## 1.0 EXECUTIVE SUMMARY

Pinchin Ltd. (Pinchin) was retained by Access Self Storage Inc. (Client) to complete a Phase One Environmental Site Assessment (Phase One ESA) of the property located at 864 Lady Ellen Place in Ottawa, Ontario (hereafter referred to as the Site or Phase One Property). The Phase One Property is presently developed with a two-storey commercial office building (Site Building).

Pinchin conducted this Phase One ESA in accordance with Part VII and Schedule D of the Province of Ontario's *Environmental Protection Act R.S.O. 1990, c. E.19* and *Ontario Regulation 153/04: Records of Site Condition – Part XV.1 of the Act*, and last amended by Ontario Regulation 274/20 on July 1, 2020 (O. Reg. 153/04). The purpose of the Phase One ESA was to assess the potential presence of environmental impacts at the Phase One Property due to activities at and near the Phase One Property.

The scope of work for this Phase One ESA was consistent with O. Reg. 153/04 in support of filing a Record of Site Condition (RSC) and was comprised of the following:

- A Records Review: Reviewed available current and historical information sources pertaining to the Phase One Property and Phase One Study Area including the use of, but not limited to aerial photographs, Fire Insurance Plans (FIPs), Property Underwriters' Reports (PURs), Property Underwriters' Plans (PUPs), city directories, wells records, Environmental Risk Information System regulatory search and a regulatory data base search. Regulatory agencies were also contacted to identify if any records of environmental non-compliance or other information associated with the environmental condition of the Phase One Property exists, including searches of Ministry of the Environment, Conservation and Parks (MECP) and Technical Standards and Safety Authority (TSSA) records;
- Interviews: Conducted interviews with a Site Representative (see Section 5.0) to determine if any current or historical operations have caused a concern with respect to the environmental condition of the Phase One Property and the surrounding properties within the Phase One Study Area;
- Site Reconnaissance: Completed a visual assessment of the Phase One Property and the surrounding properties within the Phase One Study Area (from publicly-accessible areas) including any associated buildings and/or facilities for the purpose of identifying the presence of potentially contaminating activities (PCAs);
- Evaluation: Evaluated the information gathered from the records review, interviews and Site reconnaissance;
- Reporting: Prepared a Phase One ESA report; and

- Submission: Submitted the Phase One ESA report to the Client.

The Phase One Property consists of one legal lot situated at the municipal address of 864 Lady Ellen Place, Ottawa, Ontario and is currently owned by Mr. Iqbal Khan. The Phase One Property is located immediately north of Lady Ellen Place, approximately 144 metres (m) northwest of the intersection of Lady Ellen Place and Laperriere Avenue, in Ottawa, Ontario.

To the best of Pinchin's knowledge, the Phase One Property consisted of vacant undeveloped land until the construction of the original portion of the Site Building in approximately 1960. Since construction of the Site Building, the Phase One Property has been utilized solely for commercial office purposes.

It is Pinchin's opinion that the date of the first developed use of the Phase One Property is approximately 1960, with the construction of the original portion of the Site Building on the Phase One Property. The date of the first developed use of the Phase One Property was determined through a review of aerial photographs, PURs, a PUP and FIPs, as well as an interview with the Site Representative. No other historical records were available to Pinchin that provided information for determining the date of first developed use of the Phase One Property.

Based on the findings of this Phase One ESA, Pinchin identified one PCA at the Phase One Property (i.e., on-Site) and 11 PCAs within the Phase One Study Area outside of the Phase One Property (i.e., off-Site). Of the off-Site PCAs, ten are not considered to result in APECs at the Phase One Property given their distance from the Phase One Property, time elapsed and/or the inferred groundwater flow direction. The remaining one off-Site PCA has resulted in a total of one APEC at the Phase One Property. It is Pinchin's opinion that this PCA may have impacted soil and groundwater quality at the Phase One Property and, as such, PCA # 4 has resulted in an APEC at the Phase One Property that warrants further investigation prior to the application of a Site Plan Approval application with the City of Ottawa.

Pinchin recommends that a Phase Two ESA be conducted at the Phase One Property as an "assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the location and concentration of one or more contaminants in the land or water on, in or under the property". Pinchin concludes that one or more contaminants originating from PCAs located within the Phase One Study Area outside of the Phase One Property may have affected land or water on, in, or under the Phase One Property. Therefore, Pinchin recommends that a Phase Two ESA be conducted prior to the application of a Site Plan Approval application with the City of Ottawa.

It should be noted that the references and sources for the information used in evaluating the Phase One Property are provided in the relevant sections of this report. Specific references are also summarized in Section 9.0.

*This Executive Summary is subject to the same standard limitations as contained in the report and must be read in conjunction with the entire report.*

*This report has been issued without having received a response from the MECP. Once a response from this regulatory body is received, the information will be reviewed by Pinchin and, if there is any information that represents a potential issue of environmental concern, a copy of the response will be forwarded to the Client under separate cover. Our conclusions and recommendations may be amended based on this information.*

## **2.0 INTRODUCTION**

A Phase One ESA is defined as a systematic qualitative process to determine whether a particular property is, or may be subject to, actual or potential contamination. Under the Province of Ontario's *Environmental Protection Act R.S.O. 1990, c. E.19* (EPA) and *Ontario Regulation 153/04: Records of Site Condition – Part XV.1 of the Act*, and last amended by Ontario Regulation 274/20 on July 1, 2020 (O. Reg. 153/04), the purpose of a Phase One ESA is two-fold:

- To obtain and review records that relate to the Phase One Property, and to the current and past uses of and activities at or affecting the Phase One Property, in order to determine if an area of potential environmental concern (APEC) exists and to interpret any APEC; and
- To obtain and review records that relate to properties in the Phase One Study Area, other than the Phase One Property, in order to determine if a potentially contaminating activity (PCA) exists and interpret whether any such PCA results in an APEC at the Phase One Property.

This Phase One ESA was conducted at the request of the Client as a condition for a Site Plan Approval application with the City of Ottawa.

A Phase One ESA does not include sampling or testing of environmental media or building materials. The study period for this assessment was during November 2021 to January 2022, which included the records review, Site reconnaissance, interviews and reporting.

### **2.1 Phase One Property Information**

The Phase One Property consists of one legal lot situated at the municipal address of 864 Lady Ellen Place, Ottawa, Ontario and is currently owned by Mr. Iqbal Khan. The Phase One Property is located immediately north of Lady Ellen Place, approximately 144 metres (m) northwest of the intersection of Lady Ellen Place and Laperriere Avenue, in Ottawa, Ontario, as shown on Figure 1 (all Figures are provided in Appendix A and all appendices are provided in Section 10.0). A plan showing the Phase One Property is provided as Figure 2. PCAs identified within the Phase One Study Area are depicted on

Figure 3. Photographs of the Phase One Property and surrounding properties are presented in Appendix B.

Pertinent details of the Phase One Property are provided in the following table:

<b>Detail</b>	<b>Source / Reference</b>	<b>Information</b>
Legal Description	N/A (legal land survey currently being prepared by Client)	N/A

Site Area	Site Representative	10,422 m <sup>2</sup> (2.57 acres)

### **3.0 SCOPE OF INVESTIGATION**

Pinchin conducted this Phase One ESA in accordance with O. Reg. 153/04, in particular Part VII and Schedule D of O. Reg. 153/04. The Phase One ESA scope of work was comprised of the following:

- A Records Review: Reviewed available current and historical information sources pertaining to the Phase One Property and Phase One Study Area including the use of, but not limited to aerial photographs, Fire Insurance Plans (FIPs), Property Underwriters' Reports (PURs), Property Underwriters' Plans (PUPs), city directories, wells records, Environmental Risk Information System (ERIS) regulatory search and a regulatory data base search. Regulatory agencies were also contacted to identify if any records of environmental non-compliance or other information associated with the environmental condition of the Phase One Property exists, including searches of Ministry of the Environment, Conservation and Parks (MECP) and Technical Standards and Safety Authority (TSSA) records;

- Interviews: Conducted interviews with a Site Representative (see Section 5.0) to determine if any current or historical operations have caused a concern with respect to the environmental condition of the Phase One Property and the surrounding properties within the Phase One Study Area;
- Site Reconnaissance: Completed a visual assessment of the Phase One Property and the surrounding properties within the Phase One Study Area (from publicly-accessible areas) including any associated buildings and/or facilities for the purpose of identifying the presence of potentially contaminating activities (PCAs);
- Evaluation: Evaluated the information gathered from the records review, interviews and Site reconnaissance;
- Reporting: Prepared a Phase One ESA report; and
- Submission: Submitted the Phase One ESA report to the Client.

## **4.0 RECORDS REVIEW**

### **4.1 General**

Identified off-Site PCAs described in this and subsequent report Sections are depicted on Figure 3. APECs in the Phase One Study Area are illustrated on Figure 4.

A Phase One ESA does not include sampling or testing of environmental media or building materials. The study period for this assessment was during November 2021 to January 2022, which included the records review, Site reconnaissance, interviews and reporting. A Site reconnaissance was completed on November 29, 2021, by a Pinchin representative under the direct supervision of a Qualified Person (QP). During the Site reconnaissance, Pinchin accessed the interior of the Site Building and all exterior areas of the Phase One Property. Pinchin did not access any areas within the surrounding Phase One Study Area with the exception of publicly-accessible roads and sidewalks. Select photographs taken during the Site reconnaissance of the Phase One Property and the surrounding properties within the Phase One Study Area are presented in Appendix B.

#### *4.1.1 Phase One Study Area Determination*

Based on a review of the available historical information and observations made during the Site reconnaissance for the properties greater than 250 m, but less than 1 kilometre (km), from the Phase One Property boundary, Pinchin did not note or observe any significant potentially contaminating properties that should be included as part of this assessment (e.g., landfills, large industrial manufacturers, etc.). As such, the Phase One Study Area consisted of the Phase One Property, as well as all properties situated

wholly, or partly, within 250 m from the nearest point of a boundary of the Phase One Property, in order to meet the minimum requirements set forth in O. Reg. 153/04.

#### *4.1.2 First Developed Use Determination*

The first developed land use of the Phase One Property is defined by O. Reg. 153/04 to be the earlier of:

- The first use of a Phase One Property in or after 1875 that resulted in the development of a building or structure on the property; and
- The first potentially contaminating use or activity on the Phase One Property.

A review of the aerial photographs, PURs, a PUP and FIPs, as well as an interview with the Site Representative, indicated that the Phase One Property was developed with the original portion of the Site Building in approximately 1960 with additions construction along the southeast elevation of the Site Building in approximately 1965 and 1970. The 1973 and 1984 PURs, 1984 PUP, 1965 FIPs and 1965 aerial photograph indicated that the original portion of the Site Building was present on the Phase One Property. In addition, The Site Representative noted that the original portion of the Site Building was constructed in approximately 1955 with additions along the southeast elevation of the Site Building in approximately 1965 and 1970; however, based on the historical review, it is Pinchin's opinion that the original portion of the Site Building was constructed in approximately 1960.

The date of the first developed use of the Phase One Property was determined through a review of aerial photographs, as well as the FIPs, PURs and a PUP and an interview with the Site Representative. No other information was reviewed by Pinchin during the records review or obtained during the Site reconnaissance or interviews, which would have resulted in a different interpretation of the date of first developed use of the Phase One Property.

#### *4.1.3 Fire Insurance Plans*

Pinchin contacted Opta Information Intelligence (Opta) to obtain copies of FIPs related to the Phase One Property and the Phase One Study Area. Opta provided Pinchin with copies of FIPs dated 1965 for the area including the Phase One Property.

The Opta response and copies of the FIPs are provided in Appendix C.

The following general information, including details regarding the Phase One Property and the Phase One Study Area, was noted in the 1965 FIPs:

- The FIPs covered the Phase One Property and the surrounding properties within a 250 m radius of the Phase One Property;
- The Phase One Property possessed the municipal address of 864 Lady Ellen Place;

- The Phase One Property appeared to be developed with a building of similar size and configuration to the original portion and addition along the southeast elevation of the present-day Site Building, and was utilized for commercial office purposes;
- The adjacent and surrounding properties consisted of residential, commercial and light industrial land uses;
- No operations or items of potential environmental concern were identified within the Phase One Study Area;
- The following PCA located within the Phase One Study Area outside of the Phase One Property was identified that is considered to result in an APEC at the Phase One Property:

- Thomas Supply & Equipment Co. Ltd. was located adjacent to the northeast elevation of the Phase One Property at 1550 Carling Avenue in 1965 and conducted cosmetics manufacturing.

Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does result in an APEC at the Phase One Property

- The following PCAs located within the Phase One Study Area outside of the Phase One Property were identified but are not considered to result in APECs at the Phase One Property:
  - Vail's Clean-O-Mat (i.e., a dry cleaner) was located approximately 75 m northwest of the Phase One Property at 1572 Carling Avenue in 1965;
  - Taggart Service Ltd. was located approximately 188 m southwest of the Phase One Property at 885 Churchill Avenue South in 1965. Underground storage tanks (USTs) were located adjacent to the north elevation of the building on this property; and
  - An RFO was located approximately 230 m northwest of the Phase One Property at 1596 Carling Avenue in 1965. Four USTs were present on the south portion of this property.

Based on the distance between these properties and the Phase One Property, it is Pinchin's opinion that these PCAs do not result in APECs at the Phase One Property.

#### 4.1.4 *Environmental Reports*

The following previous environmental reports for the Phase One Property provided by the Client were reviewed by Pinchin:

- Report entitled “*Phase One Environmental Site Assessment, 864 Lady Ellen Place, Ottawa, Ontario*”, prepared by Golder Associates Ltd. (Golder) for J.L. Richards & Associates Limited, and dated May 2019 (2019 Golder Phase One ESA Report); and
- Report entitled “*Phase Two Environmental Site Assessment, 864 Lady Ellen Place, Ottawa, Ontario*”, prepared by Golder for J.L. Richards & Associates Limited, and dated December 2019 (2019 Golder Phase Two ESA Report).

Pinchin reviewed the available soil and groundwater sample analytical data provided in the above-referenced reports to assess whether there are any known soil and groundwater impacts at the Phase One Property or on properties within the Phase One Study Area.

Given the available information on the characteristics of the Phase One Property and its land use (i.e., commercial), the applicable Site Condition Standards, as defined by the MECP in the document “*Soil, Ground Water and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act*”, dated April 15, 2011, are:

- *Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Groundwater Condition (Table 3 Standards)* for industrial/commercial/community property use (i.e., the proposed future use of the Phase One Property) and coarse-textured soils.

As such, the analytical data provided in the previous reports were compared with the *Table 3 Standards* to assess whether there are any known areas on the Phase One Property or in the Phase One Study Area where soil or groundwater has parameter concentrations exceeding the *Table 3 Standards*.

A summary of the salient information identified in the reports is provided below.

#### 2019 Golder Phase One ESA Report

The Phase One ESA completed by Golder in May 2019 was conducted at the Phase One Property in order to investigate the following PCAs for the Phase One Property and Phase One Study Area:

- Former RFO and automotive repair/servicing facility located approximately 235 m northwest of the Phase One Property at 1575, 1593 and 1599 Carling Avenue. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Former automotive repair/servicing facility with associated USTs located approximately 185 m north of the Phase One Property at 1525 Carling Avenue. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Former RFO located approximately 210 m north of the Phase One Property at 1507 Carling Avenue. Golder indicated that this PCA does not result in an APEC at the Phase One Property;

- Former RFO and automotive repair/servicing facility located approximately 100 m northwest of the Phase One Property at 1596 and 1604 Carling Avenue. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Former dry cleaning facility located approximately 110 m northwest of the Phase One Property at 1568 Carling Avenue. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Former automotive repair/servicing facility with associated ASTs and USTs located approximately 200 m west of the Phase One Property at 885 Churchill Avenue South. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Current automotive repair/servicing facility located approximately 245 m southwest of the Phase One Property at 890-900 Churchill Avenue South. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Current automotive repair/servicing facility located 240 m southwest of the Phase One Property at 891 Bellevue Avenue. Golder indicated that this PCA does not result in an APEC at the Phase One Property;
- Former automotive repair/servicing facility located approximately 200 m southwest of the Phase One Property at 895 Churchill Avenue South. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former and current automotive repair/servicing facility with associated ASTs and USTs located approximately 90 m southwest of the Phase One Property at 1551 Laperriere Avenue. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former and current automotive repair/servicing facility with associated ASTs and USTs located approximately 180 m southwest of the Phase One Property at 920 McBride Street. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former heating oil tank, and former commercial printing operation located approximately 75 m southeast of the Phase One Property at 889 Lady Ellen Place. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Various former activities including cosmetics manufacturing, commercial printing and industrial diesel-powered emergency generator located adjacent to the northeast elevation of the Phase One Property at 1550 Carling Avenue. Golder indicated that this PCA does result in an APEC at the Phase One Property;

- Former and current automotive repair/servicing facility with associated ASTs and USTs located approximately 110 m northeast of the Phase One Property at 1500 Carling Avenue. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former manufacturing including spray booth, welding and lead furnaces located approximately 100 m southwest of the Phase One Property at 1529 Laperriere Avenue. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former warehouse with truck storage at the rear of the building and former commercial printing located approximately 45 m southeast of the Phase One Property at 888 Lady Ellen Place. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former commercial printing and equipment sale located approximately 40 m southeast of the Phase One Property at 881 Lady Ellen Place. Golder indicated that this PCA does result in an APEC at the Phase One Property;
- Former fabricated structural metals products industry located approximately 230 m southwest of the Phase One Property at 1550 Laperriere Avenue. Golder indicated that this PCA does result in an APEC at the Phase One Property; and
- Former truck transport industry and industrial chemical industry located adjacent to the southwest elevation of the Phase One Property at 1519 Laperriere Avenue. Golder indicated that this PCA does result in an APEC at the Phase One Property.

Based on the above-noted PCAs, Golder recommended a Phase Two ESA be conducted at the Phase One Property to investigate potential environmental impacts due to the environmental concerns outlined above.

#### 2019 Golder Phase Two ESA Report

The Phase Two ESA conducted by Golder in December 2019 was conducted at the Phase One Property in order to investigate potential environmental impacts related to the APECs noted in the 2019 Golder Phase One ESA Report. The Phase Two ESA detailed the advancement of three boreholes on the central (19-01), southeast (19-02) and northwest (19-03) portions of the Phase One Property in June 2019. In addition, each borehole was completed as a groundwater monitoring well. A total of four soil samples were collected from the boreholes and four groundwater samples were collected from the groundwater monitoring wells and submitted for laboratory analyses of petroleum hydrocarbons fractions F1 to F4 (PHCs), volatile organic compounds (VOCs), benzene, toluene, ethylbenzene and xylene (BTEX), pH, metals and sodium adsorption ratio (SAR).

Criteria used for the evaluation of soil and groundwater laboratory analysis results were the generic Table 3 Standards.

The results of the laboratory analysis for the four soil samples and four groundwater samples indicated that the concentrations of the parameters tested (PHCs, VOCs, BTEX, pH, metals and SAR) were either non-detect or below the applicable Table 3 Standards; with the exception of an elevated SAR concentration in the soil sample collected from 19-01, and elevated VOC and SAR concentrations in the groundwater sample collected from 19-02. The elevated SAR concentrations are likely due to the application of deicing agents (salt) at the property and surrounding roadways.

Based on the results of the 2019 Golder Phase Two ESA Report, additional subsurface investigations were recommended to define the vertical and horizontal extent of VOC impacts in the southeastern portion of the Phase One Property that were reported to be likely associated with former off-Site commercial printing activities and/or former off-Site cosmetics manufacturing on the properties located adjacent to the northeast elevation and 40 m southeast of the Phase One Property.

#### *4.1.4.1 Previous Environmental Report Summary*

Based on Pinchin's review of the above-referenced previous environmental reports, no additional PCAs were identified within the Phase One Study Area that are considered to result in APECs at the Phase One Property.

## **4.2 Environmental Source Information**

Pinchin reviewed the historical use of the Phase One Study Area through the use of publicly available archives and databases, as well as through requesting information from regulatory agencies. The following provides a summary of the information obtained from these sources.

### *4.2.1 Environmental Database Search – ERIS*

Pinchin retained ERIS to search all available federal, provincial and private source databases for information pertaining to the Phase One Study Area. Unless otherwise noted, information obtained from the ERIS database search was reviewed for the entire Phase One Study Area. A copy of the ERIS report is provided in Appendix D and the results of the database search are described in the following sections.

#### *4.2.1.1 National Pollutant Release Inventory*

ERIS completed a search of the federal databases for information regarding the National Pollutant Release Inventory (NPRI). This database contains comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances and identifies information such as the approximate location, type and quantity of contaminant, date of release, and media impacted.

Pinchin reviewed the ERIS report for NPRI information and found no records regarding the Phase One Property. Three records were identified for other properties located within the Phase One Study Area. None of the records pertained to releases to soil and water and, as such, it is Pinchin's opinion that the potential for the documented releases to be an environmental concern for the Phase One Property is considered low and are not PCAs for the purpose of this Phase One ESA.

#### *4.2.1.2 Ontario Inventory of PCB Storage Sites*

The MECP's Waste Management Branch maintains an inventory of polychlorinated biphenyls (PCBs) storage sites within Ontario. Ontario Regulation 11/82 and Ontario Regulation 347 (O. Reg. 347), made under the EPA, require the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the MECP. This database contains information on waste quantities, major and minor sites storing liquid or solid waste, and a waste storage inventory.

ERIS completed a search of the Ontario Inventory of PCB Storage Sites for information regarding PCB storage and found no information regarding the Phase One Study Area.

#### *4.2.1.3 National PCB Inventory*

Environment Canada maintains an inventory of in-use PCB-containing equipment at federal, provincial and private facilities in Canada, and of out-of-service PCB-containing equipment and PCB waste owned by the federal government or federally regulated industries.

ERIS completed a search of the National PCB Inventory and found no information regarding the Phase One Study Area.

#### *4.2.1.4 Certificates of Approval*

ERIS completed a search of the MECP database for information regarding Certificates of Approval (Cs-of-A). The MECP maintains a database of approved Cs-of-A for Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. Prior to November 1, 2011, the MECP mandated that any facility that released emissions to the atmosphere, discharged contaminants to ground or surface water, provided potable water supplies, or stored, transported or disposed of waste, must have a C-of-A before it could operate lawfully. The MECP no longer issues Cs-of-A, which were replaced by Environmental Compliance Approvals (ECAs) as of November 1, 2011. O. Reg. 153/04 indicates that information from the C-of-A database only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property.

The ERIS search of the C-of-A database did not identify any Cs-of-A for the Phase One Property; however, ten Cs-of-A were identified for properties adjacent to the Phase One Property. Nine of these Cs-of-A were for air emissions, sewage works and municipal water work.

The following property adjacent to the Phase One Property within the C-of-A Database Review Area was identified as a C-of-A and is a PCA:

- The property located at 1550 Carling Avenue applied for a C-of-A to install a diesel-powered emergency generator on March 6, 2002, and is within the Phase One Study Area. This property is located adjacent to the northeast elevation of the Phase One Property and is situated hydraulically downgradient of the Site relative to the inferred groundwater flow direction. Based on the short duration of the emergency generator, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

#### *4.2.1.5 Environmental Compliance Approvals, Permits To Take Water and Certificates of Property Use*

ERIS completed a search of the MECP database for information regarding ECAs, permits including Permits To Take Water (PTTWs) and Certificates of Property Use (CPUs). O. Reg. 153/04 indicates that information from these databases only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. Details regarding these databases are provided in the ERIS report in Appendix D.

The ERIS search of the ECA database identified one ECA for the Phase One Property and one ECA for properties adjacent to the Phase One Property. All of these ECAs were for air emissions, sewage works and municipal water works and no ECAs were identified for discharge to groundwater, which is considered the primary pathway of concern for contaminant impacts on the Phase One Property. As such, Pinchin does not consider the activities related to ECAs at the Phase One Property and properties adjacent to the Phase One Property to represent PCAs.

#### *4.2.1.6 Inventory of Coal Gasification Plants*

ERIS searched the following publications prepared for the MECP by Intera Technologies Inc. for information on industrial sites that formerly operated as coal gasification plants, and industrial sites that produced or used coal tar and other related tars:

- “*Inventory of Coal Gasification Plant Waste Sites in Ontario*”, dated April 1987; and
- “*Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario*”, dated November 1988.

The ERIS search yielded no records of former coal gasification plants or the production or use of coal tar and related tars within the Phase One Study Area.

#### *4.2.1.7 Environmental Incidents, Orders, Offences and Spills*

ERIS completed a search of the various provincial and federal databases for information regarding environmental incidents, orders, offences and spills. O. Reg. 153/04 indicates that information from these databases only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. Details regarding the searched databases are provided in the ERIS report in Appendix D.

The ERIS database search revealed no records of environmental incidents, orders, offences or spills for the Phase One Property and properties adjacent to the Phase One Property.

#### *4.2.1.8 Waste Management Records*

##### Waste Generators

ERIS completed a search of the O. Reg. 347 Waste Generators database for information regarding waste generation. O. Reg. 347 defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution, etc. The database search results provide a summary of available waste generation information for the registered sites for all years from 1986 to the present.

O. Reg. 153/04 indicates that information from the Waste Generator database only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. However, in addition to the Phase One Property and adjacent off-Site properties, Pinchin reviewed the database for waste generators within 50 m transgradient and 100 m upgradient of the Phase One Property with respect to the inferred groundwater flow direction. The area reviewed will be referred to as the Waste Generator Database Review Area.

The ERIS search of the O. Reg. 347 Waste Generators database found the following information regarding the Phase One Property:

- The Phase One Property, Golder Associates Inc., had been registered with the MECP as a generator (Generator # ON9646514) of various hazardous wastes in 2013. Based on a review of Pinchin's in-house MECP Waste Generator database, approximately 50 kilograms (kg) of oil skimmings and sludges were generated on the Phase One Property in 2013. Based on the minor quantities of hazardous wastes generated, it is Pinchin's opinion that this historical generation of hazardous waste does not represent a PCA at the Phase One Property.

One other property located within the Waste Generator Database Review Area was listed within the O. Reg. 347 Waste Generators database search results as a waste generator and is considered a PCA.

- Canso Printing Services Ltd., located at 881 Lady Ellen Place, had been registered with the MECP as a generator (Generator #ON1657701) of paint/pigment/coating residues and photoprocessing wastes from 1994 to 1998. Based on a review of Pinchin's in-house MECP Waste Generator database, approximately 892 kg of paint/pigment/coating residues and photoprocessing wastes were generated at this property from 1995 to 1998. This property is located approximately 40 m southeast of the Phase One Property and is situated hydraulically transgradient of the Phase One Property relative to the inferred groundwater flow direction. Based on nature of the hazardous wastes (i.e., paint/pigment/coating residues and photoprocessing wastes), as well as the distance between this property and the Phase One Property, it is Pinchin's opinion that the generation of hazardous wastes at this property could result in potential subsurface impacts at the Site; and
- Podium Machine Works Inc., located at 888 Lady Ellen Place, has been registered with the MECP as a generator (Generator # ON6611005) of emulsified oils since 2018. Based on a review of Pinchin's in-house MECP Waste Generator database, approximately 8,236 kg of emulsified oils were generated at this property from 2018 to 2020. This property is located 45 m southeast of the Phase One Property and is situated hydraulically transgradient of the Phase One Property relative to the inferred groundwater flow direction. Based on the distance between this property and the Phase One Property, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this historical generation of hazardous waste does not represent a PCA at the Phase One Property.

Further details regarding the types of waste and timeframe when wastes were generated at this property is provided in the ERIS report in Appendix D.

### Waste Receivers

ERIS completed a search of the O. Reg. 347 Waste Receivers database for information regarding waste receivers. O. Reg. 347 defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database contains registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants.

O. Reg. 153/04 indicates that information from the Waste Receivers database only needs to be obtained for the Phase One Property and properties adjacent to the Phase One Property. However, in addition to the Phase One Property and adjacent off-Site properties, Pinchin reviewed the database for waste generators within 50 m transgradient and 100 m upgradient of the Phase One Property with respect to the inferred groundwater flow direction. The area reviewed will be referred to as the Waste Receivers Database Review Area.

The ERIS search of the O. Reg. 347 Waste Receivers database found no information regarding the Waste Receivers Database Review Area.

#### *4.2.1.9 Fuel Storage Tanks*

ERIS completed a search of various private, provincial and federal databases for information regarding chemical storage tanks, as well as private and retail fuel storage tanks. Details regarding the searched databases are provided in the ERIS report in Appendix D.

The ERIS search of the chemical and fuel storage tank databases found no information regarding the Phase One Property.

The ERIS search of the chemical and fuel storage tank databases identified the following other properties within the Phase One Study Area with records of chemical and/or fuel storage tanks:

- The property located at 1551 Laperriere Avenue was listed in the Fuel Storage Tanks database as a former RFO, which had two 22,700-Litre (L) diesel USTs, one 22,700-L gasoline UST and one 9,092-L gasoline UST. This property is located 155 m southwest of the Phase One Property. Based on the distance between this former RFO and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- The property located at 1500 Carling Avenue was listed in the Fuel Storage Tanks database as a former automotive repair/servicing facility, which had a 13,500-L gasoline UST. This property is located approximately 105 m northeast of the Phase One Property and is situated hydraulically downgradient of the Phase One Property relative to the inferred groundwater flow direction. Based on the distance between this property and the Phase One Property, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- The property located at 885 Churchill Avenue South was listed in the Private and Retail Fuel Storage Tanks database as a former RFO, which had two USTs of unspecified volumes. This property is located approximately 155 m southwest of the Phase One Property. Based on the distance between this property and the Phase One Property, it is

Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;  
and

- The property located at 920 McBride Street was listed in the Fuel Storage Tanks database as having two 3,785-L diesel USTs, one 18,100-L diesel UST and one 4,500-L gasoline UST. This property is located approximately 180 m south of the Phase One Property. Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

#### **4.2.1.10**      *Notices and Instruments*

ERIS completed a search of the provincial Environmental Registry for records pertaining to proposals, decisions, and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. ERIS also searched the Record of Site Condition database for filed RSCs.

The ERIS database search of the Environmental Registry and Record of Site Condition database indicated the following for the Phase One Study Area:

- No records were found in the Environmental Registry and Record of Site Condition database for the Phase One Property; and
- No records were found in the Environmental Registry and Record of Site Condition database for other properties within the Phase One Study Area except for the following:
  - One database search result comprising of one RSC. None of the search results were related to potential impacts on groundwater quality, which is considered the primary pathway of concern for contaminant migration to the Phase One Property. As such, there is a low potential for the Environmental Registry and Record of Site Condition database search results to be indicative of discharges to the environment that represent an environmental concern to the Phase One Property and the likelihood of potential impacts to the Phase One Property is considered low.

#### **4.2.1.11**      *Areas of Natural Significance*

ERIS reviewed available databases and records to assess whether any parks, wetlands, conservation areas, or other areas of natural significance, are located within the Phase One Study Area. The Area of Natural & Scientific Interest map is included in the ERIS report in Appendix D. In addition, Pinchin reviewed information provided on the Ministry of Natural Resources and Forestry's (MNRF) Natural Heritage Information Centre (NHIC) website. No areas of natural significance were identified within the Phase One Study Area from these information sources.

#### **4.2.1.12 Landfill Information**

ERIS reviewed available private and provincial databases for records of any current or inactive landfills and waste disposal sites within the Phase One Study Area. Details regarding the searched databases are provided in the ERIS report in Appendix D.

The ERIS search of the landfill and waste disposal sites databases found no information regarding the Phase One Study Area.

#### **4.2.1.13 Other ERIS Databases**

The ERIS database search of the Scott's Manufacturing Directory database identified the following additional information for the Phase One Study Area:

- The property located at 1550 Carling Avenue is registered in the Scott's Manufacturing Directory database as a sign manufacturer and is within the Phase One Study Area. This property is located adjacent to the northeast elevation of the Phase One Property and is situated hydraulically downgradient of the Site relative to the inferred groundwater flow direction. Based on the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

#### **4.2.2 Ministry of the Environment, Conservation and Parks Freedom of Information Search**

The search was requested on November 24, 2021. At the time of writing this report, no response had been received from the MECP. When a formal response is received, it will be reviewed by Pinchin. If there is any information that represents a potential issue of environmental concern, a copy of the response will be forwarded to the Client under separate cover. Our conclusions and recommendations may be amended based on this information. A copy of the MECP request is provided in Appendix E.

#### **4.2.3 Technical Standards and Safety Authority Search**

The TSSA is the regulatory body that governs the safe handling and storage of fuel in Ontario. All storage of gasoline, diesel and fuel oil is subject to the Technical Standards and Safety Act. The Technical Standards and Safety Act and its relevant documents and regulations (e.g., *Liquid Fuels Handling Code*, *Ontario Regulation 213/01 – Fuel Oil*, *Ontario Regulation 217/01 – Liquid Fuels*) require that all fuel storage devices such as aboveground storage tanks (ASTs) and USTs be registered with the TSSA.

Pinchin contacted the TSSA to determine whether any ASTs or USTs are, or were, registered for the Phase One Property. A letter response was issued by the TSSA on December 15, 2021, indicating that following a search of the TSSA files, no outstanding instructions, incident reports, fuel oil spills or contamination records, or records of registered ASTs or USTs were found for the Phase One Property.

#### 4.2.4 *Property Underwriters' Reports and Plans*

PURs provide detailed information on a site-specific basis, including descriptions of building construction, heating sources, production processes, and the presence of any hazardous chemicals or materials which may have been historically stored on the Phase One Property. They also indicate the presence of environmental hazards such as electrical rooms, transformers, boilers and storage tanks. Information provided on PUPs includes the location, capacity, and contents of ASTs, USTs, chemical storage and other forms of environmental hazards.

Pinchin contacted Opta to obtain copies of PURs and PUPs related to the Phase One Property. Opta provided Pinchin with copies of the following (see Appendix C):

- PURs dated 1973 and 1984; and
- A PUP dated 1984.

Based on Pinchin's review of the PURs and PUP, the following was noted:

- The original portion of the Site Building was constructed in approximately 1960 with additions along the southeast elevation of the Site Building in 1965 and 1970;
- Occupants of the Phase One Property conducted office operations; and
- Heating was provided by electrically powered baseboard heaters.

#### 4.2.5 *City Directories*

At the time of writing this report, and due to temporary closures of Public Libraries and the Archives of Canada, select City Directories (i.e., Site listings) were not available for Pinchin's review. This represents a potential data gap in the historical documentation review process.

City directories for the years 1956 to 2010 were previously reviewed by Pinchin at the Library and Archives of Canada in Ottawa, Ontario for the area within 100 m of the Phase One Property (City Directory Search Area). It should be noted that no city directories were available for the City of Ottawa subsequent to 2010.

In general, the city directories indicated that the surrounding area has historically consisted of residential, commercial and light industrial land uses since at least 1956. No PCAs for the Phase One Study Area including the Phase One property were identified.

### 4.3 Physical Setting Sources

#### 4.3.1 Aerial Photographs

Pinchin reviewed aerial photographs of the Phase One Property and surrounding properties within the Phase One Study Area to assess the potential for historical PCAs. Copies of aerial photographs dated 1933, 1945 and 1982 were obtained from the National Air Photo Library in Ottawa, Ontario and reviewed by Pinchin. In addition, copies of digital aerial photographs dated 1928, 1958, 1965, 1976, 1999, 2002 and 2019 were reviewed on the City of Ottawa e-map website (<https://maps.ottawa.ca/geoOttawa/>) by Pinchin. The 1928 aerial photograph was the earliest available aerial photograph of the Phase One Study Area.

Efforts were made by Pinchin to obtain aerial photographs that:

- Illustrated the period between initial development of the Phase One Property to the present;
- Identified buildings and structures present on the Phase One Property since initial development;
- Identified PCAs within the Phase One Study Area; and
- Identified APECs on the Phase One Property.

It should be noted that accurate details could not be determined from some of the aerial photographs due to the large reference scale and the low resolution of the photographs.

A summary of information obtained with respect to the Phase One Property from a review of the available aerial photography is provided in the following table:

<b>Year of Photograph</b>	<b>Phase One Property</b>
1928-1958.	The Phase One Property appeared to consist of vacant undeveloped land.
1965.	A building that was similar in size and configuration to the original portion and addition along the southeast elevation of the present-day Site Building was evident on-Site.
1976-2019.	A building that was similar in size and configuration to the present-day Site Building was evident on-Site.

Based on the aerial photographs reviewed for the Phase One Property and the surrounding area, it appears that the Phase One Property was developed between 1958 and 1965.

The aerial photograph review did not identify any PCAs on the Phase One Property.

The aerial photograph review identified the following PCAs within the Phase One Study Area, outside of the Phase One Property, that are considered to result in APECs at the Phase One Property:

- A railway line was observed to be oriented in a northeast-southwest direction approximately 30 m northwest of the Site in the 1928 to 1945 aerial photographs. Based on the distance between this railway line and the Site, as well as time elapsed, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property; and
- An RFO was located approximately 230 m northwest of the Phase One Property in the 1958 to 1982 aerial photographs. Based on the distance between this property and the Site, as well as re-development of this property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

#### *4.3.2 Topography, Hydrology and Geology*

The elevation of the Phase One Property, based on information obtained from the Ontario Base Map series, is approximately 76 m above mean sea level (mamsl). The general topography in the local and surrounding area gradually slopes towards the northeast, whereby the Phase One Property is at a similar elevation to the adjacent/surrounding properties, however, the topography gradually slopes towards the northeast across the Phase One Property. No bedrock outcrops were observed on-Site or in the surrounding area.

A review of the available physiographical data indicates that the Phase One Property and the surrounding properties located within the Phase One Study Area are located within silty sand to approximately 1.52 m below ground surface (mbgs) overlying sand and clay to a depth of 3.05 mbgs and silty sand to a depth of 5.03 mbgs, based on a review of the 2019 Golder Phase Two ESA Report. Bedrock is expected to consist of sedimentary rocks consisting of limestone, dolomite, shale, argillite, sandstone, quartzite, and/or grit. The topography is considered to be mainly flat to rolling low local relief with dry surface water drainage conditions.

Based on general hydrogeological principles and Pinchin's familiarity with subsurface conditions at and near the Phase One Property and the surrounding properties within the Phase One Study Area, the unconfined groundwater beneath the Phase One Property is expected to flow in a northeast direction. The nearest surface water body is the Ottawa, located approximately 2.0 km northwest of the Phase One Property at an elevation of approximately 55 mamsl.

Copies of pertinent maps, illustrating local topographical, hydrogeological and drainage features are provided in Appendix G.

#### 4.3.3 Fill Materials

According to the 2019 Golder Phase Two ESA Report, fill, generally consisting of re-worked native soils, was encountered at depths up to 0.8 mbgs in each of the borehole locations advanced by Golder at the Phase One Property. As such, Pinchin has concluded that fill material is present across the entire Phase One Property outside the footprint of the Site Building.

Given the known presence of fill material at the Phase One Property, potential future development plans should incorporate the appropriate procedures for the characterization of soils that may require off-Site disposal. Further assessment and/or costs may be incurred through re-development of the Phase One Property and/or change in land use scenarios.

#### 4.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

The nearest surface water body is the Ottawa River, located approximately 2.0 km northwest of the Phase One Property at an elevation of approximately 55 mamsl.

A review of the Area of Natural & Scientific Interest map prepared by ERIS (see Appendix D) and information provided on the MNRF's NHIC website did not identify any provincial parks, wetlands, conservation areas, or other areas of natural significance, within the Phase One Study Area.

A review of the City of Ottawa's GeoOttawa website indicated that the Phase One Study Area is not located within a well head protection area for the protection of groundwater.

The records review did not identify the presence of wells within the Phase One Study Area that supply water for human consumption or for agricultural purposes. Details regarding these wells are provided in the ERIS report in Appendix D.

#### 4.3.5 Well Records

A search of the Water Well Information System database by ERIS identified four water well records for the Phase One Property. A summary of pertinent information included in the ERIS report with respect to these wells is provided in the following table:

<b>MECP Well ID (ERIS ID)</b>	<b>Location</b>	<b>Stratigraphy</b>	<b>Approximate Depth to Bedrock</b>	<b>Approximate Depth to Water Table</b>
7342372	Approximately 20 m southeast of the Site Building on the Phase One Property.	Silty sand (0.31 to 3.66 mbgs) Silt with gravel (3.66 to 4.57 mbgs)	Not encountered (> 4.57 mbgs)	Not encountered (> 4.57 mbgs)
7342364	Approximately 50 m northeast of the Site	Gravel with sand (0 to 0.31 mbgs)	Not encountered (> 3.10 mbgs)	Not encountered (> 3.10 mbgs)

MECP Well ID (ERIS ID)	Location	Stratigraphy	Approximate Depth to Bedrock	Approximate Depth to Water Table
	Building on the Phase One Property.	Silt with sand (0.31 to 2.44 mbgs) Silt with gravel (2.44 to 3.10 mbgs)		
7136553	Approximately 70 m east of the Site Building on the Phase One Property.	Fill with sand (0 to 0.60 mbgs) Silt with clay (0.60 to 1.83 mbgs) Silt with clay (1.83 to 4.27 mbgs)	Not encountered (> 4.27 mbgs)	Not encountered (> 4.27 mbgs)
7342363	Approximately 60 m southeast of the Site Building on the Phase One Property.	Gravel with sand (0 to 0.31 mbgs) Silt with sand (0.31 to 3.35 mbgs) Silt with gravel (3.35 to 5.05 mbgs)	Not encountered (> 5.05 mbgs)	Not encountered (> 5.05 mbgs)

Pinchin concludes that above-noted well records pertain to the on-Site monitoring wells associated with previous on-Site subsurface investigations.

The Water Well Information System database search also identified 72 water well records within the Phase One Study Area outside of the Phase One Property. Details regarding these off-Site wells, including stratigraphic information, depth to bedrock and/or depth to the water table, are provided in the ERIS report included in Appendix D.

#### 4.4 Site Operating Records

The Phase One Property is not an Enhanced Investigation Property (see Section 6.3). As such, Site operating records were not reviewed as part of the Phase One ESA.

#### 5.0 INTERVIEWS

Pinchin interviewed individuals knowledgeable of the Phase One Property and its history to obtain or confirm information regarding the environmental condition of the Phase One Property. The following individuals provided information regarding the history of the Phase One Property and the surrounding properties within the Phase One Study Area to the best of their knowledge:

<b>Person Interviewed</b>	<b>Relationship to Phase One Property</b>	<b>Date and Place of Interview</b>	<b>Interview Method</b>
Mr. Matthew Richards	Facilities Technician for the Phase One Property	November 29, 2021 (Phase One Property)	In-person interview during Site reconnaissance.

Mr. Richards was chosen to be interviewed given that he is most familiar with the recent operational history of the Phase One Property. This individual is hereafter referred to as the “Site Representative”, and accompanied the Pinchin representative (Mr. Alex Kelly) during the Site reconnaissance.

Pinchin compared the information obtained from the interviews with information obtained from the historical records. The information provided by the interviewee was corroborated by the available historical records. As such, Pinchin has no concerns regarding the validity of the information provided by the individual interviewed for the Phase One ESA.

With respect to PCAs and APECs, no additional information was obtained from the interviews other than that documented elsewhere in this report.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

A visual assessment of the Phase One Property and the surrounding properties within the Phase One Study Area was conducted for the purpose of identifying the presence of possible PCAs and associated APECs.

The Site reconnaissance was completed on November 29, 2021, by a Pinchin representative (Mr. Alex Kelly), under the direct supervision of Pinchin’s QP overseeing this project. Mr. Kelly is an Environmental Project Technologist with more than two years of environmental consulting experience. Pinchin visited the Phase One Property and surrounding properties within the Phase One Study Area to document environmental conditions. During the Site reconnaissance, Pinchin viewed all accessible areas within the Phase One Property, and viewed publicly-accessible portions of the adjacent lands for the presence of actual or potential issues of environmental concern.

The Site reconnaissance was conducted between the hours of 9:30 AM to 11:30 AM. During the Site reconnaissance, the ground surface was dry and the weather was sunny, and the ambient temperature was approximately -5° Celsius. The Phase One Property reconnaissance was conducted on foot. During the Site reconnaissance, Pinchin accessed all interior and exterior areas of the Phase One Property. At the time of the Site reconnaissance, the Site Building on the Phase One Property was operating as a

commercial office building. Further details regarding on-Site operations are provided throughout Section 6.2 of this report.

Photographs taken during the Site reconnaissance that illustrate the Phase One Property and Phase One Study Area are provided in Appendix B.

## **6.2 Specific Observations at Phase One Property**

### *6.2.1 Description of Buildings and Structures*

During the Site reconnaissance, Pinchin observed one building/structure on the Phase One Property (i.e., the Site Building, a two-storey commercial office building).

The portion of the Phase One Property outside of the Site Building was comprised primarily of grassed and asphalt-paved areas.

### *6.2.2 Description of Below-Ground Structures*

During the Site reconnaissance, Pinchin did not observe any current below-ground structures on the Phase One Property, with the exception of a single-level basement within the Site Building. The basement consisted of poured concrete structure. Various utilities (i.e., telephone, sanitary sewer, water and electricity) enter the Site Building along Lady Ellen Place.

### *6.2.3 Description of Tanks*

During the Site reconnaissance, Pinchin did not observe any tanks on the Phase One Property for the purpose of either fuel dispensing or storage, or other unidentified substance storage.

### *6.2.4 Potable and Non-Potable Water Sources*

During the Site reconnaissance, Pinchin did not observe potable or non-potable water sources at the Phase One Property. The Phase One Property is serviced by a municipal water supply via underground piping running into the Site Building from beneath Lady Ellen Place.

### *6.2.5 Description and Location of Underground Utilities*

A number of underground utilities were observed at the Phase One Property, including natural gas, telephone and electrical lines, and municipal water, storm and sanitary sewer lines.

The natural gas, telephone, electrical, water and sanitary sewer services enter the Site Building via underground lines. Storm water entering exterior roof drains would likely run overland and discharge into the municipal storm sewer systems along Lady Ellen Place.

#### *6.2.6 Details of Heating System*

During the Site reconnaissance, Pinchin observed a natural gas-fired boiler supplying hydronic baseboards, natural gas-fired rooftop heating/ventilation/air-conditioning (HVAC) units and electrically powered baseboard heaters on-Site. No evidence of former oil-fired heating systems (i.e., vent/fill pipes, copper feed lines, etc.) were observed during Pinchin's Site reconnaissance.

#### *6.2.7 Details of Cooling System*

During the Site reconnaissance, Pinchin observed natural gas-fired rooftop HVAC units and electrically powered pad-mounted air conditioning units on-Site. No evidence of former oil-fired heating systems (i.e., vent/fill pipes, copper feed lines, etc.) were observed during Pinchin's Site reconnaissance.

#### *6.2.8 Details of Drains, Pits and Sumps*

A storm water sump is located in the basement boiler room of the Site Building. No additional pits or sumps were observed at the Phase One Property.

#### *6.2.9 Unidentified Substances within Buildings and Structures*

During the Site reconnaissance, Pinchin did not observe any unidentified substances or storage containers holding unidentified substances at the Phase One Property. Small volumes of various cleaning solutions were stored in their original containers throughout the Site Building. No bulk liquid storage was observed on-Site.

#### *6.2.10 Details of Staining and Corrosion*

During the Site reconnaissance, Pinchin did not observe any areas of staining or corrosion inside the Site Building.

#### *6.2.11 Details of On-Site Wells*

No water supply or groundwater monitoring wells were observed to be on or within the Phase One Property, with the exception of a groundwater monitoring well located east of the Site Building (see Figure 2). The Site Representative did not have any information on the date of installation or construction details of the groundwater monitoring well but a review of the available water well records (see Section 4.3.5) indicates that this water well is likely MECP Well ID 7342372 that was installed in 2019 to a depth of 4.57 mbgs.

As documented in the 2019 Golder Phase Two ESA Reports, on-Site monitoring wells 19-01 to 19-03 were installed in 2019. In addition, the 2019 Golder Phase Two ESA Report noted three additional groundwater monitoring wells located on the north-central (13-02), northeast (18-03) and southwest (13-01) portions of the Phase One Property.

#### *6.2.12 Details of Sewage Works*

During the Site reconnaissance, Pinchin did not observe any sewage works or evidence of sewage disposal on the Phase One Property, with the exception of main sanitary sewer pipes that exit the Site Building and connect to the municipal sewer system.

#### *6.2.13 Details of Ground Cover*

During the Site reconnaissance, Pinchin visually inspected the Phase One Property ground cover. Any areas of the Phase One Property not covered by a structure are covered by asphalt-pavement and grassed/landscaped areas.

#### *6.2.14 Details of Current or Former Railways*

No current or former railway infrastructure was observed on the Phase One Property.

#### *6.2.15 Areas of Stained Soil, Vegetation and Pavement*

During the Site reconnaissance, Pinchin did not observe any areas of stained soil, vegetation or pavement on the Phase One Property.

#### *6.2.16 Areas of Stressed Vegetation*

During the Site reconnaissance, Pinchin did not observe any areas of stressed vegetation on the Phase One Property.

#### *6.2.17 Areas of Fill and Debris Materials*

No obvious areas where fill material or debris have been placed or graded were observed by Pinchin at the Phase One Property.

Regrading and fill placement at the Phase One Property is inferred to have previously occurred during initial development activities to prepare the Site Building location, parking areas and access to the Phase One Property, and to establish drainage patterns. The quality of the fill material used on-Site is unknown. In addition, according to the 2019 Golder Phase Two ESA Report, fill, generally consisting of re-worked native soils, was encountered at depths up to 0.8 mbgs in each of the borehole locations advanced by Golder at the Phase One Property. As such, Pinchin has concluded that fill material is present across the entire Phase One Property outside the footprint of the Site Building.

#### *6.2.18 Potentially Contaminating Activities*

A PCA is defined by O. Reg. 153/04 as a “use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One Study Area” including the Phase One Property.

The PCA observed on the Phase One Property during the Site reconnaissance is summarized in Section 7.2.

*6.2.19 Unidentified Substances Outside Buildings and Structures*

During the Site reconnaissance, Pinchin did not observe any unidentified substances or storage containers holding unidentified substances on the exterior of the Phase One Property.

*6.2.20 Surrounding Land Uses*

During the Site reconnaissance, Pinchin conducted a visual assessment of publicly-accessible portions of the Phase One Study Area for the presence of PCAs. The properties in the Phase One Study Area have various land uses, including residential, commercial and light industrial. Land use types within the Phase One Study Area are presented on Figure 3.

The following table summarizes the land use on adjacent properties at the time of the Site reconnaissance:

<b>Direction Relative to Phase One Property</b>	<b>Location Relative to Inferred Groundwater Flow Direction</b>	<b>Description of Property Use</b>	<b>Property Use</b>	<b>Potential Contribution to PCA and/or APEC</b>
Northeast	Downgradient	Commercial buildings, residential developments and associated roadways to beyond 200 m from the Phase One Property.	Commercial/ residential	Land uses are considered to represent PCAs.
Southeast	Transgradient	Commercial buildings, light industrial buildings, residential developments and associated roadways to beyond 200 m from the Phase One Property.	Commercial/ Light Industrial/ Residential	Land uses are considered to represent PCAs.
Southwest	Upgradient	Commercial buildings, light industrial buildings and associated roadways to beyond 200 m from the Phase One Property.	Commercial/ Light Industrial	Land uses are not considered to represent PCAs.
Northwest	Transgradient	Highway 17, commercial buildings, residential developments and associated roadways to beyond 200 m from the Phase One Property.	Commercial/ Residential	Land uses are not considered to represent PCAs.

No PCAs were observed at the time of the Site reconnaissance within the rest of the Phase One Study area.

### **6.3 Enhanced Investigation Property**

O. Reg. 153/04 defines an “Enhanced Investigation Property” as a property that is being used or has been used, in whole or in part, in the following manner:

- For an industrial use or;
- For any of the following commercial uses:
  - As a garage;
  - As a bulk liquid dispensing facility, including a gasoline outlet; or
  - For the operation of dry-cleaning equipment.

The findings of this Phase One ESA have not documented any of the above land uses as occurring at the Phase One Property, and the Phase One Property is therefore not an Enhanced Investigation Property.

### **6.4 Written Description of Investigation**

The Phase One ESA completed by Pinchin included investigations of the Phase One Property and the Phase One Study Area outside of the Phase One Property pursuant to Sections 13 and 14 of Schedule D of O. Reg.153/04. The main objective of these investigations was to identify PCAs at the Phase One Property or within the Phase One Study Area outside of the Phase One Property that could have resulted in APECs at the Phase One Property.

#### *6.4.1 Phase One Property*

The investigation of the Phase One Property consisted of the following components:

- Review of available historical records, including aerial photographs, FIPs, PURs, PUPs, city directories, wells records, ERIS regulatory search and a regulatory data base search;
- A Site reconnaissance completed on November 29, 2021, by Mr. Alex Kelly of Pinchin that included an assessment of structures at the Phase One Property and the exterior of the Phase One Property;
- Interviews with an individual knowledgeable of the history and operations at the Phase One Property; and
- Review of mapping provided by ERIS and information provided on-line by the MNR for the presence of areas of natural significance.

Pinchin’s investigation of the Phase One Study Area outside of the Phase One Property identified the following PCAs:

- PCA #1 (Item 55: Transformer Manufacturing, Processing and Use – A hydro vault is located in the basement within the Site Building on the Phase One Property). However, no evidence of spills or historical spills (i.e., staining) was observed in the vicinity of hydro vault and no issues of potential environmental concern (i.e., spills) were noted for this hydro vault within the ERIS report. In addition, any maintenance/environmental issues associated with the transformers would be the responsibility of Hydro Ottawa. As such, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

Pinchin's investigation of the Phase One Property identified one PCA. The description and location of this PCA is summarized in Section 7.2. As per O. Reg. 153/04, PCA # 1 at the Phase One Property is not considered an APEC that will require investigation through the completion of a Phase Two ESA.

Pinchin's investigation did not identify the presence of wells at the Phase One Property that currently supply water for human consumption or for agricultural purposes.

#### *6.4.2 Phase One Study Area Outside of Phase One Property*

The investigation of the Phase One Study Area outside of the Phase One Property consisted of the following components:

- Review of available historical records, including FIPs, ERIS regulatory search, city directories, aerial photographs and well records;
- Visual inspection of properties from publicly-accessible areas for evidence of PCAs and water bodies; and
- Review of mapping provided by ERIS and information provided on-line by the MNRF for the presence of areas of natural significance.

Pinchin's investigation of the Phase One Study Area outside of the Phase One Property identified the following PCAs:

- PCA # 2 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks – The property located adjacent to the northeast elevation of the Phase One Property applied for a C-of-A to install a diesel-powered emergency generator on March 6, 2002). (Item 13 Cosmetics Manufactory – A former cosmetics manufacturing operation was located adjacent to the northeast elevation of the Phase One Property in the 1965 FIP). In addition, this property is situated hydraulically downgradient of the Phase One Property relative to the inferred groundwater flow direction. Based on the short duration of the emergency generator, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;

- PCA # 3 (Item 31 Ink Manufacturing, Processing and Bulk Storage – A sign manufacturing operation, located on the property located approximately 40 m southeast of the Phase One Property, was identified in the Scott’s Manufacturing Directory database in ERIS). Based on the inferred groundwater flow direction, it is Pinchin’s opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 4 (Item 31 Ink Manufacturing, Processing and Bulk Storage – A printing operation, located approximately 40 m southeast of the Phase One Property, was identified in the Scott’s Manufacturing Directory database in ERIS). In addition, this property this property is located within the Waste Generator Database Review Area and was listed within the O. Reg. 347 Waste Generators database search results as a waste generator. Based on the above-noted information, it is Pinchin’s opinion that this PCA does result in an APEC at the Phase One Property;
- PCA # 5 (Item 46 Rail Yards, Tracks and Spurs – A railway line was observed to be oriented in a northeast-southwest direction approximately 30 m northwest of the Site in the 1928 to 1945 aerial photographs). Based on the distance between this railway line and the Site, as well as time elapsed, it is Pinchin’s opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 6 (Item 8 Chemical Manufacturing, Processing and Bulk Storage – The property located 45 m southeast of the Phase One Property is located within the Waste Generator Database Review Area and was listed within the O. Reg. 347 Waste Generators database search results as a waste generator). Based on the distance between this property and the Phase One Property, as well as the inferred groundwater flow direction, it is Pinchin’s opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 7 (Item 37 Operation of Dry Cleaning Equipment – Vail’s Clean-O-Mat (i.e., a dry cleaner) was located approximately 75 m northwest of the Phase One Property in the 1965 FIP). Based on the distance between this property and the Phase One Property, it is Pinchin’s opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 8 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks and Item 10 Commercial Autobody Shops – A former automotive repair/servicing facility located approximately 105 m northeast of the Phase One Property was listed in the Fuel Storage Tanks database). In addition, this property is situated hydraulically downgradient of the Phase One Property relative to the inferred groundwater flow direction. Based on the distance between this property and the Phase One Property, as well as the inferred

groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;

- PCA # 9 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks – Taggart Service Ltd. (i.e., a former RFO) was located approximately 155 m southwest of the Phase One Property in the 1965 FIP. USTs were located adjacent to the north elevation of the building on this property). (Item 10 Commercial Autobody Shops – An automotive repair/servicing facility (i.e., Otto's Collision Centre) is currently located approximately 155 m southwest of the Phase One Property). In addition, this property was listed in the Private and Retail Fuel Storage Tanks database. Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 10 (Item 10 Commercial Autobody Shops – An automotive repair/servicing facility (i.e., A1 Auto Center) is located approximately 180 m south of the Phase One Property). Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 11 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks – A property located approximately 200 m south of the Phase One Property was listed in the Fuel Storage Tanks database). Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property; and
- PCA # 12 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks - An RFO was located approximately 230 m northwest of the Phase One Property in the 1958 to 1982 aerial photographs). Based on the distance between this property and the Site, as well as re-development of this property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

No areas of natural significance were identified within the Phase One Study Area outside of the Phase One Property.

The records review did not identify the presence of wells within the Phase One Study Area that supply water for human consumption or for agricultural purposes.

Based on a cursory review of the properties greater than 250 m (i.e., outside of the Phase One Study Area), but less than 1 km, from the Phase One Study Area, Pinchin did not note or observe any significant contaminating properties that should be included as part of this assessment (i.e., landfills, large industrial manufacturers, etc.).

A plan identifying the location of the off-Site PCAs for this Phase One ESA is provided on Figure 3.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 Current and Past Uses**

To the best of Pinchin's knowledge, the Phase One Property consisted of vacant undeveloped land until development of the original portion of the Site Building in approximately 1960. Since construction of the Site Building, the Phase One Property has been utilized solely for commercial office purposes.

It is Pinchin's opinion that the date of the first use of the Phase One Property is approximately 1960, with the construction of the original portion of the Site Building on the Phase One Property. The date of the first developed use of the Phase One Property was determined through a review of review aerial photographs, PURs, a PUP and FIPs, as well as an interview with the Site Representative. No other historical records were available to Pinchin that provided information for determining the date of first developed use of the Phase One Property.

### **7.2 Potentially Contaminating Activities**

The following PCA as defined by O. Reg. 153/04 were documented by Pinchin to have occurred on the Phase One Property:

- PCA #1 (Item 55: Transformer Manufacturing, Processing and Use – A hydro vault is located in the basement within the Site Building on the Phase One Property). However, no evidence of spills or historical spills (i.e., staining) was observed in the vicinity of hydro vault and no issues of potential environmental concern (i.e., spills) were noted for this hydro vault within the ERIS report. In addition, any maintenance/environmental issues associated with the transformers would be the responsibility of Hydro Ottawa. As such, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

The following PCAs as defined by O. Reg. 153/04 were documented by Pinchin to have occurred within the Phase One Study Area, outside of the Phase One Property:

- PCA # 2 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks – The property located adjacent to the northeast elevation of the Phase One Property applied for a C-of-A to install a diesel-powered emergency generator on March 6, 2002). (Item 13 Cosmetics Manufactory – A former cosmetics manufacturing operation was located adjacent to the northeast elevation of the Phase One Property in the 1965 FIP). In addition, this property is situated hydraulically downgradient of the Phase One Property relative to the inferred groundwater flow direction. Based on the short duration of the

emergency generator, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;

- PCA # 3 (Item 31 Ink Manufacturing, Processing and Bulk Storage – A sign manufacturing operation, located on the property located approximately 40 m southeast of the Phase One Property, was identified in the Scott's Manufacturing Directory database in ERIS). Based on the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 4 (Item 31 Ink Manufacturing, Processing and Bulk Storage – A printing operation, located approximately 40 m southeast of the Phase One Property, was identified in the Scott's Manufacturing Directory database in ERIS). In addition, this property this property is located within the Waste Generator Database Review Area and was listed within the O. Reg. 347 Waste Generators database search results as a waste generator. Based on the above-noted information, it is Pinchin's opinion that this PCA does result in an APEC at the Phase One Property;
- PCA # 5 (Item 46 Rail Yards, Tracks and Spurs – A railway line was observed to be oriented in a northeast-southwest direction approximately 30 m northwest of the Site in the 1928 to 1945 aerial photographs). Based on the distance between this railway line and the Site, as well as time elapsed, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 6 (Item 8 Chemical Manufacturing, Processing and Bulk Storage – The property located 45 m southeast of the Phase One Property is located within the Waste Generator Database Review Area and was listed within the O. Reg. 347 Waste Generators database search results as a waste generator). Based on the distance between this property and the Phase One Property, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 7 (Item 37 Operation of Dry Cleaning Equipment – Vail's Clean-O-Mat (i.e., a dry cleaner) was located approximately 75 m northwest of the Phase One Property in the 1965 FIP). Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 8 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks and Item 10 Commercial Autobody Shops – A former automotive repair/servicing facility located approximately 105 m northeast of the Phase One Property was listed in the Fuel Storage Tanks database). In addition, this property is situated hydraulically downgradient of the

Phase One Property relative to the inferred groundwater flow direction. Based on the distance between this property and the Phase One Property, as well as the inferred groundwater flow direction, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;

- PCA # 9 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks – Taggart Service Ltd. (i.e., a former RFO) was located approximately 155 m southwest of the Phase One Property in the 1965 FIP. USTs were located adjacent to the north elevation of the building on this property). (Item 10 Commercial Autobody Shops – An automotive repair/servicing facility (i.e., Otto's Collision Centre) is currently located approximately 155 m southwest of the Phase One Property). In addition, this property was listed in the Private and Retail Fuel Storage Tanks database. Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 10 (Item 10 Commercial Autobody Shops – An automotive repair/servicing facility (i.e., A1 Auto Center) is located approximately 180 m south of the Phase One Property). Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property;
- PCA # 11 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks – A property located approximately 200 m south of the Phase One Property was listed in the Fuel Storage Tanks database). Based on the distance between this property and the Phase One Property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property; and
- PCA # 12 (Item 28 Gasoline and Associated Products Storage in Fixed Tanks - An RFO was located approximately 230 m northwest of the Phase One Property in the 1958 to 1982 aerial photographs). Based on the distance between this property and the Site, as well as re-development of this property, it is Pinchin's opinion that this PCA does not result in an APEC at the Phase One Property.

### **7.3 Areas of Potential Environmental Concern**

The following PCA as defined by O. Reg. 153/04 was documented by Pinchin to have occurred on the Phase One Property and could represent an APEC at the Phase One Property:

- PCA # 4 (Item 31 Ink Manufacturing, Processing and Bulk Storage – A printing operation, located approximately 40 m southeast of the Phase One Property, was identified in the Scott's Manufacturing Directory database in ERIS). In addition, this property this property

is located within the Waste Generator Database Review Area and was listed within the O. Reg. 347 Waste Generators database search results as a waste generator. Based on the above-noted information, it is Pinchin's opinion that this PCA does result in an APEC at the Phase One Property.

#### **7.4 Phase One Conceptual Site Model**

A conceptual site model (CSM) has been created to provide a summary of the findings of the Phase One ESA. The Phase One CSM is summarized in Figures 1 through Figure 3, which illustrate the following features within the Phase One Study Area, where present:

- Existing buildings and structures;
- Water bodies located in whole or in part within the Phase One Study Area.;
- Areas of natural significance located in whole or in part within the Phase One Study Area;
- Drinking water wells located at the Phase One Property;
- Land use of adjacent properties;
- Roads within the Phase One Study Area;
- PCAs within the Phase One Study Area, including the locations of tanks; and
- APECs at the Phase One Property.

The following provides a narrative summary of the Phase One CSM:

- The Phase One Property is approximately 2.57 acres (1.04 hectares) in size located immediately north of Lady Ellen Place, approximately 144 m northwest of the intersection of Lady Ellen Place and Laperriere Avenue, in Ottawa, Ontario. The Phase One Property is presently developed with a two-storey commercial office building (Site Building). The Phase One Property has been used for commercial office purposes since the initial development of the original portion of the Site Building in approximately 1960. There is no record of industrial use or of a commercial use (e.g., garage, bulk liquid dispensing facility or dry cleaner) that would require classifying the Phase One Property as an enhanced investigation property;
- The nearest surface water body is the Ottawa River, located approximately 2.0 km northwest of the Phase One Property at an elevation of approximately 55 mamsl;
- No areas of natural significance were identified within the Phase One Study Area;
- No drinking water wells were located on the Phase One Property;

- The adjacent and surrounding properties in the vicinity of the Site consist of residential, commercial and light industrial land uses. The properties surrounding the Phase One Property consist of commercial developments, light industrial developments, residential developments, as well as associated roadways, to beyond 200 m from the Phase One Property;
- One PCA was identified at the Phase One Property (i.e., a hydro vault located in the basement of the Site Building on the Phase One Property); however, based on no evidence of spills or historical spills (i.e., staining) observed in the vicinity of hydro vault, no issues of potential environmental concern (i.e., spills) noted for this hydro vault within the ERIS report and the fact that any maintenance/environmental issues related to the hydro vault would be the responsibility of Hydro Ottawa, it is Pinchin's opinion that this PCA does not result in an APEC for the Phase One Property;
- 11 PCAs were identified within the Phase One Study Area outside of the Phase One Property (i.e., off-Site) (refer to Section 7.2); however, based on the short duration of the emergency generator located on the property adjacent to the northeast elevation of the Phase One Property, the distance between these properties and the Phase One Property and the inferred groundwater flow direction, observations made during Pinchin's Site reconnaissance, it is Pinchin's opinion that these PCAs do not result in APECs for the Phase One Property, with the exception of PCA # 4;
- One PCA (i.e., PCA # 4) was identified within the Phase One Study Area (i.e., a printing operation that was identified within the Waste Generator Database Review Area and was listed within the O. Reg. 347 Waste Generators database search results as a waste generator located approximately 40 m southeast of the Phase One Property). Based on the nature of operations (i.e., printing operation), as well as the generation of hazardous waste, it is Pinchin's opinion that this PCA does result in an APEC for the Phase One Property. Figure 4 provides a detailed summary of the APEC;
- Underground utilities at the Phase One Property provide potable water, natural gas, electrical, telephone, cable and sewer services to the Site Building. These services enter the Site Building through subsurface conduits, with the exception of a pressurized natural gas line, which connects to meters located along the exterior of the Site Building;
- The Phase One Property and the surrounding properties located within the Phase One Study Area are located within alluvial deposits consisting of silty sand to approximately 1.52 mbgs, sand and clay to a depth of 3.05 mbgs and silty sand to a depth of 5.03 mbgs, based on a review of the 2019 Golder Phase Two ESA Report. Bedrock is

expected to consist of sedimentary rocks consisting of limestone, dolomite, shale, argillite, sandstone, quartzite, and/or grit; and

- The Phase One Property is at a similar elevation to the adjacent/surrounding properties; however, the topography gradually slopes towards the northeast across the Phase One Property.

There were no deviations from the Phase One ESA requirements specified in O. Reg. 153/04 or absence of information that have resulted in uncertainty that would affect the validity of the Phase One CSM.

## **8.0 CONCLUSIONS**

Pinchin conducted this Phase One ESA in accordance with Part VII and Schedule D of O. Reg. 153/04. The purpose of the Phase One ESA was to assess the potential presence of environmental impacts at the Phase One Property due to activities at and near the Phase One Property in support of filing the potential Site Plan Approval application at the Phase One Property.

Based on the findings of this Phase One ESA, Pinchin identified one PCA at the Phase One Property (i.e., on-Site) and 11 PCAs within the Phase One Study Area outside of the Phase One Property (i.e., off-Site). Of the off-Site PCAs, ten are not considered to result in APECs at the Phase One Property given their distance from the Phase One Property, time elapsed and/or the inferred groundwater flow direction. The remaining one off-Site PCA has resulted in a total of one APEC at the Phase One Property. It is Pinchin's opinion that this PCA may have impacted soil and groundwater quality at the Phase One Property and, as such, PCA # 4 has resulted in an APEC at the Phase One Property that warrants further investigation prior to the application of a Site Plan Approval application with the City of Ottawa.

Pinchin recommends that a Phase Two ESA be conducted at the Phase One Property as an "assessment of property conducted in accordance with the regulations by or under the supervision of a qualified person to determine the location and concentration of one or more contaminants in the land or water on, in or under the property". Pinchin concludes that one or more contaminants originating from PCAs located within the Phase One Study Area outside of the Phase One Property may have affected land or water on, in, or under the Phase One Property. Therefore, Pinchin recommends that a Phase Two ESA be conducted prior to the application of a Site Plan Approval application with the City of Ottawa.

It should be noted that the references and sources for the information used in evaluating the Phase One Property are provided in the relevant sections of this report. Specific references are also summarized in Section 9.0.

## **8.1 Signatures**

This Phase One ESA was undertaken under the supervision of Scott Mather, P.Eng, QP<sub>ESA</sub> in accordance with the requirements of O. Reg. 153/04 to support the future Site Plan Approval application at the Phase One Property. The conclusions and recommendations provided in this report represent the best judgement of the assessor based on the Site conditions observed on November 29, 2021, and a review of available historical information and information obtained from interviews.

This report has been issued without having received a response to the request for information from the MECP. Pinchin reserves the right to amend our conclusions and recommendations based on information obtained from this regulatory agency.

We trust that the information provided in this report meets your current requirements.

## **8.2 Terms and Limitations**

This Phase One ESA was performed in order to identify potential issues of environmental concern associated with the property located at 864 Lady Ellen Place, Ottawa, Ontario (Site), at the time of the Site reconnaissance. This Phase One ESA was performed in general compliance with currently acceptable practices for environmental site investigations, and specific Client requests, as applicable to this Site. This report was prepared for the exclusive use of Access Self Storage Inc. (Client), subject to the terms, conditions and limitations contained within the duly authorized proposal for this project. Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third parties. Pinchin accepts no responsibility for damages suffered by any third party as a result of decisions made or actions conducted.

If additional parties require reliance on this report, written authorization from Pinchin will be required. Such reliance will only be provided by Pinchin following written authorization from the Client. Pinchin disclaims responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs. No other warranties are implied or expressed. Pinchin will not provide results or information to any party unless disclosure by Pinchin is required by law.

The information provided in this report is based upon analysis of available documents, records and drawings, and personal interviews. In evaluating the Site, Pinchin has relied in good faith on information provided by other individuals noted in this report. Pinchin has assumed that the information provided is factual and accurate. In addition, the findings in this report are based, to a large degree, upon information provided by the current owner/occupant. Pinchin accepts no responsibility for any deficiency, misstatement or inaccuracy contained in this report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or contained in reports that were reviewed. The scope of work for this Phase One ESA did not include a visual or intrusive investigation for designated

substances (e.g., asbestos, mould, PCB-containing electrical equipment, etc.) and, therefore, these materials may be present at the Site.

Pinchin makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to, ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to interpretation and these interpretations may change over time.

Ontario Regulation 153/04 does not apply to environmental auditing or environmental management systems. Therefore, with respect to Site operations and conditions, compliance with applicable federal, provincial or municipal acts, regulations, laws and/or statutes was not evaluated as part of the Phase One ESA.

## **Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions**

### **Report**

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### **Disclaimer**

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### **Entire Agreement**

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### **Governing Document**

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### **Law**

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

|  |  | If Construction #1 State method of attaching insulation to steel deck |   |
|  |  | Mechanical Fasteners  | <input type="checkbox"/> Adhesive <input type="checkbox"/> Otherwise <input type="checkbox"/> |
|  |  | If adhesive state trade name _____                                    |   |
| Roof <input type="checkbox"/>            | Floors <input type="checkbox"/>                | (e) Other Materials - Describe and Show Thickness                     | _____   |

**ROOF AND FLOOR — Method of support**

- |                               |                                 |  |
|-------------------------------|---------------------------------|--|
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (a) Unprotected Steel Beams.   |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (b) Steel Beams Protected by _____ inches of _____                                       |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (c) Reinforced Conc. Beams — Poured in place.  |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (d) Precast Concrete Structural Units _____ inches thick _____<br>(Name of Manufacturer) |
| Roof <input type="checkbox"/> | Floors <input type="checkbox"/> | (e) Bearing Walls Only. No Supporting Steel.   |

If building is composed of more than one type of construction, identify sections of floor involving each type and indicate on plan.

(a) Is there any roof space exceeding 3 feet in height? NO. If so, for what purpose is it used? \_\_\_\_\_

How is access obtained thereto? \_\_\_\_\_ If by trap or door, describe type \_\_\_\_\_

(b) Are all skylights of wired glass in metal frames? \_\_\_\_\_

(c) Is there any wood in roof, louvres, ventilators or skylights; if so give details \_\_\_\_\_

(d) Is there a wood roof laid over an incombustible one? \_\_\_\_\_ If so, how is it supported? \_\_\_\_\_

(e) If so, what is the maximum and minimum height of this above the incombustible roof? \_\_\_\_\_

(f) Is the incombustible roof broken by Texas, louvres, ventilator, trapdoor, skylight, stair, elevator, other shafts? \_\_\_\_\_

Is so, what is the construction of the sides through roof space? \_\_\_\_\_

Is there any access or opening from these shafts to the roof space? Describe each separately \_\_\_\_\_

(g) Is there a superstructure, water cooling tower, or Penthouse of any kind on the roof? NO. If so, given dimensions, construction and occupancy \_\_\_\_\_

How is access obtained? \_\_\_\_\_

(h) Is there a wood wearing floor? NO. If so, on which storeys? \_\_\_\_\_

(i) Is it laid directly on incombustible floor or with an airspace? Describe \_\_\_\_\_

4. STEEL COLUMNS AND BEAMS — Are they fireproofed? NO. If "Yes" state nature and thickness of such protection.

(a) Columns Exp.

(b) Beams ASBESTOS TILES, - SUSPENDED CEILING

**FLOOR OPENINGS**

5. STAIRWAYS — How many, and state from which floor to which? 1 - 1ST TO 2ND

Is there an enclosure around them? YES If so, describe construction of enclosure, and the doors, and whether doors are self-closing HEAVY WALLS

SIC W/ CLASS "B" DOORS.

6. ELEVATORS — How many, and state from which floor to which? —

Is there an enclosure around them? \_\_\_\_\_ If so, describe construction of enclosure, and the doors, and whether doors are self-closing \_\_\_\_\_

7. CHUTES, VENTS, DUMB WAITERS & BELT HOLES & OTHER FLOOR OPENINGS — Give size, construction of enclosure (if any), type of door (if any), and whether self-closing, stating which floors are cut by each —

8. HEATING AND VENTILATING DUCTS — Are there any? YES. (a) Are ducts, which cut through floor, in masonry shafts? YES.

(b) Give construction of shaft METAL

(c) State whether separate duct to each floor without communication to other floors SEPARATE.

(d) Do ducts open into roof space? NO.

9. HEIGHT — State number of floors and whether there is a basement 2 STYS + 1 BT.

10. AREA — Give ground floor dimensions 92x63 = 5796 SQ. FT.

11. INTERIOR FINISH -

State separately for each floor, finish and method of attachment to walls and ceiling (If more than one type of finish is present on any one floor, state percentage of each type).

	Bas.	1st	2nd	3rd	4th	5th	6th
(a) Walls	HCIS + CONC.	64P	64P				
(b) Ceilings	CONC PLASTERED	ACR TILE	ACR TILE				
(c) Partitions	PHCB	64P	64P				

State extent of any wood partitions, or partitions having wood supports in square feet separately for each floor:-

(d) Is there any other inside or outside combustible finish or trim other than above? Describe fully DOORS TO OFFICES.

12. HEATING - What is the system of heating the building? ELECTRIC Where is heating plant located? ON WALLS UNDER WINDOWS

Is it in fire-resistive room with standard fire door? Are there any stoves; if so, how many and where located

Do any heating devices vent otherwise than to brick or concrete chimney; if so, give details

What fuel is used?

13. ELECTRIC WIRING - All wiring is in Rigid Conduit  Otherwise

Are all circuits protected by type "S" temper resisting fuses or non-interchangeable circuit breakers? C.R.

14. POWER - Is any used? YES If so, what kind? ELEC Total Horse Power? OVER 1HP.

What used for? AIR CONDITIONING

If gasoline engine, state method of ignition, location and capacity of supply, tank, whether feed is pressure or gravity, quantity of gasoline in engine

15. GASOLINE OR BENZINE, OR OTHER OILS - Are any kept? NO If so, what quantity of each?

What used for?

16. COMMUNICATIONS - Does the building communicate with any other building? YES (a) If so, give dimensions, height, construction and occupancy and indicate clearly on diagram SEE DIAGRAM OF NEW ADDITION

(b) If so, are building separated by solid wall? YES (c) If so, are all openings in this wall protected by self-closing U.L. labelled Class A fire doors? NO

(d) If not, describe type of doors on each opening WIRE GLASS "B" DOORS

PUBLIC PROTECTION

17. FIRE DEPARTMENT - Street distance to the nearest fire station

18. HYDRANTS - What is the distance to the nearest two hydrants? 2 x 200' Give size of main 8"

INTERNAL PROTECTION

19. Show number units for each floor:

	Basement	1st	2nd	3rd	4th	5th	6th	7th	8th
Extgrs. 2 1/2 Gal. Class A	-	-	-						
Extgrs Class B & C	-	-	-						
Stand Pipe & Hose	-	-	-						

20. WATCHMAN - Is there a Watchman making rounds of the whole premises, nights, Sundays, holidays, and at all times when plant is not in operation, rounds being made not less than once an hour during the night, i.e. from 6 p.m. to 6 a.m., and every two hours during the day?

(a) Does he use a portable clock, electric detector, or report to central station?

(b) Give name of manufacturer of clock (c) Does it bear approval label of Underwriters' Laboratories

(d) Are the stations sufficient and so located that the Watchman must traverse each flat and every portion be visible to him?

21. AUTOMATIC FIRE DETECTION SYSTEM - If such system is present provide details on questionnaire obtainable from Canadian Underwriters' Association. LOCAL

DIAGRAM

(Note: - A diagram is not required if the Risk and all property within 100 feet is exactly as shown on the insurance plan.)

Show all Buildings within 50 feet of the Risk and describe their occupancy, show also any openings between adjoining Buildings and all exposed Windows.

Show location of Hydrants

Show Frame Buildings with BLACK, Brick Building with RED, Stone or Concrete Buildings with BLUE and Brick Veneered, Brick Nogged or Metal Clad Buildings with DOTTED RED lines for which purpose a red pencil can be used. Be sure to state exact distance between buildings shown.

Please Draw Diagram at a scale of 50 feet = 1 inch (same as the Insurance Plans).

NORTH

WEST

SOUTH

EXPOSURE: Note - These questions must be answered fully.

North	ft. to building built of	5	stories high, occupied as
South	"	P P	" "
East	"	E A	" "
West	"	N E	" "

I hereby state that the above questions are fully and correctly answered, and agree that they shall form the basis of rating to be given by the C.U.A.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

**External File Num:** FS INC 0711-07249  
**Fuel Occurrence Type:** Leak  
**Date of Occurrence:** 11/29/2007  
**Fuel Type Involved:** Fuel Oil  
**Status Desc:** Completed - Causal Analysis(End)  
**Job Type Desc:** Incident/Near-Miss Occurrence (FS)  
**Oper. Type Involved:** Private Dwelling  
**Service Interruptions:** No  
**Property Damage:** Yes  
**Fuel Life Cycle Stage:** Utilization  
**Root Cause:** Root Cause: Equipment/Material/Component:Yes Procedures:No Maintenance:No Design:Yes Training:No Management:No Human Factors:No  
**Reported Details:**  
**Fuel Category:** Liquid Fuel  
**Occurrence Type:** Incident  
**Affiliation:** Industry Stakeholder (Licensee/Registration/Certificate Holder, Facility Owner, etc.)  
**County Name:** Ottawa  
**Approx. Quant. Rel:** 300  
**Nearby body of water:** Unknown  
**Enter Drainage Syst.:** Unknown  
**Approx. Quant. Unit:** Liters  
**Environmental Impact:** Old oil tank failed and released 300 liters onto the basement floor. There is no floor drain which could be found.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Aug 2021**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2021**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Sep 30, 2021**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: May 31, 2021**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Sep 30, 2021**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994- Sep 30, 2021**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Sep 30, 2021**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jun 30, 2021**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2020**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Aug 2021**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Aug 31, 2021**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Dec 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2019**

**National Defense & Canadian Forces Fuel Tanks:**

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Feb 28, 2021**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Sep 30, 2021**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Sep 30, 2021**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Sep 30, 2021**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2018**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2021**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Sep 30, 2021**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Sep 2020**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2018**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Sep 30, 2021**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**APPENDIX E**  
**MECP FOI Search Request**

# Ministry of the Environment, Conservation and Parks

## Freedom of Information Request for Property Information

### Instructions

Use this form to:

- submit and pay for a new FOI request for access to records/information about a property
- pay for a deposit or a final fee on an existing FOI request

Fields marked with an asterisk (\*) are mandatory.

**Are you: \***

- Submitting a new FOI Request for Property Information
- Paying a deposit or final fee for an existing FOI Request for Property Information

### Section 1 – Description of Records Requested

#### Time Period for Records Requested

From (yyyy/mm/dd) \*

To (yyyy/mm/dd) \*

1900/01/01

2021/12/02

#### Type of Record(s) \*

- All environmental records relating to the identified property/site exclusive of Environmental Approvals and Registrations
- Environmental Approvals and Registrations (e.g. Environmental Compliance Approvals; Certificate of Approval; Renewable Energy Approvals; Environmental Activity and Sector Registry Registrations)

Select only if you are seeking access to an Approval or Registration that is not publicly available or if you are also seeking supporting documents relating to the Approval or Registration.

Operator and vendor Pesticide Licenses from September 4, 2018, final Approvals and Registrations are publicly available on the Access Environment website at:

<https://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en>.

Records of Site Condition (RSC) records are publicly available on the Brownfields Environmental Site Registry (BSER).

- RSC records between 2004 to June 30, 2011 are available at:  
<https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch>
- RSC records filed after July 2011 are available at:  
[https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc\\_search?request\\_locale=en](https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc_search?request_locale=en)

- Other Specific Document(s)

#### Type of Approval/Registration \*

- Drinking Water Licenses
- Pesticide Licenses

- Permits to Take Water
- Noise Vibrations Approvals/Registrations
- Air Emissions Approvals/Registrations
  - No Supporting Documents    All Supporting Documents    Some Supporting Documents
- Water Approvals/Registrations - Ontario Water Resources Commission, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster), mains
  - No Supporting Documents    All Supporting Documents    Some Supporting Documents
- Sewage – Treatment, Stormwater, Storm, Leachate & Lieachate Treatment & Sewage pump stations, Sanitary
  - No Supporting Documents    All Supporting Documents    Some Supporting Documents
- Waste Water - Industrial discharge
  - No Supporting Documents    All Supporting Documents    Some Supporting Documents
- Waste Sites - Disposal, Landfill sites, Transfer stations, Processing sites, Incinerator sites
  - No Supporting Documents    All Supporting Documents    Some Supporting Documents
- Waste Management Systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, Polychlorinated Biphenyls (PCBs) storage, transfer or destruction, Waste Generator Systems
  - No Supporting Documents    All Supporting Documents    Some Supporting Documents

Company Name

- Waste Generator Registration - number/class

List any record(s) that should be excluded from the scope of your request (e.g. email correspondences; records originating from your organization/business; records already in your possession, prior year(s) annual reports for approvals)

Please provide any additional relevant information relating to your request. For example, does your request relate to any other ministry business? Please note that this information is being requested only in order to provide contextual information to the Access and Privacy Office and will not in any way affect or expedite the status of any related ministry business identified.

## Section 2 – Requester Information

Last Name *	First Name *	Middle Initial
Crooks	Julie	

Business/Organization Name (if applicable or indicate "N/A") \*

Pinchin Ltd.

Project/Reference Number (if applicable)

301925

Are you submitting this request on behalf of a client? \*

Yes    No

### Mailing Address

Unit Number

Street Number \*

Street Name \*

PO Box

City/Town \*

Province \*

Postal Code \*

Telephone Number \*

Email Address \*

ext.

Is there an alternate contact (e.g. office admin)? \*

Yes  No

### Section 3 – Current Property Address Information

Is the property a:

Park  Lake  First Nation Band  Wind Farm  Federal Land  Island  Unsurveyed Land

Are you requesting information about multiple addresses? \*

Yes  No

### Property Address

Unit Number

Street Number

Street Name

Full Lot Number

Concession

Geographic Township

City/Town/Village \*

Closest Intersection

### Section 4 – Previous Property Address Information

Do you want the ministry to search all prior historical addresses for this property/site for the time period of the records requested? \*

Yes  No

### Section 5 – Owner Information

Please provide all present and previous property owner and/or tenant names for the search years requested.

#### Current Property Owner/Tenant

864 Lady Ellen Place

Ottawa

Owner Name

Date of Ownership (yyyy/mm/dd)

Tenant Name

## Section 6 – Supporting Documents

Please upload any documents (e.g. Maps) that are relevant to your FOI request.

The total size of all attachments must not be more than 8 MB.

1. File Name

Total File Size
