

## CERTIFICATION FORM FOR TIA STUDY PM

### TRANSPORTATION IMPACT ASSESSMENT REPORTS

On 14 June 2017, the Council of the City of Ottawa adopted new Transportation Impact Assessment (TIA) Guidelines. In adopting the guidelines, Council established a requirement for those preparing and delivering transportation impact assessments and reports to sign a letter of certification.

Individuals submitting TIA reports will be responsible for all aspects of development-related transportation assessment and reporting, and undertaking such work, in accordance and compliance with the City of Ottawa's Official Plan, the Transportation Master Plan and the Transportation Impact Assessment (2017) Guidelines.

By submitting the attached TIA report (and any associated documents) and signing this document, the individual acknowledges that s/he meets the four criteria listed below.

### CERTIFICATION

- I have reviewed and have a sound understanding of the objectives, needs and requirements of the City of Ottawa's Official Plan, Transportation Master Plan and the Transportation Impact Assessment (2017) Guidelines;
- I have a sound knowledge of industry standard practice with respect to the preparation of transportation impact assessment reports, including multi modal level of service review;
- I have substantial experience (more than 5 years) in undertaking and delivering transportation impact studies (analysis, reporting and geometric design) with strong background knowledge in transportation planning, engineering or traffic operations; and
- I am either a licensed<sup>1</sup> or registered<sup>2</sup> professional in good standing, whose field of expertise is either
  - Transportation engineering
  - Transportation planning

<sup>1,2</sup> License of registration body that oversees the profession is required to have a code of conduct and ethics guidelines that will ensure appropriate conduct and representation for transportation planning and/or transportation engineering works.

Dated at Ottawa this 27 day of October, 2023  
(City)

**Name:** Adam Howell, P. Eng.

**Professional Title:** Senior Project Manager, Transportation Planning

Signature of individual certifier that they meet the above criteria

### OFFICE CONTACT INFORMATION

**Address:** 2611 Queensview Drive, Suite 300

**City / Postal Code:** Ottawa, ON K2B 8K2

**Telephone / Extension:** 613-690-1147

**E-Mail Address:** Adam.howell@wsp.com

### STAMP

## MEMO

**TO:** Josiane Gervais, P.Eng – Project Manager, Infrastructure Approvals  
**FROM:** Adam Howell, P.Eng.  
**SUBJECT:** 1083 Merivale Road – Transportation Safety Memo  
**DATE:** October 23, 2023

---

## INTRODUCTION

This transportation safety memo has been prepared in support of the Site Plan Control Application for the proposed development at 1083 Merivale Road. The site currently includes a vacated single-family detached house. The proposed redevelopment of the site is for the construction of a multi-storey residential care facility with 53 units, cafeteria, kitchen and programming space as well as a basement facility to be utilized by the Shepherds of Good Hope.

In accordance with the City of Ottawa’s 2017 Transportation Impact Assessment (TIA) Guidelines, a screening form was prepared and submitted to the City for their review, see **Appendix A**. The screening form identified a TIA would be required due to the safety trigger being met. As the trip generation trigger was not met and following discussions with the City of Ottawa TPM staff, it was indicated that a full TIA would not be required and that the requirements for the TIA would be met with the preparation of a transportation safety memo assessing two primary safety concerns: the collision history at the Merivale/Kirkwood intersection, and the access design of the driveway on Merivale Road.

## EXISTING CONDITIONS

The proposed development, shown in **Figure 1**, is located on Merivale Road at the Kirkwood Avenue intersection. The development will share a parking lot with the existing building at 1095 Merivale Road that is accessible by Emperor Avenue. Additionally, the development will be accessible by an existing driveway on Merivale Road.

*Figure 1: Location of Proposed Development (Source: Google Maps)*

The access on Merivale Road is less than 5m south of the stop line on the southern leg of the Merivale/Kirkwood intersection. The access is a right-in/right-out, does not connect to the parking lot on Emperor Avenue and will be used by delivery trucks and as a fire route only. It is anticipated that up to two food/supply deliveries will be made per day, generally between 8 a.m. and noon. The site plan for the proposed development can be found in **Appendix B**.

## SAFETY CONCERNS

### COLLISION HISTORY

A review of publicly available collision data indicated that there were 36 collisions at the Merivale/Kirkwood intersection over a 5-year period<sup>1</sup>. The detailed collision history from 2015-2019 was acquired from the City of Ottawa for additional analysis. Some key findings include:

- The maximum number of collisions in a given year was nine (2016 and 2019) which on an annual basis was not enough to identify an upward or downward trend in collision rate.
- There were no fatal collisions.
- 83% of the recorded collisions resulted in property damage only.
- Nearly 70% (25 of 36) collisions occurred during daylight.
- Less than 30% (10 of 36) collisions occurred during the anticipated delivery window of 8 a.m. to noon.
- The most common type of collision was as a result of a turning movement (36%).
- Rear end collisions accounted for 22% and sideswipes for 19%.
- Nearly half of the collisions (17 of 36) occurred in the intersection between opposing streams of traffic.
- Only eight collisions occurred on the south leg of the intersection.
- Of the eight collisions on the south leg of the intersection, five occurred in the NBL turning lane (including rear-end collisions, sideswipes and single motor vehicle collisions)

The detailed summary of collisions from 2015-2019 and additional analysis tables are attached as **Appendix C**.

The results of the collision history analysis indicate that there is no consistent pattern to the collisions at the intersection, that the collision severity is relatively low and that there has been no growth in the frequency of collisions from 2015-2019. Additionally, only a small portion of collisions occurred on the south leg of the intersection with most occurring in the NBL turning lane.

### ACCESS DESIGN

The proposed development and its existing driveway are located just south (less than 5m) of the Merivale/Kirkwood intersection. The truck loading area, as shown on the proposed site plan, will be accessible via the Merivale driveway. Additionally, the Merivale Road access would be a fire access route. An AutoTurn analysis for the anticipated delivery vehicles (MSU) and Fire Trucks was carried out is attached as **Appendix D**. The MSU is able to safely turn around within the site thereby not requiring any reverse movements within the public right of way. The fire truck is capable of turning into the site; the fire access route is less than 90m long on the site and therefore per Ontario Building Code (Section 3.2.5.6), there is no requirement for the fire truck to be able to turn around within the site. A fire truck on departure would reverse back out to Merivale Road, however this is done with flagging operations by the firefighters.

Finally, the 2017 Transportation Association of Canada (TAC) Geometric Design Guide for Canadian Roads requires a sight distance for right-turns from a minor road of 120 m for a single-unit truck along a road with a design speed of 50 km/h. From our desktop review of the access, see **Figure 2**, there appear to be no sightline issues.

---

<sup>1</sup> <https://maps.bikeottawa.ca/collisions>

Figure 2: Desktop Sightline Review

## CONCLUSION

As requested by the City of Ottawa, a transportation safety analysis was conducted for the proposed development at 1083 Merivale Road. Both the collision history and the Merivale Road access were analyzed for the site. The collision history indicated no patterns of growth or repetition at the Merivale/Kirkwood intersection. Moreover, only eight collisions over a 5-year period occurred on the south leg of the intersection, where the driveway for the proposed development is located, with five of those collisions occurring in the NBL turning lane.

The AutoTurn analysis indicated that both MSUs and Fire Trucks will be able to manoeuvre the right-in/right-out access along Merivale Road without issue. The desktop sightline review indicated that there are no obstructions within the line of sight for exiting trucks turning back on to Merivale Road.

# APPENDIX

# A SCREENING FORM

**City of Ottawa 2017 TIA Guidelines Screening Form**

**1. Description of Proposed Development**

Municipal Address	1083 Merivale Road
Description of Location	Located at the intersection of Merivale Road and Kirkwood Avenue
Land Use Classification	Residential Care Facility
Development Size (units)	70 units
Development Size (m <sup>2</sup> )	726
Number of Accesses and Locations	Two (both existing): 1 on Merivale Road and 1 on Emperor Avenue
Phase of Development	1
Buildout Year	2024

**If available, please attach a sketch of the development or site plan to this form.**

**2. Trip Generation Trigger**

Considering the Development’s Land Use type and Size (as filled out in the previous section), please refer to the Trip Generation Trigger checks below.

Land Use Type	Minimum Development Size
Single-family homes	40 units
Townhomes or apartments	90 units
Office	3,500 m <sup>2</sup>
Industrial	5,000 m <sup>2</sup>
Fast-food restaurant or coffee shop	100 m <sup>2</sup>
Destination retail	1,000 m <sup>2</sup>
Gas station or convenience market	75 m <sup>2</sup>

*\* If the development has a land use type other than what is presented in the table above, estimates of person-trip generation may be made based on average trip generation characteristics represented in the current edition of the Institute of Transportation Engineers (ITE) Trip Generation Manual.*

**If the proposed development size is greater than the sizes identified above, the Trip Generation Trigger is satisfied.**

ITE LUC 254 (Congregate Care Facility): Less than 20 peak hour trips

### 3. Location Triggers

	Yes	No
Does the development propose a new driveway to a boundary street that is designated as part of the City’s Transit Priority, Rapid Transit or Spine Bicycle Networks?		X
Is the development in a Design Priority Area (DPA) or Transit-oriented Development (TOD) zone?*		X

\*DPA and TOD are identified in the City of Ottawa Official Plan (DPA in Section 2.5.1 and Schedules A and B; TOD in Annex 6). See Chapter 4 for a list of City of Ottawa Planning and Engineering documents that support the completion of TIA).

**If any of the above questions were answered with ‘Yes,’ the Location Trigger is satisfied.**

### 4. Safety Triggers

	Yes	No
Are posted speed limits on a boundary street are 80 km/hr or greater?		X
Are there any horizontal/vertical curvatures on a boundary street limits sight lines at a proposed driveway?		X
Is the proposed driveway within the area of influence of an adjacent traffic signal or roundabout (i.e. within 300 m of intersection in rural conditions, or within 150 m of intersection in urban/ suburban conditions)?		X
Is the proposed driveway within auxiliary lanes of an intersection?		X
Does the proposed driveway make use of an existing median break that serves an existing site?		X
Is there is a documented history of traffic operations or safety concerns on the boundary streets within 500 m of the development?		X
Does the development include a drive-thru facility?		X

**If any of the above questions were answered with ‘Yes,’ the Safety Trigger is satisfied.**

### 5. Summary

	Yes	No
Does the development satisfy the Trip Generation Trigger?		X
Does the development satisfy the Location Trigger?		X
Does the development satisfy the Safety Trigger?		X

**If none of the triggers are satisfied, the TIA Study is complete. If one or more of the triggers is satisfied, the TIA Study must continue into the next stage (Screening and Scoping).**

## COMMENT AND RESPONSE LOG

**TO:** File  
**FROM:** Adam Howell, P.Eng.  
**SUBJECT:** 1083-1095 Merivale Road Transportation Impact Assessment (current to October 23, 2023)  
**DATE:** October 23, 2023

---

## TRANSPORTATION SAFETY MEMO

WSP Submission January 19, 2023  
City Comments Received July 25, 2023

**1. Transportation Safety Memo:**

- a) The TAC right-turn lane sightline review is to ensure a truck turning right out of the site access can see 120m upstream.**

**Response:** Noted, and updated language in memo to reflect that the 120m requirement is for a truck

- b) The plan used to demonstrate turning movements is different than the Site Plan submitted as part of the architectural package. Ensure the newest site plan can accommodate MSU movements.**

**Response:** Site plan updated in Memo. Turning template analysis updated accordingly. MSU is capable of entering and exiting along the Merivale access.

**2. There are currently two curb depressions along the Merivale Road frontage to 1095 Merivale. Ensure the depressed curb outside of the proposed entrance is reinstated with full height curb.**

**Response:** Noted and updated on Site Plan.

**3. The proposed site access is 15.71m wide at the curb edge and does not meet the City's Private Approach Bylaw Section 25.1.c. "No private approach intended for two-way vehicular traffic shall exceed 9 metres in width at the street line, and at the curb line or roadway edge." Narrow the access at the curb edge as much as possible, while still allowing for fire truck movements.**

**Response:** Noted and updated on Site Plan.

**4. Show curb radii dimensions at the site access.**

**Response:** Noted and updated on Site Plan.

5. **The loading/staging area cannot block the fire route.**

Response: Noted and updated on Site Plan.

6. **The 8.3% running slope on the ramps at the front of the building exceed AODA standards for ramps [80.24(1)4]. Ensure a slope of 1:15 is not exceeded.**

Response: Noted and updated on Site Plan.

7. **Show dimensions for pedestrian pathways throughout the site.**

Response: Noted and updated on Site Plan.
