

# Phase I Environmental Site Assessment

211 Clarence Street  
Ottawa, Ontario

Prepared for:

Clarence Gate Holdings Inc.  
1376 Bank Street, Unit 500  
Ottawa, Ontario  
K1H 7Y3

Attention: Mr. Alex Diaz

LRL File No.: 180647

August 3, 2022

## EXECUTIVE SUMMARY

Clarence Gate Holdings Inc. retained LRL Associates Ltd. (LRL) to complete a Phase I Environmental Site Assessment (ESA) on the property located at 211 Clarence Street in Ottawa, Ontario (herein referred to as the “Site”). For the purpose of this report, Clarence Street will be inferred as running in an east-west direction. The Site is set within a residential, institutional, and commercial area of Ottawa and is currently vacant. The property was developed with a residence from at least 1878 until 2016 at which point demolition of the house was requested by the City of Ottawa due to fire damage. It is anticipated that the property will be redeveloped as a residential high-rise building. The assessment was completed to support a site plan application with the City of Ottawa as per CSA Standards. Should a Record of Site Condition (RSC) be required, the due diligence report will need to be revised to meet the Requirements of O.Reg 153/04 as amended.

This assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and the adjacent lands. The assessment included a review of the history of the Site, contact with relevant regulatory agencies, a limited walk-through Site inspection of the property and interviews with those knowledgeable of the Site.

The Site is rectangular with an approximate area of 285 m<sup>2</sup> (0.07 acres). The Site is currently vacant. The nearest open water body identified is the Rideau River located approximately 585 m northeast of the Site. The Ottawa River is approximately 835 m northwest, and the Rideau Canal is approximately 800 m southwest of the Site. The topography of the Site is generally flat with an elevation of 57 m above mean sea level (amsl). The general area slopes gently to the northeast towards the Rideau River. The inferred groundwater flow direction is towards the north. The activities on the Site and lands within 250 m are residential, institutional, and commercial.

Based on a review of reasonably ascertainable records regarding the occupancy of the Site and surrounding properties (i.e. business directories, fire insurance plans and aerial photographs), as well as the Site visit conducted on July 5<sup>th</sup>, 2022, and an interview with Mr. Alex Diaz, a shareholder, the following potentially contaminating activities (PCAs) and corresponding areas of potential environmental concern (APEC) were identified on the Site:

APEC #	PCA	Location of PCA	Location of APEC On-Site	COPCs	Media Potentially Impacted
A	<b>#1 PCA 30:</b> Importation of Fill of Unknown Quality	On-Site	Southwest corner of the Site.	PAH, PCB, metals including cyanide and mercury, and inorganics	Soil and groundwater
B	<b>#2 Unlisted PCA:</b> Firewater spill	On-Site	Southwest corner of the Site.	PAH, PCB, metals including cyanide and mercury, and inorganics	Soil and groundwater
C	<b>#3 PCA 28:</b> Gasoline and Associated Products	305 Cumberland Street, adjacent	Northwest portion of the Site	PHC, VOC, PCB, and metals	Soil and groundwater

<b>APEC #</b>	<b>PCA</b>	<b>Location of PCA</b>	<b>Location of APEC On-Site</b>	<b>COPCs</b>	<b>Media Potentially Impacted</b>
	Storage in Fixed Tanks.	property to the northwest			
D	<b>#4 PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	309 Cumberland Street, adjacent property to the west	Western portion of the Site	PHC, VOC, PCB, and metals	Soil and groundwater
E	<b>#5 Unlisted PCA:</b> Coal Storage	Approx. 130 m south of the Site.	Southern portion of the Site	PAH	Soil and groundwater
F	<b>PCA 10:</b> Commercial Autobody Shop	Approx. 245 m south of the Site.	Southern portion of the Site	PHC, VOC, PAH, PCB, and metals	Soil and groundwater

Based on the findings of the Phase I ESA, it is recommended that a Phase Two ESA be conducted on the Site. Recommendations to address areas of potential environmental concerns are as follows:

<b>Area of Potential Environmental Concern</b>	<b>Recommendation</b>
<b>APEC A:</b> Fill on-Site in the area of the former residence <b>APEC B:</b> Firewater spill on-Site <b>APEC E:</b> Coal Storage <b>APEC F:</b> Former autobody shop	Advance one (1) borehole in the southwest corner of the Site and one (1) in the central west portion and complete both as monitoring wells to allow for sampling and analysis of soil and groundwater for contaminants of concern.
<b>APEC C:</b> Former USTs adjacent to the northwest of the Site	Advance two (2) boreholes in the north portion of the Site and complete one (1) as a monitoring well to allow for sampling and analysis of soil and groundwater for contaminants of concern.
<b>APEC D:</b> Former USTs adjacent west of the Site	Advance three (3) boreholes along the west portion of the Site and complete two (2) as monitoring wells to allow for sampling and analysis of soil and groundwater for contaminants of concern.

## 1 INTRODUCTION

Clarence Gate Holdings Inc. has retained LRL Associates Ltd. (LRL) to complete a Phase I Environmental Site Assessment (ESA) on the property located at 211 Clarence Street in Ottawa, Ontario (herein referred to as the Site). The property was developed with a residence from at least 1878 until 2016 at which point demolition of the house was requested by the City of Ottawa due to fire damage. It is anticipated that the property will be redeveloped as a residential high-rise building. The assessment was completed to support a site plan application with the City of Ottawa as per Canadian Standards Association (CSA) Standards. Should a Record of Site Condition (RSC) be required, the due diligence report will need to be revised to meet the Requirements of O.Reg 153/04 as amended.

## 2 PURPOSE

### 2.1 Phase I ESA

A Phase I ESA identifies existing environmental conditions and potential environmental liabilities associated with the subject property, focusing on the possible presence of contamination on the property. Included is a review of available information (historical data and aerial photographs) and a visual site inspection to assess potential contamination of past or present activities conducted on the property itself and on adjacent properties.

Potential contamination represents the uncontrolled release of foreign substances within the natural environment. Such an event can result in air, soil and groundwater contamination that may represent environmental liabilities towards the Site and perhaps towards adjacent properties. An ESA evaluates in a consistent manner, within the time constraints imposed for this report, whether such events have occurred at this Site. This level of work is a method of risk reduction and does not eliminate risk for the client.

A Phase I ESA conducted to the CSA is done for due diligence purposes, but it cannot be used to file a Record of Site Condition because of a land use change generally from less stringent to more stringent or on account of land conveyance to the City of Ottawa.

### 2.2 Property Information

<b>Address:</b>	211 Clarence Street, Ottawa, Ontario
<b>Frontage:</b>	Clarence Street
<b>Zoning:</b>	Residential Fourth Density Zone (R4UD S77)
<b>Legal description:</b>	Part Lot 2, Plan 42482, N Clarence St (Formerly Parry St), as in CR626349, T/W CR626349; Ottawa
<b>Dimensions:</b>	Rectangular: Being approximately 9 m wide (east-west) by approximately 31.5 m deep.
<b>Area:</b>	Approximately 285 m <sup>2</sup> (0.07 acres)

The Site's location is shown in **Figure 1** and the general Site configuration is shown on the Site Plan in **Figure 2**. For the purposes of this report, Clarence Street will be inferred as running in an east-west direction.

## 2.3 Site Occupancy

<b>Current owner:</b>	Clarence Gate Holdings Inc.
<b>Owner since:</b>	June 2010
<b>Current use:</b>	Vacant
<b>Current use since:</b>	2016

## 3 SCOPE OF INVESTIGATION

LRL conducted this work in accordance with the standard Phase One ESA procedures, which generally reflect the requirements of:

- Canadian Standards Association (CSA) Phase One Environmental Site Assessment, Z768-01 (R2016);
- Guidance on Sampling and Analytical Methods for Use at Contaminated Sites in Ontario, Ontario Ministry of the Environment and Energy, December 1996; and
- O. Reg. 153/04, as amended.

The scope of work for this investigation consisted of the following:

### Phase I ESA:

- Reviewing reasonably ascertainable records regarding the occupancy of the Site and surrounding properties (i.e. business directories, fire insurance plans and aerial photographs);
- Interviewing current and previous owners and/or tenants and local and provincial authorities;
- Conducting a Site visit that consists of a “walk-through” visual assessment of the Site and adjacent properties (from publicly accessible areas); and
- Evaluation of the information collected.

This report will present the results of the ESA carried out between June 6 and July 6, 2022.

## 4 RECORDS REVIEW

### 4.1 General

#### 4.1.1 Phase I Study Area Determination

<b>Study area:</b>	250 m from the Site Boundaries
<b>Rational for extending study area beyond the minimum 250 m</b>	
It would depend upon the sensitivity of the site relative to surrounding properties. At this juncture, extending the area of influence is not warranted since the condition of the subsurface is relatively unknown and a Phase II ESA has not been undertaken.	

#### 4.1.2 First Developed Use Determination

First developed use is defined by O. Reg. 153/04 section 22(1) as the first property use after 1875 that resulted in a building or structure or the first potentially contaminating activity, whichever is earlier.

<b>First developed use:</b>	Residential
<b>Year</b>	Prior to 1878
<b>Basis for determination of first developed use</b>	
Fire insurance plans	

#### 4.1.3 Fire Insurance Plans

Fire Insurance Plans (FIP) mapped streets and buildings of urban Canada in great detail and illustrate building construction, occupancy and potential fire hazards. They also provide detailed information regarding storage tanks, transformers, boilers, and electrical rooms. Original plans were produced between 1875 and 1923 and continued to be produced and updated until production ceased in 1974. A copy of the Fire Insurance Plans is included in **Appendix A**.

<b>Year:</b>	1878
<b>Description of area covered:</b>	Between Sussex Street to the west, Rideau Street to the south, Cathcart Street to the north and Beausoleil Drive to the east.
<b>Lot &amp; address number:</b>	211 Clarence Street
<b>Description of Features in the Phase I Study Area</b>	
The scale is not shown. Land use within 250 m of the Site is mainly residential. The Site contains a residence and shed. Adjacent properties are also residential with the exception of 307 Cumberland Street, now part of 305 Cumberland Street, which contains Fire Station No. 4. Approximately 130 m southeast of the Site, a “Gas Works” facility is present which has large “gasholders”, and coal and coke storage.	
<b>Relevant information regarding potentially contaminating activity and areas of potential environmental concern</b>	
The former residence on-Site presents a low to moderate potential risk to the Site but does not meet the Reg 153/04 definition of a PCA. The Gas Works facility approximately 130 m south-southeast of the Site meets the criteria for PCA 9: Coal Gasification. The coal gasification plant and associated coal storage is up- to trans-gradient relative to the groundwater flow direction and therefore presents an APEC to the Site.	

<b>Year:</b>	1895
<b>Description of area covered:</b>	Between Dalhousie Street to the west, Rideau Street to the south, Bruyère Street to the north, and Beausoleil Drive to the east.
<b>Lot &amp; address number:</b>	211 Clarence Street
<b>Description of Features in the Phase I Study Area</b>	
The scale is not shown. No major changes since 1878 were noted. The structure on 307 Cumberland Street is larger and is no longer listed as the fire station.	
<b>Relevant information regarding potentially contaminating activity and areas of potential environmental concern</b>	

As per 1878 fire insurance plan.

<b>Year:</b>	1912/1915
<b>Description of area covered:</b>	Between Dalhousie Street to the west, Rideau Street to the south, Bruyère Street to the north, and beyond Beausoleil Drive to the east.
<b>Lot &amp; address number:</b>	211 Clarence Street
<b>Description of Features in the Phase I Study Area</b>	
<p>The scale is approximately 1 inch: 50 ft. The shed onsite is larger and is present along the northwest portion of the Site. In 1915, 305 Cumberland Street, the adjacent property to the northwest, contains an “auto and wagon shed” along the central east property line. Additional structures are present on the property. The Gas Works 130 m southeast of the Site is still present. Two (2) of the three (3) large “gasholders” have capacities of approximately 5,380 and 5,660 cubic meters, one of which is present on the western portion of the property. A portion of one of the structures is now labelled as “Purifying House”. Fire Hall No. 4 is now located approximately 210 m south of the Site.</p>	
<b>Relevant information regarding potentially contaminating activity and areas of potential environmental concern</b>	
As per 1878 fire insurance plan.	

<b>Year:</b>	1922
<b>Description of area covered:</b>	Between Sussex Drive to the west, Rideau Street to the south, Bruyère Street to the north, and beyond Beausoleil Drive to the east.
<b>Lot &amp; address number:</b>	211 Clarence Street
<b>Description of Features in the Phase I Study Area</b>	
<p>The scale is approximately 1 inch: 50 ft. No changes are noted on the Site. The adjacent property to the northwest, 305 Cumberland Street, now contains a building labelled as auto repairs in the northeast corner, and an underground storage tank is present in the central portion of the property. Most of the structure at the Gas Works facility 130 m south-southeast of the Site are gone, and the remaining gasholder is labelled as vacant. A 230 gallon gasoline storage tank and a garage labelled as repairs and paint shop are present approximately 175 m southwest of the Site. Fire Station No. 4 located approximately 210 m south of the Site is now labelled as a training school. Two garages are present approximately 170 m north of the Site at 232 and 240 Guigues Avenue. One has an underground storage tank (UST), and the other uses fuel oil. A printing facility is located at 226 Guigues Avenue, adjacent to the garages. A garage is also present approximately 200 m northeast of the Site, and an auto garage and paint shop is present approximately 245 m south of the Site.</p>	
<b>Relevant information regarding potentially contaminating activity and areas of potential environmental concern</b>	
<p>The fuel storage tank (PCA 28) on the adjacent property to the northwest presents an APEC to the north portion of the Site due to its proximity. The fuel storage tanks (PCA 28) 170 m to the north and the garage 200 m to the northeast are considered a low risk for contributing an</p>	

APEC on-Site due to their location down-gradient with respect to the inferred groundwater flow direction towards the north. The printing facility 170 m north of the Site meets the criteria for PCA 31: Ink Manufacturing, Processing and Bulk Storage, however it presents a low risk for contributing an APEC to the Site due to its location trans-gradient. The fuel storage tank (PCA 28) and repair and paint shop (PCA 10: Commercial Autobody Shop) approximately 175 m southwest of the Site are considered a low risk for contributing an APEC on-Site due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north. The Fire Training facility 210 m south of the Site meets the criteria for PCA 24: Fire Training. As it is up-gradient of the Site, it presents an APEC on-Site. The repair garage and paint shop (PCA 10: Commercial Autobody Shop) 245 m south of the Site presents a potential for contributing to an APEC due to its location up-gradient.

<b>Year:</b>	1948
<b>Description of area covered:</b>	Between Sussex Drive to the west, Rideau Street to the south, Bruyère Street to the north, and Augusta Street to the east.
<b>Lot &amp; address number:</b>	209 ½ and 211 Clarence Street
<b>Description of Features in the Phase I Study Area</b>	
<p>The scale is approximately 1 inch: 50 ft. The residential building onsite remains. The shed, however, is now located along the north portion of the Site. The garage and UST at 305 Cumberland Street are still present. The gas works facility 130 m south-southeast of the Site has now been replaced with an office building heated with a coal burning furnace. The UST remains present approximately 175 m southwest of the Site, and a junk yard is present approximately 240 m southwest. The garage with the UST and the printing facility are still present approximately 170 m north of the Site. An aluminum products manufacturer is present approximately 175 m west of the Site.</p>	
<b>Relevant information regarding potentially contaminating activity and areas of potential environmental concern</b>	
<p>The aluminum products manufacturer 175 m west of the Site meets the criteria for PCA 34 – Metal Fabrication, however, it presents no risk for contributing an APEC on-Site due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.</p>	

<b>Year:</b>	1958
<b>Description of area covered:</b>	Between Sussex Drive to the west, Rideau Street to the south, Bruyère Street to the north, and Beausoleil Drive to the east.
<b>Lot &amp; address number:</b>	209 ½ and 211 Clarence Street
<b>Description of Features in the Phase I Study Area</b>	
<p>The scale is approximately 1 inch: 100 ft. No changes are noted for the Site. The adjacent properties to the north and west are now vacant. The garage with UST is still present at 305 Cumberland Street. A gasoline service station with three (3) USTs is present at 354 St. Patrick Street, approximately 100 m northeast of the Site. A second gasoline service station with four (4) USTs is present at 349 St. Patrick Street, approximately 150 m northeast of the Site. The</p>	

UST and printing facility are still present approximately 170 m north. A brass manufacturer is present approximately 200 m northeast of the Site.

**Relevant information regarding potentially contaminating activity and areas of potential environmental concern**

The fuel storage tanks (PCA 28) approximately 100 and 150 m northeast of the Site are considered a low risk for contributing an APEC on-Site due to their locations trans- to down-gradient with respect to the inferred groundwater flow direction towards the north. The brass Manufacturer approximately 200 m northeast of the Site meets the criteria for PCA 33: Metal Treatment, Coating, Plating and Finishing, however it presents no risk for contributing an APEC on-Site due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.

*Summary of PCAs identified in Fire Insurance Plans (1878 – 1958).*

<b>Location (distance and direction from Site)</b>	<b>PCA</b>	<b>Year of Appearance in FIPs</b>
Auto Repair Garage (adjacent to northwest, trans- to down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1922, 1948, 1958
Gas Works Facility (130 m south-southeast, up- to trans-gradient)	PCA 9: Coal Gasification	1878, 1895, 1915/1912, closing in 1922
Fire Station No. 4 (210 m south, up-gradient)	PCA 24: Fire Training	1922, 1948, 1958
Garage with UST (170 m north, down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1922, 1948, 1958
Garage heated with oil (170 m north, down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1922
Printing Facility (170 m north, down-gradient)	PCA 31: Ink Manufacturing, Processing and Bulk Storage	1922, 1948, 1958
UST (175 m southwest, trans-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1922, 1948, 1958
Garage: Repairs and Paint Shop (175 m southwest, trans-gradient)	PCA 10: Commercial Autobody Shop	1922
Aluminum Fabrication (175 m west, trans-gradient)	PCA 34 – Metal Fabrication	1948
Service Station with three (3) USTs (100 m northeast, trans- to down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1958
Service Station with four (4) USTs (150 m northeast, trans- to down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1958
Brass Manufacturer (200 m northeast, trans-gradient)	PCA 33- Metal Treatment, Coating, Plating and Finishing	1958

Repair garage and paint shop (245 m south, up-gradient)	PCA 10: Autobody Shop	Commercial	1922
--	--------------------------	------------	------

#### 4.1.4 Property Underwriters' Report

Property Underwriters' Site Plans and Reports provide detailed information on a Site-specific basis and include descriptions of building construction, heating sources, production processes, and the presence of chemicals or materials which may be stored on Site. They also indicate the presence of environmental hazards such as electrical rooms, transformers, boilers, and storage tanks. No Property Underwriters' Reports were found for the Site.

## 4.2 City Directories

City directories have been produced for most urban and some rural areas since the late 1800s. These directories are often archived in research and municipal libraries, and are generally not comprehensive, containing gaps between time periods. Where available, city directories were reviewed in a minimum five-year increment to determine historical property use of the subject site and adjoining properties. A copy of the city directories is included in **Appendix B**.

<b>Source</b>	Vernon's Ottawa and Area, Ontario City Directory
<b>Years Searched:</b>	1888 – 2011
<b>Historical Property Uses:</b>	
<b>Subject Site:</b>	The Site is listed as residential (1 tenant) from 1888 to 1992. It is not listed from 2001 to 2011.
<b>Adjacent Land:</b>	<p><b>309 Cumberland Street (West):</b> Not listed from 1888 to 1923, residential from 1937 to 1947, "Reliable Delivery Messenger Service" from 1952 to 1957, "Louis Shell Service Station" in 1962, "Dutrisac Shell Service Station" from 1967 to 1971, "R S Gladwin Shell Service Station" in 1976, "K&amp;R Garage" in 1981/82, not listed in 1987, and multi-tenant residential from 1992 to 2011.</p> <p><b>305 Cumberland Street (Northwest):</b> Not listed from 1888 to 1913, listed as "Private Garage" from 1918 to 1937, "Scantland Bros Tires and Tubes" and "Reliable Delivery" in 1947, "Scantland Bros Tires and Tubes", "Shell Oil Co Ltd", "Dundas Battery &amp; Ignition", and "Earl's Neon Display" or "Rainbow Neon Signs" from 1952 to 1957, "Rupar Motors Auto Garage" from 1962 to 1971, "G N Taxi Ltd" from 1976 to 2002, "Gas Bar" from 1981 to 1987, "GKS &amp; Ottawa Taxi" in 2007/2007, and "Cumberland Auto Centre" in 2011.</p> <p><b>212 Murray Street (north):</b> residential 1888 to 1952, not listed in 1957, "Knights of Columbus Champlain Council" from 1962 to 1992, and "Fire of God Church" from 2001 to 2011.</p> <p><b>216 Murray Street (10 m northeast):</b> residential 1888 to 1952, not listed in 1957, "Jones Photo Engravers Inc" from 1962 to 1971, "Running &amp; Lajola Inc." in 1976, "McLean Rochon Printing Ltd" in 1981/1982, "Canadian Hearing Society" from 1987 to 1992, and "Anglican Diocese of Ottawa" and "Anglican Social Services" from 2001 to 2011.</p>

**215 Clarence Street (east):** Residential from 1888 to 1967, and multi tenant residential 1971 to 2011.

**202 Clarence Street (South):** Not listed from 1888 to 1896, residential from 1903 to 1913, not listed from 1918 to 1937, residential from 1947 to 2007, and not listed in 2011.

**208 Clarence Street (South):** Not listed from 1888 to 1908, residential 1913 to 1992, not listed in 2001, residential in 2006/2007, and not listed in 2011.

**222 Clarence Street (South):** Residential from 1888 to 1952, not listed from 1957 to 1971, and multi tenant residential from 1976 to 2011.

**333 Cumberland Street (40 m South):** Residential from 1888 to 1952, “Gervais Musical Repair Shop” from 1952 to 1957, “Gervais Electronics” or “Gervais Electronic Supplies” from 1962 to 1987, “Doll & Teddy Bear Shop”, “Capital Audio Technical Services”, “Gaelian Properties”, “Legend Computer Services”, “Liumar Technologies Corp”, “Puerta Del Sol Sunwear” in 1992, “L’Autre Equivoque Inc” and “Cadham Hayes Systems Inc.” from 1992 to 2002, “Galerie St-Laurent Plus Hill” from 1992 to 2007, and “Fitness Fusion”, “Domino’s Pizza”, and “Byward Chiropractic” in 2011.

**Relevant information regarding potentially contaminating activity and areas of potential environmental concern**

The residential activities on-Site from 1888 to at least 1992 (know from other sources to be 2016) is not considered a PCA. It presents a moderate to low potential for environmental concern. The commercial and institutional activities adjacent north and 40 m south of the Site are not considered PCAs and are considered a low risk for contributing an APEC on-Site due to the nature of the activities. The residential properties east and south are low risks for contributing an APEC to the Site.

The activities west and northwest (garages and service stations) are potentially contaminating activities and present APECs on the Site due to their proximity. Although this data does not confirm the presence of USTs, it is known from other sources that 305 Cumberland Street had USTs, and it is likely that 309 Cumberland Street did as well. This is represented by PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.

**4.3 Chain of Title**

Land Titles contain legal title information concerning property ownership, transfer details, and any encumbrances such as mortgages or easements. Each time a new transaction occurs, property records are updated as soon as the instrument is registered. A copy of the Chain of Title is included in **Appendix C**.

<b>Records search provider:</b>	Service Ontario Land Registry Office
<b>Date of search:</b>	June 13, 2022
<b>Pertinent Information:</b>	The Site was transferred from Hayat and Massoud Azzi to Clarence Gate Holdings Inc. on June 30, 2010.

#### 4.4 Environmental Reports

<b>Report:</b>	Designated Substance Survey
<b>Date:</b>	January 26, 2016
<b>Author:</b>	LRL Associates Ltd.
<b>Prepared for:</b>	Synercapital Real Estate Investments
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b> LRL completed a Designated Substance Survey at 211 Clarence Street. The interior of the building had been destroyed by a fire on January 6, 2016, and for safety reasons, the City of Ottawa requested that it be demolished. During demolition, an Ontario Ministry of Labour inspector visited the Site and, as per the Field Visit Report (No.01336KBZT828), a stop-work order was issued until the presence of Designated Substances was confirmed as being present or absent. Samples of potential Designated Substances were collected from the debris. Asphalt roof sheeting was determined to be an asbestos containing material, and the interior wall paint was deemed lead-based.	

#### 4.5 Environmental Source Information

##### 4.5.1 City of Ottawa Historic Land Use Inventory Request

A formal request was made to the City of Ottawa on June 21, 2022 to obtain available information for the Site through their Historical Land Use Inventory (HLUI). A formal response is expected and will be reviewed by LRL. If the response details any issues of potential environmental concern with respect to the Site, a copy will be forwarded to the client so that it can be appended to this report.

##### 4.5.2 City of Ottawa Freedom of Information Request

The City of Ottawa was contracted to obtain available information for the Site.

<b>Interview subject:</b>	City of Ottawa
<b>Date:</b>	June 8, 2022
<b>Pertinent information:</b> Under the Freedom of Information Act, a Freedom of Information (FOI) request was made to the City of Ottawa. They have acknowledged receipt of the request. A formal response is expected and will be reviewed by LRL. If the response details any issues of potential environmental concern with respect to the Site, a copy will be forwarded to the client so that it can be appended to this report.	

##### 4.5.3 City of Ottawa Document Review

###### *1988 Intera Report*

Prior to the 2001 amalgamation, the City did not have a consolidated database of environmental concerns for City properties and typically referred all inquiries to the *1988 Mapping and Assessment of Former Industrial Sites, City of Ottawa*, prepared by Intera Technologies Ltd. (1988 Intera Report). This report describes an inventory and assessment study of former industrial sites in the former City of Ottawa (prior to the 2001 amalgamation) from 1850 to 1984 that likely produced or handle hazardous wastes and materials.

One record was found within 250 m of the Site. “Beauregard Press – Printers” at 222 Guigues Street, 170 m north of the Site, was in operation from 1935 to 1970. The industry hazard rating is medium-low. It represents PCA 31: Ink Manufacturing, Processing and Bulk Storage. It presents a low risk for environmental concern to the Site due to its location down-gradient with respect to the inferred groundwater flow direction towards the north.

*City of Ottawa Old Landfill Management Strategy Document, 2004*

A report entitled *Old Landfill Management Strategy Phase 1 – Identification of Sites City of Ottawa, Ontario*, was prepared by Golder Associates for the City of Ottawa in 2004. This report identified old landfill sites for potential environmental consideration within the boundary of the amalgamated City of Ottawa.

LRL reviewed this report as part of the Phase One ESA desktop assessment for the Site. A landfill is listed at York and King Edward Avenue, approximately 130 m southeast of the Site. The landfill is government owned, was approximately 0.4 ha and operated before 1925. A building is present onsite. The waste area is listed as being defined and covered; however, the thickness is unknown. It represents PCA 58: Waste Disposal and Waste Management, however it due to its distance from the Site, relative to the groundwater flow direction this PCA was not considered an APEC for the Site.

#### 4.5.4 Ontario Ministry of Environment, Conservation and Parks Freedom of Information Act

The Ontario Ministry of Environment, Conservation and Parks (MECP) was contacted under the FOI Act to obtain available information for the Site regarding:

- Certificates of Approvals or any permits relating to air emissions (including noise), water taking and discharging, waste disposal sites, septic systems, pesticides storage or other similar instruments;
- Incidents, orders, offences, spills, discharges of contaminants or inspections;
- Waste management records, including current and historical waste storage locations and waste generator and waste receiver information; and
- Reports submitted to the MECP related to the environmental conditions of the property.

A FOI request was submitted, and the MECP has acknowledged receipt of the request. A formal response is expected and will be reviewed by LRL. If the response details any issues of potential environmental concern with respect to the Site, a copy will be forwarded to the client so that it can be appended to this report.

#### 4.5.5 Ministry of Natural Resources and Forestry

The Ontario Ministry of Natural Resources and Forestry (MNRF) online geographic information system, Make A Map: Natural Heritage Areas, was reviewed as part of the assessment. The review focussed on identifying areas of natural or scientific significance on the Site or within the subject area (1 km). The following Areas of Natural Scientific Interest (ANSI) and Rare, Threatened or Endangered Species were identified within the study area:

- Nine-spotted Lady Beetle (*Coccinella novemnotata*) was reported with a SARO status of endangered which is a species facing imminent extinction or expiration in Ontario which is a candidate for regulation under Ontario’s ESA;

- American Eel (*Anguilla rostrata*) was reported with a SARO status of endangered which is a species that is facing imminent extinction or expiration in Ontario which is a candidate for regulation under Ontario's ESA;
- Lake Sturgeon (*Acipenser fulvescens pop. 3*) was reported with a SARO status of threatened which is a species that is at risk of becoming endangered in Ontario if limiting factors are not reserved;
- Silver Lamprey (*Ichthyomyzon unicuspis pop. 1*) was reported with a SARO status of special concern which is a species that has specific attributes that categorize it as sensitive to human activities or natural events;
- Barn swallow (*Hirundo rustica*) was reported with a SARO status of threatened which is a species that is at risk of becoming endangered in Ontario if limiting factors are not reserved;
- Eastern Meadowlark (*Sturnella magna*) was reported with a SARO status of threatened which is a species that is at risk of becoming endangered in Ontario if limiting factors are not reserved;
- Gypsy Cuckoo Bumble Bee (*Bombus bohemicus*) was reported with a SARO status of endangered which is a species that is facing imminent extinction or expiration in Ontario which is a candidate for regulation under Ontario's ESA;
- Yellow-banded Bumble Bee (*Bombus terricola*) was reported with a SARO status of special concern which is a species that has specific attributes that categorize it as sensitive to human activities or natural events;
- Chimney Swift (*Chaetura pelagica*) was reported with a SARO status of threatened which is a species that is at risk of becoming endangered in Ontario if limiting factors are not reserved;
- Bobolink (*Dolichonyx oryzivorus*) was reported with a SARO status of threatened which is a species that is at risk of becoming endangered in Ontario if limiting factors are not reserved;
- Butternut (*Juglans cinerea*) was reported with a SARO status of endangered which is a species facing imminent extinction or expiration in Ontario which is a candidate for regulation under Ontario's ESA;
- Peregrine Falcon (*Falco peregrinus*) was reported with a SARO status of special concern which is a species that has specific attributes that categorize it as sensitive to human activities or natural events;
- Least Bittern (*Ixobrychus exilis*) was reported with a SARO status of threatened which is a species that is at risk of becoming endangered in Ontario if limiting factors are not reserved; and
- Snapping turtle (*Chelydra serpentina*) was reported with a SARO status of special concern which is a species with characteristics that make it sensitive to human activities or natural events.

#### 4.5.6 Inventory of Coal Tar Industrial Sites in Ontario

The MECP has created an inventory of all known and historical coal gasification plants. It identifies industrial sites that produced and continue to produce or use coal tar or other related tars. The program was discontinued in 1988.

<b>Database:</b>	Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario
<b>Years covered:</b>	Up to 1988
<b>Search radius:</b>	250 m
<b>Description of data, analysis, and findings relevant to the Phase I ESA:</b>	
The southwest corner of York and King Edward, approximately 130 m southeast of the Site, is listed in the inventory as being a manufactured gas plant from 1854 to 1915. It represents PCA 9: Coal Gasification. This PCA is considered an APEC for the Site since a portion of it is located up-gradient relative to the inferred groundwater flow direction.	

#### 4.5.7 Technical Standards and Safety Authority

Fuel storage at commercial and industrial facilities is regulated by the Technical Standards and Safety Authority (TSSA). Records of aboveground storage tanks are maintained for bulk storage facilities only. Underground storage tanks (USTs) are required to be registered with the TSSA. There are no requirements to register private underground and aboveground fuel oil storage tanks for heating or waste oil. Records of registered and licensed tanks have been maintained since 1990.

<b>Interview subject:</b>	Public Information Agent
<b>Date:</b>	June 10, 2022
<b>Pertinent information:</b>	
TSSA was contacted regarding available information concerning the presence of petroleum storage tanks, fuel spill records, accidents or fuel-related incidents which may be registered on the Site or surrounding properties. They have indicated that there is a record of an expired gasoline service station and three (3) records of expired liquid fuel storage tanks at 305 Cumberland Street, the adjacent property northwest of the Site. This represents a PCA (PCA 28). It is considered to contribute an APEC on-Site due to its proximity to the Site.	

#### 4.5.8 Ministry of Environment, Conservation and Parks Well Records

The Ministry of Environment, Conservation and Parks' well records database provides information of locations and characteristics of water wells throughout Canada in accordance with Ontario Regulation 903. Information of the stratigraphy, depth of bedrock and approximate depth of water table is also provided.

<b>Database:</b>	MECP Well Records
<b>Search radius:</b>	250 m
<b>Date accessed:</b>	June 7, 2022
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
Ten (10) wells are located within 250 m of the Site. Copies of the electronic version of select Ontario Well Records are provided in <b>Appendix D</b> . Details of the wells are as follows:	
<ul style="list-style-type: none"> <li>Wells No. 7305786 and 7305787 are monitoring wells installed in 2018 at 216 Murray Street, approximately 10 and 40 m northeast of the Site. Sand and gravel were encountered to approximately 1.2 m below ground surface (bgs) followed by silty clay</li> </ul>	

- to 4.1 and 6.1 m bgs where the wells were terminated. Well No. 7384741 was installed in 2021 on the same property. No other details were provided.
- Well No. 7215436 is a monitoring well installed in 2013 approximately 160 m northwest of the Site. Sand was encountered to 0.9 m bgs followed by fill to 3.1 m bgs, clay to 7.3 m bgs, till to 8.2 m bgs, and limestone to 19.2 m bgs where the well was terminated.
  - Wells No. 7269079 and 7269080 are monitoring wells installed in 2016 at 209 Guiges Avenue, approximately 230 m north of the Site. Well No. 7154142 is a monitoring well installed in 2010 at the same address. In general, gravel and sand were encountered up to 1.2 m bgs followed by silty clay to depths between 3.2 and 6.1 m where the wells were terminated.
  - Well No. 7354064 is a monitoring well installed in 2019 at 380 Cumberland Street, approximately 190 m south of the Site. Gravel was encountered to 0.6 m followed by silty clay to 1.8 m bgs and till to 4.9 m bgs where the well was terminated.
  - Well No. 7135252 is a monitoring well installed in 2009 at 360 King Edward Avenue, approximately 190 m southeast of the Site. Fill was encountered to 2.0 m bgs followed by silty clay to 7.0 m bgs, till to 9.0 m bgs, and limestone bedrock to 13.0 m bgs where the well was terminated.
  - Well No. 7196201 is a monitoring well installed in 2012 at 333 King Edward Avenue, approximately 185 m southeast of the Site. Fill was encountered beneath asphalt to 1.8 m bgs followed by clay to 4.3 m bgs where the well was terminated.

#### 4.5.9 National Pollutant Release Inventory

The National Pollutant Release Inventory is maintained by Environment Canada. It is designed to collect comprehensive data regarding releases to air, water or land, and water transfers for recycling. The database was accessed through a database service provider (Ecolog Eris, Toronto, Ontario) and their report is included in **Appendix E**.

<b>Database:</b>	National Pollutant Release Inventory
<b>Years covered:</b>	1993 to May 2017
<b>Search radius:</b>	250 m
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
No records were found within a 250 m radius from the Site.	

#### 4.5.10 Inventory of PCB Storage Sites

The Ontario Ministry of Environment maintains an inventory of PCB storage sites within Ontario. Inactive PCB storage equipment and PCB disposal sites are required to be registered under O. Reg 11/82 and O. Reg 347. The database was accessed through a database service provider (Ecolog Eris, Toronto, Ontario) and their report is included in **Appendix E**.

<b>Database:</b>	Inventory of PCB Storage Sites
<b>Years covered:</b>	1987 to October 2004; 2012 to December 2013
<b>Search radius:</b>	250 m
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
No records were found within a 250 m radius from the Site.	

#### 4.5.11 National PCB Inventory

Environment Canada maintains an inventory of in-use PCB containing equipment, out-of-service PCB equipment, and PCB waste in Canada. The database was accessed through a database service provider (Ecolog Eris, Toronto, Ontario) and their report is included in **Appendix E**.

<b>Database:</b>	National PCB Inventory
<b>Years covered:</b>	1998 to 2008
<b>Search radius:</b>	250 m
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
CHEZ FM at 126 York Street, approximately 195 m southwest of the Site, is listed as having equipment that was in use circa 1990. They present a low risk for environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north.	

#### 4.5.12 Certificates of Approvals

Any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval (CofA) before it can operate lawfully. The database was accessed through a database service provider (Ecolog Eris, Toronto, Ontario) and their report is included in **Appendix E**.

<b>Database:</b>	MECP Certificates of Approval
<b>Years covered:</b>	1985 to October 2011
<b>Search radius:</b>	250 m
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
Four (4) records of CofAs were found within 250 m of the Site. They are summarized as follows:	
<ul style="list-style-type: none"><li>• The City of Ottawa at Dalhousie St./Clarence St./King Edward Ave. was issued a CofA for municipal sewage in 1992.</li><li>• The City of Ottawa at Sussex Dr./Clarence St./King Edward Ave. was issued a CofA for Municipal water in 1992.</li><li>• Urban Capital (York) Inc. at 180 York Street was issued a CofA fir Air in 2004.</li><li>• 360Lofts Inc. at 356 to 358 Cumberland Street was issued a CofA for municipal and private sewage works in 2010.</li></ul>	
The CofAs do not indicate any PCAs within the Phase I Study Area.	

#### 4.5.13 Environmental Site Registry

The Environmental Registry lists proposal, decisions and exceptions regarding policies, Acts, instruments or regulations that could significantly affects the environment. Applications for permits, licences or certificates of approval to release substances into the air or water are posted on the registry. The database was accessed through database service provider (Ecolog Eris, Toronto, Ontario) and their report is included in **Appendix E**.

<b>Database:</b>	Environmental Registry
------------------	------------------------

<b>Years covered:</b>	1994 to April 30, 2022
<b>Search radius:</b>	250 m
<b>Date accessed:</b>	June 9, 2022
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
Urban Capital (York) Inc. at 180 York Street was approved for discharge to the air in 2004. This does not represent a PCA as per O.Reg 153/04.	

#### 4.5.14 Waste Disposal Site Inventory

The Ministry of Environment, Conservation and Parks' Waste Management Branch maintains an inventory of known open (active or inactive) and closed disposal site in Ontario.

<b>Database:</b>	Waste Disposal Site Inventory
<b>Years covered:</b>	1970 to 1990
<b>Search radius:</b>	250 m
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
No records were found within a 250 m radius from the Site.	

#### 4.5.15 Other Databases

Other Databases are covered by the Ecolog Eris Report included in **Appendix E**. They are outlined below.

##### 4.5.15.1 Ontario Spills

<b>Database:</b>	Ontario Spills
<b>Years covered:</b>	1988- Sept. 2020; Dec. 2020-March 2021
<b>Search radius:</b>	250 m
<b>Date accessed:</b>	June 9, 2022
<b>Description of data, analysis and findings relevant to the Phase I ESA:</b>	
Fifteen (15) records of spills were found within a 250 m radius of the Site. They are summarized as follows:	
<ul style="list-style-type: none"> <li>• In September 2015, 10 L of furnace oil was spilled to the ground at 310 Cumberland Street, and 75 L of oil were spilled to the ground at 308 Cumberland Street during removal of a tank. They occurred approximately 50 m west of the Site. The presence of the fuel storage tank at 308 Cumberland Street represents PCA 28. It presents a low risk for an APEC to the Site due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;</li> <li>• In November 2017, 25 L of coolant was spilled to the road at Murray and Cumberland Street, approximately 45 m northwest of the Site. It does not represent a PCA, and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;</li> <li>• In January 2009, natural gas was spilled to the air at York Street &amp; Cumberland Street, approximately 90 m southeast of the Site, due to a pipeline strike. An environmental</li> </ul>	

impact was not anticipated. It does not represent a PCA, and presents a low risk for environmental concern due to the nature of the spill (i.e. to air);

- In November 1991, an unknown quantity of gasoline was spilled to the ground from a leaking underground storage tank at the Petro-Canada at 292 King Edward Avenue, approximately 130 m east of the Site. An environmental impact was deemed possible. The fuel storage tank represents PCA 28. It presents a low risk for an APEC to the Site due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In June 1988, 1 litre of transformer oil spilled to the ground at York Street and King Edward Avenue, approximately 140 m southeast of the Site. It represents PCA 55: Transformer Manufacturing, Processing and Use. It presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In April 2000, 14 L of diesel was spilled to the ground at York Street at King Edward Avenue, approximately 140 m southeast of the Site. An environmental impact was not anticipated. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In February 2009, 962 L of waste oil and water was spilled during a fire and ran into the storm sewer at the Oil Changers at 360 St. Patrick Street, approximately 100 m northeast of the Site. An environmental impact was not anticipated. It does not represent a PCA and presents a low risk for environmental concern due to its location trans- to down-gradient with respect to the inferred groundwater flow direction towards the north;
- In June 2013, 1 L of a glycol and water solution was spilled to the ground at King Edward Avenue and Murray Street, approximately 110 m northeast of the Site. An environmental impact was not anticipated. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In December 2009, oil leaked to a basement at 358 Cumberland Street, approximately 170 m southwest of the Site. An environmental impact was not anticipated. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In January 2006, 12.4 L of furnace oil was spilled to the road at 347 St. Patrick Street, approximately 140 m northeast of the Site. An environmental impact was deemed possible. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In December 1993, diesel was spilled to a basement and possibly the storm sewer at 350 King Edward Avenue, approximately 180 m southeast of the Site. An environmental impact was not anticipated. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north;
- In February 2019, an unknown volume of refrigerant gas was spilled to the air at 350 King Edward Avenue, approximately 180 m southeast of the Site. It does not represent

- a PCA and presents a low risk for environmental concern due to the nature of the material spilled; and
- In May 2013, 180 L of grease was spilled to the sidewalk at 101 York Street, approximately 240 m southwest of the Site. An environmental impact was confirmed. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.

**4.5.15.2 Ontario Regulation 347 Waste Generators Summary**

The Ministry of Environment, Conservation and Parks' Waste Management Branch maintains an inventory of Waste Generators in Ontario.

<b>Database:</b>	Ontario Regulation 347 Waste Generators Summary
<b>Years covered:</b>	1986 to February 28, 2022
<b>Search radius:</b>	250 m
<b>Date accessed:</b>	June 9, 2022
<b>Description of data, analysis, and findings relevant to the Phase I ESA:</b>	
<p>One hundred (100) records of waste generators were retrieved within 250 m of the Site. They are summarized as follows:</p> <ul style="list-style-type: none"> <li>• G N Taxi Ltd at 305 Cumberland, the adjacent property northwest of the Site, is listed as a generator of petroleum distillates and waste oils and lubricants between 1986 and 1995. They represent PCA 28 and present an APEC to the Site due to their proximity.</li> <li>• Community Housing Corp at 312 Cumberland Street, approximately 40 m west of the Site, is listed as a waste generator of waste oils/sludges as of November 2021. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.</li> <li>• Domeron inc. at 333-335 Cumberland Avenue, approximately 45 m south-southwest of the Site, is listed as a generator in 2003 and 2004. No other information was provided. LivingEasy Homes inc. at the same address is listed as a generator of light fuels in 2005. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.</li> <li>• HepCURE Inc. at 332 Cumberland Street, approximately 55 m southwest of the Site, is listed as a generator of pathological wastes since November 2021. It does not represent a PCA and presents a low risk for environmental concern due to the nature of the waste.</li> <li>• The City of Ottawa Public Health at 179 Clarence Street, approximately 40 m west of the Site, is listed as a waste generator of organic laboratory chemicals and aliphatic solvents since 2014. It does not represent a PCA and presents a low risk for environmental concern due to the nature of the waste.</li> <li>• The Shepherds of Good Hope, We Care Home Health Services, and CBI Home Health at 256 King Edward Street, approximately 30 m northeast of the Site, are listed as</li> </ul>	

generators of pharmaceuticals and pathological wastes since 2011, and generators of other specified inorganic sludges, slurries or solids as of July 2020. It does not represent a PCA and presents a low risk for environmental concern due to the nature of the waste.

- Cityview Rental Services at 180 Murray Street, approximately 80 m west-northwest of the Site, is listed as a generator of paint/pigment/coating residues in 2007 and 2008. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- Capital Elevator Ltd. at 159 Murray Street, approximately 110 m northwest of the Site, is listed as a generator of waste crankcase oils and lubricants as of November 2021. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- The City of Ottawa at 141 Clarence Street, approximately 180 m west of the Site, are listed as a generator of alkaline wastes – heavy metals from 2002 to 2012, and waste oils/sludges since 2014. Badger Daylighting at the same address is listed as a generator of waste oils/sludges as of October 2019. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- Apollo Property Management at 134 York Street, approximately 135 m southwest of the Site, is listed as a generator of waste oils/sludges as of December 2018. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- Regional Elevator, Jemcor Elevating Inc., and Ottawa Community Housing at 380 Cumberland Street, approximately 180 m south-southwest of the Site, are listed as generators of waste crankcase oils and lubricants since October 2019. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- The Canadian National Institute of Health at 303 Dalhousie Street, approximately 210 m west of the Site, is listed as a generator of pathological wastes and waste oils/sludges since July 2020. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- The Government of Canada Public Works at 350 King Edward Avenue, approximately 130 m southeast of the Site, is listed as a generator of light fuels, heavy fuels, halogenated solvents, other specified inorganic, paint/pigment/coating residues, aliphatic solvents, oil skimmings and sludges, waste oils and lubricants, acid waste – heavy metals, photoprocessing wastes, and/or waste compressed gasses, since 1986. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- La Nouvelle Scene at 333 King Edward Avenue, approximately 200 m southeast of the Site, is listed as a generator of waste oils and lubricants in 2013. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.

- The Salvation Army at 171 George Street, approximately 190 m southwest of the Site, is listed as a generator of waste oils/sludges as of February 2022, light fuels from 1990 to 1998, PCB's in 2005, and oil skimmings and sludges since 2015. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- The Conseil des Ecoles Catholiques de Langue at 172 Guigues Avenue, approximately 160 m northwest of the Site, is listed as a generator of PCB's from 1995 to 1998. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- Spic & Span Cleaners at 309 Dalhousie Street, approximately 210 m southwest of the Site, is listed as a generator of halogenated solvents from 1986 to 1998. It is considered a PCA as per PCA 37: Operation of Dry Cleaning Equipment but is considered a low risk to contribute to an on-site APEC due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- The City of Ottawa at 384 St. Patrick Street, approximately 205 m northeast of the Site, is listed as a generator of oil skimmings and sludges in 2013. It does not represent a PCA and presents a low risk for environmental concern due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.
- Browns Cleaners, La Boutique du Nettoyeur, 2221092 Ontario Ltd., and Malilka International Limited at 261 St. Patrick Street, approximately 220 m northwest of the Site, are listed as a generator of halogenated solvents from 1994 to 2015. It is considered a PCA as per PCA 37: Operation of Dry Cleaning Equipment but is considered a low risk to contribute to an on-site APEC due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.

4.5.15.3 Fuel Storage Tanks

<b>Database:</b>	Fuel Storage Tanks
<b>Years covered:</b>	February 28, 2022
<b>Search radius:</b>	250 m
<b>Date accessed:</b>	June 9, 2022
<b>Description of data, analysis, and findings relevant to the Phase I ESA:</b>	
<p>Twelve (12) records of fuel storage tanks were retrieved within 250 m of the Site. They are summarized as follows:</p> <ul style="list-style-type: none"> <li>• G N Taxi Ltd at 305 Cumberland Street, adjacent northwest of the Site, had three (3) single-walled USTs, two of which had a capacity of 22,000 L, that were installed in 1989 and 1992. They are listed as containing gasoline. They represent PCA 28 and present an APEC to the Site due to their proximity.</li> <li>• East Way Taxi 727825 Ont. Ltd. at 257 Cumberland Street, approximately 130 m north of the Site, had four (4) single-walled USTs that were installed in 1989 or 1990. They had capacities of 22,700 L or 22,730 L and contained gasoline. They represent PCA 28, however it is considered a low risk to contribute to an on-Site APEC due to its location down-gradient with respect to the inferred groundwater flow direction towards the north.</li> </ul>	

- Pioneer Energy Management Inc. at 355 St. Patrick Street, approximately 150 m northeast of the Site, had four (4) single-walled USTs that were installed in 1989, had capacities of 18,100 L., and contained gasoline. They represent PCA 28. It is considered a low risk to contribute to an on-site APEC due to its location trans- to down-gradient with respect to the inferred groundwater flow direction towards the north.
- Public Works Canada at 350 King Edward Avenue, approximately 130 m southeast of the Site, had a single-walled UST that had a capacity of 13,650 L, contained diesel, and was installed in 1990. It represents PCA 28. It is considered a low risk to contribute to an on-site APEC due to its location trans-gradient with respect to the inferred groundwater flow direction towards the north.

4.5.15.4 *Retail Fuel Storage Tanks*

<b>Database:</b>	Retail Fuel Storage Tanks
<b>Years covered:</b>	1999 to September 30, 2021
<b>Search radius:</b>	250 m
<b>Date accessed:</b>	June 9, 2022
<b>Description of data, analysis, and findings relevant to the Phase I ESA:</b>	
Oil Changers at 360 St. Patrick Street, approximately 100 m northeast of the Site, is listed under the database. No details of the tank were provided. It represents PCA 28. It is considered a low risk to contribute to an on-site APEC due to its location trans- to down-gradient with respect to the inferred groundwater flow direction towards the north.	

4.5.15.5 *Inventory of Coal Gasification Plants and Coal Tar Sites*

<b>Database:</b>	Inventory of Coal Gasification Plants and Coal Tar Sites
<b>Publication Date:</b>	April 1987 and November 1988
<b>Search radius:</b>	250 m
<b>Description of data, analysis, and findings relevant to the Phase I ESA:</b>	
King Edward Gas Works at 350 King Edward Avenue, approximately 130 m southeast of the Site, is listed as a Retort Coal Gasification Facility. The operating period is estimated to be 1854-1915. In the 1880s, the plant had three large gasometers as well as underground tar wells, tar condensers, and gas purifying equipment. Two large former gas holding tanks are located below the front lawn of the current federal building with a third tank and underground tar well located below the building. During excavation as part of upgrading and redeveloping of the building in 1986, black tar was encountered. Site investigations have shown “black odorous substances” in the majority of the 31 boreholes drilled within and outside the existing building. The soil and groundwater have shown the presence of PAH. An estimated 200-300 L of tar is located in the bottom of the boiler room sump. Offsite migration of gas plant wastes is likely, particularly to the northeast along King Edward Avenue.	
The coal gasification facility represents PCA 9: Coal Gasification. A portion of the property is up-gradient with respect to the inferred groundwater direction towards the north, therefore this PCA is considered an APEC for the Site.	

#### 4.5.15.6 *Scott's Manufacturing Directories*

Scott's Directories is a data bank containing information on over 200 000 manufacturers across Canada. Scott's listings are voluntary; it is the most comprehensive database of Canadian manufacturers available.

<b>Database:</b>	Scott's Manufacturing Directory
<b>Years covered:</b>	1992 to March 2011
<b>Search radius:</b>	250 m
<b>Description of data, analysis, and findings relevant to the Phase I ESA:</b>	
Seventeen (17) records of manufacturers were retrieved within 250 m of the Site. They are summarized as follows:	
<ul style="list-style-type: none"><li>• Les Editions David Inc. at 335B Cumberland Street, approximately 40 m south-southwest of the Site, is a book publisher established in 1993. They do not represent a PCA and present a low risk for potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north.</li><li>• Dube Marcel at 164 Clarence Street, approximately 125 m west of the Site, is listed under the directory however no additional information was provided;</li><li>• Tea Party at 119 York Street, approximately 170 m southwest of the Site, is listed as a coffee and tea manufacturer. They were established in 2005. They do not represent a PCA and present a low risk for potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north;</li><li>• VMI Medical Inc. at 126 York Street, approximately 150 m southeast of the Site, is a software publisher established in 1996. Aviation Publishers Co. Ltd. at the same address is listed as a book publisher established in 1967. Magmic Games Inc. at the same address is listed as software publishers established in 2002. They do not represent a PCA and present a low risk for potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north;</li><li>• Dive Tech at 305 St. Patrick Street, approximately 150 m northwest of the Site, is a sporting and athletic goods manufacturer established in 1993. Les Editions du Vermillon at the same address is a book publisher established in 1982. They do not represent a PCA and present a low risk for potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north;</li><li>• The Computer Paper at 260 St. Patrick Street, approximately 180 m northwest of the Site, is a newspaper publisher established in 1988. Ideal Stamps at the same address is listed as "marking devices" and was established in 1993. Maison Antoine &amp; Taillefer at the same address is a clothing manufacturer established in 2002. They do not represent a PCA and present a low risk for potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north;</li><li>• DNA 13 Inc. at 283 Dalhousie Street, approximately 200 m west of the Site, is a software publisher, and manufacturer and reproducer of magnetic and optical media and were established in 2001. They do not represent a PCA and present a low risk for</li></ul>	

potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north; and

- Spade Media Inc. at 267 Dalhousie Street, approximately 210 m west for the Site, is listed as a periodical publisher established in 2007. They do not represent a PCA and present a low risk for potential environmental concern due to their location trans-gradient with respect to the inferred groundwater flow direction towards the north.

**Summary of PCAs Identified through Database Search**

Location (distance and direction from Site)	PCA	Database (Year, if any)
305 Cumberland Street (adjacent northwest, trans- to down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	Private and Retail Fuel Storage Tanks Fuel Storage Tank (1989, 1992) Delisted Fuel Tanks (1989-1990) Reg 347 Waste Generator (1986 to 1995) TSSA
309 Cumberland Street (adjacent west, trans-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	City Directories
308 Cumberland Street (50 m west of the Site, trans-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	Ontario Spills (2015)
292 King Edward Avenue (130 m east of the Site, trans-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	Ontario Spills (1991)
York street and King Edward Avenue (140 m southeast, trans-gradient)	PCA 55: Transformer Manufacturing, Processing and Use	Ontario Spills (1988)
350 King Edward Avenue, 130 m south-southeast of the Site, up- to trans-gradient)	PCA 9: Coal Gasification  PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.  PCA 58: Waste Disposal and Waste Management	Inventory of Coal Gasification Plants and Coal Tar Sites (1854 to 1915) Fuel Storage Tank (1990) Private and Retail Fuel Storage Tanks Ontario Spills (1993) Contaminated Sites on Federal Land Fuel Storage Tank – Historic (1984-2008) Reg 347 Waste Generator (1986-Present) Old Landfill Management Study (prior to 1925)

360 St. Patrick Street (100 m northeast of the Site, trans- to down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	Retail Fuel Storage Tanks Ontario Spills (2009)
257 Cumberland Street (130 m north of the Site, down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	Private and Retail Fuel Storage Tanks (1993) Delisted Fuel Tanks (1989, 1990) Fuel Storage Tank (1985, 1988, 1989, 1990)
355 St. Patrick Street (150 m northeast of the Site, trans- to down-gradient)	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	Fuel Storage Tank (1989) Private and Retail Fuel Storage Tanks (1996) Delisted Fuel Tanks (1994)
222 Guigues Street (170 m north of the Site, down-gradient)	PCA 31: Ink Manufacturing, Processing and Bulk Storage	Intera Report (1935-1970)
309 Dalhousie Street (210 m southwest of the Site, trans-gradient)	PCA 37: Operation of Dry Cleaning Equipment (where chemicals are used)	Reg 347 Waste Generator (1986 to 1998)
261 St. Patrick Street (220 m northwest, trans-gradient)	PCA 37: Operation of Dry Cleaning Equipment (where chemicals are used)	Reg 347 Waste Generator (1994 to 2015) Dry Cleaning Facilities (2005 to 2015)

## 4.6 Physical Setting Sources

### 4.6.1 Aerial Photographs

Aerial photographs were obtained from the City of Ottawa interactive mapping system, geoOttawa. Review of the photographs was completed to develop a general history of the development of the Site and surrounding properties. Aerial photographs may be at a scale or quality that limits a detailed review of the Site and surrounding properties. Copies of select aerial photographs are included in **Appendix F**.

Year	Phase I Property (Site)	Phase I Study Area ( Surrounding Area)
1928	The Site appears to be developed with a single-family residence. (AP1)	The Phase I study area generally contains apparent single-family residences; however, the quality of the photograph is poor. An apparent former industrial-type property is located approximately 130 m southeast of the Site (now known to be the former "Gas Works" facility).
1965	The Site appeared similar to 1928.	The adjacent properties to the west and northwest appear commercial with multiple cars parked on site. Larger buildings are now present adjacent north, 30 m east, and 45 m northeast of the Site. The former industrial property 130 m southeast is now developed with a large building. Based on what appear to be pump-islands, potential gas stations are present approximately 100 and 150 m northeast of the Site.
1976	The Site appeared similar to 1965.	More properties in the area are developed with larger buildings, including the adjacent property to the east. The quality of the photograph is poor

<b>Year</b>	<b>Phase I Property (Site)</b>	<b>Phase I Study Area (Surrounding Area)</b>
<b>1991</b>	The Site appeared similar to 1976. (AP2)	The adjacent property to the west is developed with the current apartment building and the general area's development is still changing to larger buildings. The adjacent property to the northwest appears to have a pump island. The apparent gas station is still present 150 m northeast of the Site.
<b>2002</b>	The Site appeared similar to 1991.	The pump islands on the property adjacent to the northwest and 150 m northeast are no longer present.
<b>2011</b>	The Site appeared similar to 2002.	No significant changes were observed to the Phase I study area.
<b>2017</b>	The residence onsite is no longer present. (AP3)	No significant changes were observed to the Phase I study area.
<b>2021</b>	The Site appeared similar to 2017.	No significant changes were observed to the Phase I study area.

The former residence on-Site is not a PCA and present low to moderate potential risks to the Site. The gasoline service stations 100 m and 150 m northeast of the Site represent PCA 28, however, they are not considered to contribute to an APEC on-site due to their distance and location trans- to down-gradient with respect to the inferred groundwater flow direction towards the north. The former industrial property 130 m south-southeast of the Site presents a risk to contribute an APEC to the Site due to its location up- to trans-gradient with respect to the inferred groundwater flow direction towards the north. The gasoline service station on the adjacent property to the northwest represent PCA 28 and is considered to contribute to an APEC on-site due to its proximity.

#### 4.6.2 Topography, Hydrology & Geology

A topographic map was obtained to illustrate the Site's location in relation to any nearby water bodies and to document regional topography. This map is included in **Appendix G**.

<b>Map:</b>	Ontario Base Map
<b>Approximate elevation:</b>	57 m above mean sea level
<b>Topography:</b>	Generally flat on-Site with a gentle slope towards the Rideau River to the northeast in the general area.
<b>Nearest open water body:</b>	The Rideau River is approximately 585 m northeast, the Ottawa River is approximately 835 m northwest, and the Rideau Canal is approximately 800 m southwest of the Site.

Geological maps were reviewed to obtain information on regional geology, surficial soils and bedrock.

<b>Generalized surficial geology<sup>1</sup>:</b>	Champlain Sea Sediments: clay and silt underlying erosional terraces.
<b>Generalized bedrock geology<sup>2</sup>:</b>	Ottawa Formation: Limestone with some shaly partings. Some sandstone in basal part.

#### 4.6.3 Depth to Bedrock

LRL completed fieldwork as part of a Geotechnical Investigation on-Site. The investigation involved advancing boreholes across the Site. Inferred bedrock was encountered in BH22-7, located in the central portion of the Site, at approximately 8.9 m bgs. In addition, as described in Section 4.5.8 (well records), limestone was encountered at 8.2 m bgs approximately 160 m northwest of the Site, and at 9.0 m bgs approximately 190 m southeast.

### 5 INTERVIEWS

<b>Interview subject:</b>	Alex Diaz, Shareholder, Clarence Gate Holdings Inc.
<b>Date:</b>	July 6 and 18, 2022
<b>Pertinent information:</b>	<ul style="list-style-type: none"> <li>Mr. Diaz has been familiar with the Site since Clarence Gate Holdings Inc. purchased it in 2010. The property contained a residential duplex which burned down in January 2016. The building was ordered to be demolished by the City of Ottawa. A designated substance survey was completed, and the debris was removed by a licenced contractor. The hole was filled with sand backfill typical of use in residential development. The property is now vacant. The building had been serviced with municipal water and sanitary sewers and had been heated with natural gas.</li> <li>The adjacent property to the northwest was formerly a gas station and is currently, or has been recently, a repair garage.</li> </ul>

The fire onsite is not represented by a PCA, however it does present an APEC to the Site. The fill material is represented by PCA 30: Importation of Fill Material of Unknown Quality and presents an APEC to the Site.

### 6 SITE RECONNAISSANCE

#### 6.1 Site Visit Information

<b>Date:</b>	July 5, 2022
<b>Time:</b>	1:30 PM to 2:00 PM.
<b>Weather Conditions:</b>	Cloudy, 20°C
<b>Person conducting Site visit:</b>	Geneviève Marcoux, Environmental Technician
<b>Limitation to visit:</b>	None
<b>Property Use</b>	Vacant

<sup>1</sup> St-Onge, D.A. (compilation), 2009: Surficial geology, Lower Ottawa Valley, Ontario-Quebec; Geological Survey of Canada, Map 2140A, scale 1:125,000

<sup>2</sup> Harrison, J.E., 1976. Generalized Bedrock Geology, Ottawa-Hull, Ontario and Quebec, Geological Survey of Canada, Map 1508A. Scale 1:125 000.

Photographs from the Site visit are included in **Appendix H**.

## 6.2 General

### 6.2.1 Hazardous Materials & Unidentified Substances

<b>Hazardous materials:</b>	Not observed
<b>Unidentified substances:</b>	Not observed

### 6.2.2 Storage Tanks & Containers

<b>Aboveground storage tanks (ASTs):</b>	Not observed
<b>Underground storage tanks (USTs):</b>	Not observed
<b>Fill ports, vent pipes:</b>	Not observed
<b>Storage containers:</b>	Not observed

### 6.2.3 Odours

<b>Odours:</b>	Not observed
<b>Air emissions:</b>	Not observed

## 6.3 Exterior Observations

### 6.3.1 Topographic, Geologic & Hydrogeologic

<b>Landscaped &amp; vegetated area:</b>	The Site was treed (overgrown) however prior to the Site visit, the trees had been cut down in anticipation of drilling.
<b>Pavement, roads &amp; driveways:</b>	Not observed.
<b>Topography</b>	Generally flat.
<b>Surface drainage</b>	Not observed.
<b>Drainage improvements:</b>	Storm drain catch basins are present on Clarence Street.
<b>Receives drainage from adjacent Sites:</b>	Not observed.
<b>Watercourses, ditches or standing water:</b>	Not observed.
<b>Other observations:</b>	Gravel/stones were present in the southeast portion of the Site.

### 6.3.2 Structures

No structures are present on the Site.

<b>Structures:</b>	Not Applicable
<b>Location:</b>	Not Applicable
<b>Use:</b>	Not Applicable
<b>Construction date:</b>	Not Applicable
<b>Footprint:</b>	Not Applicable
<b>Floors:</b>	Not Applicable
<b>Basement:</b>	Not Applicable
<b>Exterior finish:</b>	Not Applicable

### 6.3.3 Other Observations

<b>Wells:</b>	A monitoring well was observed on the adjacent property to the northwest.
<b>Sewage disposal:</b>	Not observed.
<b>Pits and lagoons:</b>	Not observed.
<b>Wastewater:</b>	Not observed.
<b>Solid waste:</b>	Not observed. Some miscellaneous waste was observed across the Site including cinderblocks, old cabinetry, and former fencing.
<b>Stained material:</b>	Not observed.
<b>Stressed vegetation:</b>	Not observed.
<b>Fill or previous fill activities:</b>	Possible in the former house footprint.
<b>Earth-moving activity:</b>	Not observed.
<b>Other</b>	Not observed.

### 6.4 Utilities

<b>Potable Water:</b>	Municipal water available
<b>Wastewater:</b>	Municipal sanitary sewer available
<b>Storm Sewer:</b>	Available
<b>Electricity:</b>	Available
<b>Telephone:</b>	Available
<b>Natural Gas:</b>	Available

### 6.5 Interior of Structures

No structures are present on the Site.

<b>Heating Systems</b>	Not Applicable
<b>Cooling Systems</b>	Not Applicable
<b>Floor drains:</b>	Not Applicable
<b>Sumps:</b>	Not Applicable
<b>Paint booth:</b>	Not Applicable
<b>Staining or corrosion (other than water):</b>	Not Applicable
<b>Mechanical equipment:</b>	Not Applicable
<b>Interior finishing</b>	Not Applicable
<b>Other:</b>	Not Applicable

### 6.6 Adjacent Land Use

Current land uses of adjoining properties were observed from the property limits and publicly accessible locations to assess potential impacts to the Site that may arise from off-site operations. Properties surrounding the subject Site are as follows:

<b>North:</b>	Commercial (garage northwest) and institutional (former community outreach center and church north)
<b>South:</b>	Clarence Street followed by residential
<b>East:</b>	Residential
<b>West</b>	Residential

### 6.7 Special Attention Items

Eleven chemical contaminants have been identified under the Occupational Health and Safety Act (OHSA) and regulations have been set in place to prohibit, regulate, restrict, limit or control workers exposure to these substances. Other hazardous materials not included in the OHSA but under the Environmental Protection Act were also observed. The observations presented herein do not constitute a designated substance/hazardous material survey but are rather for information purposes only.

#### 6.7.1 Designated Substances

<p><b>Asbestos Containing Material (ACM)</b>                  Since the late 1970's the manufacture and use of asbestos containing building materials started to decrease. It is commonly presumed that buildings constructed prior to 1980 are more likely to contain both friable and non-friable forms of asbestos. General buildings constructed up to the mid 1980's are more likely to contain non-friable asbestos (flooring, joint compound).                  Not Applicable.</p>
<p><b>Lead</b></p>

Lead may be present in a variety of building materials including paint and water distributions pipes, however, lead based paints (LBP) are considered the most significant hazard. According to published information by Health Canada concerning LBP, buildings constructed before 1980 may contain lead-based interior and exterior paints.

Not Applicable.

**Mercury**

Minor amounts of mercury are commonly found in a variety of building material including mercury vapour lamps, fluorescent light tubing and thermostats and other electrically control switches.

Not Applicable.

**Others**

No other designated substances were identified (i.e. arsenic, ethylene oxide, silica, vinyl chloride, benzene, coke oven emissions, acrylonitrile or isocyanates).

6.7.2 Other Hazardous Building Materials/Items

**Microbial Contamination and Mould:**

Not Applicable.

**Ozone-Depleting Substances (ODS):**

ODS such as chlorofluorocarbons (CFC) and hydrochlorofluorocarbon (HCFC) are typically found in refrigeration equipment, air conditioners, aerosols, cleaning solvents and fire extinguishers. Federal regulations required the elimination of production and import of CFC and a freeze on the production and import of HCFC by January 1, 1996. The regulations govern only the production and import therefore these materials are still used as long as a supply is in place.

Not Applicable.

**Polychlorinated Biphenyls (PCB):**

The Federal Chlorinated biphenyls Regulation, SOR/91-152 prohibits PCBs from being used in products, equipment, machinery, electrical transformers and capacitors which were manufactured or imported into the country after July 1, 1980. However, older equipment in use after this date may still contain PCBs if the equipment fluid has not been replaced. PCB-containing equipment can also include fluorescent, mercury, and sodium vapour light ballasts.

No transformers were observed in the vicinity of the Site.

**Urea Formaldehyde Foam Insulation (UFFI):**

UFFI was widely used as an insulating material until December 1980 when a ban was enacted under the Hazardous Products Act. UFFI was commonly injected through walls by drilling injections holes in roof structures, ceilings and overhangs.

Not Applicable.

**Radon:**

Radon gas is a product of the decay series of uranium that is commonly found in geological units that contain black shale, sandstone or granite. Radon can percolate up through the soil where it may accumulate in basement of buildings with cracks or joints in the foundation. Because the existence of radon is dependent upon geological factors, it is more a regional concern than site specific. Based on the review of radon maps of Eastern Ontario, radon levels in the area of the Site are low to moderate. Exposure to radon can lead to increased risk of developing lung cancer.

**Electric and Magnetic Fields:**

Electromagnetic fields are generally associated with high frequency power lines. No high voltage power lines were noted within 250 m of the Site.

**Noise and Vibration:**

Noise and vibration are typical of an urban environment (i.e. traffic).

**Methane:**

Methane gas is a colourless and odourless gas commonly formed by the decomposition of organic material. 350 King Edward is listed as a former landfill that had been in operation prior to 1925. It is located approximately 130 m south-southeast of the Site. Due to its distance from the Site, the risk of methane is considered low.

**7 REVIEW AND EVALUATION OF INFORMATION**

**7.1 Current and Past Uses**

Below is a summary of the current and past uses of 211 Clarence Street:

Year	Name of Owner	Description of Property Use	Property Use	Source of Information
At least 1878 - 2010	Unknown (Hayat and Massoud Azzi prior to 2010)	Residential	Residential	Fire insurance plans, land title search, aerial photographs, city directories
2010 - 2016	Clarence Gate Holdings Inc.	Residential	Residential	Land title search, interview, aerial photographs.
2016 - Present	Clarence Gate Holdings Inc.	Vacant	Vacant	Land title search, interview, aerial photographs.

**7.2 Potentially Contaminating Activity & Areas of Potential Environmental Concern**

A potentially contaminating activity is a use or activity set out in Table 2 of Schedule D of the O. Reg. 153/04. These activities are summarized in the Table included in **Appendix I**. The activities on the Site and lands within 250 m generally consist of residential and commercial.

**7.2.1 Potential Contaminating Activities**

Based on the results of the Phase I Environmental Site Assessment the following potentially contaminating activities (PCAs) as well as their location and likelihood to contribute to an on-site APEC were identified:

# on Fig	O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
1	<b>Unlisted PCA:</b> Firewater spill	On-Site	The residence on-Site was damaged by a fire in 2016 (interview).	As the PCA is on-site, it is considered an APEC.
2	<b>PCA 30:</b> Importation of Fill Material of Unknown Quality	On-Site	Following demolition of the residence, the area was backfilled with sand (interview).	As the PCA is on-site, it is considered an APEC.
3	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	305 Cumberland Street, adjacent northwest of the Site.	Present from at least 1922 to 1992 as determined from FIPs, city directories and Fuel Storage Tank database.	Based on its proximity to the Site, it is considered an APEC to the north portion of the Site.
4	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	309 Cumberland Street, adjacent west of the Site.	Present from at least 1962 to 1982 as determined by the city directories.	Based on its proximity to the Site, it is considered an APEC to the western portion of the Site.
5	<b>PCA 9:</b> Coal Gasification <b>PCA 58:</b> Waste Disposal and Waste Management <b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 130 m south-southeast of the Site.	Coal gasification plant present from at least 1878 to 1915 as determined from FIPs. Coal storage occurred in the western portion which is south of the Site. Listed as a landfill prior to 1925. A diesel UST with a 13,650 L capacity was installed in 1990.	Based on its position up- to trans-gradient of the Site, it is considered an APEC to the Site.
6	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 170 m north of the Site.	Garage with fuel oil storage tank in at least 1922 (FIPs).	Based on its position down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
7	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 170 m north of the Site.	Garage with underground storage tank from at least 1922 –1958 (FIPs).	Based on its position down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
8	<b>PCA 31:</b> Ink Manufacturing, Processing and Bulk Storage	Approx. 170 m north of the Site.	Printing facility form at least 1922 – 1970 (FIPs and Intera Report)	Based on its position down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
9	<b>PCA 24:</b> Fire Training	Approx. 210 m south of the Site.	Fire Station No. 4 is listed as a training school from	Based on its location up-gradient, it is considered an APEC.

# on Fig	O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
			at least 1922- 1958 (FIPs)	
10	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.  <b>PCA 10:</b> Commercial Autobody Shop	Approx. 175 m southwest of the Site.	230 Gallon gasoline storage tank from at least 1922 – 1958 (FIPs) and garage: “repairs and paint shop” in 1922.	Based on its position trans-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
11	<b>PCA 34:</b> Metal Fabrication	Approx. 175 m west of the Site.	Aluminum product manufacturer in at least 1948 (FIPs)	Based on its position trans-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
12	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 100 m northeast of the Site	Gasoline service station with three (3) USTs from at least 1958 to 2009 (FIPs and spill database). Also listed as Oil Changers with a fuel storage tank.	Based on its position trans- to down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
13	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 150 m northeast of the Site.	Gasoline service station with four (4) USTs from at least 1958 to 1989 (FIPs and multiple fuel storage tank databases).	Based on its position trans- to down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
14	<b>PCA 33:</b> Metal treatment, coating, plating, and finishing.	Approx. 200 m northeast of the Site.	Brass Manufacturer in at least 1958 (FIPs).	Based on its position trans-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
15	<b>PCA 10:</b> Commercial Autobody Shop	Approx. 245 m south of the Site.	Repair garage and paint shop in at least 1922 (FIPs)	Based on its location up-gradient, it is considered an APEC.
16	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 50 m west of the Site.	Oil tank present prior to 2015 as indicated by a spill that occurred during its removal.	Based on its position trans- to down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
17	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 130 m east of the Site.	Gasoline services station as described in a spill that occurred in 1991.	Based on its position trans-gradient of the Site, it is not considered likely to

# on Fig	O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
				have contributed to an on-Site APEC.
18	<b>PCA 55:</b> Transformer Manufacturing, Processing and Use	Approx. 140 m southeast of the Site.	Transformer use as indicated by a spill in 1988.	Based on its position trans-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
19	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	Approx. 130 m north of the Site.	USTs from at least 1985 to 1993 as indicated through multiple fuel storage tank databases.	Based on the position trans- to down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
20	<b>PCA 37:</b> Operation of Dry Cleaning Equipment (where chemicals are used)	Approx. 210 m southwest of the Site.	Generator of dry cleaning chemicals from 1986 to 1998.	Based on its position trans-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.
21	<b>PCA 37:</b> Operation of Dry Cleaning Equipment (where chemicals are used)	Approx. 220 m northwest of the Site.	Generator of dry cleaning chemicals from 1994 to 2015 and listed un dry cleaning facilities database.	Based on its position down-gradient of the Site, it is not considered likely to have contributed to an on-Site APEC.

### 7.2.2 Areas of Potential Environmental Contamination (APECs)

Based on the assessment of the PCAs identified within the Phase I Study Area, the following Areas of Potential Environmental Concern (APECs), their contributing PCA, the associated contaminants of potential concern (COPC), and the potentially contaminated media, are detailed in the table below:

APEC #	PCA	Location of PCA	Location of APEC On-Site	COPCs	Media Potentially Impacted
A	<b>#1 PCA 30:</b> Importation of Fill of Unknown Quality	On-Site	Southwest corner of the Site.	PAH, PCB, metals including cyanide and mercury, and inorganics	Soil and groundwater
B	<b>#2 Unlisted PCA:</b> Firewater spill	On-Site	Southwest corner of the Site.	PAH, PCB, metals including cyanide and mercury, and inorganics	Soil and groundwater
C	<b>#3 PCA 28:</b> Gasoline and Associated	305 Cumberland Street,	Northwest portion of the Site	PHC, VOC, PCB, and metals	Soil and groundwater

APEC #	PCA	Location of PCA	Location of APEC On-Site	COPCs	Media Potentially Impacted
	Products Storage in Fixed Tanks.	adjacent property to the northwest			
D	<b>#4 PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	309 Cumberland Street, adjacent property to the west	Western portion of the Site	PHC, VOC, PCB, and metals	Soil and groundwater
E	<b>#5 Unlisted PCA:</b> Coal Storage	Approx. 130 m south of the Site.	Southern portion of the Site	PAH	Soil and groundwater
F	<b>PCA 10:</b> Commercial Autobody Shop	Approx. 245 m south of the Site.	Southern portion of the Site	PHC, VOC, PAH, PCB, and metals	Soil and groundwater

Notes: VOC – Volatile Organic Compounds  
 PHC – Petroleum Hydrocarbons  
 PCB – Polychlorinated biphenyls  
 PAH – Polycyclic Aromatic Hydrocarbons

## 8 PHASE I CONCEPTUAL SITE MODEL

The location of the Site is shown in the attached **Figure 1** and the current layout of the Site is shown in the attached **Figure 2**. The Phase I ESA identified the following:

- The Site is rectangular in shape with an area of approximately 285 m<sup>2</sup> (0.07 acres). The Site is current vacant. The property was developed with a residence from at least 1878 until 2016 at which point demolition of the house was requested by the City of Ottawa due to fire damage.
- The nearest open water body identified is the Rideau River located approximately 585 m northeast of the Site. The Ottawa River is approximately 835 m northwest, and the Rideau Canal is approximately 800 m southwest of the Site. The topography of the Site is generally flat with an elevation of 57 m above mean sea level (amsl). The general area slopes gently to the northeast towards the Rideau River. The inferred groundwater flow direction is towards the north. The activities on the Site and lands within 250 m are residential, institutional, and commercial.

Based on the findings of the Phase I ESA, there are several PCAs, both on-Site and off-Site, that were identified (presented in section 7.2.1 of this report), five of which are considered to be of potential concern that result in APECs are discussed below:

<b>APEC #</b>	<b>PCA</b>	<b>Location of PCA</b>	<b>Location of APEC On-Site</b>	<b>COPCs</b>	<b>Media Potentially Impacted</b>
A	<b>#1 PCA 30:</b> Importation of Fill of Unknown Quality	On-Site	Southwest corner of the Site.	PAH, PCB, metals including cyanide and mercury, and inorganics	Soil and groundwater
B	<b>#2 Unlisted PCA:</b> Firewater spill	On-Site	Southwest corner of the Site.	PAH, PCB, metals including cyanide and mercury, and inorganics	Soil and groundwater
C	<b>#3 PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	305 Cumberland Street, adjacent property to the northwest	Northwest portion of the Site	PHC, VOC, PCB, and metals	Soil and groundwater
D	<b>#4 PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.	309 Cumberland Street, adjacent property to the west	Western portion of the Site	PHC, VOC, PCB, and metals	Soil and groundwater
E	<b>#5 Unlisted PCA:</b> Coal Storage	Approx. 130 m south of the Site.	Southern portion of the Site	PAH	Soil and groundwater
F	<b>PCA 10:</b> Commercial Autobody Shop	Approx. 245 m south of the Site.	Southern portion of the Site	PHC, VOC, PAH, PCB, and metals	Soil and groundwater

Notes: VOC – Volatile Organic Compounds  
 PHC – Petroleum Hydrocarbons  
 PCB – Polychlorinated biphenyls  
 PAH – Polycyclic Aromatic Hydrocarbons

## 9 PHASE I ESA CONCLUSIONS AND RECOMMENDATIONS

Based on the findings of the Phase I ESA, it is recommended that a Phase Two ESA be conducted on the Site. Recommendations to address areas of potential environmental concerns are as follows:

<b>Area of Potential Environmental Concern</b>	<b>Recommendation</b>
<b>APEC A:</b> Fill on-Site in the area of the former residence	Advance one (1) borehole in the southwest corner of the Site and one (1) in the central west portion and complete both as monitoring wells to allow for sampling and analysis of soil and groundwater for contaminants of concern.
<b>APEC B:</b> Firewater spill on-Site	
<b>APEC E:</b> Coal Storage	
<b>APEC F:</b> Former autobody shop	

<b>APEC C:</b> Former USTs adjacent to the northwest of the Site	Advance two (2) boreholes in the north portion of the Site and complete one (1) as a monitoring well to allow for sampling and analysis of soil and groundwater for contaminants of concern.
<b>APEC D:</b> Former USTs adjacent west of the Site	Advance three (3) boreholes along the west portion of the Site and complete two (2) as monitoring wells to allow for sampling and analysis of soil and groundwater for contaminants of concern.

## 10 LIMITATIONS AND USE OF REPORT

The results of this Phase I ESA should not be considered a warranty that the subject property is free from any and all contaminants from former and current practices, other than those noted in this report, nor that all compliance issues have been addressed.

The findings contained in this report are based on data and information collected during the Phase I ESA of the subject property conducted by LRL Associates Ltd. The conclusions and recommendations are based solely on Site-conditions encountered at the time of our inspection on July 5<sup>th</sup>, 2022, supplemented by historical information and data obtained as described in this report. No assurance is made regarding changes in conditions subsequent to the time of this investigation. If additional information is discovered or obtained, LRL Associates Ltd. should be requested to re-evaluate the conclusions presented in this report and to provide amendments as required.

In evaluating the subject property, LRL Associates Ltd. has relied in good faith on information provided by individuals as noted in this report. We assume that the information provided is factual and accurate. We accept no responsibility for any deficiencies, misstatements or inaccuracies contained in this report as a result of omissions, misinterpretation or fraudulent acts of the persons contacted.

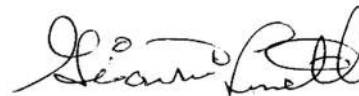

This report is intended for the sole use of Clarence Gate Holdings Inc. and their authorized agents. LRL Associates Ltd. will not be responsible for any use of the information contained within this report by any third party.

In addition, LRL Associates Ltd. will not be responsible for the real or perceived decrease in the property value, its saleability or ability to gain financing, through the reporting of factual information.

Yours truly,  
 LRL Associates Ltd.

Geneviève Marcoux

## Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

# Executive Summary

## **Property Information:**

**Project Property:** 180647 - Phase I ESA  
211 Clarence Street Ottawa ON K1N 5R1

**Project No:** 180647

## **Coordinates:**

**Latitude:** 45.4308217  
**Longitude:** -75.6892367  
**UTM Northing:** 5,031,042.06  
**UTM Easting:** 446,086.26  
**UTM Zone:** 18T

**Elevation:** 200 FT  
61.03 M

## **Order Information:**

**Order No:** 22060600588  
**Date Requested:** June 6, 2022  
**Requested by:** LRL Associates Ltd.  
**Report Type:** Standard Report

## **Historical/Products:**

**City Directory Search** CD - Subject Site plus 10 Adjacent Properties  
**ERIS Xplorer** [ERIS Xplorer](#)  
**Insurance Products** Fire Insurance Maps/Inspection Reports/Site Plans  
**Land Title Search** Current Land Title Search  
**Topographic Map** Ontario Base Map (OBM)

<b>Excavation History:</b>		Excavation for Bank of Canada Building (1940's) Redevelopment, Extension by Department of Public Works Canada (1986)			
<b>Visible Wastes:</b>		Black tar observed during excavation of parts of basement; "black odourous substance" reported from 1986 soil borings on site; pure tar in basement sumps at federal building			
<b>Odour:</b>		Minor odours observed in basement during excavation; Air monitoring studies Health & Welfare Canada within Federal Bldg and Child Care Centre results negative.			
<b>Water Pollution:</b>		Oily contaminated water observed in basement during excavation. PAH in groundwater and sump water samples.			
<b>Site Investigations:</b>		1985 soil borings for Public Works Redevelopment & Extension. 1986 soil borings for tar contamination assessment			
<b>Comments/Remarks:</b>		Site assessment for tar contamination underway. On site augering program complete. "Black odourous substance" noted in majority of boreholes drilled. Samples of soil and water showed PAH characteristic of coal tar, groundwater samples and sump water samples with PAH, pure tar in basement sump of federal building			
<b>Site Description:</b>		The Bytown Consumers Gas Co. operated a retort coal gasification plant of large size at the southwest corner of York and King Edward Streets for street lighting starting in about 1854. The plant operated for about 65 years or until some time in the late 1910s or 1920 at which time the facilities of the Ottawa Gas Co. were relocated to the Lees Avenue site. In the 1880s, the plant employed 25 people and had three large gasometers as well as underground tar wells end tar condensers end gas purifying equipment. The site is now occupied by a Federal Government Office building and parking lot in a residential and public use area. A child care center is located on the adjoining southerly property with parking lots and residences located on other surrounding properties. Two large former gas holding tanks are located below the front lawn of the federal building with a third tank and underground tar well situated below the building. In 1986, the owner of the property, Public Works Canada, commenced excavation as part of an upgrading and redevelopment of the existing building which was originally built in the 1940s. During excavation of the basement and outside of the building, black tar was encountered. Upon advice of Environment Canada and the Ontario Ministry of the Environment, the property owner retained a consultant to assess the coal tar contamination problem at this site. Soil borings and sampling of soils and groundwater have been undertaken at the site on behalf of the owner.			
<b>Potential Environ Impact:</b>		Site Investigations undertaken on behalf of the owner of the property have shown the occurrence of "black odorous substances" in the majority of the 31 boreholes drilled from within and outside of the existing building. These gas plant wastes were found both within and outside of tanks and other structures where tars were expected to accumulate. Chemical analyses of the soil and groundwater samples collected from the site investigation program have shown the presence of PAH characteristic of coal tar. On-site inspections of the sumps in the basement of the federal building have identified the presence of coal tar. An estimated 200-300 L of tar are located in the bottom of the boiler room sump. Given the widespread occurrence of tars on-site and in the sumps there is potential environmental impact related to off-site migration of the wastes and to inhalation of airborne PAH by federal employees working in the building. However, preliminary results from an air monitoring program conducted by Health and Welfare Canada and reported by Public Works Canada staff have shown negligible levels of airborne gas plant wastes and therefore no hazard to human health from such inhalation. The presence of pure coal tar within the boiler room sump is a potential hazard to health for employees who may service or clean the sump both in terms of inhalation and dermal contact. Also the presence of tar within the sump will result in discharge of PAH contaminated water and coal tar to the City sewer system. Off-site migration of gas plant wastes is likely given the occurrence of coal tar near the property boundary, particularly to the northeast along King Edward Avenue. Migration of wastes to the southeast toward the child care center appears less likely. Air monitoring of the child care center recently conducted by Health and Welfare Canada and reported by Center staff has shown no detectable airborne contaminants attributable to coal tar wastes. Inspection of the basements and sump of the child care buildings show no visible or olfactory evidence of gas plant wastes.			
<b>Offsite Disposal Areas:</b>		Unknown

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Nov 2021**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Apr 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Mar 2022**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Apr 30, 2022**

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020****Delisted Fuel Tanks:**

Provincial

DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022****Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Apr 30, 2022****Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Apr 30, 2022****Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Apr 30, 2022****Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Mar 31, 2022****Environmental Issues Inventory System:**

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2021**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Apr 2022**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Feb 28, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2022**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2020**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Feb 28, 2022**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Apr 30, 2022**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Apr 30, 2022**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Apr 30, 2022**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2019**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Apr 2022**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Sep 30, 2021**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2019**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Apr 30, 2022**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Sep 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**Site Visit Photographs**

## SITE VISIT PHOTOGRAPHS

Our File Ref.: 180647

Client: Clarence Gate Holdings Inc.

Project: Phase I Environmental Site Assessment

Site Location: 211 Clarence Street, Ottawa, ON

Photograph No. 1	
Date: 05/07/2022	
Description Facing north towards the Site across Clarence Street.	

Photograph No. 2	
Date: 05/07/2022	
Description Facing north through the center of the Site.	

Photograph No. 3	
Date: 05/07/2022	
Description	
Facing northwest towards the northwest corner of the Site.	

Photograph No. 4	
Date: 05/07/2022	
Description	
Facing east towards the northeast corner of the Site. Fence visible on the right and miscellaneous debris present throughout the northeast corner.	

Photograph No. 5	
Date: 05/07/2022	
Description Facing south along the west portion of the Site.	

Photograph No. 6	
Date: 05/07/2022	
Description Facing northwest. Former location of residence onsite. Presence of miscellaneous debris and former fencing.	

Photograph No. 7	 A photograph showing a pile of construction debris in the southwest corner of a site. The debris includes several long wooden planks, a large piece of yellowish-brown fabric or tarp, and some green weeds growing from the ground. In the background, there is a concrete wall topped with a black metal fence, and a brick building is visible behind the fence.
Date: 05/07/2022	
Description Facing southwest. Debris in the southwest corner of the Site.	

Photograph No. 8	 A photograph showing a street view of adjacent properties to the south. On the left is a light-colored building. In the center, there is a wooden fence and some greenery. On the right is a dark-colored, multi-story residential building with several windows. A dark car is parked in front of the dark building. The sky is overcast.
Date: 05/07/2022	
Description Facing south. Adjacent properties to the south: vacant and multi-tenant residential.	

Photograph No. 9			
Date: 05/07/2022			
Description  Facing northwest. Adjacent property west of the Site: multi-tenant residential.			

Photograph No. 10			
Date: 05/07/2022			
Description  Facing northeast. Adjacent property northwest of the Site: former garage.			

Photograph No. 11	
Date: 05/07/2022	
Description  Facing southeast. Adjacent property north of the Site: Institutional.	

Photograph No. 12	
Date: 05/07/2022	
Description  Facing northeast. Adjacent property to the east: multi-tenant residential.	

## **APPENDIX I**

**Table 2 of Schedule D of O.Reg 153/04**

Ontario Regulation 153/04 – Schedule D  
Summary of Potentially Contaminating Activities & Areas of Potential Environmental Concern

Acid and Alkali Manufacturing, Processing and Bulk Storage	Explosives and Firing Range	Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
Adhesives and Resins Manufacturing, Processing and Bulk Storage	Fertilizer Manufacturing, Processing and Bulk Storage	Pharmaceutical Manufacturing and Processing
Airstrips and Hangars Operation	Fire Retardant Manufacturing, Processing and Bulk Storage	Plastics (including Fibreglass) Manufacturing and Processing
Antifreeze and De-icing Manufacturing and Bulk Storage	Fire Training	Port Activities, including Operation and Maintenance of Wharves and Docks
Asphalt and Bitumen Manufacturing	Flocculants Manufacturing, Processing and Bulk Storage	Pulp, Paper and Paperboard Manufacturing and Processing
Battery Manufacturing, Recycling and Bulk Storage	Foam and Expanded Foam Manufacturing and Processing	Rail Yards, Tracks and Spurs
Boat Manufacturing	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Rubber Manufacturing and Processing
Chemical Manufacturing, Processing and Bulk Storage	Gasoline and Associated Products Storage in Fixed Tanks	Salt Manufacturing, Processing and Bulk Storage
Coal Gasification	Glass Manufacturing	Salvage Yard, including automobile wrecking
Commercial Autobody Shops	Importation of Fill Material of Unknown Quality	Soap and Detergent Manufacturing, Processing and Bulk Storage
Commercial Trucking and Container Terminals	Ink Manufacturing, Processing and Bulk Storage	Solvent Manufacturing, Processing and Bulk Storage
Concrete, Cement and Lime Manufacturing	Iron and Steel Manufacturing and Processing	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
Cosmetics Manufacturing, Processing and Bulk Storage	Metal Treatment, Coating, Plating and Finishing	Tannery
Crude Oil Refining, Processing and Bulk Storage	Metal Fabrication	Textile Manufacturing and Processing
Discharge of Brine related to oil and gas production	Mining, Smelting and Refining; Ore Processing; Tailings Storage	Transformer Manufacturing, Processing and Use
Drum and Barrel and Tank Reconditioning and Recycling	Oil Production	Treatment of Sewage equal to or greater than 10,000 litres per day
Dye Manufacturing, Processing and Bulk Storage	Operation of Dry Cleaning Equipment (where chemicals are used)	Vehicles and Associated Parts Manufacturing
Electricity Generation, Transformation and Power Stations	Ordnance Use	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
Electronic and Computer Equipment Manufacturing	Paints Manufacturing, Processing and Bulk Storage	Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
Explosives and Ammunition Manufacturing, Production and Bulk Storage	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
