## 1.0 EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment was carried out by Kollaard Associates Inc. for 2250276 Ontario Inc. of Ottawa, Ontario. The subject site for this assessment consists of a property with civic address 370 Cambridge Street North, Ottawa, Ontario (see Key Plan, Figure 1). The site has a total area of 0.06 hectares (0.15 acres) of land located on the west side of Cambridge Street North, about 250 metres south of the intersection of Cambridge Street North and Gladstone Avenue in the City of Ottawa, Ontario. The site is currently occupied by a two storey, 3 unit rowhouse with a detached garage.

It is understood that it is proposed to remove the existing building and construct a multi-unit residential building at the site.

The purpose of the Phase I Environmental Site Assessment was to identify, if possible, through non-intrusive investigation, consisting of a review of current and historical information and observations of site conditions during a site reconnaissance visit, the existence of any significant, actual or potential environmental liabilities associated with the property. The Phase I Environmental Site Assessment (ESA) has been prepared in general conformity with our interpretation of the requirements of CSAZ768 as well as Ontario Regulation 153/04 (as amended in December 2009 through Ontario Regulation 511/09) for conducting environmental site assessments.

The Phase I ESA was based on a site reconnaissance visit carried out on March 23, 2022, together with a review of available geological, topographical, historical and environmental information for the site.

There are no service stations within 250 metres of the site.

There were no current or historical Potentially Contaminating Activities (PCAs) identified at the subject site. Some off-site current or historical PCAs were identified within the Phase I ESA study area. However, given their distances and the inferred groundwater flow direction is away from the subject site, Kollaard Associates considers there were no resulting APECs from these off-site sources on the subject site.

It is understood that it is proposed to redevelop the property into a higher density residential development. The historical land use of the property, based on the results of this investigation, has also been for residential use. Therefore, a RSC is not required for the property, based on our understanding of Ontario Regulation 153/04.

Based on the results of this study no major issues of environmental concern were identified with respect to subsurface soil and/or groundwater quality and no further investigation is considered warranted at this time. However, the building at the site does have the potential to contain deleterious materials, including lead and other metals as well as asbestos due to its age. Prior to demolition and removal of the building, a Designated Substances Survey should be carried out to identify and test building materials to ensure proper handling and disposal measures are carried out.

*This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.*

## **2.0 INTRODUCTION**

### **2.1 PROPERTY INFORMATION**

The subject site for this assessment consists of a property with civic address 370 Cambridge Street North, Ottawa, Ontario (see Key Plan, Figure 1). The site has a total area of 0.06 hectares (0.15 acres) of land located on the west side of Cambridge Street North, about 250 metres south of the intersection of Cambridge Street North and Gladstone Avenue in the City of Ottawa, Ontario.

For the purposes of this assessment, project north is considered to be parallel to Cambridge Street North at the site (see Key Plan, Figure 1).

Kollaard Associates Inc. carried out this Phase I Environmental Site Assessment for 2250276 Ontario Inc., for the purpose of a development application with the City of Ottawa. It is understood that it is planned to redevelop the site into a multi-unit residential building. As such, there is no change of use or previous use for which a Record of Site Condition could be required under Ontario Regulation 153/04.

The site is currently occupied by a 3 unit rowhouse with a detached garage. The remaining areas not occupied by the dwelling consists of a asphaltic surfaced driveway and grass surfaced yard space.

Surrounding land use is currently mixed residential development. The site is bordered on the north, and south by residential development, on the east by Cambridge Street North and Arthur Lane North followed by other residential development.

The local topography is mostly flat lying with a gentle slope east from the front of the building toward Cambridge Street North and west from the rear of the building towards Arthur Lane North. The regional topography slopes northwest towards the Ottawa River located approximately 1.5 kilometres northwest of the subject site.

The legal description for the subject property based on information from the chain of title is as follows:

- Lot 15, Plan 33, City of Ottawa, PIN 04105-0130(LT).

## **2.2 OBJECTIVES**

The primary objective of this Phase I ESA is to document the site conditions on the day of a walk-through site reconnaissance and, if possible, to identify former and current operations or practices that may present potential environmental risks. The study is based on current and historical information and observations of site conditions during a site reconnaissance visit conducted on March 23, 2022. The general objectives of the Phase I Environmental Site assessment, as outlined in Ontario Regulation 153/04, include the following:

1. To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the phase one property.
2. To determine the need for a Phase II ESA.
3. To provide a basis for carrying out any Phase II ESA if applicable.
4. To provide adequate preliminary information about environmental conditions in the land or water on, in or under the phase one property for the conduct of a risk assessment following completion of a Phase II ESA.

## **3.0 SCOPE OF WORK**

The scope of the Phase I ESA is sufficient to identify existing and/or potential environmental liabilities which are obvious from visual examination of surface features and from available sources of information. The Phase I Environmental Site Assessment (ESA) has been prepared in general conformity with our interpretation of the requirements of CSAZ768-01 as well as Ontario Regulation 153/04 (as amended in December 2009 through Ontario Regulation 511/09 and subsequent amendments) for conducting environmental site assessments.

This level of work is a method of risk reduction, not risk elimination. No building materials, liquid, gas, or chemical product sampling and/or testing on or in the vicinity of the subject site were carried out as part of this assessment. This assessment included only a cursory overview of the present neighbouring land uses and does not constitute a complete assessment of the adjacent facilities.

The scope of work carried out for the site comprised the following:

- a review of available current and historical information about the site and surrounding properties within 250 metres of the site
- observations of site conditions during a site reconnaissance visit
- review and evaluate the information from the above noted information sources
- document the findings in a report

## **4.0 RECORDS REVIEW**

### **4.1 GENERAL**

#### **4.1.1 PHASE ONE STUDY AREA DETERMINATION**

Kollaard Associates Inc. considers that a 250 metre study area is sufficient to identify areas of historical and current potential concern on or near the subject site. As part of the preliminary review of historical documents for the site, aerial photographs of the site and surrounding area were reviewed, as well as documentation from the City of Ottawa on landfills and historical industrial sites (Sections 4.2.1 and 4.3.1). Any properties outside of this radius are considered too distant to cause any significant impact to the site.

#### **4.1.2 FIRST DEVELOPED USE DETERMINATION**

The first developed use of the property was determined based on a review of aerial photographs and the title search for the site (Section 4.3.1). The earliest air photograph that was reviewed was 1928. At that time, the site and surrounding land appear to be residential development. The photograph indicates a building and two detached garages at the rear of the site. As such, first developed use of the property is indicated to be prior to 1928.

### **4.1.3 FIRE INSURANCE PLANS**

A request for Fire Insurance plans was made for the subject site. Two fire insurance plans dated 1922 and 1963 were obtained (see Attachment E). A review of the fire insurance plans for the site indicates a 3 unit rowhouse with a detached garage at the rear of the property. No underground or above ground storage tanks were observed on either plans for the site or neighbouring sites.

### **4.1.4 CHAIN OF TITLE**

The legal description for the property, based on information from the City of Ottawa, is as follows:

- Lot 15, Plan 33, City of Ottawa, PIN 04105-0130(LT).

A chain of title for this site (see Attachment A) was provided by Domsons Title Search Inc. Based on a review of information obtained from that title search, the property is indicated to have been owned by individuals, except the current owner. The current owner is listed as 2250276 Ontario Inc.

### **4.1.5 ENVIRONMENTAL REPORTS**

No environmental related reports are expected to exist for this site.

### **4.1.6 PROPERTY USE RECORDS**

The City of Ottawa Website was reviewed for the zoning designation of the subject site. The website indicates that the site is currently zoned R4UD – Residential Fourth Density Zone according to the City of Ottawa Zoning By-law 2012-334. This zoning permits a wide mix of residential building forms ranging from detached to low rise apartment dwellings, in some cases limited to four units, and in no case more than four storeys, in areas designated as General Urban Area in the Official Plan.

The earliest air photograph that was reviewed was 1928. At that time, the site and surrounding land appear to be residential development.

A search of the environmental databases (Section 4.2.2) indicates no records found for the subject property.

Neither an open or closed waste management facility was identified to be within 500 metres of the subject property.

## **4.2 ENVIRONMENTAL SOURCE INFORMATION**

In order to assess some of the historical conditions at the property, a preliminary review of information from the following sources was conducted:

### Municipal and Provincial Government Sources

- Old Landfill Management Strategy Phase 1 – Identification of Sites, City of Ottawa, Ontario, December 2003, Reference Number 021-2785 by Golder Associates Ltd.
- Online queries with the following provincial and federal databases; Pits and Quarries database, Large and Small Landfills, online MECP well records database, Federal Contaminated Sites Inventory
- Ministry of Environment, Conservation and Parks (MECP), Ottawa, Ontario
- City of Ottawa Historical Land Use Inventory

### Environmental Databases

- Ecolog ERIS – Environmental Risk Information Services Standard Report

## **4.2.1 MUNICIPAL AND PROVINCIAL GOVERNMENT SOURCES**

### City of Ottawa

A review of a report entitled Old Landfill Management Strategy Phase 1 – Identification of Sites, City of Ottawa, Ontario, December 2003, Reference Number 021-2785 by Golder Associates Ltd. and Mapping and Assessment of Former Industrial Sites – City of Ottawa, Ontario, July 1988, Reference Number H87-053 by Intera Technologies Ltd. indicates there

are no old landfill sites or former industrial sites within greater than 500 metres of the subject site.

#### Historical Land Use Inventory

The City of Ottawa was contacted to conduct a search of all environmental databases, including Historical Land Use Inventory (HLUI) and any information pertaining to the environmental condition of the property and adjoining areas including, but not limited to, past environmental reports, orders, violations of environmental statutes, regulations or by-laws, certificates, approvals, permits and any other environmental information.

At the time of the preparation of this report, a response from the City of Ottawa had not been received (see Attachment D). Should any environmentally relevant information be provided from this information request that had not been previously identified from other sources, it will be provided in an addendum letter at a later date.

#### Ministry of the Environment, Conservation and Parks

A formal request was made to the MECP office in Ottawa, Ontario to determine if the Ministry has maintained a file with respect to the subject property. Specifically, the MECP was asked to respond (in writing) with information concerning any historical or existing incidents at or in the vicinity of the subject site. At the time of the preparation of this report, a response from the MECP had not been received. However, if any relevant environmental information about the site is provided, an addendum letter summarizing the new information will be provided at that time (Attachment G).

#### Pits and Quarries

Based on a review of the provincial online database, there are no active pits or quarries with the Phase I Study Area (i.e. 250 metres).

#### Large and Small Landfills

Based on a review of the provincial online databases for large and small landfill sites, there are no landfill sites (open or closed) within at least 2 kilometres of the subject site.

#### Online MECP Well Records

Based on a review of online MECP Well Records, there are no drinking water wells records identified within 250 metres of the subject site.

Some records identified within 250 metres of the site are indicated to be for boreholes. The boreholes had varying depths below existing ground surface. It is indicated that the boreholes were placed for geotechnical purposes.

#### Federal Contaminated Sites Inventory

Based on a review of the online database for federal contaminated sites, there are no sites (open or closed) within at least 500 metres of the subject site.

### **4.2.2 ENVIRONMENTAL DATABASES**

#### **ECOLOG ERIS – Environmental Risk Information Services Standard Report**

A review of information provided by Ecolog ERIS – Environmental Risk Information Services (see Attachment E) was carried out as part of this Phase I ESA. Based on that review, no records were found in the databases searched for the project property.

The following were identified in the report for properties within 250 metres of the subject site with some environmental significance.

In the List of TSSA Expired Facilities (EXP), Fuel Storage Tank (FST) and Fuel Storage Tank - Historic (FSTH), Private and Retail Fuel Storage Tanks (PRT), Retail Fuel Storage Tanks (RST), Delisted Fuel Tank (DTNK) Summaries, the following sites were identified:

- 470 Bronson Avenue - Tuan Nguyen O/A Petro Canada, 1460932 Ontario Ltd. c/o Radek Szybowski, Avenues Garage Ltd/Twenty First Century Motors Inc. - 222.2 metres north
- Ottawa Board of Education - 275 Chamberlain Street, Ottawa - 235.7 metres east
- Suncor Energy Products Partnership - 470 Bronson Avenue - 240.27 metres north

Kollaard Associates considers there are no corresponding PCAs with these properties.

A review of the Ontario Spills indicate a total of eighteen (18) spills have been reported in the Phase I Study Area in the Ontario Spills database. These spills and others reported in the database were indicated to be minor and localized. Given the distance between these properties and the subject site, Kollaard Associates considers that none of the spills have resulted in APECs on the subject site.

In the Dry Cleaning Facilities database, Browns Cleaners Ltd/Modern Cleaning Service Ottawa Ltd. - Ottawa - 571 Bronson Avenue - 167.6 metres - east/northeast was identified. Kollaard Associates considers based on the distance and the direction of groundwater flow (downgradient) to the dry cleaners, there are no corresponding APECs with the property.

In the Ontario Regulation 347 Waste Generators Summary, the following sites were identified:

- Capital Endodontics. - 1 Raymond Street Suite 300 - Pathological Wastes - 30.81 metres east/northeast
- Griffin's Head Antique Restoration/Protocol Floral Expressions Inc. - 367 Cambridge Street North - Aromatic Solvents - 54.59 metres - east/northeast
- Ottawa Hydro (PCB) - 582 Bronson Avenue - not defined - 116.73 metres east
- Modern Cleaning Service Ottawa Ltd/Browns Cleaners Ltd. - 571 Bronson Avenue - Halogenated Solvents - 167.6 metres east/northeast
- Corporate Foods Limited - 458 Catherine Street - Waste Oils & Lubricants, Oil Skimmings & Sludges - 178.88 metres east
- Securemax Self Storage Inc. - 458 Catherine Street - Light Fuels - 178.9 metres east

Kollaard Associates considers that none of the waste generators have resulted in APECs on the subject site.

In the Record of Site Condition Summary, (ECA) the following sites were identified

- Ottawa Board of Education - 605 Bronson Avenue - 229.13 metres - east
- Zhaokun Wang - 501 Bronson Avenue - 228.75 metres - north/northeast

In the Scott's Manufacturing Directory, the following sites were identified:

- Comtest Communications Products Ltd. - 1 Raymond Street - 30.81 metres - east/northeast
- New Epoch Translations & Graphics Inc. - 148.12 metres - east/northeast
- The Canada China News Inc. - 520 Bronson Avenue Floor 1 - 148.12 metres - north/northeast

Kollaard Associates considers that none of the manufacturers have resulted in APECs on the subject site.

In the Inventory of NPCB and PCB Storage Sites Summaries, the following sites were identified:

- Ottawa Board of Education - 605 Bronson Avenue - 229.13 metres - east
- Canada Post - 10 Orangeville Street - 193.79 metres - south/southwest

Kollaard Associates considers there is no corresponding APEC with this property.

No other significant environmental concerns are listed in the Environmental Risk Information Services Standard Report.

## 4.3 PHYSICAL SETTING SOURCES

### 4.3.1 AERIAL PHOTOGRAPHS

A review of air photographs of the site for the years 1928, 1958, 1965, 1976, 1991, 2002, 2007, 2011, 2015 and 2019 was carried out as part of this Phase I ESA (Attachment C). The aerial photographs were obtained from the City of Ottawa website and National Air Photo Library. The following table is a summary of the air photograph review:

<b>Date</b>	<b>Observations</b>
1928	Poor quality air photograph. The site appears to be occupied by a multi unit townhouse. The surrounding area are residential development.
1958	The townhouse and two detached garages exist at the site. Two additions are located on the west side of the townhouse at the site. No significant changes are evident on the subject site or adjacent properties.
1965	No significant changes are evident on the subject site. The building located

	immediately south of the site has been removed and the property is vacant. No other significant changes are evident to site or adjacent properties.
1976	Poor quality air photograph. No significant changes are evident on the subject site or adjacent properties.
1991	Part of the rear yard space appears to be divided by a wall. Only one detached garage remains in the west portion of the site. No other significant changes are evident on the subject site or adjacent properties.
2002	No significant changes are evident on the subject site or adjacent properties.
2007	No significant changes are evident on the subject site or adjacent properties.
2011	No other significant changes are evident on the subject site or adjacent properties.
2015	Some items including yard furniture and a canoe are observed in the rear yard space. Two vehicles are located in the driveway located on the west side of the site. No other significant changes are evident on the subject site or adjacent properties.
2019	No significant changes are evident on the subject site or adjacent properties.

#### 4.3.2 TOPOGRAPHY, HYDROLOGY AND GEOLOGY

##### Topography and Hydrology

The local topography is mostly flat lying with a gentle slope from the rear of the existing building toward Arthur Lane North to the west and from the front of the building toward Cambridge Street North to the east.

The regional topography slopes northwest towards the Ottawa River located approximately 1.5 kilometres northwest of the subject site (Attachment B).

##### Surficial and Bedrock Geology

Based on a review of the surficial geology map for the site area, it is expected that the site is underlain by glacial till and/or shallow bedrock. Bedrock geology maps indicate that the bedrock underlying the site consists of limestone with some shaly partings of the Ottawa Formation or dark grey limestone of the Eastview Formation.

Based on a review of overburden thickness mapping for the site area, the overburden is estimated to be between about 1.0 to 3.1 metres in thickness above bedrock.

Groundwater flow often reflects topographic features and typically flows toward nearby lakes, rivers and wetland areas. The regional topography slopes northwest towards the Ottawa River located approximately 1.5 kilometres northwest of the subject site.

#### **4.3.3 FILL MATERIALS**

It is expected that some minor fill materials were used for the driveway at the site.

#### **4.3.4 WATER BODIES AND AREAS OF NATURAL SIGNIFICANCE**

There are no surface water features located on or within the vicinity of the subject site. The Ottawa River located approximately 1.5 kilometres northwest of the subject site.

No provincially significant wetlands (PSWs) or areas of natural and scientific interest (ANSIs) were identified on the subject property or within the study area.

#### **4.3.5 WELL RECORDS**

A search on The Ministry of the Environment, Conservation and Parks website for Water Well Record Mapping was completed as part of this assessment. There were no drinking water wells records identified within 250 metres of the subject site.

Other records identified within 250 metres of the site are indicated to be for boreholes or geotechnical and environmental purposes. The boreholes are indicated to range in depth from about 1.2 to 6.1 metres below existing ground surface.

## **5.0 INTERVIEWS**

Based on a discussion with the existing owner of the site, 2250276 Ontario Inc., it is understood that the building is currently used as a three unit rental townhouse. It is also understood that the building was built prior to 1928. The owner is unaware if the building was heated with oil in the past and to his knowledge, there have been no spills or other environmental issues at the site. The building is currently heated using natural gas.

## **6.0 SITE RECONNAISSANCE**

### **6.1 GENERAL REQUIREMENTS**

On March 23, 2022, a walk-through site reconnaissance was conducted at the subject property by a member of Kollaard Associates Professional staff. The uses of the site and adjacent properties within the Phase I ESA Study Area were assessed. Observations of adjacent properties were limited to views from the subject property and from publicly accessible areas.

The attached Key Plan, Figure 1 and air photographs show the relative location of the subject site with respect to the surrounding land and the existing roadway network.

Site photographs are provided (Attachment F).

### **6.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY**

#### **6.2.1 SITE DESCRIPTION**

The following was observed:

- The site is currently occupied by a two storey, three-unit rowhouse with basement, a detached garage, rear asphalt surfaced driveways and yard space. Currently, the building is occupied by three tenants.
- The building has a concrete poured foundation and is clad in brick. It is understood that the building was constructed prior to 1928.
- Areas not occupied by the building, driveway or detached garage are yard space. The rear yard space is divided by a chain link fence. Part of the rear yard space was observed to be used for gardening purposes with multiple raised garden beds observed.
- Cambridge Street North is located on the east side and Arthur Lane North on the west side of the site.
- In general, surface drainage across the site slopes from the front of the building toward the east and from the rear of the building toward the west.
- No service stations exist in close proximity to the site.

The attached Key Plan, Figure 1 and air photographs show the relative location of the subject site with respect to the surrounding land and the existing roadway network.

## **6.2.2 SITE INFRASTRUCTURE**

The following observations of the site were made.

### Electricity

Currently, the building is serviced by overhead hydro. Overhead wiring was observed along Cambridge Street North. The area is serviced by Hydro Ottawa.

### Heating and Cooling

The building is serviced by natural gas. Three natural gas meters were observed near the northeast, centre and southeast corners of the building at the site.

No air conditioning units were observed at the site.

### Water Supply

A municipal water supply system is located within Cambridge Street North and services the building.

### Wastewater and Sewage Disposal

The area is serviced by sanitary and storm sewers located within Cambridge Street North.

### Sumps, Pits and Floor Drains

No floor drains were observed within the basement of the building at the site.

## **6.2.3 BUILDING DESCRIPTION**

The site is currently occupied by a two storey, 3-unit rowhouse building with basement, asphaltic surfaced driveways and yard space. The building is occupied by tenants. The building has a concrete poured foundation and is clad in brick. It is understood that the building was constructed prior to 1928.

## 6.2.4 POTENTIALLY CONTAMINATING ACTIVITY

Based on a review of information for the site, the historical and current use is for residential purposes.

No waste generators or manufacturing or other database search results were identified at the subject site.

Based on information provided, there are no current or historical activities at the subject site that could be considered “Potentially Contaminating Activities”, as identified in Table 2 of Schedule D of O. Reg. 153/04.

The following table describes PCAs at the site and in vicinity of the site.

<b>Address / Occupant</b>	<b>Activity</b>	<b>Distance from Subject Site</b>	<b>Potential Area of Concern on Subject Site (Y/N)?</b>
PCA 1 540 Bronson Avenue - Speedy Auto Service - Existing Autobody	Activity #10 - Commercial Autobody Shop and Garage	116m - NE	N
PCA 2 567 Bronson Avenue - Laurie's Autobody - Existing Autobody	Activity #10 - Commercial Autobody Shop	138m - ENE	N
PCA 3 536 Bronson Avenue - A1 Motorsport Auto Service - Existing Autobody	Activity #10 - Commercial Autobody Shop and Garage	140m - NE	N
PCA 4 571 Bronson Avenue - Modern Dry Cleaners/Browns Cleaners Ltd. - Existing Autobody	Activity #37 - Operation of Dry Cleaning Equipment	167.6 - ENE	N
PCA 5 297 Cambridge Street North - Raymond's Body Shop - Existing Autobody	Activity #10 - Commercial Autobody Shop	216m - NNE	N

PCA 6 470 Bronson Avenue - Petro Canada Inc. - Existing Fuel Station	Activity #28 - Gasoline and Associated Products Storage in Fixed Tanks	245m - NNE	N
PCA 7 470 Bronson Avenue - Hodge's Service Center and Car Clinic. - Existing Garage	Activity #10 - Commercial Autobody Shop and Garage	245m - SSE	N

## 6.2.5 MATERIALS HANDLING AND STORAGE

### General Storage and Debris

At the time of the site reconnaissance, solid waste storage was not observed or expected at the site.

### Solid Waste

The area is served by City of Ottawa municipal waste collection on a weekly basis.

### Hazardous Materials

No storage of hazardous materials was observed or is expected on the subject site.

## 6.2.6 DESIGNATED AND REGULATED SUBSTANCES

### Polychlorinated Biphenyls (PCBs)

The use of PCBs in electrical equipment such as transformers, capacitors, fluorescent light ballasts, etc. was common up to about 1980. The Federal Chlorobiphenyls Regulation, SOR/91-152, prohibits the use of PCBs in the aforementioned electrical equipment installed after July 1, 1980. It is not a requirement to remove materials containing PCBs. However, any handling or removal of PCB containing equipment should be carried out in accordance with Ontario Regulation 362, PCB Waste Management under the Environmental Protection Act of Ontario, R.S.O 1990.

Older fluorescent lighting, if present, could contain PCBs within the light ballasts. Should any removal of lighting and electrical equipment which may contain PCBs be removed from the buildings during future renovations or demolition, it should first be identified through a designated substances and hazardous materials survey (DSS) whether special handling may be required.

Based on the age of the building at the site, there is a possibility that PCB containing equipment may exist within the building.

#### Suspect Asbestos Containing Materials (ACM)

The common use of friable (breakable by hand) ACM in construction decreased in the mid 1970s. Buildings constructed prior to about 1985 may contain some ACM. Friable asbestos (friable is defined as a material that can be crumpled, powdered or pulverized by hand pressure) was widely used in sprayed fireproofing until 1973, and in decorative or finishing plasters, and thermal systems insulation until the early 1980's. Examples where ACM can exist include floor, wall or ceiling tiles, heating/cooling pipes, pipe gaskets, roofing materials and insulation/non-combustible materials. The application of friable asbestos was banned by Ontario Regulation 654/85, which came into effect March 1985. On November 1, 2005, this regulation was most recently updated and changed to Ontario Regulation 278/05.

Under Ontario Regulations, it is not a requirement to remove asbestos from a building unless it is damaged or is likely to be disturbed during renovations or demolition work etc. Applicable regulations define "asbestos-containing material" as material that contains 0.5 per cent or more asbestos by dry weight. If asbestos is to be removed, it should be carried out in accordance with the procedures outlined in Ontario Regulation 837, R.R.O. 1990 and Ontario Regulation 278/05.

Based on the age of the building at the site, there is a potential for ACMs to be contained within the building materials. Prior to any future demolition, it is recommended that a Designated Substances Survey (DSS) be carried out to identify and test building materials to ensure proper handling and disposal measures are carried out.

### Ozone- Depleting Substances (ODS)

Certain chemicals, recognized as ozone- depleting substances (ODS), break down in the stratosphere and release chlorine or bromine, which in turn destroy the stratospheric ozone layer. Most of these substances are also greenhouse gases. Ozone- depleting substances are used as foam blowing agents, solvents, fire extinguishers, and refrigerants for air conditioning and refrigeration applications. Under the Canadian Environmental Protection Act, 1999, Environment Canada administers the Ozone- Depleting Substances Regulations, 1998 and its subsequent amendments to reduce the use of these and other ODS. According to Environment Canada's website, the target established by these regulations specifies a one hundred percent reduction in the use of HCFCs by the year 2030. As of January 1, 2010, no new manufacture or import of HCFC (R-22) containing equipment was allowed in Canada.

No air conditioning units were observed at the site. As such, there are no concerns for ozone depleting substances.

### Lead

Lead is commonly associated with old pipes, pipe solder, and lead paint. In 1976, Canadian Regulations limited the amount of lead in interior paint to 0.5 percent by weight. Although paints containing lead were banned from uses on exterior or interior surfaces of buildings, furniture or household products in the 1970s, various commercial paints (e.g., road paint) are still known to contain lead.

Based on the age of the building at the site, there is a potential for lead paint and/or lead to be present within the building materials. A Designated Substances Survey should be carried out prior to any renovations or demolition to ensure proper handling/disposal of any building materials that contain hazardous materials.

### Urea Formaldehyde Foam Insulation (UFFI)

Urea Formaldehyde Foam Insulation is composed of a mixture of urea-formaldehyde resin, a foaming agent, and compressed air. It was commonly injected in exterior wood frame and masonry walls in order to insulate difficult to reach cavities until its ban in Canada in December 1980. The majority of UFFI was installed in new and existing construction in Canada between 1975 and 1978 as part of the Canadian Home Insulation Program.

Due to the age of the building at the site, there is a potential for UFFI to be present. A Designated Substances Survey should be carried out prior to any renovations or demolition to ensure proper handling/disposal of any building materials that contain hazardous materials.

### **6.2.7 ABOVE AND UNDERGROUND STORAGE TANKS**

No above ground fuel storage tanks were observed within the basement of the dwelling at the site. No staining or odours were detected within the basement. No evidence of former use of heating oil was observed at the site. Based on a review of the Ecolog ERIS report for the site and site area, no reports of any spills were documented for the site.

### **6.2.8 ADJACENT PROPERTIES**

For the approximate locations of the following properties, see Attachment E, Map Key and Overview.

At the time of the site visit, adjacent properties were observed from publicly accessible areas to determine whether any activities on those properties could pose a concern for the subject site.

Surrounding land use is currently mixed residential development. The site is bordered on the north by residential development, on the south by the Embassy of Madagascar, on the west by Arthur Lane and on the east by Cambridge Street North.

One existing gas station (Petro Canada) was observed within 250 metres of the site. Due to the distance from the site (approx 245 metres), the existing gas station does not result in an APEC on the subject site.

Some hydrocarbon spills were reported to have occurred within 250 metres of the subject site. However, due to the distance and nature of the spills (all localized) from the site, Kollaard Associates does not consider any of these to have resulted in an APEC.

## **6.2.9 Enhanced Investigation Property Observations**

Part VI of O.Reg. 511/09 defines an Enhanced Investigation Property as (i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry cleaning equipment.

Based on the records review and site reconnaissance the site was not classified as an Enhanced Investigation Property.

## **6.3 WRITTEN DESCRIPTION OF INVESTIGATION**

The Phase I ESA presented herein is based on information that was obtained from a records review (Section 4.0), interviews (Section 5.0) and site reconnaissance (Section 6.0). The details of the information obtained from each of these sources are provided in the relevant sections of this report. Based on the information obtained, Kollaard Associates has not identified any current and/or historical potential sources of contamination (PCAs) with no resulting areas of potential environmental concern (APEC) at the site, which are described in Section 7.0.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 CURRENT AND PAST USES**

The site is currently occupied by a two storey, three-unit rowhouse with basement and a detached garage. The remaining areas not occupied by the residential building and detached garage consist of an asphaltic surfaced driveway and grass surfaced yard space. The yard space is enclosed by fencing and a short concrete wall.

Based on a review of historical aerial photographs, title search, historical maps, and other records review, the site was first developed sometime prior to 1928. The 1928 air photograph indicates a residential building. This corresponds with the timeline of the air photographs.

A description of current and past uses of the Phase I ESA property to its first developed use is provided below.

<b>Year</b>	<b>Owner</b>	<b>Property Use</b>
1835 -2020	Various individuals	Agricultural followed by Residential (prior to 1928)

## 7.2 POTENTIALLY CONTAMINATING ACTIVITY

As per Ontario Regulation 153/04, a Potential Contaminating Activity (PCA) is defined as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D. From that list, no items were identified for the subject site. No records for waste generation or handling or Scott's Manufacturing directory and other database search requests were found for the subject site (Section 4.2.2).

The historical use of the site has been for residential purposes since at least 1928, which aerial photographs confirmed over the years. There are no current or historical activities at the subject site that qualify as PCAs.

Based on information provided, there are current and historical activities identified within 250 metres that could be considered "Potentially Contaminating Activities", as identified in Table 2 of Schedule D of O. Reg. 153/04 (see Table, below).

The following table describes PCAs within 250 metres of the site.

<b>Address / Occupant</b>	<b>Activity</b>	<b>Distance from Subject Site</b>	<b>Potential Area of Concern on Subject Site (Y/N)?</b>
PCA 1 540 Bronson Avenue - Speedy Auto Service - Existing Autobody	Activity #10 - Commercial Autobody Shop and Garage	116m - NE	N
PCA 2 567 Bronson Avenue - Laurie's Autobody - Existing Autobody	Activity #10 - Commercial Autobody Shop	138m - ENE	N

PCA 3 536 Bronson Avenue - A1 Motorsport Auto Service - Existing Autobody	Activity #10 - Commercial Autobody Shop and Garage	140m - NE	N
PCA 4 571 Bronson Avenue - Modern Dry Cleaners/Browns Cleaners Ltd. - Existing Autobody	Activity #37 - Operation of Dry Cleaning Equipment	167.6 - ENE	N
PCA 5 297 Cambridge Street North - Raymond's Body Shop - Existing Autobody	Activity #10 - Commercial Autobody Shop	216m - NNE	N
PCA 6 470 Bronson Avenue - Petro Canada Inc. - Existing Fuel Station	Activity #28 - Gasoline and Associated Products Storage in Fixed Tanks	245m - NNE	N
PCA 7 470 Bronson Avenue - Hodge's Service Center and Car Clinic. - Existing Garage	Activity #10 - Commercial Autobody Shop and Garage	245m - SSE	N

### 7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

There are seven current or historical activities that have been identified within 250 metres of the subject site that could be considered Potentially Contaminating Activities within the Phase One Study Area (see Conceptual Site Model, Figure 2). However, none of the activities are considered to have any impact to the subject site based on the historical information and relative distances to the site.

There were no PCAs on the subject property. There are no offsite PCAs which have resulted in APECs on the subject site.

### 7.4 PHASE ONE CONCEPTUAL SITE MODEL

The Phase I ESA Conceptual Model provided as Figure 2 identifies the PCAs (identified in Sections 7.2 and 7.3, if applicable) and within the Phase I Study Area (250 metres) as well as surface features, such as buildings, roads and property uses for adjacent properties. The Phase I study area and all of the activities and historical property uses are described within maps provided.

The following describes the Phase One ESA Conceptual Site Model (CSM) for the Site based on the information obtained and reviewed as part of this Phase I ESA:

- The subject site for this assessment consists of one property with civic address 370 Cambridge Street North, in the City of Ottawa, Ontario.
- The historical use of the site has been for residential purposes (since at least 1928).
- The site has a total area of 0.06 hectares (0.15 acres) of land located on the west side of Cambridge Street North, about 250 metres south of the intersection of Cambridge Street North and Gladstone Avenue in the City of Ottawa, Ontario.
- The site is currently occupied by a two storey, three-unit rowhouse with basement and a detached garage.
- A building was observed on a 1928 air photograph.
- According to the Ecolog ERIS report, there are no water wells present on the site.
- The site is bordered on the north by residential development, on the south by the Embassy of Madagascar, on the west by Arthur Lane then residential development and on the east by Cambridge Street North followed by commercial development (Comtest and Capital Endodontics).
- The local topography is mostly flat lying with a gentle slope from west to east across the property. The Ottawa River located approximately 1.5 kilometres northwest of the subject site.
- The local topography is mostly flat lying with a gentle slope from the rear of the existing dwelling toward Arthur Lane North to the west and from the front of the building toward Cambridge Street North to the east.

In order to determine whether any potentially contaminating activities within the Phase I study area may have contributed to an APEC at the subject site, the following were considered.

Site and area topography and surface water drainage: From the front of the building, the ground surface slopes towards Cambridge Street North and from the rear of the building towards Arthur Lane. Groundwater flow often reflects topographic features and typically flows toward nearby lakes, rivers and wetland areas. Based on the topography of the area, it is expected that the local shallow

groundwater flow is to the south/southwest toward Dow's Lake located approximately 860 metres south/southwest of the subject site. The regional topography slopes north towards the Ottawa River located approximately 1.5 kilometres northwest of the subject site.

Hydrogeology/Surficial and Bedrock Geology: Based on a review of the surficial geology map for the site area, it is expected that the site is underlain by glacial till and/or shallow bedrock. Bedrock geology maps indicate that the bedrock underlying the site consists of limestone with some shaly partings of the Ottawa Formation or dark grey limestone of the Eastview Formation. Based on a review of overburden thickness mapping for the site area, the overburden is estimated to be between about 1.0 to 3.1 metres in thickness above bedrock.

Contaminant distribution, transport and underground utilities: The soils at the site and within the Phase I study area consist of glacial till which has low permeability. The Phase I study area is also controlled by municipal storm and sanitary sewers. Lateral gradients in glacial till soils are relatively slow and contamination would tend to migrate downward until saturated conditions are encountered. Once saturated conditions are encountered and depending on contaminant mobility, solubility, volatility, etc. the contaminants could be expected to dissolve into the groundwater and migrate laterally in the direction of groundwater flow. In this case, the topographical information indicates that the groundwater flow gradient is moving towards the Ottawa River located approximately 1.5 kilometres northwest of the subject site.

The underground utilities pertaining to water and sewer enter the site from Cambridge Street North. Hydro services are overhead. Service trenches related to underground utilities provide preferential pathways for contaminant migration. However, no contamination is expected to exist at the site.

Uncertainty: The uncertainties associated with the conceptual model include those associated with a limited documentation for the subject site and adjacent sites. However, based on the body of information acquired, it is considered that the absence of this information should not likely affect the final conclusion of the Phase I ESA. There were no material deviations to the Phase I ESA requirements set out in O. Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase I Conceptual Site Model or the findings of this Phase I ESA.

## **8.0 CONCLUSION**

### **8.1 PHASE II ESA REQUIREMENT FOR RSC FILING**

The results of this Phase I ESA suggest that a Phase II ESA is not required at this time.

The current and proposed development of the site is residential use.

Given that the Phase I property is currently used for residential purposes (3-unit rowhouse) and is to be redeveloped with a higher density residential building, there will be no change in the land use from less sensitive to more sensitive. Therefore, an RSC is not required for the property, based on our understanding of Ontario Regulation 153/04.

### **8.2 SIGNATURES**

The results of this Phase I ESA should in no way be construed as a warranty that the subject property is free from any and all contaminants other than those noted in this report, nor that all compliance issues have been addressed.

This report was prepared for the exclusive use of 2250276 Ontario Inc. and is based on data and information collected during the Phase I ESA of the property conducted by Kollaard Associates Inc. This report may not be relied upon by any other person or entity without the express written consent of 2250276 Ontario Inc. and Kollaard Associates Inc. In evaluating this site, Kollaard Associates Inc. has relied in good faith on information provided by others. The assessment of environmental conditions and possible site hazards presented has been made using available technical data collected and provided by others. We accept no responsibility for any deficiencies, or inaccuracies in this report as a result of omission, misinterpretations, or fraudulent acts of others.

The conclusions provided herein represent the best judgement of Kollaard Associates Inc. based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities. If new information is discovered during future work, including excavations, borings or other studies, Kollaard Associates Inc. should be requested to re-evaluate the conclusions presented in this report and provide amendments as required.

We trust that this report is sufficient for your present requirements. If you have any questions concerning this report, please do not hesitate to contact our office.

Yours truly,

Kollaard Associates Inc.

---

Dean Tataryn, B.E.S., EP.

Colleen Vermeersch, P. Eng.

## 10.0 QUALIFICATIONS OF THE ASSESSORS

### **Dean Tataryn, B.E.S., EP – Senior Environmental Professional**

Mr. Dean Tataryn is a Senior Environmental Professional (EP) with Kollaard Associates Inc. in Kemptville, Ontario. Mr. Dean Tataryn has been conducting Phase I ESAs in accordance with the CSA Standard and Environmental Protection Act for more than 21 years. Mr. Tataryn has conducted more than 150 Phase I, II and III ESAs for commercial/residential clients over his career. Mr. Tataryn obtained a Bachelor of Environmental Studies (Honours Urban and Regional Planning) and a Certificate in Environmental Assessment from the University of Waterloo in 1995. Mr. Tataryn obtained his Environmental Professional (EP) designation in June of 2010.

EP certification is available exclusively to experienced professionals who have five or more years of relevant environmental work experience. Recipients of the EP designation have demonstrated that their skills and knowledge meet or exceed the National Occupational Standards (NOS) to ensure that they possess the specific environmental competencies required in their fields of practice. The NOS are a comprehensive list of skill statements that describe the competencies required for environmental work in Canada. The NOS provides a rigorous, nationally validated benchmark of the skills, knowledge and experience relevant for practice within the environment sector in the areas of environmental protection, resource management, environmental sustainability, environmental management, environmental auditing and/or greenhouse gas reporting.

Mr. Tataryn joined Kollaard Associates Inc. in 2005 and has worked on numerous environmental, geotechnical and hydrogeological assessment projects over his career. Mr. Tataryn is fully trained in coordinating and conducting environmental site assessments, environmental remediation, reclamation and restoration, contamination and spill inspections, and storage tank assessment and removal.

Kollaard Associates is an engineering consulting firm that provides a complete range of engineering services for developers, builders and homeowners in Eastern Ontario. Kollaard Associates specializes in providing civil, structural, geotechnical, hydrogeological and environmental services to our clients. Kollaard Associates Inc. has been established as a team of engineers and consultants since 2005. Mr. William Kollaard, P.Eng., owner and president, is responsible for the overall company development and management of the firm.

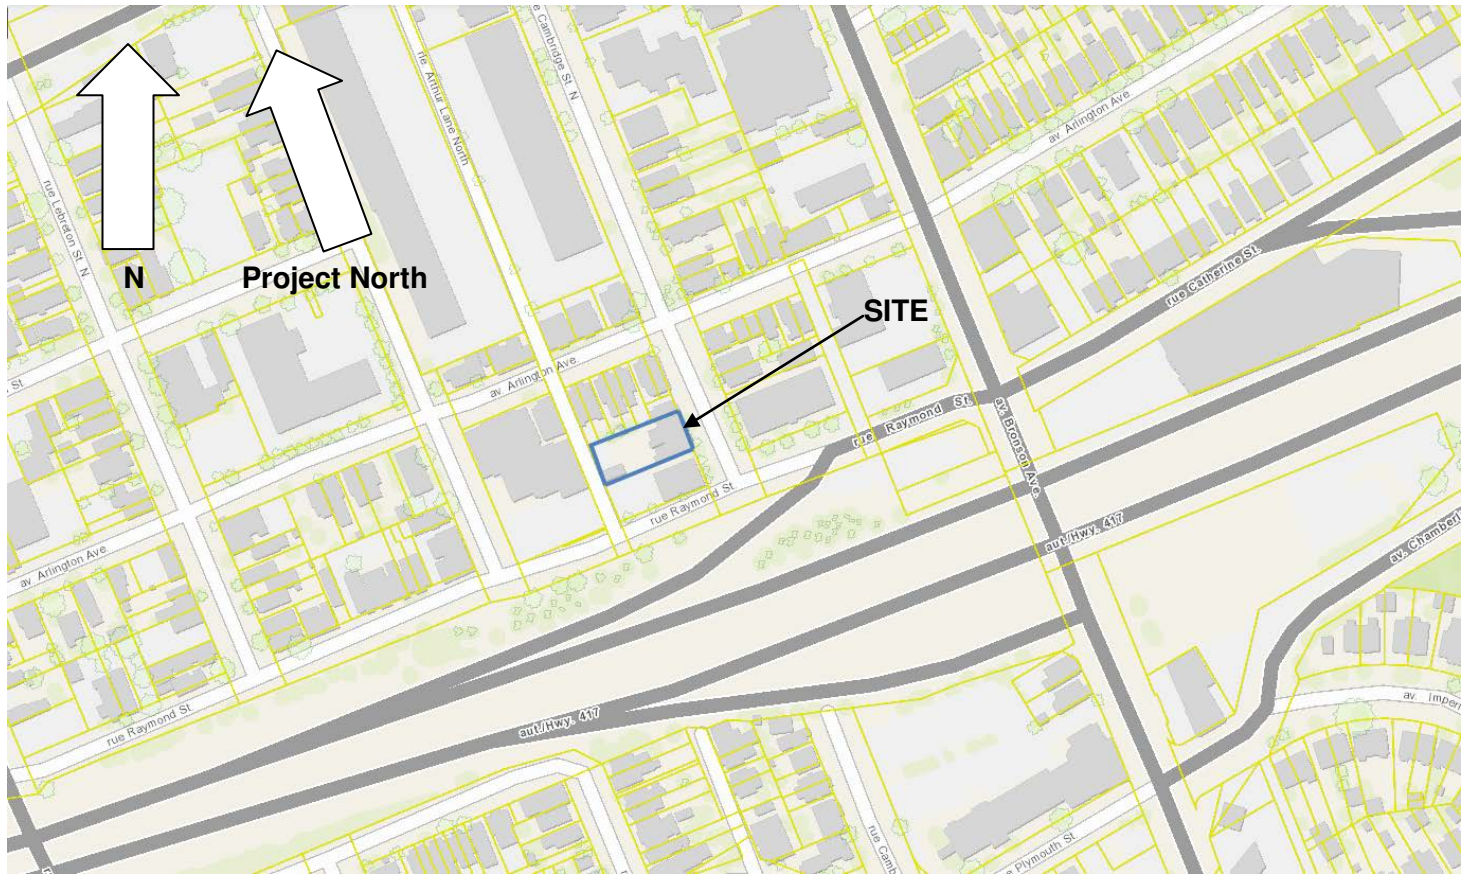

### **Colleen Vermeersch, P.Eng.**

Colleen Vermeersch is an engineer with Kollaard Associates Inc. in Kemptville, Ontario. Colleen has been conducting Phase I ESAs in accordance with the CSA Standard and Environmental Protection Act for more than four years. Colleen has conducted more than thirty Phase I ESAs for commercial/residential clients over her career and several Phase II ESAs, some of which have involved clean up supervision. Colleen Vermeersch obtained a Bachelor of Engineering (Environmental) from Carleton University in 2007 and achieved professional status in 2012.

Colleen joined Kollaard Associates Inc. in 2007 and has worked on numerous environmental and hydrogeological projects since that time. Colleen is fully trained in carrying out and analyzing pumping tests, and field and lab based testing to determine soil and aquifer properties, such as hydraulic conductivity, transmissivity and groundwater flow directions/gradients, as these apply to contaminant transport and migration, coordinating and conducting environmental site assessments, environmental remediation, and storage tank assessment and removal.

Re: ENVIRONMENTAL SEARCH REQUEST  
370 CAMBRIDGE STREET NORTH  
CITY OF OTTAWA, ONTARIO

Dear Sir/Madam:

Kollaard Associates Inc. was retained by 2250276 Ontario Inc. to carry out a Phase I ESA for the above noted site. Kollaard Associates Inc. hereby requests that the City of Ottawa conduct a search of all environmental databases, including the Historical Land Use Inventory ("HLUI"). Kollaard Associates Inc. is interested in any information pertaining to the environmental condition of the property and adjoining areas including, but not limited to past environmental reports, orders, violations of environmental statutes, regulations or by-laws, certificates, approvals, permits and any other environmental information.

Please find attached the consent letter, HLUI disclaimer form, and the Request for Information form. We thank you for your cooperation in this matter and look forward to your reply.

If you should require further information, please do not hesitate to contact the requestor at [dean@kollaard.ca](mailto:dean@kollaard.ca) or by telephone at (613) 860-0923, Ext 225.

Sincerely,  
KOLLAARD ASSOCIATES, INC.

Re: Consent to Disclose Information  
370 Cambridge Street North  
City of Ottawa, Ontario

Dear Sir/Madam,

We have been retained to perform a Phase I Environmental Site Assessment (ESA) for the above noted property located within the City of Ottawa, Ontario.

We are requesting consent from you, the owner of 370 Cambridge Street North for the City of Ottawa to disclose information for the purpose of the Phase I Environmental Site Assessment. This will authorize the City of Ottawa to release any relevant information about the property to the requester.

To provide consent, please sign and date the following.

  
\_\_\_\_\_  
Owner/Representative Signature  
(2250276 Ontario Inc.)

  
\_\_\_\_\_  
Date

  
\_\_\_\_\_  
Owner/Representative Name (Please Print)  
(2250276 Ontario Inc.)

Thank you for your assistance regarding this matter.

Sincerely,  
KOLLAARD ASSOCIATES, INC.

## Application Form

### Notice of Public Record

All information and materials required in support of your application shall be made available to the public, as indicated by Section 1.0.1 of *The Planning Act*, R.S.O. 1990, C.P.13.

### Municipal Freedom of Information and Protection Act

Personal information on this form is collected under the authority the *Planning Act*, RSO 1990, c. P. 13 and will be used to process this application. Questions about this collection may be directed by mail to Manager, Business Support Services, Planning Infrastructure and Economic Development Department, 110 Laurier Avenue West, Ottawa, K1P 1J1, or by phone at (613) 580-2424, ext. 24075

### Background Information

\*Site Address or Location:

370 Cambridge Street North, Ottawa, Ontario

\* Mandatory Field

### Applicant/Agent Information:

Name:

KOLLAARD ASSOCIATES INC. (Dean Tataryn)

Mailing Address:

210 Prescott Street, Kemptville, Ontario

Telephone:

6138600923

Email Address:

dean@kollaard.ca

### Registered Property Owner Information:

Same as above

Name:

2250276 Ontario Inc.

Mailing Address:

7 Charnwood Court, Nepean, Ontario

Telephone:

613-291-4119

Email Address:

dinis.cabral@rogers.com

### Site Details

Legal Description and PIN:

Part 1, Plan 33, Lot 15

What is the land currently used for?

Residential

Lot frontage:  m Lot depth:  m Lot area: \_\_\_\_\_ m<sup>2</sup>

OR Lot area: (irregular lot)  m<sup>2</sup>

Does the site have Full Municipal Services:  Yes  No

### Required Fees

Please don't hesitate to visit the [Historic Land Use Inventory website](#) more information. Fees must be paid in full at the time of application submission.

Planning Fee

\$128.00

### Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Infrastructure and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

**Disclaimer**  
**For use with HLUI Database**

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Kollaard Associates Inc. ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

## Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.
