## Executive Summary

EXP Services Inc. (EXP) was retained by Smart Living Properties to complete a Phase One Environmental Site Assessment (ESA) of the property located at 223-231 Bank Street, Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property consisted of a three-storey, brick and pebble dash clad building, with a full basement. The top two floors contain residential apartment units, while the main floor contains a commercial unit (tenanted by an Art Supply Store and Gallery).

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used to support a site plan application. EXP understands that the most recent use of the Phase One property is residential and that the proposed future use is also residential.

The Phase One property is located at 223-231 Bank Street in Ottawa, Ontario. The Phase One property is located within a residential/commercial area on the northeast corner of the intersection of Bank and Streets and has an area of approximately 0.09 hectares.

Based on a review of historical aerial photographs, and other records review, it appears the subject site was first developed as a residential property prior 1895. The present-day site building was built between 1895 and 1922.

There are no water bodies on the subject site. The closest bodies of water are the Rideau Canal, approximately 840 m to the northeast and the Ottawa River, approximately 870 m to the north northwest. Topographically, the Phase One property is relatively flat with a slight slope down to the south in the general area. The groundwater flow at the Phase One property is anticipated to be northerly due to the influence of the water bodies.

There are no areas of natural or scientific interest (ANSI) within the Phase One study area.

Multiple dry cleaners, gas stations, printing operations, and repair garages have operated in the Phase One study area since the Phase One property was developed. Based on the down/cross-gradient location of these operations, and/or the separation distance from the Phase One property, none of these potentially contaminating activities (PCA) (**PCA 1** through **22**) resulted in areas of potential environmental concern (APEC).

An AST was present in the basement of 219 Bank Street (**PCA 24**). Although no ASTs were observed in the basement of the site building (**PCA 23**) or 178 Nepean Street, anecdotal evidence suggests a former fuel oil tanks in the basements (**PCA 25**). No staining was observed in the vicinity of the AST at 219 Bank Street or on the basement floor of the site building or the building at 178 Nepean Street. Therefore, these PCAs do not result in APECs.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

The Qualified Person who oversaw this work, Mark McCalla, P.Geo., recommends that no further environmental work is needed at the Phase One property.

*This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.*

## 1.0 Introduction

EXP Services Inc. (EXP) was retained by Smart Living Properties to complete a Phase One Environmental Site Assessment (ESA) of the property located at 223-231 Bank Street, Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property consisted of a three-storey building with commercial on the main floor and residential apartments on the upper two floors.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

### 1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used to support a site plan application.

EXP understands that the most recent use of the Phase One property is residential and that the proposed future use is residential and commercial. Consequently, since the proposed future use of the property is the same as its previous use a Record of Site Condition (RSC) is not required.

EXP personnel who conducted assessment work for this project included Mark McCalla, P.Geo., and Carl Hentschel, P.Eng., PMP. An outline of their qualifications is provided in Appendix A.

### 1.2 Phase One Property Information

The Phase One property is located at 223-231 Bank Street in Ottawa, Ontario. The Phase One property is located within a residential/commercial area on the northeast corner of the intersection of Bank and Streets and has an area of approximately 0.09 hectares. The Site is improved with a three-storey residential dwelling with a full basement. The main floor and basement are tenanted by an art store and gallery. A paved alley is present on the east side of the property.

A Site Location Plan is provided as Figure 1 and a Site Plan is provided as Figure 2 in Appendix B.

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid are Zone 18, 445407 m E and 5029545 m N. The UTM coordinates are based on measurements from Google Earth Pro, published by the Google Limited Liability Company (LLC). The accuracy of the centroid is estimated to be less than 10 m.

The Phase One property is owned by Potechin Investments limited Estate of Theodore Wolfe. Authorization to proceed with this investigation was provided by Mr. Ryan Denyer of Smart Living Properties.

## 2.0 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Obtaining a search of land title and assessment rolls for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250-metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

## 3.0 Records Review

### 3.1 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250-metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property. At the time of the site reconnaissance, land usage within 250 metres of the Site was residential and commercial to the north, south, east, and west.

The property is zoned TM H(19) - traditional main street. The surrounding properties in the Phase One study area are also zoned primarily traditional main street.

The Phase One study area is shown on Figure 3 in Appendix B.

### 3.2 First Developed Use Determination

Based on a review of historical aerial photographs, and other records review, it appears the subject site was first developed as a residential property prior 1895. The present-day site building was built between 1895 and 1922.

### 3.3 Fire Insurance Plans

EXP reviewed the Catalogue of Canadian Fire Insurance Plans 1875 – 1975. No fire insurance plans depicting the Phase One study area were available for review. Fire insurance plans for the years 1895, 1922, and 1956 were reviewed. The following was noted:

- The 1895 FIP shows two residential buildings present on the Phase One property, which are labeled as 229, 231, and 233 Bank Street. The surrounding area consists of residential and commercial properties.
- The 1922 FIP shows a single residential building on the Site, labelled the Lisgar Apartments. This building appears similar to the present-day configuration. The surrounding properties consist of primarily residential and commercial properties.
- The 1956 FIP shows the same residential building on the Site. The surrounding properties consist of primarily residential and commercial properties.

Based on a review of the FIPs, the following PCAs were identified:

Location	Proximity to the Site		Years	Environmental Concern to Site and Rationale
<b>171-175 Nepean Street</b>	15 m northeast	Lowe-Martin Printing plant	1963	<b>PCA 1</b>
<b>177 Nepean Street</b>	30 m north	Chinese Laundry	1922	<b>PCA 2</b>
<b>146 Nepean Street</b>	50 m east	Dry cleaner	1963	<b>PCA 3</b>
<b>318 Lisgar Street</b>	50 m southeast	Dry cleaner	1963	<b>PCA 4</b>
<b>344-346 Lisgar Street</b>	60 m southwest	Lillico Garage, three USTs	1922 1963	<b>PCA 5</b>

Location	Proximity to the Site		Years	Environmental Concern to Site and Rationale
344 Lisgar Street	60 m southwest	Unnamed print shop	1963	PCA 5
393 Cooper Street	130 m south	Chinese Laundry	1922	PCA 6
375 Lisgar Street	130 m southwest	Undertakers with garage and UST	1963	PCA 7
262-263 Laurier Avenue	150 m northeast	Campbell Motors Company, auto garage and UST	1963	PCA 8
154 O'Connor Street	160 m northeast	Service station, three USTs	1963	PCA 9
442 Cooper Street	170 m southwest	Borden's Dairy Garage with UST	1922 1963	PCA 10
241-243 Kent Street	170 m southwest	Service station, four USTs	1963	PCA 11
324 Laurier Avenue	175 m northwest	Dry cleaner	1922	PCA 12
233 Kent Street	200 m west	Chinese Laundry	1922	PCA 13
448 Cooper Street	200 m southwest	Dry cleaner	1963	PCA 14
379 Somerset Avenue	200 m south	Chinese Laundry	1963	PCA 15

The following PCA were identified:

- **PCA 1** – 173-175 Nepean Street (15 m northeast) – Lowe-Martin printing plant 1955 and 1965 (PCA #31 – Ink manufacturing, Processing and Bulk Storage);
- **PCA 2** – 177 Nepean Street (30 m north) – Former Chinese Laundry shown in the 1922 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 3** – 146 Nepean Street (70 m east northeast) – Former dry cleaner observed in 1956 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 4** – 318 Lisgar Street (50 m southeast) – Former dry cleaner observed in 1956 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 5** – 344-346 Lisgar Street (60 m southwest) – Lillico Garage with the USTs shown in the 1922 and 1963 FIPs (PCA #10 – Commercial Autobody Shops). Small print shop shown in the northeast corner of the garage in the 1963 FIP (PCA #31 – Ink manufacturing, Processing and Bulk Storage);
- **PCA 6** – 393 Cooper Street (130 m south) – Former dry cleaner observed in 1922 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 7** – 375 Lisgar Street (170 m southwest) Former undertakers with fuel UST shown in the 1963 FIP (PCA #28 – Gasoline and associated products storage in fixed tanks);

- **PCA 8** – 262-263 Laurier Avenue (150 m northeast) – Campbell Motors Company garage with UST (PCA #10 – Commercial Autobody Shops, PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA 9** – 154 O’Connor Street (160 m northeast) – Service station with three USTs shown in the 1963 FIP (PCA#28 – Gasoline and associated products storage in fixed tanks);
- **PCA 10** – 442 Cooper Street (170 m southwest) – Borden’s Dairy garage with USTs shown in the 1922 and 1963 FIP (PCA #10 – Commercial Autobody Shops, PCA#28 – Gasoline and associated products storage in fixed tanks);
- **PCA 11** – 241-243 Kent Street (170 m southwest) – Service station with four USTs shown in the 1963 FIP (PCA#28 – Gasoline and associated products storage in fixed tanks);
- **PCA 12** – 324 Laurier Avenue (175 m northwest) – Former dry cleaner observed in 1963 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 13** – 233 Kent Street (200 m west) – Former dry cleaner observed in 1922 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 14** – 448 Cooper Street (200 m southwest) – Former dry cleaner observed in 1963 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)); and,
- **PCA 15** – 379 Somerset Avenue (200 m south) – Former dry cleaner observed in 1963 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)).

### 3.4 Chain of Title

A chain of title was requested from Read Abstracts Limited for the Phase One property. The chain of title has not yet been received.

### 3.5 City Directories

On April 22, 2022, records pertaining to the site were requested from the EcoLog Environmental Risk Information Services (or EcoLog ERIS) for the municipal street directories in the Phase One study area. EcoLog ERIS is an environmental database and information service provider.

None of the streets in the Phase One study area were listed prior to 1875.

The following properties of interest were noted:

Location	Proximity to the Site		Years	Environmental Concern to Site and Rationale
<b>223 Bank Street</b>	Phase One property	Carruthers J.A., Dry Goods Dominion House Furniture Co. Byshe & Roe, Sporting Goods Carley’s Fashion Igo Cyber House	1905 1910 1914 to 1981 1987 to 2001 2006 to 2011	No
<b>225 Bank Street</b>	Phase One property	McGregor Ltd. Abramson & Co. Cumming Electrical Sales Ltd. Brass Bed Sleep Centre	1914 to 1920 1926 to 1931 1941 to 1976 1981 to 1997	No
<b>229 Bank Street</b>	Phase One property	Wilson H W Co., Dry Goods Montreal Supply Co. American Supply Co.	1910 1914 1931 to 1956	No

Location	Proximity to the Site		Years	Environmental Concern to Site and Rationale
<b>231-233 Bank Street</b>	Phase One property	Hanrahan Meat Co. Mullhall Robert Hardware Wilson & Co. McGregor Ltd. Dominion Stores Ltd. Taylor Bros Ltd. Wallack's	1890 1910 1914 to 1920 1926 1936 to 1956 1961 to 1971 1982 to 2011	No
<b>177 Nepean Street</b>	30 m north	Chinese Laundry	1914 to 1946	<b>PCA 2</b>
<b>238 Bank Street</b>	60 m south	Chinese Laundry	1910 to 1914	<b>PCA 16</b>
<b>346-348 Lisgar Street</b>	60 m southwest	Lillico Garage	1920 to 1961	<b>PCA 5</b>
<b>194 Bank Street</b>	80 m north	Chinese Laundry	1910	<b>PCA 17</b>
<b>146 Nepean Street</b>	85 m northeast	Monson's Cleaners & Dyers	1946 to 1961	<b>PCA 3</b>
<b>244 Bank Street</b>	90 m south	Paris Cleaners & Dyers	1936 to 1941	<b>PCA 18</b>
<b>393 Cooper Street</b>	130 m south	Laundry	1920 to 1946	<b>PCA 6</b>
<b>154 O'Connor Street</b>	160 m northeast	Service Station Garage	1941 to 1966 1987 to 1997	<b>PCA 9</b>
<b>241-243 Kent Street</b>	170 m southwest	Service Station	1936 to 1961	<b>PCA 11</b>
<b>442 Cooper Street</b>	170 m southwest	Borden's Dairy garage	1951 to 1966	<b>PCA 10</b>
<b>283 Bank Street</b>	170 m southeast	Imperial Cleaners & Tailors	1936 to 1946	<b>PCA 19</b>
<b>287 Bank Street</b>	170 m southeast	Parkers Cleaners & Dyers United Cleaners & Tailors Brown's Cleaner's	1936 to 1946 1951 to 1961 1976	<b>PCA 20</b>
<b>233 Kent Street</b>	200 m west	Laundry	1920 to 1936	<b>PCA 13</b>
<b>448 Cooper Street</b>	200 m southwest	Laundry	1956 to 1961	<b>PCA 14</b>
<b>379 Somerset</b>	200 m south	Laundry	1941 to 1951	<b>PCA 15</b>
<b>160 Bank Street</b>	220 m northwest	Chinese Laundry Superior Cleaners & Dyers	1910 to 1914 1941 to 1951	<b>PCA 21</b>
<b>324 Laurier</b>	175 m northwest	Laundry	1920 to 1971	<b>PCA 12</b>

In addition to those previously identified, the following PCAs were identified:

- **PCA 16** – 238 Bank Street (60 m south) – Former Chinese Laundry listed in the city directories between 1910 and 1914 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 17** – 194 Bank Street (80 m north) – Former Chinese Laundry listed in the city directories in 1910 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 18** – 244 Bank Street (90 m south) – Former dry cleaner listed in the city directories between 1936 and 1941 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 19** – 283 Bank Street (170 m southeast) – Former dry cleaner listed in the city directories between 1936 and 1946 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 20** – 287 Bank Street (170 m southeast) – Former dry cleaner listed in the city directories between 1910 and 1951 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)); and,
- **PCA 21** – 160 Bank Street (220 m northwest) – Former dry cleaner listed in the city directories between 1936 and 1976 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)).

## 3.6 Environmental Reports

No environmental reports were provided to EXP for as part of this Phase One ESA.

## 3.7 Environmental Source Information

Information pertaining to the Phase One property was obtained by reviewing documents that are available to the public through municipal and provincial sources. EXP did not identify the need to contact any federal agencies.

Written responses from regulatory agencies and copies of documents obtained via searches are provided in Appendix C.

### 3.7.1 Ontario Ministry of the Environment, Conservation and Parks Records

On April 22, 2022, records pertaining to the Phase One property were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act* (FOI). To date, no response has been received. If environmentally significant information is obtained from the MECP search, it will be provided as an addendum to this report.

### 3.7.2 Historical Land Use Inventory

An HLUI request was made to the City of Ottawa May 16, 2022. To date, no response has been received. If environmentally significant information is obtained from the MECP search, it will be provided as an addendum to this report.

### 3.7.3 Environmental Registry

On May 3, 2022, the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. Five (5) Permits to Take Water were listed for the immediate area. These do not pose an environmental concern to the Phase One Property. No other records were found.

### 3.7.4 Environmental Access

On May 3, 2022, the MECP Environmental Access website was searched for postings within the Phase One study area. Six (6) postings (not including one posting marked at the wrong location) were found. These included four Certificates of Approval -Air for HVAC systems, one Certificate of Approval for a private sewage works, and one Permit to Take Water. None of these postings pose an environmental concern to the Phase One Property.

### 3.7.5 Hazardous Waste Information Network

On May 3, 2022, the MECP Hazardous Waste Information Network (HWIN) website was searched for registered waste generators who are tenants at the subject site address. No matches were found.

### 3.7.6 Records of Site Condition

On May 3, 2022, the MECP Brownfields Registry website was searched for postings of Records of Site Condition within the Phase One study area. Records were found for:

- 300 Lisgar Street (40 m east): posting for a remediation of 35 m<sup>3</sup> of petroleum hydrocarbon impacted soil, with some remaining impacted soil on the property that meets MECP soil quality criteria.
- 366 Lisgar street (50 m west): posting for a remediation of 22 m<sup>3</sup> of petroleum hydrocarbon impacted soil, and the changing of land use from commercial to residential.

Neither of these postings pose an environmental concern to the Phase One property.

### 3.7.7 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

### 3.7.8 PCB Storage Sites

Documents entitled *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada, 2003 Annual Report* prepared by Environment Canada and *Ontario Inventory of PCB Storage Sites* prepared by the MECP were reviewed. No records pertaining to PCB storage sites were identified within the Phase One study area.

### 3.7.9 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed. No former landfills or waste disposal sites were identified within the Phase One study area.

### 3.7.10 Former Industrial Sites

The document entitled *Mapping and Assessment of Former Industrial Sites; City of Ottawa* prepared by Intera Inc. was reviewed. Two historic industrial sites were identified within the Phase One study area.

- 175 Nepean Street (50 m to the north): Lowe-Martin Printing [1928-1950] Commercial printing and plate-making (PCA 1); and,
- 300 Laurier Avenue West (200 m to the north): Ottawa Photo Engraving [1925-1950] Commercial printing and plate-making (PCA 2).

## 3.8 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the Phase One property and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the EcoLog ERIS report is provided in Appendix D.

A total of 403 entries from the EcoLog ERIS report were reviewed and the most pertinent entries are summarized below:

Location	Proximity to the Site	Description	Environmental Concern to Site (Yes/No) & Rationale
231 Bank Street	Site	Wallack's Art and Drafting listed in the Scott Manufacturing Database	No, the present Art Supply and Gallery store is not considered an environmental risk.
315 Lisgar Street	Adjacent to the east	Canadian Bible Society listed in the Scott Manufacturing Database	No, based on nature of the operation.
212 Bank Street	20 m west	Discovery of abandoned underground storage tank (UST) in 2010	No, as entry gave no indication of soil/groundwater impact.
224 Bank Street	20 m west	Bicycle Revival., registered waste generator of petroleum distillates from 1989 to 2001 (ON1177400).	No, nature of wastes not a concern if disposed of appropriately.
171 Nepean Street	50 m north	EAS Illustrators, registered waste generator of petroleum distillates in 1989 to 1998 (ON1203100). Armco Printing, registered waste generator of photo processing waste in 1992 to 1998 (ON1550000).	No, nature of wastes not a concern if disposed of appropriately.
232 Bank Street	20 m west	Oil tank leak (5L) in 2000	No, based on small volume.
287 Lisgar Street	70 m east	Diesel spill (3L) in 2020	No, based on small volume
154 O'Connor Avenue	110 m east	Seventeen (17) entries related to operation of a retail gasoline sales outlet including underground tank records and spill reports.	Yes, this is considered a PCA (PCA 9)

All other entries were not considered an environmental risk to the Phase One property based on intervening distance and/or nature of the listing.

## 3.9 Physical Setting Sources

### 3.9.1 Aerial Photographs

Aerial photographs dated 1928, 1958, 1965, 1976, 1991, 1999, 2005, 2015, and 2019 were available for review on the City of Ottawa website. Aerial photographs dated prior to 1928 were not available for review. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs. Copies of the aerial photographs are provided in Appendix E.

Aerial Photograph (year)	Details
1928	The Phase One property appears to have been developed with a number of buildings, but the photo quality is poor. Bank and Lisgar Streets are visible and the surrounding area has been developed.
1958	The Phase One property appears similarly developed to the 1928 aerial photograph.
1965	The Phase One property and study area are similarly developed to the 1958 aerial photograph.
1976	The Phase One property and study area are similarly developed to the 1965 aerial photograph but the photo quality is poor.

Aerial Photograph (year)	Details
1991	The Phase One property and study area are similarly developed to the 1965 and 1976 aerial photographs.
2005	The Phase One property and study area are similarly developed to the 1991 aerial photograph.
2015	The Phase One property and study area are similarly developed to the 2005 aerial photograph. Of note is the adjacent property to the south appears to have been demolished.
2019	The Phase One property and study area are similarly developed to the 2015 aerial photograph.

Based on the review of the aerial photographs, no additional PCAs have been identified in the Phase One study area in addition to those mentioned in previous sections.

### 3.9.2 Topography, Hydrology, Geology

The following information sources were reviewed to determine the nature of the subsurface materials at the site:

- Map 1506A, Surficial Geology, Ottawa- Hull. Scale 1:50,000. 1982;
- Map 1508A, Generalized Bedrock Geology, Ottawa- Hull. Scale 1:125,000. 1980; and,
- MECP Water Well Records.

Beneath any fill, the surficial geology of the subject site is characterised by Champlain Sea deposits of plain till. The bedrock geology underlying the site consists of limestone with some shaley partings of the Ottawa Formation. The depth to rock in the area is typically 5 m below surface grade or less.

Topographically, the land is relatively flat with a slight local slope down to the south.

### 3.9.3 Fill Materials

No evidence of fill material was identified. The site property is level with adjacent land and no significant amounts of fill material are suspected.

### 3.9.4 Water Bodies and Areas of Natural Significance

There are no water bodies on the subject site. The closest bodies of water are the Rideau Canal, approximately 840 m to the northeast and the Ottawa River, approximately 870 m to the north northwest. Topographically, the Phase One property is relatively flat with a slight slope down to the south in the general area. The groundwater flow at the Phase One property is anticipated to be northerly due to the influence of the water bodies.

There are no Area of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website ([www.gisapplication.lrc.gov.on.ca/mamnh/Index.html](http://www.gisapplication.lrc.gov.on.ca/mamnh/Index.html)).

### 3.9.5 Well Records

The Ontario well records website ([www.ontario.ca/environment-and-energy/map-well-records](http://www.ontario.ca/environment-and-energy/map-well-records) water wells) was accessed. There were 23 well records for the Phase One study area. All of the records were for monitoring wells.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library ([maps.ogsrlibrary.com/wells/](http://maps.ogsrlibrary.com/wells/)).

## 3.10 Site Operating Records

No site operating records were provided to EXP for review.

## 4.0 Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable about both the current and historical Phase One property uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the Phase One property.

The property owner's representatives (real estate agent and property manager) were interviewed during the site visit of April 20, 2022. Any pertinent information is discussed in section 5.0 below.

The property owner was contacted indirectly, through the client, on May 10, 2022 in regards to any information on underground fuel oil storage tanks. They were unaware of any tanks on the property.

## 5.0 Site Reconnaissance

### 5.1 General Requirements

On April 20, 2022 at 13:00h, Mr. Carl Hentschel of EXP conducted the site visit for the Phase One property. The weather was sunny with an approximate temperature of 10 degrees Celsius. The Site visit lasted approximately 60 minutes.

The site visit was conducted in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the Phase One property.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

Photographs were taken at the Phase One property on April 20, 2022 and pertinent photographs are included in Appendix F.

### 5.2 Specific Observations at the Phase One Property

#### 5.2.1 Buildings and Structures

The building is three-storey, brick and pebble dash clad, with a full basement. The top two floors contain residential apartment units, while the main floor contains a commercial unit (tenanted by an Art Supply Store and Gallery). A paved laneway is present on the east side of the property leading to a small parking area.

#### 5.2.2 Site Utilities and Services

The Site is serviced with municipal sewer and water, hydro and natural gas.

There was no evidence of a railway being present on the Phase One property.

### 5.3 Storage Tanks

#### 5.3.1 Underground Storage Tanks

EXP did not observe any evidence of underground storage tanks (USTs), such as vent and fill pipes, during the site reconnaissance. Furthermore, the historical review did not identify any former USTs at the site.

#### 5.3.2 Above Ground Storage Tanks

EXP did not observe any evidence of underground storage tanks (USTs), such as vent and fill pipes, during the site reconnaissance. However, anecdotal evidence suggests a former fuel oil tank in the basement (**PCA 23**). Based on site observations, there was no evidence of a former AST. The floor surfaces were in good condition with no staining, therefore the possible former AST is not considered to be an AEPC.

### 5.4 Chemical Storage Handling and Floor Condition

Chemical use on the Phase One property was limited to small quantities of commonly available retail sized containers of cleaners and detergents, as well as paints, varnishes, and glues. No staining on the floor in vicinity of these materials was observed.

## 5.5 Areas of Stained Soil, Pavement or Stressed Vegetation

No staining or stressed vegetation was observed on the limited area outside the building footprint.

## 5.6 Fill and Debris

No fill material was observed on the Phase One Property or is anticipated.

## 5.7 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. According to the Environmental Protection Act (EPA), an ECA (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29, 1988.

No air emissions of concerns were identified at the time of the site visit.

## 5.8 Odours

No strong odours were present during the site visit.

## 5.9 Noise

No excessive noise was heard during the site visit.

## 5.10 Other Observations

There were no pits and lagoons, no railways or spurs and no unidentified substances observed on the Phase One property.

## 5.11 Special Attention Items, Hazardous Building Materials and Designated Substances

### 5.11.1 Asbestos

Asbestos-containing materials (ACM) are fibrous hydrated silicates and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-Friable asbestos refers to asbestos that is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-Friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACM in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHS). Under OHS, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACM was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

Based on the age of the building at the Phase One property ACM may be present.

### 5.11.2 Ozone Depleting Substances (ODSs)

Chlorofluorocarbons (CFC), often referred to as freons, ceased production in Canada in 1993 as a result of their ozone-depleting characteristics. Importation of CFCs into Canada ceased in 1997 and a total ban on their use is proposed for 2020. The use of these materials is still permitted in existing equipment, but equipment must be serviced by a licensed contractor such that CFCs are contained and not released to the environment during servicing or operation.

Maintenance of refrigerant containing equipment should continue to be completed by a licensed refrigeration contractor. The equipment should only be repaired, removed, or serviced by an appropriately licensed contractor.

### 5.11.3 Lead

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinfoil and plumbing. The use of lead-based paints (LBPs) was phased out *circa* 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain higher levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the age of the building at the Phase One property LBPs may be present. The painted surfaces observed during EXP's site visit were observed to be in good condition.

### 5.11.4 Mercury

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove "interior uses" from their product labels.

Mercury-containing equipment was not observed during the Site visit. The interior painted surfaces observed during EXP's site visit were in good condition. No mercury-containing thermostats were observed in the building.

### 5.11.5 Polychlorinated Biphenyls (PCB)

The manufacture of PCB in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Phase One property. Potential equipment, which could contain PCB include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCB must be disposed of in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCB is permissible.

There was no evidence of PCB-containing equipment on the Phase One property.

### 5.11.6 Urea Formaldehyde Foam Insulation

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets, and fabrics, and it contributes to "that new house smell."

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose, and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. The further use of UFFI was banned in Canada in 1980.

No evidence of UFFI was observed during the site visit.

#### 5.11.7 Radon

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints, and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerels per cubic metre (Bq/m<sup>3</sup>) where radon gas is present and the annual radon concentration exceeds 200 Bq/m<sup>3</sup> in the normal occupancy area.

A radon gas assessment was beyond the scope of this Phase One ESA, and as such, radon gas was not assessed. Based on the presence of limestone bedrock at the site, radon gas would not be generated.

#### 5.11.8 Mould

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow, a food source (i.e. gypsum wallboard, wallpaper, wood, etc.) and moist conditions are required. Mould can have an impact on human health depending on the species and concentration of the airborne mould spores. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment, the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled "mould guidelines for the Canadian construction industry" and the Environmental Abatement Council of Ontario (EACO) guidelines titled "EACO Mould Abatement Guidelines, Edition 3 (2015)."

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

No indication of mould or water damage were observed during the site visit.

#### 5.12 Other Substances

No other special attention substances (such as acrylonitrile or isocyanates) were suspected to be present at the Phase One property at the time of site reconnaissance.

#### 5.13 Processing and Manufacturing Operations

No processing or manufacturing operations were observed at the Phase One property.

#### 5.14 Hazardous Materials Use and Storage

No hazardous materials are used or stored at the Phase One property.

### 5.15 Vehicle and Equipment Maintenance Areas

No equipment maintenance has occurred on the Phase One property.

### 5.16 Oil/Water Separators

No oil/water separators were present at the Phase One property.

### 5.17 Sewage and Wastewater Disposal

Sewage and wastewater generated at the Phase One property was disposed of via the municipal system. There is no wastewater currently generated at the Phase One property.

### 5.18 Solid Waste Generation, Storage & Disposal

No solid wastes are currently generated at the Phase One property.

### 5.19 Liquid Waste Generation, Storage & Disposal

No liquid waste is generated at the Phase One property.

### 5.20 Unidentified Substances

No unidentified substances were observed on the Phase One property at the time of the site visit. No dumping or any other deleterious materials were identified.

### 5.21 Hydraulic Lift Equipment

No hydraulic equipment was observed at the Phase One property.

### 5.22 Mechanical Equipment

No mechanical equipment of concern was present on the Phase One property.

### 5.23 Abandoned and Existing Wells

There are no wells present on the Phase One property.

### 5.24 Roads, Parking Facilities and Right of Ways

Vehicular access to the Phase One property is via Main Street.

### 5.25 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within 250 m of the Phase One property was conducted from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the Phase One property. Refer to Figure 3 in Appendix B for the adjacent land uses.

The following land uses border the Phase One property:

- North: Commercial/residential;

- West: Commercial;
- East: Commercial; and
- South: Under construction.

No environmental concerns relating to the adjacent properties were observed at the time of the site visit.

Vent/fill pipes were observed at the front of the building at 219 Bank Street (**PCA 24**). It is assumed that the building at 178 Nepean Street was also historically heated with oil (**PCA 25**).

## 5.26 Enhanced Investigation Property

Ontario Regulation 153/04 defines an enhanced investigation property as a “property that is used, or has ever been used, in whole or in part for an industrial use or any of the following commercial uses: a garage; a bulk liquid dispensing facility, including a gasoline outlet; or, for the operation of dry-cleaning equipment.”

Therefore, in accordance with Regulation 153/04, the property is not considered to be an enhanced investigation property.

## 5.27 Summary and Written Description of Investigation

At the time of the investigation, the Phase One property consisted of vacant residential properties.

Based on the findings of this investigation the following PCA have been identified in the Phase One study area:

- PCA #10 – Commercial Autobody Shops
- PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks
- PCA #31 – Ink manufacturing, Processing and Bulk Storage
- PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)

No areas of potential environmental concern (APEC) were identified.

## 6.0 Review and Evaluation of Information

### 6.1 Current and Past Uses

Based on a review of historical aerial photographs, and other records review, it appears the subject site was first developed as a residential property prior 1895. The present-day site building was built between 1895 and 1922.

### 6.2 Potentially Contaminating Activity

Ontario Regulation (O. Reg.) 153/04 defines a Potential Contaminating Activity (PCA) as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D that occurs or has occurred in the Phase One study area. The following PCA were identified for the Phase One property and the Phase One study area:

The following PCAs were identified:

- **PCA 1** – 173-175 Nepean Street (15 m northeast) – Lowe-Martin printing plant 1955 and 1965 (PCA #31 – Ink manufacturing, Processing and Bulk Storage);
- **PCA 2** – 177 Nepean Street (30 m north) – Former Chinese Laundry listed in the city directories between 1914 and 1946 and in the 1922 FIP (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 3** – 146 Nepean Street (70 m east northeast) – Former dry cleaner observed in 1956 FIP and listed in the city directories between 1946 and 1961 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 4** – 318 Lisgar Street (50 m southeast) – Former dry cleaner observed in 1956 FIP and listed in the city directories between 1946 and 1961 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 5** – 344-346 Lisgar Street (60 m southwest) – Lillico Garage with the USTs listed in the city directories between 1920 and 1961, shown in the 1922 and 1963 FIPs (PCA #10 – Commercial Autobody Shops). Small print shop shown in the northeast corner of the garage in the 1963 FIP (PCA #31 – Ink manufacturing, Processing and Bulk Storage);
- **PCA 6** – 393 Cooper Street (130 m south) – Former dry cleaner observed in 1922 FIP and listed in the city directories between 1920 and 1946 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 7** – 375 Lisgar Street (170 m southwest) Former undertakers with fuel UST (PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA 8** – 262-263 Laurier Avenue (150 m northeast) – Campbell Motors Company garage with UST (PCA #10 – Commercial Autobody Shops, PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA 9** – 156 O’Connor Avenue (160 m northeast) – Service station with three USTs listed in the city directories between 1941 and 1966 and shown in the 1963 FIP (PCA#28 – Gasoline and associated products storage in fixed tanks). Listed in the city directories as a repair garage between 1987 and 1997 (PCA #10 – Commercial Autobody Shops);
- **PCA 10** – 442 Cooper Street (170 m southwest) – Borden’s Dairy garage with USTs shown in the 1922 and 1963 FIP and listed in the city directories between 1956 and 1966 (PCA #10 – Commercial Autobody Shops, PCA#28 – Gasoline and associated products storage in fixed tanks);
- **PCA 11** – 241-243 Kent Street (170 m southwest) – Service station with four USTs listed in the city directories between 1936 and 1961 and shown in the 1963 FIP (PCA#28 – Gasoline and associated products storage in fixed tanks);
- **PCA 12** – 324 Laurier Avenue (175 m northwest) – Former dry cleaner observed in 1963 FIP, and listed in the city directories between 1920 and 1971 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));

- **PCA 13** – 233 Kent Street (200 m west) – Former dry cleaner observed in 1922 FIP, and listed in the city directories between 1920 and 1936 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 14** – 448 Cooper Street (200 m southwest) – Former dry cleaner observed in 1963 FIP, and listed in the city directories between 1956 and 1961 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 15** – 379 Somerset Avenue (200 m south) – Former dry cleaner observed in 1963 FIP, and listed in the city directories between 1941 and 1951 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 16** – 238 Bank Street (60 m south) – Former Chinese Laundry listed in the city directories between 1910 and 1914 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 17** – 194 Bank Street (80 m north) – Former Chinese Laundry listed in the city directories in 1910 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 18** – 244 Bank Street (90 m south) – Former dry cleaner listed in the city directories between 1936 and 1941 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 19** – 283 Bank Street (170 m southeast) – Former dry cleaner listed in the city directories between 1936 and 1946 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 20** – 287 Bank Street (170 m southeast) – Former dry cleaner listed in the city directories between 1910 and 1951 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 21** – 160 Bank Street (220 m northwest) – Former dry cleaner listed in the city directories between 1936 and 1976 (PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used));
- **PCA 22** – 300 Laurier Avenue West (200 m north) Ottawa Photo Engraving listed in the former industrial sites database, operated between 1925 and 1950 (PCA #31 – Ink manufacturing, Processing and Bulk Storage);
- **PCA 23** – 231 Bank Street (Phase One property) former fuel oil tank in the basement (PCA#28 – Gasoline and associated products storage in fixed tanks);
- **PCA 24** – 219 Bank Street (north adjacent) fuel oil tank in the basement (PCA#28 – Gasoline and associated products storage in fixed tanks; and,
- **PCA 25** – 178 Nepean Street (25 m north) former fuel oil tank in the basement (PCA#28 – Gasoline and associated products storage in fixed tanks.

No other PCAs that took place within the vicinity of the Phase One property (approximately 250 m radius) were identified.

### 6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present. Based on this Phase One ESA, no APEC were identified.

Multiple dry cleaners, gas stations, printing operations, and repair garages have operated in the Phase One study area since the Phase One property was developed. Based on the down/cross-gradient location of these operations, and/or the separation distance from the Phase One property, none of these PCAs (**PCA 1** through **22**) resulted in APECs.

An AST was present in the basement of 219 Bank Street (**PCA 24**). Although no ASTs were observed in the basement of the site building (**PCA 23**) or 178 Nepean Street, anecdotal evidence suggests a former fuel oil tanks in the basements (**PCA 25**). No staining was observed in the vicinity of the AST at 219 Bank Street or on the basement floor of the site building or the building at 178 Nepean Street.

## 6.4 Phase One Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 2.

### 6.4.1 Buildings and Structures

The building is three-storey, brick and pebble dash clad, with a full basement. The top two floors contain residential apartment units, while the main floor contains a commercial unit (tenanted by an Art Supply Store and Gallery). A paved laneway is present on the east side of the property leading to a small parking area.

### 6.4.2 Water Bodies and Groundwater Flow Direction

There are no water bodies on the subject site. The closest bodies of water are the Rideau Canal, approximately 840 m to the northeast and the Ottawa River, approximately 870 m to the north northwest. Topographically, the Phase One property is relatively flat with a slight slope down to the south in the general area. The groundwater flow at the Phase One property is anticipated to be northerly due to the influence of the water bodies.

### 6.4.3 Areas of Natural Significance

There are no ANSI within the Phase One study area.

### 6.4.4 Water Wells

There were 23 well records for the Phase One study area. All of the records were for monitoring wells.

### 6.4.5 Potentially Contaminating Activity

Based on the findings of this investigation the following PCA have been identified in the Phase One study area:

- PCA #10 – Commercial Autobody Shops
- PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks
- PCA #31 – Ink manufacturing, Processing and Bulk Storage
- PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)

### 6.4.6 Areas of Potential Environmental Concern

No APEC were identified. Multiple dry cleaners, gas stations, printing operations, and repair garages have operated in the Phase One study area since the Phase One property was developed. Based on the down/cross-gradient location of these operations, and/or the separation distance from the Phase One property, none of these PCAs (**PCA 1** through **22**) resulted in APECs.

An AST was present in the basement of 219 Bank Street (**PCA 24**). Although no ASTs were observed in the basement of the site building (**PCA 23**) or 178 Nepean Street, anecdotal evidence suggests a former fuel oil tanks in the basements (**PCA 25**). No staining was observed in the vicinity of the AST at 219 Bank Street or on the basement floor of the site building or the building at 178 Nepean Street.

#### 6.4.7 Subsurface Stratigraphy

Beneath any fill, the surficial geology of the subject site is characterised by Champlain Sea deposits of plain till. The bedrock geology underlying the site consists of limestone with some shaley partings of the Ottawa Formation. The depth to rock in the area is typically 5 m below surface grade or less.

#### 6.4.8 Uncertainty Analysis

The CSM is a simplification of reality, which aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

## 7.0 Conclusions

Based on a review of historical aerial photographs, and other records review, it appears the subject site was first developed as a residential property prior 1895. The present-day site building was built between 1895 and 1922.

There are no water bodies on the subject site. The closest bodies of water are the Rideau Canal, approximately 840 m to the northeast and the Ottawa River, approximately 870 m to the north northwest. Topographically, the Phase One property is relatively flat with a slight slope down to the south in the general area. The groundwater flow at the Phase One property is anticipated to be northerly due to the influence of the water bodies.

Multiple dry cleaners, gas stations, printing operations, and repair garages have operated in the Phase One study area since the Phase One property was developed. Based on the down/cross-gradient location of these operations, and/or the separation distance from the Phase One property, none of these PCAs (**PCA 1** through **22**) resulted in APECs.

An AST was present in the basement of 219 Bank Street (**PCA 24**). Although no ASTs were observed in the basement of the site building (**PCA 23**) or 178 Nepean Street, anecdotal evidence suggests a former fuel oil tanks in the basements (**PCA 25**). No staining was observed in the vicinity of the AST at 219 Bank Street or on the basement floor of the site building or the building at 178 Nepean Street. Therefore, these PCAs do not result in APECs.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

The Qualified Person who oversaw this work, Mark McCalla, P.Geo., recommends that no further environmental work is needed at the Phase One property.

## 9.0 Limitation of Liability, Scope of Report, and Third Party Reliance

### Basis of Report

This report ("Report") is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or Smart Living Properties ("the Client") has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

### Reliance on Information Provided

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp. If new information about the environmental conditions at the Site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

### Standard of Care

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

### Complete Report

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

### Use of Report

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

### Report Format

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

## 10.0 Signatures

We trust this report meets your current needs. If you have any questions pertaining to the investigation undertaken by EXP, please do not hesitate to contact the undersigned. The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

Carl Hentschel, P.Eng., PMP  
Environmental Engineer  
Earth and Environment

Mark McCalla, P.Geo.  
Senior Project Manager  
Earth and Environment

## Appendix A: Qualifications of Assessors

## Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment, Conservation and Parks. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

**Carl Hentschel, P.Eng., PMP**, has 20 years of experience in the environmental consulting field working primarily in Ontario, Quebec and the northern territories. He has managed and/or completed numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, soil and groundwater remediation projects, designated substance surveys, building demolition management, environmental effects evaluations (EEE), air quality assessments, bid specification preparation, and is an experienced technical report writer and reviewer.

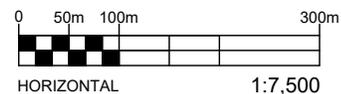

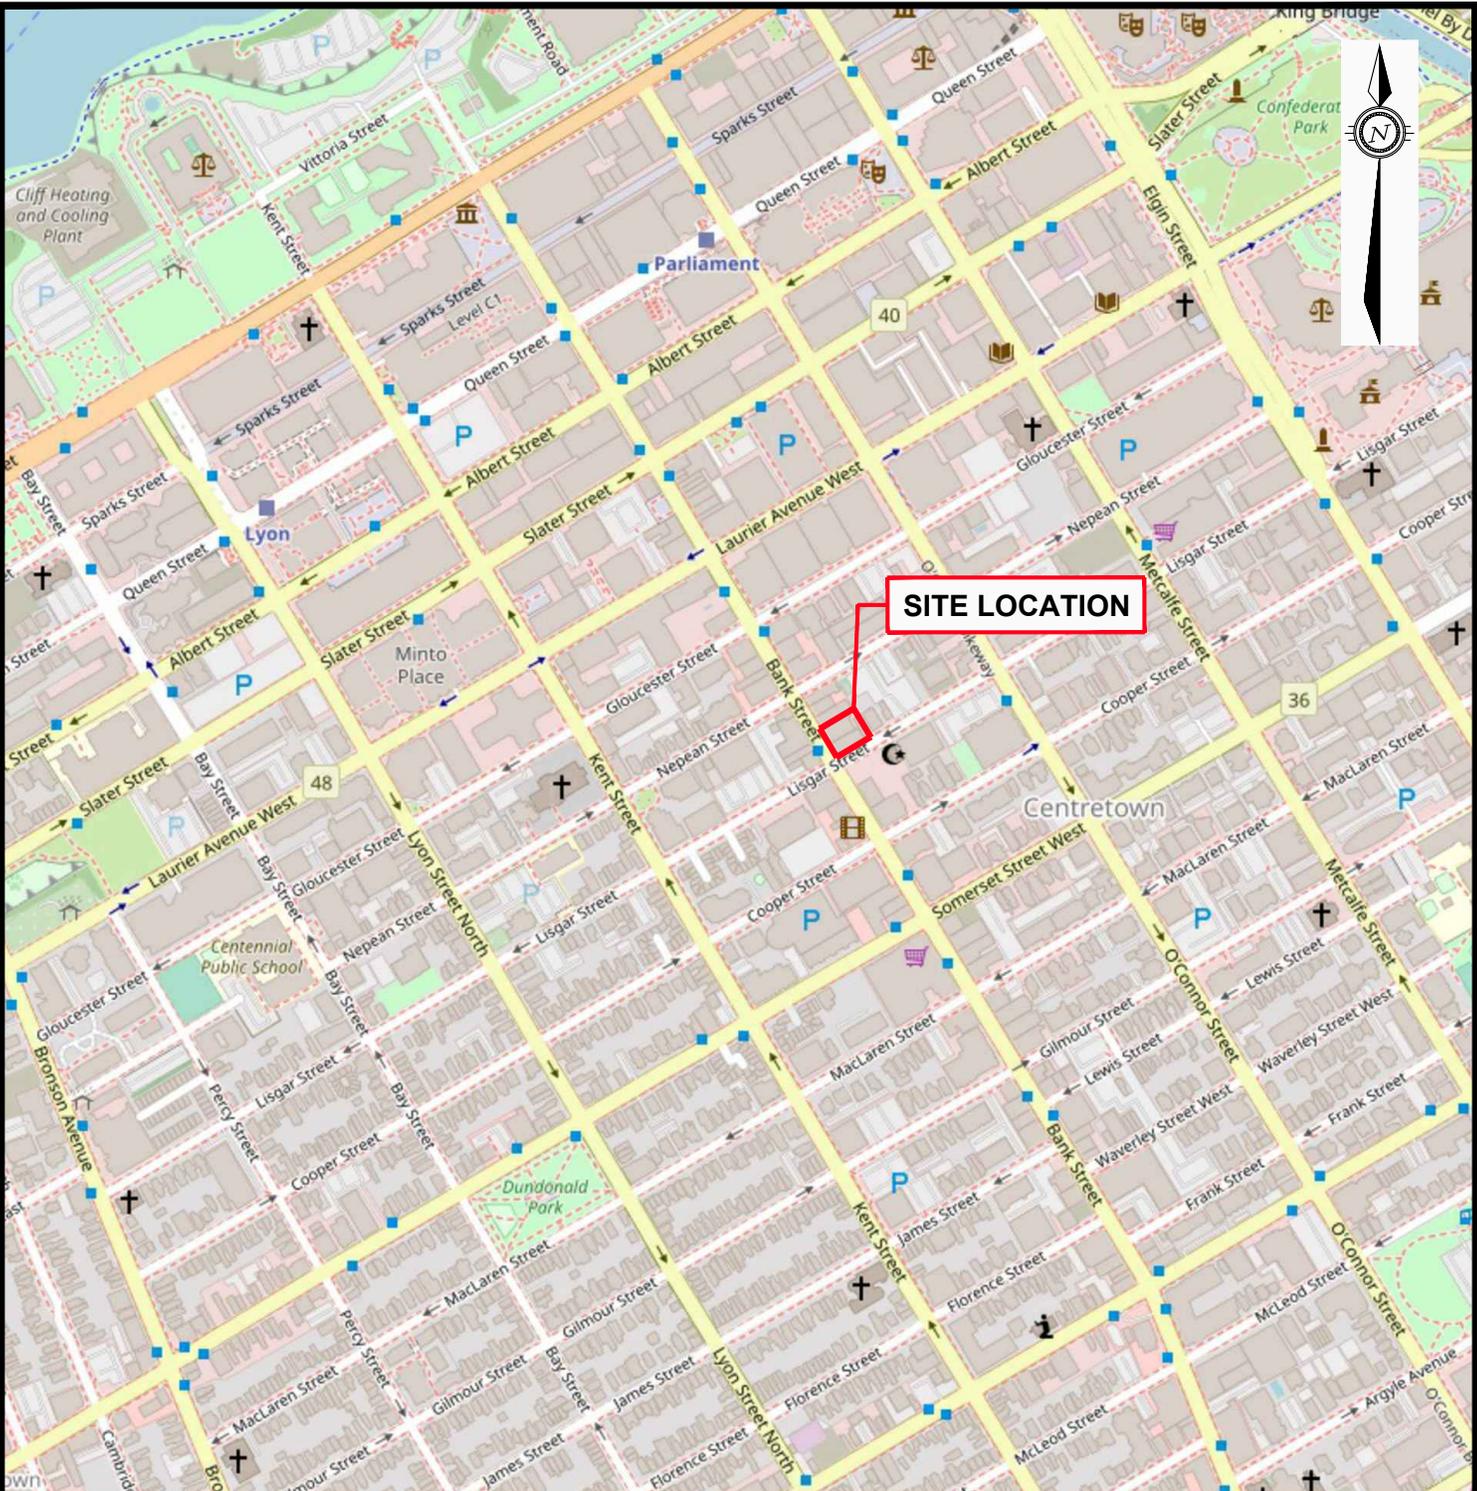

**Mark McCalla, P.Geo.**, is a senior Environmental Scientist with EXP who has over 30 years of experience in the environmental consulting field. His technical undertakings have including work in the following fields: Phase I and II Environmental Site Assessments; Site Specific Risk Assessments; Petroleum and chlorinated hydrocarbon contaminated sites; Soil and groundwater remediation technologies; Hydrogeological, Terrain Analysis and Aggregate Assessments; Preparation of Ontario Ministry of Environment Certificate of Approvals and Records of Site Condition. Mr. McCalla is a Qualified Person for completing Phase I and II Environmental Site Assessments as per O.Reg. 153/04.

Re: OTT-22010865-A0 **File Review Request**  
**231 Bank Street, Ottawa, Ontario**

Dear Sir or Madam:

I am sending a Freedom of Information Request to you for 231 Bank Street, Ottawa, Ontario. We are conducting an environmental site assessment and require any environmental concerns.

If possible, we would appreciate receiving the documentation by email ([kathy.radisch@exp.com](mailto:kathy.radisch@exp.com)) and by mail. If you have any questions, or require any further information, please do not hesitate to contact the undersigned at 613-688-1891, ext. 63296.

Yours truly,  
**EXP Services Inc.**

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

**Penalty Imposed:**

**Description:**

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to pay the fine.

**Investigation 1:**

**Investigation 2:**  
**Penalty Imposed:**  
**Description:**

On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Nov 2021**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Nov 2021**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jan 2022**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Mar 31, 2022**

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020****Delisted Fuel Tanks:**

Provincial

DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022****Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Mar 31, 2022****Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Mar 31, 2022****Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Mar 31, 2022****Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Nov 30, 2021****Environmental Issues Inventory System:**

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2021**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Nov 2021**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Nov 30, 2021**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2022**

**National Analysis of Trends in Emergencies System (NATES):**

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2020**

**National Defense & Canadian Forces Fuel Tanks:**

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Feb 28, 2022**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Feb 28, 2022**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Mar 31, 2022**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Mar 31, 2022**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2019**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2022**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Sep 30, 2021**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2019**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Mar 31, 2022**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Sep 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
