Re: Butternut survey at 5546 Albion Rd., Greely

Hi Maxime,

The Butternut survey you requested at 5546 Albion Rd., Greely was completed on February 15, 2024.

The survey included the property owned by MacEwen Petroleum Inc. plus the 25m buffer to the west and north (see attached map). Alternate-leaved dogwood (*Cornus alternifolia*) was identified in the west buffer and is a very good indicator of a suitable Butternut site, so Butternut may have been on this site historically. The north buffer is not suitable for Butternut because it is very wet as evidenced by a substantial population of *Alder sp.*

The Ministry of Environment, Conservation & Parks (MECP) does not need to be informed of this Butternut survey because **no Butternut were found** and this email should satisfy the BHA requirement from the City of Ottawa for MacEwen Petroleum Inc.

Best regards,
