1.0 EXECUTIVE SUMMARY

WSP Canada (WSP) was retained by The Canada Life Assurance Company c/o GWL Realty Advisors Inc. (GWL) to conduct a Phase One Environmental Site Assessment (Phase One ESA) of the property located at 170 Slater Street in Ottawa, Ontario, (the “Site” or “Phase One Property”) as shown on Figure 1 (Site Plan).

The Phase One Property is a rectangular shaped parcel of land that is approximately 0.42 hectares (ha) in area and located at 170 Slater Street in the Centretown neighbourhood of downtown Ottawa, Ontario. It is bound by Slater Street to the north, Laurier Avenue West to the south, and commercial buildings to the east (110 and 124 O’Connor Street) and west (269 Laurier Avenue West). It is currently occupied by a three and a half or seven staggered storey commercial aboveground parking garage that was reportedly constructed in 1985. WSP understands that the Site will be undergoing future redevelopment to a multi-use high-rise commercial and residential building with two levels of underground parking. As the proposed Site redevelopment involves a change in property use from commercial to residential, filling of a Record of Site Condition (RSC) is required. This Phase One ESA conforms with Ontario Regulation 153/04 (as amended) to support the filing of an RSC with the Ministry of Environment, Conservation and Parks (MECP).

The primary objective of the Phase **One** ESA is to identify, based on readily available information and without an intrusive investigation, actual or potential issues of environmental concern related to former practices at the Site and/or in the immediately surrounding area. In order to fulfill the general objectives of this Phase One ESA, the scope of work consisted of a historical records review, Site reconnaissance, and reviewing and technically assessing the information collected.

Based on the information obtained and reviewed as part of this Phase One ESA, six APECs were identified at the Phase One Property. Accordingly, a Phase Two ESA is recommended.

2.0 INTRODUCTION

WSP Canada (WSP) was retained by The Canada Life Assurance Company c/o GWL Realty Advisors Inc. (GWL) to conduct a Phase One Environmental Site Assessment (Phase One ESA) of the property located at 170 Slater Street in Ottawa, Ontario, (the “Site” or “Phase One Property”) as shown on Figure 1 (Site Plan).

The Phase One Property is currently occupied by an above ground parking garage. WSP understands that the Site will be undergoing future redevelopment to a multi-use high-rise commercial and residential building with two levels of underground parking. As the proposed Site redevelopment involves a change in property use from commercial to residential, filling of a Record of Site Condition (RSC) is required. This Phase One ESA conforms with Ontario Regulation 153/04 (as amended) to support the filing of an RSC with the Ministry of Environment, Conservation and Parks (MECP).

2.1 Phase One Property Information

The Phase One Property is a rectangular shaped parcel of land that is approximately 0.42 hectares (ha) in plan area and located at 170 Slater Street in the Centretown neighbourhood of downtown Ottawa, Ontario.

The Phase One Property is legally described as:

Plan 3922

South Slater Street: East Half of Lot 40, Lot 41 and West Half of Lot 42

North Laurier Avenue: East Half of Lot 40, Lot 41, and West Half of Lot 42

The Phase One Property is located within a mixed commercial and residential area and is bound by Slater Street to the north, Laurier Avenue West to the south, and commercial buildings to the east (110 and 124 O’Connor Street) and west (269 Laurier Avenue West).

The Phase One Property is currently occupied by a three and a half or seven staggered storey commercial aboveground parking garage that was reportedly constructed in 1985.

2.2 Property Owner Contact Information

The Phase One Property is owned by The Canada Life Assurance Company as represented by Andrew Hanna. The contact information for Andrew Hanna is provided in the following table.

Project Contact:	Andrew Hanna
Address:	33 Yonge Street, Suite 1000, Toronto, ON, M5G 1G4
Phone Number:	416-507-2809

3.0 SCOPE OF INVESTIGATION

The scope of the Phase One ESA is only sufficient in identifying issues of potential environmental concern which are obvious from a visual examination of surface features or from available sources of information. No soil, water, liquid, biological (including mould), gas, product or chemical sampling or analysis were carried out as part of this Phase One ESA. WSP did not conduct a health and safety, engineering, or structural evaluation of the Site as part of the scope of work.

The Phase One ESA was conducted in accordance with O. Reg. 153/04 (as amended). According to O.Reg. 153/04, the general objectives of a Phase One ESA are the following:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property.
- To determine if a Phase Two ESA is required.
- To provide the basis for carrying out a Phase Two ESA if one is required.
- To provide adequate preliminary information about environmental conditions in the land or water on, in, or under the Phase One Property in the event of a Risk Assessment is required following the completion of a Phase Two ESA.

In order to fulfill the general objectives of this Phase One ESA, the scope of work consisted of the following activities:

Historical records review:

- Interviews with persons knowledgeable of the subject site;
- Site reconnaissance;
- Reviewing and technically assessing the information collected; and,
- Preparing this phase one ESA report.

In accordance with O. Reg. 153/04, CGI has determined a “phase one study area” that is outside the Phase One Property but that is considered in the assessment because uses and activities in this larger area may have affected the environmental condition of the Phase One Property. Assessment of the Phase One Property and phase one study area has incorporated the determination of O. Reg. 153/04’s prescribed list of “potentially contaminating activities” (PCAs) as defined in Table 2, Schedule D of O. Reg. 153/04. Table 2, Schedule D is reproduced for reference as the table below. Any identified PCAs are reviewed by WSP’s Qualified Person (QP) to determine Areas of Potential Environmental Concern (APECs) on the Phase One Property, if any.

PCA#	Definition
1	Acid and Alkali Manufacturing, Processing and Bulk Storage
2	Adhesives and Resins Manufacturing, Processing and Bulk Storage
3	Airstrips and Hangars Operation
4	Antifreeze and De-icing Manufacturing and Bulk Storage
5	Asphalt and Bitumen Manufacturing
6	Battery Manufacturing, Recycling and Bulk Storage
7	Boat Manufacturing
8	Chemical Manufacturing, Processing and Bulk Storage
9	Coal Gasification
10	Commercial Autobody Shops
11	Commercial Trucking and Container Terminals

PCA#	Definition
12	Concrete, Cement and Lime Manufacturing
13	Cosmetics Manufacturing, Processing and Bulk Storage
14	Crude Oil Refining, Processing and Bulk Storage
15	Discharge of Brine related to oil and gas production
16	Drum and Barrel and Tank Reconditioning and Recycling
17	Dye Manufacturing, Processing and Bulk Storage
18	Electricity Generation, Transformation and Power Stations
19	Electronic and Computer Equipment Manufacturing
20	Explosives and Ammunition Manufacturing, Production and Bulk Storage
21	Explosives and Firing Range
22	Fertilizer Manufacturing, Processing and Bulk Storage
23	Fire Retardant Manufacturing, Processing and Bulk Storage
24	Fire Training
25	Flocculants Manufacturing, Processing and Bulk Storage
26	Foam and Expanded Foam Manufacturing and Processing
27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
28	Gasoline and Associated Products Storage in Fixed Tanks
29	Glass Manufacturing
30	Importation of Fill Material of Unknown Quality
31	Ink Manufacturing, Processing and Bulk Storage
32	Iron and Steel Manufacturing and Processing
33	Metal Treatment, Coating, Plating and Finishing
34	Metal Fabrication
35	Mining, Smelting and Refining; Ore Processing; Tailings Storage
36	Oil Production
37	Operation of Dry-Cleaning Equipment (where chemicals are used)
38	Ordnance Use
39	Paints Manufacturing, Processing and Bulk Storage
40	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
41	Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
42	Pharmaceutical Manufacturing and Processing
43	Plastics (including Fibreglass) Manufacturing and Processing
44	Port Activities, including Operation and Maintenance of Wharves and Docks
45	Pulp, Paper and Paperboard Manufacturing and Processing
46	Rail Yards, Tracks and Spurs
47	Rubber Manufacturing and Processing
48	Salt Manufacturing, Processing and Bulk Storage

PCA#	Definition
49	Salvage Yard, including automobile wrecking
50	Soap and Detergent Manufacturing, Processing and Bulk Storage
51	Solvent Manufacturing, Processing and Bulk Storage
52	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
53	Tannery
54	Textile Manufacturing and Processing
55	Transformer Manufacturing, Processing and Use
56	Treatment of Sewage equal to or greater than 10,000 litres per day
57	Vehicles and Associated Parts Manufacturing
58	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
59	Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products

4.0 RECORDS REVIEW

4.1 General

4.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Phase One Property. Based on WSP's review of the historical and current information compiled as part of this Phase One ESA for the Phase One Property and surrounding area, and observations of neighbouring properties made during the Site reconnaissance, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA. The Phase One Study Area is shown on Figure 2.

4.1.2 First Developed Use Determination

Based on information acquired during the records review and interviews, the first developed use of the phase one property is believed to have been for commercial purposes. Chain of title information indicates that the Phase One Property was owned by the crown prior to June 1824, then privately owned from 1824 to 1917, but was purchased by Eclipse Platin & Sales Co. Ltd. In June 1917. Fire insurance plans (FIPs), show the Phase One Property was historically occupied by a machine shop (1912), a Marble Works (1902/1912), a "repairs garage" (1925). Other than the title information, no information related to the use of the Phase One Property prior to 1912 is available.

4.1.3 Fire Insurance Plans

Fire Insurance Plans (FIPs) were obtained from the 2013 Phase I ESA (refer to Section 4.1.6). As FIPs were only produced in Canada from the 1870s through the 1970s, it was not necessary to conduct an additional search of available FIPs for the site. FIPs for the years 1912, 1925, and 1956 were reviewed. Information from the FIPs relevant to the environmental condition of the Phase One Property is summarised in the table below.

Date	Sheet	Observations
1912	36	<p>Phase One Property: A Marble Works building is present on the west side of the Phase One Property, a machine shop is present on the north central portion of the property. Five total buildings/structures on the Phase One Property.</p> <p>Covered portion of phase one study area: North to Albert Street, south to Laurier Avenue West, west to Bank Street, East to Metcalf Street. Surrounding area appears to be heavily developed with commercial and residential properties. Large garage present at 295 Laurier Avenue west approximately 50 m west of the Phase One Property.</p>
1925	112	<p>Phase one property: Campbell Motors auto garage takes up a large portion of the eastern side of the property. Two USTs are observed immediately north of Campbell motors and on the Phase One Property. Another repair garage is observed on the west-central portion of the Phase One Property. A building labeled “Roneo Co” is observed at the northwest corner of the property.</p> <p>Covered portion of phase one study area: North to Albert Street, south to Laurier Avenue West, west to Bank Street, east to Metcalf Street. Surrounding area appears to be heavily developed with commercial and residential properties</p>
1956	112	<p>Phase one property: Campbell Motors auto garage takes up a large portion of the eastern side of the property. One UST is observed immediately north of Campbell motors and on the Phase One Property. Another repair garage is observed on the west-central portion of the property. A paint shop is observed at the northwest corner of the property.</p> <p>Covered portion of phase one study area: North to Albert Street, south to Laurier Avenue West, west to Bank Street, east to Metcalf Street. Surrounding area appears to be heavily developed with commercial and residential properties.</p>

Based on the FIP maps, the Phase One Property used to be divided into multiple lots and included municipal addresses: 184, 186, 188 and 190 Slater, and 261 and 263 Laurier Avenue West.

4.1.4 City Directories

Historical city directory information was obtained from the 2013 Phase I ESA (refer to Section 4.1.6). The 170 Slater Street address was listed in the City Directory as follows: 1924: residential with one tenant, 1944 and 1949: Navel Service Directorate Building; 1929, 1934, 1954, 1959, 1965, and 1969: Campbell’s Motors; and 1984, 2004/2005, and 2010: Gilad Parking. Based on the City Directory information, Campbell motors was present on the Phase One Property from at least 1929 through at least 1969 and redevelopment to a parking garage began in 1984.

4.1.5 Chain of Title

WSP retained Environmental Risk Information Services Ltd. (ERIS) to conduct a historical title search. Chain of Title information is summarised in the table below.

Owner's Name	Dates of Ownership
Crown	Prior to June 17, 1824
John B. Honey	June 17, 1824 to June 20, 1826
Nicholas Sparks	June 20, 1826 to April 22, 1862
James Slater	April 22, 1862 to October 3, 1868
Abraham Pratt	October 3, 1868 to October 5, 1868
Archibald Smirl	October 5, 1868 to September 1, 1873
William G. Workman	September 1, 1873 to October 1, 1888
Eliza Workman	October 1, 1888 to December 17, 1894
Hugh A. Stewart	December 17, 1894 to May 20, 1901
John Fisher Wood	May 20, 1901 to November 6, 1906
Edward A. Oliver	November 6, 1906 to July 6, 1910
William J. Mills	July 6, 1910 to June 16, 1917
Eclipse Plating & Sales Co. Ltd.	June 16, 1917 to September 7, 1920
Isadore Sugarman	September 7, 1920 to March 9, 1935
Mary A. Davis	March 9, 1935 to June 3, 1941
Frederick H. Blackburn	June 3, 1941 to December 5, 1945
G. Manson Campbell	December 5, 1945 to March 12, 1946
Manbeth Realty Group	March 12, 1946 to November 3, 1947
Roneo Company of Canada Limited	November 3, 1947 to October 27, 1953
Loretta McKee	October 27, 1953 to September 20, 1957
Edmund Boussaly	September 20, 1957 to February 3, 1964
Rene Laham	February 3, 1964 to April 1, 1965
William F.G. Williams	April 1, 1965 to November 5, 1970
Byward Holdings Ltd.	November 5, 1970 to December 31, 1987
Olympia & York Developments Limited Arnon Development Corporation Limited, Zeev Vered	December 31, 1987 to December 28, 1989
London Life Insurance Company	December 28, 1989 to December 29, 1992
Arnon Corporation	December 29, 1992 to April 29, 1996
London Life Insurance Company, Arnon Development Corporation, Zeev Vered	April 29, 1996 to February 25, 2003
The Great-West Life Insurance Company	February 25, 2003 to February 1, 2005
Bank of Montreal (Lessee)	February 1, 2005 to January 24, 2020
The Canada Life Assurance Company	January 24, 2020 to Present

4.1.6 Environmental Reports

The following environmental reports (ordered from oldest to most recent) related to the Phase One Property were completed by Golder Associated Ltd (Golder), now WSP. WSP consulted these reports to develop an understanding of the environmental conditions at the Phase One Property and surrounding properties. Both these reports were completed for the current Phase One ESA property, 170 Slater Street, along with the adjacent property of 269 Laurier Avenue, Ottawa, Ontario.

- “Phase I Environmental Site Assessment 269 Laurier Avenue West & 170 Slater Street, Ottawa, Ontario”, project number 12-1185-0092 (6900), prepared by Golder for Great-West Life Assurance Company and London Life Insurance Company c/o GWL Realty Advisors Inc, dated December 2013 (“2013 Phase I ESA”).
- “Phase II Environmental Site Assessment 269 Laurier Avenue West & 170 Slater Street, Ottawa, Ontario”, project number 12-1185-0092 (6900), prepared by Golder for Great-West Life Assurance Company and London Life Insurance Company c/o GWL Realty Advisors Inc, dated August 2015 (“2015 Phase II ESA”).

4.1.6.1 2013 Phase I ESA

A Phase I ESA was completed for 269 Laurier Avenue and 170 Slater Street (Phase One Property). Based on the review of the 2013 ESA the Phase One Property, was occupied by a three and a half storey, or seven staggered level aboveground parking garage.

The following previous environmental site assessment and remediation reports were provided to, and reviewed by Golder as part of the 2013 Phase I ESA; the reports were re-reviewed as part of this Phase One ESA:

- “Phase II Environmental Site Assessment, Parking Garage and Adjacent Parking Lot, 170 and 190 Slater Street, Ottawa, Ontario (E2434-1)”, dated June 24, 2002, completed by John D. Paterson and Associates Limited (“Paterson”) and prepared for Arnon Corporation (“Arnon”) (“2002 Paterson Phase One-II ESA Report”).
- “Supplemental Phase II ESA, 269 Laurier Avenue West (E2434-2)”, dated February 17, 2003, completed by Paterson and prepared for GWLRA (“2003 Paterson Phase II ESA Report”).
- “Environmental Site Remediation, 269 Laurier Avenue West, Ottawa, Ontario (E2434-3)”, dated November 6, 2003, completed by Paterson and prepared for GWLRA (“2003 Paterson Site Remediation Report”).
- “Phase I Environmental Site Assessment, 269 Laurier Avenue West, Ottawa, Ontario”, March 4, 2008, completed by RiskCheck Environmental Ltd. (“RiskCheck”) and prepared for GWLRA (“2008 RiskCheck Phase One ESA Report”).
- “Phase I Environmental Site Assessment Update, 269 Laurier Avenue West, Ottawa, Ontario”, January 7, 2011, completed by RiskCheck and prepared for GWLRA (“2011 RiskCheck Phase One ESA Update Report”).

Based on the information obtained from the above-listed reports as described in the 2013 Phase I ESA, Golder identified the following issues of potential environmental concern:

- **Historical Site Summary:** The presence of a former auto repair garage, a former machine shop, a former gasoline service station (identified in the 2002 Paterson Phase II ESA Report but this finding could not be corroborated by Golder during the historical review), and the former generation of oil skimmings and sludges as waste; and,
- **Historical Summary (Surrounding Properties):** The former/current presence of multiple dry cleaners, retail fuel outlets, auto repair garages, industrial facilities, underground storage tanks (USTs), and generators of many types of registered wastes, as well as spills of various types of contaminants, including diesel fuel, furnace oil, and hydraulic oil.

Golder recommended that a Phase II ESA be conducted at the Site to further assess the above-noted issues of concern related to the historical uses of the Site and surrounding properties, and to confirm current site conditions that were previously assessed over 10 years prior as documented in the 2002 Paterson Phase II ESA Report, 2003 Paterson Supplemental Phase II Report, and 2003 Paterson Site Remediation Report. Additionally, the issues of concern related to then current and historical records of USTs, generation of various types of registered wastes and spills of various contaminants on surrounding properties (in particular those to the south or west of the Site, inferred as up- and cross- to up-gradient of the Site, respectively, and to the east of the Site, where USTs may have been very close to the Site boundary).

In addition, the following management issues were identified for the Site:

- **Mercury:** In February 2008 mercury in light tubes was suspected in the parking garage. It was recommended that mercury vapour bulbs or mercury-containing fixtures be kept separate from all other waste to prevent damage, and that appropriate recycling, reuse or disposal be arranged.
- **Lead:** During the Site reconnaissance, peeling paint was observed on the floors, walls and ceilings throughout the parking garage (particularly in the enclosed stairwells). In February 2008 lead-based paint was identified throughout the garage and lead was suspected in the emergency exit lighting. Appropriate recycling or disposal was recommended.
- **PCBs:** In February 2008 PCBs in fluorescent light fixture ballasts were suspected in the parking garage.

Based on the 2013 Phase I ESA, Golder suggested that disposal of materials from the parking garage containing mercury or lead be carried out, and that a priority should be placed on removing building materials containing lead-based paints as numerous paint surfaces were observed to be peeling during the Site visit.

4.1.6.2 2015 Phase II ESA

A Phase II ESA was completed for 170 Slater Street (Phase One Property), and the adjacent property at 269 Laurier Avenue West. Field investigations supporting the Phase II ESA were carried out between October 2014 and May 2015. The following salient points were noted from the review of the 2015 Phase II ESA:

- A total of five boreholes were drilled in fall 2014, three of which were completed as monitoring wells. One borehole was located in the laneway between the two properties, while the four other boreholes were located inside of the parking structure at 170 Slater Street.

- Soil samples were collected at regular intervals from each of the boreholes, and one or two worst case (based on screen results) soil samples from each borehole were submitted for laboratory analysis of the following parameters: petroleum hydrocarbon (PHC) fractions 1 to 4 (F1-F4), polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), and select metals.
- Groundwater sampling was conducted in November 2014 and May 2015. All three monitoring wells were found to be dry in 2014. In 2015, only MW14-02 contained enough groundwater to collect a sample. The sample collected from MW14-02 was analysed for PHCs F1 to F4, VOCs, PAHs, and dissolved metals,

Based on the results of the 2015 Phase II ESA Golder offered the following conclusions:

- Based on the 2014 soil sample results, no soil impacts above the MOE Table 3 Standards were identified in fill and native soil below the parking garage at 170 Slater Street which was historically occupied by industrial works and an automobile repair garage, and potentially adjacent to USTs.
- Shallow soil samples recovered from the fill below the laneway between 269 Laurier and 170 Slater, from BH14-01, did not contain concentrations of PHCs F1 to F4, VOCs, PAHs or metals above the Ministry of Environment (MOE) Table 3 Standards. However, native soil recovered at BH14-01 between 3.81 – 4.24 meters below ground surface (mbgs) did contain concentrations of PHC fractions F1 and F2 above the MOE Table 3 Standards.
- Groundwater quality at 170 Slater Street was not assessed in 2014, as all installed monitoring wells were dry, or blocked. In 2015, MW14-01 and MW14-03 were dry, but a groundwater sample was collected from MW14-02 and contained measurable concentrations of VOCs (cis-1,2-dichloroethylene, tetrachloroethylene and trichloroethylene) above the MOE Table 3 Standards.

4.1.6.3 Reports Summary

The following potential environmental concern was identified through review of the previous environmental reports:

- The presence of fill material in the laneway along the west side of the on-Site building.
- Concentrations of PHC F1 and F2 above the MOE Table 3 Standards in native soil in the laneway along the west side of the on-Site building.
- The presence of groundwater with concentrations of VOCs above the MOE Table 3 Standards on the south end of the Phase One Property (MW14-02) in 2015.

4.2 Environmental Source Information

4.2.1 ERIS

In February 2023, WSP contracted Environmental Risk Information Services Ltd. (ERIS) to conduct a search of eight environmental information databases, including federal, provincial and private sector databases, for information on the Phase One Property and Phase One Study Area. The eight databases included in the report are those considered most likely to indicate the potential presences of a PCA that can generate significant, lasting contamination in the subsurface and/or can provide information regarding subsurface conditions at the Phase One Property or in the Phase One Study Area. The ERIS report is provided in Appendix B.

The search included the following databases:

- BORE – Borehole Records
- CA – Certificates of Approval
- CDRY – Records of Dry-Cleaning Facilities
- ECA – Environmental Compliance Approval
- GEN – Ontario Regulation 347 Waste Generators Summary
- PRT – Private and Retail Fuel Storage Tanks
- SPL – Ontario Spill Records
- WWIS – Water Well Information System

In addition, as part of the 2013 Phase One ESA a full ERIS report which included a search of close to 70 environmental sources, was provided to and reviewed by WSP as part of this Phase One ESA.

No records related to the Phase One Property were identified in the 2013 or 2023 ERIS reports.

The results of the search of surrounding properties are included in the following sub-sections.

4.2.1.1 North (inferred down-gradient)

- Queen Street Cleaners Limited, then A.C.E. Acquisitions Ltd, A dry cleaner, located at 222 Albert Street 1994 to 2008, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents (generator number ON1350101). Spic & Span-Valetor-Cash Cleaners, located at 222 Albert Street 1986 - 1998, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents (generator number ON0573411). Diana Cleaners, located at 222 Albert Street 1992 - 1998, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents (generator number ON1381800).
- Multiple properties to the north of the Site are listed in the Ontario Regulation 347 Waste Generators Summary as generators of: polychlorinated biphenyls (“PCBs”), aliphatic and aromatic solvents, waste oil and lubricants, photo-processing waste, acid and alkaline wastes containing heavy metals, inorganic and organic laboratory chemicals, paint and pigment, pharmaceuticals, pathological waste, fuels, halogenated pesticides, halogenated solvents, petroleum distillates, and pathological wastes.
- The property located at 150 Albert Street 1988 - 2001, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents (generator number ON0013600).
 - Dahavland Capital Corporation located at 201 Queen Street c. 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON3037349).
 - Goodlife Fitness located at 199 Queen Street c. 2016, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON9638435).

- The property located at 199 Slater Street is listed in the Retail Fuel Storage Tanks database under Tilden Car Rentals. Environmental records provided by TSSA indicate that two inactive USTs were present on this property. The Ontario Spills database indicates that in 1991, 220 litres (L) of furnace oil/crankcase oil leaked from a rusted tank on this property, resulting in soil contamination. The property is listed in the RSC database, which indicates an RSC was issued for the property in June 2006. The property is listed in the HLUI database as having waste generator number ON0340402 1986 – 1998, as a generator of waste oil and lubricants.
- The Ontario Spills database indicates that in 2018, 2 L of butane adhesive primer was spilled to the ground at 170 Queen Street, environmental impact was not anticipated, and was cleaned.
- The Ontario Spills database indicates that in 2017, 2 L of concrete sealer was spilled to the ground.
- The Ontario Spills database indicates that in 2018, 5 L of hydraulic oil was spilled to the ground at 170 Queen Street.
- The Ontario Spills database indicates that in 2000, 33 L non-PCB transformer oil was spilled to the ground as a result of a fire/explosion, at 130 Albert Street.
- The Ontario Spills database indicates that in 2017, an unknown quantity of glycol/water solution was spilled to the ground as a result of human error.
- The Ontario Spills database indicates that in 2011, an unknown quantity of used cooking grease discharged to the catch basin, resulting in possible surface water pollution.
- The Ontario Spills database indicates that in 2019, an unknown quantity of motor oil was discharged to the sewer as a result of a vehicle fire at the intersection of Albert and O'Connor.
- The Ontario Spills database indicates that in 2013, an unknown quantity of diesel was discharged as a result of a motor vehicle collision at the intersection of Slater and O'Connor. Confirmed environmental impact, surface water pollution.
- The Ontario Spills database indicates that in 2011, an unknown volume of diesel fuel was discharged to a parking lot and sewer on the property located at 181 Queen Street, resulting in soil contamination and confirmed environmental impacts. The database also indicates that in 2007, 618 L of hydraulic oil was discharged to the same property, but that environmental impacts were not anticipated.
- The Ontario Spills database indicates that in 2007, 10 L of battery acid (sulphuric acid) was discharged to a loading dock on the property located at 235 Queen Street, resulting in soil contamination.
- The Ontario Spills database indicates that in 2007, 20 L of antifreeze was discharged to the road at the intersection of Slater and O'Connor, resulting in soil contamination.
- The Ontario Spills database indicates that in 2007, 0.5 L of diesel fuel was discharged to the ground at the 78 O'Connor, soil contamination was not anticipated.
- The Ontario Spills database indicates that in 2018, 0.5 L of compressor oil was spilled on the ground at 99 Bank Street.

- The Ontario Spills database indicates that in 2014, 8 - 10 L of diesel fuel leaked to the ground at 115 Queen Street to 54 Elgin Street crossing Northeast along Elgin Street to 1 Rideau Street, and to 117 Rideau St at William Street. Resulting in groundwater contamination.
- The Ontario Spills database indicates that in 2017, 40 L of hydraulic oil leaked to the ground at 115 Queen Street to 54 Elgin Street crossing Northeast along Elgin Street to 1 Rideau Street, and to 117 Rideau St at William Street.
- The Ontario Spills database indicates that in 2007, 618L of hydraulic oil spilled to the road in front of 181 Queen Street. Environment impact is not anticipated.
- The Ontario Spills database indicates that in 2011, an unknown quantity of diesel fuel spilled to the parking lot and sewer at 181 Queen Street. Contamination of soil is anticipated.
- The Ontario Spills database indicates that in 2017, 5 gallons of hydraulic oil leaked from a truck to the road at 181 Queen Street.
- The properties located at 115-117 and 123 Bank Street are listed as former industrial sites (Bank Street Foundry, Dominion Plating and Manufacturing, British American Dyeing Co.) (Intera Technologies, 1988).

4.2.1.2 East (inferred cross to down-gradient)

- Properties to the east of the Site are listed in the Ontario Regulation 347 Waste Generators Summary as generators of: aliphatic solvents, waste oil and lubricants, photoprocessing waste, organic and inorganic chemicals, acid and alkaline wastes containing heavy metals, paint and pigment, pathological waste, pharmaceuticals, fuels, and halogenated pesticides.
 - Spic & Span-Valetor-Cash Cleaners, a dry cleaner, located at 227 Laurier Avenue West c.1988-2001, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents (generator number ON0573421).
 - Laurier Dry cleaners, located at 227 Laurier Avenue West c.1996-2001, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents (generator number ON2125100).
 - The property, located at 150 Slater Street 2011-2022, is listed in the Ontario Regulation 347 Waste Generators (generator number ON9451993).
 - 234 Laurier Leaseholds Limited, located at 234 Laurier Avenue West c. 2012, is listed in the Ontario Regulation 347 Waste Generators (generator number ON8115831).
 - Dept of National Defence, located at 234 Laurier Avenue West 1993 - 2001, is listed in the Ontario Regulation 347 Waste Generators (generator number ON00446587).
 - Bradda Printing Services Inc, located at 130 Slater Street c. 1988 - 2022, is listed in the Ontario Regulation 347 Waste Generators (generator number ON1032400).
 - Ontario Petroleum Group, located at 130 Slater Street c. 2007 - 2008, is listed in the Ontario Regulation 347 Waste Generators (generator number ON4635504).

- Metcalfe Realty Company Limited, located at 123 Slater Street c. 2006 - 2012, is listed in the Ontario Regulation 347 Waste Generators (generator number ON4004553).
- Kidinks Holdings Inc, located at 200 Laurier Ave West c. 2011 - 2017, is listed in the Ontario Regulation 347 Waste Generators (generator number ON4004553).
- Gillin Engineering & Construction Ltd, located at 200 Laurier Ave West c. 2021, is listed in the Ontario Regulation 347 Waste Generators (generator number ON5643379).
- Department of National Defence Dental Clinic, located at 100 Gloucester Street c. 1992 - 1998, is listed in the Ontario Regulation 347 Waste Generators (generator number ON0046580).
- Ottawa Chemists, located at 192 Laurier Avenue c. 1992 - 2001, is listed in the Ontario Regulation 347 Waste Generators (generator number ON1489900).
- Ottawa Public Library, located at 120 Metcalfe Street c. 1986 - 1994, is listed in the Ontario Regulation 347 Waste Generators (generator number ON0842600).
- Cadillac Fairview Corporation, located at 191 Laurier Avenue c. 2002 - 2005, is listed in the Ontario Regulation 347 Waste Generators (generator number ON8230179).
- Carrier Commercial Service, located at 191 Laurier Avenue c. 2021, is listed in the Ontario Regulation 347 Waste Generators (generator number ON3988933).
- Shoppers Drug Mart, located at 110 Slater Street c. 2000 - 2001, is listed in the Ontario Regulation 347 Waste Generators (generator number ON2530773).
- Urbandale Corporation, located at 100 Metcalfe Street c. 2016, is listed in the Ontario Regulation 347 Waste Generators (generator number ON8584157).
- Chiropractic Health Group, located at 150 Metcalfe Street c. 1999 - 2006, is listed in the Ontario Regulation 347 Waste Generators (generator number ON2452100).
- Lithwick Corporation, located at 150 Metcalfe Street c. 2003 - 2004, is listed in the Ontario Regulation 347 Waste Generators (generator number ON7459647).
- Northam CIGF Tenco (Metcalfe Limited), located at 150 Metcalfe Street c. 2021 - 2022, is listed in the Ontario Regulation 347 Waste Generators (generator number ON3528378).
- The property located at 130 Slater Street is listed in the TSSA Variances for Abandonment of Underground Storage Tanks, which lists variances from the Liquid Fuels Handling Code which stipulates that USTs must be removed within two (2) years of disuse.
- The Ontario Spills database indicates that in 2012, a spill occurred at 219 Laurier Avenue West where 15 Liters of oily water spilled to the elevator pit. The database indicates that environmental impacts associated with the spill are not anticipated.
- The Ontario Spills database indicates that in 2011, a spill associated with equipment occurred at 110 O'Connor Street where 15 Liters of hydraulic fuel spilled to the pavement. The database indicates that environmental impacts associated with the spill are not anticipated.

- The Ontario Spills database indicates that in 2001, an unknown quantity of glycol/water solution spilled at 100 Metcalfe Street, associated with an OC Transpo bus. The database indicates that environmental impacts associated with the spill are possible.
- The Ontario Spills database indicates that in 2013, a spill associated with a broken hydraulic line on an OC Transpo bus occurred along Bank Street (from 161 to 115 Bank Street). The database indicates that environmental impacts associated with the spill are possible.
- The properties located at 118 Slater Street and 230 Laurier Avenue West are listed as former industrial sites (Bomac Electrotype Co. Ltd. and Mutual Press, respectively) (Intera Technologies, 1988).
- The HLUI database lists a motor repair shop located 120 O'Connor Street circa 1940, a cleaner/laundrer located at 94-96 O'Connor Street circa 1920-1960, and printers located at 111 O'Connor Street and 251 Laurier Avenue West circa 1998-2005.

4.2.1.3 South (inferred up-gradient)

- Properties to the south of the Site are listed in the Ontario Regulation 347 Waste Generators Summary as generators of: PCBs, fuels, aliphatic and aromatic solvents, waste oil and lubricants, photo-processing waste, alkaline wastes containing heavy metals, inorganic and organic laboratory chemicals, halogenated pesticides, halogenated solvents, phenolic wastes, paint and pigment, alkaline phosphates, and pathological waste.
- A retail fuel outlet is located at 154 O'Connor Street. The TSSA Fuel Storage Tank database indicates that as of June 2011, three single wall USTs containing gasoline were present. The TSSA Expired Facility database indicates that older tanks have been removed from the property. The Ontario Spills database indicates that in 1994 an unknown quantity of waste oil was spilled, resulting in impacts to soil and potential environmental impacts. The Ontario Spills database indicates that in 1994 an unknown quantity of waste oil leaked from an underground storage tank, resulting in potential soil contamination. The Ontario Spills database indicates that in 1993, 1,800 L of furnace oil leaked from an underground storage tank, resulting in soil contamination.
- The Ontario Spills database indicates that in 2012, 9 L of transformer oil was discharged to the ground near the intersection of Bank St and Laurier Avenue West, environmental impacts not anticipated.
- The Ontario Spills database indicates that in 2005, 25 L of hydraulic oil was discharged to the catch basin in front of the property at 300 Laurier Avenue West, resulting in potential environmental impacts. The Ontario Regulation 347 Waste Generators Summary lists 300 Laurier Avenue West as a generator of PCBs, among other types of waste (generator number ON0249609).
- The Ontario Spills database indicates that in 1999, an unknown quantity of furnace oil leaked from an underground storage tank at 177 Nepean Street, environmental impacts are possible.
- The Ontario Spills database indicates that in 2002, 1800 L of ethylene glycol leaked from a hose/pipe to the property and sewer at 340 Laurier, environmental impacts are possible.
- The National PCB Inventory indicates that PCB-containing equipment was in use at 171 Bank Street.
- The properties located at 300 Laurier Avenue West and 117 Nepean Street are listed as former industrial sites (Ottawa Photoengraving Co. and Lowe-Martin Co. Ltd. Printers respectively) (Intera Technologies, 1988).

The HLUI database lists a motor vehicle repair shop located at 294-304 Laurier Avenue West c. 1922-1948, a cleaner/laundrer located at 171 Bank Street c. 1956-1960 and 1990-2001, and a printer located at 140 O'Connor Street c. 2005.

4.2.1.4 West (inferred cross to up-gradient)

- Properties to the west of the Site are listed in the Ontario Regulation 347 Waste Generators Summary as generators of: PCBs, fuels, aliphatic and aromatic solvents, waste oil and lubricants, photoprocessing waste, acid and alkaline wastes containing heavy metals, inorganic and organic laboratory chemicals, phenolic wastes, paint and pigment, pathological waste, pharmaceuticals, fuels, halogenated pesticides, halogenated solvents, oil skimmings and sludges.
 - A dry cleaner, located at 300 Slater Street, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of halogenated solvents.
 - R.E. Hein Construction located at 301 Laurier Avenue West c. 2003 - 2004, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON4268847).
 - Brookfield Lepage Johnson Controls located at 122 Bank Street c. 1998 - 2001, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON0554826).
 - Prime Mechanical Incorporated located at 122 Bank Street c. 2002 - 2004, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON6555994).
 - Public Works and Government Services Canada located at 122 Bank Street c. 2004 - 2014, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON4722367).
 - SNC-Lavalin O&M located at 122 Bank Street c. 2014, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON9751546).
 - Canada Corporation located at 122 Bank Street c. 2017, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON8835665).
 - Public Works and Procurement Canada located at 122 Bank Street c. 2020 - 2021, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON7601749).
 - Morguard Investments Ltd located at 215 Slater Street c. 2010 - 2013, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON5003407).
 - Slater 2011 Equities Inc located at 215 Slater Street c. 2021 - 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON8986060).
 - Techniphot Ltd located at 234 Slater Street c. 1989 - 1998, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON1207700).
 - International Development Research Centre located at 250 Albert Street c. 2003 - 2004, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON5066872).
 - Morguard Investments Ltd located at 250 Albert Street c. 2007 - 2015, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON7427811).

- Albert & Bank Equities Inc located at 250 Albert Street c. 2021 - 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON7789650).
- GVT. Of CAN. – Public Works Canada located at 257 Slater Street c. 1986 - 1998, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON0144714, ON0144792).
- Elections Canada located at 257 Slater Street c. 1996 - 2013, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON9585949, ON1677901).
- Bureau De La Surveillance Des located at 257 Slater Street c. 1997 - 2001, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON2207800).
- Canada Revenue Agency located at 333 Laurier Avenue c. 2006, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON3602777).
- Public Works and Government Services Canada located at 333 Laurier Avenue c. 2012 - 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON6656977).
- Strivetech Elevator Services Inc located at 102 Bank Street c. 2015, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON8807066).
- Snapshot1 Hour Photo located at 280 Slater Street c. 1994 - 2001, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON1886300).
- Morguard Investments Ltd located at 280 Slater Street c. 2007 - 2016, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON523990).
- Canadian Nuclear Safety Commission located at 280 Slater Street c. 2017, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON7367226).
- Carrier Commercial Service, a Division of UTC located at 280 Slater Street c. 2018 - 2019, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON2991932).
- Zippy Print located at 264 Albert Street c. 1992 - 2000, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON1491606).
- Allegra Printing located at 264 Albert Street c. 1999 - 2001, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON2422401).
- Eldorado Resources Ltd located at 255 Albert Street c. 1986 - 1993, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON0008201).
- Her Majesty Queen located at 255 Albert Street c. 2010 - 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON7665892).
- The Great West Life Assurance Company located at 255 Albert Street c. 2010 - 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON5262665).
- 1 HR Photo/10456 Canada located at 228 Queen Street c. 1986 - 1994, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON0675400).

- The Printing House Ltd located at 228 Queen Street c. 2021 - 2022, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON3657993).
- Ottawa-Carlton, Regional Mun of located at 222 Queen Street c. 1986 - 1997, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON0303102).
- Dundee Realty Management located at 222 Queen Street c. 2003 - 2004, is listed in the Ontario Regulation 347 Waste Generators Summary (Generator ON9748877).
- A property located at 269 Laurier Avenue West, is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of oil skimmings and sludges, wastes from the use of pigments, coatings and paints, aliphatic solvents and residues, waste oils/sludges (petroleum based), and waste crankcase oils and lubricants. (generator number ON8478731). Another property at 269 Laurier West is listed in the Ontario Regulation 347 Waste Generators Summary as a generator of waste oils and lubricants, and aliphatic solvents, and miscellaneous waste organic chemicals. (generator number ON3939522).
- The property located at 151 Slater Street is listed in the Pesticide Register as a manufacturer/vendor of registered pesticides.
- The property located at 275 Slater Street, is listed in the Retail Fuel Storage Tanks database for diesel fuel.
- The Ontario Spills database indicates that in 2015, 5 L of glycol was discharged to the roof drainage system at the property at 333 Laurier Avenue.
- The Ontario Spills database indicates that in 2019, 100 gallons of glycol was discharged to the sewer at the property at 269 Laurier Avenue West.
- The Ontario Spills database indicates that in 2002, an unknown volume of ethylene glycol was discharged to the property at 340 Laurier Avenue West, resulting in potential environmental impacts.
- The Ontario Spills database indicates that in 1999, 30 L of used motor oil discharge to the roadway at Mackenzie Bridge along Albert to Bank Street. Environment impact was not anticipated.
- The property located at 260 Slater Street is listed as a former industrial site (J.R. Douglas Ltd. Sheet Metal Products).
- The HLUI database lists an unnamed printer located at 295-297 Maria Street c. 1901.

The Ontario Spills database indicates that in 2015, an unknown quantity of grease spilled to the catch basin at 205 Queen Street.

4.2.2 Technical Standards and Safety Authority (TSSA), Fuel Safety Division Records

Searches of available TSSA records were requested on March 21, 2023. Responses received from the TSSA on March 21, 2023 and indicate that 170 Slater Street has no records of fuel storage tanks. Copies of the responses are provided in Appendix A.

4.2.3 Ministry of the Environment

WSP completed a search of the Ontario Ministry of the Environment Conservation and Parks (MECP) online database tool, Access Environment, for records on the Phase One Property and within the Phase One Study Area. No records were identified for the Phase One Property.

A 2005 Certificate of Approval (C of A No. 6108-6GEQA3) was identified for the directly adjacent property to the west (269 Laurier). The C of A is for air emissions from two gas fired boilers and one standby diesel generator. The presence of a diesel generator indicates that there was a diesel storage tank somewhere on the 269 Laurier property when the C of A was issued. An Environmental Activity and Sector Registration (EASR) for air emissions issued in November 2020 was also associated with the 269 Laurier address. No other records of potential interest in relation to the Phase One Property were identified in the phase one study are through search of the MECP database.

4.2.4 Historical Land Use Inventory (HLUI)

The Phase One Property is not listed as a former coal gasification plant waste site, waste disposal site, or industrial site. The current Phase One Property address (170 Slater) was not listed in the HLUI; however, the Phase One property used to be divided into multiple municipal addresses including 184, 186, 188 and 190 Slater, and 261 and 263 Laurier Avenue West. The following HLUI records were associated with these addresses:

- 188 Slater St. Eclipse Plating Service c. 1920-1940, Stamped, Pressed and Coated Metal Products Industries, and former unnamed commercial printer c. 1901. Former metals industry facility, and former commercial printer.
- Campbell Motors Ltd., located at 263-265 Laurier Avenue West c. 1948-1963, listed as having two gasoline USTs in 1948 and one gasoline UST in 1963.

The results of the search of surrounding properties are included in the following sub-sections.

4.2.4.1 North (*inferred down-gradient*)

- The property directly north of the Phase One property with addresses on O'Connor St., and 171 Slater St. had the following records: Central Vulcanizing Company c. 1920-1921, Kwik Kopy Printing, c. 2001 Unnamed Auto Repair Shop, c. 1963. Former rubber products industries, auto repair shop and printing industry
- 218 Albert St., 210 Albert St., 222 Albert St., 198 Albert St., Battery storage company 1920-1922, Canadian Pacific Express repair shop 1930-1950, various laundries/cleaners 1930-2001, Hans Lockeberg Metal Stamping 1940. Former battery storage, laundries/cleaners, metals industries and auto repair. 151 Slater St, Standard Mechanical Systems Ltd, motor vehicle repair shop, 2001, Supertest Petroleum Corp gas station 1930-1963. Former motor vehicle repair shop and gas station with 6 USTs with gasoline (1948) and 1 UST with gasoline (1963).
- 132 Albert St. Canadian Allis-Chalmers Co heating equipment manufacturing 1930-1940, Stewart-Warner Sales and Service, auto service 1930-1970. Former heating equipment manufacturing and auto repair located within the Phase One Study Area.
- 203 Albert St. Paul's Service Stores Ltd, laundries/cleaners 1948-1964. Current and/or former laundries/cleaners.

- 233 Albert St., 99 Bank St., 101 Bank St., 246 Queen St. Dominion Auto Radiator 1930, Dynex Power Inc 2001, JF Pease Furnace Co. 1900, Scarfe and Co. Ltd (paint) 1940-1950. Current and/or former motor vehicle repair shops, communication and other electronic equipment industries, heating equipment manufacturing, and paint storage.
- 203 Queen St. Paul's Service Stores Ltd, laundries/cleaners 1960. Current and/or former laundries/cleaners.
- 202 Sparks St., 83 Bank St. Various platemaking, typesetting and bindery industries 1910, 1998 to 2005. Current and/or former platemaking, typesetting and bindery industries and glass industries.
- 179 Queen St., 167 Queen St. Gas station 1940, UK Government 1912-1948. Current and/or former gasoline stations, 1 UST - gasoline, and platemaking, typesetting and bindery industry.
- 160 Sparks St., Coles National Manufacturing Co 1900, Sikorsky International 2001. Current and/or former textiles manufacturing and aircraft and aircraft parts.
- Queen St. (Unspecified address). Butterworth & Co Iron Foundries 1900-1921, Grant Holden Graham canvas industries 1912. Current and/or former iron foundries and textile manufacturing.
- 140 Sparks St., 130 Sparks St., 132 Sparks St. GE Willis 1900, The Topley Company Ltd 1910-1920, Dustbane Manufacturer Co Ltd, (manufactured sweeping compound). Current and/or former platemaking, typesetting and bindery industry, and chemical manufacturing.
- 35 Albert St., 145 Albert St., 111 Albert St, 139 Albert St. Various auto repairs, gas stations, 2 USTs, 1910-1962, Dominion Photo 1910, Hillarys Cleaners 1940-1998, Current and/or former auto repair shops, gas stations, 3 USTs - gasoline with one located under 139 Albert St, platemaking, typesetting and bindery industries, laundries/cleaners.
- 104 Sparks St. Ottawa Jewelry Manufacturing Company 1920. Current and/or former metals industries.
- 130 Albert St. Monsanto Canada Inc (rubber products industries) 2001, Northern Shadows Photo Finishing Shop 2001-2005. Current and/or former rubber industry, and platemaking, typesetting and bindery industry.
- 119 Slater St. Paragon Cleaners 1980-1998. Current and/or former laundries/cleaners.
- 79 Metcalfe. Hertz Drive Yourself Station, with auto servicing 1930. Current and/or former motor vehicle repair.
- 100 Albert St., 63 Metcalfe. Beamish Service gas, gas station 1930-1950, Various Cleaners 1960, 1998. Current and/or former gasoline station (2 USTs 10000 gal, 1 UST 500 gal, both contents unknown), laundries/cleaning facilities.
- Slater St (unspecified address). M. Landreville Ltd Central Garage, motor vehicle repair shop 1920-1950. Current and/or former motor vehicle repair shops.

- Multiple Waste Generator records were identified in the HLUI for properties north of the Phase One Property:
 - Health Canada located at 171 Slater Street c. 2021-2022, is listed in the HLUI database as having waste generator numbers ON9358836 (2021-2022), ON8424028 (2006), ON8921109 (2014) as a generator of pathological wastes, acid waste – heavy metals, alkaline waste – heavy metals, and other specified organics, organic and inorganic laboratory chemicals, halogenated pesticides, and waste compressed gases.
 - Crawford & Company Canada Inc, located at 151 Slater Street 2009, is listed as having waste generator number ON6893706.
 - Bonanza Printing and Copying Center Inc, located at 151 Slater Street c. 1997-2008, is listed as having waste generator numbers ON1763101, ON9988348, and ON8259118.
 - Ottawa Natural Clinic Pharmacy, located at 151 Slater Street c. 2001, is listed as having waste generator number ON2644100.
 - OLRT Constructors/Dragados/EllisDon Corp located at 170 Queen Street c. 2016 - 2018, is listed as having waste generator number ON9930407.
 - EDS Canada, located at 50 O'Connor Street c. 2003 - 2006, is listed as having waste generator number ON6533083.
 - A.V.W. Telav, located at 50 O'Connor Street c. 2004, is listed as having waste generator number ON4126838.
 - Australian High Commission, located at 50 O'Connor Street c. 2006, is listed as having waste generator number ON5316531.
 - Bell Canada, a telecommunications company located at 78 O'Connor c. 2000-2022, is as having waste generator number ON0473817.
 - Glebe Mechanical located at 78 O'Connor c. 2002-2004, is as having waste generator number ON4220799.
 - Oxford Properties Group Inc then QuadReal Property Group located at 45 O'Connor c. 1998 - 2022, is listed as having waste generator number ON8385765, for petroleum distillates.
 - Bentall Kennedy (Canada) LP located at 45 O'Connor c. 2011 - 2015, is listed as having waste generator number ON2158502.
 - MDS Laboratories located at 130 Albert Street c. 1992 - 1994 is listed as having waste generator number ON0116769.
 - Mercury Reproductions located at 130 Albert Street c. 1986 - 1994 is listed as having waste generator number ON0226000.
 - Metcalfe Realty Company Ltd located at 130 Albert Street c. 1992 - 2013 is listed as having waste generator number ON0979501.

- MDS Paramedical located at 130 Albert Street c. 1993 - 2001 is listed as having waste generator number ON1719100.
- Sketchley Cleaning located at 132 Queen Street c. 1986 - 1998 is listed as having waste generator number ON0240428, for the generation of halogenated solvents.
- Hillary Cleaning located at 132 Queen Street c. 1986 - 1998 is listed as having waste generator number ON0491105, for the generation of halogenated solvents.
- Metropolitan Life, Clarica Centre, then Sun Life located at 99 Bank Street c. 1988 - 2022 is listed as having waste generator number ON1069900.
- EDS Canada located at 99 Bank Street c. 2009 is listed as having waste generator number ON6485176.
- HP Enterprise Services located at 99 Bank Street c. 2009 - 2010 is listed as having waste generator number ON6533083.
- 884611 Ontario Ltd located at 99 Bank Street c. 2014 - 2018 is listed as having waste generator number ON6918686.
- Carrier Commercial Service located at 99 Bank Street c. 2020 - 2021 is listed as having waste generator number ON7183977.
- David Berman Typographics Ltd. 12-773 located at 116 Albert Street Suite 1012 c. 1994 is listed as having waste generator number ON0861502.
- Metcalfe Realty Company Limited located at 116 Albert Street Suite 210 c. 1992 - 2004 is listed as having waste generator number ON0979502.
- OCSCC 1018 at 199 Slater Street is listed as having waste generator number ON6201846 (2017) as a generator of waste oils/sludges (petroleum based), and ON4466256 (2022) as a generator of oil skimmings and sludges
- One Hour Moto Photo located at 111 Albert Street is listed as having waste generator number ON1895400 c. 1994 – 2001.
- Services Pharmaceutiques Societi Ltee located at 111 Albert Street is database as having waste generator number ON6141970 c. 2015 – 2022.
- Morguard Investments Limited located at 155 Queen Street is listed as having waste generator number ON2664658 c. 2014 – 2020.
- SNC-Lavalin/Dragados Canada/EllisDon located at 155 Queen Street is listed as having waste generator number ON5237645 c. 2019.
- Action Capital Corporation located at 186 Sparks Street is listed as having waste generator number ON9399044 c. 2002 - 2004.
- Morguard Investments located at 181 Queen Street is listed as having waste generator number ON8094238 c. 2005 - 2022.

- Pitney Bowes Canada located at 181 Queen Street is listed as having waste generator number ON8742290 c. 2006 - 2012.
- Novitex Enterprise Solutions Ins located at 181 Queen Street is listed as having waste generator number ON8742990 c. 2013 - 2016.

- 96 Bank St., 98 Bank St. Direct Film Photo Finishing 1980, H. Horwood & Son glass industries 1900. Current and/or former platemaking, typesetting and bindery industries and glass industries.
- 246 Albert St. Dominion Electro Plating Co 1920-1922. Current and/or former stamped, pressed and coated metal products industries.
- 261 Alberts St., 265 Albert St., 255 Albert St. John E. Sheppard Sheet Metal Worker 1912-1922, Modern Taxi Co, vehicle repairs 1970, Ontario Power Generation 2005. Current and/or former metals industry, motor vehicle repair shops.
- 295 Albert St., 123 Kent St., 291 Albert St., 254 Queen St., 117 Kent St. Various auto Repair shops 1910-1930, Central Service Station 1940, M. Evenchick Ltd 1958-1965, Otis Ferguson Elevator Co. 1920-1950, Vail's Clean-O-Mat Service 1960-1970. Current and/or former motor vehicle repair shops, gasoline service stations, metals industries, elevator manufacturing.
- 107 Kent St., 240 Sparks St., 221 Queen St., 239 Queen St., 76 Bank St. Machine Shop with 3 USTs, contents unknown 1901-1950, various motor vehicle repair shops 1912-1950, various laundries/cleaners 1930-1970, various jewelry/precious metals companies 1900-1970, Ottawa Dye Works 1920. Current and/or former motor vehicle repair shops, laundries/cleaners, metals industries, textile manufacturers, 3 USTs of unknown contents.
- Shoppers Drug Mart located at 161 Bank Street c. 1999-2001, is listed in the HLUI database as having waste generator number ON2285286, as a generator of pharmaceuticals and pathological wastes.
- Public Works located at 270 Albert Street c. 2009 - 2011, is listed in the HLUI database as having waste generator number ON2285286, as a generator of pharmaceuticals and pathological wastes.

4.3 Physical Setting Sources

4.3.1 Aerial Imagery

A review of aerial photographs for the Site and surrounding area are presented in the table below. Aerial photos were sourced from the GeoOttawa online mapping tool.

Year	Phase One Property	Surrounding Area
1928	The Site appears to be developed with several small buildings. Due to the quality of the image the use of the buildings cannot be determined.	The surrounding area appears to be developed with residential and/or commercial buildings.
1965	A multi-storey commercial building appears to be present at the center of the property, along with a smaller commercial building at the north end of the property. Parking areas are present along the western boundary, in the southern half of the property, and in the northeast part of the property.	The surrounding area appears to be extensively developed with multi-storey residential and/or commercial buildings.
1976	The photograph has low resolution; however, the Site appears generally similar to the 1965 aerial image.	The surrounding area appears generally as it does in the 1965 aerial image.
1991	The Site appears to be developed with a multi-level aboveground parking garage.	The surrounding area appears to be extensively developed with high-rise commercial and/or residential buildings.
2002	The Site appears generally as it does in the 1991 aerial image.	The property to the adjacent west appears to have been developed with a high-rise building sometime prior to 2002. The surrounding area appears generally as it does in the 1991 aerial image.
2011	The Site appears generally as it does in the 2002 aerial image.	The surrounding area appears generally as it does in the 2002 aerial image.
2021	The Site appears generally as it does in the 2011 aerial image.	The surrounding area appears generally as it does in the 2011 aerial image.

No new PCAs were identified through the aerial imagery review.

4.3.2 Topography, Hydrology and Geology

Topic	Conditions	Comment / Source
Topography of Site and Surrounding Area	The topography of the Site and surrounding areas was generally flat. Topography of the Phase One Study Area generally slopes downward to the north toward the Ottawa River and to the East toward the Rideau Canal.	Site and surrounding area observations, GeoOttawa online mapping tool.
Overburden Soils	The majority of the Site consists of offshore marine deposits consisting of clay, silty clay and silt.	Golder GIS database and 2013 Phase I ESA
Type of Bedrock	Bedrock in the area consists of shale of the Billings Formation. A significant fault extends in a northwest-southeast direction across the middle of the Site.	Golder GIS database and 2013 Phase I ESA (Geological Survey of Canada, 2001, <i>Urban Geology of the National Capital Area, Generalized Bedrock Geology</i> , Open file D3256, Map 1508A).
Depth to Bedrock	3 - 10 m	Golder GIS database, water well records, 2015 Phase II ESA.
Inferred Near Surface Groundwater Flow	Groundwater flow direction is inferred to be towards the northeast, consistent with surface topography.	2013 Phase I ESA and visual observations
Site Grade Relative to the Adjoining Properties	The Site grade is relatively at the same level as the adjoining properties	Topographic map and visual observations
Depth to Groundwater	10.02 to 11.74 m below ground surface	2015 Phase II ESA

4.3.3 Fill Materials

Topic	Conditions	Comment / Source
Fill Materials	Fill material is known to be present in the laneway spanning the western border of the Site. Concentrations of PHC F1 and F2 exceeding Table 3 Standard detected in this area in 2015.	2015 Phase II ESA

4.3.4 Water Bodies

Topic	Conditions	Comment / Source
Nearest Open Water Body	The nearest naturally occurring water body to the Site is the Ottawa River located approximately 0.5 km north of the Site.	Ontario Base Map, Site visit

4.3.5 Well Records

Topic	Conditions (Well Record No.)	Comment / Source
Wells (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table)	There is one water supply well record (Well IS 1503876) present within the Phase One Study Area, located approximately 224 m south-southwest of the Site. This well was completed in February of 1948, to a depth of 22.86 m through silty overburden into the shale bedrock. The static water level at the time of installation was 8 mbgs. Given that potable water supply in the Centretown area of Ottawa is provided by a piped municipal distribution system, it is assumed that this well has been decommissioned/is not longer in use.	ERIS Report

4.4 Site Operating Records

At the time of the site visit, the Phase One Property was occupied by an aboveground parking garage. It consists of three and a half or seven staggered levels. Through records review it was determined that an auto repair garage historically operated on the site from at least 1925 to sometime before 1985. Under section 15 of O. Reg 153/04, the former use of the Phase One Property as auto repair garage classifies it as an Enhanced Investigation Property. All efforts to attain the records listed in section 14 of O. Reg 153/04 were made in support of this Phase One ESA. Given the time that has elapsed since the Site was used as an auto repair garage and the redevelopment of the site that occurred in 1985, no operating records from the former auto repair garage could be attained for review. Records obtained through the ERIS report and other historical information sources are considered sufficient in relation to the former use of the Site as an auto repair garage and for the purposes of this Phase One ESA.

No operating records for the current Site use/operations were provided for review and the current use of the Site is not one of the uses that would classify it as an Enhanced Investigation Property under O.Reg. 153/04.

5.0 INTERVIEWS

An interview was conducted as part of the 2013 Phase I ESA conducted by Golder. Interviews were conducted with Nick Lacelle who was the Building Operator at the time, and Jason Desormeaux who was the operator's assistants. Pertinent information obtained from the 2013 interview has been included in this report where relevant. As no significant changes to the use or development of the Site have occurred since 2013 and no records obtained for the years 2013 through 2022 indicated the potential for large volume spills or other events that could result in subsurface contamination at the Site, it was concluded that no additional interviews were necessary as part of this Phase One ESA. Information provided through the records review and Site Reconnaissance is considered sufficient for the purposes of this Phase One ESA.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

Paul Jackson (Environmental Scientist) of WSP visited the Phase One Property for two hours on February 17, 2023, at 12:30 pm. The Site reconnaissance consisted of a walk-around of the developed areas of the Phase One Property along with a cursory inspection of surrounding properties from the Phase One Property and publicly accessible areas. The weather conditions were sunny, and the temperature was -5°C.

6.2 Specific Observations at Phase One Property

Topic	Observations	Source
<u>Structures</u> Number and Age of Buildings on the Site	One structure was on site. It was built in 1985.	2013 Phase I ESA, Aerial Photos
General Descriptions of Each Building (including improvements)	The Site has an aboveground parking garage that has three and a half (seven staggered) levels with the top two levels being uncovered.	Site observations
Number of Floors (include all levels, whether above or below ground)	Three storeys aboveground. The levels are sloped and the bottom level at the south end of the structure is below grade.	Site observations
Number, Age, and Depth of Levels Below Ground Level	One half level below ground level. Constructed in 1985.	Site observations
Number and Details of all Aboveground Storage Tanks (“ASTs”)	There are no aboveground storage tanks on-site.	Site observations and TSSA
Number and Details of all Underground Storage Tanks (“USTs”)	There are no underground storage tanks on-site.	Site observations and TSSA
<u>Underground Utilities</u> Potable and Non-Potable Water Sources	None identified.	Site Representative
Utility Lines Present (i.e., Electrical, Natural Gas, other)	Natural gas lines observed at NW and NE corners of Site.	Site Representative
Sanitary/Process Wastewater Receptor	None identified.	Site observations
Sanitary Sewer Connection	None identified.	Site observations, Site representative
Septic Systems	None identified.	Site observations
Storm Water Flow	Storm water drainage system is present. Runoff directed toward storm inlets.	Site observations

Topic	Observations	Source
Storm Sewer Connection	Storm water sewer inlet observed in lower level of parking garage. Storm inlet present near northwest corner of Site in laneway, inlets also present to the north and south of site along Slater Street and Laurier Avenue W.	Site observations, GeoOttawa
Interior of Structures Entry and Exit Points for Site Buildings	Pedestrian entry and exit points include the garage opening at the NW corner, exit through the stairwell to Slater Street at the NE corner, exit to Laurier Avenue at the SE corner, and exit to the laneway at the center west part of the garage.	Site observations
Existing and Former Heating System(s) (include fuel type / source)	None identified.	Site observations, Site representative
Existing and Former Cooling System(s) (include fuel type / source)	None identified.	Site observations, Site representative
Drains, Pits, and Sumps (include current use, if any, and former use)	None identified.	Site observations, Site representative
Unidentified Substances	None identified.	Site observations
Floor Stains or Corrosion Located near a Potential Discharge Location	Heavy rust staining throughout stairwells, along the ceilings, walls and floors.	Site observations
Ground Cover (i.e., grass, gravel, soil, or pavement, etc.)	The Site was occupied with a parking garage, the laneway along the western edge was an asphalt road.	Site observations
Current or Former Railway Lines or Spurs	None observed or reported.	Site observations.
Presence of Stained Soil, Vegetation, or Pavement	None observed.	Site observations
Presence of Stressed Vegetation	None observed.	Site observations
Areas Where Fill and/or Debris Materials Appear to Have Been Placed	None observed.	Site observations
Unidentified Substances	None identified.	Site observations

6.3 Surrounding Land Use

During the Site reconnaissance, visual observations of the outdoor operations in the Phase One Study Area were carried out from the Site and publicly accessible areas.

The surrounding properties include high rise commercial buildings. Observations of properties directly adjacent to the Site are summarized as follows:

North (down/cross gradient): To the north of the property is Slater Street, followed by a commercial development including a hotel with underground parking, a hair salon, an architectural firm, and a Tim Hortons restaurant.

East (up/cross gradient): A commercial building with several retail stores.

West (down/cross gradient): 19 storey BMO building with outdoor and underground parking.

South (up/cross gradient): Laurier Avenue West, followed by an indoor commercial shopping mall/market.

6.4 Written Description of Investigation

At the time of the Site reconnaissance, conducted on February 17th, 2023, the Phase One Property consisted of a 0.42 hectare parcel developed with an aboveground parking garage operated by the company, Indigo. The parking garage is three and a half storeys consisting of seven staggered levels with the top two levels being uncovered. The south end of the bottom storey is below grade. The garage has several stairwells connecting the different levels and to the surrounding sidewalks, as well a small electrical room- on the bottom level. As a Site representative was not present at the time of the visit, the electrical room was not accessed. Vehicle access to the parking garage is via the paved laneway at Laurier Avenue West, with the entrance/exit of the garage being located at the north-west corner of the garage near Slater Street, though there is no vehicle access via Slater Street. Heavy rust staining was observed throughout the stairwells along the ceilings, walls and floors. Metal hand railings and doors show significant deterioration due to rust. Peeling and chipping paint was also observed throughout the stairwells along the ceilings and walls.

No PCAs as defined by Table 2 of O.Reg. 153/04 were identified on the Site during the Site reconnaissance.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses of the Phase One Property

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
Sometime prior to 1912	Multiple owners. Property parceled into several lots	Developed with multiple building including machine shop and marble works.	Commercial	The 1912 FIP shows the site developed with multiple buildings including a machine shop and a marble works.
Sometime prior to 1925 to 1984	Multiple owners. Property parceled into several lots	Campbell Motors, auto garage located in the southern portion of the site. A paint shop occupied the NE corner.	Commercial	Fire insurance Plans from 1925 and 1956 show Campbell Motors auto garage, an additional auto repair gage, and a paint shop appears by 1956. City Directory lists Campbell motors on Site in 1929, 1934, 1954, 1959, 1965, and 1969. City Directory list Gilad Parking in 1984.
1985 to present	Multiple private commercial owners from 1984 to 2020. Canadian Life Insurance Company listed as owner from 2020 to present.	Aboveground parking garage	Commercial	The property has remained largely unchanged since 1985 when the parking garage was constructed.

7.2 Potentially Contaminating Activities

7.2.1 On the Phase One Property

Any PCA on the Phase One Property or in the Phase One Study Area may require the identification of an area of potential environmental concern (APEC) and trigger the need for a Phase Two ESA to support the filing of a Record of Site Condition. Based on review of the aerial photographs, fire insurance plans, ERIS reports, online databases and previous reports for the Site, four potentially contaminating activities (PCAs) were identified on the Site as summarised in the following table.

Location	ID Number	PCA Description	PCA# (O. Reg, 153/04 Table 2)	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Phase One Property	1	Campbell Motors (Ottawa) Ltd., 1948-1963 Frederick Campbell Electric Manufacturing Company, 1920 Automobile Repair Garage, c. 1925-1956 Machine Shop, c. 1912	#10 Commercial autobody shop #28 Gasoline and associated products storage in fixed tanks #34 Metal fabrication.	HLUI, FIPs	Automobile repair shop, and Machine shop (earlier). Two USTs present for gasoline c. 1948. 1 UST present for gasoline c. 1963. Automobile Repair Shop onsite 1925 to 1956 (FIPs). PCA is on-Site and therefore considered as an APEC.
	2	Mid-City Ribbon and Carbon Manufacturing Limited, 1960. Eclipse Plating Service c. 1920-1940, Unnamed commercial printer c. 1901.	#31 Ink Manufacturing, Processing and Bulk Storage #33 Metal Treatment, Coating, Plating and Finishing #8 Chemical Manufacturing, Processing and Bulk Storage	HLUI	Former manufacturing use on Phase One Property considered as a higher risk activity and is therefore considered as an APEC.
	3	Automobile Repair Garage, c. 1925-1956	#10 Commercial autobody shop #28 Gasoline and associated products storage in fixed tanks.	Fire Insurance Plans	PCA is on-Site and therefore considered as an APEC.
	4	Fill material identified during 2015 Phase II ESA.	#30 Importation of fill of unknown quality	Previous Reports (2015 Phase II ESA)	Fill was likely placed during the development of the Site and is on-Site and therefore considered as an APEC.

7.2.2 Phase One Study Area

Multiple PCA as defined by Table 2, Schedule D of O. Reg 153/04 were identified in the Phase One Study Area. A summary of the PCAs identified is provided in the following table. A detailed summary of PCAs identified in the Phase One Study Area is provided in Appendix D.

PCA Number (Table 2, Sched. D)	PCA Description	Number of PCAs within Study Area
6	Battery Manufacturing, Recycling and Bulk Storage	1
8	Chemical Manufacturing, Processing and Bulk Storage	3
10	Commercial Autobody Shops	22
17	Dye Manufacturing, Processing and Bulk Storage	1
27	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	1
28	Gasoline and Associated Products Storage in Fixed Tanks	16
29	Glass Manufacturing	1
30	Importation of Fill Material of Unknown Quality	1
31	Ink Manufacturing, Processing and Bulk Storage	2
32	Iron and Steel Manufacturing and Processing	1
33	Metal Treatment, Coating, Plating and Finishing	5
34	Metal Fabrication	4
37	Operation of Dry-Cleaning Equipment (where chemicals are used)	25
39	Paints Manufacturing, Processing and Bulk Storage	4
47	Rubber Manufacturing and Processing	1
52	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	1
54	Textile Manufacturing and Processing	2
57	Vehicles and Associated Parts Manufacturing	2

It is noted that multiple Waste Generator records were identified for properties throughout the Phase One Study Area. In general, the Waste Generator records were evaluated to be associated with small-scale commercial operations where the quantity of wastes generated/managed on the property are not expected to be large enough to generate significant and/persistent contamination in the subsurface. The exception to this being Waste Generator records for halogenated solvents at properties known to be currently or historically operated as dry-cleaning facilities based on other available records.

Registration as a Waste Generator generally indicates proper handling and disposal of hazardous wastes, and businesses associated with Waste Generator records in the Phase One Study area are unlikely to use/generate large volumes of hazardous waste, therefore in the absence of other records for a property/address to indicate significant potential waste generation and/or releases, a Waste Generator record alone for a property within the phase one study area has not been considered a PCA.

In instances where records information indicates that a property within the Phase One Study Area has been redeveloped and an RSC issued since any activities that could have generated contamination occurred, no PCA has been identified on the property.

Multiple records for the Ontario Spills Database were identified by the ERIS search for properties within the Phase One Study Area. Spill records were evaluated based on the volume of the spill, the substance released to the environment, and any other information available to determine if they constituted a PCA. Most of the Spill Records identified were related to small volume spills with little or no potential to generate significant, long-lasting contamination that could impact the environmental conditions of the Site; these spill records were therefore not identified as PCAs.

7.3 Areas of Potential Environmental Concern

The Table below identifies and describes APECs in accordance with clause 16 (2) (a) in Schedule D of O. Reg. 153/04. Each PCA was evaluated in accordance with the criteria described in Section 7.3.1. Refer to Figure 6 for location of APECs on the phase one property. See Section 7.3.2 for further description of contaminants of potential concern (COPCs).

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (groundwater, soil and/or sediment)
APEC 1 – Fill of unknown quality.	Entire Site	#30. Importation of Fill Material of Unknown Quality (on-site).	On-Site	Metals, PAHs, PHCs/BTEX	Soil
APEC 2 - Location of former Mid-City Ribbon and Carbon Manufacturing Ltd., Eclipse Plating Service c. 1920-1940, and unnamed printer c. 1901	NW Corner of Site	#31. Ink Manufacturing, Processing and Bulk Storage #33. Metal treatment, coating plating and finishing #8. Chemical Manufacturing, Processing and Bulk Storage	On-Site	Metals, PAHs, PHCs/BTEX, VOCs	Soil and Groundwater
APEC 3 - Previous location of auto repair garage. Historical PHC impacts to the north.	West side of property, laneway	#10. Commercial Autobody Shops (on-site)	On-Site	Metals, PAHs, PHCs/BTEX, VOCs	Soil and Groundwater

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (groundwater, soil and/or sediment)
APEC 4 – Previous location of USTs. Former dry-cleaning facilities up-gradient (SE) of Site.	NE Corner of Site	#28. Gasoline and Associated Products Storage in Fixed Tanks (on-site) #37. Operation of Dry-Cleaning Equipment (where chemicals are used) (off-site)	On-Site/ Off-site	Metals, PAHs, PHCs/BTEX, VOCs	Soil and Groundwater
APEC 5 – Previous On-Site machine shop, manufacturing, and auto repair garage.	Centre of Site	#10. Commercial Autobody Shops (on-site) #34. Metal Fabrication	On-Site	Metals, PAHs, PHCs/BTEX, VOCs	Soil and Groundwater
APEC 6 – Previously documented VOC impacts in groundwater. Three former USTs south of the Site.	South central part of Site	#28. Gasoline and Associated Products Storage in Fixed Tanks (off-site)	On-Site/ Off-site	Metals, PAHs, PHCs/BTEX, VOCs	Soil and Groundwater

7.3.1 Evaluation and Reasoning

WSP's evaluation related to the existence of APECs on, in or under the Phase One Property was based on the review of available information and exercise of professional judgement. All of the identified PCAs were evaluated in the context of:

- Distance and direction from the site in relation to the inferred direction of groundwater flow.
- The age of the PCA.
- Changes/redevelopment to the property on which the PCA is located since the occurrence of the PCA.
- The potential for the PCA to generate lasting, mobile contamination.

PCAs were not carried forward as APECs if the above evaluation determined that they did not have potential of posing an actual risk to the environmental condition of the Phase One Property. All of the PCAs identified on the Phase One Property have been carried forward as APECs based on the evidence collected through the phase one ESA and the above evaluation. Rational for not carrying individual PCAs in the Phase One Study Area forward as APECs is provided in Appendix D.

7.3.2 Summary Description and Rationale for COPCs

COPCs identified in one or more APECs at the Phase One Property include the following:

- Benzene, toluene, ethylbenzene and xylenes (BTEX)
- Petroleum Hydrocarbons (PHCs)
- Polycyclic Aromatic Hydrocarbons (PAHs)
- Volatile Organic Compounds (VOCs)
- Metals

COPCs identified with respect to each APEC are summarized in the following table.

APEC	Rational for COPCs
<p>APEC 1 – Entire Site. Fill of unknown quality. Metals, PAHs, PHCs/BTEX</p>	<p>Petroleum and semi-volatile parameters are common COPCs given the ubiquitous use of petroleum-based products and associated releases and combustion by-products that can affect soil materials. Metals contaminants associated with anthropogenic sources can adsorb to soil particles and generally do not readily breakdown in the environment. Soil fill with one or more of these potential COPCs could more readily move from one site to another during the time period when the phase one property was re-graded, when the Ontario environmental regulatory framework was not as stringent as it is currently.</p>
<p>APEC 2 – NW Corner of Site. Location of former Mid-City Ribbon and Carbon Manufacturing Ltd., Eclipse Plating and an unnamed printer. Off Site PCAs Metals, PAHs, PHCs/BTEX, VOCs</p>	<p>Actual record of manufacturing activities, chemicals used, and quantities of chemicals used in the operations of Mid-City Ribbon and Carbon Manufacturing Ltd. Are unknown. Solvents and other chemical products containing metals, PHCs and VOCs may have been used in manufacturing process. PAHs may have been generated by heating or other onsite processes. Metals and solvents likely generated/used in plating process and eclipse plating. VOCs may have been present in ink used at unnamed printer. Known PHC impacts in native soil in the laneway to the west of the building and known VOC impacts in groundwater.</p>
<p>APEC 3 – West Side of Site. Previous location of auto repair garage Metals, PAHs, PHCs/BTEX, VOCs</p>	<p>Automotive repair activities are known to generate various potential contaminants which can persist in the environment including PHCs, BTEX, PAHs, VOCs and metals.</p>

APEC	Rational for COPCs
<p>APEC 4 – Northeast Corner of Site. Previous location of USTs. Former dry-cleaning facilities up-gradient (SE) of Site. Metals, PAHs, PHCs/BTEX, VOCs</p>	<p>The former USTs on the site contained liquid petroleum products. COPCs associated with petroleum products are PHCs and BTEX. PAHs may also be present in heavier products and can be generated during the incomplete combustion of fuel. Metals (lead) may have been present as fuel additives.</p> <p>Dry cleaning activities where halogenated solvents are used can generate persistent VOC contamination in the environment if solvents are handled or disposed of incorrectly</p>
<p>APEC 5 – Centre of Site. Previous on-Site machine shop, manufacturing, and auto repair garage. Metals, PAHs, PHCs/BTEX, VOCs</p>	<p>Automotive repair and machining activities are known to generate various potential contaminants which can persist in the environment and including PHCs, BTEX, PAHs VOCs and metals.</p>
<p>APEC 6 – South Central area of Site. Previously documented VOC impacts in groundwater. Three former USTs south of the Site. Metals, PAHs, PHCs/BTEX, VOCs</p>	<p>In 2015, a groundwater sample was collected from onsite monitoring well MW14-02 and contained measurable concentrations of VOCs (cis-1,2-dichloroethylene, tetrachloroethylene and trichloroethylene) above the MOE Table 3 Standards. The former USTs south of the site were known to contain liquid petroleum products. COPCs associated with petroleum products are PHCs and BTEX. PAHs may also be present in heavier products and can be generated during the incomplete combustion of fuel. Metals (lead) may have been present as fuel additives.</p>

7.3.3 Uncertainties

Subsection (6) of Schedule D of O. Reg 153/04 requires consideration and documentation of how any uncertainty or absence of information obtained in each of the components of the Phase One ESA could affect the validity of the conclusions, tables and phase one conceptual site model (refer to Section 7.4 for further description of the phase one conceptual site model).

Records Review

Some of the records information provided from various sources does not contain enough information to conclusively determine if the record is indicative of a PCA. Similarly, volumes of potential contaminants associated with records in the city directory/HLUI/ERIS for various land uses (e.g., manufacturers or institutions) can not be determined.

Other common Phase One ESA uncertainties are associated with lack of FIP coverage, aerial photographs with small scale coverage (i.e., small detail vs. large detail), limited or no information received from regulatory agencies, and unplottable records in the ERIS report.

Although the Phase One Property was identified as an enhanced investigation property based on past property uses, detailed operating records associated with past property uses were not available for review.

The above noted uncertainties associated with the records review do not affect the conclusions of the Phase One ESA because the conclusions take into account the above-described uncertainties while considering other evidence and factors.

No interview was conducted as part of this Phase One ESA as information collected during the 2013 interview and through records review was considered sufficient for this Phase One ESA given that the site use has not changed since the completion of the 2013 Phase I. Uncertainty due to lack of an interview does not affect the conclusions of the phase one ESA because the conclusions are conservative and take into account the above described uncertainty.

7.4 Conceptual Site Model

The following key features (as required by O.Reg. 153/04) are presented in Figures 1, 2, 3, and 4:

- Existing buildings and structures;
- Water bodies and areas of natural significance located in the Phase One Study Area;
- Drinking water wells on the Phase One Property;
- Roads (including names) within the Phase One Study Area;
- Uses of properties adjacent to the Phase One Property; and,
- Location of identified PCAs in the Phase One Study Area (including any storage tanks).

The following describes the Phase One ESA CSM based on the information obtained and reviewed as part of this Phase One ESA:

- The Phase One Property consists of one parcel of land measuring 0.42 hectares in area. An aboveground parking garage with three storeys above grade and half a storey below grade is present on the Site.
- No areas of natural significance were identified on or within 30 m of the Phase One Property.
- Potable water in the vicinity of the Phase One Property is provided by the city municipal water system.
- Surface water runoff at the Site is directed toward stormwater inlets located on Site and along Laurier Avenue West and Slater Street.
- At the time of the Phase One ESA, the neighbouring properties within the Phase One Study Area consisted of commercial land uses.
- The majority of the Site consists of a clayey silty clay over a gravelly sand. Overlaying a shale bedrock which is encountered at depth between 5.8 and 8.6 metre below ground surface based on previous investigations.
- Groundwater flow is inferred to be towards the northeast. A plan of survey was not available for review and is required to satisfy the requirements of O.Reg. 153/04.

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

8.0 CONCLUSIONS

8.1 Need for a Phase Two ESA

Based on the information obtained and reviewed as part of this Phase One ESA, six APECs were identified at the Phase One Property. Accordingly, a Phase Two ESA is recommended.

10.0 LIMITATIONS AND USE OF REPORT

This report was prepared pursuant to and in accordance with the master services agreement (the “MSA”) dated May 2, 2019 between WSP Canada Inc. (“Consultant”) and the other parties listed thereto, and the project specific agreement dated February 15, 2023 between Consultant and The Canada Life Assurance Company c/o GWL Realty Advisors Inc. The report was prepared by Consultant for the use of Owner and Manager (as those terms are defined under the MSA). In addition to the use of and reliance on this report by Owner and Manager, any person who has received a reliance letter for this report may use and rely on this report as if was prepared for such persons. Any use of or reliance on this report by any other person (i.e., a person other than any Owner Manager or otherwise permitted person) is the sole and exclusive responsibility of such other person. Consultant accepts no responsibility for damages, if any, suffered by such other person as a result of the use of or reliance on this report.

This report is based on the best information available to Consultant at the time of preparing this report after Consultant has used best industry practices, in the circumstances, to obtain information. To the extent that Consultant was required to rely on information from other persons, Consultant has verified such information to the extent reasonably possible in the circumstances. The material provided in this report reflects best industry judgement in light of the information available at the time of preparation of this report.

11.0 CLOSURE

The Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust that the information presented in this report meets your current requirements. Should you have any questions or concerns, please do not hesitate to contact the undersigned.

To: Jackson, Paul
Subject: RE: TSSA Request

Please refrain from sending documents to head office. The Public Information (PI) team works remotely, mailing in applications will lengthen the overall processing time.

NO RECORD FOUND IN CURRENT DATABASE

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click [Release of Public Information - TSSA](#) - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
 - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at publicinformationservices@tssa.org.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind Regards,

Nicola Carty | Public Information Agent

Hello,

I'd like to make a request to the Fuels Safety Division for any records pertaining to the following property:

170 Slater Street, Ottawa, Ontario

The requests are:

- Identify whether any active, decommissioned, or in-service storage tanks are present on the site and to search for outstanding instructions, incident reports, spills, or contamination records.

Thank you very much, please let me know if more info is needed.

Regards,

Paul Jackson, B.Sc.

Environmental Scientist

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Oct 2022

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-May 31, 2022

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2020

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-May 31, 2022

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Sep 2022

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2022

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jan 31, 2023

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2022

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Dec 31, 2022

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jan 31, 2023

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Dec 31, 2022

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jul 31, 2022

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2021

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Dec 2022

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2022

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2021

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2022

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jan 31, 2023

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Dec 31, 2022

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jan 31, 2023

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2022

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-May 31, 2022

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Dec 31, 2022

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30 2022

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX D

Detailed PCA Table

APPENDIX D Detailed list of PCAs in Phase One Study Area

Location	PCA # (Table 2, Sched. D)	PCA Description	Information Source	Rationale for Potential Contribution of the PCA to an APEC
O'Connor St, 227 Laurier Ave	37	Laundry and Cleaners 1920-2001: Operation of dry cleaning equipment (where chemicals are used)	HLUI, FIPs	Dry cleaning facility directly adjacent to Phase One Property has contributed to an APEC (APEC 4)
269 Laurier	28	Diesel tank for back up generator.	MECP	Property is located directly adjacent to Phase one property to the west. Location and volume of diesel tank unknown. 269 Laurier considered cross-gradient to Site and PCA is therefore not considered and APEC.
124 O'Connor St, 263 Laurier Ave	33	Artext Electronic, Platemaking, Typesetting and Bindery Industry, 1995. About Electrical Sales & Mechanical Specialty Work 2001 Hunt Club Press Limited, 1994	HLUI	Based on the age of the listings it is unlikely that large quantified of hazardous substances were used in the printing process and therefore not considered to be an APEC.
140 O'Connor, 300 Laurier Ave, 179 Gloucester St, 167 Gloucester St, 171 Bank St	31, 10, 28, 37, 57	EPrint It, Commercial Printing Industries 2005 F.X. Laderoute Storage and Lea and Hawley Limited motor vehicle repair shops, 1922-1948. Three underground storage tanks of unknown contents c. 1912. Motor Vehicle Parts manufacturing (Med Lake Manufacturing) c. 1920.	HLUI	Former motor vehicle repair shop, and 3 USTs of unknown contents, dry cleaning facilities, and motor Vehicle parts manufacturing Industries located directly up-gradient of Phase One property has contributed to an APEC (APEC 4)
153 Bank St, 139 Bank St	37, 34	Bower, Ellacott & Co, Machine shop, 1900-1950 United Cleaners c. 1900-1980.	HLUI	Former machine shop and former launderers located 50 metres cross gradient to the Phase One property. Given the separation from the Phase One Property and the construction of a deep underground parking garage between the PCA and the Phase One Property, it is not considered to have resulted in an APEC.
132 Bank St., 134 Bank St., 144 Bank St., 252 Slater St.,	10, 37, 39	Various motor vehicle repair shops 1920-1948, Sanitary Wardrobe Cleaners and Dyers 1940, Sherwin Williams Paints 1930, Sproule & O'Connor 1900-1910.	HLUI	Current and/or former motor vehicle repair shops, laundries/cleaners, and platemaking, typesetting and bindery industry located over 50 metres down gradient of the Phase One property and is not considered to have resulted in an APEC.
123 Bank	37	Patton's Ltd Cleaners & Dryers c. 1900.	HLUI	Cleaners/launders located down gradient of the Phase One Study property, it is not considered to have resulted in an APEC.
O'Connor St., 171 Slater St.	10, 28, 47	Central Vulcanizing Company c. 1920-1921 Unnamed Auto Repair Shop, c. 1963,	HLUI	Former rubber products industries, auto repair shop and printing industry. Property is located down gradient of Phase One Property and is not considered to have resulted in an APEC.
Gloucester St	10, 28	Albert Oldham Auto Service, Gas Station, c. 1948-1956.	HLUI	Former gas station, with 3 USTs located up-gradient of Phase One Property and has contributed to APEC. (APEC 4)

Location	PCA # (Table 2, Sched. D)	PCA Description	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Gloucester St	28	Former Gas station, c. 1930-1956.	HLUI	Former gas station, with 3 USTs located up-gradient of Phase One Property, due to the distance from the Site it is not considered to have resulted in an APEC.
154 O'Connor St	10, 28	Former Auto Repair Shops, 1940-2005. A retail fuel outlet with three single wall USTs containing gasoline.	HLUI, TSSA	Former auto repair shops and current retail fuel outlet, located up-gradient of Phase One Property, due to the distance from the Site it is not considered to have resulted in an APEC.
174 Gloucester St	37	Plus Cleaners, c. 1998,	HLUI	Former cleaners/laundriers, located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
197 Bank St	39	Sherwin Williams, c. 1930	HLUI	Paint and Varnish industry located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
200 Bank St, 194 Gloucester	37, 10, 8	De Fonteny French Cleaners, c. 1930-1940, Unnamed motor vehicle repair shop c. 1901, Dustbane Manufacturer Co, c.1930.	HLUI	Former cleaners/laundriers, auto repairs, and chemical cleaner manufacturers located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
178 Bank St	37, 10	De Fonteney Dry Cleaning, c.1900-1970. Commercial autobody shop.	HLUI	Former dry cleaners, located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
323 Laurier Ave	28	Former Gas station, multiple owners 1930-1950.	HLUI	Former gas station located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
148 Bank St, 138 Bank St	33, 10, 39, 37	Dominion Plating Works c. 1900 Motor Service Co c. 1940-1960 Ottawa Paint Works c. 1900-1940 Superior Service Cleaners c. 1940-1950	HLUI	Former cleaners/laundries, auto repairs, and paint industry located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
247 Slater St, 122 Bank St	37, 8	Former laundry/cleaners c. 1980-2001, Sodalumina Chemical Corp c. 1930.	HLUI	Former cleaners/laundries, and chemical manufacturing located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
250 Albert St,	37, 10	Spic an Span Cleaners c. 1980, Surgenor Motors c. 1970.	HLUI	Former cleaners/laundries, and auto repair located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.

Location	PCA # (Table 2, Sched. D)	PCA Description	Information Source	Rationale for Potential Contribution of the PCA to an APEC
118 Bank St., 117 Bank St., 230 Albert St., 228 Albert St.	32, 10	Bank Street Foundry/McFarlane Brothers, 1901-1912, Dominion Plating Works 1910, Goldart recreational vehicle dealer and servicing 2001-2005, Crabtree Company 1920- 1930.	HLUI	Former foundry, metals industries and auto repair located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
218 Albert St., 210 Albert St., 222 Albert St., 198 Albert St.	6, 52, 27, 37	Battery storage company 1920-1922, Canadian Pacific Express repair shop 1930-1950, various laundries/cleaners 1930-2001, Hans Lockeberg Metal Stamping 1940.	HLUI	Former battery storage, laundries/cleaners, metals industries and auto repair located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
132 Albert St.	34, 10	Canadian Allis-Chalmers Co heating equipment manufacturing 1930-1940, Stewart-Warner Sales and Service, auto service 1930-1970.	HLUI	Former heating equipment manufacturing and auto repair located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
151 Slater	10, 28	Standard Mechanical Systems Ltd, motor vehicle repair shop, 2001, Supertest Petroleum corp. gas station 1930-1963.	HLUI	Former motor vehicle repair shop and gas station with 6 USTs with gasoline (1948) and 1 UST with gasoline (1963), located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
119 Slater St.	37	Paragon Cleaners 1980-1998.	HLUI	Current and/or former laundries/cleaners located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
79 Metcalfe	10	Hertz Drive Yourself Station, with auto servicing 1930.	HLUI	Current and/or former motor vehicle repair located within the Phase One Study Area, due to the distance from the Site it is not considered to have resulted in an APEC.
100 Albert St., 63 Metcalfe	28, 37	Beamish Service gas, gas station 1930-1950, Various Cleaners 1960, 1998.
