- Appendix B – Turning Movement Count Data
- Appendix C – Synchro Intersection Worksheets – Existing Conditions
- Appendix D – Collision Data

1 Screening

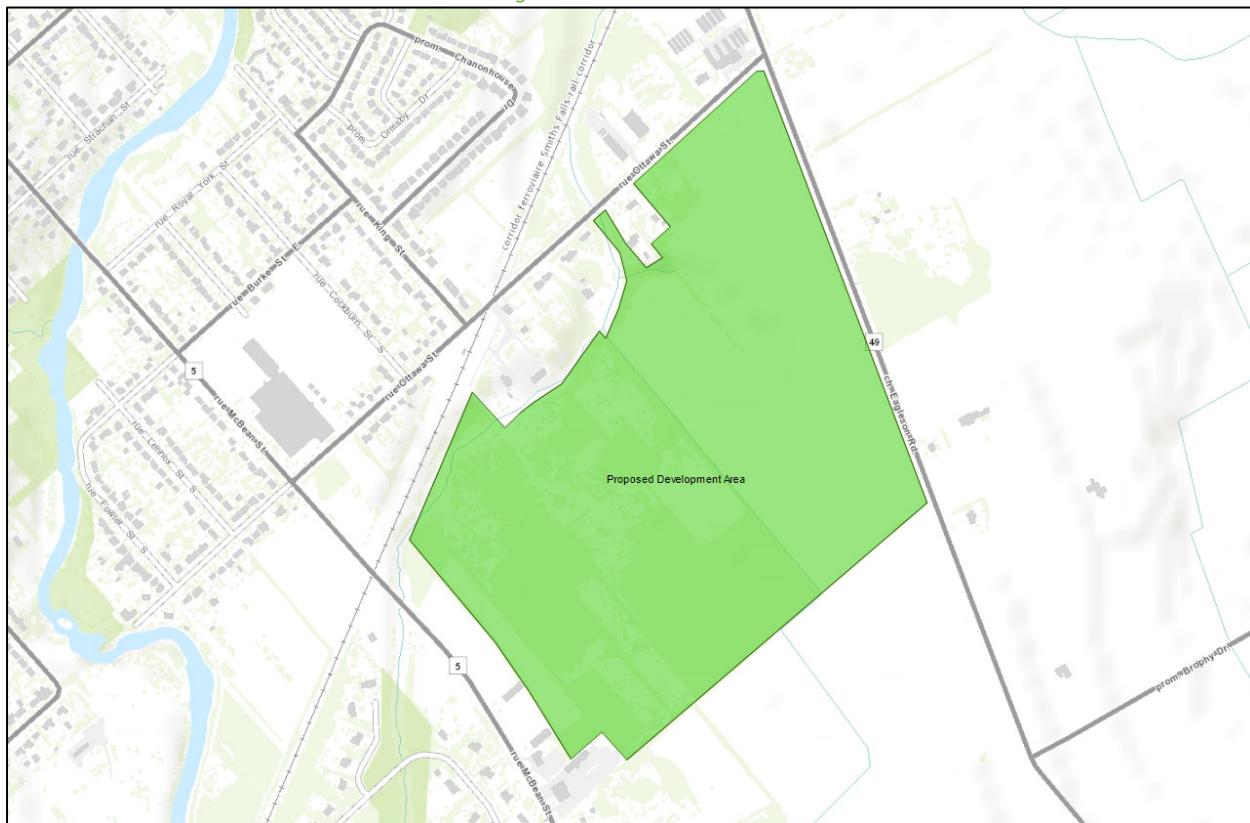

This study has been prepared according to the City of Ottawa's 2017 Transportation Impact Assessment (TIA) Guidelines. Accordingly, a Step 1 Screening Form has been prepared and is included as Appendix A, along with the Certification Form for the TIA Study PM. As shown in the Screening Form, the trip generation, location, and safety triggers were met, and a TIA is required. This is a Zoning By-law Amendment and Plan of Subdivision application.

2 Existing and Planned Conditions

2.1 Proposed Development

The proposed site is located at 6038 Ottawa St, currently zoned as Rural General Industrial Zone 3 (RG3), is planned to include a total of 1,129 homes, split between 504 single family homes, 106 semi-detached homes, and 519 townhomes. The existing site is farm fields. The anticipated full build-out and occupancy horizon is 2032. The site is within the Village of Richmond Community Design Plan Area. Figure 1 illustrates the Study Area Context. Figure 2 illustrates the proposed concept plan.

2.2 Existing Conditions

2.2.1 Area Road Network

Eagleson Road: Eagleson Road is a City of Ottawa arterial road with a two-lane rural cross-section with gravel shoulders and a posted speed limit of 80 km/h. The measured right-of-way is 26.0 to 27.0 metres. Eagleson Road is a truck route north of Brophy Drive.

McBean Street: McBean Street is a City of Ottawa arterial road with a two-lane rural cross-section with paved shoulders north of the rail tracks and gravel shoulders to the south. The posted speed limit is 50 km/h north of the rail tracks and 70 km/h to the south. The City protected right-of-way is 23.0 metres north of Ottawa Street and the measured right-of-way is 26.0-30.0 metres south of Ottawa Street. McBean Street is a truck route.

Brophy Drive: Brophy Drive is a City of Ottawa arterial road with a two-lane rural cross-section with gravel shoulders and a posted speed limit of 80 km/h. The measured right-of-way is 40.0 metres. Brophy Drive is a truck route.

Ottawa Street: Ottawa Street is a City of Ottawa collector road with a two-lane rural cross-section with gravel shoulders and a posted speed limit of 50 km/h. The measured right-of-way is 20.0 metres to the west of the rail tracks and 26.0 metres to the east.

King Street: King Street is a City of Ottawa collector road with a two-lane rural cross-section with gravel shoulders and an unposted speed limit of 50km/h. The measured right-of-way is 20.0 metres.

Cockburn Street: Cockburn Street is a City of Ottawa local road with a two-lane rural cross-section with gravel shoulders and an unposted speed limit of 50km/h. The measured right-of-way is 20.0 metres.

Richland Drive: Richland Drive is a City of Ottawa local road with a two-lane rural cross-section with no shoulders and an unposted speed limit of 50km/h. The measured right-of-way is 22.0 metres.

2.2.2 Existing Intersections

The existing area intersections adjacent to the proposed site and additional signalized intersections within 1,000 metres of the site have been summarized below:

Eagleson Road & Ottawa Street

The intersection of Eagleson Road and Ottawa Street is an unsignalized intersection with stop-control on Ottawa Street. The northbound approach consists of a shared left-turn/through lane, the southbound approach consists of a shared through/right-turn lane, and the eastbound approach consists of a shared left-turn/right-turn lane. No turn restrictions are noted.

Eagleson Road & Brophy Drive

The intersection of Eagleson Road and Brophy Drive is an all-way stop-controlled intersection. The northbound approach consists of a shared through/right-turn lane, the southbound approach consists of a shared left-turn/through lane, and the westbound approach consists of a shared left-turn/right-turn lane. No turn restrictions are noted.

McBean Street & Ottawa Street

The intersection of McBean Street and Ottawa Street is an unsignalized intersection with stop control on Ottawa Street. All approaches consist of shared all-movement lanes. No turn restrictions are noted.

2.2.3 Existing Driveways

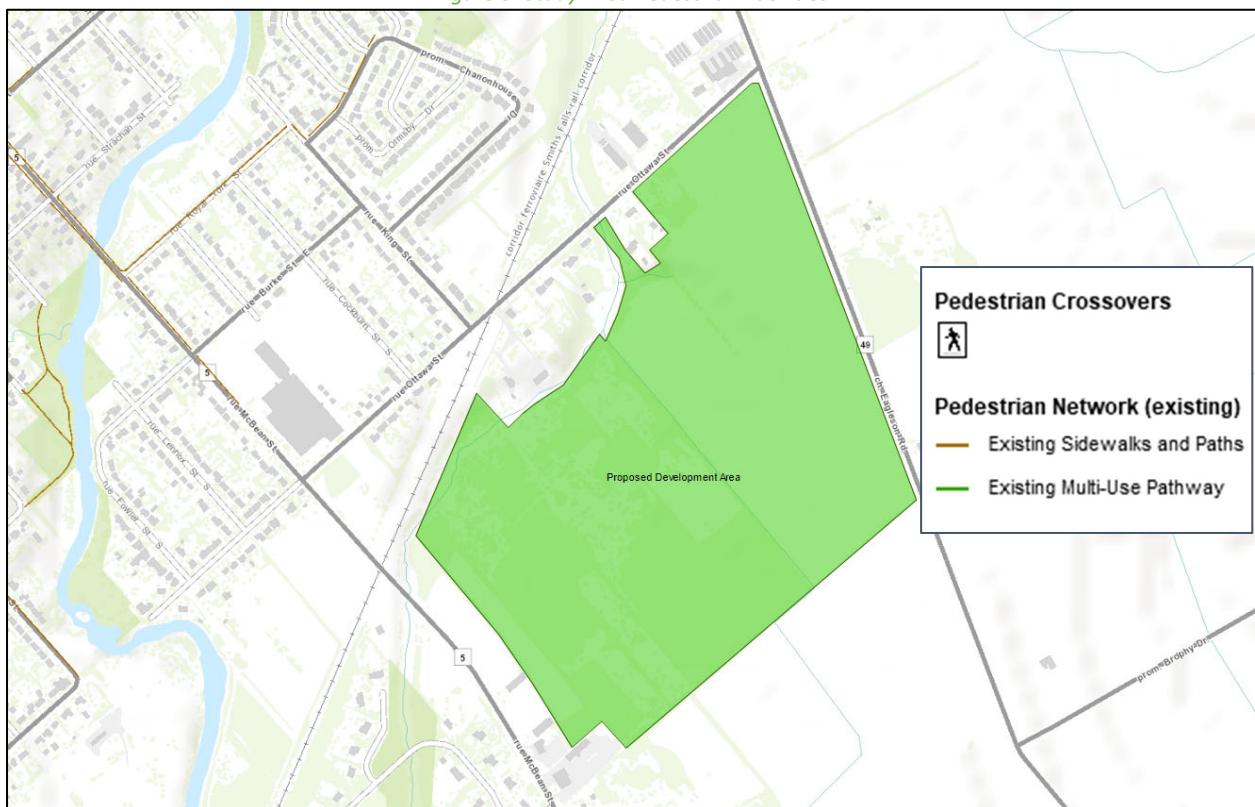

Within 200 metres of the proposed site, private accesses are located on both sides of Eagleson Road, McBean Street and Ottawa Street.

2.2.4 Cycling and Pedestrian Facilities

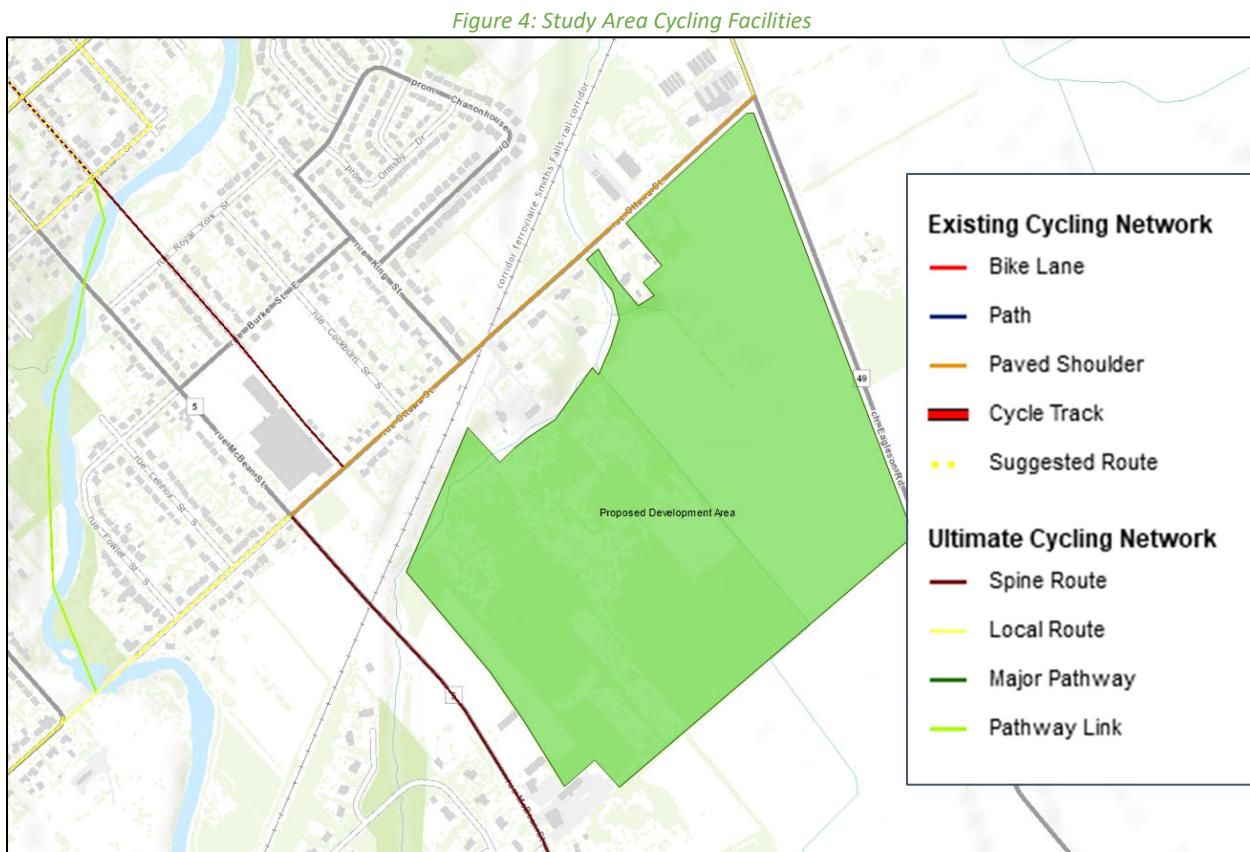

Figure 3 illustrates the pedestrian facilities in the study area and Figure 4 illustrates the cycling facilities.

Sidewalks are provided along the east side of McBean Street to the north of the South Carleton High School and on a few local streets to the north of the study area. Ottawa Street provides paved shoulders between McBean Street and Eagleson Road and is a suggested bike route to the west of McBean Street. Eagleson Road and Ottawa Street are planned local routes, and Colonel Murray Street north of Ottawa Street and McBean Street south of Ottawa Street are spine cycling routes.

Figure 3: Study Area Pedestrian Facilities

Source: <http://maps.ottawa.ca/geoOttawa/> Accessed: November 4, 2019

Source: <http://maps.ottawa.ca/geoOttawa/> Accessed: November 4, 2019

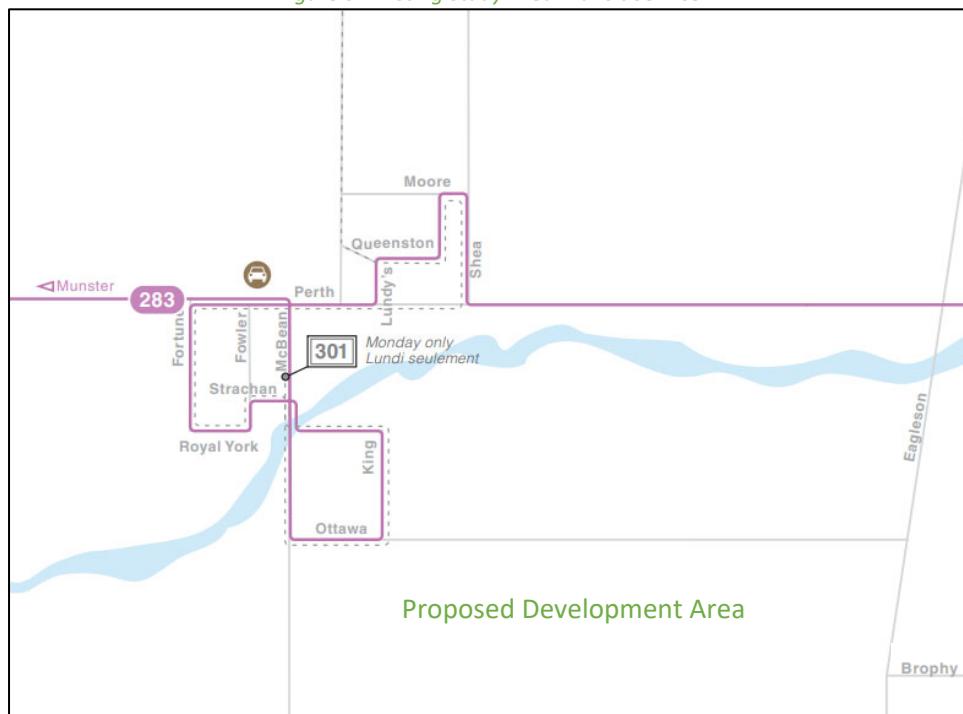

2.2.5 Existing Transit

Within the study area, the routes #283 and #301 travel along McBean Street, Ottawa Street and King Street. Stops are located on Ottawa Street at McBean Street and Cockburn Street and on King Street at Burke Street and Royal York Street. The frequency of these routes within proximity of the proposed site currently are:

- Route #283 – 30-minute service during the peak hours, with a total of four trips during each of the AM peak and PM peak to the area
- Route #301 – Monday only service, with a single AM trip starting at 8:50 AM, and a single returning trip ending at 3:40 PM

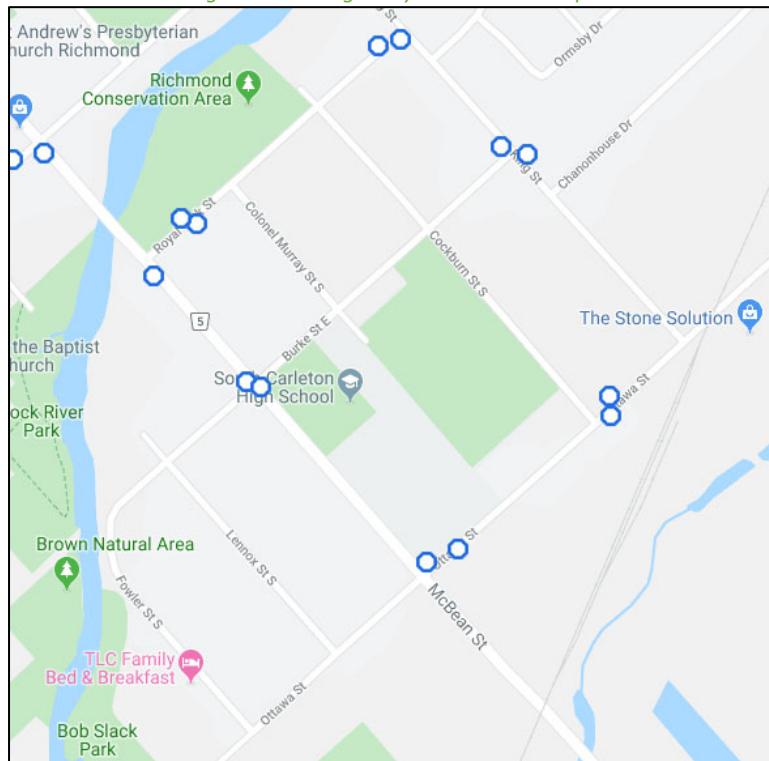

Figure 5 illustrates the transit system map in the study area and Figure 6 illustrates nearby transit stops.

Figure 5: Existing Study Area Transit Service

Source: <http://www.octranspo.com/> Accessed: November 4, 2019

Figure 6: Existing Study Area Transit Stops

Source: <http://www.octranspo.com/> Accessed: November 4, 2019

2.2.6 Existing Area Traffic Management Measures

No traffic calming measures are noted in the study area. McBean Street and Ottawa Street are signed school zones in the vicinity of the South Carleton High School.

2.2.7 Existing Peak Hour Travel Demand

Existing turning movement counts were acquired from The Traffic Specialist for the existing Study Area intersection. Table 1 summarizes the intersection count dates and sources.

Table 1: Intersection Count Date

| Intersection | Count Date | Source |
|-------------------------------|---------------------------|------------------------|
| Eagleson Road & Ottawa Street | Thursday October 11, 2018 | The Traffic Specialist |
| Eagleson Road & Brophy Drive | Thursday October 11, 2018 | The Traffic Specialist |
| McBean Street & Ottawa Street | Thursday October 11, 2018 | The Traffic Specialist |

Figure 7 illustrates the existing traffic counts and Table 2 summarizes the existing intersection operations. The level of service is based on the HCM criteria for average delay at unsignalized intersections. Detailed turning movement count data is included in Appendix B and the Synchro worksheets are provided in Appendix C.

Figure 7: Existing Traffic Counts

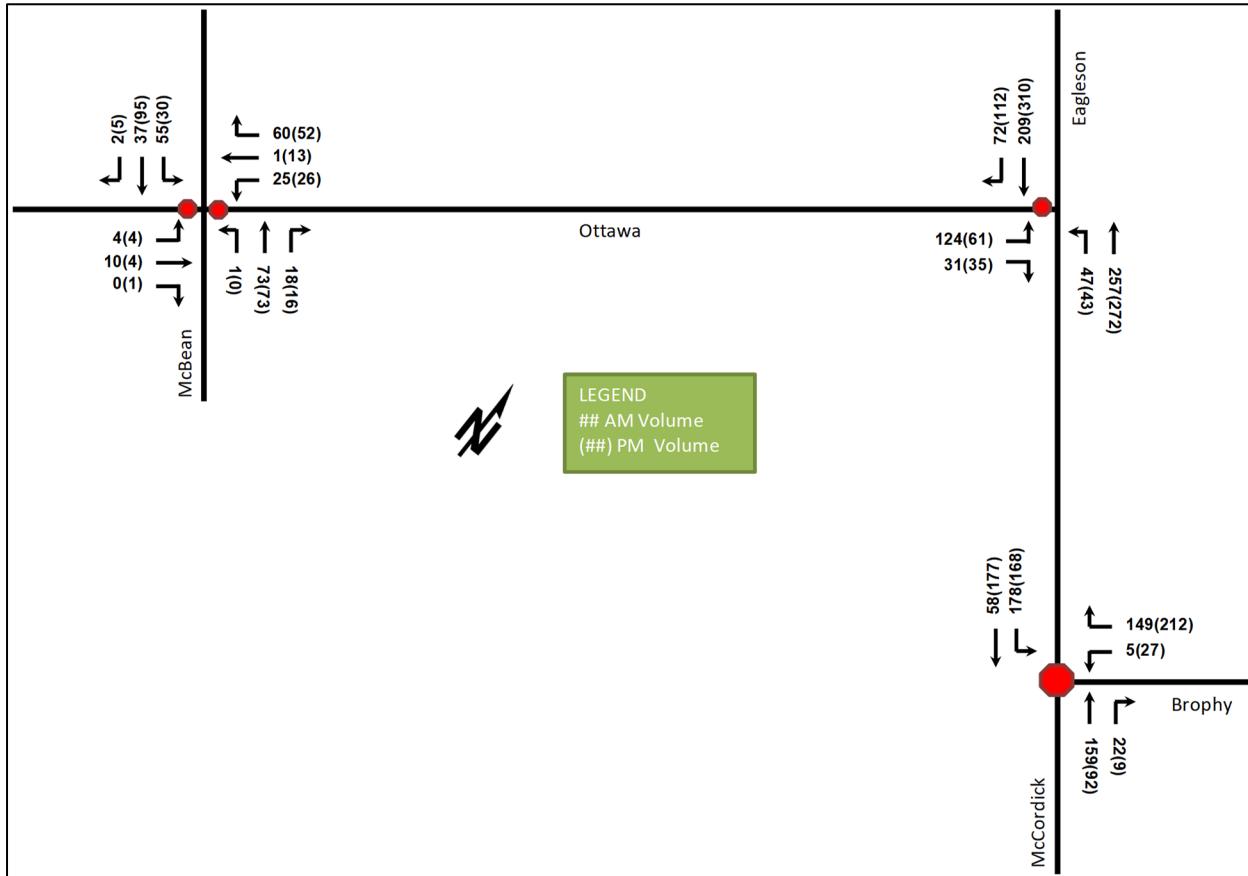

Table 2: Existing Intersection Operations

| Intersection | Lane | AM Peak Hour | | | | PM Peak Hour | | | |
|--|----------------|--------------|------|------------|-----------------------|--------------|------|-------------|-----------------------|
| | | LOS | V/C | Delay | Q (95 th) | LOS | V/C | Delay | Q (95 th) |
| Eagleson Road & Ottawa Street <i>Unsignalized</i> | NB | A | 0.04 | 1.2 | 0.8 | A | 0.04 | 1.2 | 0.8 |
| | SB | - | - | - | - | - | - | - | - |
| | EB | C | 0.38 | 18.0 | 13.5 | C | 0.26 | 17.1 | 7.5 |
| | Overall | A | - | 4.3 | - | A | - | 2.4 | - |
| Eagleson Road & Brophy Drive <i>Unsignalized</i> | NB | A | 0.24 | 8.5 | 6.8 | A | 0.16 | 9.0 | 3.8 |
| | SB | A | 0.32 | 9.3 | 9.8 | B | 0.51 | 12.8 | 21.8 |
| | WB | A | 0.05 | 7.7 | 0.8 | A | 0.34 | 10.0 | 11.5 |
| | Overall | A | - | 8.9 | - | B | - | 11.3 | - |
| McBean Street & Ottawa Street <i>Unsignalized</i> | NB | A | 0.00 | 0.1 | 0.0 | A | 0.00 | 0.0 | 0.0 |
| | SB | A | 0.04 | 4.4 | 0.8 | B | 0.02 | 10.8 | 0.8 |
| | EB | B | 0.03 | 11.1 | 0.8 | A | 0.02 | 1.7 | 0.0 |
| | WB | A | 0.11 | 9.8 | 3.0 | B | 0.13 | 10.1 | 3.0 |
| | Overall | A | - | 5.0 | - | A | - | 3.9 | - |

Notes: Saturation flow rate of 1800 veh/h/lane
PHF = 0.90

The existing intersection operations operate well during the peak hours.

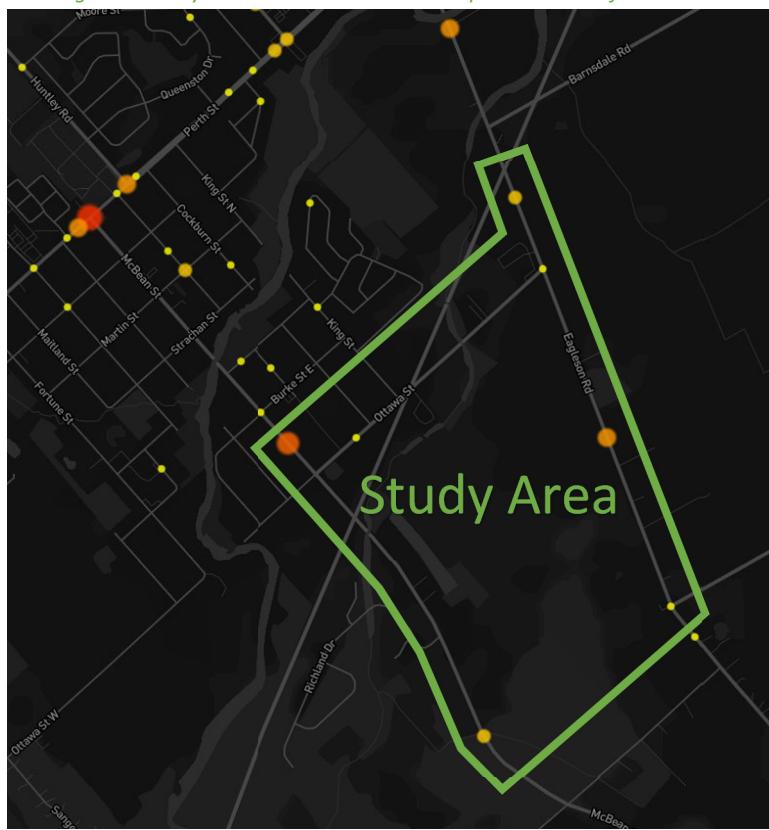

2.2.8 Collision Analysis

Collision data have been acquired from the City of Ottawa open data website (data.ottawa.ca) for five years prior to the commencement of this TIA for the surrounding study area road network. Table 3 summarizes the collisions types and conditions in the study area, Figure 8 illustrates the intersections and segments analyzed, and Table 4 summarizes the total collisions for each of these locations. Collision data are included in Appendix D.

Table 3: Study Area Collision Summary, 2014-2017

| | | Number | % |
|----------------------------|-----------------------------|-----------|-------------|
| Total Collisions | | 24 | 100% |
| Classification | Fatality | 0 | 0% |
| | Non-Fatal Injury | 8 | 33% |
| | Property Damage Only | 16 | 67% |
| Initial Impact Type | Approaching | 1 | 4% |
| | Angled | 2 | 8% |
| | Rear end | 1 | 4% |
| | Sideswipe | 3 | 13% |
| | Turning Movement | 3 | 13% |
| | SMV Unattended | 1 | 4% |
| | SMV Other | 13 | 54% |
| Road Surface Condition | Dry | 19 | 79% |
| | Wet | 2 | 8% |
| | Packed Snow | 1 | 4% |
| | Ice | 2 | 8% |
| Pedestrian Involved | | 1 | 4% |
| Cyclists Involved | | 0 | 0% |

Figure 8: Study Area Collision Records – Representation of 2014-2016

Source: <https://maps.bikeottawa.ca/collisions/> Accessed: November 4, 2019

Table 4: Summary of Collision Locations, 2014-2018

| Intersections / Segments | Number | % |
|--|--------|-----|
| Eagleson Rd @ Ottawa St | 1 | 4% |
| Eagleson Rd/Mccordick Rd @ Brophy Dr | 3 | 13% |
| Mcbean St @ Ottawa St | 3 | 13% |
| Eagleson Rd btwn Barnsdale Rd & Ottawa St | 3 | 13% |
| Eagleson Rd btwn Ottawa St & Brophy Dr | 5 | 21% |
| Mcbean St btwn Burke St & Ottawa St | 4 | 17% |
| Mcbean St btwn Richland Dr & Dobson Lane | 3 | 13% |
| Ottawa St btwn Colonel Murray St & Cockburn St | 1 | 4% |
| Ottawa St btwn King St & Eagleson Rd | 1 | 4% |

Within the study area, no locations are noted to have elevated collision amounts. It is noted that single motor vehicle other is the most common accounting for over half (13 of 24) of the collision in the last 5 years. These collisions have predominantly been during the day (9 of 13), in dry conditions (11 of 13) and on clear days (12 of 13). The majority have of collisions occurred along Eagleson Road between Barnsdale Road and Brophy Drive (7 of 13) but it is unknown if speed, animals or other non-geometric factors contributed to these collisions.

2.3 Planned Conditions

2.3.1 Changes to the Area Transportation Network

No roadway improvements are included within the Ottawa TMP for the Study Area road network. The Village of Richmond CDP identifies a collector road between McBean Street and Eagleson Road, a gateway feature to the

southeast corner of the development lands on Eagleson Road, and local road connections to Ottawa Street and Eagleson Road. The collector road is noted to be a rural collector with a sidewalk on a single side. McBean Street is classified as a rural arterial with a sidewalk on a single side, transitioning to a village arterial north of the rail tracks to include an urban cross-section, sidewalks on both sides, on-street parking during the off-peak hours and trees in the boulevards. Eagleson Road remains as the existing rural arterial.

2.3.2 Other Study Area Developments

3785 McBean Street

The development includes nine self storage buildings for a total of 3,700 sq. m., six parking spaces and one loading space. Two accesses will be provided along McBean Street and a stormwater pond will be constructed on site. No TIA is available for the site.

5511 McCordick Road

The proposed zoning by-law amendment applies to the retained farmland associated with surplus farm dwelling severance, with intent of prohibiting residential uses. No TIA is available for the site.

2780 Eagleson Road

The development is an extension of Cardel Homes Creekside and is proposed to include 422 single-family dwellings. Two accesses to Eagleson Road are proposed north of Richmond Road. The TIA is in process but has not progressed to a point that confirms the trip generation.

3 Study Area and Time Periods

3.1 Study Area

The study area will include the following intersections:

- Eagleson Road at Ottawa Street
- Eagleson Road at Brophy Drive
- McBean Street at Ottawa Street
- Eagleson Road at New Collector
- Eagleson Road at New Local Road
- McBean Street at New Collector

The boundary roads are Eagleson Road and McBean Street. No screenlines are present near the proposed site and none will be reviewed as part of this study.

3.2 Time Periods

The AM and PM peak hours will be examined for the proposed development.

3.3 Horizon Years

The anticipated build-out year is 2032. As a result, the full build-out plus five years horizon year is 2037.

4 Exemption Review

Table 5 summarizes the exemptions for this TIA.

Table 5: Exemption Review

| Module | Element | Explanation | Exempt/Required |
|---|-------------------------------|--|-----------------|
| Design Review Component | | | |
| 4.1 Development Design | 4.1.2 Circulation and Access | Only required for site plans | Exempt |
| | 4.2.3 New Street Networks | Only required for plans of subdivision | Required |
| 4.2 Parking | 4.2.1 Parking Supply | Only required for site plans | Exempt |
| | 4.2.2 Spillover Parking | Only required for site plans where parking supply is 15% below unconstrained demand | Exempt |
| Network Impact Component | | | |
| 4.5 Transportation Demand Management | All Elements | Not required for site plans expected to have fewer than 60 employees and/or students on location at any given time | Required |
| 4.6 Neighbourhood Traffic Management | 4.6.1 Adjacent Neighbourhoods | Only required when the development relies on local or collector streets for access and total volumes exceed ATM capacity thresholds | Exempt |
| 4.8 Network Concept | | Only required when proposed development generates more than 200 person-trips during the peak hour in excess of equivalent volume permitted by established zoning | Exempt |

5 Next Steps

Following the circulation and review of this Scoping Report, any outstanding comments will be addressed within the context of the plan of subdivision submission and the Forecasting Report. Following the completion of the remaining TIA Steps and sign-off has been received from City Transportation Project Manager, a signed and stamped final report will be provided to City staff.

Appendix A

TIA Screening Form and PM Certification Form

City of Ottawa 2017 TIA Guidelines
Step 1 - Screening Form

Date: Nov. 4, 2019
Project Number: 2018-03
Project Reference: Richmond - 6038 Ottawa St

| 1.1 Description of Proposed Development | |
|---|--|
| Municipal Address | 6038 Ottawa Street |
| Description of Location | PLAN D24 PT UNIT 19 RP;4R-3057 PART 1 |
| Land Use Classification | Residential |
| Development Size | 903 single family homes, 260 townhomes |
| Accesses | Collector road connection to McBean and Eagleson, Local road connection to Eagleson |
| Phase of Development | Estimated 100 units per year |
| Buildout Year | 2032 |
| TIA Requirement | Full TIA Required |

| 1.2 Trip Generation Trigger | | |
|-----------------------------|---------------------|-------|
| Land Use Type | Single-family homes | |
| Development Size | 903 | Units |
| Trip Generation Trigger | Yes | |

| 1.3 Location Triggers | |
|--|-----|
| Does the development propose a new driveway to a boundary street that is designated as part of the City's Transit Priority, Rapid Transit or Spine | Yes |
| Bicycle Networks? | |
| Is the development in a Design Priority Area (DPA) or Transit-oriented Development (TOD) zone? | No |
| Location Trigger | Yes |

| 1.4. Safety Triggers | |
|---|-----|
| Are posted speed limits on a boundary street 80 km/hr or greater? | Yes |
| Are there any horizontal/vertical curvatures on a boundary street limits sight lines at a proposed driveway? | No |
| Is the proposed driveway within the area of influence of an adjacent traffic signal or roundabout (i.e. within 300 m of intersection in rural conditions, or within 150 m of intersection in urban/ suburban conditions)? | Yes |
| Is the proposed driveway within auxiliary lanes of an intersection? | No |
| Does the proposed driveway make use of an existing median break that serves an existing site? | No |
| Is there is a documented history of traffic operations or safety concerns on the boundary streets within 500 m of the development? | No |
| Does the development include a drive-thru facility? | No |
| Safety Trigger | Yes |

TIA Plan Reports

On 14 June 2017, the Council of the City of Ottawa adopted new Transportation Impact Assessment (TIA) Guidelines. In adopting the guidelines, Council established a requirement for those preparing and delivering transportation impact assessments and reports to sign a letter of certification.

Individuals submitting TIA reports will be responsible for all aspects of development-related transportation assessment and reporting, and undertaking such work, in accordance and compliance with the City of Ottawa's Official Plan, the Transportation Master Plan and the Transportation Impact Assessment (2017) Guidelines.

By submitting the attached TIA report (and any associated documents) and signing this document, the individual acknowledges that s/he meets the four criteria listed below.

CERTIFICATION

1. I have reviewed and have a sound understanding of the objectives, needs and requirements of the City of Ottawa's Official Plan, Transportation Master Plan and the Transportation Impact Assessment (2017) Guidelines;
2. I have a sound knowledge of industry standard practice with respect to the preparation of transportation impact assessment reports, including multi modal level of service review;
3. I have substantial experience (more than 5 years) in undertaking and delivering transportation impact studies (analysis, reporting and geometric design) with strong background knowledge in transportation planning, engineering or traffic operations; and
4. I am either a licensed¹ or registered² professional in good standing, whose field of expertise [check appropriate field(s)] is either transportation engineering or transportation planning .

^{1,2} License of registration body that oversees the profession is required to have a code of conduct and ethics guidelines that will ensure appropriate conduct and representation for transportation planning and/or transportation engineering works.

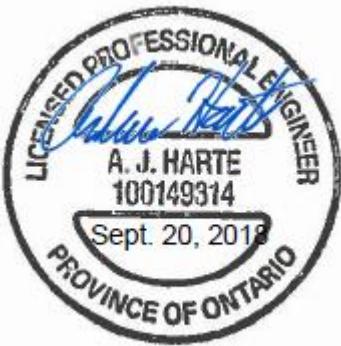

Dated at Ottawa this 20 day of September, 2018.
(City)

Comments Construction on McRae Street will alternate flow over Rock River bridge. Farneson Road is the designated detour route for heavy trucks.

נְאָמֵן

RESULTS.

1. Includes all vehicle types except bicycles and electric scooters.

2. Exclusion factors are not applied to turning movement counts if they are less than 8-hours in duration.

3. When expansion and ADT factors are applied, the results will differ slightly due to rounding.

Equivalent 12 & 24-hour Vehicle Volumes Including the Annual Average Daily Traffic (AADT) Factor

Applicable to the Day and Month of the Turning Movement Count

► Expansion factors are applied exclusively to standard weekday 8-hour turning movement counts

| Equ. 12 Hr | Highest Hourly Vehicle Volume by the 8-Hour Totals by the 8-Hour Expansion Factor of 1.39 | | | | | | | | | | | |
|---|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a |
| Avg. daily 12-hour vehicle volumes. These volumes are calculated by multiplying the 8-hour totals by the 8-Hour Expansion Factor of 1.39 | | | | | | | | | | | | |
| AADT 12-hr | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a |
| 24-hour AADT. These volumes are calculated by multiplying the average daily 12-hour vehicle volumes by the 12-Hour Expansion Factor of 1.31 | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a | n/a |

| AM Peak Hour Factor ► 0.86 | Highest Hourly Vehicle Volume between 0700h & 1000h | | | | | | | | | | | | | | | | | | | | | |

Comments

Construction on McBean Street with alternating flow over Jock River bridge. Eagleson Road is the designated detour route for heavy trucks.

Notes:

- Includes all vehicle types except bicycles and electric scooters.
- Expansion factors are not applied to turning movement counts if they are less than 8-hours in duration.
- When expansion and AADT factors are applied, the results will differ slightly due to rounding.
