## PROJECT INFORMATION

### Application Submission

This Design Brief has been prepared by Rossmann Architecture Inc. for BOUSADA INC. (the owner) in support of the application for Site Plan Control for the development of the property located at 30 Auriga Dr in Nepean, Ottawa (K2E 8B7), near the intersection of Auriga Drive and Deakin Street south of the City. This property will be referred herein as the 'Subject Site'.

The Subject Site is within the IG5 zone, allowing a building height of up to 22m.

The proposed development (Figure 1.) consists of a building with a 1 storey storage warehouse (792 m<sup>2</sup>) connected to a 2 storey office building with an area of 250 m<sup>2</sup>. Additionally 20 parking spaces have been provided on grade in the exterior. There is one bicycle parking next to the entrance. The site also provides an access for a WB-20 truck for loading/unloading.

This location, encouraged by the zoning, provides a valuable opportunity to improve the urban landscape while adhering to the approved land use.

## BUILDING DESIGN (in accordance with Official Plan Section 5.2.1)

The proposed development is a commercially used building that consists of a 1-storey storage warehouse (792 m<sup>2</sup>) connected to a 2 storey office building with an area of 250 m<sup>2</sup>. The 2-storey office building consists of two separate areas; a rental office space and a complete office space with their own storage warehouse.

The complete office space includes three office rooms, a conference room, a showroom, and a bathroom on the ground floor. The second floor includes a kitchen, a bathroom, and an open space. The rental space also carries a second floor.

There are two separate storage warehouses for each office space. The rental space has a 220 m<sup>2</sup> storage warehouse and the complete office space has a 572 m<sup>2</sup> storage warehouse with locker space. Both of the storage warehouses include garage doors and exit doors for convenience.

### Materiality

The materials contribute to reinforcing the separation between the rental space and the complete office on the front elevation. On the front elevation, the black metal siding (Figure 7.) stands bold at each corner indicating the 2 separate office spaces. The curtain wall (Figure 9.) and windows indicate the entrances. The off-white siding (Figure 8.) connects the two corners and surrounds the rest of the building.
