EXECUTIVE SUMMARY

Assessment

Paterson Group (Paterson) was retained by Harbour Environmental Group Ltd. to conduct a Phase I – Environmental Site Assessment (Phase I-ESA) for part of the property addressed 1850 Bantree Street in the City of Ottawa (Phase I Property). The purpose of this Phase I-ESA has been to research the past and current use of the Phase I Property, as well as the neighbouring properties within a 250 m radius (Phase I Study Area), to identify any Potentially Contaminating Activities (PCAs) that would result in Areas of Potential Environmental Concern (APECs) on the Phase I Property.

According to the historical research, the Phase I Property has never been formally developed and has been used as a construction storage yard since circa 1970. One historical 113L diesel fuel spill, a former snow deposit area and former railway lines were identified on the Phase I Property. The northeastern portion of the Phase I Property had been occupied by a sedimentation pond that was used to collect wet soil from hydro vac trucks. These historical on-site activities/incidents are considered to represent PCAs that result in APECs on the Phase I Property.

The properties within the Phase I Study Area have been used for commercial and industrial purposes since circa 1975. Historical records identified the presence of several off-site PCAs located within the Phase I Study Area. A former private fuel outlet and underground storage tank (UST) on the adjacent property to the east (1890 Bantree Street) is considered to represent a PCA that results in an APEC on the Phase I Property. Otherwise, historical off-site PCAs identified are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientations relative to the subject land.

The Phase I Property forms part of a larger parcel of land owned by Laurent Leblanc Construction Ltd. The adjacent parcel to the north continues to be operated as a contractor's yard, with some associated storage of construction equipment and aggregate material, as well as a scale house on the western and northern portions of the Phase I Property. The southeastern portion of the property is occupied by a liquid soil treatment facility, under construction and not currently in operation.

Fill material of unknown quality was identified on the Phase I Property following the completion of a geotechnical assessment on the Phase I Property.

The presence of the fill material of unknown quality is considered to represent a PCA that results in an APEC on the Phase I Property.

The neighboring properties are currently used for commercial and industrial purposes. Two automotive service garages were identified on the adjacent properties to the east and southeast, at 2570 and 2596 (also listed as 2584) Edinburgh Place. The automotive service garages are considered to represent PCAs that result in APECs on the Phase I Property. Several off-site PCAs were identified within the Phase I Study Area however, based on their separation distances and/or cross gradient orientation with respect to the Phase I Property, they are not considered to result in APECs on the Phase I Property.

Based on the findings of this assessment, it is our opinion that **a Phase II – Environmental Site Assessment is required for the Phase I Property.**

1.0 INTRODUCTION

At the request of Harbour Environmental Group Ltd., Paterson Group (Paterson) conducted a Phase I – Environmental Site Assessment (Phase I-ESA) for part of the property addressed 1850 Bantree Street, in the City of Ottawa, Ontario, (Phase I Property). The purpose of this Phase I-ESA has been to research the past and current use of the Phase I Property, as well as the neighbouring properties within a 250 m radius (Phase I Study Area), to identify any Potentially Contaminating Activities (PCAs) that would result in Areas of Potential Environmental Concern (APECs) on the Phase I Property.

Paterson was engaged to conduct this Phase I ESA by Mr. Sean Yaehne of Harbour Environmental Group Ltd., who can be reached via his office phone number (403)-888-8321.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all of our findings and results of the environmental conditions of the Phase I Property at the time this report was issued.

This Phase I-ESA report has been prepared under the supervision of a Qualified Person, in general accordance with Ontario Regulation (O. Reg.) 153/04, as amended under the Environmental Protection Act, and CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies upon information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

2.0 PHASE I PROPERTY INFORMATION

Address:	1850 Bantree Street, Ottawa, Ontario.
Legal Description:	Part of Lot 26, Concession 3, Township of Gloucester
Location:	The Phase I Property is located on the south side of Bantree Street, approximately 100 m west of Edinburgh Place, in the City of Ottawa, Ontario. Refer to Figure 1 – Key Plan, appended to this report. For the purposes of this report, Bantree Street is considered to run in an east-west direction.
Latitude and Longitude:	45 ° 24' 15.153" N, 75 ° 36' 55.044" W

Site Description:

Configuration:	Irregular
Site Area:	2.12 ha
Zoning:	IH – Heavy Industrial Zone.
Current Use:	The larger parcel of land of which the Phase I Property comprises a part of, is operated as a construction yard by Laurent Leblanc Ltd. with a trailer and scale house located on the northern portion of the Phase I Property. The southern portion of the Phase I Property is occupied by a liquid soil treatment facility that is not currently in use, while the remainder of the subject land is used for storage of construction equipment and aggregate materials.
Services:	The Phase I Property is provided with municipal water and sewer services. A commercial well is present on the Phase I Property; the well is used in conjunction with on-site operations and is not used for potable purposes. The portable offices to be used in conjunction with the liquid soil treatment facility will be serviced by a portable septic system.

3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I-ESA is described as follows:

- ❑ Determine the historical activities occurring on the Phase I Property and in the Phase I Study Area by conducting a review of readily available records, reports, photographs, plans, mapping information, databases, and regulatory agencies;
- ❑ Investigate the existing conditions present on the Phase I Property and in the Phase I Study Area by conducting site reconnaissance;
- ❑ Conduct interviews with persons knowledgeable of current and historic operations on the Phase I Property and, if warranted, the neighbouring properties;
- ❑ Present the results of our findings in a comprehensive report in general accordance with the requirements O. Reg. 153/04, as amended under the Environmental Protection Act, and in compliance with the requirements of CSA Z768-01 (reaffirmed 2022);
- ❑ Provide a preliminary environmental site evaluation based on our findings;
- ❑ Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

4.0 RECORDS REVIEW

4.1 General

Phase I Study Area Determination

A radius of approximately 250 m was deemed appropriate for defining the study area for this assignment, herein referred to as the Phase I Study Area. Properties located outside of the Phase I Study Area are not considered to have had the potential to impact the Phase I Property based on their separation distances.

First Developed Use Determination

Based on a review of available historical information, the Phase I Property has never been formally developed. Based on interviews conducted at the time of the site visit, the Phase I Property has been used as a construction storage yard since circa 1970.

City of Ottawa Street Directories

City directories for the Phase I Property and Phase I Study Area were reviewed in ten-year intervals from 1956 to 2000.

The Phase I Property was not listed in the city directories reviewed.

The neighbouring properties within the Phase I Study Area were first listed circa 1960 and consisted primarily of commercial activities.

Based on the city directory review, one off-site potentially contaminating activity (PCA) was identified within the Phase I Study Area: an automotive service garage was listed at 2020 Bantree Street, situated approximately 170m north of the Phase I Property, from 1980 to 1995. Based on the separation distance and down-gradient orientation with respect to the Phase I Property, the automotive service garage is not considered to represent an area of potential environmental concern (APEC) on the Phase I Property.

Fire Insurance Plans (FIPs)

FIPs are unavailable for the Phase I Property and Phase I Study Area.

Chain of Title

Based on the available historical information in combination with the conducted interviews, it was determined that a chain of title would not be required as part of this assessment.

Survey Plan

Paterson reviewed a survey plan completed by J.D. Barnes Ltd. in August of 2023 as part of this assessment. The survey plan shows the Phase I Property and associated features in their current state.

4.2 Environmental Source Information

National Pollutant Release Inventory

A search of the National Pollutant Release Inventory (NPRI) database was conducted as part of this assessment. This federally managed database provides various reports and tracking information relating to the release of solid, liquid, or gaseous pollutants from industrial facilities into the natural environment.

A search of the NPRI database did not identify any pollutant release records listed for the Phase I Property.

The property addressed 2105 Bantree Street (approximately 240m NE) was listed as releasing carbon monoxide, sulphur dioxide, volatile organic compounds, particulate matter, and carbon dioxide.

The pollutant releases were associated with the historical use of the property that was previously occupied by Greyhound Canada Transportation Corp. Based on the separation distance and cross-gradient location with respect to the Phase I Property, the identified NPRI site is considered to represent a PCA that does not result in an APEC on the Phase I Property.

Ontario PCB Waste Storage Site Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, *"Ontario Inventory of PCB Storage Sites, April 1995"* was reviewed as part of this assessment. This document identifies all recorded active and closed PCB waste storage sites situated in the Province of Ontario.

No PCB waste storage sites were identified on the Phase I Property.

One PCB waste storage site was identified on the property addressed 1790 Bantree Street (approximately 130m NW). The PCB waste storage site was documented in 2005 under Hydro Ottawa Ltd. Based on the separation distance and down gradient orientation with respect to the Phase I Property, the identified PCB waste storage site is not considered to represent an APEC on the Phase I Property.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Waste Disposal Site Inventory in Ontario, 1991*" was reviewed as part of this assessment.

This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario.

A review of this document did not identify any former waste disposal sites situated on the Phase I Property or within the Phase I Study Area.

MECP Waste Management Records

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to waste management records for the Phase I Property. No records were documented for the Phase I Property in the response received by the MECP, dated September 13, 2023. A copy of the FOI response is provided in Appendix 2.

MECP Coal Gasification Plant Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Municipal Coal Gasification Plant Site Inventory, 1991*" was reviewed as part of this assessment. This document provides a reference to the locations of former plants with respect to the Phase I Property.

A review of this document did not identify any former coal gasification plants located on the Phase I Property or within the Phase I Study Area.

MECP Incident Reports

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, or inspections maintained by the MECP for the Phase I Property or any of the neighbouring properties.

According to the FOI response, one record pertaining to a 113L diesel spill was documented for the Phase I Property. The spill was reported to have resulted from a crushed fuel tank on a crusher located on the property. Drain-All Limited was contacted to clean up the soil in the vicinity of the spill and bring the suspected impacted material to an authorized landfill site for disposal. The record indicates that 3 triaxle loads of the impacted material was removed from the site and no further work was deemed necessary. Paterson was informed by the current property owner that the spill occurred on the northern portion of the Phase I Property, immediately adjacent to the scale house. Based on there having been no confirmation sampling completed following the removal of the impacted material, the historical diesel spill is considered to represent a PCA that results in an APEC on the Phase I Property.

A copy of the FOI response is provided in Appendix 2.

MECP Submissions

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the Phase I Property. No records were documented for the Phase I Property in the response received by the MECP, dated September 13, 2023. A copy of the FOI response is provided in Appendix 2.

MECP Instruments

A request was submitted to the MECP Freedom of Information office for information with respect to certificates of approval, permits to take water, certificates of property use, or any other similar MECP issued instruments for the Phase I Property. No records were documented for the Phase I Property in the response received by the MECP, dated September 13, 2023. A copy of the FOI response is provided in Appendix 2.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment. No RSCs were filed for the Phase I Property or for other properties within the Phase I Study Area. .

Technical Standards and Safety Authority (TSSA)

The TSSA Fuels Safety Branch in Toronto was contacted electronically on August 9, 2023, as part of this assessment, to inquire about current and former fuel storage tanks, spills, and historical incidents for the Phase I Property as neighbouring and/or adjacent properties within the Phase I Study Area. The response from the TSSA indicated that several records were associated with the properties addressed 1815 Bantree Street, 1890 Bantree Street and 2600 Edinburgh Place:

- ❑ 1815 Bantree Street – Four records were identified for this property, situated approximately 140m west of the Phase I Property. All records pertain to the expiration of two private fuel outlets.

These records represent a PCA within the Phase I Study Area. Based on the separation distance from the Phase I Property, this PCA is not considered to represent an APEC on the Phase I Property.

- ❑ 1890 Bantree Street - Four records were identified for the property adjacent to the east of the Phase I Property. Two of the records pertain to an active private fuel outlet on the property and the corresponding underground storage tank (UST). The other two records pertain to an expired private fuel outlet and UST.

These records are indicative of off-site PCAs. Based on the proximity of the former pump island and UST, which can be seen in a 2005 aerial photograph, approximately 10m from the Phase I Property, this PCA is considered to result in an APEC on the Phase I Property.

- ❑ 2600 Edinburgh Place - Two records pertaining to an expired propane refill facility and corresponding propane tank were documented for this property, situated approximately 85m SE of the Phase I Property. Based on the nature of this activity, it is not considered to be a PCA.

A copy of the correspondence with the TSSA is included in Appendix 2.

OMNRF Areas of Natural and Scientific Interest (ANSI)

A search for ANSI sites situated within the Phase I Study Area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website as part of this assessment.

A review of the available mapping information did not identify any ANSI sites situated on the Phase I Property or within the Phase I Study Area.

City of Ottawa Old Landfill Sites

The document prepared by Golder Associates entitled, “*Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa*”, was reviewed as part of this assessment. This document identifies the details and locations of all recorded active and closed landfill sites situated in the City of Ottawa.

A review of this document did not identify any active or closed landfill sites situated on the Phase I Property or within the Phase I Study Area.

City of Ottawa Historical Land Use Inventory (HLUI) Database

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City’s Historical Land Use Inventory (HLUI) database for any environmental records pertaining to the Phase I Property as well as any properties situated within the Phase I Study Area.

The Phase I Property is listed as an aggregate supplier in the response provided by the City of Ottawa. The current use of the Phase I Property as a construction yard and aggregate supplied is considered to represent a PCA that results in an APEC.

Three off-site PCAs were identified on properties located within the Phase I Study Area:

- an automotive service garage located at 2591 Edinburgh Place, approximately 120 m SE of the Phase I Property
- a former automotive service garage on the property addressed 2627 Edinburgh Place, approximately 170m SE of the Phase I Property
- a former machine shop on the property addressed 2616 Edinburgh Place, approximately 140m SE were identified within the Phase I Study Area.

Based on their separation distances and/or their cross- or down-gradient orientations with respect to the Phase I Property, these PCAs are not considered to represent APECs on the Phase I Property.

A copy of the HLUI response has been included in Appendix 2.

Previous Engineering Reports

Paterson has reviewed and/or completed environmental assessments in the vicinity of the Phase I Property. Impacted groundwater was identified on the adjacent property to the south in one of the environmental reports reviewed as part of this assessment. The impacted groundwater was considered to be limited in extent and based on the previously completed environmental assessments by Paterson in the vicinity, the identified groundwater impact is not considered to have had the potential to impact the Phase I Property.

ERIS Database Report

A database report, prepared by ERIS (Environmental Risk Information Services Ltd.), dated August 9, 2023, was acquired, and reviewed as part of this assessment. This report provides a compilation of various provincial and federal environmental related records pertaining to properties situated within the Phase I Study Area.

On-Site Records:

The ERIS report identified four records pertaining to the Phase I Property: a spill record, a record of an ERIS search and two monitoring well records.

The spill record was documented as a result of a 130L diesel fuel spill that occurred in 2017. Please refer to section 4.2 for further information regarding the former diesel spill.

The diesel spill is considered to represent a PCA that results in an APEC on the Phase I Property.

Off-Site Records:

The ERIS report identified 414 off-site records pertaining to various fuel storage tanks, spills, industrial activities, and waste generator records associated with multiple properties situated within the Phase I Study Area.

- The property addressed 2570 Edinburgh Place (approximately 50m east of the Phase I Property) is reported to have been previously occupied by a mill that generated several waste classes including petroleum distillates and oil skimmings and sludges. The ERIS records are indicative of potentially contaminating activities associated with 2570 Edinburgh Place.
- Based on separation distance and upgradient location with respect to the Phase I Property, these off-site PCAs are considered to result in an APEC on the Phase I Property.
- Two spill records and several waste generator records were documented for the property addressed 2600 Edinburgh Place (approximately 90 m E). The spill records pertain to a large, unknown quantity of oil being spilled to a ditch on the property and a 300 L gasoline spill from an above ground storage tank (AST). Furthermore, an ECA was documented in support of the property operating as a septage waste management facility. Based on the separation distance with respect to the Phase I Property and operations associated with the wastewater disposal facility, the aforementioned activities/records are considered to represent a PCAs that do not result in an APEC on the Phase I Property.
- Several waste generator records were associated with a construction yard addressed 2525 Lancaster Road (110m S). The generated waste classes included halogenated pesticides, heavy fuels and waste oils and lubricants., The generated wastes are not considered to represent a PCA; this PCA is not considered to represent an APEC on the Phase I Property based on the separation distance with respect to the Phase I Property.
- A waste collection site, automotive service garage and retail fuel outlet were documented for the property addressed 1815 Bantree Street (140m NW).

Based on the separation distance and down gradient location with respect to the Phase I Property, while the identified waste collection facility, automotive service garage and retail fuel outlet are considered to the PCAs, they are not considered to represent an APEC on the Phase I Property.

- Scott's manufacturing and waste generator records were associated with the property addressed 2485 Lancaster Road (170m W). The records pertained to historical manufacturing (textile, heating equipment, switchgear, switchboard, and lighting) and printing activities.

Furthermore, the property is now occupied by an optical solutions manufacturer that generates halogenated solvent wastes. Based on the separation distance and cross-gradient location with respect to the Phase I Property, these PCAs are not considered to represent an APEC on the Phase I Property.

- Scott's manufacturing records were identified for the properties addressed 2020 Bantree Street (170m N) and 1820 Bantree Street (180m W). The records pertained to historical truck trailer and automobile manufacturing and plate work and fabricated structural products manufacturing, respectively. Records associated with highway gasoline and diesel tanks were also documented for 2020 Bantree Street.

Based on the separation distances and cross/down gradient locations with respect to the Phase I Property, these PCAs are not considered to represent an APEC on the Phase I Property.

- Multiple waste generator records were documented for the property addressed 2627 Edinburgh Place (220m E) and were the result of a historical printer on the property. Based on the separation distance and cross gradient location with respect to the Phase I Property, the identified historical printer is not considered to represent an APEC on the Phase I Property.
- Two spill records were documented for the properties addressed 1800 (240m NW) and 1810 Bantree Street (220m NW). The first record pertained to a 114L diesel spill from a retail fuel storage tank. The second record was associated with a 300L diesel spill also associated with equipment failure. Based on the separation distance and cross gradient location with respect to the Phase I Property, these PCAs are not considered to represent an APEC on the Phase I Property.
- Several waste generator records were documented for the properties addressed 2421 Lancaster Road (230 m W) and 1867 Saint Laurent Boulevard (240m W). The documented waste classes included halogenated solvents.

Based on the separation distance and cross gradient location with respect to the Phase I Property, the identified generated wastes are not considered to represent an APEC on the Phase I Property.

- An NPRI, private fuel outlet and spill record were documented for the property addressed 2105 Bantree Street (250m NE). Based on the separation distance and cross-gradient location with respect to the Phase I Property, PCAs at this location are not considered to represent an APEC on the Phase I Property.

The complete ERIS report has been included in Appendix 2.

4.3 Physical Setting Sources

Historical aerial photographs of the Phase I Study Area were obtained from the National Air Photo Library and reviewed in approximate ten-year intervals, beginning with the earliest available photograph. Based on a review of these photographs, the following observations have been made:

- | | |
|------|--|
| 1965 | The Phase I Property appears to be vacant agricultural land. Two railway lines transect the western portion of the property in an approximate north-south direction. The neighbouring properties consist primarily of agricultural fields and vacant land. |
| 1976 | The soil on the central and eastern portions of the Phase I Property has been disturbed with some apparent stockpiles near the southern end of the property. The apparently soil works may have been carried out in conjunction with the apparent light industrial/commercial development underway immediately to the north. Bantree Street also appears to be in the initial stages of construction. The adjacent property to the west has now been developed with what appears to be a light industrial and/or commercial building. The adjacent lands to the east remain as vacant, undeveloped land. |
| 1991 | The southern portion of the Phase I Property is now occupied by a large stockpile of soil and a small structure appears to be present on the northeast portion of the site. Otherwise, no significant changes appear to have been made to the Phase I Property since the previous photograph. Increased commercial and light industrial development has occurred on the lands adjacent to the Phase I Property. |
| 1999 | No significant changes appear to have been made to the Phase I Property or neighbouring properties since the previous photograph. |

2008 The northern portion of the Phase I Property is now occupied by what appears to be the existing scale house, and apparent stockpiles of granular material over the remainder of the property. The railway line that had previously transected the southern portion of the Phase I Property has been decommissioned and removed from the Phase I Property and adjacent lands.

This portion of the Phase I Property has been graded similarly to the remainder of the site. The adjacent property to the northwest (which also forms part of 1850 Bantree Street) is now occupied by an apparent construction yard.

2017 No significant changes are apparent with respect to the Phase I Property or neighbouring properties since the time of the previous photograph.

2021 No significant changes are apparent with respect to the Phase I Property or neighbouring properties since the time of the previous photograph.

The historical railway lines are considered to represent on-site PCAs that result in APECs on the Phase I ESA Property.

Copies of the aerial photographs selected for review are included in Appendix 1.

Geological Maps

Geological mapping information for the Phase I Property was obtained from The Geological Survey of Canada – Urban Geology of the National Capital Area and reviewed as part of this assessment. Based on the available mapping information, the bedrock beneath the Phase I Property is reported to consist of limestone of the Carlsbad Formation, while the surficial geology reportedly consists of till overburden ranging in thickness from approximately 5 to 25 m.

Based on the previously completed subsurface investigation by Paterson in May of 2023, the soil profile at the Phase I Property generally consisted of silty sand and gravel fill material overlying glacial till (silty clay soil matrix with gravel), followed by shale bedrock. Shale bedrock was encountered in all boreholes at depths ranging from approximately 1.40 to 1.80 meters below existing grade.

Water Bodies

No water bodies are present on the Phase I Property. The nearest water body with respect to the Phase I Property is Green's Creek located approximately 1 km to the northeast.

Topographic Maps

A topographic map of the Phase I Property was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as part of this assessment.

The topographic map indicates that the general elevation of the Phase I Property is approximately 72 m above sea level, while the regional topography within the greater area is depicted as sloping downwards to the north/northeast, in the general direction of Green's Creek.

An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Physiographic Maps

A physiographic map was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as a part of this assessment.

According to the publication and available mapping information, the Phase I Property is situated within the St. Lawrence Lowlands. According to the description provided: *"...the lowlands are plain-like areas that were affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets."*

MECP Water Well Records

A search of the MECPs website for all drilled well records on properties within a 250 m radius of the Phase I Property was conducted as part of this assessment. The search identified monitoring well records on the Phase I Property and within the Phase I Study Area.

One commercial well record was documented for the Phase I Property. The commercial well was installed in October of 2020 on the northern portion of the Phase I Property.

Based on the documented well record, the stratigraphy in the area of the Phase I Property consists of brown sand overlaying grey limestone bedrock encountered at 0.90m. The water table was intersected at a depth of 6.9m within the bedrock.

One well record pertaining to a monitoring well installed on the Phase I Property was identified. The well was installed on the property in 2009 and is located on the northern portion of the property.

Paterson also installed four monitoring wells on the Phase I Property as part of a recently completed subsurface investigation. The wells were terminated in the shale bedrock.

Three monitoring wells were also documented for the property addressed 2020 Bantree Street in 2010. As previously discussed, PCAs associated with 2020 Bantree Street are not considered to result in an APEC on the Phase I Property.

The well records are provided in Appendix 2.

5.0 INTERVIEWS

Mr. Laurent Leblanc with Laurent Leblanc Ltd., the current property owner, and Mr. Joseph Sullivan with Harbour Environmental Ltd. (currently leasing the Phase I Property) were interviewed in person during the site visit.

Property Owner Representative

Mr. Leblanc informed Paterson that the property has solely been operated as a construction yard used to store/crush granular material. Paterson was also informed that a liquid soil treatment system consisting of a sediment pond and area was constructed on the eastern portion of the site in 2021 but is no longer in use.

Paterson was informed that no fuel or oil has ever been stored on the property and that the property has never been formally developed. Otherwise, Mr. Leblanc was unaware of any environmental concerns on the Phase I Property or in the immediate vicinity. As previously discussed, the historical diesel spill is considered to represent a PCA that results in an APEC on the Phase I Property.

Leasee Representative

Mr. Sullivan was also interviewed at the time of the site visit. Paterson was shown the location of the new liquid soil treatment facility. Mr. Sullivan informed Paterson that no chemicals/fuel are being stored on the Phase I Property and that the facility is not currently operational. Mr. Sullivan was unaware of any environmental concerns on the Phase I Property or within the immediate vicinity.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

A site inspection was conducted for the Phase I Property on August 9, 2023. The site visit was conducted by Mr. Samuel Berube from the Environmental Department of Paterson Group. Weather conditions were sunny, with a temperature of approximately 17°C.

In addition to the Phase I Property, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site inspection.

6.2 Specific Observations at the Phase I Property

Site Description

The Phase I Property is currently occupied by a multi-phase liquid soil treatment facility. The facility was recently constructed and consists of a steel frame however, it is not yet operational and is not receiving/treating any waste.

The control/pump room for the treatment facility is located on the east side of the structure and was not accessible during the site visit. Two portable site trailers were also observed immediately to the west of the treatment facility. These trailers are to be serviced via a portable septic system once the facility is up and running.

The site topography is relatively flat, while the regional topography appears to slope down towards the north/northeast, in the general direction of Green's Creek. The Phase I Property is relatively at grade with Bantree Street.

Water drainage on the Phase I Property occurs primarily via runoff to a drainage pipe system located along the eastern edge of the property.

The drainage system consists of a 200 mm weeping pipe with sock which is overlain with clear stone followed by filter fabric and drainage sand.

No ponded water, stressed vegetation, surficial staining, or any other indications of potential sub-surface contamination were observed on the Phase I Property at the time of the site inspection.

A depiction of the Phase I Property is illustrated on Drawing PE6234-1 – Site Plan, in the Figures section of this report.

Buildings and Structures

No permanent structures currently exist on the Phase I Property.

The Phase I Property is currently occupied by a multi-phase liquid soil treatment facility. The facility was recently constructed and consists of a steel frame however, it is not yet operational and is not receiving/treating any waste. The northern portion of the Phase I Property is occupied by a scale and scale house.

The control/pump room for the treatment facility is located on the east side of the structure and was not accessible during the site visit. Two portable site trailers were also observed immediately to the west of the treatment facility. These trailers are to be serviced via a portable septic system once the facility is up and running.

Potential Environmental Concerns

☐ Fuels and Chemical Storage

At the time of the site inspection, no chemical storage areas, above ground fuel storage tanks (ASTs), or evidence indicating the presence of any underground fuel storage tanks (USTs) were observed on the Phase I Property.

☐ Fill Material

No fill piles were identified on the Phase I Property at the time of the site inspection. However, Paterson identified fill material of unknown quality across the Phase I Property during a recently completed subsurface investigation.

The identified fill material is considered to represent a PCA that results in an APEC on the Phase I Property.

Groundwater Monitoring Wells

At the time of the site inspection, four groundwater monitoring wells were observed on the Phase I Property. The monitoring wells were installed on the Phase I Property during a previously completed subsurface investigation. A commercial well located in the northern portion of the property was also observed at the time of the assessment.

Hazardous Materials and Unidentified Substances

At the time of the site inspection, no hazardous materials, unidentified substances, spills, surficial staining, abnormal odours, stressed vegetation, or any other indications of potential sub-surface contamination were observed on the exterior of the Phase I Property.

Polychlorinated Biphenyls (PCBs) and Transformer Oil

At the time of the site inspection, no electrical transformers or any other potential sources of PCBs or transformer oil were identified on the exterior of the Phase I Property.

Waste Management

At the time of the site inspection, no waste products were observed as being generated on the Phase I Property.

6.3 Interior Assessment

It should be noted that the Phase I Property has never been formally developed and no permanent structures currently exist on the property.

The on-site structures are limited to a liquid soil treatment facility (with pump and control room) and portable site offices. The facility and site offices are not currently in use and are not considered to be permanent structures.

Potentially Hazardous Building Products

Asbestos-Containing Materials (ACMs)

Based on the on-site structures consisting of portable site offices and a recently constructed liquid soil treatment facility, no concerns with respect to ACMs were identified on the Phase I Property.

Lead Based Paints

Based on the on-site structures consisting of portable site offices and a recently constructed liquid soil treatment facility, no concerns with respect to lead based paints were identified on the Phase I Property.

Polychlorinated Biphenyls (PCBs) and Transformer Oil

Based on the on-site structures consisting of portable site offices and a recently constructed liquid soil treatment facility, no concerns with respect to PCBs were identified on the Phase I Property.

Urea Formaldehyde Foam Insulation (UFFI)

Based on the on-site structures consisting of portable site offices and a recently constructed liquid soil treatment facility, no concerns with respect to UFFI were identified on the Phase I Property.

Other Potential Environmental Concerns

Interior Fuel and Chemical Storage

At the time of the site inspection, no aboveground fuel storage tanks or signs of underground fuel storage tanks were observed within the structures.

No chemical products were observed to be stored in the on-site structures at the time of the site visit.

Ozone Depleting Substances (ODSs)

Potential sources of ODSs observed on-site include fire extinguishers. The fire extinguishers appeared to be in good condition at the time of the site inspection and should be regularly serviced by a licensed contractor.

❑ **Wastewater Discharges**

The Phase I Property is not currently generating any wastewater. Future wastewater generated from the subject building (wash water and sewage) is to be discharged into a portable septic system located between the portable site offices. The roof drainage is discharged via surface run-off towards a drainage system located along the eastern property line, which drain into the City of Ottawa storm water sewer system.

6.4 Enhanced Investigation Property

Operations, Including Processing or Manufacturing On-site

Based on the available information and/or records, there are no known processes, manufacturing or other operations that occurred on-site.

Hazardous and Raw Materials Used, Handling and Storage Locations

No concerns with respect to hazardous and raw materials were identified on the Phase I Property at the time of the site visit.

Products Manufactured On-site

Based on the available information and/or records, there were no known products manufactured at the Phase I Property.

By-products and Wastes Produced On-site

Based on the available information and/or records, no by-products and/or wastes are currently being produced on the Phase I Property.

Locations and Contents of Drums, Totes, Bins and Tank On-site

No drums, totes, bins and/or tanks are currently present on the Phase I Property.

Vehicle Maintenance Area (Hydraulic Lift Equipment)

Vehicles are not maintained on the Phase I Property and as such, no maintenance areas with hydraulic equipment are present on the property.

Historical Spills and Leaks

Based on the review of the ERIS report and information obtained from the current property owner, there was one known 130L diesel spill that occurred in the northern portion of the property. The spill resulted from a pinched fuel tank on a crusher and according to the property owner and MECP Incident report, several truck loads of impacted material were removed from the property.

Based on there having been no confirmatory soil testing completed following the removal of the impacted material, the former spill is considered to represent a PCA that results in an APEC on the Phase I Property.

Other On-site Operations and Concerns

No other potential environmental concerns (i.e., sources of incoming and outgoing effluent discharges, waste management handling, and vehicle equipment storage areas, etc.) were identified on the Phase I Property.

All reasonable inquiries were made to carried out this enhanced investigation property as specified in clause 32(1)(b) of the O.Reg 153/04. Details pertaining to the enhanced investigation property are shown on Drawing PE6234-1 – Site Plan, in the Figures section of this report.

6.5 Neighbouring Properties

At the time of the site inspection, a survey of the neighbouring properties was conducted from publicly accessible roadways.

Land use adjacent to the Phase I Property was observed as follows:

North: Bantree Street followed by Commercial/Light Industrial properties.

South: Commercial office space and private garage.

East: Commercial/Light Industrial (transportation company/truck yard) followed by Edinburgh Place.

West: Commercial/Light Industrial (Laurent Leblanc Construction yard followed by a multi-tenant commercial/light industrial building).

The adjacent properties to the east/southeast addressed 2570 and 2596 (also listed as 2584) Edinburgh Place are currently occupied by automotive service garages. Based on their close proximity and cross gradient orientations with respect to the Phase I Property, the automotive service garages are considered to represent PCAs that result in APECs on the Phase I Property

The neighbouring land use within the Phase I Study Area is depicted on Drawing PE6234-2 – Surrounding Land Use Plan, in the Figures section of this report.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Land Use History

Based on a review of available historical information, the Phase I Property has never been formally developed. Based on interviews conducted at the time of the site visit, the Phase I Property has been used as a construction storage yard since circa 1970. As previously discussed, the current and historical use of the Phase I Property as a construction storage yard is considered to represent a PCA that results in an APEC on the Phase I Property.

Potentially Contaminating Activities (PCAs)

Based on the findings of the Phase I ESA, six on-site PCAs are considered to result in APECs on the Phase I Property:

- Liquid Soil Treatment System
- Fill Material of Unknown Quality
- Former Snow Deposit
- Former Railway Lines
- Former 130L Diesel Spill
- Current and Historical Use of the Phase I Property as a Construction Storage Yard

Three off-site PCAs that results in APECs on the Phase I Property were identified within the Phase I Study Area:

- Former Private Fuel Outlet and UST
- Existing Automotive Service Garage
- Existing Automotive Service Garage

Areas of Potential Environmental Concern (APECs)

Based on the findings of the Phase I ESA, nine APECs were identified on the Phase I Property. The identified APECs are listed in Table 1.

Table 1 - Areas of Potential Environmental Concern					
Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern with respect to Phase I Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
APEC 1 Liquid Soil Treatment System	Eastern portion of the Phase I Property	N/A	On-site	BTEX PHCs (F ₁ -F ₄) VOCs	Soil Groundwater
APEC 2 Fill Material of Unknown Quality	Entire Phase I Property	"Item 30 – Importation of Fill Material of Unknown Quality"	On-site	Metals CrVI, Hg BTEX PHCs (F ₁ -F ₄) EC/SAR	Soil
APEC 3 Former Snow Deposit	Southern portion of the Phase I Property	N/A	On-site	EC/SAR	Soil
APEC 4 Former Railway Lines	Central and western portion of the Phase I Property	"Item 46 – Rail Yards, Tracks and Spurs"	On-site	PAHs Metals Hg, CrVI	Soil
APEC 5 Former Private Fuel Outlet and UST	Northeastern portion of the Phase I Property	"Item 28 – Gasoline and Associated Products Storage in Tanks"	Off-site	BTEX PHCs (F ₁ -F ₄)	Groundwater
APEC 6 Existing Automotive Service Garage	Eastern/southeastern portion of the Phase I Property	"Item 10 – Commercial Autobody Shops"	Off-site	BTEX PHCs (F ₁ -F ₄) VOCs	Groundwater
APEC 7 Existing Automotive Service Garage	Eastern portion of the Phase I Property	"Item 10 – Commercial Autobody Shops"	Off-site	BTEX PHCs (F ₁ -F ₄) VOCs	Groundwater
APEC 8 Former Diesel Spill	Northern portion of the Phase I Property	N/A	On-site	BTEX PHCs (F ₁ -F ₄)	Soil
APEC 9 Former and Current Use of Phase I Property as a Construction Yard	Entire Phase I Property	N/A	On-site	BTEX PHCs (F ₁ -F ₄)	Soil Groundwater

Contaminants of Potential Concern (CPCs)

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- Metals (including arsenic, selenium and antimony), mercury (Hg) and chromium (VI)
- Benzene, Toluene, Ethylbenzene, Xylenes (BTEX);
- Petroleum Hydrocarbons (PHCs F1-F4);
- Volatile Organic Compounds (VOCs)
- Polycyclic Aromatic Hydrocarbons (PAHs);
- Electrical Conductivity (EC) and Sodium Adsorption Ratio (SAR)

7.2 Conceptual Site Model

Geological Maps

Geological mapping information for the Phase I Property was obtained from The Geological Survey of Canada – Urban Geology of the National Capital Area and reviewed as part of this assessment. Based on the available mapping information, the bedrock beneath the Phase I Property is reported to consist of limestone of the Carlsbad Formation, while the surficial geology reportedly consists of till overburden ranging in thickness from approximately 5 to 25 m.

Based on the previously completed subsurface investigation by Paterson, the soil profile at the Phase I Property generally consisted of silty sand and gravel fill material overlying glacial till (silty clay soil matrix with gravel), followed by shale bedrock. Shale bedrock was encountered in all boreholes at depths ranging from approximately 1.40 to 1.80 meters below existing grade.

Water Bodies

No water bodies are present on the Phase I Property. The nearest water body with respect to the Phase I Property is Green's Creek located approximately 1 km to the east.

Drinking Water Wells

No drinking water wells are located on the Phase I Property.

Existing Buildings and Structures

No permanent structures currently exist on the Phase I Property.

The Phase I Property is currently occupied by a multi-phase liquid soil treatment facility. The facility was recently constructed and consists of a steel frame however, it is not yet operational and is not receiving/treating any waste. The northern portion of the Phase I Property is occupied by a scale and scale house.

The control/pump room for the treatment facility is located on the east side of the structure and was not accessible during the site visit. Two portable site trailers were also observed immediately to the west of the treatment facility. These trailers are to be serviced via a portable septic system once the facility is up and running.

Current and Future Property Use

The Phase I Property is currently used for commercial/light industrial land use. It is our understanding that the recently constructed facility will be used to treat liquid soil.

Neighbouring Land Use

The surrounding lands within the Phase I Study Area consist primarily of commercial and industrial properties.

Current land use is depicted on Drawing PE6234-2 – Surrounding Land Use Plan, in the Figures section of this report.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of the Phase I ESA report, six on-site and three off-site potentially contaminating activities (PCA) are considered to result in areas of potential environmental concern (APEC) on the Phase I Property. Additional off-site PCAs were identified within the Study Area, based on their separation distances and/or cross gradient orientation with respect to the Phase I Property, these PCAs are not considered to result in APECs on the Phase I Property.

Contaminants of Potential Concern (CPCs)

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- Metals (including arsenic, selenium and antimony), mercury (Hg) and chromium (VI)
- Benzene, Toluene, Ethylbenzene, Xylenes (BTEX);
- Petroleum Hydrocarbons (PHCs F1-F4);
- Volatile Organic Compounds (VOCs)
- Polycyclic Aromatic Hydrocarbons (PAHs);
- Electrical Conductivity (EC) and Sodium Adsorption Ratio (SAR)

Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I-ESA is considered to be sufficient to conclude that there are APECs associated with the Phase I Property.

The identified APECs were confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

8.0 CONCLUSIONS

Paterson Group (Paterson) was retained by Harbour Environmental Group Ltd. to conduct a Phase I – Environmental Site Assessment (Phase I-ESA) for part of the property addressed 1850 Bantree Street in the City of Ottawa (Phase I Property). The purpose of this Phase I-ESA has been to research the past and current use of the Phase I Property, as well as the neighbouring properties within a 250 m radius (Phase I Study Area), to identify any Potentially Contaminating Activities (PCAs) that would result in Areas of Potential Environmental Concern (APECs) on the Phase I Property.

According to the historical research, the Phase I Property has never been formally developed and has been used as a construction storage yard since circa 1970. One historical 113L diesel fuel spill, a former snow deposit area and former railway lines were identified on the Phase I Property. The northeastern portion of the Phase I Property had been occupied by a sedimentation pond that was used to collect wet soil from hydro vac trucks. These historical on-site activities/incidents are considered to represent PCAs that result in APECs on the Phase I Property.

The properties within the Phase I Study Area have been used for commercial and industrial purposes since circa 1975. Historical records identified the presence of several off-site PCAs located within the Phase I Study Area. A former private fuel outlet and underground storage tank (UST) on the adjacent property to the east (1890 Bantree Street) is considered to represent a PCA that results in an APEC on the Phase I Property. Otherwise, historical off-site PCAs identified are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientations relative to the subject land.

The Phase I Property forms part of a larger parcel of land owned by Laurent Leblanc Construction Ltd. The adjacent parcel to the north continues to be operated as a contractor's yard, with some associated storage of construction equipment and aggregate material, as well as a scale house on the western and northern portions of the Phase I Property. The southeastern portion of the property is occupied by a liquid soil treatment facility, under construction and not currently in operation.

Fill material of unknown quality was identified on the Phase I Property following the completion of a subsurface investigation by Paterson earlier this year. The presence of the fill material of unknown quality is considered to represent a PCA that results in an APEC on the Phase I Property.

The neighboring properties are currently used for commercial and industrial purposes. Two automotive service garages were identified on the adjacent properties to the east and southeast, at 2570 and 2596 (also listed as 2584) Edinburgh Place. The automotive service garages are considered to represent PCAs that result in APECs on the Phase I Property. Several off-site PCAs were identified within the Phase I Study Area however, based on their separation distances and/or cross gradient orientation with respect to the Phase I Property, they are not considered to result in APECs on the Phase I Property.

Based on the findings of this assessment, it is our opinion that **a Phase II – Environmental Site Assessment is required for the Phase I Property.**

9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the Phase I Property and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Harbour Environmental Group Ltd. Permission and notification from Harbour Environmental Group Ltd. and Paterson Group will be required prior to the release of this report to any other party.

 Address: Lot: , Part: , 1850 Bantree Rd, Ottawa, City, K1B 4L6
 District Office: Ottawa

Incident Summary:

Leblanc Ltd: diesel on ground, contained on property

Initial Incident Description (as reported):

Created: Akiko Date (Spills Action Centre) - 2017/01/03 08:02:13 AM

Caller reports that a Crusher was being moved and a rod or something punctured the plastic fuel tank. About 30 gal of diesel spilled on to the ground under the crusher. The ground is compacted and ice, the fuel stayed on top of the ice and frozen in place. They were unable to get to the fuel for cleanup as the crusher was too large to be towed or moved on its own, so the tank was removed and a repaired/new one will be put in today so that the crusher can be moved. Then they will clean up the diesel. It has not migrated anywhere and is still on their own private property.

The dumpsite gave him a number for a company called Parasol, to test the soil before they can receive it. However he is having difficulty reaching them. SAC gave Mr. Leblanc some spill contractor numbers.

SPIMT: not in SWP Zone

SAC Action Class:

Land Spills

Non-Standard Procedure:

No

Incident Description:

Last update: Tor Rustad (Ottawa District Office) - 2017/05/18 01:23 PM

Thursday, May 18, 2017: the solid non-hazardous wastes were cleaned up by staff from Drain-All Limited. Drain-All Limited is a qualified clean-up contractor and is licensed to haul solid non-hazardous wastes. Personnel from Drain-All Limited reported the spill as cleaned up on Thursday, January 5, 2017. Personnel from Drain-All Limited will bring the solid non-hazardous wastes to an authorized landfill site for disposal.

Recommend closure of this incident report.

Incident Description Continuation:**Incident Update:**

Mark C Harris (Spills Action Centre) - 2017/01/05 created; 2017/01/05 last update : 0825h
 Drain-All Ottawa [Malcom] to SAC|mch requesting IR #.

Julian Aristizabal (Spills Action Centre) - 2017/01/05 created; 2017/01/05 last update : 13:53- Joshua Baillie - Drain-All Ltd - 613-739-1070 to SAC (JA): updates that they have removed 3 tri-axle loads of contaminated soil and the area has been cleaned up as of about noon today.

Was there an MOE field response?

No

Were there samples collected / analyzed at any time?	No
Known or Suspected Health / Environmental Consequence at the Time of Incident	
Health / Environmental Consequence:	0 - No Impact

Has a Water Body been impacted?	No
Receiving Environment:	Land
Incident Event:	Leak/Break
Incident Reason:	Material Failure – Poor Design/Substandard Material
Source Type:	Motor Vehicle
Sector Type:	Other
Specify Other:	Error
MOE/Other Agencies Involved:	Province - MOE-District Office
Was there a discharge / emission / spill of a contaminant to the environment?	
Yes	

Contaminants Table

Contaminant Name	Description	Code	UN#	Limit	Quantity	[units]	[freq]
DIESEL FUEL		13	1202		130	L	n/a

Environmental Compliance Reporting (ECR)

Is this an air emission (measured or modelled) or wastewater (sewage) discharge exceedance that will become part of the Environmental Compliance Report? (legislation, certificate of approval, order, or guideline)
No

Voluntary / Mandatory Abatement

Was there Non-Compliance/Non-Conformance Identified?	<input type="radio"/> Yes <input checked="" type="radio"/> No

Accessing the applications

1. Click [Release of Public Information](#) - TSSA and click “need a copy of a document”
2. Select the appropriate application, download it, complete it in full and save it (Note: you will have to upload the application)
3. Proceed to page 3 of the application and click the “TSSA Service Prepayment Portal” link under payment options (the link will take you the secure site where you can pay for the request via credit card)

Accessing the Service Prepayment Portal

1. Select new or existing customer (*if you are an existing customer, you will need your account number & postal code to access your account)
2. Under “Program Area” select **Public Information** and click continue
3. Enter application form number (found on the bottom left corner of the application form) and click continue
4. Complete the primary contact information section
5. Complete the fee section
6. Upload your completed application
7. Upload supporting documents (if required) and click continue

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

Warm regards,

Kimberly Gage | Public Information Agent

Dear Samuel,

**Re: Information Request
1850 Bantree Street, Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** No records for this property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** The City’s Sewer Use Program has found the following information pertaining to the subject property: Violations of environmental statutes, regulations or bylaws, other environmental records.
 - **Comment:** Violation of environmental statutes, regulations or by-laws; proximity to dumps or landfills.
- **Solid Waste Services:** No records for this property.

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet (‘ADDRESS – HLUI Summary report.xlsx’), please refer to the [Overview and User Guide.](#)”

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Sinan Bertan

Student Planner

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

<https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2022&name=26404>

Investigation 1:
Investigation 2:
Penalty Imposed:
Description:

Eleven companies and three individuals pleaded guilty to violations under the Environmental Protection Act (EPA). In May 2005, members of the Ministry of the Environment's Investigation and Enforcement Branch partnered with the Ontario Provincial Police and the Ministry of Transportation in a joint inspection initiative to ensure contaminated soil waste haulers are in compliance with the EPA. The waste haulers were inspected to determine if they are approved to haul contaminated solid non-hazardous waste and if they were operating in accordance with the conditions of a Certificate of Approval. The court heard that, on May 24, 2005 and May 25, 2005, the defendants were observed to be hauling contaminated solid non-hazardous waste and soil to two landfill sites located in the Ottawa region. Upon inspection, it was revealed that the vehicles transporting the waste were either not authorized to do so or the vehicles were not clearly marked with the name and number of its Certificates of Approval and in other instances, the Certificates of Approval were not present in the vehicles as required. Following a two-day inspection, 11 companies and three individuals were charged for violations under the EPA. Between June 16 and July 14, 2005, the companies and individuals pleaded guilty to the following charges under the EPA: ' Munro & Scullion Contracting Inc., and 1421736 Ontario Limited pleaded guilty to one count of operating or establishing a waste management system without a Certificate of Approval or provisional Certificate of Approval contrary to Section 27(1)(a) and were fined \$1,000 each; ' Gestion des Dechets Malex Inc. /Malex Waste Systems Inc., Carl's Sanitation Services Ltd., Mackat Inc., Ray's Haulage Incorporated, 927889 Ontario Inc., all pleaded guilty to one count each for failing to mark the vehicles with the name and number of the Certificates of Approval contrary to Section 10 of Regulation 347 under the EPA. They were fined \$500 each; Kimco Steel Sales Ltd. also pleaded guilty to two counts under this section and received a total of \$1,000 in fines; ' Peter Alfred Stanley, Jean Claude Levesque and Timothy Stephen Dell pleaded guilty to one count each under Section 10 of Regulation 347. Each individual received a \$500 fine. ' 144778 Canada Inc., Services Matrec Inc., and Losey's Haulage Ltd. also pleaded guilty to one count each for violating Certificate of Approval conditions contrary to Section 186(3) of the act. The companies each received a \$500 fine. Victim Fine Surcharges are exclusive of the fines.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Oct 2022

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Feb 28, 2022

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2021

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Feb 28, 2023

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -May 2023

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Apr 2023

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jun 30, 2023

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2022**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jun 30, 2023**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jun 30, 2023**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jun 30, 2023**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jun 30, 2023**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2022

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2023

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2023

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2021

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Oct 2022

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory 1993-2020:

Federal

[NPR2](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2023

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jun 30, 2023

Canadian Pulp and Paper:

Private **PAP**

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal **PCFT**

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial **PES**

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jun 30, 2023

Pipeline Incidents:

Provincial **PINC**

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is in a historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial **PRT**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial **PTTW**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jun 30, 2023

Ontario Regulation 347 Waste Receivers Summary:

Provincial **REC**

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial **RSC**

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2023

Retail Fuel Storage Tanks:

Private **RST**

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Feb 28, 2023

Scott's Manufacturing Directory:

Private **SCT**

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:Provincial [SPL](#)

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Oct 2021

Wastewater Discharger Registration Database:Provincial [SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks:Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2020

Variances for Abandonment of Underground Storage Tanks:Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jun 30, 2023

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Mar 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
