

# Zoning Confirmation Report

## 8201 Campeau Drive, Ottawa

October 6, 2025

### Introduction

Fotenn was retained by 8201 Campeau Drive Inc. to prepare a Zoning Confirmation Report pertaining to the establishment of a mid-rise, mixed use development proposal in the Kanata Lakes neighbourhood of the City of Ottawa.

The proposed six-storey development incorporates a commercial tenancy which addresses Campeau Drive with substantial glazing as well as 342 dwelling units in a variety of typologies. The development is supported by an array of amenity opportunities in both communal and private formats, which exceed the minimum required. A parkland dedication of 15% of the overall development area is being proposed to the east of the building. Underground parking is proposed for the tenants, with a small proportion of surface parking located behind the building for visitor spaces and convenience pick up/drop off. The proposed building would be accessed by vehicles using the shared private access driveway to the west of the lands, referred to here as “Taggart Road”.

The commercial and residential uses at-grade are intended to provide an active public realm and are supported by tree planting and landscaping. The building is articulated by the use of punch-balconies and a diversity in materiality which provides visual relief. The building provides a strong, uninterrupted frontage along Campeau Drive. All “back of house” elements are screened behind the building. Further discussion of the design elements and treatment are provided within the enclosed Urban Design Brief, prepared by Arcadis.

The following tables serve to demonstrate that the proposed development is largely zoning compliant, notwithstanding the noted non-compliance related to resident vehicle parking. The noted deficiency is intended to be addressed prior to Site Plan Approval.
