- Appendix B – Current Proposed Design Concept Plan
- Appendix C – Environmental Chain of Title prepared by READ Abstracts Limited
- Appendix D – Environmental Risk Information Systems (ERIS) database Search
- Appendix E – Ministry of Environment, Conservation and Parks Freedom of Information (FOI) Request
- Appendix F – Technical Standards and Safety Association Correspondence
- Appendix G – City of Ottawa Historic Land Use Inventory (HLUI)
- Appendix H – Aerial Photographs
- Appendix I – Topographic Map
- Appendix J – Photographic Log
- Appendix K – Qualifications of Assessors

# 1. Executive Summary

---

Lopers & Associates (Lopers) was retained by 11034936 Canada Inc. (Brigil) to complete a Phase One Environmental Site Assessment (Phase One ESA) of the commercial property with Civic address No. 2946-2948 Baseline Road, Ottawa, Ontario ("Phase One Property", "Property" or "Site").

This Phase One ESA is being completed as part of due diligence requirements associated with the submission and filing of a record of site condition (RSC) for the Property, required as part of a change in land use to a more sensitive use. This report is also intended to be used for a Development Application to the City of Ottawa Municipal Planning Department to support Site redevelopment.

The Phase One Property was undeveloped prior to 1960 when a suspected quarry/aggregate pit began operation at the Phase One Property. The Phase One Property remained undeveloped until approximately 1976, at which time a commercial plaza building was constructed at the Property; this commercial plaza has remained in operation until present. Brigil purchased the Property in 2014 and has leased the building for operation as a commercial plaza since that time.

The Property is currently used for commercial purposes, and it is understood that the intended future use is for residential purposes, with commercial use on the ground floor and two levels of underground parking. The Phase One Property is immediately surrounded by a municipal Right-of-Way to the north followed by residential properties and Graham Creek flowing northwest, by a municipal Right-of-Way to the west followed by residential properties and Parkland, to the east by a residential property (also owned by Brigil), which is under construction for residential purposes and to the south by residential properties.

No Potentially Contaminating Activities were identified at the Phase One Property. Five PCAs were identified at neighbouring properties in the Phase One Study Area and are summarized in Table 1 below and Figure 3.

**Table 1: Potentially Contaminating Activities in the Phase One Study Area**

PCA Report Reference No.	Potentially Contaminating Activity	Location
1	Former Fuel Storage Tanks and Service Garage (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)  (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	2940 Baseline Road (Residential redevelopment Property) – adjacent to the east of the Phase One Property. This property has been remediated and is in the process of residential development and RSC submission.
2	Former Contractor’s Yard with Fuel Storage Tanks and reported historical Fuel Spill (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)  (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	2930-2934 Baseline Road (Commercial redevelopment Property) – approximately 55 m to the east of the Phase One Property. This property has been redeveloped with commercial office towers.
3	Reported Historical Fuel Oil Spill (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	Baseline Road and Monterey Drive intersection approximately 170 m northeast of the Phase One Property.
4	Former Rail Line and Spur Line (O.Reg. PCA Item 46: Rail Yards, Tracks and Spurs)	Rail line located approximately 150 m south and former spur line located approximate 110 m southeast.
5	Reported Historical Spill (O.Reg. 153/04 PCA Item: Not Applicable)	142 Valley Stream Drive, approximately 80 m south.

Based on the location and orientation of the PCAs identified as part of this Phase One ESA, they are not considered to represent APECs for the Phase One Property. A Phase Two Environmental Site Assessment is not required for the Phase One Property. No further investigation is considered warranted at this time.

## 2. Introduction

---

Lopers & Associates (Lopers) was retained by 11034936 Canada Inc. (Brigil) to complete a Phase One Environmental Site Assessment (Phase One ESA) of the Commercial Property with Civic address Nos. 2946-2948 Baseline Road, Ottawa, Ontario ("Site" or "Phase One Property").

The Phase One Property is legally described as Parts 1 to 5 and Part on Registered Plan 4R-32579, Part of Lot 35, Concession 3 (Rideau Front), Township of Nepean, now in the City of Ottawa and has a property identifier number of 04694-1075, as obtained from a Legal Survey completed by Annis, O'Sullivan, Vollebakk Ltd., on January 20, 2020, provided by Brigil; a copy of the Legal Survey is presented in Appendix A.

Based on approximate dimensions obtained from the City of Ottawa's GIS mapping software, the Phase One Property has an approximate area of 11,900 m<sup>2</sup> (1.19 Hectares) and a zoning designation of GM [2138] S325, which signifies a general mixed use zone. The approximate elevation of the Phase One Property as indicated on a Topographical Survey and confirmed through City of Ottawa mapping and Google Earth is between approximately 76 to 81 m above mean sea level (m AMSL). The approximate centre of the Phase One Property has Latitude and Longitude coordinates of 45° 20' 06" N and 75° 47' 58" W and Universal Transverse Mercator (UTM) coordinates of 437363 m E and 5020468 m N.

The Phase One Property is currently owned by 11034936 Canada Inc., a subsidiary company of Brigil Construction ("Brigil"). It is Lopers' understanding that Brigil has proposed the concept for redevelopment of the Phase One Property for mixed use (commercial and residential purposes), including the current concept for construction of three multi-storey buildings, with subgrade parking, commercial ground floors and residential units above. A copy of an artist's rendering of the current Site development design concept plan, as provided by Brigil, is presented in Appendix B.

This Phase One ESA was commissioned by Mr. Jean-Luc Rivard, Director of Land Development and Infrastructure for Brigil Construction (Brigil), operating as 11034936 Canada Inc. Brigil has a business address of 98 Rue Lois, Gatineau, Quebec, J8Y 3R7 and a business telephone number of 819-243-7392.

### 3. Scope of Investigation

---

This Phase One ESA has been completed as per the details of scope presented in Lopers' Letter entitled "Proposal for Phase One Environmental Site Assessment, Proposed Residential Re-development, 2946-2948 Baseline Road, Ottawa, ON", dated July 20, 2021, reference No. PRO-016-21-BRIGIL.

The Phase One ESA has been prepared in accordance with the technical requirements and formatting guidance as presented by the Ministry of Environment, Conservation and Parks (MECP) in Ontario Regulation (O.Reg.)153/04, as amended March 19, 2021. This format is based on the provincial regulation for brownfields redevelopment and has been adopted as a standard by the City of Ottawa for development applications.

The scope of work for the Phase One ESA involved the following components:

- Historical Research (Review of available historical reports, public environmental databases, Fire Insurance Plans (FIPs), City Directories, Aerial Photographs, geological mapping and any other relevant environmental records which were readily accessible at the time of the Phase One ESA);
- Requests for Information from the MECP Freedom of Information (FOI), Technical Standards and Safety Authority (TSSA), and City of Ottawa Historical Land Use Inventory (HLUI);
- Review of subcontracted research of environmental databases through Environmental Risk Information Services (ERIS);
- Property Title Search (subcontracted through READ Abstracts Limited and reviewed herein)
- Physical Site inspection
- Interviews with persons knowledgeable about the Property and past uses
- Interpretation of findings
- Preparation of a Phase One ESA report

The specific objectives of the Phase One ESA are to:

- Provide an overview of the Phase One Environmental Site Assessment conducted with respect to the Phase One Property.
- Provide an environmental record of the Phase One Property, in a manner that can be assessed, tested and reconstructed, to document and demonstrate:
  - How the objectives of the Phase One ESA were achieved and how the requirements for the objectives were met;
  - Whether further investigation is required to submit a Record of Site Condition (RSC) for filing;
  - Whether there exists an adequate basis for further investigation; and,
  - The basis for required certifications.

## 4. Records Review

---

### a) General

#### i. Phase One Study Area

The Phase One Study Area includes the Phase One Property and properties having any boundaries within 250 m of the Phase One Property limits. Based on a review of the Phase One Property and properties in the Phase One Study Area, their associated historical and/or current uses and operations and physical characteristics of the Phase One Study Area, it was determined that an assessment of properties within 250 m of the Phase One property was sufficient to meet the objectives of the scope of this investigation for a Phase One ESA.

#### ii. First Developed Use Determination

A land title search was completed by READ Abstracts Limited for a larger parcel of land which is owned by Brigil and includes the Phase One Property. The title search indicates that the Phase One Property was owned by individuals since at least 1864 until 1960 when ownership of the Property was temporarily transferred to Craig Construction Equipment Limited. The Property was transferred to 315743 Ontario Inc. in 1976, who subsequently registered 5 commercial leases starting in 1976.

Aerial photographs reviewed from 1951 and 1965 show that the Phase One Property use was agricultural or was undeveloped. The 1976 aerial photograph appears to show initial development of the Phase One Property with the present-day building on the central portion of the Property.

Based on the information reviewed as part of this Phase One ESA, specifically the reference to the title search and aerial photographs, the first developed use of the Phase One Property is considered to be 1976.

#### iii. Fire Insurance Plans

Fire insurance plans (FIPs) were reviewed where available, for the City of Ottawa as part of this Phase One ESA.

There was no coverage in the FIPs for the Phase One Property or for properties located in the Phase One Study Area as part of available FIPs.

#### iv. Chain of Title

A chronological chain of title was prepared by READ Abstracts Limited for a larger parcel of land which is owned by Brigil and includes the Phase One Property. The chain of title provides the names of historical owners, lessees and dates of ownership for the Phase One Property dating back to 1864 to 2013, when the Property had been transferred to present-day ownership. The

legal description as obtained from the Chain of Title was Part of Lot 35, Concession 3, Rideau Front, and Part of the Road Allowance between Concession 2 (Ottawa Front) and Concession 3 (Rideau Front), Nepean, with property identifier numbers of 04694-0048 and 04694-0570. Parcel register records provided by legal representatives of Brigil indicate a revised property identifier number for the Phase One Property as 04694-1075, which is consistent with the P.I.N. obtained from the legal survey plan.

Based on additional historical research completed as part of this Phase One ESA and a review of the chain of title, the Phase One Property was agricultural with no developed use prior to 1976. A chain of title ownership summary was prepared dating back to 1864 and is presented in Table 2 below. A copy of the Chain of Title for the Phase One Property, as prepared by READ Abstracts Limited for a larger parcel of land which is owned by Brigil and includes the Phase One Property is provided in Appendix C. The aforementioned parcel register is also provided in Appendix C.

**Table 2: Chain of Title Ownership Summary**

Year(s)	Phase One Property Ownership
<b>Part of Lot 23, Concession JG</b>	
Prior to 1864	Thomas Stapleton, James & John Bearman
1864	Phillip Stapleton, Thomas E. Bearman
1864 to 1872	John S. Stapleton, Thomas E. Bearman
1872 to 1882	John S. Stapleton, Edward Watson
1882 to 1902	Thomas Graham, Edward Watson
1902 to 1910	Thomas Graham, John A. Graham
1910 to 1920	John A. Graham
1920 to 1952	Adam H. Acres
1952 to 1960	Reginald A.S. Bruce
1960 to 1965	Craig Construction Equipment Limited
1965 to 1966	Reginald A.S. Bruce
1966 to 1972	M. Loeb Limited
1972 to 1976	John B. Ebbs, in trust
1976 to 2011	315743 Ontario Limited
2011 to 2014	6967230 Canada Inc.
August 11, 2014 to Present	6881530 Canada Inc.

Five commercial leases were registered at the Phase One Property including:

- CR696114 – September 13, 1976 – Gergo Fabrics Ltd.

- CR696134 – September 13, 1976 – Sun Life Assurance Company of Canada
- NS11413 – April 27, 1978 – Scene Diversified Products Corp.
- N359462 – October 10, 1986 – Larny Holdings Limited
- OC826316 – February 21, 2008 – Appletree Medical Group Inc.

There were no potentially Contaminating Activities (PCAs) known to be associated with the past ownership of the Phase One Property, based on the chain of title ownership or lessee summary. No Areas of Potential Environmental Concern (APECs) were identified for the Phase One Property based on the Chain of Title research.

v. Environmental Reports

Brigil provided the following four reports for review as part of this Phase One ESA:

1. "Phase I - Environmental Site Assessment, Commercial Property, 2946-2948 Baseline Road, Ottawa, Ontario", dated December 1, 2010, completed by Paterson Group Inc. for Brigil Platinum.
2. "Phase I Environmental Site Assessment, 2946-2948 Baseline Road, Ottawa, Ontario", dated January 17, 2013, completed by exp Services Inc. for 6967230 Canada Incorporated.
3. "Environmental Soil Investigation, Proposed Development, 2940, 2946 & 2948 Baseline Road, Ottawa, Ontario" prepared by SPL Consultants Limited, dated June, 2013 for 3223701 Canada Inc.
4. "Phase One Environmental Site Assessment, 2940 and 2946-2948 Baseline Road, Ottawa, Ontario", dated May 5, 2014, completed by Inspec-Sol Inc. for 3223701 Canada Inc.

It should be noted that the aforementioned reports, with reference numbers 1. and 4., were written, supervised and/or reviewed by the author of this report, Mr. Luke Lopers, P.Eng.

Extensive ESAs, field investigation/environmental remediation was also directed and/or supervised by Mr. Luke Lopers, P.Eng. which further investigated and documented environmental soil quality at the adjacent property (2940 Baseline Road) to the east of Phase One Property, which is also owned (and in the process of residential re-development) by Brigil. These field investigation/environmental remediation programs did not identify any APECs associated with the Phase One Property. The historical ESAs/environmental remediation programs at the adjacent property, which were also supervised by Mr. Lopers, included:

- a) "Environmental Site Remediation Program, Industrial Property, 2940 Baseline Road, Ottawa, Ontario", dated December 23, 2009, completed by Paterson Group Inc. for R.M. Gardiner Construction Ltd.
- b) "Phase Two Environmental Site Assessment, 2940 and 2946-2948 Baseline Road, Ottawa, Ontario", dated December 17, 2014, completed by Inspec-Sol Inc. for 3223701 Canada Inc.

- c) "Phase I Environmental Site Assessment, 2940 Baseline Road, Ottawa, Ontario", dated May 11, 2018, completed by GHD Limited for 6382924 Canada Inc.
- d) "Environmental Remediation Program, 2940 Baseline Road, Ottawa, Ontario", dated January 31, 2022, completed by Lopers & Associates for 3223701 Canada Inc.

The relevant findings from these reports have been included throughout this report.

### **2010 Phase I Environmental Site Assessment by Paterson (2010 Paterson Phase I ESA)**

The 2010 Paterson Phase I ESA stated that the commercial building at the Phase One Property (addressed 2946-2948 Baseline Road) was constructed prior to 1978 and has been occupied for commercial purposes since construction. The historical research identified a small scale sand pit operation on the south portion of the Site and adjacent property to the east in the 1960's. The adjacent property to the east of the Phase One Property was identified as a vacant equipment rental property, however, given previous remedial and exploratory investigations completed by Paterson on this adjacent property, the report stated it was not suspected to have impacted the subject Property (west portion of the Site) and a Phase II ESA was not recommended for this Property.

- Lopers notes that an environmental remediation program and confirmation of remediation sampling has been completed at the adjacent property to the east and that Lopers is in the process of completing the required documentation for submission of a Record of Site Condition (RSC) at this property. The presence of contamination was not encountered near the Phase One Property limits during the environmental remediation excavations at the adjacent property to the east.

### **2013 Phase I Environmental Site Assessment by Exp (2013 Exp Phase I ESA)**

The 2013 Exp Phase I ESA stated that the commercial building at the Phase One Property (addressed 2946-2948 Baseline Road) was constructed in 1977 and has been occupied for commercial purposes since construction. The 2013 Exp Phase I ESA stated that the Phase One Property had been vacant (undeveloped) land prior to this development. The 2013 Exp Phase I ESA did not recommend a Phase II ESA be completed at the Property.

- Lopers notes that upon review of the chain of title for the Phase One Property, there were records of commercial leases at the Property in 1976. Lopers has interpreted that the commercial building was constructed in 1976.

### **2013 Environmental Soil Investigation by SPL (2013 SPL ESI)**

SPL completed environmental sampling at the time of a concurrent geotechnical investigation north of the commercial plaza at the Phase One Property, and the adjacent former industrial lands adjacent to the east of the Phase One Property at the Property. SPL drilled 10 boreholes as part of the geotechnical investigation, three of which were drilled at the Phase One Property, at the time of the 2013 SPL ESI. There were no visual or olfactory observations of suspected soil

contamination from the soil samples collected from the 3 on-Site boreholes and none of the soil samples from these boreholes were submitted for laboratory analysis. SPL submitted six samples for laboratory analysis of PHCs, VOCs, metals and PAHs from the adjacent property to the east. All of the analytical results for samples collected at the adjacent property to the east were in compliance with the O.Reg. 153/04 Table 2 and Table 3 criteria.

**2014 Phase One Environmental Site Assessment by Inspec-Sol (2014 Inspec-Sol Phase One ESA)**

Inspec-Sol completed the 2014 Phase One ESA at the Phase One Property and the adjacent former industrial lands to the east (lands also owned by Brigil). The 2014 Phase One ESA was required as due diligence requirements to accompany a submission of an application for redevelopment of the adjacent lands to the City of Ottawa.

The Phase One Property was occupied by a commercial plaza at the time of the Inspec-Sol Phase One ESA. It was reported that there has been continuous commercial tenancy of the Phase One Property since development.

There were no PCAs identified at the Phase One Property. There were several PCAs identified at neighbouring properties in the Phase One Study Area, however, there were no APECs identified for the Phase One Property. The PCAs identified at properties in the Phase One Study Area from the 2014 Inspec-Sol Phase One ESA were as follows:

1. Private Fuel Dispensing, associated UST and AST, Service Garage, historical contaminated soil at the adjacent property to the east – PCA #1 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks O.Reg. 153/04 PCA: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems.
2. A UST at the property 55 m to the east – PCA #2 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
3. A historical oil spill near the Baseline Road and Monterey Drive intersection, 170 m northeast of the Property – PCA #3 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
4. A rail line, approximately 150 m south of the Property – PCA #4 associated with O.Reg. PCA: Rail Yards, Tracks and Spurs.
5. A historical transformer oil spill at 142 Valley Stream Drive, approximately 80 m south of the Property – PCA #5.

A Phase Two ESA was not recommended at the Phase One Property.

b) Environmental Source Information

A review of the readily available environmental source information records was completed as part of this Phase One ESA.

As part of environmental source information review, a review of a recently completed Environmental Risk Information Systems (ERIS), who completed a search of their records of environmental data bases at the Site, was conducted. The pertinent search results to this Phase One ESA are presented in the following subsections. A copy of the ERIS database search dated January 14, 2022 is included as Appendix D.

### **National Pollutant Release Inventory**

The National Pollutant Release Inventory (NPRI) is a database maintained by Environment and Climate Change Canada (ECCC). Reporting of releases of pollutants into the natural environment are reported annually by corporations and/or their representatives and posted for public record by ECCC. Presently, data is available and posted for the years 1993 through 2017. No records were identified within 250 m of the Phase One Property during a review of the posted NPRI data on the ECCC electronic website on January 21, 2022 and the results were confirmed through a recently completed ERIS search, January 14, 2022.

### **Polychlorinated Biphenyl (PCB) Inventories**

The MECP, formerly known as the Ministry of Environment and Energy, published the "Ontario Inventory of PCB Storage Sites". The inventory documented the company information, physical address, number of tonnes of liquid PCBs by region. No records were identified within 250 m of the Phase One Property during a review this document and the results were confirmed through a recently completed ERIS search, dated January 14, 2022.

The ERIS search also reviewed the National PCB Inventory, which details in use PCB containing equipment in federal, provincial and private facilities; this database was last updated in 2008. No records were identified at the Phase One Property during a review this database.

### **Environmental Instruments**

Environmental Instruments, such as Environmental Compliance Approvals (ECAs), Certificates of Approval (CAs), Environmental Activity and Sector Registry (EASR), Environmental Registry (EBR), Permits to Take Water (PTTWs), Risk Management Plans (RMPs), and Certificates of Property Use (CPUs) are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of any such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA; however, a response was not received in the timeframe permitted as part of this mandate; a copy of the FOI request is included as Appendix D. The ERIS search did not identify any records of environmental instruments at the Phase One Property, however, four records were identified of environmental instruments at the Phase One Property, including an EASR and an EBR listing. The EASR and EBR records were issued to Foxy Recycle Inc. in 2014 and 2015, for a waste management system and waste processing at 2940 Baseline Road, adjacent to the east of the Property. The activities

associated with these records pertain to an electronics waste processing facility. A PTTW and ECA were issued to 10467103 Canada Inc. and 3223701 Canada Inc. (subsidiary companies of Brigid) for dewatering in 2018 and for municipal sewage works in 2020, respectively, and were associated with the redevelopment at 2940 Baseline Road. The aforementioned records are not related to PCAs and do not represent APECs for the Phase One Property.

### **Inventory of Coal Gasification Plants**

The document "Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, Volume II", produced by Intera Technologies Ltd. for the Ontario Ministry of the Environment, dated July 1988 was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document and the results were confirmed through a recently completed subcontracted ERIS search, dated January 14, 2022.

### **Environmental Records of Incidents, Orders, Offences, Spills, Discharges of Contaminants or Inspections maintained by the Ministry**

Environmental records of incidents, orders, offences, spills, discharges of contaminants or inspections are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA; however, a response was not received in the timeframe permitted as part of this mandate; a copy of the FOI request is included as Appendix E. The ERIS search did not identify any environmental records at the Phase One Property.

Historical environmental records presented in previous environmental reports identified the following discharge of contaminants at a property in the Phase One Study Area.

At the time of construction (1988) at the property addressed as 2932 Baseline Road, located approximately 55 m east of the Property, Terez Corp. discovered inactive USTs and it was suspected that fuel had been historically released from these USTs. The records reported that an unknown volume of fuel product had been released from these USTs. It is suspected that these waste registrations were associated with the former contractor's garage and work yard, which was historically present at this neighbouring property, approximately 55 m to the east. The presence of a UST at the neighbouring property represents PCA #2 and is associated with the O.Reg. 153/04 PCA: "Gasoline and Associated Products Storage in Fixed Tanks" (PCA #3). This PCA #2 is not considered to represent an APEC for the Phase One Property based on its distance and orientation with respect to the Phase One Property.

Three spills interpreted as PCAs were identified at properties in the Phase One Study Area during the review of the ERIS search. These included:

- A historical fuel spill at 2936 Baseline Road, approximately 55 m east of the Property – PCA #2.
- A historical oil spill near the Baseline Road and Monterey Drive intersection, 170 m northeast of the Property – PCA #3 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
- A historical transformer oil spill at 142 Valley Stream Drive, approximately 80 m south of the Property – PCA #5.

The PCAs identified at properties in the Phase One Study Area (PCAs #2, #3 and #5) are not considered to represent APECs for the Property based on their distances and/or orientation with respect to the Phase One Property.

### **Waste Management Records**

Waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA, however, a response was not received in the timeframe permitted as part of this mandate; a copy of the FOI request is included as Appendix E. The ERIS search identified 22 records of environmental waste generators at the Phase One Property.

- Huber & Suhner Canada, identified at the Phase One Property (2948 Baseline Road), was listed as a generator of Inorganic Laboratory Chemicals, Polymeric Resins and Organic Laboratory Chemicals from 2000 to 2004.
- HMA Pharmacy Limited, identified at the Phase One Property (2948 Baseline Road), was listed as a generator of Pharmaceuticals and Pathological Wastes in 2005, 2006, 2009 and 2010.
- Appletree Corporate Services Inc., identified at the Phase One Property (2948 Baseline Road), was listed as a generator of Pharmaceuticals and Pathological Wastes from 2006 to 2021.
- LifeLabs LP, identified at the Phase One Property (2948 Baseline Road), was listed as a generator of Pathological Wastes from 2013 to 2015.
- 6881530 Canada Inc. (real Estate Property Managers), identified at the Phase One Property (2946-2948 Baseline Road), was listed as a generator of Oil Skimmings & Sludges and Waste Oils & Lubricants in 2015.

- It is suspected that this waste generator registration pertains to activities at another property which was managed by 6881530 Canada Inc. and not to operations at the Phase One Property.

None of the waste generators registered at the Phase One Property are interpreted to be associated with PCAs and none are expected to contribute to an APEC at the Property.

The ERIS search identified 37 additional records of environmental waste generators at neighbouring properties in the Phase One Study Area. Among these waste generators, two neighbouring properties had records interpreted to be associated with PCAs. The following waste generator registrations were observed within 250 m of the Phase One Property and are considered to be associated with PCAs:

- Battlefield Equipment Rentals, identified at 2940 Baseline Road, located adjacent to the east of the Property, was listed as a generator of Petroleum Distillates and Waste Oils & Lubricants from 1999 to 2001.
- Toromont Industries Ltd., identified at 2940 Baseline Road, located adjacent to the east of the Property, was listed as a generator of Petroleum Distillates, Alkaline Wastes – Heavy Metals, Aliphatic Solvents and Waste Oils & Lubricants from 2002 to 2009.
- Craig Ltd., identified at 2940 Baseline Road, located adjacent to the east of the Property, was listed as a generator of Waste Oils & Lubricants from 1999 to 2000.
  - It is suspected that these waste registrations were associated with the former contractor's garage and work yard, which was historically present at the adjacent property to the east. The presence of contractor operations, equipment maintenance, service and repair and fuel storage are suspected to have been associated with the PCAs of "Gasoline and Associated Products Storage in Fixed Tanks" and "Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems" (PCA #1). Given that this adjacent property to the east has been remediated (as supervised by Lopers) and is under construction with multi-storey residential buildings with multiple levels of underground parking, these PCA #1 is not considered to represent an APEC for the Phase One Property.
- Foxy Recycle Inc., identified at 2940 Baseline Road, located adjacent to the east of the Property, was listed as a generator of Aliphatic Solvents and Other Specified Inorganics from 2012 to 2015. Electronic Distributors International Inc., identified at the 2940 Baseline Road, was listed as a generator of Aliphatic Solvents and Other Specified Inorganics from 2016 to at least 2017.
  - It is suspected that these waste registrations were associated with the former waste electronics collection, processing and storage operations, which were historically present at the Phase One Property.

- Standard Life/Manulife, identified at 2936 Baseline Road, located approximately 55 m east of the Property, was listed as a generator of Oil Skimmings & Sludges in 2009 to 2021.
- Eds Canada, which was identified at 2934 Baseline Road, located approximately 55 m east of the Property, was listed as a generator of Oil Skimmings & Sludges from 2003 to 2006.
- SNC Lavalin O & M, which was identified at 2934 Baseline Road, located approximately 55 m east of the Property, was registered as a waste generator of metals, oil skimming's, waste oil/lubricants, and petroleum-based sludges.
  - It is suspected that these waste registrations were associated with potential fuel storage, associated with the PCAs of "Gasoline and Associated Products Storage in Fixed Tanks" (PCA #2). Given the separation distance of this property with respect to the Phase One Property, this PCA #2 is not considered to represent APECs for the Phase One Property.

The locations of these PCAs are depicted on Figure 3: Surrounding Land Use and are summarized in Table 6 in Section 7. (b).

### **MECP Property Specific Reports**

Reports submitted to the Ministry related to environmental conditions are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA; however, a response was not received in the timeframe permitted as part of this mandate; a copy of the FOI request is included as Appendix E. The ERIS search did not identify any records of environmental reports at the Phase One Property.

### **Technical Standards and Safety Authority**

Records of retail fuel storage tanks, retail fuel outlets, spills, releases, and other associated information is maintained by the Technical Standards and Safety Authority (TSSA). These records can be obtained through electronic communications with the TSSA. The subcontracted ERIS search also confirms the filing of such records associated with properties.

The TSSA was contacted by email to complete a search of available records associated with the current property address, the known former property address of the former retail fuel outlet and addresses of surrounding properties with historical environmental listings (based on other historical research). The TSSA response, received on January 18, 2022, did not identify the presence of any fuel storage tanks at the Phase One Property or immediately adjacent properties. The TSSA response did indicate the presence of an expired (former) fuel storage

cylinder exchange; it is inferred that this record pertains to propane cylinder storage and exchange, which does not represent a PCA. A copy of the TSSA response is included as Appendix F.

The subcontracted ERIS search did not identify any records of private and retail fuel storage tanks or historic incidents in the Phase One Study Area.

### **Registry Filings**

Records of notices and instruments, including records of site condition (RSC), which have been posted in the environmental registry, are maintained by the MECP. These records can be reviewed electronically on the MECP Environmental Site Registry (ESR) website. The subcontracted ERIS search also confirms the filing of such records associated with properties. The website was reviewed for RSCs filed at the Phase One Property and in the Phase One Study Area; no RSCs have been filed for the Phase One Property or for any properties in the Phase One Study Area.

- Lopers notes that an environmental remediation program has been completed at the adjacent property to the east and that Lopers is in the process of completing the required sampling and documentation for submission of a Record of Site Condition (RSC) at this property. The presence of contamination was not encountered near the Phase One Property limits during the environmental remediation excavations at the adjacent property to the east.

### **Areas of Natural and Scientific Interest**

Records of areas of natural and scientific interest (ANSIs) formerly referred to as areas of natural significance, are maintained by the Ministry of Natural Resources and Forestry (MNRF), and are available for review on the Ontario GeoHub website. The website was reviewed on January 21, 2022 for records of ANSIs in the Phase One Study Area. There were no ANSIs identified within 250 m of the Phase One Property.

### **Current and Historical Landfills**

Records of historical and operating landfills is maintained by the MECP. The document "Waste Disposal Site Inventory", produced by the Ontario Ministry of the Environment, dated June 1991 was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document.

The City of Ottawa contracted Golder Associates Ltd. to conduct an inventory and assessment of former waste disposal sites in within the City of Ottawa. The document "Old Landfill Management Strategy, Phase 1 – Identification of Sites, City of Ottawa, Ontario", produced by Golder Associates Ltd., finalized October 2004, was reviewed as part of this Phase One ESA. No records of active or former landfills were identified within 250 m of the Phase One Property during a review of this document.

## City of Ottawa Historical Land Use Inventory

The City of Ottawa's Planning, Infrastructure and Economic Development department was contacted to complete a search of the Historical Land Use Inventory (HLUI) maintained by the City. Through the HLUI response, received on July 20, 2022, Lopers interpreted that there were no activities (of environmental significance) associated with the Phase One Property and there were three neighbouring properties with interpreted environmentally significant 'activities' in the Phase One Study Area, including:

- Battlefield Equipment, R.M. Gardiner Construction, Craig Construction Equipment were identified at 2940 Baseline Road, adjacent to the east of the Phase One Property. This listing was previously identified as PCA #1.
- Allied Building Supplies, Campeau Corporation, an unnamed lumber yard and three USTs were identified at 2930-2934 Baseline Road, approximately 55 m to the east. This listing was previously identified as PCA #2.
- A rail line was identified approximately 150 m south of the Property, with a spur line extending approximately 110 m southeast of the Property. This listing was previously identified as PCA #4.

Additional activities were identified at properties in the HLUI study area; however, these activities were not interpreted to have been associated with PCAs. None of the identified listed 'activities' at neighbouring properties were considered to represent APECs during a review of the HLUI. A copy of the HLUI response letter is included in Appendix G.

### c) Physical Setting Sources

#### i. Aerial Photographs

Aerial Photographs were reviewed for the Phase One Property and Phase One Study Area from available sources as part of the historical review. Aerial photographs were reviewed from historical research previously completed in the Phase One Study Area, Google Earth Aerial Imagery and from the City of Ottawa's geoOttawa GIS tool. Aerial Photographs were reviewed over the period of 1951 through 2019, which depict development at the Phase One Property. A summary of the information gleaned from the aerial photographs is provided below. Copies of the aerial photographs reviewed are provided in Appendix H.

### 1951 Aerial Photograph

The Phase One Property appears to be undeveloped or used for agricultural purposes in the 1951 Aerial Photograph. The present-day Baseline Road Right-of-Way runs along the north limit of the Phase One Property. The Phase One Study Area appears to be used primarily for agricultural purposes, with some rural residential buildings present to the north and northeast of the Phase One Property. A creek is present to the north of Baseline Road and further east of the Property, approximately 100 m north and 80 m east of the Phase One Property.

**1958 Aerial Photograph**

No significant changes appear to have been made to the Phase One Property. The neighbouring property approximately 55 m to the east appears to be partially developed and occupied for commercial/industrial purposes. A railway has been constructed approximately 150 m south of the Property. No other significant changes appear to have been made to the neighbouring properties in the Phase One Study Area. A new segment of the creek observed to the north of Baseline Road and further west of the Property is present approximately 80 m west of the Property; it is suspected the creek was augmented in response to greater overland drainage with development of the Phase One Study Area.

**1965 Aerial Photograph**

There is significant soil disturbance present at the Property, which is suspected to be associated with a former aggregate pit. A small building, suspected to be a former scale-house is present on the northeast portion of the Property. The adjacent property to the east has been developed with an industrial building. Increased industrial development and use is apparent at neighbouring properties further to the east. Residential development is apparent further north of Baseline Road. No other significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

**1976 Aerial Photograph**

Soil disturbance, suspected to be associated with foundation construction of the current Site building is apparent near the centre of the Phase One Property. The properties to the north of Baseline Road have been developed for residential purposes. No other significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

**1982 Aerial Photograph**

The Phase One Property has been developed with the present-day commercial building in the central portion of the Property. Asphalt parking areas are apparent to the north and south of the Site building. No other significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

**1991 Aerial Photograph**

Sandcastle Drive has been constructed to the west of the Phase One Property. The neighbouring properties to south and west of Sandcastle Drive have been developed with the present-day residential dwellings and apartment buildings. The neighbouring property approximately 55 m to the east has been redeveloped with the three present day commercial office buildings and parking garage. Increased residential development is apparent further to the northwest, west, south and east of the Property. No other significant changes appear to

have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

### **1996 Aerial Photograph**

No significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

### **2005 Aerial Photograph**

No significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

### **2011 Aerial Photograph**

No significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

### **2019 Aerial Photograph**

The former industrial building at the property immediately east Phase One Property has been demolished; excavation and shoring activities associated with redevelopment are apparent at this property. No significant changes appear to have been made at the Phase One Property or at the other neighbouring properties in the Phase One Study Area.

A railway line approximately 150 m south, also previously identified, represents PCA #4. The land use associated with this PCA is evident as early as 1958 as observed through historical aerial photographs.

#### ii. Topography, Hydrology, Geology

The Ontario Ministry of Natural Resources and Forestry's (MNR's) Topographic Map GIS website was used to produce a topographic map showing the location of the Phase One Property, nearby water bodies and the regional topography of the Phase One Study Area. A copy of the Topographic Map is provided in Appendix I. The regional topography in the Phase One Study Area generally slopes downward to the north and northeast. The Phase One Property is generally at grade with the neighbouring properties. The nearest surface water body identified on the mapping is Graham Creek, located approximately 150 m north and 80 m west of the Phase One Property, respectively. The Ottawa River is located approximately 2.2 km north of the Phase One Property.

Information on the regional surficial soil was obtained from the Geological Survey of Canada map 1425A titled Surficial Materials and Terrain features Ottawa Hull. Based on a review of the map, the natural soil conditions in the Phase One Study Area consist of "Abandoned River Channel Deposits of silt and silty clay; commonly including lenses of sand and generally underlain at variable depth by unit 3. 7. Stratified, buff, medium grained sand; unfossiliferous; locally reworked into low dunes".

Information on the regional bedrock was obtained from the Ontario Geological Survey Map P2716 titled 'Paleozoic Geology Ottawa Area'. Based on a review of the map, the Phase One Study Area is underlain by bedrock of the Oxford Formation, described as a "sublithographic to fine crystalline dolostone".

Well records and borehole logs, obtained from the MECP Water Well Records database, the subcontracted ERIS search and from historical investigations at the Phase One Property were reviewed. Based on these records, the general stratigraphy of the Phase One Property and Phase One Study Area consists of sand and gravel fill, underlain by silty clay, followed by silty sand and gravel (till). The overburden soil is underlain by interbedded limestone and/or dolostone bedrock, which was encountered at approximately 12 m below ground surface.

### iii. Fill Materials

The Phase One Property was developed circa 1977 with the existing commercial building. It is suspected that grading occurred during initial development resulting in the movement of on-Site materials. No evidence of non-native or deleterious fill material was observed during the subsurface drilling and sampling, completed as part of historical geotechnical investigations. The presence of imported fill material is not suspected at the Phase One Property.

The north and south portions of the Property consists of paved asphalt parking areas. Granular base fill material is expected to have been used as part of construction of the aforementioned features; this fill type is not considered to represent a PCA, as gravel does not meet the definition of soil.

### iv. Water Bodies and Areas of Natural Significance & Ground Water Information

The nearest surface water body identified on the mapping is Graham Creek, located approximately 150 m north and 80 m west of the Phase One Property, respectively. The Ottawa River is located approximately 2.2 km north of the Phase One Property. There were no areas of natural and scientific interest (ANSIs or areas of natural significance) identified in the Phase One Study Area. A wetland was shown approximately 200 m south of the Phase One Property on the mapping.

The Phase One Property and Study Area are not located in the vicinity of any well-head protection areas or other designation identified by the City of Ottawa in its official plan for the protection of ground water. The Phase One Study Area is serviced by municipally treated drinking water. No private or agricultural water supply wells are located within the Phase One Study Area.

### v. Well Records

Well records and borehole logs, obtained from the MECP Water Well Records database, the subcontracted ERIS search and from historical investigations at the Phase One Property were reviewed. No monitoring wells or drinking water wells were registered at the Phase One

Property, however, there were several properties in the Phase One Study Area with well registrations.

A former water supply well was historically present within the former industrial building at the adjacent property to the east. This former water supply well was drilled in 1961 and provided water supply for the occupants of the building, however, it had also been reported in 2009 and 2014 that it was not used for drinking water; bottled water was provided for drinking for the building occupants. The former water supply well was abandoned by a licensed well driller in accordance with O.Reg. 903, in 2019.

Monitoring well clusters (a total of 6 monitoring wells clusters) are located in the Phase One Study Area. Based on these records, the general stratigraphy of the Phase One Property and Phase One Study Area consists of sand and gravel fill, underlain by silty clay, underlain by sand and gravel. The approximate depth to bedrock is expected to range from 10 to 12 m below ground surface (m BGS), with a groundwater table at approximately 2 to 3 m BGS.

Three historic potable water supply wells were identified in the Phase One Study Area during a review of the MECP Water Well Records database, however, these wells were drilled in the 1950s and were located at properties that have since been redeveloped. Additionally, the Phase One Study Area is provided with municipally treated non-potable water and as such it is not suspected that these wells remain in use.

#### d) Site Operating Records

Waste management records are maintained by the individual tenants of the building at the Phase One Property. As previously noted, 22 records of environmental waste generators were identified at the Phase One Property. None of the waste generators registered at the Phase One Property are interpreted to be associated with PCAs and none are expected to contribute to an APEC at the Property. It is also not suspected that any hazardous waste has been generated by the commercial occupants at the Property.

Leasing information on tenants and operations is maintained by Brigil, who stated that the Property has never been used as an automotive garage or as a dry cleaner. None of the operating records are considered to represent PCAs for the Phase One Property.

## 5. Interviews

---

An in-person interview was completed on the day of the Site Investigation (July 6, 2022) with Mr. Philip Thibert, Manager – Land Development and Infrastructure for Brigil Construction. Mr. Thibert has been familiar with the Phase One Property since at least 2019.

Mr. Thibert stated that the Phase One Property had been used for general commercial purposes since the mid 1970's, including the present-day pharmacy, doctors/medical offices and dollar

store, with a general central restaurant unit. Mr. Thibert was not aware of any spills or poor environmental management practices associated with the current and/or former commercial tenants who operated at the Phase One Property since acquisition by Brigil.

Personal interviews were reviewed between historical environmental consultants and former Property representatives as part of the Phase One ESA research. No historical PCAs were reported during the previous Phase One ESA interviews, conducted in 2010 (Mr. David Thompson, Mr. Simon, Paterson), 2013 (Mr. Alain Grandmaison, exp), 2014 (Mr. Eric Legault, Inspec-Sol), and 2018 (Mr. Vincent Denomme, GHD). None of these interviews indicated the potential presence of current and/or former PCAs at the Phase One Property.

As noted throughout the report, the assessor and author of this report, Mr. Luke Lopers, P.Eng., has been familiar with the Phase One Property since 2010 and has extensive knowledge of the Property and the environmental history of the adjacent property to the east. Mr. Lopers has completed and/or supervised various environmental assessments at the Phase One Property and environmental remediation programs at the adjacent property (also under Brigil ownership), including the following investigations:

- 2009 Paterson Group Environmental Site Remediation Program (2940 Baseline Road)
- 2010 Paterson Group Phase I Environmental Site Assessment (2946-2948 Baseline Road)
- 2014 Inspec-Sol Phase One Environmental Site Assessment (2940 & 2946-2948 Baseline Road)
- 2014 Inspec-Sol Phase Two Environmental Site Assessment (2940 & 2946-2948 Baseline Road)
- 2018 GHD Phase I Environmental Site Assessment (2940 Baseline Road)
- 2021 Lopers Environmental Remediation Program (2940 Baseline Road)
- 2022 Lopers Phase One Environmental Site Assessment (2940 Baseline Road)
- 2022 Lopers Phase Two Environmental Site Assessment (2940 Baseline Road)

The interviews did identify the presence of historical PCAs at the adjacent property to the east, however, as previously noted, this adjacent property has been remediated to the residential Site Condition Standards thus no APECs were identified at the Phase One Property. The information gleaned through interviews is consistent with other information sources reviewed as part of this Phase One ESA and information gleaned from the interviews is considered to be valid.

## 6. Site Reconnaissance

---

### a) General Requirements

The Phase One Site Investigation was completed on July 6, 2022 between the hours of 10:00 AM and 1:30 PM. Weather conditions were sunny with an ambient air temperature of approximately 20 degrees Celsius. The Phase One Property was occupied with a two-storey, slab-on-grade

commercial building, at the time of the Site Investigation. The Site Investigation was completed by Mr. Luke Lopers, who is a registered Professional Engineer (Environmental) in the province of Ontario and a Qualified Person (QP) for Environmental Site Assessments, and has been conducting Phase I/One Environmental Site Assessments and environmental reconnaissance since 2006. Mr. Lopers was accompanied by Mr. Philip Thibert, Manager – Land Development and Infrastructure for Brigil Construction (a representative of the Property owner).

Photographs were taken of the exterior of the Phase One Property and on the interior of the building. A copy of the Photographic Log and written descriptions of the photos are provided in Appendix J.

#### b) Specific Observations at Phase One Property

The Phase One Property was occupied with a one- and two-storey, slab-on-grade commercial plaza style building at the time of the Site Investigation. The east portion of the building (2946 Baseline Road) is a single storey structure, while the west portion of the building (2948 Baseline Road) has two storeys. The exterior of this building is finished with brick or precast concrete panels, has a flat tar and gravel roof and steel or glass doors.

The commercial building consists of two commercial addresses with five units on the ground floor, while the second storey of the commercial building consists primarily of office space, generally occupied by medical practitioners. The occupants of the buildings were provided by Brigil and are presented in Table 3 below.

**Table 3: Building Occupants**

Ground Floor	2 <sup>nd</sup> Floor	
<b>2946 Baseline Road</b>	<b>2948 Baseline Road</b>	
Dollarama	201	Dr. Stephen H. Grodinsky / Pediatrician
Bombay Bar & Bistro	202	Dr. James M. McConville / Pediatrician
<b>2948 Baseline Road</b>	203	Achieve Therapy Centre
Appletree Medical Centre	205	Dr. Paul B. Ghattas, M.D. / Family Physician
HMA PharmaChoice Pharmacy	206	Psychotherapy and Counselling Michelle Bentley, Danielle Leduc & Associates
Senses Physiotherapy and Massage Clinic	207	Pearlee Family Dental
	208	Paris Nose, Edward Jones Investments
	209	Wheels for the Wise Inc.
	211	Vacant

No aboveground storage tanks (ASTs) or visual indications of the presence of underground storage tanks (USTs), such as vent and fill pipes or access hatches, were observed as part of the Site Investigation. No historical ASTs and USTs were reported or suspected to have been present at the Property.

No potable water wells were observed at the Phase One Property during the Site Investigation. Two groundwater monitoring wells, associated with a concurrent geotechnical investigation by others at the Property were present on the north and south portions of the Phase One Property; these monitoring wells are suspected to have been installed for geotechnical and/or hydrogeological assessments. The Phase One Property is provided with potable water by the City of Ottawa through an underground connection to the north (Baseline Road).

Underground utility corridors for sanitary and storm sewers, potable water, private electricity and natural gas lines lead to the commercial plaza building, generally from Baseline Road to the north. Underground electrical services are supplied to the commercial buildings through connections on the north and west portions of the Property.

The commercial plaza building is heated with natural gas fired heating, ventilating and air conditioning units; auxiliary supplemental baseboard heaters were also observed in some areas of the building. There were no details regarding former heating and cooling systems, including historical fuel sources for buildings at the Phase One Property, however, given the date of development of the Property, it is suspected that the current building has always been heated and cooled using natural gas or electricity.

There were no significant cracks or stains on the concrete or finished floors of the commercial plaza building. No sumps or basement levels were observed in the building.

The commercial building is connected to the City of Ottawa municipal sanitary sewer system. There were no septic tanks or leaching beds observed at the Phase One Property as part of the Site Investigation.

Approximately 30% of the Phase One Property is developed with the present commercial building, while the majority of the remainder of the Property is surfaced with asphalt. The northern most portion of the Property is surfaced with granular fill and appears to have been recently occupied for staging purposes related to the residential development at the adjacent property to the east; no PCAs, staining or other potential environmental liabilities were observed at this portion of the Property at the time of the Site Inspection.

A railway line was identified approximately 150 m south of the Phase One Property. Based on additional historical research, a historical spur line was historically identified at a former industrial property approximately 120 m southeast of the Phase One Property; this former industrial property has been redeveloped for residential use.

No surficial staining was observed on the asphalt or gravel covered surfaces of the Phase One Property during the Site Investigation. No stressed vegetation was observed.

### c) Land Use Observations of the Phase One Study Area

Properties in the Phase One Study Area were reviewed from publicly accessible Rights-of-Way as part of the Site Investigation on July 6, 2022. Uses of these lands were noted and any potential presence of PCAs was also assessed. Neighbouring land uses were recorded as follows:

**North:** Baseline Road, followed by residential dwellings located on the following municipal rights-of-way: Cowichan Way, Sioux Crescent, Okanagan Drive. A segment of Graham Creek is present approximately 150 m north of the Phase One Property.

**East:** The adjacent property to the east (also under active redevelopment by Brigil), had one residential tower on the north portion, active foundation construction on the central portion and a staging/equipment storage area on the south portion of this property. The property further east (north) is occupied by 3 office towers and a parking garage, while the properties further east (south) are occupied by residential dwellings.

**South:** Neighbouring properties to the south are occupied by residential dwellings (townhouses) located on the following municipal rights-of-way: Sandcastle Drive and Valley-Stream Drive. A railway line is present approximately 150 m to the south.

**West:** Sandcastle Drive, followed by residential dwellings (north), residential apartments (south) and townhouses (southwest) located on the following municipal rights-of-way: Brookhaven Court, Shadow Court, Valley Stream Drive, Okanagan Drive. A segment of Graham Creek is present approximately 80 m west of the Phase One Property, with Parkland to the west and southeast.

Neighbouring land uses are shown on Figure 3: Surrounding Land Use. The rail line, which represents PCA #4, is indicated on Figure 3. The current uses of the neighbouring properties are not considered to represent any APECs for the Phase One Property.

## 7. Review and Evaluation of Information

### a) Current and Past Land Use

The current and past land use of the Phase One Property, dating back to the first developed use, is provided in Table 4 below.

**Table 4: Current and Past Land Use**

Year	Name of Owner	Description of Property Use	Property Use	Other observations from historical sources
1864 - 1960	Individuals	Interpreted to have been agricultural purposes and was undeveloped.	Agricultural or other use	Property owned by individuals. 1951 and 1958 aerial photographs show Property in undeveloped condition.
1960 - 1965	Craig Construction Equipment Limited	Property interpreted to have been used and associated as a commercial aggregate pit.	Industrial and Commercial Use	Title search indicates a construction equipment rental company purchased the Property in 1960. Aerial photograph from 1965 shows the likely presence of scale-house on the northeast portion of the Property and suspected quarry operations to the south.
1965 - 1966	Reginald A.S. Bruce	Property may have continued quarry use or was vacant. No developed uses were observed.	Commercial Use and Industrial Use	Title searches indicate transfers between individuals and holding companies. 1976 aerial photograph does not indicate any development between 1965 and 1976.
1966 - 1972	M. Loeb Limited			
1972 - 1976	John B. Ebbs, in trust			
1976 - 2011	315743 Ontario Limited	Property is developed with the present-day multi-tenant commercial building.	Commercial Use	1976 aerial photograph shows preparation of foundation footprints in the location and orientation of present-day structure. Subsequent aerial photographs from 1982 through 2019 show the property occupied by the current Site building.  Documented through historical environmental reports and Site inspections (2010, 2013, 2014).
2011 - 2014	6967230 Canada Inc.			
2014 - Present	6881530 Canada Inc.			

b) Potentially Contaminating Activity

No Potentially Contaminating Activities were identified at the Phase One Property. Five PCAs were identified at neighbouring properties in the Phase One Study Area and are summarized in Table 5 below.

**Table 5: Potentially Contaminating Activities in the Phase One Study Area**

PCA Report Reference No.	Potentially Contaminating Activity	Location
1	Former Fuel Storage Tanks & Service Garage (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)  (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	2940 Baseline Road (Residential redevelopment Property) – adjacent to the east of the Phase One Property. This property has been remediated and is in the process of residential development and RSC submission.
2	Former Contractor’s Yard with Fuel Storage Tanks (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)  (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	2930-2934 Baseline Road (Commercial redevelopment Property) – approximately 55 m to the east of the Phase One Property. This property has been redeveloped with commercial office towers.
3	Reported Historical Fuel Oil Spill (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	Baseline Road and Monterey Drive intersection approximately 170 m northeast of the Phase One Property.
4	Former Rail Line and Former Spur Line (O.Reg. PCA Item 46: Rail Yards, Tracks and Spurs)	Rail line located approximately 150 m south and former spur line located approximate 110 m southeast.
5	Reported Historical Spill (O.Reg. 153/04 PCA Item: Not Applicable)	142 Valley Stream Drive, approximately 80 m south.

c) Areas of Potential Environmental Concern

Based on the location and orientation of the PCAs identified as part of this Phase One ESA, as well as environmental remediation work completed at neighbouring properties, they are not considered to represent APECs for the Phase One Property. A Phase Two Environmental Site Assessment is not required for the Phase One Property.

d) Phase One Conceptual Site Model

Three Figures are provided to visually depict the Conceptual Site Model. Figure 1: Key Plan shows the location of the Phase One Property within the City of Ottawa. Figure 2: Site Plan is

provided with an overlay of the 2021 aerial imagery, which depicts the operations at the Phase One Property. Figure 3: Surrounding Land Use shows the current uses of properties in the Phase One Study Area, location of PCAs and the location of APECs; this figure is provided with an overlay of the 2021 aerial imagery, which depicts construction activities at the adjacent property to the east and the general use of the Phase One Study Area.

The Phase One Property is located at Civic No. 2946-2948 Baseline Road, Ottawa, Ontario and has an approximate area of 11,900 m<sup>2</sup> (1.19 Hectares).

The Phase One Property was undeveloped prior to 1960 when a suspected quarry/aggregate pit began operation at the Phase One Property. The Phase One Property was undeveloped until approximately 1976, at which time a commercial plaza building was constructed at the Property; this commercial plaza has remained in operation until present. Brigil purchased the Property in 2014 and leased the building for operation as a commercial plaza since that time.

The Property is currently used for commercial purposes, and it is understood that the intended future use is for residential purposes, with commercial use on the ground floor and two levels of underground parking. The Phase One Property is immediately surrounded by a municipal Right-of-Way to the north followed by residential properties and Graham Creek flowing northwest, by a municipal Right-of-Way to west followed by residential properties and Parkland, to the east by a residential property (also owned by Brigil), which is under construction for residential purposes and to the south by residential properties.

The Phase One Study Area includes the Phase One Property and properties with the boundaries within 250 m of the Phase One Property limits. Based on a review of the Phase One Property and properties in the Phase One Study Area, their associated historical and/or current uses and operations and physical characteristics of the Phase One Study Area, it was determined that an assessment of properties within 250 m of the Phase One property was sufficient to meet the objectives of the scope of this investigation for a Phase One ESA.

No areas of natural significance are located at the Phase One Property or in the Phase One Study Area. No drinking water wells are located at the Phase One Property and the Phase One Study Area is serviced by municipally treated non-potable water.

The regional topography in the Phase One Study Area generally slopes downward to the north and northeast. The Phase One Property is generally at grade with the neighbouring properties. The nearest surface water body identified on the mapping is Graham Creek, located approximately 150 m north and 80 m west of the Phase One Property, respectively. The Ottawa River is located approximately 2.2 km north of the Phase One Property.

Well records and borehole logs, obtained from the MECP Water Well Records database, the subcontracted ERIS search and from historical investigations at the Phase One Property were reviewed. Based on these records, the general stratigraphy of the Phase One Property and Phase One Study Area consists of sand and gravel fill, underlain by silty clay, followed by silty

sand and gravel (till). The overburden soil is underlain by interbedded limestone and/or dolostone bedrock, which was encountered at approximately 12 m below ground surface. Groundwater is expected at a depth of approximately 2 to 3 m BGS and flow in a predominantly northwest direction.

No PCAs were identified at the Phase One Property. Five PCAs were identified in the Phase One Study Area, which included: a former private fuel outlet and service garage adjacent to the east, a private fuel outlet and historical spill approximately 55 m east, a historical fuel spill approximately 170 m northeast, a former rail line and spur line, located approximately 150 m south and 110 m southeast, respectively and a historical transformer oil spill located approximately 80 m south. Based on the location and orientation of the PCAs identified as part of this Phase One ESA, as well as environmental remediation work completed at neighbouring properties, the identified PCAs are not considered to represent APECs for the Phase One Property.

Underground utility services are present at the Phase One Property, however, given the locations of the existing utility corridors, they are not suspected to have the potential to affect contaminant distribution and transport, or to create preferential pathways for lateral migration. As noted, the adjacent Property has been subject to extensive remediation and excavation and so it is not suspected that significant migration of contaminants has occurred through underground utility corridors. Additionally, no APECs or contaminants of concern were identified for the Phase One Property as part of the Phase One ESA.

Any uncertainty or absence of information obtained in the components of this Phase One ESA are not expected to affect the validity of the conceptual site model.

## 8. Conclusions

---

- i. Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

No Potentially Contaminating Activities were identified at the Phase One Property.

Five PCAs were identified in the Phase One Study Area, which included: a former private fuel outlet and service garage adjacent to the east, a private fuel outlet and historical spill approximately 55 m east, a historical fuel spill approximately 170 m northeast, a former rail line and spur line, located approximately 150 m south and 110 m southeast, respectively and a historical transformer oil spill located approximately 80 m south.

Based on the location and orientation of the PCAs identified as part of this Phase One ESA, they are not considered to represent APECs for the Phase One Property. A Phase Two Environmental Site Assessment is not required for the Phase One Property. No further investigation is considered warranted at this time.

- ii. Record of Site Condition Based on Phase One Environmental Site Assessment Alone

Given that there were no APECs identified at the Phase One Property, a Phase Two Environmental Site Assessment is not required before a record of site condition (RSC) may be submitted with respect to all or part of the Phase One Property. An RSC may be submitted for residential redevelopment based on the Phase One ESA alone.

- iii. Signatures

The Qualified Person for this study is Mr. Luke Lopers, P. Eng. Mr. Lopers is a Professional Engineer registered in Ontario since 2012 and has been working on environmental site assessments since 2006. Mr. Lopers has been an author, project manager and/or peer reviewer for hundreds of Phase One ESAs and Phase Two ESAs as well as previously filed RSCs

The reviewer for this study is Mr. Don Plenderleith, P.Eng. Mr. Plenderleith is a Professional Engineer registered in Ontario since 1994 and has authored and/or reviewed hundreds of Phase One and Two ESAs in Ontario and the rest of Canada. The qualifications of the assessor/Qualified Person and reviewer are included in Appendix K.

Sincerely,

Luke Lopers, P.Eng., QP<sub>ESA</sub>

Don Plenderleith, P.Eng., QP<sub>ESA</sub>

iv. Limitations

The findings and conclusions of this Phase One ESA are based on the information provided and/or reviewed as part of this study.

This Phase One ESA has been completed with the standard of care generally expected in the industry for a study of this nature.

This Phase One ESA has been prepared for the sole use of 11034936 Canada Inc. for the purposes of a due diligence assessment of the potential liabilities which may exist at the Phase One Property. No other party is permitted to rely on the conclusions or findings of this report without the written consent of Lopers & Associates and 11034936 Canada Inc.

There were no portions of the Phase One Property which were inaccessible, or components of this ESA where insufficient information was available to complete the interpretation.

Changes to the physical setting of the Phase One Property, Phase One Study Area and applicable regulations governing Phase One Environmental Site Assessments have the potential to influence the validity of the conclusions and opinions presented in this Phase One ESA.

### ENVIRONMENTAL SEARCH

March 5, 2013

Inspec-Sol Inc.  
Attn: Luke Lopers

#### BRIEF DESCRIPTION OF LAND:

2940 & 2946-2948 Baseline Road  
Part of Lot 35, Concession 3 Rideau Front, Nepean, and Part of the Road Allowance  
Between Concession 2 OF and Concession 3 RF  
PIN: 04694-0048  
04694-0570

LAST REGISTERED OWNER: 3223701 CANADA INC. (PIN 0570)  
6967320 CANADA INC. (PIN 0048)

#### CHAIN OF TITLE:

Deed RO15099 registered May 12, 1864  
From Thomas Stapleton to Phillip Stapleton

Deed RO22087 registered August 24, 1864  
From James Bearman and John Bearman to Thomas E. Bearman

Deed RO25533 registered September 21, 1864  
From Phillip Stapleton to John S. Stapleton

Deed NP1656 registered November 1872  
From Thomas E. Bearman to Edward Watson

Deed NP7666 registered March 2, 1882  
From John S. Stapleton to Thomas Graham

(There is no Deed registered from Edward Watson to William R. Foster)  
Deed NP19318 registered June 10, 1902  
From Estate of William R. Foster to John A. Graham

Will NP23875 registered October 21, 1910  
From Thomas Graham to John A. Graham

Deed NP33638 registered May 6, 1920  
From John A. Graham to Adam H. Acres

Deed CR298186 registered February 1, 1952  
From Adam H. Acres to Craig Construction Equipment Limited

Deed CR415319 registered November 27, 1960  
From Reginald A.S. Bruce to Craig Construction Equipment Limited

Deed CR502926 registered November 25, 1965  
(For Road Widening, Part of Baseline Road)  
From Craig Construction Equipment Limited to The Corporation of the Township of Nepean

Deed CR504089 registered December 20, 1965  
From Craig Construction Equipment Limited to Reginald A.S. Bruce

Deed CR508396 registered April 15, 1966  
From Reginald A.S. Bruce to M. Loeb Limited

Deed CR556096 registered March 20, 1969  
(Part of Baseline Road)  
From The Corporation of the Township of Nepean to Craig Construction Equipment Limited

Deed CR60938 registered April 26, 1972  
From M. Loeb Limited to John B. Ebbs, in trust

Deed CR684810 registered January 29, 1976  
From John B. Ebbs, in trust to 315743 Ontario Limited

Lease CR696114 registered September 13, 1976  
From 315743 Ontario Limited to Gergo Fabrics Ltd.

Lease CR696134 registered September 13, 1976  
From 315743 Ontario Limited to Sun Life Assurance Company of Canada

Deed NS40980 registered December 29, 1978  
From Craig Construction Equipment Limited to Marion Agnew

Lease NS11413 registered April 27, 1878  
From 315743 Ontario Limited to Scene Diversified Products Corp.

Lease NS58345 registered July 3, 1979  
From Marion Agnew to Craig Construction Equipment Limited

Lease N359462 registered October 10, 1986  
From 315743 Ontario Limited to Larny Holdings Ltd.

Lease OC826316 registered February 21, 2008  
From 315743 Ontario Limited to Appletree Medical Group Inc.

Deed OC1099394 registered April 22, 2010  
From Marion Agnew to 3223701 Canada Inc.

Deed OC1222677 registered April 6, 2011  
From 315743 Ontario Limited to 6967230 Canada Inc.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary

## Property Information:

**Project Property:** *Phase One Environmental Site Assessment  
2946-2948 Baseline Road Ottawa Nepean ON K2H 8T5*

**Project No:**

**Coordinates:**

**Latitude:** 45.3349348  
**Longitude:** -75.7993681  
**UTM Northing:** 5,020,469.27  
**UTM Easting:** 437,365.73  
**UTM Zone:** 18T

**Elevation:** 259 FT  
79.09 M

## Order Information:

# Executive Summary: Summary By Data Source

## **BORE - Borehole**

A search of the BORE database, dated 1875-Jul 2018 has found that there are 3 BORE site(s) within approximately 0.25 kilometers of the project property.

<b><u>Lower Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
	ON	WNW	76.39	<a href="#">4</a>
	ON	NE	207.56	<a href="#">20</a>
	ON	W	215.20	<a href="#">21</a>

## **CA - Certificates of Approval**

A search of the CA database, dated 1985-Oct 30, 2011\* has found that there are 1 CA site(s) within approximately 0.25 kilometers of the project property.

<b><u>Equal/Higher Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Primus Telecommunications Canada Inc.	2934 Baseline Road Building B Ottawa ON	ENE	194.98	<a href="#">18</a>

## **CFOT - Commercial Fuel Oil Tanks**

A search of the CFOT database, dated May 31, 2021 has found that there are 2 CFOT site(s) within approximately 0.25 kilometers of the project property.

<b><u>Equal/Higher Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
PRIMUS TELECOMUNICATIONS	2934 BASELINE RD OTTAWA K2H 1B2 ON CA ON	ENE	194.98	<a href="#">18</a>

## **EASR - Environmental Activity and Sector Registry**

A search of the EASR database, dated Oct 2011- Nov 30, 2021 has found that there are 1 EASR site(s) within approximately 0.25 kilometers of the project property.

<b><u>Lower Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
FOXY RECYCLE INC	2940 Baseline RD Ottawa ON k2h 7t3	NNE	77.63	<a href="#"><u>5</u></a>

## **EBR - Environmental Registry**

A search of the EBR database, dated 1994 - Nov 30, 2021 has found that there are 1 EBR site(s) within approximately 0.25 kilometers of the project property.

<b><u>Lower Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Foxy Recycle Inc.	2940 Baseline Road Ottawa CITY OF OTTAWA ON	NNE	77.63	<a href="#"><u>5</u></a>

## **ECA - Environmental Compliance Approval**

A search of the ECA database, dated Oct 2011- Nov 30, 2021 has found that there are 2 ECA site(s) within approximately 0.25 kilometers of the project property.

<b><u>Equal/Higher Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Primus Telecommunications Canada Inc.	2934 Baseline Rd Building B Ottawa ON K2H 7Z1	ENE	194.98	<a href="#"><u>18</u></a>

<b><u>Lower Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
3223701 Canada Inc.	2940 Baseline Rd 2942 Baseline Road, 2944 Baseline Road Ottawa ON J8Y 3R7	NNE	77.63	<a href="#"><u>5</u></a>

## **EHS - ERIS Historical Searches**

A search of the EHS database, dated 1999-Nov 30, 2021 has found that there are 8 EHS site(s) within approximately 0.25 kilometers of the project property.

<b><u>Equal/Higher Elevation</u></b>	<b><u>Address</u></b>	<b><u>Direction</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
	2934 Baseline Rd Ottawa ON K2H 1B2	ENE	194.98	<a href="#"><u>18</u></a>

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Nov 2021**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2021**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Nov 30, 2021**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: May 31, 2021**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Nov 30, 2021**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Nov 30, 2021**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2020**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Nov 2021**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Aug 31, 2021**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Dec 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2019**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2021**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Nov 30, 2021**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Nov 30, 2021**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2019**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Nov 2021**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Sep 30, 2021**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Sep 2020**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2018**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

# Ministry of Environment, Conservation and Parks – Freedom of Information (FOI) Request

# Ministry of the Environment, Conservation and Parks

## Freedom of Information Request for Property Information

### Instructions

Use this form to:

- submit and pay for a new FOI request for access to records/information about a property
- pay for a deposit or a final fee on an existing FOI request

Fields marked with an asterisk (\*) are mandatory.

**Are you: \***

- Submitting a new FOI Request for Property Information
- Paying a deposit or final fee for an existing FOI Request for Property Information

### Section 1 – Description of Records Requested

#### Time Period for Records Requested

From (yyyy/mm/dd) \*

To (yyyy/mm/dd) \*

1976/01/01

2022/01/11

**Type of Record(s) \***

- All environmental records relating to the identified property/site exclusive of Environmental Approvals and Registrations
- Environmental Approvals and Registrations (e.g. Environmental Compliance Approvals; Certificate of Approval; Renewable Energy Approvals; Environmental Activity and Sector Registry Registrations)

Select only if you are seeking access to an Approval or Registration that is not publicly available or if you are also seeking supporting documents relating to the Approval or Registration.

Operator and vendor Pesticide Licenses from September 4, 2018, final Approvals and Registrations are publicly available on the Access Environment website at:

<https://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en>.

Records of Site Condition (RSC) records are publicly available on the Brownfields Environmental Site Registry (BSER).

- RSC records between 2004 to June 30, 2011 are available at:  
<https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch>
- RSC records filed after July 2011 are available at:  
[https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc\\_search?request\\_locale=en](https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc_search?request_locale=en)

Other Specific Document(s)

**Type of Approval/Registration \***

- Drinking Water Licenses
- Pesticide Licenses

- Permits to Take Water
- Noise Vibrations Approvals/Registrations
- Air Emissions Approvals/Registrations
  - No Supporting Documents  All Supporting Documents  Some Supporting Documents
- Water Approvals/Registrations - Ontario Water Resources Commission, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster), mains
- Sewage – Treatment, Stormwater, Storm, Leachate & Lieachate Treatment & Sewage pump stations, Sanitary
  - No Supporting Documents  All Supporting Documents  Some Supporting Documents
- Waste Water - Industrial discharge
- Waste Sites - Disposal, Landfill sites, Transfer stations, Processing sites, Incinerator sites
  - No Supporting Documents  All Supporting Documents  Some Supporting Documents
- Waste Management Systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, Polychlorinated Biphenyls (PCBs) storage, transfer or destruction, Waste Generator Systems
  - No Supporting Documents  All Supporting Documents  Some Supporting Documents

Company Name

- Waste Generator Registration - number/class

List any record(s) that should be excluded from the scope of your request (e.g. email correspondences; records originating from your organization/business; records already in your possession, prior year(s) annual reports for approvals)

Please provide any additional relevant information relating to your request. For example, does your request relate to any other ministry business? Please note that this information is being requested only in order to provide contextual information to the Access and Privacy Office and will not in any way affect or expedite the status of any related ministry business identified.

## Section 2 – Requester Information

Last Name *	First Name *	Middle Initial
Lopers	Luke	

Business/Organization Name (if applicable or indicate "N/A") \*

Lopers & Associates

Project/Reference Number (if applicable)

LOP21-016

Are you submitting this request on behalf of a client? \*

Yes  No

Please upload an authorization/consent form from your client in Section 6 (Supporting Documentation)

Freedom of Information Office

**Re: Request for Information**

**Freedom of Information  
Environmental Records Request  
2946-2948 Baseline Road, Ottawa, Ontario**

To Whom It May Concern:

Lopers & Associates has been retained to conduct a Phase One Environmental Site Assessment (ESA) of the commercial property located at Civic No. 2946-2948 Baseline Road, in Ottawa, Ontario.

As part of the Phase One ESA, Lopers & Associates would like to verify any records for the property relative to registrations/filings with respect to environmental issues/potential liabilities. We request that you complete a search of the Ministry of Environment, Conservation and Parks database and provide any information regarding former or outstanding records, orders, infractions, notices, permits, approvals, reported spill incidents or any other environmental records to the above reference property or to Lopers & Associates.

As this information search is required as part of due diligence services, we would appreciate if you could provide a response as soon as possible (via email). Thank you in advance for your response to this matter.

Yours truly,

Signature:

Name:

Philip Thibert

Company:

Brigil

**RECORD FOUND**

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are records in our database of fuel storage tanks at the subject addresses:

INSTANCE NUMBER	ADDRESS	CITY	PROVINCE	POSTAL CODE	STATUS	FACILITY/DEVICE
64470247	2946 BASELINE RD	NEPEAN	ON	K2H 8T5	EXPIRED	FS CYLINDER EXCHANGE

For a further search in our archives please complete our release of public information form found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid\\_=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392) and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Sherees

# City of Ottawa Historic Land Use Inventory (HLUI)

July 20, 2022

Luke Lopers  
Lopers & Associates

*Sent via email [luke@lopers.ca]*

Dear Luke Loper,

**Re: Information Request  
2946 & 2948 Baseline Road, Ottawa, Ontario (“Subject Property”)**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

**Documents Provided:**  
**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

**Additional information may be obtained by contacting:**

**Ontario’s Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

**The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that

may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

**Zyan Khan**

# Qualifications of Assessors

## PROFILE

Mr. Lopers is an environmental engineer with over 12 years of experience in environmental engineering specializing in due diligence investigations. Mr. Lopers has extensive experience in Phase I and II Environmental Site Assessments; environmental remediation, and investigations; record of site condition submissions; asset inventory, designated substance surveys and abatement projects; environmental expertise on legal issues; and coordination of various monitoring programs (groundwater, surface water, air).

Mr. Lopers has participated in various Property Condition and Building Envelope mandates at various residential and commercial properties throughout Ontario.

Mr. Lopers has a strong commitment to health and safety, having experience leading a regional health and safety committee as a certified employee representative. Mr. Lopers has extensive training including OSHA 40-hour HAZWOPER, ASP Health and Safety on Construction Sites in Quebec, Ontario Working at Heights, Emergency First Aid/CPR and WHMIS.

Phase 1 Environmental Site  
Assessment | Various Clients |  
Ontario, Quebec and British  
Columbia | 2006-2020**

**Project Engineer/Manager  
Phase Two Environmental Site  
Assessments | Various Clients |  
Various Locations | 2008-2020**

**Project Manager  
Phase One, Phase Two  
Environmental Site  
Assessments, Environmental  
Delineation Quality Assurance  
Program | Costco Wholesale |  
Ottawa, ON | 2014-2019**

### Environmental Remediation Programs

**Project Engineer  
Underground Fuel Storage  
Tank Removals and  
Environmental Remediation  
Programs in Vicinity of Active  
Underground Services |  
Ottawa, ON | 2010, 2012**

Project Engineer/Manager for Phase I Environmental Site Assessments in support of acquisition/divestiture/regulatory requirements for various properties in Ontario, Quebec and British Columbia, including the following:

- Canadian Tire Retail Store and Gas Bar, CTR 417 - 2560 Princess Street, Kingston, Ontario
- Former Automotive Dealership and Service Garage, North Vancouver, British Columbia
- Former Philips Cable Plant, Brockville, Ontario
- Former Cornwall Cotton Mill, Cornwall, Ontario
- Retail Fuel Outlet and Automotive Service Garage, Ottawa, Ontario
- Jack Garland Airport Land, North Bay, Ontario
- Various Commercial/Residential Properties, Ontario and British Columbia
- Various Residential Properties, Ontario, Quebec and British Columbia
- Rochester Heights (811, 818 Gladstone Avenue), Ottawa, Ontario

Project Engineer/Manager for the following field investigation and/or regulatory reporting requirements for Phase II ESAs and other Site Investigations:

- Proposed Canadian Tire Development, CTR 693P - Terry Fox Drive at Eagleson Road, Stittsville, Ontario
- Former Retail/Private Fuel Outlets, Ottawa/North Bay/Vancouver, Canada
- Operational/Former Industrial Facilities, Ottawa/Cornwall/Sarnia/Brockville/Gananoque, Ontario
- Existing Dry Cleaning Facilities, Ottawa/Amprior, Ontario
- Automotive Service Garages, Ottawa/Vancouver, Canada
- Various Commercial/Residential Properties, Eastern Ontario
- Tetrachloroethylene Groundwater Plume, Commercial Property, Ottawa, Ontario
- Rochester Heights (811, 818 Gladstone Avenue), Ottawa, Ontario

Project Manager for the completion of a Phase One ESA for the potential acquisition of a commercial property. Upon discovery of APECs at the Site and significant data gaps in previous investigations, completed a Phase Two ESA to evaluate soil and groundwater quality at the Site. Further oversight of original owner's environmental consultants was completed to ensure adequate delineation and characterization of a dNAPL groundwater plume at the Site, present at significant depths in shale bedrock, which originated as a result of a former on-Site dry-cleaning operation.

Project Engineer for removal of underground heating oil storage tanks adjacent to residential buildings. Completed excavation supervision of contaminated soil around and below active underground services, including hydro, water and natural gas infrastructure at residential properties. Activities included oversight of removal of petroleum, impacted soil, and field screening and collection of confirmatory soil and groundwater samples for petroleum hydrocarbon analysis. Prepared Phase I, II and III Environmental Site Assessment reports.

**Project Engineer  
Retail Fuel Outlet  
Decommissioning and  
Remediation | Ottawa, ON |  
2012**

**Project Engineer/Manager  
Former Fuel Outlet  
Investigation and Remediation |  
Merrickville, ON | 2016-2017**

### **Record of Site Conditions**

**Project Manager/Engineer  
Residential Redevelopment |  
Environmental Remediation  
Program and Record of Site  
Condition Submission | Ottawa  
| 2015**

**Project Manager/Engineer  
Industrial Development |  
Environmental Assessment and  
Record of Site Condition  
Submission | Township of  
Edwardsburgh/Cardinal | 2015**

### **Excess Soil Management**

**Project Engineer/Manager  
Management of Excess Soil |  
CTREL, Brigid, Ottawa  
Community Housing  
Corporation | Ottawa and  
Pembroke, Ontario | 2016, 2018**

### **Designated Substance Surveys**

**Project Manager  
Designated Substance Surveys  
and Hazardous Building  
Materials Assessment |  
Ottawa, Pembroke,  
Southeastern Ontario | 2010-  
2020**

### **Environmental Litigation Support**

**Project Manager, Field  
Engineer, Expert Witness  
Ottawa, Ontario | 2014-2020**

Project Engineer for UST removal and confirmatory soil sampling at former ESSO gas station in Ottawa, Ontario. Activities included oversight of removal of USTs and product lines, oversight of removal of petroleum-impacted soil and groundwater encountered and backfilling operations, and field screening and collection of confirmatory soil and groundwater samples for petroleum hydrocarbon analysis.

Project Engineer for confirmatory soil and groundwater sampling following UST removal at former Shell gas station. Activities included oversight of removal of petroleum-impacted soil, pumping of groundwater encountered and backfilling operations, and field screening and collection of confirmatory soil and groundwater samples for petroleum hydrocarbon analysis. Additional borehole/monitoring well drilling also completed.

Project Manager for delineation of soil contamination and groundwater sampling for a former automotive garage and gas station property in Ottawa, Ontario. Presented and implemented remedial action plan to remediate on-site contamination. Directed staff in collection of post remediation confirmatory soil and groundwater samples for contaminants of concern. Prepared remediation closure report and record of site condition supporting documentation for submission to the Ministry of the Environment and Climate Change.

Project Manager for environmental assessments for a proposed industrial business park, in an existing industrial area within the Township of Edwardsburgh/Cardinal, Ontario. Prepared environmental assessment reports and record of site condition supporting documentation for submission to the Ministry of the Environment and Climate Change.

Project Engineer/Manager for sampling, analytical testing, development of soil management plans and monitoring during removal of excess soil generated as part of construction activities, including the following properties/facilities:

- Rochester Heights (811, 818 Gladstone Avenue), Ottawa, Ontario
- Residential redevelopment, 121 Parkdale Avenue, Ottawa, Ontario
- CTR 079, 1104 Pembroke Street East, Pembroke, Ontario
- CTR 297, 2010 Ogilvie Road, Ottawa, Ontario

Project Manager for asbestos containing material (ACM) surveys, designated substance surveys (DSSs), Hazardous Building Materials Assessments (HBMA) or mould assessments at the following sites:

- DSSs at various municipal facilities for the City of Pembroke, Pembroke, Ontario. Preparation of Asbestos Management Plan.
- HBMA at various institutional buildings for the Catholic District School Board of Eastern Ontario, Southeastern Ontario.
- DSSs and ACM surveys at various residential, buildings (dwellings and apartment buildings) for private residential clients, Ottawa, Ontario.
- DSS and abatement oversight during demolition, residential buildings (townhouses) for Ottawa Community Housing Corporation, 818 Gladstone Avenue, Ottawa, Ontario.

Project Manager, Field Engineer and Expert Witness for a fuel spill, remediation program, groundwater monitoring program and litigation review for redevelopment of a residential property adjacent to a central heating plant at an institutional facility.

## Education

BEng Geological Engineering, École Polytechnique de Montreal, Montreal, Quebec, 1990

MSc Geophysics, University of British Columbia, Vancouver, British Columbia, 1983

BSc Geophysics, Honours, University of British Columbia, Vancouver, British Columbia, 1980

## Certifications

Registered as PMP with Project Management Institute since 2012, requalified in 2018

Qualified Person (QP) for Environmental Site Assessments with Ontario Ministry of Environment and Conservation and Parks

## Professional Affiliations

Licensed as P.Eng. with the Professional Engineers of Ontario (PEO) since 1994

Licensed as Ing. with l'Ordre des ingénieurs du Québec (OIQ), 1992

Licensed as P.Eng. with NAPEG (NWT and Nunavut), since 2009.

Licensed as P.Eng with Engineers Yukon since 2018

## Federal Clearance Level

**Secret ID # 95251065**

# DON PLENDERLEITH

*Senior Environmental Engineer and Project Manager*

---

## PROFESSIONAL SUMMARY

---

Mr. Plenderleith has been an environmental engineer for 30 years. From 1990 to 2000 he worked at specialty firms in Montreal and Ottawa where he gained field and reporting experience in site assessment and remediation of retail fuel outlets and railway yards. In 1991 and 1992 he worked on a CIDA sponsored project to assess additional water resource potential in two provinces in Indonesia. He worked for Golder for 19 years on projects in Ottawa, the North and overseas.

His expertise covers all steps in contaminated site management: Phase I, II and III environmental site assessments (ESAs), risk assessments, remedial options evaluations, remedial action plans, tender plans and specifications, remediation project oversight, long-term monitoring and project closure. He has largely concentrated on federal sites since 2002 and was Golder's initial point of contact on the Environmental Standing Offer Agreement with PSPC in the National Capital over that time.

Don led Golder's national client service team for Federal government and was responsible to Golder's management for maintaining strong relations with the federal government. Locally, he provided project management and technical direction of a variety of environmental projects from the Ottawa office. Don mentored several junior professionals. His site portfolio included: military bases, Northern sites, navigational sites, correctional facilities, research labs, commercial buildings and Canadian embassies abroad. On several multi-year projects (Kingston Penitentiary and Connaught Ranges landfill) he directed all steps of site management from initial investigations, through to site closure.

Don is equally experienced at providing strategic and portfolio-level assistance to clients as well as site-specific level work. He has written contaminated sites management plans for several federal Departments. He helped to develop components of the FCSAP project manager's tool kit and has trained federal project managers in its use. He has provided program-level assistance to the FCSAP Secretariat for funding demand forecasting and long-term strategy and risk management. For nine years he led a multi-disciplinary team that performed contaminated site liability peer reviews for the Office of the Auditor General of Canada.

Don completed his engineering degree in French and is licensed to practice in Quebec. He frequently coordinates the French language component at bilingual meetings and workshops.

**Public Services and  
Procurement Canada,  
National Capital Region,  
Environmental  
Engineering Standing  
Offer (2002-2019).**

**PROJECT EXPERIENCE – STANDING OFFER MANAGER**

Don managed Golder's Environmental Standing Offer Agreement (SOA) with PSPC in the National Capital Region from 2002 to 2019. He was the first point of contact with PSPC for new call-ups. He formed project teams from the approved resources and reviewed the work plans under each call-up. He was responsible and accountable for Golder's overall project performance to PSPC.

**Phase I, II, and III and  
Remediation at Pittsburgh  
Institution and Kingston  
Penitentiary for PSPC/CSC  
near Kingston, Ontario**

**PROJECT EXPERIENCE – SENIOR PROJECT MANAGER**

Environmental Site Assessment, Remediation Planning and Implementation for the Pittsburgh Institution and Kingston Penitentiary, Kingston, Ontario from 2007 to 2015 - Don was the Senior Project Manager and project reviewer for the Phase I, II and III of contaminated sites on two similar projects at these federal penitentiaries. Don performed project management and provided technical direction during the full suite of services from site assessment through to remediation. Federal project management tools, and FCSAP technical tools (GOST) were used to assist with procedural compliance. Don assisted PSPC with the tender specification for both remediation projects and performed on-site supervision during the fast-track remediation work at Pittsburgh. Don also performed senior review of the draft and final reports.

**Peer Review and Liability  
Review of US Steel Site in  
Hamilton Harbour for  
PSPC and Transport  
Canada (July-August 2016)**

Don was the Senior Project Manager for a Peer Review of reports pertaining to the US Steel site on Hamilton Harbour that the Hamilton Port Authority (HPA) was considering purchasing. TC requested the peer review and liability review in its oversight role over the HPA. Don brought a senior expert in at steel industry at Golder onto the project team. With his input some important gaps in the previous site assessments, management plans and liability estimates were identified to TC.

**Contaminated Site  
Reporting and Review for  
Department of National  
Defence Ottawa, Ontario,  
Canada**

Don has managed several projects for DND's Director General Environment, related to the financial reporting of DND's contaminated sites. He managed the EcoNet validation project in 2006, in which the systems and procedures by which site cost and liability information are input to DND's Contaminated Site database, Econet. Several of DND's major projects being run out of headquarters were reviewed in that exercise. In 2008 he assisted DND by producing the 2008 update of their Contaminated Sites Management Plan (CSMP) for Treasury Board submission. Nine divisional CSMPs were reviewed, summarized and incorporated into the departmental CSMP.

## **PROGRAM LEVEL WORK – FEDERAL CONTAMINATED SITES**

---

### **Project Management Tools for Contaminated Sites, Ottawa, Ontario, Canada**

Mr. Plenderleith developed two of the FCSAP Project Management Tools: Status Reporting and Project Risk Management. He has provided training in the tools to federal project managers country-wide. He has delivered training sessions at RPIC National Contaminated Sites workshops on several occasions on the PM Tools, the Sustainable Development Tool (SDAT), and Guidance Tool for Selection of Technologies Tools (GOST).

### **Assistance to FCSAP for program-level Risk Management, PWGSC/ECCC Ottawa, Ontario**

Don has led a team at Golder that provided assistance to the FCSAP Secretariat from 2013 to 2019 in the areas of cost projections for funding demand estimates. He devised a method of projecting the costs of unassessed sites based on closure costs of similar sites. This tool was used to estimate the funding demand for FCSAP Phase III and past Phase III. Don assisted the Secretariat with Long-Term Strategic planning for FSCAP post 2020 when the 15-year program is due to sunset.

### **Secondments to Federal Departments**

Mr. Plenderleith has been seconded from Golder to the Department of Foreign Affairs and International Trade (now Global Affairs Canada “GAC”) on three occasions to develop their Contaminated Sites Management Plans and to fill in while GAC was staffing their full-time environmental engineer position. Through these secondments he has developed a greater understanding of the role of federal custodians in managing their programs.

## **PROJECT EXPERIENCE – NORTHERN SITES**

---

### **DEW Line Site Monitoring, Baffin Region, DND (2015-19)**

Mr. Plenderleith was the project director of Golder’s DEW Line Monitoring contract with DND from four years 2015 to 2019. He was responsible for overall program quality and liaison with the client and management of Inuit subcontractors. The project was multi-disciplinary, involving geotechnical and environmental components. Mr. Plenderleith has developed a very positive working relationship with the hamlet of Qikiqtarjuaq and the Inuit staff from that community, many of whom have returned to work with Golder every year. All Inuit Participation Targets were exceeded.

### **Tundra Mine Remediation Monitoring PSPC/INAC (2016-2018)**

Don was the Senior project director for Golder’s Remediation Monitoring of Tundra Mine (NWT) for PSPC and INAC. This project is multi-disciplinary involving surface water and groundwater environmental monitoring and aquatic monitoring for the final stages of the remediation of Tundra Mine. Don has reviewed the monthly and annual monitoring reports produced for the Water Licence. His earlier experience with the RAP for Tundra has been valuable on this project.

**Remedial Options Review  
and Remedial Action  
Planning Former Water  
Tanker Base, Inuvik  
Airport, NWT 2010-12**

From 2010 to 2012, Mr. Plenderleith was the technical director for the Phase III ESA detailed site assessment and remediation planning of the former Water Tanker Base at the Inuvik Airport in NWT. The work included determining the contaminants of concern, delineation of contaminated soil and seasonal groundwater areas, and assessing remedial options. The remedial action plan reviewed chemical oxidation and removal & disposal options within the constraints of northern work season, and the distance to a disposal facility. Descriptions, costs, advantages and limitations were provided for several options. GNWT performed the remediation with own forces.
