Senior Project Manager
Englobe Ottawa

Executive Summary

Englobe Corp. (Englobe) was retained by CAMM Heavy Machinery Movers (the 'Client') to complete a Phase I Environmental Site Assessment (ESA) Update (January 2018 to August 2024) for the property located at 6622 Bank Street in Ottawa, Ontario (the 'Site' or 'Phase I Property'). This Phase I ESA was completed in general accordance with Ontario Regulation (O. Reg) 153/04 - Records of Site Condition (as amended); however, the assessment is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition in accordance with O. Reg 153/04 (as amended).

The purpose of this Phase I ESA Update was to evaluate actual and potential environmental concerns on the Site and to assess the potential for the Site to be impacted by the current and/or historical uses of the Site and the surrounding properties from the previously conducted Phase I ESA report (DST, January 2018) to present (i.e., May 2017 to August 2024). The scope of this Phase I ESA did not include sampling and analysis of potentially contaminated media.

Information regarding the Phase I Study Area (the Site and the area within 250 m of the Site boundaries) was compiled through a records review, Site reconnaissance, and an interview with persons knowledgeable about the Site. The gathered information was evaluated and compiled in this Phase I ESA Update report. Federal, provincial, municipal, and private agencies and databases were searched during the records review for indicators of potential environmental concerns with regards to the Site and Phase I Study Area. It should be noted that a response from Environment and Climate Change Canada (ECCC) was not received as of the issuance date of this report. If these responses affect the conclusions of this report, an addendum to the report will be issued by Englobe.

The Site, primarily utilized for the storage of moving equipment and materials, including items like machinery, electrical components, and various fixtures, consists of an irregularly shaped parcel of land that covers an area of approximately 60,184 m². It is developed with a one-storey slab-on-grade warehouse with an office extension. A total of approximately 30 metal storage containers are also present across the site. The Site is serviced by municipal hydro, drinking water via a drinking water well, sewage disposal via septic system, and heating via natural gas.

The Site reconnaissance was completed by Englobe on July 26, 2024. An in-person interview was conducted during the Site reconnaissance with Mr. Andrew Charron, the current property owner for the Site.

Based on the results of this Phase I ESA Update, no new potential environmental concerns warranting further investigation at the Site were identified for the period of Englobe's assessment (May 2017 to August 2024). Therefore, no further environmental investigation is recommended at the Site at this time.

It is recommended that a designated substance and hazardous materials assessment (DSHMA) be conducted prior to any future building renovation or demolition being undertaken at the Site.

Property and Confidentiality

This report can only be used for the purposes stated therein. Any use of the report must take into consideration the object and scope of the mandate by virtue of which the report was prepared, as well as the limitations and conditions specified therein and the state of scientific knowledge at the time the report was prepared. Englobe Corp. provides no warranty and makes no representations other than those expressly contained in the report.

This document is the work product of Englobe Corp. Any reproduction, distribution, or adaptation, partial or total, is strictly forbidden without the prior written authorization of Englobe Corp. and its Client. For greater certainty, use of any and all extracts from the report is strictly forbidden without the written authorization of Englobe Corp. and its Client, given that the report must be read and considered in its entirety.

No information contained in this report can be used by any third party without the prior written authorization of Englobe Corp. and its Client. Englobe Corp. disclaims any responsibility or liability for any unauthorized reproduction, distribution, adaptation, or use of the report.

If tests have been carried out, the results of these tests are valid only for the sample described in this report.

Englobe Corp.'s subcontractors who have carried out on-Site or laboratory work are duly assessed according to the purchase procedure of our quality system. For further information, please contact your project manager.

1 Introduction

Englobe Corp. (Englobe) was retained by CAMM Heavy Machinery Movers (the 'Client') to complete a Phase I Environmental Site Assessment (ESA) Update (May 2017 to August 2024) for the property located at 6622 Bank Street in Ottawa, Ontario (the 'Site' or 'Phase I Property').

The purpose of this Phase I ESA Update was to evaluate actual and potential environmental concerns on the Site and to assess the potential for the Site to be impacted by the current and/or historical uses of the Site and the surrounding properties from the previously conducted Phase I ESA report (DST, January 2018) to present (i.e., May 2017 to August 2024). The scope of this Phase I ESA did not include sampling and analysis of potentially contaminated media.

Information regarding the Phase I Study Area (the Site and the area within 250 m of the Site boundaries) was compiled through a records review, Site reconnaissance, and an interview with a person knowledgeable about the Site. The gathered information was evaluated and compiled in this Phase I ESA Update report.

This Phase I ESA was completed in general accordance with Ontario Regulation (O. Reg) 153/04 - Records of Site Condition (as amended); however, the assessment is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition in accordance with O. Reg 153/04 (as amended).

This report was prepared for the exclusive use of the Client. Any use of this report by any third party, or any reliance on or decisions to be made based on this report are the responsibility of such parties. Englobe accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report. Full Report Limitations are provided in Section 9 of this report.

1.1 Site Description

The Site is located at 6622 Bank Street in Ottawa, Ontario, in an area zoned as a Rural Heavy Industrial Zone (RH3). The legal description of the Site is as follows:

PART LOT 13 CONCESSION 6 OSGOODE, PARTS 1, 2 AND 3 PLAN 4R-25595 EXCEPT PARTS 1, 2 AND 3 4R30781; SUBJECT TO AN EASEMENT OVER PART 2 ON PLAN.

The Site, primarily utilized for the storage of moving equipment and materials, including items like machinery, electrical components, and various fixtures, consists of an irregularly shaped parcel of land that covers an area of approximately 60,184 m². It is developed with a one-storey slab-on-grade warehouse with an office extension. A total of approximately 30 metal storage containers are also present across the site. The Site is serviced by municipal hydro, drinking water via a drinking water well, sewage disposal via septic system, and heating via natural gas.

2 Scope of Work

The scope of work for this Phase I ESA Update is summarized in the following subsections. All work was completed in general accordance with O. Reg 153/04 (as amended).

2.1 Records Review

A records review was completed which involved collecting data from federal, provincial, and municipal databases, aerial photograph libraries, geological maps, etc., in order to determine the presence or absence of actual and/or potential environmental concerns at the Site and within the Phase I Study Area, since the date of the records review completed in the previous Phase I ESA report (i.e., May 2017).

2.2 Site Reconnaissance

A Site reconnaissance was conducted by Englobe on July 26, 2024, to inspect the Site and surrounding properties. Surrounding properties were assessed from publicly accessible locations.

2.3 Interview

Englobe conducted an interview with Mr. Andrew Charron, owner of the 6622 Bank Street property, during the Site reconnaissance on July 26, 2024. The interview was designed to confirm, or augment, information gathered during the records review and Site reconnaissance regarding past and/or present land uses or events that may have affected the environmental conditions of the Site.

2.4 Data Evaluation and Reporting

The data collected during the records review, Site reconnaissance, and interview was compiled and reviewed by Englobe. The information has been presented in a logical manner that evaluates actual and potential environmental issues that may affect the environmental conditions at the Site.

3 Records Review

3.1 General

Information related to the Site was received and/or requested from numerous sources as detailed in this section. The agencies contacted, information requested, and responses received are summarized in the following sub-sections.

3.1.1 Environmental Reports

The following report was made available to Englobe for review as part of this Phase I ESA Update:

- *“Phase I Environmental Site Assessment - 6622 Bank Street, Ottawa, Ontario. Revision 1” DST Consulting Engineers Inc., January 2018. File No. TS-SO-029328.*

A summary of the pertinent information gathered from the above-noted report is provided below.

3.1.1.1 DST Consulting Engineers. January 2018. Phase I Environmental Site Assessment - 6622 Bank Street, Ottawa, Ontario.

In 2017, DST Consulting Engineers Inc. (DST) conducted a Phase I ESA at the 6622 Bank Street property, which was vacant at the time.

Five potentially contaminating activities (PCAs) were identified within the Phase I Study Area:

- PCA 1: Presence of fill material across the Site (on Site);
- PCA 2: Former residence with possible oil fuel tank for home heating (off Site);
- PCA 3: Waste generation and former presence of a motor vehicle repair shop (off Site);
- PCA 4: Waste generation (off Site); and
- PCA 5: Presence of a motor vehicle repair shop (off Site).

Based on the conclusions of DST’s Phase I ESA, none of identified PCAs warranted further investigation; thus, no additional environmental investigation was recommended at the time by DST.

3.2 Environmental Source Information

Environmental information for the Site was obtained from the sources described in the sub-sections below. It should be noted that distances provided relative to the Site are approximations, and that the surface runoff and groundwater flow directions relative to the Site are inferred.

3.2.1 Provincial, Federal, and Private Database Search

Environmental Risk Information Services (ERIS) was retained by Englobe to complete a search of various federal, provincial, and private agencies/databases for environmental information regarding the Phase I Study Area, from May 2017 to present.

In total, from (and inclusive of) May 2017 to August 2024, two records were found for the Phase I Property, and 66 records were found for the Phase I Study Area. The following table is a summary of the results deemed relevant to the current assessment.

Table 3-1 Summary of Relevant ERIS Database Search Results

Name/Location	Approximate Distance from the Site	Details
Phase I Property (6622 Bank Street)	On Site	(1) Environmental Compliance Approval (ECA) record indicates: <ul style="list-style-type: none"> - Record of ECA #8473-BE5QVS issued August 9, 2019, consisting of enhanced grass swales, and sand filters (CAMM Warehousing and Rentals Ltd.)
6559 Bank Street	150 m north-northeast	(1) Waste Disposal Sites - MOE CA Inventory (WDS) record indicates:

Name/Location	Approximate Distance from the Site	Details
		- Record of a registered end-of-life vehicle waste disposal site issued in September of 2020 (11568108 Canada Inc.).
6638 Bank Street	150 m east-southeast	(3) Ontario Regulation 347 Waste Generators Summary (GEN) records indicate: - This property was listed as a waste generator of aliphatic solvents, waste oils, sludges, light fuels, waste crankcase oils, lubricants, emulsified oils, and oil skimmings in 2020 to 2022 (American Iron & Metal Company Inc. Kenny U-Pull).
6638-6650 Bank Street	150 m southeast	(2) Waste Disposal Sites - MOE CA Inventory (WDS) records indicate: - Record of registration (#R-007-4110227388) for a registered end-of-life vehicle waste disposal site issued in September of 2017 (American Iron & Metal LP). - Record of registration (#R-007-411028336) for a registered end-of-life vehicle waste disposal site issued in November of 2017 (American Iron & Metal LP). (1) Ontario Spills (SPL) record indicates: - A 300 L used motor oil spill to land in November of 2020. No environmental impact listed (Kenny U-Pull).
6682 Bank Street	240 m east-southeast	(1) Waste Disposal Sites - MOE CA Inventory (WDS) records indicate: - Record of registration (#R-007-8679896135) for a registered end-of-life vehicle waste disposal site issued in November of 2016 (ANS Scrap Metal Ltd). (1) Ontario Spills (SPL) record indicates: - An unknown volume water spill to the ditch with visible sheen in May of 2019. No environmental impact listed (ANS).

The ERIS database report indicated the presence of water well records in the Phase I Study Area. A summary of these records is included in Section 3.3.5 - Well Records.

The remaining records were determined to not be within the Phase I Study Area, were listed before May 2017, had insufficient information to determine the location and/or date of occurrence, or were not considered relevant to this assessment.

Based on a review of the relevant database search results, the following records identified within the Phase I Study Area have been considered as PCAs:

- Waste Disposal Sites - MOE CA Inventory record indicating a registered end-of-life vehicle waste disposal site issued in 2020, located at 6559 Bank Street, approximately 150 m north-northeast of the Site;
- Waste Disposal Sites - MOE CA Inventory records indicating a registered end-of-life vehicle waste disposal site issued in 2017, located at 6638 Bank Street, approximately 150 m southeast of the Site;
- Ontario Spills record indicating a 300 L used motor oil spill to land in 2020, located at 6638 Bank Street, approximately 150 m southeast of the Site; and
- Waste Disposal Sites - MOE CA Inventory records indicating a registered end-of-life vehicle waste disposal site issued in November of 2016 and associated spills, located at 6682 Bank Street, approximately 240 m east-southeast of the Site.

Note: Any spills \leq 25 L are considered minor and localized in nature and, therefore, have not been identified as PCAs in this report.

A copy of the ERIS database search report is provided in Appendix D.

3.2.2 City Directory Information

The city directory search provided the names of businesses/tenants that operate at specific municipal addresses; they do not provide details as to the activities at the properties.

Englobe retained ERIS to conduct a city directory search for the Site and various properties within the Phase I Study Area. The results are summarized in the table below.

Table 3-2 City Directory Search Summary for Site and Surrounding Properties

Address	Year Listed	Listing
6622 Bank Street	2012	No record listed.
	2017	No record listed.
	2021	No record listed.
6570 Bank Street	2012	No record listed.
	2017	No record listed.
	2021	Christian Horizons
6574 Bank Street	2012	No record listed.
	2017	No record listed.
	2021	No record listed.
6585 Bank Street	2012	Tomlinson Lift Inc
	2017	Tomlinson Lift Inc
	2021	No record listed.
6631 Bank Street	2012	Kingsway Christian Church, Greely Child Care Ctr
	2017	Greely Child Care Ctr
	2021	No record listed.
6682 Bank Street	2012	No record listed.
	2017	Direct Bore Inc
	2021	ANS Scrap Metals

It should be noted that the ERIS city directory search report does not include residential information.

A copy of the ERIS city directory search report is provided in Appendix D.

3.2.3 Environment and Climate Change Canada (ECCC)

Englobe submitted a freedom of information request to the ECCC under the Access to Information Act, to provide available information related to environmental concerns (general correspondence, occurrence reports, abatements, etc.), orders, ASTs/USTs, spills, investigations/prosecutions (with owner/tenant information), and waste generator number/classes for the Phase I Property.

A response was received on August 22, 2024 indicating that no records were found concerning the request.

A copy of the ECCC response is included in Appendix D.

3.2.4 Ministry of the Environment, Conservation, and Parks (MECP)

A request for information was made through the MECP Environmental Property Information system for information on the Site, such as past or existing environmental permits, existing environmental orders, fuel storage tanks, or any other environmentally related information.

A response was received on August 16, 2024 indicating the below inactive Industrial Sewage Works record:

— ECA 8473-BESQVS, Industrial, CAMM Warehousing and Rentals Ltd, Approved, Offsite, 0098, 2019.

Based on a review of the response, no new potentially contaminating activities have been identified at the Site or surrounding area.

A copy of the MECP response is included in Appendix D.

3.2.5 Technical Standards and Safety Authority (TSSA)

The TSSA Fuel Handling Division is responsible for records regarding licensing of fuel handling facilities in Ontario. The TSSA was contacted for any information with respect to environmental concerns, which could include past or existing environmental spills, information on fuel tanks, or any other related environmental information at the Site and adjacent/neighbouring properties.

A response was received from the TSSA on July 24, 2024 indicating that there were no fuel records available for the Site and surrounding properties.

A copy of the TSSA's response is included in Appendix D.

3.2.6 City of Ottawa

A request for information was made through the City of Ottawa Historic Land Use Inventory (HLUI) for information on historic land use at the Site and surrounding area. The HLUI provided information on the type and location of land uses within the City of Ottawa that may have potential to cause contamination in soil, groundwater, or surface water.

A response was received from the City of Ottawa on August 16, 2024 indicating no new potentially contaminating activities at the Site or surrounding area.

A copy of the City of Ottawa's response is included in Appendix D.

3.3 Physical Setting Source

Aerial photographs, as well as soil, bedrock geology, and topographic maps were reviewed for information pertaining to the physical setting of the Site. A description of the results for each record reviewed is provided below.

3.3.1 Aerial Photographs

Aerial photographs can provide an indication of historical land uses with respect to the Site and surrounding properties. Three aerial photographs were reviewed as part of this Phase I ESA Update, for the years 2017, 2019, and 2022.

The following table highlights the observed features of the Site and Phase I Study Area in each aerial photograph.

Table 3-3 Summary of Aerial Photographs

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
2017	The Site is vacant with the ground surface disturbed in preparation for development.	<u>North of the Site</u> : Residential properties and forested lands. <u>East of the Site</u> : Residential properties and forested lands. <u>South of the Site</u> : Vacant land with a disturbed ground surface. <u>West of the Site</u> : Mixed commercial and residential properties and forested lands.
2019	Development of a warehouse in the northwest portion of the Site.	<u>North of the Site</u> : Similar to the 2017 aerial photograph. <u>East of the Site</u> : Similar to the 2017 aerial photograph with further disturbed ground surface. <u>South of the Site</u> : Large vehicle parking area and development of a building in in the southwest portion of the adjacent site. <u>West of the Site</u> : Similar to the 2017 aerial photograph.
2022	Similar to the 2019 aerial photograph with additional storage of equipment and storage containers.	<u>North of the Site</u> : Similar to the 2019 aerial photograph. <u>East of the Site</u> : Similar to the 2019 aerial photograph. <u>South of the Site</u> : Similar to the 2019 aerial photograph. <u>West of the Site</u> : Similar to the 2019 aerial photograph.

The reviewed aerial photographs are included in Appendix C.

3.3.2 Fire Insurance Plans

DST previously requested a search of Fire Insurance Plans (FIPs) through Opta Information Intelligence (Opta). Opta maintains records, including plans and maps for Canadian cities which indicate past and existing structures on properties, including, but not limited, to ASTs, USTs, and other building structure information.

A response received indicating that no FIPs or inspection reports were found in the Opta online inventory for the Phase I Study Area. Therefore, Englobe did not request an additional search of FIPs through Opta as part of this Phase I ESA Update.

3.3.3 Topography, Hydrology, and Geology

Available maps were used to determine the physical features (i.e., geology, topography, hydrogeology, locations of nearby watercourses, etc.) of the Site and surrounding properties. A list of resources and descriptions of the identified features are presented in the table below.

Table 3-4 Summary of Maps Reviewed

Map Title	Source	Surrounding Properties Features
Natural Heritage Areas	Ministry of Natural Resources and Forestry, Make A Map: Natural Heritage Areas, accessed August 2024	The Phase I Study Area is situated at approximately 92 meters above sea level (masl) and is generally flat. The nearest major surface water body is the Rideau River, located approximately 10.8 km west of the Site. There are no mapped Areas of Natural and Scientific Interest (ANSIs), or provincially significant wetlands identified on the Phase I Property. However, an unevaluated wetland intersects the Phase I Property. Provincially significant wetlands and unevaluated wetlands are present within the Phase I Study Area.

Map Title	Source	Surrounding Properties Features
OGS Earth Bedrock Geology	Ontario Geological Survey, 2011. 1:250:000 Scale Bedrock Geology of Ontario, Ministry of Mines	The bedrock at the Site and Phase I Study Area is characterized by Dolostone and Sandstone of the Beekmantown Group.
OGS Earth Surficial Geology	Ontario Geological Survey, 2010. Surficial Geology of Southern Ontario, Ministry of Mines	The surficial geology at the Site is characterized Paleozoic bedrock. The surficial geology within the Phase I Study Area is mostly characterized by organic deposits of peat, muck and marl, as well as Paleozoic bedrock.
OGS Physiographic Landforms	Ontario Geological Survey, 2024. Physiography of Southern Ontario. Ministry of Mines.	The physiographic landforms at the Site consist of Limestone Plains.

3.3.4 Fill Materials

Evidence of imported granular material was identified on Site, in a gravel pile located in central portion of the exterior storage area. This material was indicated to be used for Site grading purposes.

3.3.5 Water Bodies and Areas of Natural and Scientific Interest

The nearest major surface water body to the Site is the Rideau River, which is located approximately 10.8 km west of the Site. There are no ANSIs, or provincially significant wetlands identified on the Phase I Property. However, an unevaluated wetland intersects the Phase I Property. Additionally, provincially significant wetlands and unevaluated wetlands are present within the Phase I Study Area.

3.3.6 Well Records

An online search of MECP well records was completed by ERIS via the WWIS database. One well record was found for the Site, while 23 well records were found within the Phase I Study Area. The identified well records relate to monitoring wells and well abandonments. Details of the on-Site well record are as follows:

Table 3-5 Well Records within the Phase I Study Area

MECP Well ID	Date (dd/mm/yyyy)	Well Depth (mbgs ¹)	Well Use	Approximate distance from the Site (m)	Reported Stratigraphy (mbgs)
A153626	30/05/2017	67.1	Domestic (Water Supply)	On Site	0 - 3.0: Backfill 3.0 - 45.7: Limestone 45.7 - 57.9: Limestone with Sandstone Layers 57.9 - 67.1: Sandstone

¹ mbgs = meters below ground surface

3.3.7 Site Operating Records

No Site operating records were provided to Englobe for review.

4 Interviews

Interviews of public and government agencies regarding specific details of properties are handled through FOI requests due to privacy legislation. The details of these information requests are provided in Sections 3.2.3 through 3.2.6.

As noted in Section 2.3, Englobe conducted an interview with Mr. Andrew Charron, the owner of the 6622 Bank Street property, during the Site reconnaissance on July 26, 2024. Information received as part of this interview has been incorporated into the Site reconnaissance sections below.

5 Site Reconnaissance

The findings documented in this section are based on observations made by Englobe during the Site reconnaissance on the morning of July 26, 2024. At the time of the reconnaissance, the weather conditions were sunny, with an ambient temperature of 22 degrees Celsius (°C).

Select photographs taken during the Site reconnaissance are included in Appendix B.

5.1 Specific Observations at the Phase I Property

5.1.1 Description of Structures and Other Improvements

The Site consists of an irregularly shaped parcel of land that covers an area of approximately 60,184 m². It is developed with a one-storey slab-on-grade warehouse building with an office extension. A total of approximately 30 metal storage containers are also present across the Site. The Site is serviced by municipal hydro, drinking water via a drinking well, sewage disposal via septic system, and heating via natural gas.

The warehouse building, mainly utilized for the storage of moving equipment and materials, including items like machinery, electrical components, and various fixtures, is situated to the west of the main office area, is a one-story structure in the northeast section of the Site. It features metal siding, a slab-on-grade foundation, and an insulated metal deck roof. The warehouse comprises a spacious storage area, a corridor with a staff room and one washroom, and an electrical room in the northeast corner. The primary entrance leads to a one-story office space with multiple offices and two washrooms. The interior of the office space includes drywall, drop tile ceilings, and tile flooring. The entire building is equipped with a central heating, ventilation, and air conditioning (HVAC) system for climate control, a mix of incandescent and LED lighting, and is serviced by municipal electricity, natural gas, a septic tank sewer system, and water from a potable well.

The metal storage containers are spread across the Phase I Property and are used for the storage of electrical gear and fixtures, moving equipment, and general warehouse overflow.

5.1.2 Description of Below Ground Structures

Below-ground structures at the Site included a septic tank with associated tile beds and piping. No other below-ground structures or basements were observed on Site during the Site reconnaissance.

5.1.3 Details of Tanks

A septic tank is located north of the warehouse building, with associated pumping chamber and piping running northeast.

Three fuel ASTs (two diesel and one gasoline) were observed west of the warehouse building, on a concrete pad. All tanks observed appeared to be in good condition with no corrosion, punctures, or visible spills/leaks noted.

A 25,000-liter capacity fire storage tank for holding non-potable water used for fire suppression was observed along the west property boundary, to the west of the Warehouse Building. The tank was observed to be in good condition with no corrosion, or punctures.

Englobe did not observe any other tanks during the Site reconnaissance.

5.1.4 Potable and Non-Potable Water Sources

The Site is serviced by one potable drinking water well, located north of the warehouse building.

5.1.5 Underground Utilities and Service Corridors.

Public and private utility locates were not completed as part of this Phase I ESA; however, based on the Site characteristics, Site Visit and the observed utility meters on Site, it is inferred that hydro and natural gas services are provided to the building through underground lines.

5.1.6 Features of Structures and Buildings

Entry and Exit Points

The Site is accessible by Bank Street, from the west. The warehouse building has entry and exit points on the north, south, west, and east sides of the building.

Heating and Cooling Systems

During the Site reconnaissance, Englobe observed an HVAC system in the warehouse and a natural gas meter on the exterior northwest corner of the building.

Drains, Pits, and Sumps

Englobe observed drains associated with washrooms throughout the Site. Englobe did not observe drains, pits, or sumps in the warehouse areas during the Site reconnaissance. However, it was noted that the warehouse space is utilized for the storage of moving equipment and materials, including items like machinery, electrical components, and various fixtures, and it is anticipated that floor drains are present but were obscured at the time of the Site reconnaissance. Additionally, it was confirmed that an oil interceptor is located within the southeast corner of the warehouse building, although was obscured and inaccessible at the time of the Site reconnaissance. The Client indicated that the oil interceptor has not been inspected, but no leaks have occurred or any reason for concern.

Chemical Storage

During the Site reconnaissance, Englobe observed the minor storage of various engine fuels, hydraulic oil, and waste oils at the Site, along the east wall of the Warehouse Building.

It was noted that the compressor fluid and diesel engine oil were stored in large plastic pails, which were sealed. All of the containers were observed to be in good condition, with no evidence of leaking, staining, or spills.

Waste Removal

General solid waste is stored in a storage container and brought to GFL Environmental Inc., a licensed waste handler, for disposal.

Liquid waste (i.e., waste oils), are properly stored in waste drums located along the east wall of the warehouse building and picked up by Lacombe Waste Services or Tomlinson Environmental Services, licensed liquid waste handlers, for disposal.

Stains or Corrosion

Englobe did not observe staining or corrosion during the Site reconnaissance.

5.1.7 Wells

During the Site reconnaissance, Englobe observed one potable drinking water supply well north of the warehouse building.

5.1.8 Ground Surface

The exterior ground surface at the Site consists mainly of gravel parking and storage areas, with grass areas surrounding the entire Site and an asphalt parking lot at the entrance of the Phase I Property.

5.1.9 Railway Lines or Spurs

Englobe did not observe any railway lines or spurs during the Site reconnaissance.

5.1.10 Stained Soil and Stressed Vegetation

Englobe did not observe any stained soil, or stressed vegetation during the Site reconnaissance.

5.1.11 Fill and Debris

During the site reconnaissance, Englobe noted the presence of used tires and wooden pallets along the western fence line, wooden hydro poles along the southern fence line, and various other equipment along the property lines.

The entire exterior storage area consisted of a gravel base, with a pile of gravel fill in the center to maintain vehicular access. While the driveway/parking area was the only source of fill observed at the Site, it is known that imported fill is present beneath the warehouse building on Site (DST, 2018).

5.1.12 Designated Substances & Hazardous Materials

Eleven designated substances are regulated by the Ministry of Labour (MOL) under the Occupational Health and Safety Act (OHSA) through the development of designated substance regulations that control worker exposure to designated substances. The designated substances identified in *OHSA include acrylonitrile, arsenic, asbestos, benzene, coke oven emissions, ethylene oxide, lead, mercury, isocyanates, silica, and vinyl chloride*. Guidelines have been developed for building projects such as renovations, construction, and demolition where designated substances may be disturbed. The following sections address Special Attention Items such as lead and/or lead based paints, mercury, asbestos containing materials (ACMs), and silica, and their potential presence within the Site Buildings.

Lead and/or Lead-Containing Paint

Lead may be present in a variety of building materials and is commonly associated with paints, solder material, pipe plumbing, ceramic tile glazing and mechanical equipment due to its ability to resist corrosion. Exposure to lead may cause lead poisoning and is considered to be a human health risk. The historical use of lead-containing paints (LCPs) is a source of exposure through ingesting peeling or flaking paints, and/or routine contact with painted surfaces containing lead. Regulations have been established that limit worker exposure to lead, and guidelines have been published with work procedures to be followed when performing work that generates airborne lead containing dust.

Based on the estimated construction date of the building on-Site (2018), LCPs and other lead-based materials are unlikely.

Mercury

Liquid mercury is commonly associated with mechanical equipment such as thermostats, thermometers, barometers, pressure gauges, and electrical switches. A small amount of mercury is present in fluorescent light tubes and compact fluorescent light bulbs. Removal of materials suspected to contain mercury should be conducted in accordance with “The Safe Handling of Mercury: A Guide for the Construction Industry”.

Fluorescent light tubes were observed within the Site building.

Asbestos-Containing Materials

Asbestos is a naturally occurring fibrous mineral which has been widely used historically due to physical properties that, amongst other things, allow asbestos to withstand high temperatures. Asbestos has been used in a number of building products including, but not limited to thermal and electrical insulation, floor and ceiling tiles, plaster, and drywall joint compound.

Based on the estimated construction date of the building on-Site (2018), ACMs are not anticipated to be present within the building materials on Site.

Urea Formaldehyde Foam Insulation

Based on the estimated date of construction of the Site building (2018), urea formaldehyde foam insulation (UFFI) is unlikely. UFFI was banned in Canada in 1980. No evidence of UFFI was observed during the Site reconnaissance.

Silica

Silica is a naturally occurring mineral found in a variety of construction materials and is commonly associated with manufactured concrete products, ceramic tiles, mortar, and products in the electronics industry.

Many buildings materials within the Site building are expected to contain silica, such as, but not limited to, concrete foundations, walls and tiled floors.

Polychlorinated Biphenyls

In 1977, the Canadian government enacted a set of chlorobiphenyls regulations which limited the use of polychlorinated biphenyls (PCBs). As such, the only allowable use of PCBs in Canada is in electrical transformers and capacitors existing in Canada before July 1, 1980, and certain other “closed use” equipment (specifically heat transfer equipment, hydraulic equipment, and vapour diffusion pumps) that were in Canada before September 1, 1977.

PCBs are also commonly found within electrical ballasts manufactured prior to 1981, within fluorescent light fixtures and high intensity discharge (HID) lamps. Light fixtures with T12 lamps are more likely to contain ballasts that were manufactured prior to 1981. T8 lamps are associated with light fixtures that were manufactured after the phase-out of PCB-containing ballasts. The letter “T” denotes the shape of the light fixture (e.g., tubular) and the number which follows indicates the diameter in eighths of an inch.

Based on the estimated construction date of the building on-Site (2018), PCB-containing equipment, are not anticipated to be present within the Site building. However, potential PCB-containing equipment, such as new transformers stored in the exterior storage area were observed on Site.

Ozone Depleting Substances

Canada signed the Montreal Protocol on September 16, 1987, which controlled the use of Ozone Depleting Substances (ODSs) and banned over 100 ODSs grouped into the following categories: chlorofluorocarbons (CFCs); halons; carbon tetrachloride (CTC); hydrochlorofluorocarbons (HCFC); methyl chloroform; and methyl bromide. ODSs can be found in older refrigerating and air conditioning equipment.

During the Site reconnaissance, ODS-containing equipment, such as refrigerators, freezers, and AC-units in the Warehouse were observed on Site.

Mould

Englobe did not observe visible or suspected mould growth during the Site reconnaissance.

5.1.13 Potentially Contaminating Activities

Based on the information obtained during Englobe’s Site reconnaissance, no new PCAs have been identified within the Phase I Property.

5.1.14 Unidentified Substances

Englobe did not observed any unidentified substances during the Site reconnaissance.

5.2 Neighbouring Properties

Neighbouring properties were observed from publicly accessible areas and consisted mostly of mixed commercial, industrial and residential properties.

The general property uses of the adjacent properties are summarized in the following table:

Table 5-1 Surrounding Property Activity

Direction	Surrounding Property Activity
North	Residential properties
East	Bank Street, followed by commercial, industrial and residential properties
South	American Iron & Metal Company Inc. and Kenny U-Pull, followed by ANS Scrap Metal.
West	Undeveloped forested lands, followed by Grey’s Creek Road and residential properties

6 Review and Evaluation of Information

6.1 Current and Past Uses

The Site has been used for commercial and industrial purposes throughout the period of Englobe’s assessment (May 2017 to August 2024). Previously, the Site was vacant, predominantly undeveloped and used for agricultural purposes.

6.2 Interpreted Hydrogeological Conditions

The Site is relatively flat, with a gentle slope northeast, and is situated at approximately 92 masl. The regional topography in the area of the Site slopes towards the east/northeast. The nearest major surface water body to the Site is the Rideau River, located approximately 10.8 km west of the Site. Based on the regional topography in the Phase I Study Area, it is inferred that the local shallow groundwater flow direction is to the east/northeast.

6.3 Potentially Contaminating Activities

The following table summarizes the PCAs identified within the Phase I Study Area:

Table 6-1 Potentially Contaminating Activities

PCA No.	Potentially Contaminating Activity	Approximate Distance from Site	Description	Contributes to APEC?
PCA 1	Presence of three fuel ASTs	On Site	Two diesel ASTs and one gasoline AST for fueling of moving equipment, located west of the warehouse building.	No
PCA 2	Minor storage of fuel products	On Site	Minor storage of hydraulic fluid, engine oil and waste oil, located along the east wall of the warehouse building.	No
PCA 3	Presence of one oil interceptor	On Site	Presence of an oil interceptor, located in the southeast corner of the warehouse building on Site.	No
PCA 4	Registered vehicle waste disposal site	Off Site - 6559 Bank Street	ERIS report identified a record of a registered end-of-life vehicle waste disposal site issued in September of 2020.	No
PCA 5	Registered vehicle waste disposal site	Off Site - 6638-6650 Bank Street	ERIS report identified a record of a registered end-of-life vehicle waste disposal site issued in September of 2017.	No
PCA 6	A 300 L used motor oil spill to land	Off Site - 6638-6650 Bank Street	ERIS report identified a record of a 300 L used motor oil spill to land in November of 2020.	No
PCA 7	Motor vehicle repair shop	Off Site - 6653 Bank Street	The Site Visit conducted by DST and Englobe confirmed the location of an automobile service and body shop at 6653 Bank Street (Hawler Auto Body Shop). Additionally, the City of Ottawa HLUI	No

PCA No.	Potentially Contaminating Activity	Approximate Distance from Site	Description	Contributes to APEC?
			listed the property as a motor vehicle repair shop in 1998.	
PCA 8	Registered vehicle waste disposal site	Off Site - 6682 Bank Street	ERIS report identified a record of a registered end-of-life waste disposal site issued in November of 2016.	No

PCA 1 and 2:

Based on the observed condition of the minor fuel storage and three fuel ASTs on Site, and no evidence of any surficial staining observed in the vicinity, these PCAs are not anticipated to pose a potential environmental concern to the Site at this time.

PCA 3:

Given that the oil interceptor is relatively new, in line with the recent construction of the building, has shown no signs of leaks or issues as indicated by the Client, and is infrequently used, coupled with the lack of any visible staining in the warehouse building (which primarily stores new equipment), this PCA is not anticipated to pose an environmental concern to the Site at this time.

PCA 4 and 7:

Based on the nature of the potentially contaminating activities, their distance from the Site, and the local topography, these PCAs are not anticipated to pose a potential environmental concern to the Site at this time.

PCA 5, 6 and 8:

Based on the nature of the potentially contaminating activities, their distance from the Site, and the local topography, these PCAs are not anticipated to pose an environmental concern to the Site.

6.4 Areas of Potential Environmental Concern

Based on a review of the above information provided in Section 6.3, no APECs warranting further investigation at this time have been identified at the Site for the period of this investigation (May 2017 to present).

6.5 Phase I Conceptual Site Model

The illustrative requirements, according to O. Reg. 153/04, of the Phase I Conceptual Site Model (CSM) is shown on Figures 2 and 3, provided in Appendix A. These figures include: the location of the existing buildings at the Site and Phase I Study Area; the roads, including names, within the Phase I Study Area; and uses of properties adjacent to the Site.

The topography of the Site was analyzed using maps and information provided by Ontario Base Maps (OBM). The ground surface elevation for the Site is approximately 92 meters above sea level (masl), and the regional topography appears to slope towards the east/northeast. Based on visual observations during the Site visit, the Site is generally flat with a gentle slope towards the northeast.

Based on the regional topography in the Phase I Study Area, it is inferred that the local shallow groundwater flow direction is to the east/northeast. Depending on climate conditions and the amount of surface water available, ditching, underground services, and ground surface may affect the shallow groundwater flow on a local level.

Underground utilities at the Site generally consist of buried electricity lines, natural gas lines, a septic tank and associated piping, and two catch basins for swale drainage. Public and private utility locates were not completed as part of this Phase I ESA.

The geological maps reviewed indicate that the Phase I Study Area is underlain by limestone, dolostone, shale, arkose, and sandstone Chazy Group from the Rockcliffe Formation (OGS, 2011). The surficial geology map, according to the Ontario Geological Survey (OGS) Earth Surficial Geology of Southern Ontario (OGS, 2010), indicates that Site consists of two terrains: the south portion of the Site is primarily composed of stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain. The North of the Site is primarily composed of organic deposits of peat, muck and marl. Additionally, borehole data obtained from a well record for one water-supply well on Site indicated the following stratigraphy:

- Backfill from approximately 0 to 3.0 meters below ground surface (m bgs);
- Limestone from approximately 3.0 mbgs to 45.7 m bgs;
- Limestone with Sandstone layers from approximately 45.7 mbgs to 57.9 m bgs;
- Sandstone from approximately 57.9 mbgs to the end of the borehole at 67.1 m bgs.

No shallow aquifer groundwater level details were specified within the reviewed well records reviewed.

Based on the information obtained as part of this Phase I ESA, no APECs resulting from current and/or historical PCAs were identified at the Site. The locations of the PCAs are shown in Appendix A.

7 Conclusions and Recommendations

Based on the results of this Phase I ESA Update, no new potential environmental concerns warranting further investigation at the Site were identified for the period of Englobe's assessment (May 2017 to August 2024). Therefore, no further environmental investigation is recommended at the Site at this time.

It is recommended that a designated substance and hazardous materials assessment (DSHMA) be conducted prior to any future building renovation or demolition being undertaken at the Site.

9 Statement of Limitations

This report (hereinafter, the “Report”) was prepared by Englobe Corp. (herein the “Company”) and is provided for the sole exclusive use and benefit of CAMM Machinery Movers (the “Client”). Ownership in and copyright for the contents of the Report belong to the Company. The period of time covered by Englobe’s assessment is May 2017 to August 2024.

No other person is authorized to rely on, use, copy, duplicate, reproduce, or disseminate this Report, in whole or in part and for any reason whatsoever, without the express prior written consent of the Company. Any person using this Report, other than the person(s) to whom it is directly addressed, does so entirely at its own risk. The Company assumes no responsibility or liability in connection with decisions made or actions taken based on the Report, or the observations and/or comments contained within the Report. Others with interest in the Site and/or subject matter of this Report should undertake their own investigations and studies to determine how or if they or their plans could be affected.

This Report should be considered in its entirety; selecting specific portions of the Report may result in the misinterpretation of the content.

The work performed by the Company was carried out in accordance with the terms and conditions specified in the Professional Services Agreement between the Company and the Client, in accordance with currently accepted engineering standards and practices and in a manner consistent with the level of skill, care and competence ordinarily exercised by members of the same profession currently practicing under similar conditions and like circumstances in the same jurisdiction in which the services were provided. Standards, guidelines, and practices may change over time; those which were applied to produce this Report may be obsolete or unacceptable at a later date.

The findings, recommendations, suggestions, or opinions expressed in this Report reflect the Company’s best professional judgement based on observations and/or information reasonably available at the time the work was performed, as appropriate for the scope, work schedule and budgetary constraints established by the Client. No other warranty or representation, expressed or implied, is included in this Report including, but not limited to, that the Report deals with all issues potentially applicable to the Site and/or that the Report deals with any and all of the important features of the Site, except as expressly provided in the scope of work.

This report has been prepared for the specific Site, development, building, design or building assessment objectives and/or purposes that were described to the Company by the Client. The applicability and reliability of the content of this Report, subject to the limitations provided herein, are only valid to the extent that there has been no material alteration or variation thereto, and the Company expressly disclaims any obligation to update the Report. However, the Company reserves the right to amend or supplement this Report based on additional information, documentation or evidence made available to it.

The Company makes no representation concerning the legal significance of its findings, nor as to the present or future value of the property, or its fitness for a particular purpose and hereby disclaims any responsibility or liability for consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

Since the passage of time, natural occurrences, and direct or indirect human intervention may affect the views, conclusions, and recommendations (if any) provided in the Report, it is intended for immediate use.

This Statement of Limitations forms an integral part of the Report.

In preparing this Report, the Company has relied in good faith on information provided by others and has assumed that such information is factual, accurate, and complete. The Company accepts no

responsibility or liability for any deficiency, misstatement, or inaccuracy in this Report resulting from the information provided, concealed, or not fully disclosed by those individuals.

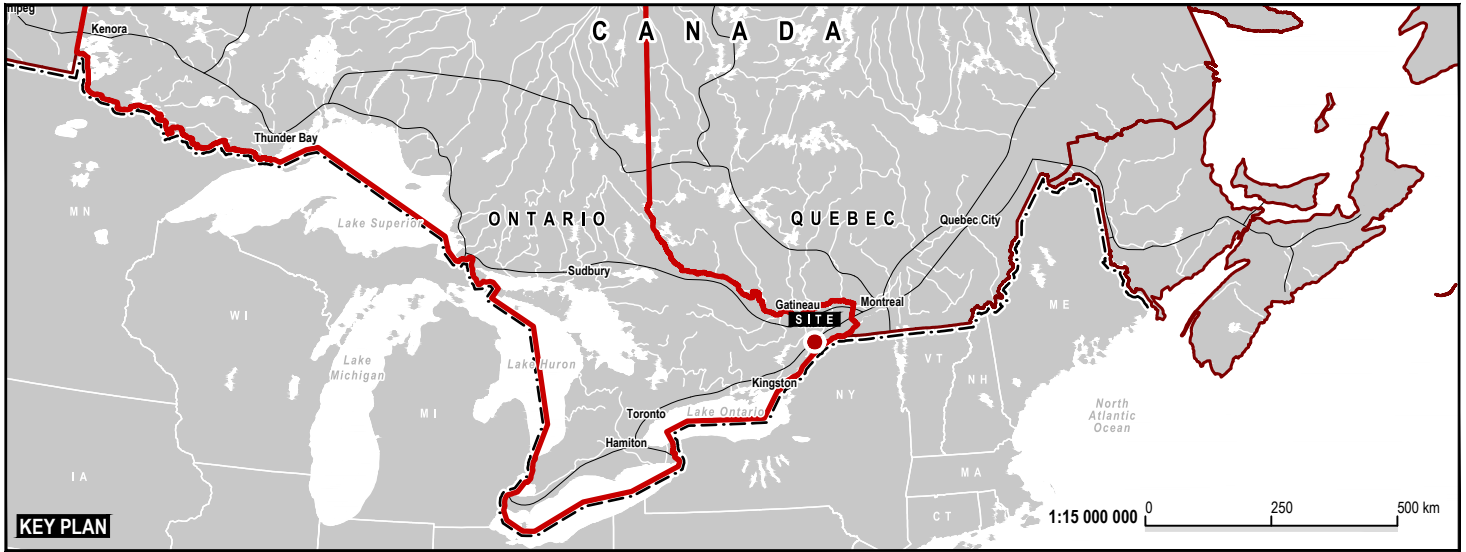

The conclusions presented herein are based on information gathered from a limited historical review of readily available geological, historical, and regulatory information and a field inspection program. Sampling and analysis of soil, ground water, or any other material was not carried out as part of this assessment. Consequently, the presence and/or extent of any adverse environmental impact cannot be verified. The potential for environmental liability and/or environmental impact is an opinion that has been arrived at within the scope of this assessment.

Any description of the Site and its physical setting documented in this Report is presented for informational purposes only, to provide the reader a better understanding of the Site and scope of work. Any topographic benchmarks and elevations are primarily to establish relative elevation differences between sampling locations and should not be used for other purposes such as grading, excavation, planning, development, or similar purposes.

Executive Summary: Summary By Data Source

AUWR - Automobile Wrecking & Supplies

A search of the AUWR database, dated 1999-Apr 30, 2024 has found that there are 2 AUWR site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
A & A AUTO PARTS	6682 BANK ST RR 3 METCALFE ON K0A 2P0	241.5	33
G M S AUTO PARTS	6682 BANK ST RR 3 METCALFE ON K0A 2P0	241.5	33

CA - Certificates of Approval

A search of the CA database, dated 1985-Oct 30, 2011* has found that there are 1 CA site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
9172-8287 Quebec Inc.	6525 Bank St Part of Lot 12, Concession 6 Ottawa ON	246.9	34

EASR - Environmental Activity and Sector Registry

A search of the EASR database, dated Oct 2011-Apr 30, 2024 has found that there are 1 EASR site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
2719683 ONTARIO INC.	6571 Bank ST Ottawa ON K0A 2P0	240.4	32

EBR - Environmental Registry

A search of the EBR database, dated 1994 - May 31, 2024 has found that there are 1 EBR site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
American Iron & Metal Company Inc.	6650 Bank Street Ottawa CITY OF OTTAWA ON	152.7	<u>16</u>

ECA - Environmental Compliance Approval

A search of the ECA database, dated Oct 2011-Apr 30, 2024 has found that there are 3 ECA site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>

A company and director were fined \$20,000 for well violations in relation to constructing wells, contrary to the Ontario Water Resources Act. "Environmental protection legislation protects communities and the environment.

Breaking these rules can result in serious penalties and is an offence the ministry takes very seriously," said Environment Minister Jim Bradley. Wayne Renwick is the president of Olympic Drilling Company Limited and operates a water well construction business in Ottawa. Mr. Renwick also works at the company as its licensed well technician. The ministry initiated an investigation into the company as a result of receiving a complaint that the company had constructed wells without necessary licences and that no well records had been provided. The evidence obtained during the investigation indicated that the company and Mr. Renwick had constructed or made improvements to a number of wells without having the appropriate licenses. The company failed to affix a well tag to the outside of the well and failed to submit the well records within 30 days of completion of the well. Mr. Renwick also provided false well records. The company and Mr. Renwick were fined a total of \$20,000 plus victim fine surcharges of \$5,000 and were given one year to pay the fine.

Investigation 1:
Investigation 2:
Penalty Imposed:
Description:

On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Apr 2024

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -May 2024

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-May 2024

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - May 31, 2024

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2024

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - May 31, 2024

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Apr 30, 2024

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2024

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2023

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2024

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2022

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory 1993-2020:

Federal

[NPR2](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2024

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - May 31, 2024

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Apr 30, 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI:

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - May 31, 2024

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2024

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in Mar 2023-Mar 2024 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Jan 2023; see description

Wastewater Discharger Registration Database:

Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

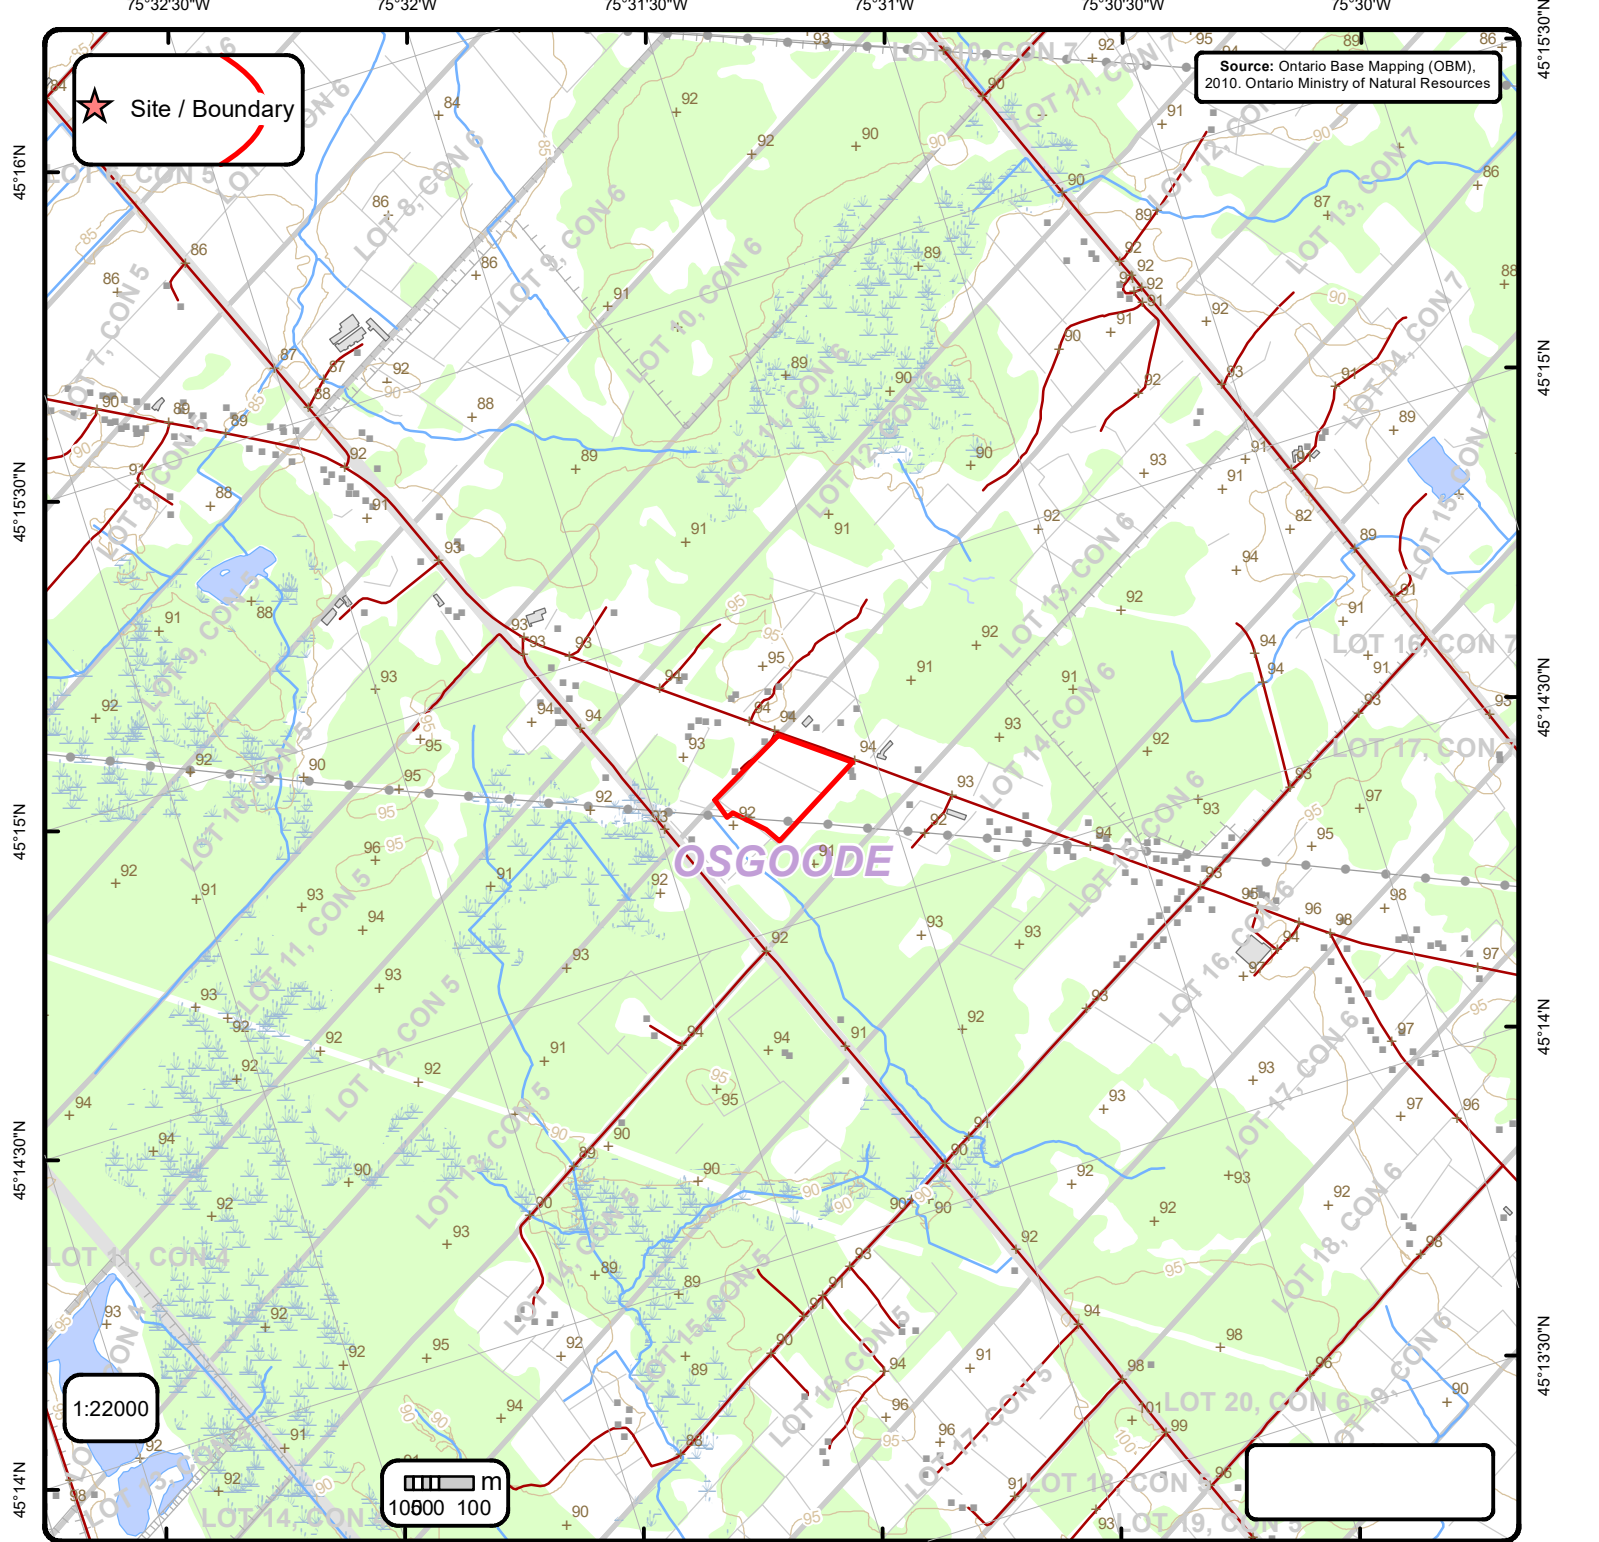

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH
6622 Bank Street
Ottawa, ON K0A 2P0

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

6525-6685 of Bank Street
1900-2100 of Greys Creek Road
7385-7400 of Marcella Drive

Search Notes:

Bank Street is also known as 6545-6685 Bank Street in Ottawa. Bank Street is also known as 6525-6685 Bank Street in Ottawa.

Ms. Mackenzie Beisheim
Englobe Corp.
2713 Lancaster Road, Unit 101
Ottawa, Ontario
K1B 5R6

Dear Ms. Beisheim,

This letter is in response to your request under the *Access to Information Act* for:

“Owner: CAMM Machinery Movers

Property: 6622 Bank Street, Ottawa, ON K0A 2P0

*See the map for the site location.

For a Phase One Environmental Site Assessment (ESA), can you please provide any environmentally related records (e.g., general correspondence, occurrence reports, abatement, orders, storage tanks, spills, investigations/prosecutions (with owner/tenant information), and any applicable waste generator number/classes) or any environmentally related information associated with the Property.”

After a thorough search, no records were found concerning this request.

Please be advised that you are entitled to file a complaint with the Information Commissioner of Canada concerning the processing of your request within sixty days of the receipt of this notice. In the event you decide to avail yourself of this right, your notice of complaint should be addressed to:

Information Commissioner of Canada
30 Victoria Street
Gatineau, Québec K1A 1H3

.../2

If you have any questions regarding this request, please do not hesitate to contact Mélanie Gagnon by email at melanie.gagnon@ec.gc.ca.

Yours sincerely,

Original signed by:

Susan Drysdale
Director, Access to Information and Privacy

mackenzie.beisheim@englobecorp.com

Dear Mackenzie Beisheim:

RE: **MECP FOI A-2024-04847, Your Reference 02407549.000 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

6622 Bank Street, Ottawa
Timeframe: December 30, 1799 to July 23, 2024

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned.

The ministry's District Office has advised that there are inactive records in the Records Centre, Mississauga, and below is a description of these records:

- ECA 8473-BESQVS, Industrial, CAMM Warehousing and Rentals Ltd, Approved, Offsite, 0098, 2019

If you would like us to retrieve these files, please submit a separate request quoting this file number. The \$5 application fee will be applied towards any costs incurred with the retrieval of the records from the Records Centre.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Roxanne Chambers at (807) 456-3035 or roxanne.chambers@ontario.ca.

Yours truly,

Roxanne Chambers

Dear Mackenzie Beisheim,

**Re: Information Request
6622 Bank Street Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City’s Environmental Remediation Unit (ERU) has a Phase I Environmental Site Assessment for this property (DST, 2018). Please contact ERU-UAE@ottawa.ca to obtain a copy of the report if required.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** No records found for this property.
- **Solid Waste Services:** No records found for this property.

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet (‘ADDRESS – HLUI Summary report.xlsx’), please refer to the [Overview and User Guide.](#)”

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Spencer Mulvaney
