – Volatile Organic Compounds

BTEX – Benzene, Toluene, Ethylbenzene, Xylenes

PHCs F1-F4 – Petroleum Hydrocarbons Fractions F1 to F4

PAHs – Polycyclic Aromatic Hydrocarbons

As, Sb, Se – Arsenic, Antimony, and Selenium

CN- - Cyanide

Cr (VI) – Hexavalent Chromium

B-HWS – Boron (Hot Water Soluble)

Hg – Mercury

Na – Sodium

Cl- – Chloride

EC – Electrical Conductivity

SAR – Sodium Adsorption Ratio

PFAS – Per- and Polyfluoroalkyl Substances

7.4 Phase One Conceptual Site Model

The Phase One CSM is depicted in **Figures 1** through **5** of **Appendix A**, which illustrate the following, where applicable:

- Existing buildings and structures;
- Water bodies located in whole or in part within the Phase One Study Area;
- Areas of natural significance located in whole or in part on the Phase One Study Area;
- Roads (including names) within the Phase One Study Area;
- Areas where any PCA has occurred, and locations of tanks in the Phase One Study Area;
- APECs;
- Drinking water wells at the Phase One Property; and
- Uses of properties adjacent to the Phase One Property.

7.4.1 Potentially Contaminating Activities

On and off-Site PCAs were identified during the Phase One ESA, which led to multiple APECs on the Phase One Property:

PCA Classification <i>(Table 2 of Schedule D, O. Reg. 153/04)</i>	Location of PCA
#30 – Importation of Fill Material of Unknown Quality	On-Site (PCAs #1, #4B, #5B, #7)
#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site (PCAs #2, #4A, #5A)
#11 – Commercial Trucking and Container Terminals	On-Site (PCA #3) Off-Site (PCAs #17, #19)
#46 – Rail Yards, Tracks, and Spurs	On-Site (PCA #6) Off-Site (PCA #13)
#6 – Battery Manufacturing, Recycling, and Bulk Storage	On-Site (PCA #8)
#8 – Chemical Manufacturing, Processing, and Bulk Storage	On-Site (PCA #9)
No PCA # – Impacts from a Fire	On-Site (PCA #10)
No PCA # - Impacts from a Diesel Spill	On-Site (PCA #11)
#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site (PCAs #12, #17)
#49 – Salvage Yard including automobile wrecking	Off-Site (PCA #12)
#34 – Metal Fabrication	Off-Site (PCAs #14, #16)
#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site (PCAs #14, #17)
#19 – Electronic and Computer Equipment Manufacturing	Off-Site (PCA #15)
#33 – Metal Treatment, Coating, Plating, and Finishing	Off-Site (PCA #16)
#10 – Commercial Autobody Shops	Off-Site (PCAs #17, #20)
#54 – Textile Manufacturing and Processing	Off-Site (PCA #17)
#31 – Ink Manufacturing, Processing and Bulk Storage	Off-Site (PCA #20)

The above-mentioned PCAs were considered to represent the following APECs on the Phase One Property:

- **APEC #1** – Fill material of unknown quality across the entire Phase One Property;
- **APEC #2** – Private fuel outlet with two diesel underground storage tanks (USTs) installed in 1978 in the north-central portion of the Phase One Property;
- **APEC #3** – Former truck repair and maintenance activities within the northwestern portion of the Site building;
- **APEC #4A** – Former waste oil and supply oil USTs installed in 1976 and removed in 1999 along the northwestern exterior of the Site building;
- **APEC #4B** – Material of unknown quality used to backfill the former waste oil and supply oil USTs in 1999 along the northwestern exterior of the Site building;
- **APEC #5A** – Two former 10,000-gallon heating oil USTs located in the vicinity of the western portion of the Site building;
- **APEC #5B** – Material of unknown quality used to backfill the former heating oil USTs located in the vicinity of the western portion of the Site building;
- **APEC #6** – Former rail spurs located in the central portion of the Phase One Property;
- **APEC #7** – Material of unknown quality used to backfill the former building located in the southern portion of the Phase One Property;
- **APEC #8** – Forklift battery washing and storage activities in the north-central portion of the Site building;
- **APEC #9** – Chemicals/wastes stored in the forklift repair area in the northwestern portion of the Site building;
- **APEC #10** – On-Site fire that occurred in 2011 along the southwestern exterior of the Site building;
- **APEC #11** – On-Site diesel spill that occurred in 2021 in the northeastern portion of the Phase One Property;
- **APEC #12A** – Former dry cleaning operations to the north of the Phase One Property at 2575 Sheffield Road;
- **APEC #12B** – Current and former end of life vehicle waste disposal site operations to the north of the Phase One Property at 2575 Sheffield Road;
- **APEC #13** – Current railway on the adjoining lands to the east of the Phase One Property;
- **APEC #14A** – Current metal fabrication operations to the south of the Phase One Property at 1350 Humber Place;

- **APEC #14B** – Former waste processing facility to the south of the Phase One Property at 1350 Humber Place;
- **APEC #15** – Current and/or former electronics manufacturing operations to the northwest of the Phase One Property at 2574 Sheffield Road;
- **APEC #16A** – Former metal plating operations to the west of the Phase One Property at 2590 Sheffield Road;
- **APEC #16B** – Former metal fabrication operations to the west of the Phase One Property at 2590 Sheffield Road;
- **APEC #17** – Current and/or former automotive repair operations to the west of the Phase One Property at 2600-2616 Sheffield Road and 1325 Humber Place;
- **APEC #18** – Current and/or former commercial trucking operations to the west of the Phase One Property at 2612 and 2660 Sheffield Road;
- **APEC #19** – Current and/or former commercial printing operations to the west of the Phase One Property at 1335 Humber Place;
- **APEC #20A** – Former dry cleaning operations to the west of the Phase One Property at 2616 Sheffield Road;
- **APEC #20B** – Former textile restoration operations to the west of the Phase One Property at 2616 Sheffield Road; and
- **APEC #20C** – Current and former organic waste processing and transfer facility operations to the west of the Phase One Property at 2612 Sheffield Road.

The PCAs and APECs are shown on **Figures 4** and **5**, respectively.

7.4.2 Underground Utilities

Based on the Site reconnaissance and Geosyntec’s interviewing effort, active buried underground utilities located on the Phase One Property consist of electricity, potable water, sanitary and storm sewers, communications, and natural gas. Reportedly, no utility plans are available for the Phase One Property.

7.4.3 Geological and Hydrogeological Information

A review of the ERIS ‘*Ontario Base Map (OBM)*’ map, as well as satellite imagery available for viewing on Google Earth™, indicates that the Phase One Property is situated at an elevation of approximately 65 m amsl. Topographic elevation contours show the Phase One Property and Phase One Study Area to be generally flat.

According to the ERIS ‘*Physiography of Southern Ontario*’ map, the physiography of the Phase One Study Area is derived from clay plains of the Ottawa Valley Clay Plains. The ERIS ‘*Surficial*

Geology of Southern Ontario' map indicates that the Phase One Study area is located in a region comprised of one overburden unit which consists of offshore marine deposits (clay and silt). According to the ERIS 'Bedrock Geology of Ontario' map, the bedrock at the Phase One Property is comprised of shale, limestone, dolostone, and siltstone of the Georgian Bay Formation, Blue Mountain Formation, Billings Formation, Collingwood Member, and Eastview Member.

Based on a review of information available in the well records from the WWIS database, the depth to the upper groundwater surface at the Phase One Property is expected to be approximately 1.0 to 3.30 m bgs. Previous investigations at the Phase One Property indicated the following:

- Four groundwater monitoring wells were installed at the Phase One Property during the 2010 Trow Phase II ESA. Depths to groundwater measured in the monitoring wells at the time of the investigation ranged between approximately 2.1 and 2.3 m bgs. The direction of groundwater flow across the Site was not confirmed as part of the Trow Phase II ESA;
- A report which included groundwater elevation contouring was provided by Loblaw for a nearby property (2692 Sheffield Road located approximately 30 m to the southwest of the Phase One Property) indicated that the inferred groundwater flow direction was to the east/northeast; and
- Six groundwater monitoring wells were installed at the Phase One Property during the 2020 EXP Phase II ESA. Depths to groundwater measured in the monitoring wells at the time of the investigation ranged between approximately 1.56 and 4.98 m bgs. The direction of groundwater flow was determined to be toward the southwest.

There are no on-Site water bodies. The nearest body of water relative to the Site is Green's Creek, located approximately 60 m east of the Phase One Property. Green's Creek generally flows from south to north and discharges into Ottawa River, located approximately 6.5 kilometers (km) north of the Site. Based on the groundwater contouring completed at the adjoining property to the west, the topography of the Site area, and the location of Green's Creek, groundwater flow across the Phase One Property area is projected to be generally east/northeast.

Copies of the ERIS maps described above are provided in **Appendix G**.

7.4.4 Data Gaps and Uncertainty

The following data gaps are identified:

- The chain of title indicates that Ottawa Regional Linen Services Incorporated owned the Phase One Property from 1972 to 1975. However, other sources of information indicate that the Site was occupied by National Grocers since its development in approximately 1967. No further evidence of Ottawa Regional Linen Services Incorporated occupying the Site is provided in reviewed documentation. Due to this discrepancy, Geosyntec is limited in its ability to express an opinion regarding the potential for environmental impact to the Phase One Property from this operation.

- The ERIS report indicates that poor or inadequate address information was available for a total of 37 ‘unplottable sites’ located in the vicinity of the Phase One Property; therefore, these properties could not be readily mapped by ERIS. Because the location of these records with respect to the Phase One Property could not be discerned, Geosyntec is limited in its ability to express an opinion regarding the potential for environmental impact to the Phase One Property from these properties.
- Based on the review of previous environmental reports (see Section 4.1.5), select reports documenting environmental work conducted at the Phase One Property were not provided for Geosyntec’s review.

8. CONCLUSIONS

8.1 Requirement for a Phase Two Environmental Site Assessment

As discussed in Section 7.3, the Phase One ESA identified APECs for the Phase One Property. Therefore, a Phase Two ESA is required to be completed in accordance with O. Reg. 153/04.

8.2 Qualifications of the Assessors

Mikaela Rae Peet, B. A.Sc.

Ms. Rae Peet is a Staff Professional in the groundwater group of Geosyntec’s Ottawa operations. She obtained her Bachelor of Applied Science in the discipline of Geological Engineering from Queen’s University in 2021. She has experience providing field support for Phase I ESAs, groundwater sampling programs, landfill gas monitoring, and soil sampling for environmental and geotechnical assessments.

Brooke Wallace, B.Sc.

Ms. Wallace is a Senior Staff Professional in the Remediation Department of Geosyntec’s Waterloo operations. Ms. Wallace completed her Bachelor of Science (Honours) at the University of Guelph in 2015, majoring in Environmental Science. She has over four years of experience in the environmental consulting industry. Her areas of expertise include phased Environmental Site Assessments (ESAs), soil vapour and indoor air quality assessments, soil and ground water investigation, and remediation. Ms. Wallace has experience providing technical support and project management on client projects for transactional due diligence purposes, Ontario brownfields redevelopments (Records of Site Condition filings), and environmental litigation support. She has completed assessments across Canada for a variety of commercial and industrial land uses.

Berend Jan Velderman, P. Geo., QP_{ESA}, QP_{RA}

Mr. Velderman is a licensed Professional Geologist in the Province of Ontario, and a Qualified Person, Environmental Site Assessment (QP_{ESA}), as defined by O.Reg. 153/04, as amended. He represents that at the time of preparation of this Phase I ESA report, he has over the last 25+ years worked full-time as a geologist on a variety of environmental projects throughout Canada, the United States and globally. Mr. Velderman's technical focus throughout his career has been related to projects involving hydrogeology, environmental site investigations, remediation, and risk assessment. Included in his experience are the following types of work: property transaction environmental due diligence (e.g., Phase I and II ESAs; estimation of remediation costs; etc.); evaluation of compliance with environmental regulations; performance of remedial investigation/feasibility studies for contaminated properties; hydrogeology assessments of landfill sites, hydrogeology assessments of construction projects, evaluation of the applicability of remedial measures for contaminated soil, groundwater and surface water systems; execution of risk assessments; and filing of Records of Site Conditions (RSCs). Mr. Velderman has served as the signing author of over 200 environmental due diligence reports (Phase I and/or II ESAs) located in Canada, USA, Philippines and throughout Europe. Mr. Velderman holds a Masters of Science degree in Earth Sciences with Geochemistry Specialization.

Paula Hutchison, P. Eng., QP_{ESA}, QP_{RA}

Ms. Hutchison is a licensed Professional Engineer (P. Eng.) in the Province of Ontario, and for this Phase One ESA Report is the Qualified Person, Environmental Site Assessment (QP_{ESA}), as defined by O. Reg. 153/04, as amended. She is also a Qualified Person, Risk Assessment (QP_{RA}), as defined by O. Reg. 153/04, as amended. Ms. Hutchison is a Principal Engineer in the remediation group of Geosyntec's Canadian Operations, in Waterloo, Ontario. With more than 16 years of environmental consulting experience, Ms. Hutchison has capabilities in many areas of environmental engineering with special emphasis on environmental investigations, site characterization, site remediation, risk assessment and due diligence in property transactions. Paula has conducted and managed a range of projects for private and public sector clients in Canada and the United States.

8.3 Signatures

Geosyntec prepared this Phase One Environmental Site Assessment for the property located at 2625 Sheffield Road in Ottawa, Ontario in accordance with the requirements stipulated in O. Reg. 153/04, as amended.

The conclusion of this Phase One ESA is based on the best judgement of the QP_{ESA} and the results of the records review of the chain of title, city directory search, ERIS report, aerial photographs, interviews with personnel familiar with the Phase One Property, and completion of the Phase One Property Site reconnaissance.

This Phase One ESA was prepared and written by Brooke Wallace, B.Sc. and reviewed by Paula Hutchison, P. Eng., and QP_{ESA} for this Phase One ESA.

Respectfully Submitted,

Geosyntec Consultants International, Inc.

Brooke Wallace, B.Sc.
Senior Staff Scientist

Paula Hutchison, P. Eng., QP_{ESA}
Principal Engineer

APEC	Description
APEC #1	Fill material of unknown quality
APEC #2	Private fuel outlet with two USTs installed in 1978
APEC #3	Former truck repair and maintenance activities
APEC #4A	Former waste oil and supply oil USTs installed in 1976 and removed in 1999
APEC #4B	Material of unknown quality used to backfill the former waste oil and supply oil USTs in 1999
APEC #5A	Two former 10,000-gallon heating oil USTs
APEC #5B	Material of unknown quality used to backfill the former heating oil USTs
APEC #6	Former rail spurs
APEC #7	Material of unknown quality used to backfill the former building
APEC #8	Forklift battery washing and storage activities
APEC #9	Chemicals/wastes stored in the forklift repair area
APEC #10	On-Site fire that occurred in 2011
APEC #11	On-Site diesel spill that occurred in 2021
APEC #12A	Former dry cleaning operations to the north of the Phase One Property at 2575 Sheffield Road
APEC #12B	Current and former end of life vehicle waste disposal site operations to the north of the Phase One Property at 2575 Sheffield Road
APEC #13	Current railway on the adjoining lands to the east of the Phase One Property
APEC #14A	Current metal fabrication operations to the south of the Phase One Property at 1350 Humber Place
APEC #14B	Former waste processing facility to the south of the Phase One Property at 1350 Humber Place
APEC #15	Current and/or former electronics manufacturing operations to the northwest of the Phase One Property at 2574 Sheffield Road
APEC #16A	Former metal plating operations to the west of the Phase One Property at 2590 Sheffield Road
APEC #16B	Former metal fabrication operations to the west of the Phase One Property at 2590 Sheffield Road
APEC #17	Current and/or former automotive repair operations to the west of the Phase One Property at 2600-2616 Sheffield Road and 1325 Humber Place
APEC #18	Current and/or former commercial trucking operations to the west of the Phase One Property at 2612 and 2660 Sheffield Road
APEC #19	Current and/or former commercial printing operations to the west of the Phase One Property at 1335 Humber Place
APEC #20A	Former dry cleaning operations to the west of the Phase One Property at 2616 Sheffield Road
APEC #20B	Former textile restoration operations to the west of the Phase One Property at 2616 Sheffield Road
APEC #20C	Current and former organic waste processing and transfer facility operations to the west of the Phase One Property at 2612 Sheffield Road

Surveyor's Certificate

- 1. This survey and plan are correct and in accordance with the Surveys Act, the Surveyors Act and the Land Titles Act and the regulations made under them.
2. The survey was completed on the 4th day of April, 2019.

April 4, 2019 Date E. H. Henweyer Ontario Land Surveyor

Notes & Legend

Table with 2 columns: Denotes and Description. Includes symbols for Survey Monument Planted, Standard Iron Bar, Short Standard Iron Bar, Iron Bar, Cut Cross, Concrete Pin, Witness, Measured, Annis, O'Sullivan, Vollebek Ltd., Registered Plan 783, Plan 4R-25341, Plan 4R-29467, (AOG) Plan September 26, 1995, (AOG) March 13, 2015, Plan SR-13626, (1473) Plan Dated 1992, Fire Hydrant, Water Valve, Maintenance Hole (Storm Sewer), Maintenance Hole (Sanitary), Maintenance Hole (Unidentified), Borehole, Catch Basin, Overhead Wires, Monitoring Well, Gas Meter, Cable Terminal Box, Bollard, Sign, Gate, Utility Pole, Anchor, Chain Link Fence, Board Fence, Gas Valve, Wood Pole, Hydro Transformer, Diameter, Location of Elevations, Top of Concrete Curb / Retaining Wall Elevation, Concrete Retaining Wall, Closest and Lowest, Deciduous Tree, Coniferous Tree, Feature Limits Obscured by Ice (Taken From City of Ottawa Mapping).

Bearings are grid bearings, derived from the easterly limit of Sheffield Road having a bearing of N 23°40'00" W as shown on Plan 4R-25341 and are referred to the Central Meridian of MTM Zone 9 (76°30' West Longitude) NAD-83 (original). For bearing comparisons, a rotation of 0°36'30" counter-clockwise was applied to bearings on plan P3/P4 & P5.

Topographic data was collected under Winter Conditions. Snow cover and ice preclude determining location and elevation of some topographical data that is otherwise visible.

ELEVATION NOTES

- 1. Elevations shown are geodetic and are referred to the CGVD25 geodetic datum.
2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

UTILITY NOTES

- 1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
2. Only visible surface utilities were located.
3. A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating etc.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

- (h) Private Power Generation Yes No
 Alternative Power Source Yes No
- (i) Production Dependent on Pollution Control Equip't Yes No
- (j) Other Important Features Yes No

BUSINESS INTERRUPTION DETAILS:

7.

UNDESIRABLE FEATURES

Prominent: None.

Other: Various minor recommendations.

8.

REPORT DETAILS

2 (k) Non-Combustible Concealed Spaces: A 1.22m (4 ft.) deep blind unsprinklered area exists over the 353.4m² (3,800 sq. ft.) first floor office area.

2 (l) Smoke & Heat Venting: No smoke and heat venting is available due to surrounding blank walls; however this is considered a minor deficiency for the occupancy.

3 (a) Common Hazards: Heat is provided by natural gas-fired suspended unit heaters and by low pressure gas-fired boiler located in a shut-off room.

3 (b) Special Hazards: See under "Process Description".

3 (f) Hazardous Materials: Stored in a regular cut-off room are the following flammable liquids used in the woodworking shop and for restoring antique furniture:

- 10 - 22.7 L (5 gallon) cans of lacquer thinner;
- 100 - 4.54 L (1 gallon) cans of mainly oil based paints.

3 (g) Exposures:

North: Blank walls facing one storey concrete block building, 9.2m (30 f) away.

South: Blank wall facing one storey concrete block building, 22.3m (73 ft.) away.

4 (a)(iv) Additional Sprinklers Required:

- in the outside dust collector system
- in the 3.05m x 3.05m (10' x 10') spray booth
- in the 3.05m x 4.6m (10' x 15') plant office.

cont'd...

9. TENANTS:

NONE

SEE ATTACHED
LIST

REPORT DETAILS: (continued)

- 4 (a)(vi) Alarms: An Underwriters' Laboratories of Canada listed supervisory service of Universal Alarms Limited connected to their Central Station. Also, inside electric bell and outside water motor gong.
- 4 (a)(vii) Water Supplies: "Standard" single water supply from two manifolded 150mm (6") connections to a 300mm (12") municipal main with a static pressure of 427.8kPa (62 p.s.i.).
- 4 (a)(viii) Additional System Details: The sprinkler system is hydraulically designed to provide a density of 11.8mm/min (0.29 U.S. g.p.m. per sq. ft.) over 279m² (3,000 sq. ft.) using 1.35cm (17/32") sprinklers.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to pay the fine.

Investigation 1:
Investigation 2:
Penalty Imposed:
Description:

The City of Ottawa and its contractor were fined \$120,000 for failing to comply with a permit to take water and discharging sediment into Stillwater Creek, a tributary of the Ottawa River. 'Polluters should be aware that the ministry's Investigations and Enforcement Branch will vigorously pursue charges when our environmental laws are broken', said Environment Minister Jim Bradley. In 2010, the city awarded a contract for a water main installation along several streets in Ottawa to Colautti Construction Ltd. ' a local company that specializes in the construction of sewer and water lines. For dewatering required by construction, a permit to take water was issued to the City that required a number of conditions including turbidity testing. Following reports in August 2010 of possible impairments to Stillwater Creek as a result of drilling work, a ministry investigation found the company was responsible for a discharge of sediment into Stillwater Creek. Although there was no evidence of any actual impact to fish in Stillwater Creek as a result of the sediment discharge on that day, sediment discharges can adversely affect fish and benthic organisms. The City was also found to have not been conducting the required turbidity testing. The City of Ottawa and Colautti Construction Ltd. were fined a total of \$120,000 plus victim fine surcharges of \$30,000 and were given sixty days to pay the fines.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Nov 2021

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Sep 30, 2021

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2019

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Sep 30, 2021

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Dec 31, 2021

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Nov 30, 2021

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Dec 31, 2021

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Nov 30, 2021

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2021

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Nov 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Nov 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2021

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jan 2021

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Dec 31, 2021

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Nov 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Dec 31, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Sep 30, 2021

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Sep 2020

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Nov 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Sep 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

-Listings that are residential are listed as “residential” with the number of tenants. The name of the residential tenant is not listed in the above city directory.

APPENDIX F
REGULATORY AGENCY RESPONSES

Ministry of the Environment, Conservation and Parks

Freedom of Information Request for Property Information

Instructions

Use this form to:

- submit and pay for a new FOI request for access to records/information about a property
- pay for a deposit or a final fee on an existing FOI request

Fields marked with an asterisk (*) are mandatory.

Are you: *

- Submitting a new FOI Request for Property Information
- Paying a deposit or final fee for an existing FOI Request for Property Information

Section 1 – Description of Records Requested

Time Period for Records Requested

From (yyyy/mm/dd) *

1900/01/01

To (yyyy/mm/dd) *

2022/07/07

Type of Record(s) *

- All environmental records relating to the identified property/site exclusive of Environmental Approvals and Registrations
- Environmental Approvals and Registrations (e.g. Environmental Compliance Approvals; Certificate of Approval; Renewable Energy Approvals; Environmental Activity and Sector Registry Registrations)

Select only if you are seeking access to an Approval or Registration that is not publicly available or if you are also seeking supporting documents relating to the Approval or Registration.

Operator and vendor Pesticide Licenses from September 4, 2018, final Approvals and Registrations are publicly available on the Access Environment website at:

<https://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en>.

Records of Site Condition (RSC) records are publicly available on the Brownfields Environmental Site Registry (BSER).

- RSC records between 2004 to June 30, 2011 are available at:
<https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch>
- RSC records filed after July 2011 are available at:
https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc_search?request_locale=en

Other Specific Document(s)

Type of Approval/Registration *

- Drinking Water Licenses
- No Supporting Documents All Supporting Documents Some Supporting Documents
- Pesticide Licenses

Only pesticide licenses post September 2018 are available. Prior to September 2018, only Pesticide license applications and supporting documentation is available

No Supporting Documents All Supporting Documents Some Supporting Documents

Permits to Take Water

No Supporting Documents All Supporting Documents Some Supporting Documents

Water Source *

Groundwater Surface Water

Noise Vibrations Approvals/Registrations

No Supporting Documents All Supporting Documents Some Supporting Documents

Air Emissions Approvals/Registrations

No Supporting Documents All Supporting Documents Some Supporting Documents

Water Approvals/Registrations - Ontario Water Resources Commission, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster), mains

No Supporting Documents All Supporting Documents Some Supporting Documents

Sewage – Treatment, Stormwater, Storm, Leachate & Lieachate Treatment & Sewage pump stations, Sanitary

No Supporting Documents All Supporting Documents Some Supporting Documents

Waste Water - Industrial discharge

No Supporting Documents All Supporting Documents Some Supporting Documents

Waste Sites - Disposal, Landfill sites, Transfer stations, Processing sites, Incinerator sites

No Supporting Documents All Supporting Documents Some Supporting Documents

Waste Management Systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, Polychlorinated Biphenyls (PCBs) storage, transfer or destruction, Waste Generator Systems)

No Supporting Documents All Supporting Documents Some Supporting Documents

Company Name

Waste Generator Registration - number/class

List any record(s) that should be excluded from the scope of your request (e.g. email correspondences; records originating from your organization/business; records already in your possession, prior year(s) annual reports for approvals)

Please provide any additional relevant information relating to your request. For example, does your request relate to any other ministry business? Please note that this information is being requested only in order to provide contextual information to the Access and Privacy Office and will not in any way affect or expedite the status of any related ministry business identified.

Section 2 – Requester Information

Last Name * First Name * Middle Initial

Business/Organization Name (if applicable or indicate "N/A") *

Project/Reference Number (if applicable)

Are you submitting this request on behalf of a client? *

Yes No

Mailing Address

Unit Number Street Number * Street Name *

PO Box City/Town * Province * Postal Code *

Telephone Number * ext. Email Address *

Is there an alternate contact (e.g. office admin)? *

Yes No

Section 3 – Current Property Address Information

Is the property a:

Park Lake First Nation Band Wind Farm Federal Land Island Unsurveyed Land

Are you requesting information about multiple addresses? *

Yes No

Please only submit a request with multiple addresses if the property is one site. To be considered one site, addresses must be adjacent to each other and owned by the same owner(s).

Do the multiple addresses belong to one site? *

Yes No

Please submit a separate FOI request for each address.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe. If you have any suspicion, please confirm with the sender verbally that this email is authentic. If you suspect fraud, click "Phish Alert Report."

Please refrain from sending documents to head office. The Public Information (PI) team works remotely, mailing in applications will lengthen the overall processing time.

RECORD FOUND IN CURRENT DATABASE

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are records in our current database of fuel storage tanks at the subject address(es):

Inventory Number	Address	City	Province	Postal Code	Status	Asset Class / Inventory Context
10906767	2625 SHEFFIELD RD	OTTAWA	ON	K1G 3L2	Active	FS LIQUID FUEL TANK
10906788	2625 SHEFFIELD RD	OTTAWA	ON	K1G 3L2	Active	FS LIQUID FUEL TANK
9242648	2625 SHEFFIELD RD	OTTAWA	ON	K1G 3L2	Active	FS PRIVATE FUEL OUTLET - SELF SERVE

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click Release of Public Information - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue; When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at publicinformation@tssa.org.

Dear Madam/Sir:

We are in receipt of your correspondence wherein you requested the release of information regarding the above noted subject.

A search of TSSA public records **did not** identify/reveal/locate any documents relating to the following Program(s):

<u>Program</u>	<u>No Record</u>
Fuels Safety	<input type="checkbox"/>
Boiler/Pressure Vessel	<input type="checkbox"/>
Elevating & Amusement Devices	<input type="checkbox"/>

Requested records relating to the following Program(s) were located:

<u>Program</u>	<u>Record</u>	<u>Documents Attached</u>
Fuels Safety	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Boiler/Pressure Vessel**	<input type="checkbox"/>	<input type="checkbox"/>
Elevating & Amusement Devices	<input type="checkbox"/>	<input type="checkbox"/>
Other	<input type="checkbox"/>	<input type="checkbox"/>

**For BPV, if it has been indicated that records have been located but are not attached, it is likely that TSSA may not be the keeper of the records you are looking for, see note below.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

Should you have any questions, please contact Public Information at publicinformationservices@tssa.org.

Yours truly,

C. Hill

Connie Hill
 Public Information Services

Limitations and Notices:

TSSA Fuels Safety:

If you have environmental concerns regarding this property, you should consider hiring an environmental consultant to conduct an environmental assessment of the property in question.

- Sites that have not been licensed since 1987 may not be in TSSA records.
- Be advised, TSSA Fuels Safety Division did not register:
 - private fuel underground/ aboveground storage tanks prior to January of 1990; and
 - furnace oil tanks prior to May 1, 2002.
- Fuels Safety Division does not register
 - private waste oil tanks in apartments, office buildings, residences etc.; and
 - aboveground gas or diesel tanks.
- The *Technical Standards and Safety Act* and associated regulations do not require the registration of private fuel outlets, nor does it require that any documentation on these facilities be submitted to or reviewed or approved by TSSA. As a result, TSSA has limited information on these facilities. TSSA cautions that any information provided may be inaccurate, incomplete or out of date.

TSSA Elevating & Amusement Devices Program Notice:

- All orders and/or directions issued by the TSSA Inspector have a compliance date and the owner or designated contractor are required to comply within the specified time limit.
- All written declarations of compliance (where eligible) should be sent to TSSA. Once a declaration of compliance has been received, the outstanding order will be resolved.
- Each report shows the details and date of the inspection conducted by TSSA at the requested location.
- The Ontario Amusement Devices Regulation (O. Reg. 221/01) was adopted in 2001. Since that time, TSSA retains copies of technical dossiers of new amusement devices in Ontario (as per TSSA's retention policy). However, for rides that existed prior to the adoption of the Regulation, which were subject to a "grandfathering-in" clause, technical dossiers were not required to be filed with the TSSA. However, if the amusement ride remains in operation, as per ASTM requirements, the owner/licensee must possess an operations document for the device in question.

TSSA Boilers and Pressure Vessels (BPVs) Program Notice:

- Be advised, TSSA does not typically inspect BPVs. These inspections are usually performed by insurance companies.
- **Inspection reports are not always submitted to TSSA by insurance companies; therefore, while TSSA may have some evidence of a BPV at a location on file, there may be no inspection records pertaining to BPVs located at the address provided.
- As of July 1, 2018, BPVs in Ontario may not be operated unless the Director has issued a current certificate of inspection (COI) to the owner or operator. A COI will be issued to the owner or operator of the BPV by TSSA after TSSA has received a Record of Inspection (ROI) from the insurer/third-party inspector, the associated fees have been paid and the BPV has passed a periodic inspection.
- Please note that if the BPV in question is insured, the insurance company may have additional inspection records. Please contact the insurer directly should you wish to obtain further information.

Historic Land Use Inventory

Application Form

Notice of Public Record

All information and materials required in support of your application shall be made available to the public, as indicated by Section 1.0.1 of *The Planning Act*, R.S.O. 1990, C.P.13.

Municipal Freedom of Information and Protection Act

Personal information on this form is collected under the authority the *Planning Act*, RSO 1990, c. P. 13 and will be used to process this application. Questions about this collection may be directed by mail to Manager, Business Support Services, Planning, Real Estate and Economic Development Department, 110 Laurier Avenue West, Ottawa, K1P 1J1, or by phone at (613) 580-2424, ext. 24075

Background Information

*Site Address or Location:

* Mandatory Field

Site Details

Legal Description and PIN:

PT BLK A, PL 783, AS IN N282567 T/W OT70637; OTTAWA/GLOUCESTER and PT BLK A, PL 783, PART 1 & 2, 5R1419, S/T OT70637; OTTAWA/GLOUCESTER. 04262-0111 (LT) and 04262-0112 (LT)

What is the land currently used for?

Warehouse

Lot frontage: m Lot depth: m Lot area: _____ m²

OR Lot area: (irregular lot) m²

Does the site have Full Municipal Services: Yes No

Required Fees

Please don't hesitate to visit the [Historic Land Use Inventory website](#) more information. Fees must be paid in full at the time of application submission.

Planning Fee

\$132.00

Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Real Estate and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

Disclaimer
For use with HLUI Database

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Geosyntec Consultants  ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

Bedrock Geology Report

Bedrock Geology units found within 2000 m of
2625 Sheffield Road and 1360 Humber Place

Page 1
Order No.
22012700057

ID: 13323 | **Unit Name:** |
Type (All): 55b | **Type (Primary):** 55b | **Type (Secondary):** | **Type (Tertiary):** | **Rock Type (Primary):** Shale, limestone, dolostone, siltstone | **Strata (Primary):** Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member | **Super Eon (Primary):** | **Eon (Primary):** PHANEROZOIC (Present to 542.0 Ma) | **Era (Primary):** PALEOZOIC (251.0 Ma to 542.0 Ma) | **Period (Primary):** ORDOVICIAN (443.7 Ma to 488.3 Ma) | **Epoch (Primary):** UPPER ORDOVICIAN | **Province (Primary):**

ID - Unit ID **Unit Name** - Generalized geological unit classification

Type (All) - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

Type (Primary) - The primary geological unit number or code for the primary rock type in an individual polygon

Type (Secondary) - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

Type (Tertiary) - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

Rock Type (Primary) - Rock type or sub-unit description

Status (Primary) - The Stratigraphic unit. Divided into:

Supergroup (two or more groups and lone formations)
Group (two or more formations)
Formation (primary unit of lithostratigraphy)
Member (named lithologic subdivision of a formation)
Bed (named distinctive layer in a member or formation)

Super Eon (Primary) - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

PRECAMBRIAN (0.542 Ga to <3.85 Ga)

Eon (Primary) - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

ARCHEAN (2.5 Ga to <3.85 Ga)
PROTEROZOIC (0.542 Ga to 2.50 Ga)
PHANEROZOIC (Present to 542.0 Ma)

Era (Primary) - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

MESOARCHEAN (2.8 Ga to 3.2 Ga)	MESOPROTEROZOIC (1.0 Ga to 1.6 Ga)
NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga)	EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga)
NEOARCHEAN (2.5 Ga to 2.8 Ga)	NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga)
PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga)	PALEOZOIC (251.0 Ma to 542.0 Ma)
MESO-TO PALEOPROTEROZOIC (1.0 Ga to 2.5 Ga)	MESOZOIC (65.5 Ma to 251.0 Ma)

Period (Primary) - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

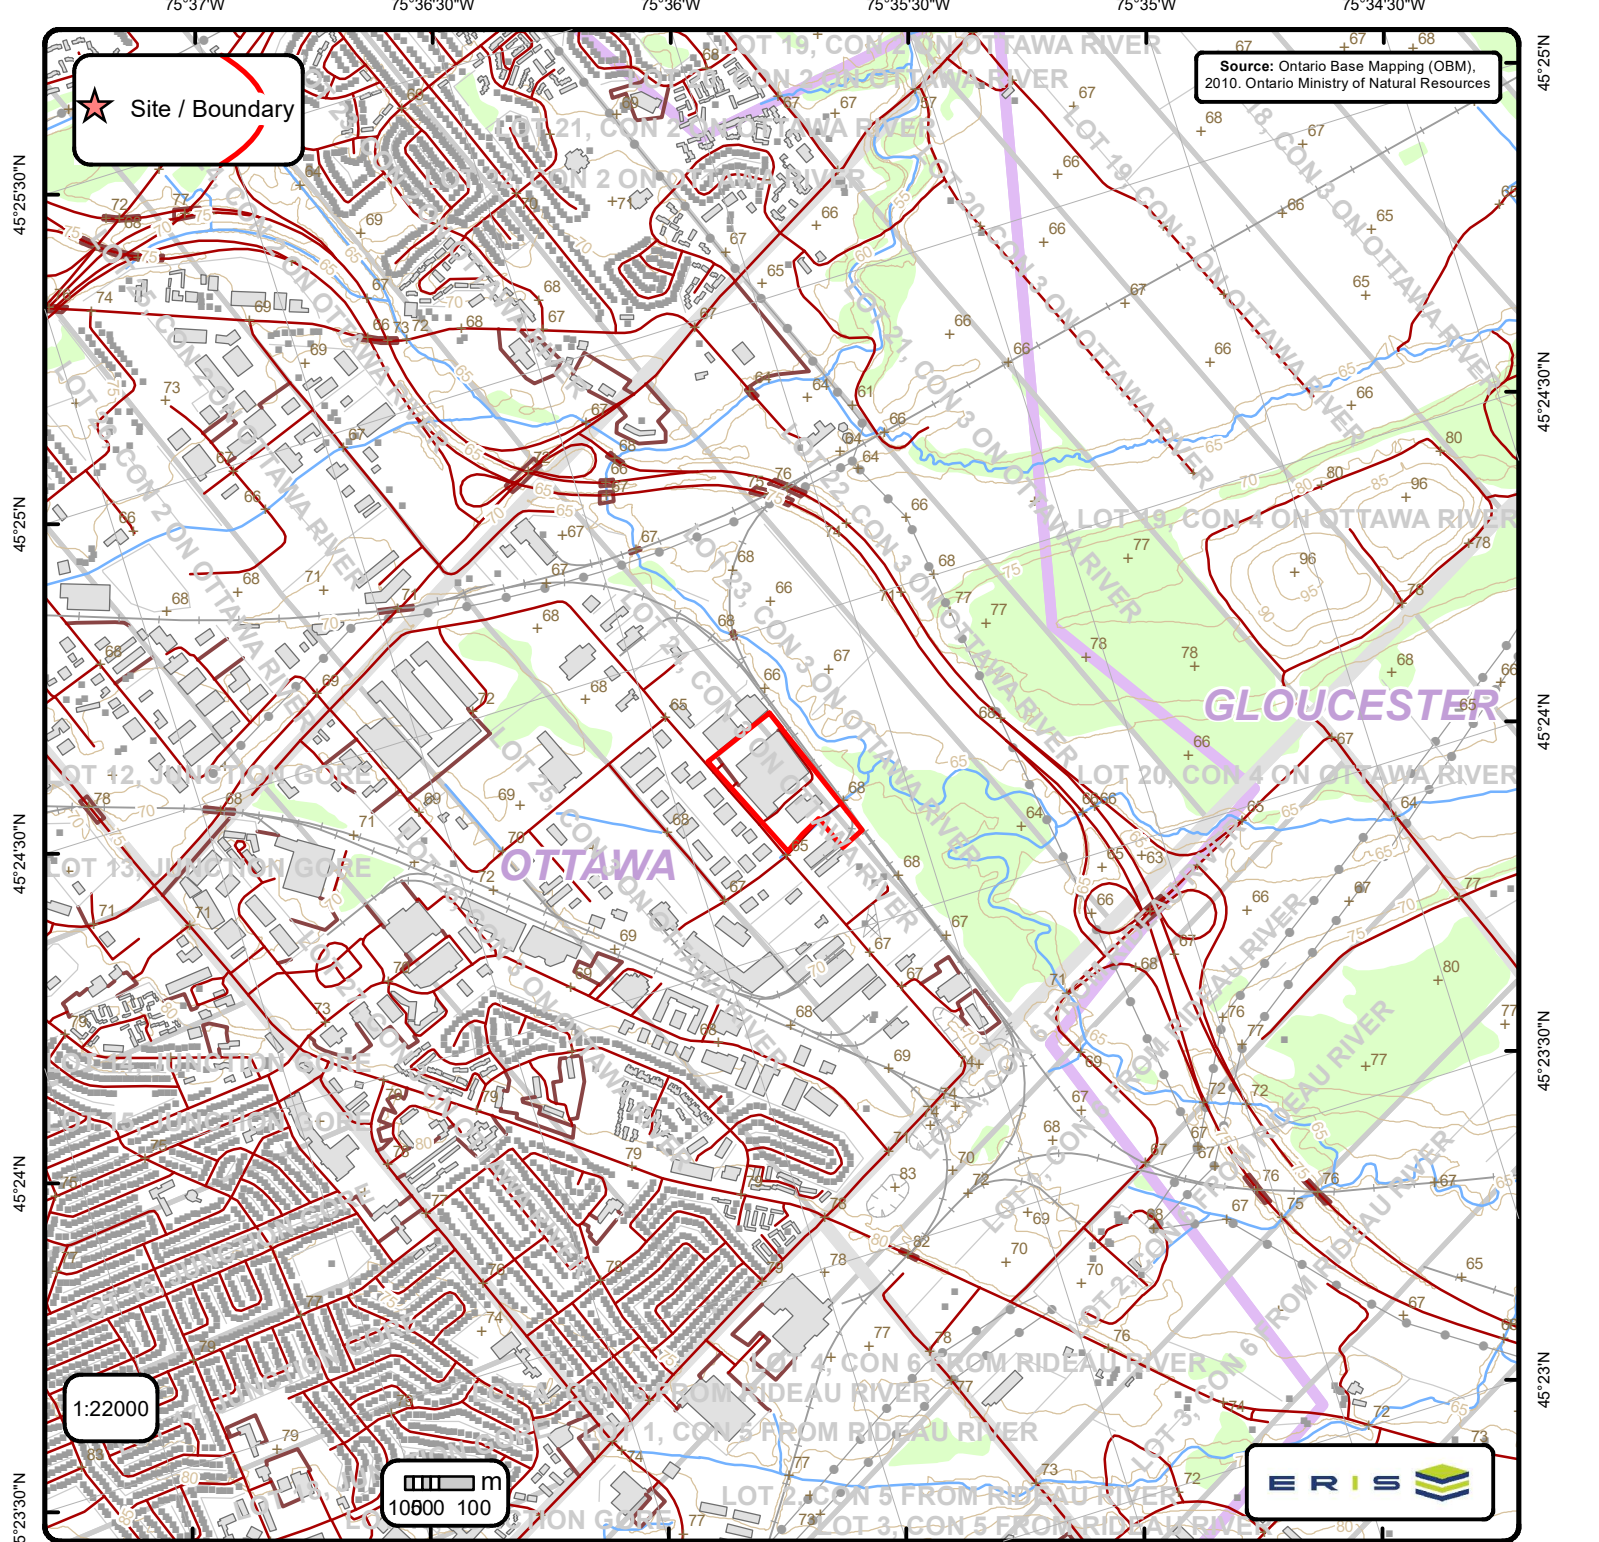

CAMBRIAN (488.3 Ma to 542.0 Ma)
ORDOVICIAN (443.7 Ma to 488.3 Ma)
SILURIAN (416.0 Ma to 443.7 Ma)
DEVONIAN (359.2 Ma to 416.0 Ma)
MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)
JURASSIC (145.5 Ma to 199.6 Ma)
CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)

Epoch (Primary) - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

LOWER ORDOVICIAN	UPPER SILURIAN
MIDDLE ORDOVICIAN	LOWER DEVONIAN
UPPER ORDOVICIAN	MIDDLE DEVONIAN
MIDDLE AND LOWER SILURIAN	UPPER DEVONIAN
UPPER SILURIAN TO LOWER DEVONIAN	LOWER CRETACEOUS AND MIDDLE JURASSIC

Province (Primary) - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

SUPERIOR
SOUTHERN
SUPERIOR
GRENVILLE

Surface Geology Report

Surface Geology units found within 2000 m of
2625 Sheffield Road and 1360 Humber Place

Page 3
Order No.
22012700057

No Surface Geology units found within search area.

ID - ID applied to the Unit

Unit Name - Name of deposit

Deposit Type Code - The geological unit number taken from the original map legend.

Deposit Age - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

Map Number - Original map series number, eg., 'M2402' or 'P1973'. Each sgu_point feature is tagged to its original map.

Map Name - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

Source Map Scale - The scale at which the original map was captured, e.g., '1:50 000'

Primary Material - This attribute provides the user with information regarding the most prevalent material present within a given area.

Primary Material Modifier - This attribute provides the user with a more refined description of the lithological classification of the primary material.

Secondary Material - This attribute provides the user with information regarding subordinate materials present within a given area.

Primary General - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

Primary General Modifier - This attribute provides the user with a refined interpretation of the primary genetic modifier.

Veneer - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Phase - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

Stratus Modifier - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

Provenance - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

Carbon Content - This attribute provides the user with information regarding the carbonate content of till.

Formation - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

Permeability - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

Material Description - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.
