THIS REPORT CONTAINS PROVISIONS LIMITING LIABILITY, THE SCOPE OF THE REPORT AND THIRD-PARTY RELIANCE

EXECUTIVE SUMMARY

Parsons Inc. (Parsons) was retained by The Ottawa Hospital to conduct a Phase One Environmental Site Assessment (ESA) of three Lots (C, D and alternate) located at 1967 Riverside Drive in Ottawa, Ontario (the Phase One Property). The Phase One Property is currently owned by The Ottawa Hospital for use as the Riverside Campus of The Ottawa Hospital. The Ottawa Hospital – Riverside Campus intends to convert Lots C and D of this property from undeveloped to an extension of their parking lot. The Alternate Lot was evaluated and dismissed as part of the current proposal but remains in this report for completeness. This Phase One ESA was completed to support a Site Plan Control Application. It is Parsons' understanding that The Ottawa Hospital will not be filing a Record of Site Condition (RSC) in the Ontario Ministry of the Environment, Conservation and Parks (MECP) registry.

The Phase One ESA was conducted in accordance with the amended Ontario Regulation 153/04 (O.Reg.153/04), Records of Site Condition – Part XV.1 of the Environmental Protection Act that is administered by the MECP. The purpose of the Phase One ESA was to identify areas of potential environmental concern (APECs) at the Phase One Property arising from present and past potentially contaminating activities (PCAs) on the Phase One Property or within the Phase One Study Area, which includes properties located wholly or partially within 250 m of the Phase One Property. The Ottawa Hospital – Riverside Campus intends to convert this property from undeveloped to an extension of their parking lot. This Phase One ESA was completed to support a Site Plan Control Application.

Based on the available records, specifically street directory information, database searches completed by Environmental Risk Information Services (ERIS), chain of title and aerial photographs. Aerial photographs indicate the Phase One Property had been developed in 1928 for residential use and vacant since at least 1965 to present. The Phase One Property is in an area that is a mixture of residential, institutional and parkland property uses.

There are three PCAs identified at the Phase One Property or within the Study Area that have the potential to impact soil and/or groundwater and, therefore, result in APECs at the Phase One Property as follows:

- Potential fill material of unknown quality imported when the property was first developed and decommissioned and potentially thereafter (MECP PCA 30).
- Railway tracks are present in the Study Area adjacent up-gradient east to the Phase One Property (MECP PCA 46).
- Closed Billings Street Dump present at the western edge of Alternate Lot (MECP PCA 58).

The contaminants of potential concern (COPCs) include benzene, toluene, ethylbenzene and xylenes (BTEX), petroleum hydrocarbon fractions F1 to F4 (PHC F1 to F4), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), metals, selected other regulated parameters (ORPs), polychlorinated biphenyls (PCBs) in soil and/or groundwater.

The APECs and associated PCAs and COPCs that may affect the Phase One Property are summarized below. A Phase Two ESA is recommended to investigate these APECs.

APEC	Location of APEC on Phase One Property	MECP PCA	Location of PCA (On-site or Off-site)	Potential Contaminants of Concern	Media Potentially Impacted
1. Fill material of unknown quality	Whole Phase One Property	(30) Importation of Fill Material of Unknown Quality	On-site	BTEX, PHCs, VOCs, PAHs, metals and ORPs	Groundwater and Soil
2. UR-15 Billings Street Dump (Closed)	Western portion of Alternate Lot and northwest portion of Lot D	(58) Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils and conditioners	On-site	BTEX, PHCs, VOCs, PAHs, PCBs and Metals	Groundwater and Soil
3. Railway tracks	Eastern edge of Lot C	(46) Rail Yards, Tracks and Spurs	Off-site	BTEX, PHCs, VOCs, PAH, metals and ORPs	Groundwater and Soil

BTEX – benzene, toluene, ethylbenzene, xylenes; PHCs – petroleum hydrocarbon fractions F1 to F4; VOCs – volatile organic compounds; PAHs – polycyclic aromatic hydrocarbons; OCPs - organochlorine pesticides; ORPs – other regulated parameters (HWSB); PCBs - polychlorinated biphenyls; CPs - chlorophenols

1.0 INTRODUCTION

Parsons Inc. (Parsons) was retained by The Ottawa Hospital to conduct a Phase One Environmental Site Assessment (ESA) of three Lots (C, D and alternate) located at 1967 Riverside Drive in Ottawa, Ontario (the Phase One Property). The Phase One Property is currently owned by The Ottawa Hospital for use as the Riverside Campus of The Ottawa Hospital. The Ottawa Hospital – Riverside Campus intends to convert Lots C and D of this property from undeveloped to an extension of their parking lot. The Alternate Lot was evaluated and dismissed as part of the current proposal but remains in this report for completeness. This Phase One ESA was completed to support a Site Plan Control Application. It is Parsons' understanding that The Ottawa Hospital will not be filing a Record of Site Condition (RSC) in the Ontario Ministry of the Environment, Conservation and Parks (MECP) registry.

The Phase One ESA was conducted in accordance with the amended Ontario Regulation 153/04 (O.Reg. 153/04), Records of Site Condition – Part XV.1 of the Environmental Protection Act that is administered by the MECP. The purpose of the Phase One ESA was to identify areas of potential environmental concern (APECs) at the Phase One Property arising from present and past potentially contaminating activities (PCAs) on the Phase One Property or within the Phase One Study Area, which includes properties located wholly or partially within 250 m of the Phase One Property.

Limitations and exceptions of the assessment are set out in Section 0 and referenced documents are listed in Section 10.0.

1.1 Phase One Property Information

1.1.1 Location and PIN

A Phase One Property Location and Ontario Base Map is presented on Figure 1. Regional topography is shown on Figures 1 and 2. A Phase One Property Plan is presented on Figure 3. Annotated photographs are presented in Appendix A.

The Phase One Property is irregular shaped and approximately 1.5 hectares, including all three Lots. The Phase One Property was formerly residential and currently undeveloped.

The civic address for the Phase One Property is 1967 Riverside Drive in Ottawa, Ontario K1H 1B9.

The legal description of the Phase One Property is: Part of Lot 16 CON JG; Gloucester being parts 10, 13, 39, 40, 48, 49, 50, 53 to 58 Plan 4R19213; Ottawa subject to an easement in favour of Rogers Ottawa Limited/Limitee as in OC166375.

The Phase One Property identification number is: 04201-0192 (LT) for Lots C and alternate and 04201-0191 for Lot D.

The UTM coordinates representing the approximate centre of each Lot for NAD 83, Zone 18T, are:

- 447622.27 m easting and 5026984.30 m northing for Lot C
- 447589.80 m easting and 5027269.10 m northing for the Lot D

447529.50 m easting and 5026949.76 m northing for Alternative LotLegal survey plans are presented in Appendix B.

The property is in the municipality of the City of Ottawa and within the Ottawa MECP district office's jurisdiction.

1.1.2 Zoning

According to geoOttawa database, the Phase One Property is zoned as I2 (i.e., Major Institutional Zone).

1.1.3 Owner/Client Contact Information

The Phase One Property is owned by The Ottawa Hospital. This Phase One ESA has been undertaken for The Ottawa Hospital, with contact information being: Dwight Breault, Director of Construction Management, The Ottawa Hospital, 1053 Carling Avenue, Ottawa, Ontario K1Y 4E9, 613-297-5289, dwbreault@toh.ca.

2.0 SCOPE OF INVESTIGATION

The Phase One ESA was conducted in general accordance with O.Reg. 153/04, Records of Site Condition – Part XV.1 of the Environmental Protection Act that is administered by the MECP. The Phase One ESA involved the following main activities:

- Reviewing various records pertaining to the Phase One Property and the Phase One Study Area, as detailed in Section 3.0;
- Conducting a reconnaissance visit to make specific observations at the Phase One Property and, from publicly accessible areas, of the remainder of the Phase One Study Area, as detailed in Section 5.0;
- Reviewing and evaluating the information, as detailed in Section 6.0; and
- Preparing this report documenting the activities and findings, and the conclusions that are presented in Section 7.0.

3.0 RECORDS REVIEW

3.1 General

3.1.1 Phase One Study Area Determination

The Phase One Study Area was comprised of the Phase One Property and all properties located wholly or partially within the Study Area. Based on the topography of the Study Area, available information and the reconnaissance visit, no properties located beyond the Study Area needed to be included in this Phase One ESA.

The records review for the Phase One ESA consisted of obtaining and reviewing the following information:

- Historical street directory information pertaining to the Phase One Property and adjacent properties obtained from ERIS;
- A database report obtained from ERIS (ERIS report) pertaining to the Phase One Property and properties within the Study Area;
- Aerial photographs for the Study Area that were obtained from geoOttawa and Google Earth;
- Various topographic, geologic, and hydrogeologic maps or reports; and
- The activities and results of historical ESAs for the Phase One Property.

3.1.2 First Developed Use Determination

In accordance with O.Reg. 153/04, the first developed use of the Phase One Property is the earlier of (a) the first use of a Phase One Property in or after 1875 that resulted in the development of a building or structure on the property, and (b) the first potentially contaminating use or activity that occurred on the Phase One Property.

Based on aerial photographs, there were two residential properties on the Phase One Property from 1928 to 1965 after which it was landscaped during the construction of The Ottawa Hospital – Riverside Campus.

3.1.3 Fire Insurance Plans

Fire insurance records for the Phase One were not obtained as aerial photo review indicates that this land has never been developed prior to its current building construction.

3.1.4 Chain of Title

A chain of title was not requested for the Phase One Property, all relevant records could be determined via publicly accessible records. Current land titles are presented in Appendix C.

In summary, the Phase One Property was owned by the following:

- Crown prior to approximately 1928;
- Residential from 1928 to approximately 1965;
- The Ottawa Hospital from 1965 to present.

3.1.5 Environmental Reports

Historical environmental investigation and assessment reports regarding the Phase One Property provided by The Ottawa Hospital – Riverside Campus are summarized below.

3.1.5.1 Lot C and Alternate Lot

Preliminary Geotechnical and Hydrogeological Investigation, Chalmers Vulnerable Service Area Watermain Extension (CP000308) Proposed Trenchless Crossing, Ottawa Ontario, prepared for Robinson Consultants Inc. by GEMTEC Consulting Engineers and Scientists Limited (Gemtec), dated June 3, 2022.

- Two boreholes (BH21-01 and BH21-02) were advanced at either end of the proposed trenchless crossing to a depth of 13.2 meters below the ground surface (mbgs). Both boreholes were completed with monitoring wells.
- Fill material ranging in thickness between 1.6 and 3.9 m was encountered at both boreholes, the fill is variable but can be described as brown sand with varying amounts of silt and gravel and silty sand with varying amounts of clay and gravel. Deposits of native materials (sand, sand and gravel, sandy silt and silty sand) were encountered below the fill having thicknesses of 4.4 to 4.6 m extending to depths of 7 and 8.4 mbgs.
- Shale bedrock was encountered at 7.9 and 9.2 mbgs.
- The depth to groundwater was approximately 8.6 mbgs in both wells.

Assessment of Past Uses, Sarah Billings Place to Riverside Hospital – 300mm Watermain, Ottawa Ontario, prepared for Robinson Consultants Inc. by GEMTEC Consulting Engineers and Scientists Limited (Gemtec), dated February 28, 2023.

- Six Potentially Contaminating Activities (PCAs) were identified, resulting in two Areas of Potential Environmental Concern (APECs) on the Site.
- Land use in the study area are community, institutional, residential and parkland.
- No areas of natural significance were identified within the study area.
- 67 ERIS database records were identified within the study area.
- Based on the APECs a subsurface investigation is recommended.

Soil Characterization Report, Sarah Billings Place to Riverside Hospital – 300 mm Watermain, Ottawa Ontario, prepared for Robinson Consultants Inc. by GEMTEC Consulting Engineers and Scientists Limited (Gemtec), dated March 7, 2023.

- Two boreholes (BH23-01 and BH23-02) were advanced at either end of the proposed trenchless crossing, adjacent to BH21-01 and BH21-02, to a depth of 7.7 and 7.9 mbgs, respectively. Both boreholes were completed with monitoring wells, groundwater was found at 7.57 at BH23-01 and was not encountered at BH23-02.
- Land use adjacent to BH23-01 is institutional and community as it is on the hospital property. Land use adjacent to BH23-02 is residential with a community Right of Way transecting the Site.
- Coarse-grained soil standards are applicable for the Site as coarse-grained sand and gravel were observed during field sampling.
- Groundwater is considered non-potable as the surrounding buildings are connected to municipal services.
- Soil quality met the applicable MECP Table 1 Residential, Parkland, Industrial (RPI)/Industrial, Commercial, Community (ICC) Site Condition Standards (SCS) and may be re-used on or off-site as inert fill other than for agricultural use.

Materials Management Plan, Trenchless Watermain Construction, Sarah Billings Place to Riverside Hospital, Ottawa Ontario, prepared for Robinson Consultants Inc. by GEMTEC Consulting Engineers and Scientists Limited (Gemtec), dated March 8, 2023.

- Subsurface conditions generally consist of topsoil and sandy fill to depths ranging from 1.7 and 4 mbgs, native sands extend to depths ranging from 6.0 to 8.0 mbgs and a thin layer (0.7m) of glacial till is under the native sands. Shale bedrock underlies the native sands.
- Groundwater levels were measured within the bedrock.
- Group A soils are suitable for re-use below paved areas or as backfill against structures. Group B soils are most suitable for landscaping and lower portions of trenches and excavations.
- No soil exceedances of the MECP Table 1 SCS were identified at any borehole locations and groundwater conditions also meet the MECP Table 3 ICC SCS.
- Groundwater can be discharged into City of Ottawa storm and sanitary sewers.
- Soils can be staged and stockpiled on Site.

3.1.5.2 Lot D

Annual Report 2019-2020 Methane Gas Monitoring Program, The Ottawa Hospital Riverside Campus 1967 Riverside Drive, Ottawa Ontario, prepared for Glenn Clayton, Manager, Property & Operations. by Greenough Environmental Consulting Inc. (GEC), dated April 14, 2020.

- Twelve methane gas probes installed in 2005 along a sub-surface barrier, the data collection is routed through two monitoring systems that directly save data to a computer.
- A value greater than 10% of the lower explosive limit (LEL) triggers a “low alarm” state, value greater than 50% will trigger an “alarm” state. Data is reviewed monthly by GEC.
- No elevated methane concentrations (greater than 10% LEL) were detected from February 2019 to January 2020.
- Elevated methane concentrations were reported at probes for the years from 2008-2016, no data was available for the years 2016-2019.

3.2 Environmental Source Information

3.2.1 Sources

Environmental information available in provincial, federal, and publicly accessible private databases pertaining to the Phase One Study Area was obtained from the following sources.

- Environmental Risk Information Services Ltd. (ERIS) searched all the remaining sources listed in O. Reg. 153/04, Schedule D, Section 3(2)7, as well as several additional databases as discussed in Section 3.2.5.
- Historical street directory information pertaining to the Phase One Property and adjacent properties was obtained from Vernon’s street directories through ERIS and is discussed in Section 3.2.6.

3.2.2 Ontario Ministry of The Environment, Conservation and Parks

An FOI request was not submitted to the MECP for the Phase One Study Area, as all relevant records could be determined from publicly available records.

3.2.3 Municipalities

An FOI request was not submitted for this Phase One Study Area, as all relevant records could be determined from publicly available records.

3.2.4 Technical Standards and Safety Authority

The TSSA was not contacted regarding records potentially in their files pertaining to the Phase One Property based on review of other sources there does not appear to be any uses on the property that would necessitate a record with the TSSA.

3.2.5 Environmental Risk Information Services

Various provincial, federal, and private databases were searched by ERIS to obtain information for the Phase One Property and properties within the Study Area. The ERIS report, including a description of all databases searched and records found, is presented in Appendix D. The locations of the APECs and PCAs are presented on Figure 5.

The locations and corresponding environmentally significant findings are detailed in the table below. The distances in the table are provided by ERIS and typically measured from the center of the Phase One Property. The entire list of unplotable records can be found in the ERIS report in Appendix D, only the environmentally significant findings within the Study Area are summarized below.

LOCATION	DISTANCE AND DIRECTION FROM PHASE ONE PROPERTY	DETAILS
Phase One Property	N/A	<ul style="list-style-type: none"> <u>Water Well Information System</u>: 1 domestic supply well completed in 1948.
General – Surrounding Properties	250 m radial	<ul style="list-style-type: none"> <u>Borehole</u>: 4 boreholes between 10.4 and 193.3m from site.
1967 Riverside Dr	162.3 m northeast (10 m SSW of Lot D)	<ul style="list-style-type: none"> <u>Ontario Spills</u>: Sewage spilled to land due to pipe leak on June 5, 1995. <u>Waste Generators Summary</u>: Registered to The Ottawa Hospital – Riverside Campus from 1986-1989 and 1989 – 2018 and 2020-2022 for Organic and Inorganic Laboratory Chemicals, Aliphatic Solvents, Petroleum Distillates, Waste Oils & Lubricants, Pharmaceuticals, Photoprocessing Wastes and Pathological Wastes. <u>2022</u> <u>Ontario Spills</u>: A pipe/hose leak of diesel under concrete floor due to equipment failure. Possible soil contamination. Incident date 2/25/2002. <u>Ontario Spills</u>: 10 L of gasoline leaked and spilled to sewer, later cleaned. Incident date 8/16/2013. <u>Variances for Abandonment of Underground Storage Tanks</u>: FS – Variance approved in 2011 for an abandoned UST.
1919 Riverside Dr	197.1 m north northeast (70 m W of Lot D)	<ul style="list-style-type: none"> <u>Waste Generators Summary</u>: Registered to various businesses at this address listed below. <ul style="list-style-type: none"> MDS Laboratory Services (1992-2005) for pathological wastes, halogenated solvents, organic and inorganic laboratory chemicals, other inorganic acid wastes, aromatic and aliphatic solvents. BPC Ontario Labs LP (2006) for other inorganic acid wastes, organic and inorganic laboratory chemicals, aromatic and aliphatic solvents, halogenated solvents and pathological wastes. Life Labs LP (2007-2016, 2018, 2020 -2022) for inorganic acid wastes, organic and inorganic laboratory chemicals, aromatic and aliphatic solvents, halogenated solvents and pathological wastes. Riverside Professional Centre (1998- 2016, 2018, 2020-2022) for pharmaceuticals, pathological wastes and waste oils/sludges (starting in 2018).
Rideau River Park Dump	58/196 m south	<ul style="list-style-type: none"> <u>Anderson's Waste Disposal Sites</u>: A former waste disposal site closed since 1958.

LOCATION	DISTANCE AND DIRECTION FROM PHASE ONE PROPERTY	DETAILS
	(70 m W of Lot D)	<ul style="list-style-type: none"> <u>Waste Disposal Sites – MOE 1991 Historical Approval Inventory</u>: Closed landfill with A5 Classification (potential human impact – urban municipal/domestic waste – closed 10-20 years).
1996 Leslie Avenue/97 Pleasant Park Road	99.8 m southwest (350 m S of Lot D)	<ul style="list-style-type: none"> <u>Environmental Compliance Approvals</u>: ECA approval for municipal and private sewage works issued in December of 2018.
Hurdman South	182 m west (56 m W of Lot D)	<ul style="list-style-type: none"> <u>Contaminated Sites on Federal Land</u>: Medium priority site owned by the National Capital Commission, entry created in 2006 and last modified in 2023. Contaminates present are PAHs (soil and groundwater), PHCs (soil) and metals (soil).
2071 Riverside Drive	197 m west southwest (450 m SSW of Lot D)	<ul style="list-style-type: none"> <u>Waste Generators Summary</u>: Registered to Thurber Engineering Ltd. as of 2021 for other specified inorganic sludges, slurries or solids.
Canadian National Railway	Various sites within study area	<ul style="list-style-type: none"> <u>Waste Generators Summary</u>: Registered to Canadian National Railway as of 2013 for other specifies organics, latex waste, polymeric resins, organic laboratory chemicals, halogenated solvents, acid wastes, chemical fertilizers waste, petroleum distillates, oil skimmings and sludges, alkaline wastes.

In summary, selected findings indicated above are not a concern based on the following reasons:

- ECA for municipal and private sewage is unlikely to affect the Phase One Property due to distance and direction from property.
- A few waste generators were associated with hospital operations at 1919 and 1967 Riverside Drive are distant from the Phase One Property and cross gradient.
- The waste generator located 2071 Riverside Drive is unlikely to affect the Phase One Property based on distance and direction from the Property.
- The Contaminated Site on Federal Land at Hurdman South is unlikely to affect the Phase One Property due to direction from the Property, as it is downgradient.

The only records of potential environmental consequence to the Phase One Property are related to the former waste disposal site located at the western border of the Phase One Property.

3.2.6 Street Directories

Historical street directories were reviewed to identify businesses on the Phase One Property and surrounding properties in the Study Area. A copy of the directory search has been included in Appendix E. The years reviewed ranged from 1945 to 2021. There were no listings for the Phase One Property prior to 1966.

The Phase One Property was listed as:

- Ottawa Hospital Academic, Ottawa Hospital Cancer Centre and TOH Riverside Rehabilitation, Ottawa Hospital and Ottawa Hospital- Riverside Campus in 2021
- Family Health Team Ottawa, MP Lundy Construction Ltd. and Ottawa Hospital- Riverside Campus in 2017;
- Hopital d'Ottawa, M P Lundy Construction Ltd., Meloche Monnex Inc. and Ottawa Hospital Riverside in 2012;
- Family Health Team Ottawa Hospital Riverside Campus and Ottawa Women's Health Council in 2006-2012;
- Hopital d'Ottawa, Ontario Nurses Association and Ottawa Hospital Riverside Campus in 2000;
- Listed as all residential in 1993-94;
- Riverside Hospital of Ottawa from 1966 to 1987; and
- Address not listed/ No listing found from 1945 to 1966.

The adjacent and surrounding properties had no listings until 1950. Historical listings consisted of residential or residential development companies until 2000.

There is a potentially environmentally significant listing at 1919 Riverside Drive, located within the footprint of the Phase One Property address but approximately 250 m north northeast of the Phase One Site, was listed as various medical practices from 2000 until 2021, however based on distance and direction from site it is unlikely to have an affect on the Phase One Property.

3.3 Physical Setting Sources

3.3.1 Sources

The sources of the information pertaining to the physical setting of the Phase One Study Area are listed below and findings are discussed in the subsections that follow:

- Selected aerial photographs;
- Various topographic, geologic, and hydrogeologic maps or reports;
- Mapping of Areas of Natural Significance (ANSIs) by the Ministry of Natural Resources and Forestry (MNRF) and other parties; and
- Water well records submitted in accordance with the Ontario Water Resources Act.

3.3.2 Aerial Photographs

Aerial photographs of the Phase One Study Area were obtained from geoOttawa for the years indicated in the table below. In the Parsons' Qualified Person's opinion, the years provide a satisfactory representation of the historic development of the Study Area when interpreted along with the other sources of information considered by the records review.

The aerial photographs are presented in Appendix F. The scale and resolution of the photographs typically did not permit a detailed study of the Phase One Property and Study Area, but the following general details were determined with respect to buildings and structures on the Phase One Property, local land use, and PCAs.

YEAR	PHASE ONE PROPERTY	SURROUNDING PROPERTIES
1928	Lot D and the Alternate Lot of the Phase One Property appear to be undeveloped. Lot C has a residential dwelling at the southern portion and a small, forested area at the northern portion.	The surrounding properties appear to be mainly agriculture and residential. Smyth Road (north), Riverside Drive (west), Sarah Billings Place/Billings Avenue, Pleasant Park Road and Leslie Avenue (south) are visible.
1958	Generally unchanged from 1928.	The surrounding properties show an increase in residential development. The portion of land between Riverside Drive and the Rideau River is being cleared and levelled. To the east there are two rail lines.
1965	The residential buildings in the vicinity have been demolished and an access road to the hospital construction has been built through the Alternative Lot and adjacent to the west of the Lot D.	The Ottawa Hospital - Riverside Campus is being constructed to the North, and the property between Riverside Drive and the Rideau River appears to have an access road built along Riverside Drive.
1976	Lot C and Alternative Lot are undeveloped with scattered vegetation. A pedestrian access path and a portion of the vehicle access road are present on the southern portion of the Lot D.	The Ottawa Hospital – Riverside Campus and associated parking lot is fully constructed. The residential areas to the east and south appear unchanged. The property between Riverside Drive and the Rideau River is now landscaped. The bridge across the Rideau River joining Main Street and Smyth Road is now built and the Riverside Drive/Smyth Road access is present.
1991	A shallow excavation on the northern edge of Alternate Lot and the pedestrian pathway connecting Billings Avenue with the hospital parking lot is being constructed through Lot C. Lot D appears to be undeveloped with some large vegetation.	The transitway connecting the rail corridor to the hospital that bisects the Phase One Property is being constructed and the rail corridor is down to one rail. The road that connects the parking Lot to Riverside Drive directly to the north of the Phase One Property is complete. There is an excavation to the northwest between Riverside Drive and the Rideau River.
2002	The construction of the pedestrian pathway on Lot C has been completed. Large vegetation and trees and a pedestrian pathway are present on the alternate Lot.	The transitway between Lot C and Alternate Lot is completed. The surrounding properties appear in their current configuration.
2011	Generally unchanged from 2002.	Generally unchanged from 2002.
2022	Generally unchanged from 2011.	Generally unchanged from 2011.

3.3.3 Topography, Hydrogeology, Geology

Based on maps presented on Figures 1 and 2, and the reconnaissance visit:

- The topography at the Phase One Study Area is sloping to the west.

The records review revealed the following geologic and hydrogeologic information:

- According to Ontario Geological Survey online mapping (OGS 2000, accessed in March 2024), the surficial soil at the Phase One Property is described as gravel, sand, silt and clay, deposited on modern flood plains (fluvial deposits).

- According to Ontario Geological Survey online mapping (OGS 2000, accessed in March 2024), bedrock in the area is the Georgian Bay, Blue Mountain, and Billings Formation and Collingwood and Eastview Members consisting of shale, limestone, dolostone and siltstone.
- Based on the regional topography of the Phase One Property, the elevation is approximately 69 m above sea level for Lot C and Alternate Lot and approximately 63 m above seal level for Lot D (see Appendix B).
- Based on available reports, the groundwater ranges from 2.4 to 7.6 mbgs and the direction of groundwater flow is assumed to be east to the Rideau River.
- Fourteen water wells were identified within the Study Area, where the depth of bedrock varies between 1.5 and 12.2 mbgs.

3.3.4 Fill Materials

Fill material is suspected to have been brought to the Phase One Property for the initial development of the hospital property and during the construction of the transit way.

As discussed in Section 3.1.5, fill material consisting of brown sand with varying amounts of silt and gravel and silty sand with varying amounts of clay and gravel between 1.6 and 3.9 m thick was encountered during the 2002 Gemtec Geotechnical and Hydrogeological Investigation to a maximum depth of 1.4 mbgs.

3.3.5 Water Bodies and Areas of Natural Significance and Groundwater Information

Based on the topographic maps presented on Figures 1 and 2, the reconnaissance visit, MECP's Source Protection Information Atlas, geoOttawa and MNRF Natural Heritage Information Centre interactive map, the nearest surface water body is the Rideau River approximately 200 m to the west of all portions of the Phase One Property.

Areas of natural significance include provincial parks, conservation reserves, areas of natural and scientific interest, provincially significant wetlands, habitats of threatened or endangered species, wilderness areas, municipal environmentally significant areas, and the protected Niagara Escarpment and Oak Ridges Moraine Conservation Area.

- The MECP's Source Protection Information Atlas interactive map was searched to identify areas of natural significance within the Study Area. The Phase One Property is located within the Rideau Valley Source Protection Area. There are no Well Head Protection Areas or other designations in the plan for the protection of groundwater within the Study Area.
- The MNRF Natural Heritage Information Centre interactive map was searched to identify areas of natural significance within the Study Area. Woodlands were present throughout the Alternate Lot of the Phase One Property, and along the eastern and southern sides of Lot C. A copy of the natural heritage area map for the Study Area is presented in Appendix G.

Based on environmental records, historic plans, the City of Ottawa, and the reconnaissance visit, the Phase One Property is not currently connected to municipal water and sewage system.

3.3.6 Well Records

MECP Water Well Records within a 250 m radius of the Phase One Property, accessed from the Government of Ontario Well Records map, included 5 test holes/monitoring wells, 7 domestic supply wells, and 2 unspecified wells.

- The overburden encountered in the wells varied and included loam, blue clay and sand.
- The depth of bedrock varied between 1.5 and 12.2 mbgs and was indicated on each domestic well record to be blue shale.

- The depth to the static groundwater level varied between 2.4 and 7.6 mbgs.

4.0 INTERVIEWS

On July 9, 2024, an interview was conducted with Don Taggart (Facilities Manager) for The Ottawa Hospital who has specific knowledge of the area. The findings are summarized as follows:

- The hospital was built in 1967.
- Prior to being built the area was undeveloped.
- No known major spills have occurred within the Hospital property.
- There are three ASTs located east of the Hospital building, secondary containment is present, and they are regularly inspected.
- A railway easement exists adjacent to the hospital.

5.0 RECONNAISSANCE VISIT

5.1 General Requirements

Kelsy Marois, P.Eng. and John Bleackley A.S.C.T of Parsons conducted a reconnaissance visit on April 9, 2024, starting at 11:00 am. An additional reconnaissance visit was completed on June 5, 2024, starting at 10:45 am by Parth Patel, P.Geo. of Parsons for Lot D. The reconnaissance visits were conducted under good weather conditions over a period of approximately two hours. The Phase One Property was vacant at the time of the reconnaissance.

The reconnaissance visits were conducted by visiting and observing the Phase One Property. Surrounding properties were inspected from publicly accessible sidewalks and roadways. Preliminary information obtained from the records and interview was considered prior to conducting the reconnaissance.

Annotated photographs taken of the Study Area during the reconnaissance visits, documenting PCAs, APECs, relevant structures, and areas of disturbed soil, etc., if any, are presented in Appendix A.

For reporting convenience, some of the information below has been provided in a sequence or grouping that differs from the layout suggested in Ontario Regulation 153/04.

5.2 Specific Observations at The Phase One Property

5.2.1 Aboveground Structures and Buildings

No aboveground structures or buildings were observed at the Phase One Property.

5.2.2 Belowground Structures

No belowground structures were observed at the Phase One Property.

5.2.3 Aboveground and Belowground Storage Tanks

No aboveground or belowground storage tanks were observed at the Phase One Property. There is one diesel and one gasoline above ground storage tank (AST) observed at The Ottawa Hospital parking lot area.

5.2.4 Water Sources

The Phase One Property is not currently connected to the municipal water distribution system, though a water main was observed to cross the Phase One Property (Lot C and Alternate Lot). No potable water wells were observed.

5.2.5 Underground Utilities

There was evidence of storm and sanitary sewers as well as a water main across the Phase One Property (Lot C and Alternate Lot). There is also evidence of electrical lines for lighting along the perimeter roadways.

5.2.6 Exit and Entry Points

The Phase One Property is unfenced and there were no fixed entry or exit points. Lot D has a pedestrian walkway from the TOH to the sidewalk along Riverside Road.

5.2.7 Existing and/or Former Heating Systems

No existing or former heating systems were observed at the Phase One Property.

5.2.8 Existing and/or Former Cooling Systems

No existing or former cooling systems were observed at the Phase One Property.

5.2.9 Drains, Pits, and Sumps

No drains, pits or sumps were observed on the Phase One Property.

5.2.10 Unidentified Substances

A soil pile with debris was observed along the transitway portion of the Phase One Property Alternate Lot and two small piles of concrete were observed.

5.2.11 Staining/Corrosion

No surface staining/corrosion was observed at the Phase One Property.

5.2.12 Wells

Monitoring wells were observed at Lot D of the Phase One Property. This consisted of both groundwater and methane monitoring wells relating to the TOH.

5.2.13 Sewage Works

A sanitary and storm sewer crosses the Alternate Lot of the Phase One Property, manhole covers were observed.

5.2.14 Ground Surface

The Phase One Property was mostly grass covered with wooded pockets and sloping to the west.

5.2.15 Railway Lines

A railway line was observed to the east of Lot C of the Phase One Property.

5.2.16 Stained Soil or Pavement

No stained soil or pavement was observed at the Phase One Property.

5.2.17 Vegetation

No stressed vegetation was observed at the Phase One Property.

5.2.18 Fill

The Lots C and Alternate Lot of the Phase One Property appeared to have been excavated for the replacement of the water main and fill of unknown quantity or quality was used to fill the excavation. There is fill material expected during the construction of the pedestrian walkway at the Lot D of the Phase One Property.

5.2.19 Potentially Contaminating Activity

PCAs observed at the Phase One Property during the reconnaissance included:

- 28: Gasoline and Associated Products Storage in Fixed Tanks
- 30: Importation of Fill Material of Unknown Quality
- 46: Rail Yards, Tracks and Spurs

5.3 Enhanced Investigation Property

The Phase One Property is not an Enhanced Investigation Property under O.Reg. 153/04.

5.4 Investigations in Study Area Other Than at Phase One Property

Property uses adjacent to the Phase One Property are presented on Figure 4. Two PCAs were observed during the reconnaissance visit of the Study Area, The Ottawa Hospital- Riverside Campus to the north of the Property and a rail line to the east of the Property.

The nearest surface water body is the Rideau River approximately 191 m west of Lots C and Alternate Lot and approximately 151 m west of the Lot D of the Phase One Property.

The properties within the Study Area appeared to be serviced by a municipal drinking water system.

According to MECP records database, seven water supply wells were identified within the Study Area, all were constructed between 1947 and 1952 and the properties now appear to be serviced by municipal water.

5.5 Written Description of Investigation

The reconnaissance visits were conducted by Parsons by observing the Phase One Property and publicly accessible portions of the Study Area. Preliminary information obtained from the records review was considered prior to conducting the reconnaissance.

The reconnaissance included observations regarding PCAs at the Phase One Property and in the Study Area, water bodies, and areas of natural significance.

6.0 REVIEW AND EVALUATION OF INFORMATION

6.1 Current and Past Uses

Based on the records review, interviews and reconnaissance, the following is a summary of the uses of the Phase One Property from the time it was owned by the Crown to the present time:

YEAR	OWNER	DESCRIPTION OF PHASE ONE PROPERTY USE	PROPERTY USE	OTHER OBSERVATIONS FROM AERIAL PHOTOGRAPHS, FIRE INSURANCE PLANS, ETC.
Prior to 1928	Crown	Undeveloped land	Agriculture or other use	Based aerial photos and historical report reviews.
1928 to 1965	Unknown- Private Property	Various Residential	Residential or agriculture	Based on aerial photos.
1965 to 1990	The City of Ottawa	Institutional - Hospital	Community	Based on aerial photos and land title search.
1990 to present	The Ottawa Hospital	Institutional - Hospital	Community	Based on aerial photos and land title search.

6.2 Potentially Contaminating Activity

The following PCAs were identified at the Phase One Property and adjacent properties within the Study Area from the records review and reconnaissance visit (see Figure 5):

- 30 - Importation of Fill Material of Unknown Quality
- 46 – Rail Yards, Tracks and Spurs
- 58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils and conditioners

All other off-site PCAs that have occurred within the Study Area are not considered to have resulted in an APEC on the Phase One Property based on the distance from the Phase One Property, absent contaminant pathways, period of time, the direction of local groundwater flow, and mobility and/or persistence of the COPCs.

6.3 Areas of Potential Environmental Concern

APECs were identified on the Phase One Property based on the type and location of PCAs on the property. APECs were also identified on the Phase One Property due to PCAs in the Study Area based on the distance from the Phase One Property, geology, the inferred direction of local groundwater flow, and mobility and/or persistence of the associated COPCs. Based on the review of available information and the reconnaissance, the following APECs were identified on the Phase One Property.

APEC	Location of APEC on Phase One Property	MECP PCA	Location of PCA (On-site or Off-site)	Potential Contaminants of Concern	Media Potentially Impacted
1. Fill material of unknown quality	Whole Phase One Property	(30) Importation of Fill Material of Unknown Quality	On-site	BTEX, PHCs, VOCs, PAHs, metals and ORPs	Groundwater and Soil
2. UR-15 Billings Street Dump (Closed)	Western portion of Alternate Lot and northwest portion of Lot D.	(58) Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils and conditioners	On-site	BTEX, PHCs, VOCs, PAHs, PCBs and Metals	Groundwater and Soil
3. Railway Tracks	Eastern edge of Lot C	(46) Rail Yards, Tracks and Spurs	Off-site	BTEX, PHCs, PAH, metals and ORPs	Groundwater and Soil

BTEX – benzene, toluene, ethylbenzene, xylenes; PHCs – petroleum hydrocarbon fractions F1 to F4; VOCs – volatile organic compounds; PAHs – polycyclic aromatic hydrocarbons; OCPs – organochlorine pesticides; ORPs – other regulated parameters (HWSB); PCBs – polychlorinated biphenyls; CPs – chlorophenols

There were no evident uncertainties or lack of information that could affect the conclusions of this Phase One ESA.

6.4 Phase One Conceptual Site Model

6.4.1 Description of PCAs, APECs and Contaminants of Potential Concern

There are several PCAs that may potentially impact soil and/or groundwater at the Phase One Property.

- Fill material of unknown quality may have been imported during the initial development of the hospital parking lot as well as the transitway and access road from Riverside Drive to Lot D.
- Railway tracks were present adjacent to the eastern property boundary.
- The former Billings Street Dump is present on the western boundary of the Alternate Lot.

The COPCs include BTEX, PHC F1 to F4, VOCs, PAHs, metals and inorganics, selected ORPs, and PCBs in the soil and/or groundwater.

6.4.2 Underground Utilities

Underground Utilities in the Study Area include two public water mains, a public sanitary sewer and a public storm sewer as shown on geoOttawa. A report titled “Soil Characterization Report Sarah Billings Place to Riverside Hospital -300mm Watermain Ottawa, Ontario.” By Gemtec Consultants dated March 7, 2023, confirms that a 150-200 mm watermain existed on the Site and was proposed to be replaced by a larger 300mm watermain. Site reconnaissance indicated that the upgrade had been completed.

6.4.3 Hydrogeology and Geology

Based on the topographic maps and the reconnaissance visit:

- The nearest surface water body is the Ottawa River approximately 191 m west of Lot C and Alternate Lot and approximately 151 m west of the Lot D, and;
- The topography at the Study Area is sloped to the west.

Based on review of the available information, the hydrogeological and geological features of the Phase One Property are summarized as follows:

- According to Ontario Geological Survey online mapping (OGS 2000, accessed in March 2024), the surficial soil at the Phase One Property is described as gravel, sand, silt and clay deposited on modern flood plains.
- According to Ontario Geological Survey online mapping (OGS 2000, accessed in March 2024), bedrock in the area is the Georgian Bay, Blue Mountain and Billings Formation and Collingwood and Eastview Member consisting of shale, limestone, dolostone and siltstone.
- Based on the regional topography of the Phase One Property, the elevation is approximately 69 m above sea level for Lots C and Alternate Lot and approximately 63 m above seal level for the Lot D (see Appendix B).
- Based on available reports, the groundwater ranges from 2.4 to 7.6 mbgs and the direction of groundwater flow was to the west towards the Rideau River.
- Twenty-four water wells were identified within the Study Area, groundwater varies between 2.4 and 7.6 mbgs and bedrock varies between 1.5 and 12.2 mbgs.

6.4.4 Uncertainties

There were no evident uncertainties or lack of information that could affect the validity of the Conceptual Site Model.

7.0 CONCLUSIONS

PCAs were identified at Phase One Property and within the Study Area resulting in APECs at the Phase One Property.

PCAs that may potentially impact the soil and/or groundwater at the Phase One Property include:

- Fill material of unknown quality may have been imported during the initial development of the hospital parking lot as well as the transitway and access road from Riverside Drive to Lot D.
- Railway tracks were present adjacent to the eastern property boundary.
- The former Billings Street Dump is present on the western boundary of the Alternate Lot.

7.1 Whether Phase Two ESA Is Required

A Phase Two ESA is recommended to address APECs at the Phase One Property due to the above PCAs.

7.2 RSC Based on Phase One ESA Alone

Based on the review and evaluation of the information discussed herein, an RSC submitted with respect to all, or part of the Phase One Property based on this Phase One ESA alone is not possible.

8.0 LIMITATIONS AND EXCEPTIONS OF THE ASSESSMENT

This Phase One ESA has been prepared for the exclusive use of The Ottawa Hospital and its financial lenders. Any uses which another party makes of this report, or any reliance on, or decisions made, based on the report are the responsibility of such other party.

Parsons makes no representation or warranty to any other person with regard to this report and the work referred to in this report and they accept no duty of care to any other person or any liability or responsibility whatsoever for any losses, expenses, damages, fines, penalties or other harm that may be suffered or incurred by any other person as a result of the use of, reliance on, any decision made or any action taken based on this report or the work referred to in this report.

The investigations undertaken by Parsons with respect to this report and any conclusions or recommendations made in this report reflect Parsons' judgment based on the Phase One Property and Study Area conditions observed at the time of the inspection on the date(s) set out in this report and on information examined at the time of preparation of this report. This report has been prepared for specific application to this Phase One Property and it is based, in part, upon visual observation of the Phase One Property and Study Area and historical records obtained, all as described in this report. Nothing in this report is intended to constitute or provide a legal opinion. Note that this Phase One ESA did not consider potential contamination from per and polyfluoroalkyl substances (PFAS). Although, there was no direct evidence of PFAS being used within the Study Area, there may be historical and/or current sources beyond the Study Area and such an assessment is beyond the scope of this Phase One ESA.

The Phase One ESA was conducted in general accordance with the agreed upon scope of work and Ontario Regulation 153/04.

9.0 CLOSURE

Information presented herein was obtained while conducting an authorized Phase One ESA of the property located at 1967 Riverside Drive, Ottawa Ontario. The Phase One ESA was prepared under the supervision and reviewed by Derek Stewart, a Qualified Person under O.Reg. 153/04.

If there are any questions or concerns regarding this report, please do not hesitate to contact the undersigned.

Added 33 trees June 27, 2024

Scale 1 : 400
Metric
DISTANCES AND COORDINATES SHOWN ON THIS PLAN
ARE IN METRES AND CAN BE CONVERTED TO FEET BY
DIVIDING BY 0.3048.

June 27, 2024
Date
E. H. Henweyer
Ontario Land Surveyor

BOUNDARY INFORMATION COMPILED FROM PLANS 4R-19213, 4R-35573 AND 4R-36051.

ELEVATION NOTES

- Elevations shown are geodetic and are referred to the CGVD28 geodetic datum and are derived from the Vertical Control Monument 019680274 having an elevation of 66.322 metres.
- It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

UTILITY NOTES

- This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation.
- Only visible surface utilities were located.
- Underground utility data derived from City of Ottawa utility sheet reference.
- Sanitary and storm sewer grades and inverts were derived from sheet.
- A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating etc.

BOUNDARY INFORMATION COMPILED FROM PLANS 4R-19213,
4R-35573 AND 4R-36051.

Distances shown on this plan are ground distances and can be converted
to grid distances by multiplying by the combined scale factor of 0.999947.

Bearings are grid, derived from the easterly limit of Part 31 Plan 4R-19213
shown to be N19°57'30"E thereon, MTM Zone 9 (76°30' West Longitude)
NAD-83 (original).

Coordinates are derived from Can-Net 2016 Real Time Network GPS
observations referenced to Specified Control Points 01919680105 and
01918434761, MTM Zone 9 (76°30' West Longitude) NAD-83 (original).

Coordinate values are to urban accuracy in accordance with O. Reg. 216/10.

.01919680105 Northing 5024915.16 Easting 373971.65
.019198434761 Northing 5036178.12 Easting 372436.11

Caution: Coordinates cannot, in themselves, be used to re-establish corners
or boundaries shown on this plan.

ELEVATION NOTES

1. Elevations shown are geodetic and are referred to the CGVD28 geodetic datum and
are derived from the Vertical Control Monument 019680274 having an elevation of
66.322 metres.

2. It is the responsibility of the user of this information to verify that the job benchmark
has not been altered or disturbed and that its relative elevation and description
agrees with the information shown on this drawing.

UTILITY NOTES

1. This drawing cannot be accepted as acknowledging all of the utilities and it will
be the responsibility of the user to contact the respective utility authorities for
confirmation.
2. Only visible surface utilities were located.
3. A field location of underground plant by the pertinent utility authority is
mandatory before any work involving breaking ground, probing, excavating etc.

Caution
This is NOT a Plan of Survey and shall not be used
except for the purpose indicated in the title block.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Oct 31, 2023

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:Federal [CDRY](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks:Provincial [CFOT](#)

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:Private [CHM](#)

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Oct 31, 2023

Compressed Natural Gas Stations:Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2023

Inventory of Coal Gasification Plants and Coal Tar Sites:Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jan 2024

Certificates of Property Use:Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jan 31, 2024

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks:

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry:

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Jan 31, 2024

Environmental Registry:

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jan 31, 2024

Environmental Compliance Approval:

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jan 31, 2024

Environmental Effects Monitoring:

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Dec 31, 2023

Environmental Issues Inventory System:

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2022

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Oct 2023

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2021

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003***National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008***National Pollutant Release Inventory 1993-2020:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020**National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 29, 2024**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jan 31, 2024

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jan 31, 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI:

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jan 31, 2024

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial

[RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2024

Retail Fuel Storage Tanks:

Private

[RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Oct 31, 2023

Scott's Manufacturing Directory:

Private

[SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial

[SPL](#)

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Jan 2023; May 2023-Dec 2023

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jan 31, 2024**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990***Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Mar 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

DATABASE REPORT

Project Property:	<i>Ottawa Riverside Campus Alternate LFP Ottawa Riverside Campus Alternate Ottawa ON</i>
Project No:	<i>479008.02000</i>
Report Type:	<i>Quote - Custom-Build Your Own Report</i>
Order No:	<i>24050700242</i>
Requested by:	<i>Parsons Inc.</i>
Date Completed:	<i>June 5, 2024</i>

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: *Ottawa Riverside Campus Alternate LFP
Ottawa Riverside Campus Alternate Ottawa ON*

Project No: *479008.02000*

Order Information:

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:Federal [CDRY](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks:Provincial [CFOT](#)

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:Private [CHM](#)

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations:Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2023

Inventory of Coal Gasification Plants and Coal Tar Sites:Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Mar 2024

Certificates of Property Use:Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Mar 31, 2024

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks:

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry:

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Mar 31, 2024

Environmental Registry:

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Mar 31, 2024

Environmental Compliance Approval:

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Mar 31, 2024

Environmental Effects Monitoring:

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2024

Environmental Issues Inventory System:

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2022

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2024

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2021

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003***National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008***National Pollutant Release Inventory 1993-2020:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020**National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 29, 2024**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Mar 31, 2024

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Mar 31, 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI:

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Mar 31, 2024

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial

[RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Apr 2024

Retail Fuel Storage Tanks:

Private

[RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory:

Private

[SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial

[SPL](#)

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in Mar 2023-Dec 2023 and Jan 29, 2024-Feb 29, 2024 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Jan 2023; see description

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Mar 31, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH
Riverside
Ottawa, ON

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

115-140 of Billings Avenue
1985-2000 of Leslie Avenue
1915-2040 of Riverside Drive
100-135 of Rodney Crescent
60-105 of Sarah Billings Place

Search Notes:

While Transitway falls within the requested radius, it has no civic addresses available to report.

RE: CITY DIRECTORY RESEARCH
Ottawa Riverside Campus Alternate
Ottawa, ON

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

1895-1970 of Riverside Drive

Search Notes:

APPENDIX F

Aerial Photographs

YEAR: 1928

The majority of the Study Area land appears to be used for agricultural and residential uses, with two rail lines traversing the eastern portion. The Phase One property includes two residential buildings. Riverside Drive (west), Sarah Billings Place/Billings Avenue, Pleasant Park Road and Leslie Avenue (south) are visible.

YEAR: 1958

The Phase One Property appears mostly unchanged from the 1928 photo. The Study Area has increased residential development to the east and south, and the land adjacent to the Rideau River to the west has been cleared and levelled.

YEAR: 1965

The residential buildings on the Phase One property have been demolished and an access road has been built. In the Study Area the construction of the Riverside Hospital has begun to the north, to the northwest there is excavation on the property adjacent to the river, all other properties appear similar to the 1958 air photo.

YEAR: 1976

The Phase One property is undeveloped with some vegetation. To the north in the Study Area the Hospital is fully built, the lands to the east and south appear unchanged from the 1958 air photo and the land between Riverside Drive and the Rideau River is now fully landscaped.

YEAR: 1991

There appears to be a shallow excavation on the northern portion of the Phase One Property, and the pedestrian pathway connecting Billings Avenue with the parking lot is being constructed. The transitway connecting the rail corridor to the hospital that bisects the Phase One Property is being constructed and the rail corridor appears to be down to one rail from the previous two. The road that connects the parking lot to Riverside Drive directly to the north of the Phase One Property is complete. There is an excavation to the northwest between Riverside Drive and the Rideau River.

YEAR: 2002

The construction of the transitway and the pedestrian pathway has been completed. The Riverside Drive Property appears undisturbed. The property appears in its current configuration.

YEAR: 2011

The Phase One Property and the Study Area appear similar to the 2002 photo and in their present-day configuration.

YEAR: 2022

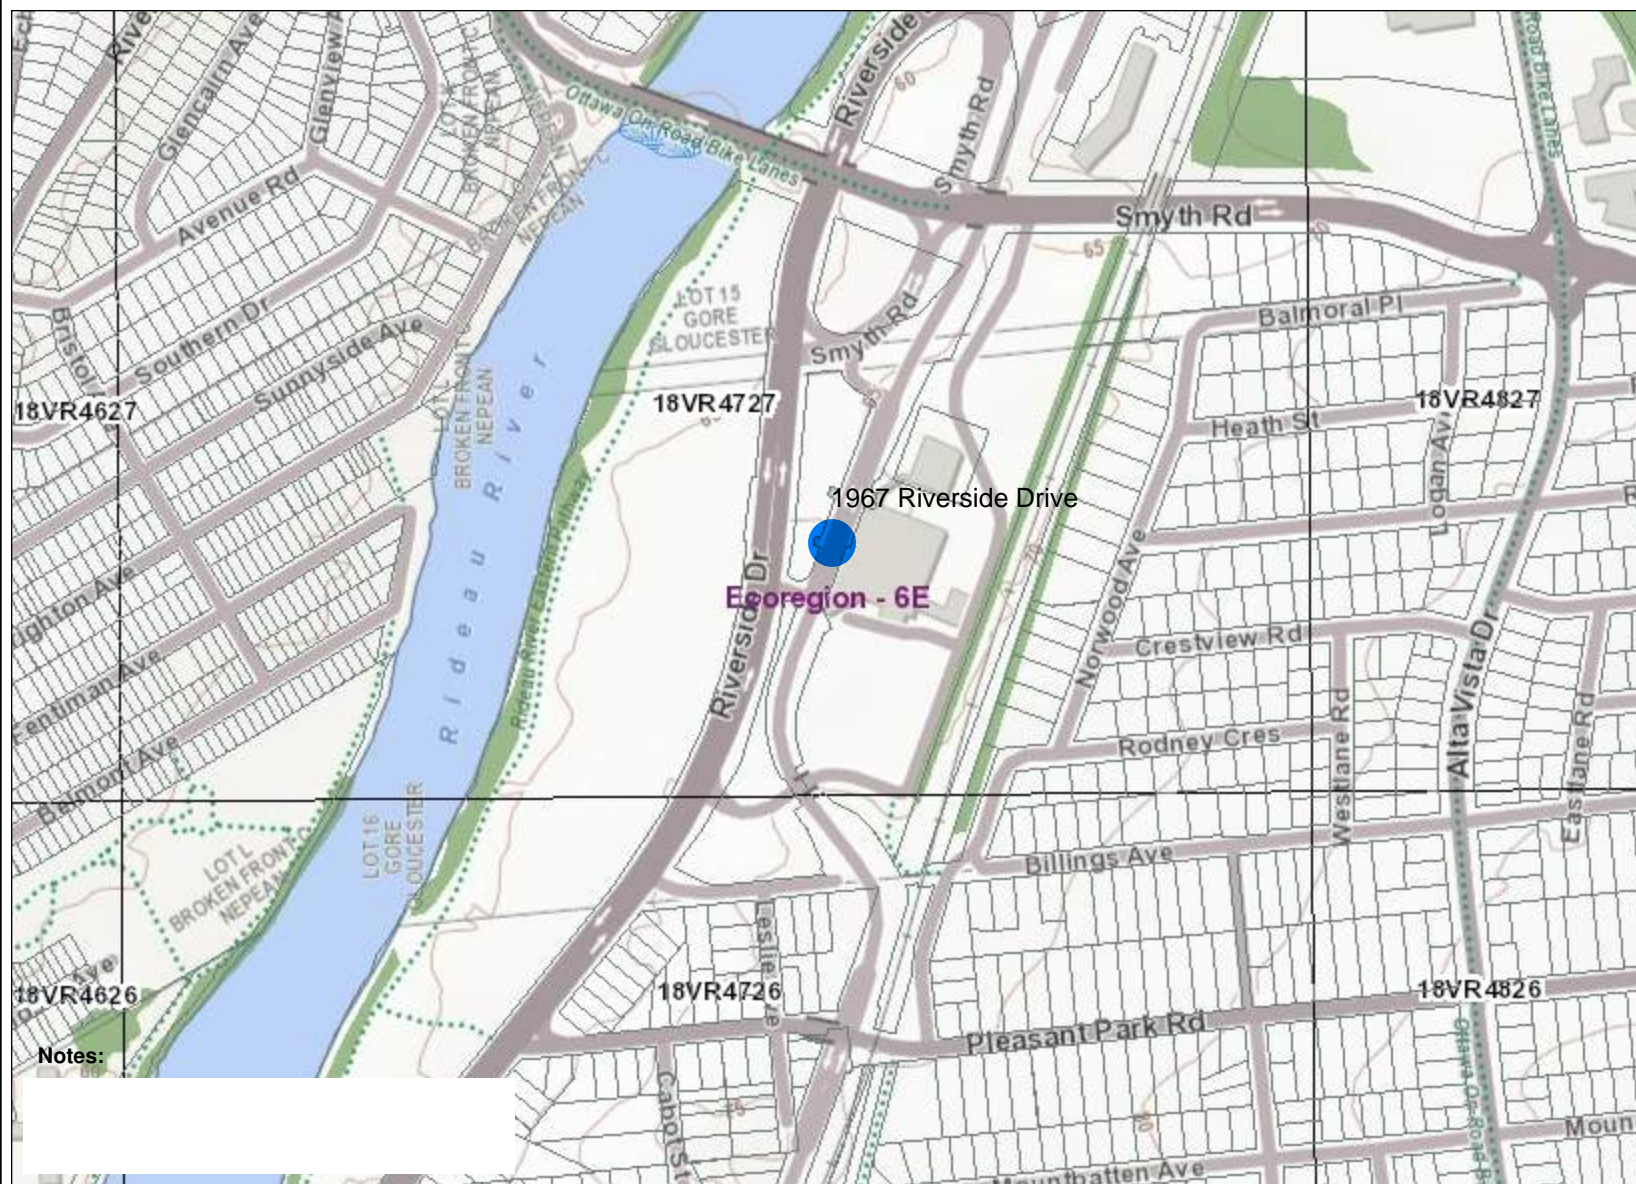

The Phase One Property and the Study Area appear similar to the 2011 photo.
