## **EXECUTIVE SUMMARY**

Paterson Group was retained by Ambassador Realty Inc. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for 1166 Bank Street, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the site and Study Area and to identify any environmental concerns with the potential to have impacted the subject property.

Based on a review of available historical information, the Phase I Property was first developed sometime in the 1950's with a retail fuel outlet and auto service garage. This operation continued until the 1970's, when the property was then redeveloped with a commercial retail building. The presence and operation of a former on-site retail fuel outlet and auto service garage is considered to represent several APECs with respect to the Phase I Property. These APECs include the locations of the former garage building (APEC #1), the former underground fuel tank nest (APEC #2), the former fuel pump island (APEC #3), as well as the importation of fill material of unknown quality placed beneath the asphaltic concrete parking lot and within the former underground fuel storage tank nest (APEC #4).

The neighbouring lands in the vicinity of the Phase I Property have largely been developed for residential purposes, with the exception of many commercial and occasional institutional properties to the north and south along Bank Street. Historical records identified the presence of a former auto service garage at 1159 Bank Street, with four underground fuel storage tanks, located across the street to the east of the Phase I Property. Due to its close proximity, the presence and operation of a former auto service garage on this property is considered to represent an APEC with respect to the Phase I Property (APEC #6).

Presently, the Phase I Property is occupied by a one-storey commercial retail building, largely surrounded by an asphaltic concrete parking lot. The application of road salt for de-icing purposes during snow and ice conditions on the parking lot is considered to represent an APEC on the Phase I Property (APEC #5).

The neighbouring lands within the vicinity of the Phase I Property consist largely of residential properties, with the exception of many commercial and occasional institutional properties to the north and south along Bank Street. No environmental concerns were identified with respect to the current use of the neighbouring lands.

## **Recommendations**

### **Phase II – Environmental Site Assessment**

Based on the findings of this assessment, it is our opinion that a Phase II – Environmental Site Assessment will be required for the Phase I Property.

### **Designated Substance Survey**

Based on the age of the subject building (c.1970's), asbestos containing building materials, lead-based paints, and other designated substances may be potentially present within the structure. It is recommended that a designated substance survey (DSS) be completed for the subject building prior to any future demolition activities.

## **1.0 INTRODUCTION**

At the request of Ambassador Realty Inc., Paterson Group (Paterson) conducted a Phase I – Environmental Site Assessment (Phase I ESA) for 1166 Bank Street, in the City of Ottawa, Ontario. Henceforth, this property shall be referred to as the Phase I Property. The purpose of this Phase I ESA was to research the past and current use of the Phase I Property and Study Area as well as to identify any environmental concerns with the potential to have impacted the Phase I Property.

Paterson was engaged to conduct this Phase I ESA by Mr. Arthur Loeb, of Ambassador Realty Inc. Mr. Loeb can be contacted via telephone at 613-233-1104.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared in general accordance with Ontario Regulation 153/04, as amended under the Environmental Protection Act, and CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

## 2.0 PROPERTY INFORMATION

Addresses:	1166 Bank Street, Ottawa, Ontario.
Legal Description:	Part of Lot L, Concession C (Rideau Front), Formerly the Township of Nepean, in the City of Ottawa, Ontario.
Location:	The Phase I Property is located on the northwest corner of the intersection of Bank Street and Grove Avenue, in the City of Ottawa, Ontario. Refer to Figure 1 – Key Plan, appended to this report.
Latitude and Longitude:	45° 23' 33" N, 75° 40' 57" W.

### **Site Description:**

Configuration:	Rectangular.
Site Area:	1,020 m <sup>2</sup> (approximate).
Zoning:	TM – Traditional Main Street Zone.
Current Use:	The Phase I Property is currently occupied with a one-storey commercial retail building ( <i>Quickie Convenience Store</i> ).
Services:	The Phase I Property is located within a municipally serviced area.

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the Phase I Property and Study Area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the Phase I Property and Study Area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject property and, if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of Ontario Regulation O.Reg. 153/04 under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01 (reaffirmed 2016);
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I ESA Study Area Determination**

A radius of approximately 250 m was deemed appropriate for defining the study area for this assignment, henceforth referred to as 'The Phase I Study Area'. Properties located outside of the Phase I Study Area are not considered to have had the potential to impact the Phase I Property, based on their significant distances away from the site.

#### **First Developed Use Determination**

Based on a review of available historical information, the Phase I Property was first developed with a retail fuel outlet and auto service garage sometime in the 1950's.

#### **Fire Insurance Plans**

Fire insurance plans (FIPs) dated from 1912 and 1956 were reviewed for the general area of the Phase I Property and the surrounding lands as part of this assessment.

In the 1912 FIPs, the Phase I Property is depicted as being vacant at this time. The surrounding lands are shown to be largely occupied by residential properties, with some commercial and institutional properties present along Bank Street.

In the 1956 FIPs, the Phase I Property is depicted as being occupied by a retail fuel outlet and auto service garage. An underground fuel tank nest, with two fuel tanks, is shown to be present within the southern portion of the property. The presence of a former on-site retail fuel outlet and auto service garage are considered to represent APECs with respect to the Phase I Property. The surrounding lands are largely unchanged since the time of the previous 1912 FIPs, although some additional commercial development is apparent along Bank Street.

The potentially contaminating activities (PCAs) identified within the Phase I Study Area are summarized below in Table 1:

<b>Table 1: Fire Insurance Plans – PCAs within Phase I Study Area</b>			
<b>Address</b>	<b>Potentially Contaminating Activity</b>	<b>Distance / Orientation from Site</b>	<b>Area of Potential Environmental Concern (Y / N)</b>
<b>1912 FIPs</b>			
11 Cameron Avenue	Former Lumber Yard	190 m East	N
<b>1956 FIPs</b>			
1166 Bank Street	Former Retail Fuel Outlet & Auto Service Garage	On-Site	Y
1159 Bank Street	Former Auto Service Garage	20 m Northeast	Y
1103 Bank Street	Former Dry Cleaners	145 m North	N
1080 Bank Street	Former Retail Fuel Outlet	200 m Northwest	N
1242 Bank Street	Former Auto Service Garage	200 m Southwest	N

Based on its close proximity, the former auto service garage identified at 1159 Bank Street is considered to represent an APEC with respect to the Phase I Property.

Based on their separation distances, as well as their down-gradient or cross-gradient orientations with respect to anticipated groundwater flow, none of the other remaining PCAs identified in the FIP review are considered to pose an environmental concern to the Phase I Property.

### **City of Ottawa Street Directories**

City of Ottawa street directories, from 1930 to 2011, were reviewed for the general area of the Phase I Property as part of this assessment.

A review of the directories identified several listings indicating the presence of a former retail fuel outlet and auto service garage on the Phase I Property from the 1950's to the 1970's. These operations are considered to represent APECs with respect to the Phase I Property.

The surrounding lands have historically been listed as a combination of residential, institutional, and commercial properties.

The potentially contaminating activities (PCAs) identified within the Phase I Study Area are summarized below in Table 2:

<b>Table 2 City Directories – PCAs Identified Within Phase I Study Area</b>			
<b>Address</b>	<b>Potentially Contaminating Activity (Years Listed)</b>	<b>Distance / Orientation from Site</b>	<b>Area of Potential Environmental Concern (Y / N)</b>
<b>Bank Street</b>			
1166 Bank Street	Former Retail Fuel Outlet & Auto Service Garage (1955-1975)	On-Site	Y
1159 Bank Street	Former Auto Service Garage (1937-1981)	20 m Northeast	Y
1180 Bank Street	Former Auto Service Garage (1947-2011)	40 m Southeast	N
1149 Bank Street	Former Dry Cleaners (2000-2011)	50 m North	N
1136 Bank Street	Former Dry Cleaners (1947-1961)	75 m Northwest	N
1201 Bank Street	Existing Auto Service Garage (1965-2011)	80 m Southeast	N
1103 Bank Street	Former Dry Cleaners (1961-1970)	145 m North	N
1235 Bank Street	Existing Dry Cleaners (1965-2011)	160 m Southeast	N
1080 Bank Street	Former Retail Fuel Outlet (1955-1992)	200 m Northwest	N
1250 Bank Street	Former Auto Service Garage (1937-1992)	235 m Southeast	N
1069 Bank Street	Former Print Shop (1992-2011)	250 m North	N

Based on its close proximity, the former auto service garage identified at 1159 Bank Street is considered to represent an APEC with respect to the Phase I Property.

Based on their separation distances, as well as their down-gradient or cross-gradient orientations with respect to anticipated groundwater flow, none of the other remaining PCAs identified in the city directory review are considered to pose an environmental concern to the Phase I Property.

## 4.2 Environmental Source Information

### National Pollutant Release Inventory

A search of the National Pollutant Release Inventory (NPRI) database was conducted as part of this assessment. This federally managed database provides various reports and tracking information relating to the release of solid, liquid, or gaseous pollutants from industrial facilities into the natural environment.

A search of this database did not identify any pollutant release records pertaining to the Phase I Property or for any properties situated within the Phase I Study Area.

### **Ontario PCB Waste Storage Site Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Ontario Inventory of PCB Storage Sites, April 1995*" was reviewed as part of this assessment. This document identifies all recorded active and closed PCB waste storage sites situated in the Province of Ontario.

A review of this document did not identify any former PCB waste storage sites situated on the Phase I Property or within the Phase I Study Area.

### **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Waste Disposal Site Inventory in Ontario, 1991*" was reviewed as part of this assessment. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario.

A review of this document did not identify any former waste disposal sites situated on the Phase I Property or within the Phase I Study Area.

### **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Municipal Coal Gasification Plant Site Inventory, 1991*" was reviewed as part of this assessment. This document provides a reference to the locations of former plants with respect to the Phase I Property.

A review of this document did not identify any former coal gasification plants located on the Phase I Property or within the Phase I Study Area.

### **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment. This database contains publicly available information on all Records of Site Condition (RSCs) filed in the Province of Ontario.

A review of the registry did not identify any RSCs in the database as having been filed for the Phase I Property, however, two were identified for properties situated within the Phase I Study Area.

❑ *RSC #68114 – 1080 Bank Street (200 m Northwest of Phase I Property)*

According to the RSC, filed in December 2009 by Pinchin Environmental Ltd., approximately 550 m<sup>3</sup> of petroleum hydrocarbon impacted soil was removed from this property in conjunction with site redevelopment activities. Upon completion of the remedial program, all soil and groundwater test results complied with the applicable MECP standards. Based on its significant separation distance (200 m to the northwest), this property is not considered to pose a potential environmental concern to the subject site.

❑ *RSC #2080 – 88 Bellwood Avenue (190 m East of Phase I Property)*

According to the RSC, filed in July 2005 by Paterson Group Inc., all soil and groundwater test results complied with the applicable MECP standards and no remedial action was required to be undertaken.

### **MECP Incident Reports**

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, or inspections maintained by the MECP for the Phase I Property or any of the neighbouring properties.

The response from the MECP did not identify any pertinent records.

### **MECP Submissions**

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the Phase I Property.

The response from the MECP did not identify any pertinent records.

### **MECP Instruments**

A request was submitted to the MECP Freedom of Information office for information with respect to certificates of approval, permits to take water, certificates of property use, or any other similar MECP issued instruments for the Phase I Property.

The response from the MECP did not identify any pertinent records.

### **MECP Waste Management Records**

A request was submitted to the MECP Freedom of Information office for information with respect to waste management records for the Phase I Property.

The response from the MECP identified a waste generator record for the Phase I Property, pertaining to light fuel wastes generated by the existing convenience store.

### **OMNRF Areas of Natural and Scientific Interest (ANSI)**

A search for areas of natural and scientific interest (ANSI) situated within the Phase I Study Area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website.

A review of the available mapping information did not identify any ANSI sites situated on the Phase I Property or within the Phase I Study Area.

### **Technical Standards and Safety Authority (TSSA)**

The TSSA Fuels Safety Branch in Toronto was contacted electronically on March 18, 2022, as part of this assessment, to inquire about current and former fuel storage tanks, spills, and historical incidents for the Phase I Property as well as the neighbouring properties.

The response from the TSSA identified one record of an active propane cylinder exchange program associated with the Phase I Property. A review of this record did not identify any environmental concerns with respect to the Phase I Property.

The TSSA identified four records associated with a former retail fuel outlet at 1080 Bank Street, as well as four records associated with a former retail fuel outlet at 1201 Bank Street, located approximately 200 m to the northwest and 80 m to the southeast of the Phase I Property, respectively. Based on their separation distances, as well as their down-gradient orientation with respect to anticipated groundwater flow, these properties are not considered to pose an environmental concern to the Phase I Property.

A copy of the correspondence with the TSSA is included in Appendix 2.

### **City of Ottawa Old Landfill Sites**

The document prepared by Golder Associates entitled, “*Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa*”, was reviewed as part of this assessment. This document identifies the details and locations of all recorded active and closed landfill sites situated in the City of Ottawa.

A review of this document did not identify any active or closed landfill sites situated on the Phase I Property or within the Phase I Study Area.

### **City of Ottawa Historical Land Use Inventory (HLUI) Database**

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City’s Historical Land Use Inventory (HLUI) database for any environmental records pertaining to the Phase I Property as well as any properties situated within the Phase I Study Area.

The response from the City identified records pertaining to a former automotive service garage and retail fuel outlet with underground fuel storage tanks located on the Phase I Property. Other records were identified pertaining to a former automotive service garage at 1159 Bank Street, located approximately 20 m to the northeast of the Phase I Property. These aforementioned activities are considered to represent APECs on the Phase I Property.

The remaining off-site records identified in the HLUI database are either of no environmental concern or are listed for properties which are situated at a significant distance away, or are situated in a down-gradient or cross-gradient orientation, with respect to anticipated groundwater flow, and thus are not considered to pose an environmental concern to the Phase I Property.

A copy of the submission request has been included in Appendix 2.

### **City of Ottawa Former Industrial Sites**

The document prepared by Intera Technologies Limited entitled, “*Mapping and Assessment of Former Industrial Sites, City of Ottawa*”, was reviewed as part of this assessment. This document identifies the details and locations of all former industrial sites situated in the City of Ottawa.

A review of this document did not identify any former industrial sites situated on the Phase I Property or within the Phase I Study Area.

## **ERIS Database Report**

A database report, prepared by ERIS (Environmental Risk Information Services Ltd.), dated March 22, 2022, was acquired and reviewed as part of this assessment. This report provides a compilation of various provincial and federal environmental related records pertaining to any properties situated within the Phase I Study Area.

The complete ERIS report has been included in Appendix 2.

### **❑ *On-Site Records:***

The ERIS report identified one Ontario Regulation 347 Waste Generator Summary record associated with the Phase I Property. This record describes the generation of light fuel related waste products associated with the existing commercial retail building. Due to the low quantities generated, these waste products are not considered to pose an environmental concern to the Phase I Property.

### **❑ *Off-Site Records:***

The ERIS report identified 152 records associated with the properties situated within the Phase I Study Area.

The majority of these records are associated with various commercial properties along Bank Street, to the north and south of the Phase I Property. Some of these records appear to be linked to the presence of a former retail fuel outlet at 1080 Bank Street, an existing auto service garage at 1201 Bank Street, and an existing dry cleaners at 1235 Bank Street. Based on their separation distances, as well as their down-gradient or cross-gradient orientations with respect to anticipated groundwater flow, the current or historical uses of these properties are not considered to pose an environmental concern to the Phase I Property.

The remaining off-site records identified in the ERIS report are either of no environmental concern or are listed for properties which are situated at a significant distance away, or are situated in a down-gradient or cross-gradient orientation, with respect to anticipated groundwater flow, and thus are not considered to pose an environmental concern to the Phase I Property.

## **Previous Engineering Reports**

The following report was reviewed prior to completing this assessment:

- ❑ *“Phase II Environmental Site Assessment, 1166 Bank Street, Ottawa, Ontario”, prepared by Golder Associates Ltd., dated May 2021.*

The objective of this Phase II ESA was to investigate for potential contamination issues associated with the historical presence of a former on-site retail fuel outlet, as well as the presence of fill material of unknown quality situated beneath the on-site asphaltic concrete parking lot. It should be noted that a Phase I ESA was not conducted prior to this assessment.

The subsurface investigation for this assessment was conducted on March 29 and March 30, 2021. At that time, four boreholes (MW21-01 to MW21-04) were advanced throughout the property and terminated within the overburden at depths ranging from approximately 6.6 to 7.6 m below ground surface. Upon completion, all boreholes were equipped with monitoring wells to allow for the collection of groundwater samples.

In general, the soil profile encountered at the borehole locations consisted of a thin layer of asphaltic concrete and granular fill, underlain by layers of native sands and silts, with some silty clay identified at deeper elevations in MW21-01.

Six representative soil samples were submitted for laboratory analysis of petroleum hydrocarbon fractions 1 through 4 (PHCs F<sub>1</sub>-F<sub>4</sub>), volatile organic compounds (VOCs), and metals. Based on the analytical test results, all detected parameter concentrations were in compliance with the selected MECP Table 3 Commercial/Industrial Soil Standards, with the exception of the concentration of PHCs F<sub>1</sub> in Sample MW21-04-07 and its duplicate sample. It should be noted that these samples were obtained at a depth of approximately 3.6 to 4.3 m below ground surface from the borehole placed within the location of the former underground fuel storage tank nest in the southern portion of the property. It should be noted that these parameter concentrations also exceeded the MECP Table 3 Residential Soil Standards.

Four groundwater samples were obtained from the monitoring wells installed in each borehole and submitted for laboratory analysis of PHCs (F<sub>1</sub>-F<sub>4</sub>) and VOCs. Based on the analytical test results, all detected parameter concentrations were in compliance with the selected MECP Table 3 Commercial/Industrial Non-Potable Groundwater Standards, with some exceptions. The concentration of chloroform in Sample MW21-02, as well as the concentrations of chloroform, 1,2-Dichloroethane, and benzene in Sample MW21-04 were in excess of the MECP Table 3 Standards. It should be noted that these parameter concentrations also exceeded the MECP Table 3 Residential Non-Potable Groundwater Standards.

The elevated concentrations of chloroform were suspected to be the result of the use of municipal water during the drilling process, and thus was not considered to present a contaminant issue to the property. The benzene exceedance was

suspected to be the result of the historical presence of the former on-site retail fuel outlet. It should be noted that this groundwater exceedance was identified within the borehole placed in the location of the former underground fuel storage tank nest in the southern portion of the site.

The presence of 1-2-Dichloroethane, which is not typical of fuel related impacts, was suspected to be related to the historical use of solvents in a former auto service garage which was present on the property.

Based on the findings of their assessment, Golder concluded that the soil and groundwater in the southern portion of the property has been impacted due to the presence of a former underground fuel storage tank nest associated with the former on-site retail fuel outlet.

Golder recommended that a Phase I ESA be carried out for the property to determine all potential sources of contamination which may be impacting the site.

### **4.3 Physical Setting Sources**

#### **Aerial Photographs**

Historical aerial photographs of the Phase I Study Area were obtained from the National Air Photo Library and reviewed in approximate ten year intervals, beginning with the earliest available photograph.

Based on a review of these photographs, the following observations have been made:

- |      |   |
|------|---|
| 1933 | The Phase I Property appears to be vacant at this time, while the surrounding lands appear to be used for residential and commercial purposes. Bank Street can be seen to the east of the Phase I Property in this photograph.  |
| 1945 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph.  |
| 1958 | The Phase I Property appears to be occupied by a retail fuel outlet at this time. A fuel pump island can be seen within the eastern portion of the property, while a garage building can be seen occupying the western portion of the property. Additional commercial development can be seen along Bank Street to the north and south of the Phase I Property. |

- 1965 No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph.
- 1976 The aforementioned on-site retail fuel outlet appears to have been decommissioned and the property redeveloped with the existing commercial retail building. No significant changes are apparent with respect to surrounding lands since the time of the previous photograph.
- 1991 No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph.
- 2002 No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph.
- 2011 No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph.
- 2019 No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph. The Phase I Property and the surrounding lands appear in this photograph as they exist today.

Copies of the aerial photographs selected for review are included in Appendix 1.

### **Water Bodies**

No water bodies are present on the Phase I Property.

The nearest named water body with respect to the Phase I Property is the Rideau River, located approximately 360 m to the south.

### **Geological Maps**

Geological mapping information for the Phase I Property was obtained from The Geological Survey of Canada – Urban Geology of the National Capital Area and reviewed as part of this assessment.

Based on the available mapping information, the bedrock beneath the Phase I Property generally consists of shale of the Billings Formation, while the surficial geology consists largely of offshore marine sediments (erosional terraces) with an overburden ranging in thickness from approximately 5 m to 10 m.

### **Topographic Maps**

A topographic map of the Phase I Property was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as part of this assessment.

The topographic map indicates that the general elevation of the Phase I Property is approximately 65 m above sea level, while the regional topography within the greater area is depicted as sloping downwards to the south, in the general direction of the Rideau River.

An illustration of the referenced topographic map is presented on ‘*Figure 2 – Topographic Map*’, appended to this report.

### **Physiographic Maps**

A physiographic map was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as a part of this assessment.

According to the publication and available mapping information, the Phase I Property is situated within the St. Lawrence Lowlands. According to the description provided: “...*the lowlands are plain-like areas that were affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.*” The Phase I Property is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

### **MECP Water Well Records**

A search of the MECPs website for all drilled well records within a 250 m radius of the Phase I Property was conducted as part of this assessment. The search identified eight well records within the Phase I Study Area. These records pertain to wells installed between 2008 and 2016 and used for groundwater observation purposes. Based on the availability of municipal services, no drinking water wells are expected to be in use within the Phase I Study Area.

According to the well records, the overburden stratigraphy in the vicinity of the Phase I Property generally consists of coarse brown sand with trace silt, over top of glacial till with occasional gravel and cobbles. Bedrock was not encountered in any of the borehole locations during the installation of the aforementioned groundwater monitoring wells.

A select number of the aforementioned well records have been included in Appendix 2.

## **5.0 PERSONAL INTERVIEWS**

Ms. Marie Chenier, a representative from Ambassador Realty Inc., was available at the time of the site inspection to respond to questioning about the environmental history of the Phase I Property.

According to Ms. Chenier, the property was formerly occupied by a retail fuel outlet until redeveloped sometime in the 1970's with the existing commercial retail building. Ms. Chenier was aware of an environmental drilling program carried out for the property in May 2021, but was unaware of the findings of the investigation.

Ms. Chenier was unaware of any environmental concerns pertaining to the current use of the Phase I Property.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

A site inspection was conducted for the Phase I Property on March 22, 2022, between 10:00 AM and 11:00 AM. Weather conditions were sunny, with a temperature of approximately 4°C. Mr. Nick Sullivan, from the Environmental Department of Paterson Group, conducted the inspection.

In addition to the Phase I Property, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site inspection.

### **6.2 Site Inspection Observations**

#### **Site Description**

The Phase I Property is currently occupied with a one-storey commercial retail building, located in the western portion of the property. The remainder of the site is largely paved with an asphaltic concrete parking lot, though a small, landscaped area is present within the southeastern corner of the property.

The site topography appears to slope down towards the south, in the general direction of the Rideau River, which is consistent with the greater regional topography. The Phase I Property is considered to be at grade with respect to the adjacent streets and the neighbouring properties.

Water drainage on the Phase I Property occurs primarily via surface runoff towards catch basins located in the exterior parking lot or the adjacent streets. No ponded water, stressed vegetation, surficial staining, or any other indications of potential sub-surface contamination were observed on the Phase I Property at time of the site inspection.

A depiction of the Phase I Property is illustrated on Drawing PE5590-1 – Site Plan, in the Figures section of this report.

#### **Buildings and Structures**

At the time of the site inspection, the Phase I Property was occupied with a one-storey commercial retail building. Built sometime in the 1970's, the subject building is constructed with a poured concrete, slab-on-grade style foundation, and is finished on the exterior with brick siding, in addition to a flat rolled membrane style roof. The subject building is currently heated and cooled via natural gas-fired equipment, located on the roof.

## **Potential Environmental Concerns**

### **Fuels and Chemical Storage**

At the time of the site inspection, no chemical storage areas, above ground storage tanks (ASTs), or evidence indicating the presence of any underground storage tanks (USTs) were observed on the Phase I Property.

### **Hazardous Materials and Unidentified Substances**

At the time of the site inspection, no hazardous materials, unidentified substances, spills, surficial staining, abnormal odours, stressed vegetation, or any other indications of potential sub-surface contamination were observed on the Phase I Property.

### **Polychlorinated Biphenyls (PCBs) and Transformer Oil**

At the time of the site inspection, no electrical transformers or any other potential sources of PCBs or transformer oil were identified on the Phase I Property.

### **Waste Management**

At the time of the site inspection, solid, non-hazardous domestic waste and recyclable products were observed to be stored in metals bins on the north side of the subject building. No environmental concerns were noted with respect to waste management practices on the Phase I Property.

## **Interior Assessment**

A general description of the interior of the subject building is as follows:

- The floors consist of vinyl floor tiles and poured concrete;
- The walls consist of drywall;
- The ceilings consist of suspended ceiling tiles and steel decking;
- Lighting throughout the building is provided by LED, incandescent, and fluorescent light fixtures.

## **Potentially Hazardous Building Products**

### **Asbestos-Containing Materials (ACMs)**

Based on the age of the subject building, asbestos containing building materials may be potentially present within the structure. Potential ACMs observed inside the subject building include the drywall joint compound, suspended ceiling tiles, and vinyl floor tiles.

These potential ACMs were observed to be in good condition at the time of the site inspection and do not represent an immediate concern to the building's occupants.

### **Lead-Based Paints**

Based on the age of the subject building, lead-based paints may be present inside the structure, on any original or older painted surfaces. Painted surfaces were generally observed to be in good condition at the time of the site inspection and do not represent an immediate concern to the occupants.

### **Polychlorinated Biphenyls (PCBs) and Transformer Oil**

At the time of the site inspection, no potential sources of PCBs were identified inside the subject building.

### **Urea Formaldehyde Foam Insulation (UFFI)**

At the time of the site inspection, UFFI was not observed inside the subject building, however, wall cavities were not exposed to allow for the inspection of insulation type.

## **Other Potential Environmental Concerns**

### **Interior Fuel and Chemical Storage**

At the time of the site inspection, no aboveground fuel storage tanks or signs of underground fuel storage tanks were observed within the subject building.

Chemical products identified in the subject building were observed to be predominantly limited to domestically available cleaning products, stored properly in their original containers.

### **Ozone Depleting Substances (ODSs)**

Potential sources of ODSs observed on-site include refrigerators, fire extinguishers, and the rooftop HVAC unit. These appliances appeared to be in good condition at the time of the site inspection and should be regularly serviced by a licensed contractor.

### **Wastewater Discharges**

No sump pits or floor drains were observed in the subject building at the time of the site inspection.

Wastewater from the subject building (wash water and sewage) is discharged into the City of Ottawa sanitary sewer system, whereas roof drainage is discharged via surface run-off towards catch basins located in the exterior parking lot or on the adjacent streets, which drain into the City of Ottawa storm water sewer system.

### **Neighbouring Properties**

At the time of the site inspection, a survey of the neighbouring properties was conducted from publicly accessible roadways.

Land use adjacent to the Phase I Property was observed as follows:

*North:* Commercial retail buildings, followed by Glen Avenue;

*South:* Grove Avenue, followed by a low-rise mixed-use building;

*East:* Bank Street, followed by a commercial retail building;

*West:* Residential dwellings.

No environmental concerns were identified with respect to the current uses of the neighbouring properties.

The neighbouring land use within the Phase I Study Area is depicted on Drawing PE5590-2 – Surrounding Land Use Plan, in the Figures section of this report.

## **6.3 Enhanced Investigation Area**

Due to the historical presence of a former on-site retail fuel outlet and auto service garage, the Phase I Property is considered to be an Enhanced Investigation Property, as defined under O. Reg. 153/04. As such, the following items were also investigated as part of this assessment.

## **On-Site Operations**

According to the historical research, the Phase I Property was formerly occupied by a retail fuel outlet and auto service garage from the 1950's to the 1970's. Based on the size of the auto service garage building, as observed in historical aerial photographs, the garage is suspected to have contained two maintenance bays used for basic automotive repair services such as engine, transmission, suspension, undercarriage, and brake repairs; oil and tire changes; as well as engine and transmission fluid flushes. These operations were ceased sometime in the 1970's, when the property was then redeveloped with a commercial retail building.

At the time of the site inspection, the Phase I Property is currently used solely for commercial retail purposes, and no automotive repair or refuelling operations occur on-site.

## **Hazardous Materials Used or Stored**

Based on a review of historical records, no information could be identified with regards to the use or storage of any hazardous materials on the Phase I Property, though it is suspected that various lubricants, degreasers, fuels, and oil products were stored within the former on-site auto service garage. An underground fuel storage tank nest, containing two fuel tanks, was known to be present within the southern portion of the Phase I Property prior to its removal during site redevelopment activities sometime in the 1970's.

At the time of the site inspection, no hazardous materials were observed to be used or stored on the Phase I Property.

## **Manufactured Products**

Based on a review of historical records, no products are suspected to have ever been manufactured on the Phase I Property.

At the time of the site inspection, no products are currently being manufactured on the Phase I Property.

### **By-Products and Waste**

Based on a review of historical records, no information could be identified with regards to the generation of by-products or waste products on the Phase I Property, though it is suspected that a waste oil storage tank would have been present on-site as a result of the operations performed in the former auto service garage.

At the time of the site inspection, solid, non-hazardous domestic waste and recyclable products were observed to be stored in metals bins on the north side of the subject building. No fuel or chemical related wastes or by-products, produced as a result of any auto servicing or refueling, are currently being generated on the Phase I Property.

### **Raw Materials Handling and Storage**

Based on a review of historical records, no raw materials are suspected to have ever been handled or stored on the Phase I Property.

At the time of the site inspection, no raw materials are currently being handled or stored on the Phase I Property.

### **Drums, Totes, and Bins**

Based on a review of historical records, no information could be identified with regards to any former drums, totes, or bins on the Phase I Property, though it is suspected that drums of engine oil would have been present on-site as a result of the operations performed in the former auto service garage.

At the time of the site inspection, no drums, totes, or bins containing any fuel or chemical products were identified on the Phase I Property.

### **Oil/Water Separators**

Based on a review of historical records, no information could be identified with regards to any oil/water separators located within the former auto service garage.

At the time of the site inspection, no oil/water separators were identified on the Phase I Property.

## **Spill Events**

Based on a review of historical records, no evidence of any spill events were identified on the Phase I Property.

At the time of the site inspection, no evidence of any spills were identified on the Phase I Property.

## **Vehicle and Equipment Maintenance Areas**

Based on a review of historical records, the former on-site auto service garage occupied the northwestern corner of the Phase I Property. Based on the size of the auto service garage building, as observed in historical aerial photographs, the garage is suspected to have contained two maintenance bays used for basic automotive repair services such as engine, transmission, suspension, undercarriage, and brake repairs; oil and tire changes; as well as engine and transmission fluid flushes. These operations were ceased sometime in the 1970's, when the property was then redeveloped with a commercial retail building.

At the time of the site inspection, the Phase I Property is currently used solely for commercial retail purposes, and no automotive repair or refuelling operations occur on-site.

## **Liquid Discharge Points**

Based on a review of historical records, no information could be identified with regards to any former liquid discharge points on the Phase I Property

At the time of the site inspection, several catch basins were observed along the neighbouring roads adjacent to the Phase I Property.

## **Hydraulic Lift Equipment**

Based on a review of historical records, no information could be identified with regards to any former hydraulic lift equipment on the Phase I Property

At the time of the site inspection, no in-ground hoists or any other hydraulic lift equipment was observed on the Phase I Property.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Land Use History

Based on a review of available historical information, the Phase I Property was first developed with a retail fuel outlet and auto service garage sometime in the 1950's.

#### Potentially Contaminating Activities (PCAs)

Based on the findings of this Phase I ESA, six potentially contaminating activities (PCAs), resulting in areas of potential environmental concern (APECs), were identified on the Phase I Property. These APECs include:

- A former auto service garage, located in the northwestern portion of the Phase I Property.
- A former underground fuel storage tank nest, located in the southern portion of the Phase I Property.
- A former fuel pump island, located in the eastern portion of the Phase I Property.
- Fill material of unknown quality, located beneath the asphaltic concrete parking lot throughout the northern, eastern, and southern portions of the Phase I Property.
- The application of road salt during snow and/or ice conditions, located beneath the asphaltic concrete parking lot throughout the northern, eastern, and southern portions of the Phase I Property.
- A former auto service garage and retail fuel outlet, located approximately 20 m to the east of the Phase I Property (1159 Bank Street).

Other off-site PCAs were identified within the Phase I Study Area but were deemed not to be of any environmental concern to the Phase I Property based on their separation distances as well as their inferred down-gradient or cross-gradient orientation with respect to anticipated groundwater flow.

#### Areas of Potential Environmental Concern (APECs)

The areas of potential environmental concern identified in this Phase I ESA are summarized below in Table 3:

<b>Table 3 Areas of Potential Environmental Concern</b>					
<b>Area of Potential Environmental Concern</b>	<b>Location of APEC on Phase I Property</b>	<b>Potentially Contaminating Activity (Table 2 – O. Reg. 153/04)</b>	<b>Location of PCA (On-Site or Off-Site)</b>	<b>Contaminants of Potential Concern</b>	<b>Media Potentially Impacted (Groundwater, Soil, and/or Sediment)</b>
<b>APEC #1</b> Former Auto Service Garage	Northwestern Portion of Phase I Property	<i>“Item 52: Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems”</i>	On-Site	VOCs PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #2</b> Former Underground Fuel Storage Tank Nest	Southern Portion of Phase I Property	<i>“Item 28: Gasoline and Associated Products Storage in Fixed Tanks”</i>	On-Site	VOCs PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #3</b> Former Fuel Pump Island	Eastern Portion of Phase I Property	<i>“Item 28: Gasoline and Associated Products Storage in Fixed Tanks”</i>	On-Site	VOCs PHCs (F <sub>1</sub> -F <sub>4</sub> )	Soil and/or Groundwater
<b>APEC #4</b> Fill Material of Unknown Quality	Entirety of Phase I Property	<i>“Item 30: Importation of Fill Material of Unknown Quality”</i>	On-Site	PAHs Metals	Soil
<b>APEC #5</b> Application of Road Salt During Snow/Ice Conditions	Northern, Eastern, and Southern Portions of Phase I Property	<i>“No Item Number: Application of Road Salt During Snow and Ice Conditions”</i>	On-Site	EC SAR	Soil
<b>APEC #6</b> Former Auto Service Garage	Eastern Portion of Phase I Property	<i>“Item 28: Gasoline and Associated Products Storage in Fixed Tanks”</i>  <i>“Item 52: Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems”</i>	Off-Site (20 m East)	VOCs PHCs (F <sub>1</sub> -F <sub>4</sub> )	Groundwater

**Contaminants of Potential Concern (CPCs)**

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- Volatile Organic Compounds (VOCs);
- Petroleum Hydrocarbons, fractions 1 – 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);

- Polycyclic Aromatic Hydrocarbons (PAHs);
- Metals (including Mercury and Hexavalent Chromium);
- Electrical Conductivity (EC);
- Sodium Adsorption Ratio (SAR).

These CPCs have the potential to be present in the soil matrix and/or the groundwater situated beneath the Phase I Property.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

Based on the available mapping information, the bedrock beneath the Phase I Property generally consists of shale of the Billings Formation, while the surficial geology consists largely of offshore marine sediments (erosional terraces) with an overburden ranging in thickness from approximately 5 m to 10 m.

Groundwater is anticipated to be encountered within the overburden and flow in a southerly direction towards the Ottawa River.

### **Water Bodies and Areas of Natural and Scientific Interest**

No water bodies or areas of natural and scientific interest were identified within the Phase I Study Area.

The nearest named water body with respect to the Phase I Property is the Rideau River, located approximately 360 m to the south.

### **Drinking Water Wells**

Based on the availability of municipal services, no drinking water wells are expected to be present within the Phase I Study Area.

### **Existing Buildings and Structures**

The Phase I Property is currently occupied with a one-storey commercial retail building.

### **Current and Future Property Use**

The Phase I Property is currently being used for commercial purposes.

It is our understanding that the Phase I Property is to be redeveloped with a six-storey residential apartment building.

Due to the change to a more sensitive land use (commercial to residential), this will require that a record of site condition (RSC) be filed with the MECP.

### **Neighbouring Land Use**

The surrounding lands within the Phase I Study Area consist largely of residential properties, with the exception of commercial properties and some institutional land present along Bank Street.

Current land use is depicted on Drawing PE5590-2 – Surrounding Land Use Plan, in the Figures section of this report.

### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

As per Section 7.1 of the Phase I ESA report, six potentially contaminating activities (PCAs), resulting in areas of potential environmental concern (APECs), were identified on the Phase I Property. These APECs include:

- A former auto service garage, located in the northwestern portion of the Phase I Property.
- A former underground fuel storage tank nest, located in the southern portion of the Phase I Property.
- A former fuel pump island, located in the eastern portion of the Phase I Property.
- Fill material of unknown quality, located beneath the asphaltic concrete parking lot throughout the northern, eastern, and southern portions of the Phase I Property.
- The application of road salt during snow and/or ice conditions, located beneath the asphaltic concrete parking lot throughout the northern, eastern, and southern portions of the Phase I Property.
- A former auto service garage and retail fuel outlet, located approximately 20 m to the east of the Phase I Property (1159 Bank Street).

Other off-site PCAs were identified within the Phase I Study Area but were deemed not to be of any environmental concern to the Phase I Property based on their separation distances as well as their inferred down-gradient or cross-gradient orientation with respect to anticipated groundwater flow.

### **Contaminants of Potential Concern**

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- Volatile Organic Compounds (VOCs);
- Petroleum Hydrocarbons, fractions 1 – 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- Polycyclic Aromatic Hydrocarbons (PAHs);
- Metals (including Mercury and Hexavalent Chromium);
- Electrical Conductivity (EC);
- Sodium Adsorption Ratio (SAR).

These CPCs have the potential to be present in the soil matrix and/or the groundwater situated beneath the Phase I Property.

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that there are PCAs and APECs associated with the Phase I Property.

The presence of any PCAs was confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **8.0 CONCLUSIONS**

### **Assessment**

Paterson Group was retained by Ambassador Realty Inc. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for 1166 Bank Street, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the site and Study Area and to identify any environmental concerns with the potential to have impacted the subject property.

Based on a review of available historical information, the Phase I Property was first developed sometime in the 1950's with a retail fuel outlet and auto service garage. This operation continued until the 1970's, when the property was then redeveloped with a commercial retail building. The presence and operation of a former on-site retail fuel outlet and auto service garage is considered to represent several APECs with respect to the Phase I Property. These APECs include the locations of the former garage building (APEC #1), the former underground fuel tank nest (APEC #2), the former fuel pump island (APEC #3), as well as the importation of fill material of unknown quality placed beneath the asphaltic concrete parking lot and within the former underground fuel storage tank nest (APEC #4).

The neighbouring lands in the vicinity of the Phase I Property have largely been developed for residential purposes, with the exception of many commercial and occasional institutional properties to the north and south along Bank Street. Historical records identified the presence of a former auto service garage at 1159 Bank Street, with four underground fuel storage tanks, located across the street to the east of the Phase I Property. Due to its close proximity, the presence and operation of a former auto service garage on this property is considered to represent an APEC with respect to the Phase I Property (APEC #6).

Presently, the Phase I Property is occupied by a one-storey commercial retail building, largely surrounded by an asphaltic concrete parking lot. The application of road salt for de-icing purposes during snow and ice conditions on the parking lot is considered to represent an APEC on the Phase I Property (APEC #5).

The neighbouring lands within the vicinity of the Phase I Property consist largely of residential properties, with the exception of many commercial and occasional institutional properties to the north and south along Bank Street. No environmental concerns were identified with respect to the current use of the neighbouring lands.

## **Recommendations**

### **Phase II – Environmental Site Assessment**

Based on the findings of this assessment, it is our opinion that **a Phase II – Environmental Site Assessment will be required for the Phase I Property.**

### **Designated Substance Survey**

Based on the age of the subject building (c.1970's), asbestos containing building materials, lead-based paints, and other designated substances may be potentially present within the structure. It is recommended that a designated substance survey (DSS) be completed for the subject building prior to any future demolition activities.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the Phase I Property and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Ambassador Realty Inc. Permission and notification from Ambassador Realty Inc. and Paterson Group will be required prior to the release of this report to any other party.

Dear Nick,

**Re: Information Request  
1166 Bank Street, Ottawa, Ontario (“Subject Property”)**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

**Additional information may be obtained by contacting:**

**Ontario’s Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

**The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

Amya Martinov

HLUI SUMMARY REPORT  
AREA FEATURES

<b>HISTORIC LANDFILL FEATURE</b>	The historic landfills identified within the HLUI are referenced from the City's Old Landfill Management Strategy report (OLMS, 2004). Contact the City's Environmental Remediation Unit (ERU-UAE@ottawa.ca) if you would like more information about the old landfill sites identified in the OLMS report.
<b>OBJECTID</b>	92
<b>ADJACENT LANDUSE</b>	recreational (park and arena) and residential the zoning is L4[549] F(1.5) (major leisure area) in the general area of the site.
<b>GROUNDWATER_FLOW_DIRECTION</b>	possibly S towards the Rideau River and Canal or E towards Dow's Lake based on topography; groundwater flow to the E based on groundwater surface elevation [Paterson, 1999]
<b>G_GENERATION</b>	<null>
<b>INFORMATION_SOURCE</b>	1991-WDSI/WMB/MOE
<b>UTM_NAD27_E_NOTE</b>	<null>
<b>WATER_SUPPLY</b>	municipally supplied water
<b>SITE_NAME</b>	Lansdowne Park (North Bank of Rideau near Bank Street)
<b>OPERATIONAL_PERIOD</b>	certainly before 1945 based on City records
<b>OVERBURDEN</b>	sand, silty sand and sandy silt beneath waste fill [Paterson, 1999]
<b>ROAD_TYPE</b>	<null>
<b>WASTEDEPTH</b>	2 to 3 m [Paterson, 1999]
<b>ECOLOGICAL</b>	ecosystem of Rideau Canal
<b>DISTANCE_TO_SURFACE_WATER</b>	site is less than 50 m north of Rideau Canal
<b>WASTETYPE</b>	cinders, ashes, metal, wood, glass [Paterson, 1999]
<b>ADJACENT_OWNER</b>	NCC (Queen Elizabeth Pkwy and shore of Rideau Canal) south and residential houses on Wilton Cr. and Queen Elizabeth Pl. west of site
<b>MAGNITUDE</b>	area of soil impact partially delineated as asphalt parking area east of Aberdeen Pavilion, possibly extending towards the Pavilion and also on to NCC parkland
<b>LOCATION</b>	Lansdowne Park (driveway and exhibition grounds), near intersection of Bank St. and Queen Elizabeth Drwy
<b>ACTIVITYID</b>	6198
<b>DEPTH_TO_BEDROCK</b>	5 to 10 m to shale with laminations of calcareous siltstone
<b>SITE_STATUS</b>	Confirmed
<b>UTM_NAD27_NORTHING</b>	5027140
<b>UTM_NAD27_EASTING</b>	446560
<b>SOIL_COVER</b>	at least 1.5 m of fill (silt, sand and gravel) and sometimes grey crushed stone and asphalt [Paterson, 1999]
<b>PARAMETERS</b>	conductivity, arsenic, boron, lead and zinc in the soil; manganese and sodium in the groundwater (only metals and VOCs analyzed in the groundwater) [Paterson, 1999]
<b>G_VERSION</b>	0
<b>SERVICE_AREA</b>	presumably City of Ottawa
<b>SITE_ACCES</b>	site is intended for public use, but the Lansdowne Park property is fenced
<b>CONCENTRTN</b>	soil parameters noted above found exceeding MOE Table B criteria; groundwater parameters noted to exceed the 1994 MOE Ontario Drinking Water Objectives [Paterson, 1999]
<b>METHANE</b>	no measurement available
<b>ACTIVITY2</b>	6198
<b>ADJACENT_INDUSTRY</b>	none based on available information

HLUI SUMMARY REPORT  
AREA FEATURES

<b>HISTORIC LANDFILL FEATURE</b>	The historic landfills identified within the HLUI are referenced from the City's Old Landfill Management Strategy report (OLMS, 2004). Contact the City's Environmental Remediation Unit (ERU-UAE@ottawa.ca) if you would like more information about the old landfill sites identified in the OLMS report.
<b>OBJECTID</b>	89
<b>ADJACENT LANDUSE</b>	residential; the zoning is R2F (semi-detached) in the general area of the site.
<b>GROUNDWATER FLOW DIRECTION</b>	assumed to be SE towards the Rideau River
<b>G_GENERATION</b>	<null>
<b>INFORMATION_SOURCE</b>	1991-WDSI/WMB/MOE
<b>UTM_NAD27_E_NOTE</b>	<null>
<b>WATER_SUPPLY</b>	municipally supplied water
<b>SITE_NAME</b>	Warrington Drive (Wendover Avenue to Billings Bridge)
<b>OPERATIONAL_PERIOD</b>	before 1928 (earliest aerial photograph available show no landfilling activity)
<b>OVERBURDEN</b>	clay and silt - erosional terraces
<b>ROAD_TYPE</b>	<null>
<b>WASTEDEPTH</b>	unknown
<b>ECOLOGICAL</b>	Rideau River ecosystem; human contact possible given that residences are perhaps built on filled area
<b>DISTANCE_TO_SURFACE_WATER</b>	site is immediately adjacent to Rideau River
<b>WASTETYPE</b>	unknown; occasional cinder encountered in probe holes
<b>ADJACENT_OWNER</b>	houses on Warrington Dr. and Harvard Ave. and building at 1312 Bank St.
<b>MAGNITUDE</b>	no known monitoring
<b>LOCATION</b>	edge of land approx. 50 m wide extending on north (west) bank of Rideau River between extension of Wendover Ave. and Billings Bridge (Bank Ave.); south section of Linda Thom
<b>ACTIVITYID</b>	6241
<b>DEPTH_TO_BEDROCK</b>	5 to 10 m to possibly shale, siltstone or limestone
<b>SITE_STATUS</b>	Confirmed
<b>UTM_NAD27_NORTHING</b>	5026200
<b>UTM_NAD27_EASTING</b>	446750
<b>SOIL_COVER</b>	assumed to be covered based on land use, however thickness of cover unknown
<b>PARAMETERS</b>	no known monitoring
<b>G_VERSION</b>	0
<b>SERVICE_AREA</b>	presumably City of Ottawa
<b>SITE_ACCES</b>	area is not fenced and is used by the public for recreational purposes (parkland)
<b>CONCENTRTN</b>	no known monitoring
<b>METHANE</b>	no gas detected in probe holes [GLL, 1984]
<b>ACTIVITY2</b>	6241
<b>ADJACENT_INDUSTRY</b>	none based on available information
<b>OWNERCATEGORY</b>	City and possibly Private
<b>SITE_IDENTIFICATION</b>	Ur-33
<b>OWNER</b>	City of Ottawa (Linda Thom Park) and possibly private houses at 1 Warrington Dr., and at 47 & 50 Harvard Ave.
<b>G_NEXT_VERSION</b>	<null>
<b>SITE_ALIAS</b>	Warrington Drive - Wendover Ave. to Billings Bridge
<b>TOPOGRAPHY</b>	sloping southeast towards the Rideau River
<b>OPERATOR</b>	City of Ottawa

HLUI SUMMARY REPORT  
AREA FEATURES

<b>HISTORIC LANDFILL FEATURE</b>	The historic landfills identified within the HLUI are referenced from the City's Old Landfill Management Strategy report (OLMS, 2004). Contact the City's Environmental Remediation Unit (ERU-UAE@ottawa.ca) if you would like more information about the old landfill sites identified in the OLMS report.
OBJECTID	114
ADJACENT_LANDUSE	parkland on east side; residential on west side; the zoning is R5B (low rise apartment) in the general area of the site.
GROUNDWATER_FLOW_DIRECTION	assumed to be SE towards the Rideau River
G_GENERATION	<null>
INFORMATION_SOURCE	1991-WDSI/WMB/MOE
UTM_NAD27_E_NOTE	<null>
WATER_SUPPLY	municipally supplied water
SITE_NAME	Windsor Avenue
OPERATIONAL_PERIOD	around 1928
OVERBURDEN	clay and silt - erosional terraces
ROAD_TYPE	<null>
WASTEDEPTH	depth of fill estimated at 1 to 2 m [GLL, 1988]
ECOLOGICAL	none
DISTANCE_TO_SURFACE_WATER	Rideau River 40 m SE
WASTETYPE	not specified; cinder and ash with some glass, metal and brick fragments encountered in probe holes [GLL, 1984]
ADJACENT_OWNER	1 and 4 Windsor Ave.
MAGNITUDE	no known monitoring
LOCATION	parking lot for Windsor Park, at the end of Windsor Ave.
ACTIVITYID	6245
DEPTH_TO_BEDROCK	5 to 10 m to shale with laminations of calcareous siltstone
SITE_STATUS	Confirmed
UTM_NAD27_NORTHING	5026650
UTM_NAD27_EASTING	446980
SOIL_COVER	assumed to be covered based on land use, however thickness of cover unknown
PARAMETERS	no known monitoring
G_VERSION	0
SERVICE_AREA	presumably City of Ottawa
SITE_ACCES	accessible to public
CONCENTRTN	no known monitoring
METHANE	no gas detected in refuse in 1984 survey [GLL, 1984]
ACTIVITY2	6245
ADJACENT_INDUSTRY	none based on available information
OWNERCATEGORY	City
SITE_IDENTIFICATION	Ur-35
OWNER	City of Ottawa (Windsor Park)
G_NEXT_VERSION	<null>
SITE_ALIAS	Windsor Ave.
TOPOGRAPHY	sloping east towards the Rideau River
OPERATOR	City of Ottawa
FORMER_MUN	OTTAWA
PHYSICAL	site is currently used as a paved parking lot for Windsor Park; filled area possibly extends on adjacent lands which are grassed areas with tree cover
ROAD_NAME	<null>
MOE_ID	x 1115

HLUI SUMMARY REPORT  
AREA FEATURES

<b>HISTORIC LANDFILL FEATURE</b>	The historic landfills identified within the HLUI are referenced from the City's Old Landfill Management Strategy report (OLMS, 2004). Contact the City's Environmental Remediation Unit (ERU-UAE@ottawa.ca) if you would like more information about the old landfill sites identified in the OLMS report.
<b>OBJECTID</b>	29
<b>ADJACENT LANDUSE</b>	Residential and institutional (Riverside Hospital; Lycée Claudel); The zoning is partially EW (waterway corridor), EW[693]-h (waterway corridor) and L2B[757] (leisure linkage) in the general area of the site.
<b>GROUNDWATER_FLOW_DIRECTION</b>	west towards Rideau River
<b>G_GENERATION</b>	<null>
<b>INFORMATION_SOURCE</b>	1991-WDSI/WMB/MOE
<b>UTM_NAD27_E_NOTE</b>	<null>
<b>WATER_SUPPLY</b>	municipally supplied water
<b>SITE_NAME</b>	Riverside Drive (Between Billings Bridge and Hurdman Bridge)
<b>OPERATIONAL_PERIOD</b>	June 1948 - March 1963 (earthwork for the George McIlraith Bridge were ongoing in the mid 1960's)
<b>OVERBURDEN</b>	alluvium consisting of a mixture of sand, silt and clay with organic; floodplain bank which borders the filled area consists of silts and clays of marine origin
<b>ROAD_TYPE</b>	<null>
<b>WASTEDEPTH</b>	estimated depth of fill 0.9 m at southern end, 2.4 - 3.7 m in the middle section and 1.5 m to 3.0 m at northern end (not verified in the field) [GLL, 1980]; field data from AMEC in the northern end indicates at least 4 m and up to 12 m of waste fill enco
<b>ECOLOGICAL</b>	Rideau River ecosystem, human contact possible given use of site, although wastes are reportedly overlain by sufficient soil cover
<b>DISTANCE_TO_SURFACE_WATER</b>	old landfill is adjacent to Rideau River
<b>WASTETYPE</b>	mostly domestic wastes with some light industrial and possibly some liquid wastes
<b>ADJACENT_OWNER</b>	private owners of residential buildings on east side of Riverside Dr.; Riverside Hospital and Lycée Claudel
<b>MAGNITUDE</b>	analytical results exist pertaining to a Phase II - ESA but not available for review; unknown if results contain information on magnitude
<b>LOCATION</b>	Rideau River Park, between Riverside Drive and Rideau River; extends from Billings Bridge south to river bank, 300 m N of Hurdman Station on Transitway north; also, isolated pockets of fill which may contain fill: empty field south of Neil Way and the pl
<b>ACTIVITYID</b>	6112
<b>DEPTH_TO_BEDROCK</b>	approximately between 6 and 15 m (depth generally increasing towards the river) to reach a bedrock of shale
<b>SITE_STATUS</b>	Confirmed
<b>UTM_NAD27_NORTHING</b>	5028350
<b>UTM_NAD27_EASTING</b>	447850
<b>SOIL_COVER</b>	1 to 3 m of cover present over waste in past investigations
<b>PARAMETERS</b>	analytical results exist pertaining to a Phase II ESA but not available for review; Historical (1992 & 1993) data pertaining to surface water monitoring available but parameters measured pertain more to general surface water quality than leachate indicat
<b>G_VERSION</b>	0
<b>SERVICE_AREA</b>	City of Ottawa and Township of Gloucester
<b>SITE_ACCES</b>	area not fenced and open for public access
<b>CONCENTRTN</b>	analytical results exist pertaining to a Phase II - ESA but not available for review; Historical (1992 & 1993) data pertaining to surface water monitoring available but parameters measured pertain more to general surface water quality than leachate indic
<b>METHANE</b>	33% v/v combustible gas measured in 1980 survey [GLL, 1980]; trace gas locally detected in the soils on east side of Riverside Dr.; monitoring between 1982 and 1985 along south west part of site between Neil Way and Billings Ave indicate no detectable me
<b>ACTIVITY2</b>	6112
<b>ADJACENT_INDUSTRY</b>	National Petroleum Ltd. (bulk storage of oil and gas), around 1956, old Russell Rd near Rideau River [Intera #9]; Currie Products Ltd. (Refined Petroleum and Coal Products), 1930s-1966, 170 Lees Ave. [Intera #12]; Royal Canadian Engineers Workshops and L
<b>OWNERCATEGORY</b>	Government

**Investigation 1:**  
**Investigation 2:**  
**Penalty Imposed:**  
**Description:** On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Nov 2021**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Nov 2021**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jan 2022**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Feb 28, 2022**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: May 31, 2021**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Feb 28, 2022**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Feb 28, 2022**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Feb 28, 2022**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Nov 30, 2021**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2020**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Nov 2021**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Nov 30, 2021**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2022**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2020**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2021**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Feb 28, 2022**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- 28 Feb 2022**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Feb 28, 2022**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2019**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2022**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Sep 30, 2021**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2019**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Feb 28, 2022**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Sep 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
