1.0 EXECUTIVE SUMMARY

Terrapex Environmental Ltd. (Terrapex) was retained by the Avenyn Capital Partners LP II (the Client) to conduct a Phase One Environmental Site Assessment (ESA) of the properties located at 1591 & 1611 Michael Street, and a portion of 1601 Michael Street, Ottawa, Ontario (referenced as "the Phase One property" or "the Site").

It is understood that the study documented herein is being undertaken for the purposes of supporting a site plan agreement with the City of Ottawa.

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the Phase One study area, in order to satisfy the Phase One ESA general objectives listed in Ontario Regulation (O. Reg.) 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One property;
- to determine the need for a Phase Two ESA; and,
- to provide a basis for carrying out any Phase Two ESA (if required).

The extent of the Phase One property was provided by the Client and included 2 adjoining registered parcels, set in an industrial/commercial setting, with a laneway entrance on the 1611 Michael Street side of the Site. Other roads in the Study Area included Belfast Road in the northwest, Liverpool Crescent in the east, and Newmarket Street in the south.

At the time of Site reconnaissance, the northern portion of the Site was overgrown with vegetation and mature trees were observed along the northern property boundary. The south-central portion of the Site was gravel-covered with a small single-storey modular building in the southwest portion.

The Site was first registered in 1859 (likely part of a larger rural/agricultural parcel). In 1959, the Site was registered to Rosco Metal & Roofing Products Ltd (Westeel-Rosco Ltd. in 1983) and was likely used for commercial storage. In 2017, the Site was used as a vehicle storage yard. Presently, the Site is vacant.

The extent of the Phase One study area included all properties, in whole or in part, located within 250 m of the Phase One property (the minimum required by O. Reg. 153/04).

The Phase One study area was generally used for rural residential/agricultural purposes until the 1960s when it was developed for commercial and industrial uses.

Based on the information gathered during the records review, interviews, and Site reconnaissance, potentially contaminating activities (PCAs) were identified in the Phase One study area, which included the Site.

A PCA as defined in O. Reg. 153/04 is a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in the Phase One study area. Other activities not specifically listed in Table 2 of Schedule D, may also be considered as PCAs based on the judgement/discretion of the qualified person.

Of the PCAs identified within the Phase One study area, several were deemed to contribute to an area of potential environmental concern (APEC) at the Site.

An APEC, as defined in O. Reg. 153/04, is the area on, in, or under a Phase One property where one or more contaminants are potentially present, as determined through the Phase One ESA, including through (a) identification of past or present uses on, in or under the Phase One property and (b) identification of potentially contaminating activity.

APECs and associated PCAs, contaminants of potential concern (COPCs), and media potentially impacted (namely soil and groundwater) identified at the Site are briefly summarized below.

LOCATION OF APEC ON PHASE ONE PROPERTY	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	CONTAMINANTS OF POTENTIAL CONCERN	MEDIA POTENTIALLY IMPACTED (Groundwater, Soil, and/or Sediment)
	Importation of Fill Material of Unknown Quality	Inorganics, PAHs, BTEX and PHCs	Soil
	Metal Fabrication	Inorganics, PAHs, BTEX and PHCs	Soil
Entire Site	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
	Metal Treatment, Coating, Plating and Finishing	Inorganics, PAHs, BTEX and PHCs	Soil
	Storage Containers- Other Plastic Industries	Inorganics, BTEX, PHCs, VOCs	Soil and Groundwater
1611 Michael St	Salvage Yard, including automobile wrecking	Inorganics, PAHs, BTEX and PHCs	Soil and Groundwater

 TABLE 10:
 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

LOCATION OF APEC ON PHASE ONE PROPERTY	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	CONTAMINANTS OF POTENTIAL CONCERN	MEDIA POTENTIALLY IMPACTED (Groundwater, Soil, and/or Sediment)
	Metal Treatment, Coating, Plating and Finishing	Inorganics	Soil
	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
	Salvage Yard, including automobile wrecking	Inorganics, PAHs, BTEX and PHCs	Soil and Groundwater

	Vehicles and Associated Parts Manufacturing	BTEX, PHCs, VOCs	Groundwater
	Metal Fabrication	Inorganics, PAHs, BTEX and PHCs	Soil
	Operation of Dry Cleaning Equipment (where chemicals are used)	VOCs	Groundwater
	Operation of Dry Cleaning Equipment (where chemicals are used)	VOCs	Groundwater
	Ink Manufacturing, Processing and Bulk Storage	VOCs	Groundwater
Eastern portion	Metal Treatment, Coating, Plating and Finishing	Inorganics	Soil
(from off-site)	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
	Electronic Motors	VOCs	Soil and Groundwater
	Various Waste Generators	Inorganics, BTEX, PHCs, VOCs	Soil and Groundwater
Southeast corner (from off-site)	Dye Manufacturing, Processing and Bulk Storage	VOCs	Groundwater

LOCATION OF APEC ON PHASE ONE PROPERTY	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	CONTAMINANTS OF POTENTIAL CONCERN	MEDIA POTENTIALLY IMPACTED (Groundwater, Soil, and/or Sediment)
	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
	Vehicles and Associated Parts Manufacturing	Inorganics, PAHs, BTEX, PHCs and VOCs	Soil and Groundwater
Southern portion (from off-site)	Various Waste Generators	Inorganics, BTEX, PHCs, VOCs	Soil and Groundwater
	Textile Manufacturing and Processing	VOCs	Groundwater
	Operation of Dry Cleaning Equipment (where chemicals are used)	VOCs	Groundwater
	Textile Manufacturing and Processing	VOCs	Groundwater
Southwest corner	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
(from off-site)	Ink Manufacturing, Processing and Bulk Storage	VOCs	Groundwater
	Vehicles and Associated Parts Manufacturing	Inorganics, PAHs, BTEX, PHCs and VOCs	Soil and Groundwater
Northwest and southwest portions (from off-site)	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater

LOCATION OF APEC ON PHASE ONE PROPERTY	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	CONTAMINANTS OF POTENTIAL CONCERN	MEDIA POTENTIALLY IMPACTED (Groundwater, Soil, and/or Sediment)
	Operation of Dry Cleaning Equipment (where chemicals are used)	VOCs	Groundwater
Northwest corner	Metal Fabrication	Inorganics, PAHs, BTEX and PHCs	Soil
(from off-site)	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
	Various Waste Generators	Inorganics, BTEX, PHCs, VOCs	Soil and Groundwater
Northern portion	Gasoline and Associated Products Storage in Fixed Tanks	BTEX and PHCs	Soil and Groundwater
(from off-site)	Various Waste Generators	Inorganics, BTEX, PHCs, VOCs	Soil and Groundwater
	Metal Fabrication	Inorganics, PAHs, BTEX and PHCs	Soil

Inorganics:metals and other regulated parametersPHCs:petroleum hydrocarbons

BTEX:	benzene, toluene, ethylbenzene and xylenes
VOCs:	volatile organic compounds (including BTEX)

Based on the findings of this Phase One ESA, APECs have been identified at the Site. Therefore, a Phase Two ESA is required in order to file an RSC for the Phase One Property in accordance with the requirements of O. Reg. 153/04.

A Record of Site Condition cannot be filed for the Phase One property based solely on this Phase One ESA.

2.0 INTRODUCTION

Terrapex Environmental Ltd. (Terrapex) was retained by the Avenyn Capital Partners LP II (the Client) to conduct a Phase One Environmental Site Assessment (ESA) of the properties located at 1591 & 1611 Michael Street, and a portion of 1601 Michael Street, Ottawa, Ontario (referenced as "the Phase One property" or "the Site").

It is understood that the study documented herein is being undertaken for the purposes of supporting a site plan agreement with the City of Ottawa.

2.1 OBJECTIVE

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the "Phase One study area" (refer to Section 4.1.1), in order to satisfy the Phase One ESA general objectives listed in Ontario Regulation (O. Reg.) 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One property;
- to determine the need for a Phase Two ESA; and,
- to provide a basis for carrying out any Phase Two ESA (if required).

2.2 PHASE ONE PROPERTY INFORMATION

The extent of the Phase One property was provided by the Client and includes 2 adjoining registered parcels. Information regarding the location and identification of the Phase One property and those authorizing this study is provided in Table 1, below. The location of the Site and the general Site layout are shown in Figure 1 and Figure 2, respectively.

Address:	1591 [1] & 1611 [2] and a portion of 1601 [3] Michael Street, Ottawa, Ontario

	[3] Part Of Lot 27, Concession 2 Ottawa Front, Gloucester, Part 4 Plan 4r29375 City Of Ottawa
Site Area:	9,171 m² (0.92 ha) in total
Occupants (current):	[1] Vacant
	[2] Vacant
	[3] Acc-Par Systems Ltd.

2.3 PLAN OF SURVEY

A Plan of Survey entitled *Part of Lot 27, Concession 2 (Ottawa Front), Geographic Township of Gloucester, City of Ottawa*, prepared by Annis, O'Sullivan, Vollebekk Ltd., and dated June 28, 2022 is provided in Appendix I.

2.4 ENHANCED INVESTIGATION PROPERTY

An enhanced investigation property is defined in O. Reg. 153/04 as a property that is being used or has been used, in whole or in part, for an industrial use, or for commercial use as a garage, a bulk liquid dispensing facility (including a gasoline outlet), or for the operation of dry-cleaning equipment.

Based on current and historical land-use information described herein, the Site is not an enhanced investigation property.

3.0 SCOPE OF INVESTIGATION

The Phase One ESA was conducted in accordance with the requirements of O. Reg. 153/04 and as outlined in the Terrapex proposal to the Client dated September 21, 2022. The main components of the Phase One ESA scope of work included:

Records Review: A review of available historic and current environmental information pertaining to the Site and surrounding properties within the Phase One study area in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04.

Interviews: An interview questionnaire was provided to Ms. Jessica Penn, the concept plan designer with Nicholas Caragianis Architect Inc. and Roberto Campagna, President of Roca Homes, the owner. No other persons with knowledge of the historical activities at the Site were known at the time of reporting.

Site Reconnaissance: A visual reconnaissance of the Site and neighbouring properties within the Phase One study area for evidence of potential environmental concerns.

Evaluation: The information obtained from the records review, interviews, and Site reconnaissance was reviewed and evaluated by the Qualified Person (QP) for this project (refer to Section 3.1 below) in consideration of the Phase One ESA general objectives and uncertainty associated with the data sources.

Reporting: In accordance with the requirements of Schedule D of O. Reg. 153/04, this report documents the findings, conclusions, and recommendations of the Phase One ESA and includes:

- a table of the current and past uses of the Phase One property;
- a table of identified potentially contaminating activities (PCAs) and a table of associated areas of potential environmental concern (APECs);
- a Phase One Conceptual Site Model (CSM); and,
- conclusions and recommendations made based on the evaluation and interpretation of information obtained for the Phase One ESA.

3.1 QUALIFIED PERSON

The Phase One ESA was supervised by Mr. Craig Beaton, P.Eng., a Senior Project Manager in Terrapex's Ottawa Office, located at 20 Gurdwara Road Ottawa, Ontario. Mr. Beaton is a licensed Professional Engineer in Ontario and is a qualified person for the purposes of creating and submitting RSCs for filing on the Brownfields Environmental Site Registry (ESR).

3.2 LIMITATIONS

It should be noted that although Terrapex has attempted to verify information wherever possible, except where explicitly noted, we have relied upon the accuracy of information collected during the records review and interview components.

Limitations encountered during this study included:

• No one particularly knowledgeable about the environmental history of the Site was available to be interviewed.

Notwithstanding, in the QP's opinion, enough corroborating information was available and this limitation did not have an impact on the interpretation of the overall findings presented in this study.

4.0 RECORDS REVIEW

4.1 GENERAL

4.1.1 PHASE ONE STUDY AREA DETERMINATION

To determine the Phase One study area, Terrapex conducted a preliminary records review to identify any conditions that might warrant an expansion of the Phase One study area beyond the minimum required by O. Reg. 153/04. This review included searches/reviews of the following information:

- aerial photographs and satellite images; and,
- City of Ottawa waste disposal site inventory documents.

The review indicated that the Site is located within a light-industrial area first developed in the early 1960s with no current or historical landfills within 1 km.

It was therefore determined that the Phase One study area did not need to be expanded beyond the minimum required by O. Reg. 153/04 and, as such, the Phase One study area includes all properties, in whole or in part, located within 250 m of the Phase One property.

The Phase One study area is shown in Figure 3.

4.1.2 FIRST DEVELOPED USE DETERMINATION

Information obtained during the records review portion of the work program was used to determine the date of first developed use of the Site, as per the definition in O. Reg. 153/04.

Based on the available information, the Site appears developed for rural residential and/or agricultural uses in the early 1950s.

4.1.3 FIRE INSURANCE PLANS

A search for available fire insurance products (FIPs) was completed by OPTA Information Intelligence. Four 1963 fire insurance plans were available for the vicinity of the Site.

Copies of the FIPs are provided in Appendix II and a summary of pertinent information is provided in Table 2 below.

TABLE 2: SUMMARY OF F	IRE INSURANCE PLANS
-----------------------	---------------------

ADDRESS	PROXIMITY	DESCRIPTION	YEARS	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	LIKELIHOOD TO AFFECT THE SITE
1621 Michael Street	Adjacent south	Keyes Auto Supply	1963		Unlikely
1601 Michael Street	Adjacent west	Rosco Metal Products	1963	Metal Fabrication	Possible
1550 Michael Street	70 m northwest	Therien Rug Cleaners	1963	Operation of Dry Cleaning Equipment (where chemicals are used)	Possible
1575 Triole Street (now Logan Way)	80 m West		1963	Gasoline and Associated Products Storage in Fixed Tanks	Possible
1551 Michael Street	100 m north	Dominion Iron and Welding	1963	Metal Fabrication	Possible
1571 St. Laurent Boulevard	180 m west	Tire service and oil dealer with USTs	1963	Gasoline and Associated Products Storage in Fixed Tanks	Unlikely
1555 - 1557 St. Laurent Boulevard	200 m west	Aluminum Manufacturing	1963	Metal Fabrication	Unlikely
1199 Newmarket Street	280 m east	New Holland Machine Co. with rail siding	1963	Rail Yards, Tracks and Spurs	Unlikely
1038 Belfast Road	120 m northwest	Garage	1963	Gasoline and Associated Products Storage in Fixed Tanks	Unlikely
CNR rail corridor	170 m northeast	Rail line in an east- southeast, west- northwest orientation	1963	Rail Yards, Tracks and Spurs	Unlikely

¹ direction and approximate distance to nearest Site boundary

² As set out in Table 2 in Schedule D of O. Reg. 153/04

4.1.4 CHAIN OF TITLE

On December 6, 2022, Terrapex obtained a title search from Read Abstracts Inc. for 1591 - 1611 Michael St., Ottawa, part lot 27, Concession 2, Ottawa Front, Gloucester which included PINs 04263-0455 and 04263-0456 (the Site) and 04263-0477 (which could not be located presently and was likely an old PIN).

The last registered owner of the property at 1611 Michael Street was 1611 Michael Street Inc. which was deeded on September 1, 2022.

The Site was first registered in 1859 and was transferred between individuals (the Cyr family) until 1959 when the property was owned by Rosco Metal & Roofing Products Ltd. (Westeel-Rosco Ltd. in 1983), was transferred to the Lefebvre's in 1984, then to 1611 Michael Street Inc. in 2022.

A copy of the title search is provided in Appendix III.

4.1.5 **PROPERTY USE RECORDS**

Terrapex requested ERIS search Vernon's Ottawa and Area City Directories at Library and Archives Canada for commercial listings at adjacent properties (1568 to 1621 Michael Street, 1550 to 1660 Liverpool Court, and 1117 to 1145 Newmarket Street) at approximately 5-year date intervals going back in time until no listings were available for the study area.

Michael Street, Liverpool Court, and Newmarket Street were not listed in the directory in 1956. Michael Street was listed within the study area in 1961. Liverpool Court and Newmarket Street were listed in the study area in 1976.

The Site was not listed in any of the city directories reviewed. A summary of pertinent listings on adjacent properties is provided below.

ADDRESS	PROXIMITY	DESCRIPTION	YEARS	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in	LIKELIHOOD TO AFFECT THE SITE
				Schedule D of O. Reg. 153/04)	
1570 Liverpool Court	Adjacent northeast	Automotive repair	1976 - 2007	Gasoline and Associated Products Storage in Fixed Tanks	Possible
1570 Liverpool Court	Adjacent northeast	Steel manufacturing	2001 - 2002	Metal Fabrication	Possible
1570 Liverpool Court	Adjacent northeast	Dry Cleaner	2001 - 2002	Operation of Dry Cleaning Equipment (where chemicals are used)	Possible
1580 Liverpool Court	Adjacent east	Automotive repair	1987 - 2011		Possible
1580 Liverpool Court	Adjacent east	Dry Cleaner	1996 - 1997	Operation of Dry Cleaning Equipment (where chemicals are used)	Possible
1580 Liverpool Court	Adjacent east	Electronic motors	2001 - 2011		Possible
1590 Liverpool Court	Adjacent east	Printers	1981 - 2007	Ink Manufacturing, Processing and Bulk Storage	Possible

¹ direction and approximate distance to nearest Site boundary

² As set out in Table 2 in Schedule D of O. Reg. 153/04

A copy of the ERIS directory search report is provided in Appendix IV.

4.1.6 ENVIRONMENTAL REPORTS

Terrapex conducted a geotechnical investigation at the Site in August 2022. A total of six boreholes (BH101 to BH106) were advanced across the proposed location of a new building.

Boreholes were advanced to auger refusal on apparent bedrock, encountered between 3.7 and 5.8 m below grade.

The stratigraphy encountered in the boreholes consisted of surficial topsoil underlain by up to 1.5 m sand and gravel fill underlain by silty sand till, although 1.5 m of silty clay was encountered beneath the fill in the southeast corner of the Site (BH101).

Groundwater was observed in three of the boreholes upon completion, measured at 1.7 and 1.8 m bg in the south-eastern portion of the Site (BH101 and BH102, respectively) and 5.2 m bg in the northern portion of the Site (BH104).

No other pertinent information was provided in the draft geotechnical investigation report. No other previous reports were provided for review.

4.2 ENVIRONMENTAL SOURCE INFORMATION

4.2.1 ERIS ENVIRONMENTAL DATABASES

Terrapex ordered a report from ERIS for available records associated with properties within the Phase One study area. ERIS searched government and privately-owned databases for environmental source information, including the information and

documents listed in paragraph 7 of subsection 3 (2) in Schedule D of O. Reg. 153/04, excluding the areas of natural significance maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF) and environmental reports submitted to the MECP.

The report from ERIS is provided in Appendix V and presents information for the records found, a diagram which plots the locations of the properties for which records were found (provided sufficient address information was available), as well as an appendix which contains a list and descriptions of the databases ERIS searched.

The ERIS report indicated there were a total of 490 records identified within the Phase One study area. A summary of the pertinent records is provided in Table 4 below.

ADDRESS	PROXIMITY	DESCRIPTION	DATA SOURCE	YEARS	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	LIKELIHOOD TO AFFECT THE SITE

² As set out in Table 2 in Schedule D of O. Reg. 153/04

The ERIS report also included a series of "unplottable" records. Terrapex reviewed those records and although a few were likely located within the Study Area, no new APECs would have been identified due to them.

4.2.2 GOVERNMENT AND REGULATORY DOCUMENTATION

Terrapex contacted representatives of provincial and municipal government agencies to request any environmental information in their files related to the Site. Terrapex also conducted searches of available information provided on government websites. The responses received from the government agencies, as well as the additional information obtained through website searches, are summarized in the following sections. Copies of relevant documents and maps are included in Appendix III.

Ontario Ministry of the Environment, Conservation and Parks: Terrapex submitted a Freedom of Information (FOI) request regarding documented environmental concerns related to the Site on October 11, 2022.

In a written response, the MECP reported that: "after a thorough search of files in the Ottawa District Office, Environmental Investigations and Enforcement Branch (EIEB), and Safe Drinking Water Branch (SDW) no records were located responsive to your request."

A copy of the MECP response is provided in Appendix VI.

Ontario Ministry of Natural Resources and Forestry: Terrapex conducted a search of the information provided on the MNRF Natural Heritage Information Centre (NHIC) website to identify any area of natural or scientific interest (ANSI), environmentally sensitive areas or areas of natural significance within the Phase One study area.

No ANSIs or areas of natural significance were located within the Phase One study area.

Technical Standards & Safety Authority: The Technical Standards and Safety Authority (TSSA) is the Provincial regulatory agency responsible for overseeing fuels storage in Ontario and maintaining a database of all registered fuel storage tanks in Ontario. It should be noted that the TSSA did not register private fuel USTs/ASTs prior to January 1990 or furnace oil tanks prior to May 1, 2002. Additionally, the TSSA does not register waste oil tanks in apartments, office buildings, residences etc.

On October 5, 2022, Terrapex contacted the TSSA to inquire if they had any records relating at the Site, for which they responded that they did not.

City of Ottawa: Review of the geoOttawa website determined that the Site was zoned IL – Light Industrial Zone.

City of Ottawa Historic Land Use Inventory: In 1999, the former Regional Municipality of Ottawa-Carleton commissioned the preparation of a Historic Land Use Inventory (HLUI). The purpose of the HLUI was to collect information on the type and location of all land uses within the boundaries of the former Regional Municipality of Ottawa-Carleton (now the City of Ottawa) which had or have the potential to cause contamination in soil, groundwater or surface water.

The City of Ottawa provided a copy of the HLUI record for the vicinity of the Site. A copy of the HLUI search results is provided in Appendix VI, and current and/or historical tank locations identified in the HLUI report are shown on Figure 4. Other pertinent results of the HLUI report are provided below:

ADDRESS	PROXIMITY	DESCRIPTION	YEARS	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	LIKELIHOOD TO AFFECT THE SITE

Railways and Spurs	180 m east	Abandoned Spur		Rail Yards, Tracks and Spurs	Unlikely

¹ direction and approximate distance to nearest Site boundary

² As set out in Table 2 in Schedule D of O. Reg. 153/04

The Rideau Valley Conservation Authority (RVCA): Terrapex reviewed the online mapping application provided by the RVCA (https://gis.rvca.ca). The Site was located in the Cyrville drain in the Ottawa River East catchment, outside of regulated areas.

No mapped waterbodies were located within the study area.

4.2.3 CLIENT FILE INFORMATION

No other pertinent client-information was provided for review.

4.3 PHYSICAL SETTING SOURCES

4.3.1 AERIAL PHOTOGRAPHS AND SATELLITE IMAGES

Aerial photographs dated 1958, 1965, 1976, 1991, 2002, 2014, 2017, 2021, obtained from the geoOttawa online mapping application, were reviewed to identify changes to topographic features and document the development of the Site and surrounding properties over time.

The relevant features and development of the Site and neighbouring properties are summarized in Table 3 below with copies of the aerial photographs and satellite images included in Appendix VII.

Year	Aerial Photograph and Satellite Image Summary
1958	Within the study area, Belfast Road, Michael Street, and Newmarket Street are visible, as well as the Alexandria rail corridor and St. Laurent Boulevard which bound the study area to the north and west, respectively. Another rail corridor with similar orientation to the Alexandria rail corridor is visible approximately 200 m southwest of the Site.
	The study appears to be in a rural residential setting with much of the south and eastern portions used for agricultural purposes. A garage-type building is visible at 1531 St. Laurent Boulevard. Otherwise, buildings in the study area appear to be residential, including the 1591 Michael Street side of the Site.
	The 1611 Michael Street side of the Site appears to be farmland with hay bails visible.
1965	A shift to industrial development is visible within the study area. St. Laurent Boulevard appears to have been widened and an overpass built at the intersection with the rail corridor in the southwest portion of the study area.
	The building at 1601 Michael Street, to the west of the Site, is visible with stockpiled material or storage buildings in the rear yard and encroaching on the Site. The residential building on the 1951 Michael Street property is no longer visible. Commercial or light industrial buildings are visible adjacent to the south of the Site as well as beyond Michael Street to the southwest, west, and northwest of the Site.
	What appears to be a gravel elevator and silo or similar type industrial building is visible on the large property further to the west.
	The eastern portion of the study area remains relatively unchanged, although one large commercial light industrial building is visible at 1195 Newmarket Street. Agricultural activity appears to have ceased.
1976	Liverpool Court is visible as are the associated commercial light industrial buildings. An addition has been made to the commercial building to the south of the Site. Increased commercial development is visible along Michael Street and Belfast Road in the northern portion of the study area.
	The gravel elevator is still visible and the adjacent properties appear to be being in-filled.
	The Site appears relatively unchanged from 1965.
1991	The Site appears relatively unchanged from 1976.
	The gravel elevator is no longer visible and the northern portion of that property was being used for storage. The extent of the fill appears unchanged from 1976.
	A few commercial industrial buildings are visible, otherwise the study area appears relatively unchanged.
2002	A building/trailer is visible on the Site, as are some storage containers and stockpiled material.
	In-filling at the property to the west appears to have been completed.
	The study area appears, otherwise, relatively unchanged except for the property to the northeast (beyond the train tracks) that appears to have been cleared.
2014	The Site appears relatively unchanged from 2002.
	The rail line in the southwest portion of the study area appears to have been decommissioned.
	The study area appears, otherwise, relatively unchanged from 2002 except for the property to the northeast (beyond the train tracks) that appears to be mostly covered with a large stockpile.
2017	The 1611 Michael Street portion of the Site is occupied with parked vehicles, possibly towing yard storage. The building/trailer is no longer present on Site. The Study Area appears relatively unchanged from 2014.
2021	All buildings, debris, stockpiles and storage containers, etc. have been removed from the Site.
	The eastern portion of the in-filled property to the west has been developed with a warehousing type building with paved parking and trailers.
	The study area appears, otherwise, relatively unchanged from 2014.

TABLE 6: SUMMARY OF AERIAL PHOTOGRAPHS AND SATELLITE IMAGES

4.3.2 TOPOGRAPHY, HYDROLOGY, GEOLOGY

Topographic Mapping: A review of GeoOttawa's topographic contours indicated the Site was at an elevation of approximate 68 m above mean sea level (amsl), and that the study area slopes gently to the northeast toward the Alexandria rail corridor.

A review of the topographic plan of survey, provided in Appendix I, shows the Site is relatively flat at an elevation of approximately 70 m amsl.

A copy of the Topographic map is provided in Appendix VIII.

Geologic Mapping: Based on the 2007 Ontario Geological Survey (OGS) map *Physiography of Southern Ontario*, the Study Area is in a physiographic region known as clay plains.

Based on the OGS map *Surficial Geology of Southern Ontario*, the study area is in an area of massive to well laminated fine-textured glaciomarine deposits of silt and clay with minor sand and gravel.

Based on the OGS map *Paleozoic Geology of Southern Ontario*, the Paleozoic bedrock at the Site was described as shale and limestone of the Carlsbad formation.

Inferred Groundwater Flow Direction: Based on topographic and geologic information provided above, the inferred direction of local shallow groundwater flow at the Site is anticipated to be north-easterly toward the Alexandria rail corridor.

4.3.3 FILL MATERIALS

Based on the information provided in the August 2022 draft geotechnical report, sand and gravel fill can be anticipated between 0.0 and 1.5 m bg.

4.3.4 WATER BODIES AND AREAS OF NATURAL SIGNIFICANCE

Water Bodies: No mapped waterbodies were located within the study area.

Areas of Natural Significance: No ANSIs or areas of natural significance were located within the Phase One study area.

4.3.5 WELL RECORDS

Water Wells: The Water Well Information System (WWIS) was searched on October 6, 2022. 27 water records were available for wells drilled within approximately 300 m of the Site centroid.

Two domestic supply wells were drilled to the west of Michael Street in 1953, potentially indicative of initial residential development. The stratigraphy encountered in the well nearer to the Site (50 m to the west) consisted of surficial black muck overlying clay, overlying rock at 2.7 m bg. Casing was advanced to 2.7 m bg and the open hole was terminated at 7.6 m bg. The static water elevation was 1.2 m bg.

One domestic supply well was drilled at 1188 Newmarket Street (at Stan's Diner, approximately 180 m southeast of the Site) in 2002. The well was cased in shale with an open hole extending from 6 to 53 m bg. The static water elevation was 2.4 m bg, however dropped to a steady depth of 48 m bg after a 1-hour pump test at a rate of 20L/min.

The remainder of the wells were either test holes or monitoring wells completed between 2005 and 2021, drilled to depths between 2.7 and 6.7 m bg, most likely associated with environmental investigations, however in some instances a final water use was not provided.

It should be noted that many wells in the province have been decommissioned or abandoned without appropriate reporting to the MECP; in addition to issues regarding the accuracy of well locations, some MECP database listings pertain to wells that are possibly no longer in use or in existence.

Water well record locations are provided in Figure 3. The WWIS report and supply well records are provided in Appendix IX.

4.4 SITE OPERATING RECORDS

The Site is not considered an enhanced investigation property as per O. Reg. 153/04 and no Site operating records would be available for review.

5.0 INTERVIEWS

An interview questionnaire was provided to Ms. Jessica Penn, the concept plan designer with Nicholas Caragianis Architect Inc. and Roberto Campagna, President of Roca Homes, the owner. No other persons with knowledge of the historical activities at the Site were known at the time of reporting.

The Site was vacant at the time of the interview and Ms. Penn and Mr. Roca were not aware of any potential contaminating activities occurring or having occurred at the Site. However, they did note that there was a right-of-way (ROW) on-Site on 1611 Michael Street (between 1601 and 1621 Michael Street). The ROW is identified as Part 3 of PIN 04263-0455 on the plan of survey.

6.0 SITE RECONNAISSANCE

6.1 GENERAL REQUIREMENTS

The Site reconnaissance was conducted to identify, describe, and document the following items at the Site, in accordance with Schedule D of O. Reg. 153/04:

- the presence and condition of any structures, including buildings, below-ground structures, ASTs, and USTs, as well as potable and non-potable water sources;
- the type and approximate locations of any utilities and services;
- the interiors of any buildings, specifically noting exit and entry points, heating/cooling systems, drains, pits, sumps, unidentified substances, and stains/corrosion on floors;
- the presence and types of sewage works, ground cover, and any current or former railway lines or spurs; and,
- the nature and extent of any areas of stained soil or pavement, stained or stressed vegetation, fill and debris materials, PCAs, and unidentified substances.

The Site reconnaissance also included a cursory inspection of the surrounding properties within the Phase One study area to identify, describe, and document any PCAs, water bodies, and areas of natural significance, as defined in O. Reg. 153/04, if any. Observations of the surrounding properties within the Phase One study area made during the Site reconnaissance were limited to areas visible from the Site or from publicly accessible areas and vantage points.

Details on the Site reconnaissance are provided in Table 4.

Date, Time of Investigation	Weather Conditions	Tour Guide	Occupant/Use of Site During the Investigation	Names and Qualifications of Persons Conducting the Investigation
September 29, 2022 8:30 and 12:00	Clear 6 ºC	None	Vacant	Mr. Jeff Murray, B.A., CET.

TABLE 7 SITE RECONNAISSANCE PARTICULARS

The Site location is shown in Figure 1 and the Site layout is shown in Figure 2. Selected photographs of the Site and Phase One study area are provided in Appendix X.

6.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

6.2.1 SITE DESCRIPTION

General Site Features: The Site was U- shaped, set in an industrial/commercial setting, with a laneway entrance on the 1611 Michael Street side of the Site. Other roads in the Study Area included Belfast Road in the northwest, Liverpool Crescent in the east, and Newmarket Street in the south.

The Site was vacant. The northern portion was overgrown with vegetation and mature trees were observed along the northern property boundary. The south-central portion of the Site was gravel-covered with a small single-storey modular building in the southwest portion.

Apparent fill material and evidence of excavation was observed along the eastern property boundary, where a concrete block retaining wall was present. An area of lower elevation was observed in the north-central portion of the Site, evidenced by softer, wet soils.

Rights-of-Way or Utility Corridors: Overhead hydro was observed along Michael Street. telecommunications utility markings were observed on the ground along Michael Street.

Access and Roadways: The Site was accessed by a driveway along Michael Street.

Debris and Fill Material: Debris piles were observed along the eastern portion of the property. A retaining wall, holding fill material on-Site, was observed towards the eastern extent of the Site.

6.2.2 BUILDING DESCRIPTIONS

One half-storey wood-framed modular building was observed on-Site. The building had a shingle roof and vinyl siding. The interior of the building was not inspected.

6.2.3 SITE INFRASTRUCTURE

Water Supplies: No evidence of potable water services was observed.

Stormwater Management: The Site did not have a stormwater management system.

Electrical Services: There was evidence that the Site was once serviced with above ground hydro.

Drains, Pits or Sumps: No drains, pits, or sumps were observed at the Site. Surface runoff at the Site was directed to the northeast.

Underground Utility and Service Corridors: No major service corridors were observed.

6.2.4 MATERIALS HANDLING AND STORAGE

No material handling or storage containers were observed at the Site.

6.2.5 POTENTIALLY CONTAMINATING ACTIVITY

The presence of a retaining wall at the eastern boundary of the Site and the observed debris piles were indicative of the presence of fill of unknown quality and quantity.

A monitoring well was observed in the northwest portion of the Site (no water well tag was observed on the well). The presence of the monitoring well suggests a previous environmental investigation was undertaken at the Site. However, no environmental report associated with the monitoring well was provided for review.

6.2.6 REGULATED MATERIALS AND DESIGNATED SUBSTANCES

Regulated materials and designated substances were not observed at the Site.

6.2.7 ADJACENT PROPERTIES

A visual reconnaissance of the adjacent properties and properties within the Study Area was conducted from publicly accessible areas to identify the occupants and document the uses and PCAs, if any, that may impact the Site. Uses and occupants of the properties located immediately adjacent to the Site at the time of the inspection are listed below.

North: Aluma Safway; JR Lawn and Snow; C&M Magic Auto; M&T Glass; KMAC Auto; AutoMark Ottawa; Cara Printing; Ryder Truck Rental; Forward Auto.

Northeast: JBL signs; 787 training; vacant commercial; rail corridor with another industrial park beyond.

East: Neptune/Mainstream; Podium performance; Electro Tek; Surgenor Truck Repair; Actus Crossfit; Liverpool Crescent; industrial/commercial beyond.

Southeast: Mermaid pools; Vanfax; commercial/industrial beyond.

South: Parts for Trucks; Corporate Furniture Group; Kitchens by Design; Newmarket St. beyond.

Southwest: DM Metals/LCO; Miller McConnell Signs; Compuzone; Seguin-Morris; Nutrilawn.

West: Michael Street, followed by DZN Centre; Black Widow; Discount Air Supplies; Cozy Express.

Northwest: Steamatic; Vienna Auto Sales; Johnny's Auto Sales; Orleans Auto; Lancaster Auto.

6.2.8 ENHANCED INVESTIGATION PROPERTY

The Site is not considered to be an enhanced investigation property.

6.3 WRITTEN DESCRIPTION OF INVESTIGATION

The Site reconnaissance was conducted to identify, describe, and document specific items at the Site and at surrounding properties within the Phase One study area, in accordance with Schedule D of O. Reg. 153/04. Written descriptions detailing the observations made by Terrapex personnel during the Site reconnaissance are provided above in Section 6.2.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 CURRENT AND PAST USES

A summary description of the current and past uses of the Site from its first developed use is provided in Table 8 below.

YEAR	NAME OF OWNER ON CHAIN OF TILTLE	DESCRIPTION OF PROPERTY USE	PROPERTY USE	SOURCE
1859	Cyr family	Unknown	Likely agricultural / rural residential	Chain of Title
1959	Rosco Metal & Roofing Products Ltd (Westeel-Rosco Ltd. in 1983)	Unknown	Likely commercial storage area	Chain of Title, 1965 and 1976 aerial photography
1984	The Lefebvre's	Unknown	Likely commercial storage area	Chain of Title, 1991, 2002, 2014 aerial photography
2017	same	Vehicle Compound	Commercial	Chain of Title, 2017 aerial photography
2022	1611 Michael Street Inc.	Vacant	Commercial	Chain of Title, 2021 aerial photography

TABLE 8: CURRENT AND PAST USES OF THE PHASE ONE PROPERTY

7.2 POTENTIALLY CONTAMINATING ACTIVITY

A PCA as defined in O. Reg. 153/04 is a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in the Phase One study area. Other activities not specifically listed in Table 2 of Schedule D, may also be considered as PCAs based on the judgement/discretion of the qualified person. The PCAs which are occurring or have previously occurred on properties within the Phase One study area, including the Site are listed below, and are shown in Figure 4.

TABLE 9:			THES WITHIN THE PHASE ONE				
РСА	ADDRESS	PROXIMITY	DESCRIPTION	DATA SOURCE	YEARS	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	LIKELIHOOD TO AFFECT THE SITE
PCA1A	1591 - 1611 Michaels Street	Site	Fill of unknown quality, stockpiled material, containers, etc.	Air Photos	1965	Importation of Fill Material of Unknown Quality	Possible

7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

An APEC, as defined in O. Reg. 153/04, is the area on, in, or under a Phase One property where one or more contaminants are potentially present, as determined through the Phase One ESA, including through (a) identification of past or present uses on, in or under the Phase One property and (b) identification of potentially contaminating activity. APECs are summarized below and shown on Figure 5.

TABLE 10: AREA					-
APEC	LOCATION OF APEC ON PHASE ONE PROPERTY	POTENTIALLY CONTAMINATING ACTIVITY (as set out in Column A of Table 2 in Schedule D of O. Reg. 153/04)	ASSOCIATED PCA IDs	CONTAMINANTS OF POTENTIAL CONCERN	MEDIA POTENTIALLY IMPACTED (Groundwater, Soil, and/or Sediment)
APEC1A	Entire Site	Importation of Fill Material of Unknown Quality	PCA1A	Inorganics, PAHs, BTEX and PHCs	Soil
APEC1B	1611 Michael St	Salvage Yard, including automobile wrecking	PCA1B	Inorganics, PAHs, BTEX and PHCs	Soil and Groundwater
APEC2A	Northeast corner	Metal Treatment, Coating, Plating and Finishing	PCA2A	Inorganics	Soil
APEC2B	Northeast corner	Gasoline and Associated Products Storage in Fixed Tanks	PCA2B	BTEX and PHCs	Soil and Groundwater
APEC2C	Northeast corner		PCA2C	BTEX and PHCs	Soil and Groundwater
APEC2D	Northeast corner	Salvage Yard, including automobile wrecking	PCA2D	Inorganics, PAHs, BTEX and PHCs	Soil and Groundwater
APEC2E	Northeast corner		PCA2E	PAHs	Soil
APEC2F	Northeast corner		PCA2F	BTEX, PHCs, VOCs	Soil and Groundwater
APEC2G	Northeast corner	Vehicles and Associated Parts Manufacturing	PCA2G	BTEX, PHCs, VOCs	Groundwater
APEC2H	Northeast corner	5	PCA2H	BTEX, PHCs, VOCs	Soil and Groundwater
APEC2I	Northeast corner	Operation of Dry Cleaning Equipment (where chemicals are used)	PCA2I	VOCs	Groundwater
APEC2J	Northeast corner	Gasoline and Associated Products Storage in Fixed Tanks	PCA2J	BTEX and PHCs	Soil and Groundwater
APEC2K	Northeast corner	Gasoline and Associated Products Storage in Fixed Tanks	PCA2K	BTEX and PHCs	Soil and Groundwater

PHCs: petroleum hydrocarbons

BTEX:benzene, toluene, ethylbenzene and xylenesVOCs:volatile organic compounds (including BTEX)

8.0 CONCLUSIONS

8.1 WHETHER PHASE TWO ESA REQUIRED BEFORE RSC SUBMITTED

Based on the findings of this Phase One ESA, APECs have been identified at the Site. Therefore, a Phase Two ESA is required in order to file an RSC for the Phase One Property in accordance with the requirements of O. Reg. 153/04.

8.2 RSC BASED ON PHASE ONE ESA ALONE

A Record of Site Condition cannot be filed for the Phase One property based solely on this Phase One ESA.

8.3 SIGNATURES

The environmental assessment described herein was conducted in accordance with the terms of reference for this project, as agreed upon by Avenyn Capital Partners LP II and Terrapex Environmental Ltd.

The Phase One Environmental Site Assessment of the Site located at 1591 and 1611 Michael Street in Ottawa, Ontario, which included the review, evaluation, and interpretation of the information obtained from the records review, interviews, and Site reconnaissance has been conducted in accordance with Ontario Regulation 153/04 (*Records of Site Condition – Part XV.1 of the Environmental Protection Act*), made under the *Environmental Protection Act*, by or under the supervision of a Qualified Person. The qualifications of the assessors are included in Appendix XI.

During this work program, Terrapex Environmental Ltd. has relied in good faith on information provided by others, as noted in this report, and has assumed the information provided to our firm is factual and accurate. Terrapex Environmental Ltd. accepts no responsibility for any deficiency, misstatement, or inaccuracy in this report resulting from the information provided by others. Further, Terrapex Environmental Ltd. shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time the Phase One environmental Site assessment was conducted.

Terrapex Environmental Ltd. has exercised due care, diligence, and judgement in the performance of this Phase One Environmental Site Assessment; however, studies of this nature have inherent limitations. This report is intended to provide only a general assessment of the environmental conditions encountered at the Site. By necessity, the findings, and observations regarding actual or potential contamination of the property are based solely on the extent of observations and information gathered during the Phase One Environmental Site Assessment, and subsequent investigations of differing scope may reveal conflicting results.

This report has been prepared for the use of Avenyn Capital Partners LP II under client privilege. Terrapex Environmental Ltd. accepts no liability for claims arising from the use of this report, or from actions taken or decisions made as a result of this report, by parties other than Avenyn Capital Partners LP II.

Respectfully Submitted, Terrapex Environmental Ltd.

Jason O'Bright, P.Eng. Project Engineer

Regulations and Guidelines

Ontario Regulation 153/04, *Records of Site Condition – Part XV.1 of the Environmental Protection Act Soil, Ground Water and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act*, April 15, 2011

Property Use Information:

Chain of title provided by Read Abstracts, dated December 6, 2022

Environmental Source Information:

Federal government, provincial government, and private source database records available through ERIS Information Inc. (ERIS) for locations within 300 m of the Site, dated October 4, 2022.

Regulatory file information and documentation regarding environmental concerns related to the site, and/or information pertaining to water bodies and areas of natural significance within the Phase One Study Area, available from:

- MECP Freedom of Information and Protection of Privacy Office letter dated October 24, 2022;
- Ontario Ministry of Natural Resources and Forestry (MNRF) Natural Heritage Area on-line mapping;
- Technical Standards & Safety Authority (TSSA) Fuels Safety Division;
- RVCA interactive mapping;
- City of Ottawa's HLUI database search results for objects within 250 m of the Site, provided on November 15, 2022; and,
- City of Ottawa's Official Plan, consolidated on October 14, 2020 and accessed through the GeoOttawa mapping application.

Physical Setting Sources:

Aerial photographs or satellite images from 1958, 1965, 1976, 1991, 2002, 2014, 2017, 2021, obtained from the geoOttawa mapping application.

2010 Ontario Base Map (OBM) provided by ERIS

Ottawa Contours accessed through the GeoOttawa mapping application

The Physiography of Southern Ontario, Third Edition, Ontario Geological Survey Special Volume 2 (1984), Chapman and Putnam, accessed through OGS Earth

Ontario Geological Survey map entitled *Surficial Geology of southern Ontario,* accessed through OGS Earth

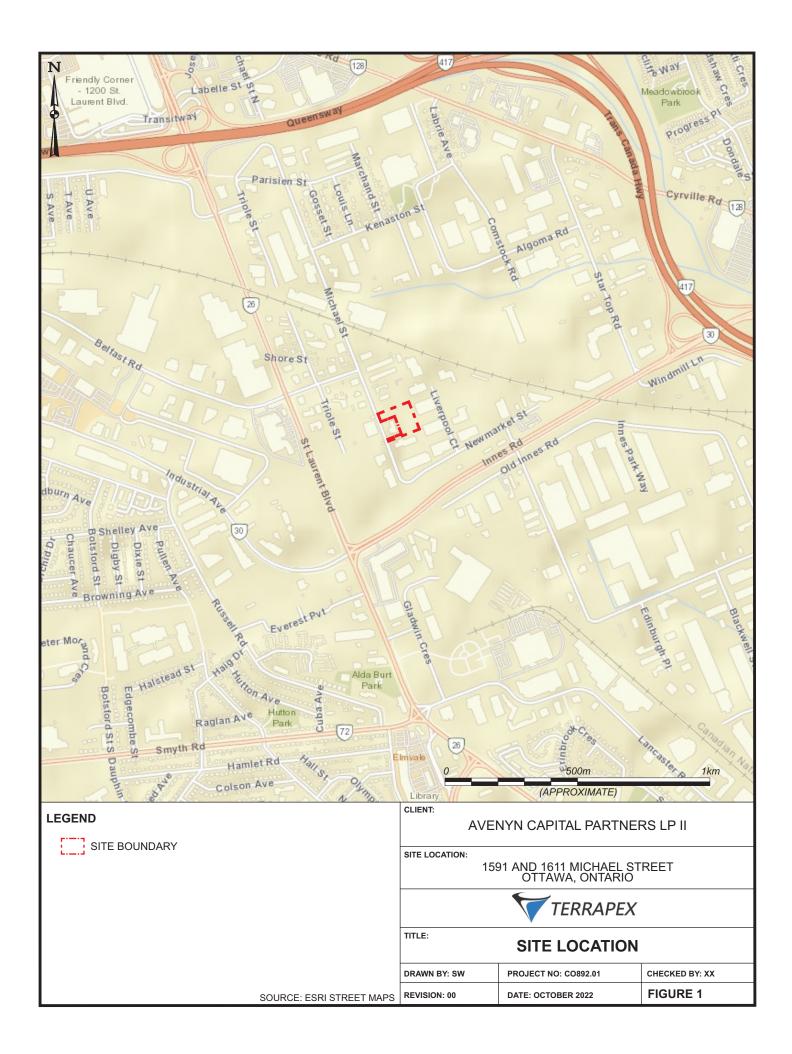

Ontario Geological Survey map entitled *Paleozoic Geology of Southern Ontario*, accessed through OGS Earth

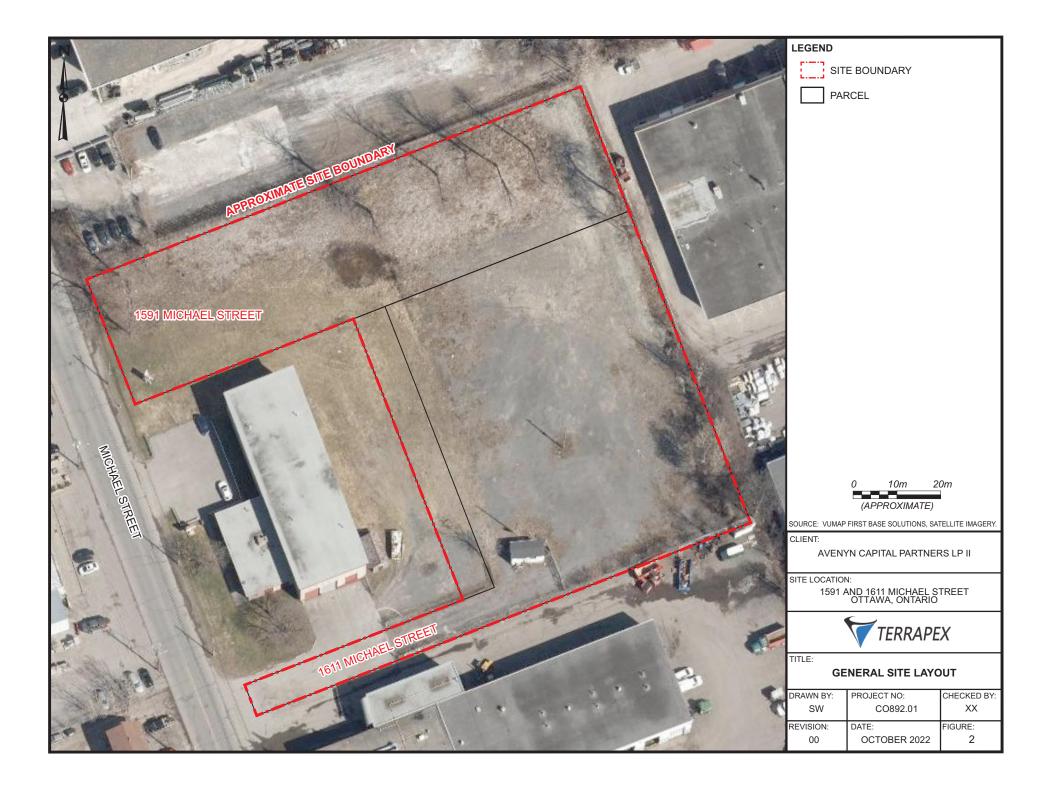

The Ontario Water Well Information System accessed on October 6, 2022.

Interviews

Ms. Jessica Penn, the concept plan designer with Nicholas Caragianis Architect Inc. and Roberto Campagna, President of Roca Homes, the owner, dated December 6, 2022.

APPENDIX I PLAN OF SURVEY

4. Sanitary and storm sewer grades and inverts were derived from City of Ottawa

Plans (Michael Street August 25, 1960) 5. A field location of underground plant by the pertinent utility authority is

mandatory before any work involving breaking ground, probing, excavating etc.

ELEVATION NOTES

1. Elevations shown are geodetic and are referred to the CGVD28 geodetic datum, derived

from vertical control monument No. 001196530385 having an elevation of 77.150 metres. 2. It is the responsibility of the user of this information to verify that the job benchmark

has not been altered or disturbed and that it's relative elevation and description agrees with the information shown on this drawing.

Opta Historical Environmental Services Enviroscan [™] Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. Note: Databases denoted with "*" indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.* Government Publication Date: Sept 2002*

Aggregate Inventory:

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage. Government Publication Date: Up to Nov 2021

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Abandoned Mine Information System:

Anderson's Waste Disposal Sites:

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated. Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type. Government Publication Date: 1999-May 31, 2022

Borehole: BORE A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW. Government Publication Date: Dec 2012 - Apr 2022 Provincial Inventory of Coal Gasification Plants and Coal Tar Sites: COAL

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at

company map; or from submitted a "Report of Work". Government Publication Date: 1886 - Sep 2020

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information. Government Publication Date: Feb 28, 2022

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed

EASR On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database. Government Publication Date: Oct 2011- Aug 31, 2022

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Aug 31, 2022

Environmental Activity and Sector Registry:

Environmental Compliance Approval:

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions: FCON Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty. Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: FCS The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jun 2022

Fisheries & Oceans Fuel Tanks:

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and

aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery. Government Publication Date: May 31, 2018

Fuel Storage Tank: FST List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Fuel Storage Tank - Historic:

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2022

Government Publication Date: 2013-Dec 2019

Greenhouse Gas Emissions from Large Facilities:

TSSA Historic Incidents:

dioxide equivalents (kt CO2 eq).

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here. Government Publication Date: 2006-June 2009*

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon

Indian & Northern Affairs Fuel Tanks: The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both

federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation. Government Publication Date: 1950-Aug 2003*

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Oil Spills and Leaks:

Landfill Inventory Management Ontario:

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations:

377

MINE This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database. Mineral Occurrences:

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2022

National Analysis of Trends in Emergencies System (NATES):

significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released. Government Publication Date: 1974-1994*

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of

Non-Compliance Reports: NCPL The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2020

National Defense & Canadian Forces Fuel Tanks:

DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database. Government Publication Date: Up to May 2001*

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on

National Defense & Canadian Forces Spills:

under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered. Government Publication Date: Mar 1999-Apr 2018

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status. Government Publication Date: 2001-Apr 2007*

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal

National Environmental Emergencies System (NEES):

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. Government Publication Date: 1993-May 2017

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All

geology/stratigraphy table information, plus all water table information is also provide for each well record. Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites: OPCB The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Pipeline Incidents:

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness. Government Publication Date: Feb 28, 2021

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Permit to Take Water: **PTTW** This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water. Government Publication Date: 1994 - Aug 31, 2022

REC Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data. Government Publication Date: 1986-1990, 1992-2019

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Retail Fuel Storage Tanks:

or propane storage tanks. Government Publication Date: 1999-May 31, 2022

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Provincial **Ontario Spills:** SPL List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus

Wastewater Discharger Registration Database: Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the

sampling information is now collected and stored within the Sample Result Data Store (SRDS). Government Publication Date: 1990-Dec 31, 2020

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All

Government Publication Date: 1915-1953*

Anderson's Storage Tanks:

Transport Canada Fuel Storage Tanks:

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type. Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks:

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Aug 31, 2022

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

erisinfo.com | Environmental Risk Information Services

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report. This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

NO RECORD FOUND IN CURRENT DATABASE

Hello Jeff,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

• We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

<u>This is not a confirmation that there are no records in the archives</u>. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

- 1. Click <u>Release of Public Information TSSA</u> TSSA and click "need a copy of a document";
- 2. Select the appropriate application, download it and complete it in full; and
- 3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

- 1. Select new or existing customer (*if you are an existing customer, you will need your account # & postal code to access your account);
- Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
- 3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
 - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
- 4. Complete the primary contact information section;
- 5. Complete the fees section;
- 6. Upload your completed application; and
- 7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at publicinformationservices@tssa.org.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind Regards,

Nicola Carty | Public Information Agent Public Information 345 Carlingview Drive Toronto, Ontario M9W 6N9 Tel: +1 416-734-3221 | E-Mail: <u>ncarty@tssa.org</u> www.tssa.org

Jason O'Bright Terrapex 20 Gurdwara, Unit 1 Ottawa, Ontario K2E 8B3 j.obright@terrapex.com

Dear Jason O'Bright:

RE: MECP FOI A-2022-07343, Your Reference CO892.01 – Decision Letter

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 1591 and 1611 Michael Street, Ottawa.

After a thorough search through the files of the Ottawa District Office, Environmental Investigations and Enforcement Branch (EIEB), and Safe Drinking Water Branch (SDW) no records were located responsive to your request. **This file is now closed.**

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Tolani Abraham at Tolani.Abraham2@ontario.ca.

Yours truly,

Craig Beaton Terrapex Environmental Ltd. 20 Gudwara Road, Ottawa, Ontario *Sent via email* [c.beaton@terrapex.com]

Dear Craig Beaton,

Re: Information Request 1611 Michael Street, Ottawa, Ontario ("Subject Property")

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

• No information was returned on the Subject Property from Departmental circulation.

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <u>https://ero.ontario.ca/</u> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House 161 Elgin Street 4th Floor Ottawa ON K2P 2K1 Tel: (613) 239-1230 Fax: (613) 239-1422

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Steven Payne Student Planner

Description:

A monitoring well was observed in the northwest portion of the property.

APPENDIX XI QUALIFICATIONS OF THE ASSESSORS

Position:	Project Engineer, Smithers, BC	
Qualifications:	B.Eng. Environmental Engineering Professional Engineers of Ontario Engineers and Geoscientists British Columbia	
Experience:	Terrapex Environmental Ltd. DST Consulting Engineers Inc.	2009 to present 2009

Mr. O'Bright has experience in both performing and interpreting data from all stages of environmental assessment and remediation. Mr. O'Bright has conducted Phase I ESAs in accordance with the CSA standards and O.Reg 153/04, including historical research, site inspection and report preparation. Mr. O'Bright has experience in site assessment; small- and large-scale site remediation (both in-situ and ex-situ); environmental monitoring programs for sites impacted with PHCs, VOCs, PAHs and/or heavy metals; soil, groundwater, soil vapour and air sampling; designated substance surveys; and, peer reviews. More recently, Mr. O'Bright is responsible for coordination, monitoring and analytical data interpretation, drafting, and all aspects of report preparation.

Representative projects include the following:

Phase One ESA: Mr. O'Bright was responsible for historical research and review, interviews, site inspection, and report preparation in accordance with the requirements of Ontario Regulation (O. Reg.) 153/04 (with amendments) under the Environmental Protection Act, *Records of Site Condition - Part XV.1 of the Act*, in order to: determine potential sources of environmental impact; identify contaminants and media in areas of potential environmental concern; and, develop a conceptual site model (CSM) for the site.

Phase Two ESA: Based on a Phase One CSM developed for the site, the initial investigation consisted of drilling boreholes and installing monitoring wells, soil sampling, soil vapour surveying, elevation surveying, and groundwater monitoring and sampling (including from the existing monitoring well network). Based on the monitoring data and analytical results from the initial investigation, additional boreholes were drilled (some completed as monitoring wells or soil vapour probes) to fully delineate identified soil and groundwater impacts at the site. Soil vapour and indoor air samples were also collected. Mr. O'Bright completed the work program and reported the findings of the Phase Two in accordance with O.Reg 153/04. The Phase Two CSM was used as the basis for a Risk Assessment at the site, in support of the submission of a Record of Site Condition.

Designated Substance Survey: Mr. O'Bright completed an inspection, sampling various building materials suspected of containing asbestos, lead, mercury and/or other designated substances as listed in the Ontario Occupational Health and Safety Act (R.S.O. 1990,c.E.19). Mr. O'Bright prepared specifications for contractors in terms of the abatement required to address the identified asbestos- and lead-containing materials during the building demolition.

Assessment and Remediation of Hydrocarbon Impacted Soil: Mr. O'Bright conducted an extensive test pit program to delineate the extent of previously identified hydrocarbon impacted soil at the site, which involved soil sampling, soil vapour surveying, and soil classification. Based on a review of analytical results, Mr. O'Bright determined that there were three distinct zones of impact and estimated total volumes of impacted soil beneath the former building and pump islands and within the former tank nest. Mr. O'Bright supervised the excavation of impacted soil and collected confirmatory soil samples at the extent of the excavations. Completed excavations were backfilled with soil deemed suitable for re-use (based on analytical results) and imported fill. Impacted soil was sent off-site to a MOECC-licensed facility.

Assessment and Ongoing Groundwater Remediation: As part of an on-going contaminant management plan where the groundwater plume was delineated but was not decreasing in concentration and impacted soil identified could not be removed due to geotechnical limitations. Mr. O'Bright supervised the injection of a chemical oxidant into identified soil impacts in both the saturated and unsaturated zones. Mr. O'Bright conducted several pre- and post-injection groundwater monitoring and sampling events and interpreted several years of monitoring and analytical data. Mr. O'Bright presented a historical trend analysis showing that the oxidant injections have been effective in reducing the groundwater plume concentration in a report.

Peer Review: Mr. O'Bright reviewed affidavits documenting a heating oil loss and the subsequent remedial effort conducted by others. Mr. O'Bright summarized the environmental reports and tabulated the associated costs and presented the summaries in figures, tables, and charts in support of expert witness testimony.

CRAIG BEATON, PEng, QPESA

Position:	Senior Project Manager, Ottawa Office		
Qualifications:	PEng Biological (Environmental Option) Dipl. Engineering Dipl. Environmental Engineering Technology		
Experience:	Terrapex Environmental Ltd.	2005 to present	
Professional Associations:	Professional Engineers Ontario (PEO) - Membership Number: 100141707		

Mr. Beaton has experience working in all stages of assessment and remediation projects, which includes over a 100 environmental site assessments and delineation of petroleum, volatile organic compound (VOC) polycyclic aromatic hydrocarbons (PAH) and metal contamination. Fieldwork coordination, field supervision, soil and groundwater sampling, groundwater monitoring and other data collection are integral components of Mr. Beaton's contributions. Mr. Beaton also has experience with post-field tasks, such as completion of MECP Record of Site Conditions, analytical data interpretation, groundwater flow interpretation, drafting and report preparation.

SELECTED PROJECT EXPERIENCE

Environmental Site Assessments

Various Clients: Completion/management of over 65 Phase I ESAs at various sites in Ontario and Quebec, including manufacturing facilities, industrial sites, commercial and residential properties and vacant lots. The Phase I ESAs were conducted in accordance with the Canadian Standards Association (CSA) Standard Z768-01 (2001, re-affirmed in 2012) including site inspection, historical research and records review, interviews and report preparation.

PWGSC: Main Project Manager and client contact for the completion of Phase I ESAs, and a surface water and sediment sampling program for 5 lakes within the Rideau Canal system. Responsibilities included, coordination with client and subcontractors, development of sampling plans to confirm surface water and sediment conditions, interpretation of analytical results with respect to Federal CCME guidelines, and assess each site in accordance with Federal Contaminated Sites Action Plan (FCSAP) (2009). In addition to the FCSAP contaminated site ranking, Mr. Beaton assessed sediment contaminant exceedances using the reference approach provided in the Canada-Ontario Agreement (COA) entitled *Decision-Making Framework for Assessment of Great Lakes Contaminated Sediment* (Chapman, 2008).

Commercial Client: Completed the review of multiple Phase I and II ESA for various sites in BC and Alberta as part of a larger due diligence assessment project that was completed to evaluate potential liability prior to the purchase on a large group of properties located across Canada. Responsibilities include the review of available reports; identification of data gaps/limitations of the completed investigations; determination of anticipated risk and an estimated dollar value associated with the potential liability for each site.

MECP: Main Project Manager and reviewer for Phase II and Phase III ESAs for a site in Northern Ontario. Reviewed previous assessments to develop a work plan to delineate observed PHC impacts in soil and groundwater impacts. Responsibilities coordination with client, subcontractors and supplier, interpretation of laboratory analytical data and report composition. Based on the resulted of the delineation program designed a multi-technique remediation plan to remediate petroleum impacts. The remediation plan included soil excavation, backfill amendment and the injection of a biostimulant to address inaccessible and residual impacts.

Petroleum Retailers: Main Project Manager and client contact for Phase II ESAs at future and former petroleum retail outlets. Responsibilities have included management of field work, coordination with drilling and contracting companies, interpretation of field data and laboratory analytical data, review of analytical results figures and groundwater flow diagrams, and report composition.
