## **EXECUTIVE SUMMARY**

### **Assessment**

Paterson Group was retained by 9287043 Canada Corporation to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the property situated to the east of the intersection of Green Jacket Crescent and Green Links Way, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

According to the historical research, the subject site was first partially developed with a small personal storage building. Constructed circa 2005 in the northwest portion of the site, apart from the personal storage building the property has never been formally developed. Since that time, the subject site has been used for personal agricultural purposes, as well as for the storage of the current owner’s building materials (primarily lumber). The remainder of the site has always been vacant land. The neighbouring lands in the vicinity of the subject site have historically been used for residential and agricultural purposes. No environmental concerns were identified with respect to the surrounding land use.

Following the historical review, a site inspection was conducted to assess the current environmental conditions of the subject site. Currently, the subject site is partially used as a personal garden with the storage structure used for the storage of primarily lumber. A camping trailer was present on site; however, it was not in use and was noted to be in good condition at the time of the site visit. The neighbouring lands in the vicinity of the subject site were generally observed to be used for residential and agricultural purposes, with a gold course situated to the north. No environmental concerns were identified with respect to the current use of the neighbouring properties.

### **Recommendations**

Based on the results of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment is not required for the subject site.**

## 1.0 INTRODUCTION

At the request of 9287043 Canada Corporation, Paterson Group (Paterson) conducted a Phase I – Environmental Site Assessment (Phase I ESA) for the property situated to the east of the intersection of Green Jacket Crescent and Green Links Way, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

Paterson was engaged to conduct this Phase I ESA by Mr. Daniel Payer of ARK Engineering acting in conjunction with 9287043 Canada Corporation. Mr. Payer can be reached by telephone at 613-858-6443.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared in general accordance with Ontario Regulation 153/04, as amended under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

## 2.0 PROPERTY INFORMATION

|   |  |
|---|--|
| Address:                                | No civic address is listed at this time.   |
| Legal Description:                      | Part of Lots 3 and 4, Concession 3, Township of Osgoode, in the City of Ottawa, Ontario.   |
| Property Identification Numbers (PINs): | 04318-0371, 04318-0439, 04318-0444, 04318-0445, 04318-0500, 04318-0800, 04318-1429   |
| Location:                               | The subject site is located north of Fox Valley Road and east of Green Links Way, approximately 200 m west of Stagecoach Road, in the City of Ottawa, Ontario. Refer to Figure 1 – Key Plan for the site location. |
| Latitude and Longitude:                 | 45° 15' 12" N, 75° 36' 08" W   |
| <b>Site Description:</b>                |  |
| Configuration:                          | Irregular  |
| Site Area:                              | 36.43 hectares (approximate)   |
| Zoning:                                 | DR1 – Development Reserve Zone   |
| Current Uses:                           | The subject site is primarily treed land with a small storage building in the northwest corner.  |
| Services:                               | The subject site is located in a privately serviced area, however, the site is not serviced.   |

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject property and, if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of Ontario Regulation 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01 (reaffirmed 2016);
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I ESA Study Area Determination**

A radius of approximately 250 m was determined to be appropriate as a Phase I ESA study area for this assignment. Properties located outside the 250 m radius are not considered to have impacted the subject site, based on their significant distance away from the site.

#### **First Developed Use Determination**

Based on a review of available historical information, the subject site has never been developed with the exception of a small personal storage building circa 2005, situated in the northwest portion of the site.

#### **Fire Insurance Plans**

Fire Insurance Plans (FIPs) are not available for the general area of the subject site.

#### **City of Ottawa Street Directories**

City of Ottawa Street Directory information is not available for the general area of the subject site.

### **4.2 Environmental Source Information**

#### **National Pollutant Release Inventory**

A search of the National Pollutant Release Inventory (NPRI) database did not identify any records of pollutant releases for the subject site or for any properties located within the Phase I study area.

#### **PCB Waste Storage Site Inventory**

A search of the national PCB waste storage site inventory did not identify any current or former PCB waste storage sites located within the Phase I study area.

#### **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry was conducted electronically, as part of this assessment, for the subject site and for properties located within the Phase I study area. No Records of Site Condition (RSCs) were filed for the subject property or any properties within the Phase I study area.

### **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment, Conservation and Parks document titled "*Municipal Coal Gasification Plant Site Inventory, 1991*" was reviewed to reference the locations of former plants with respect to the subject site. A review of this document did not identify any former coal gasification plants located on the subject site or within the Phase I study area.

### **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment and Climate Change document titled "*Waste Disposal Site Inventory in Ontario, 1991*" was reviewed as part of this assessment. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario. A review of this document did not identify any relevant records pertaining to the subject site or for properties located within the Phase I study area.

### **MECP Instruments**

A request was submitted to the MECP Freedom of Information office for information with respect to certificates of approval, permits to take water, certificates of property use, or any other similar MECP issued instruments for the subject site. The response indicated that no records were identified for the Phase I Property.

### **MECP Incident Reports**

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, or inspections maintained by the MECP for the subject site or neighbouring properties. The response indicated that no records were identified for the Phase I Property.

### **MECP Submissions**

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the subject site. The response indicated that no records were identified for the Phase I Property. A copy of the response

### **MECP Waste Management Records**

A request was submitted to the MECP Freedom of Information office for information with respect to waste management records for the subject site. The response indicated that no records were identified for the Phase I Property.

## **OMNRF Areas of Natural Significance**

A search for areas of natural significance and features within the Phase I study area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website. No natural features or areas of natural significance were identified on the subject site or within the Phase I study area.

## **Technical Standards and Safety Authority (TSSA)**

The TSSA, Fuels Safety Branch in Toronto, was contacted electronically, as part of this assessment, to inquire about current and former underground fuel storage tanks, spills, and historical incidents for the subject site and neighbouring properties. The response from the TSSA indicated that no records were identified pertaining to the subject site or any neighbouring properties. A copy of the correspondence with the TSSA is included in Appendix 2.

## **City of Ottawa Old Landfill Sites**

The document prepared by Golder Associates entitled “*Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa*”, was reviewed as part of this assessment. No former landfill sites were identified on the subject site or within the Phase I study area.

## **City of Ottawa Historical Land Use Inventory (HLUI) Database**

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City’s Historical Land Use Inventory (HLUI 2005) database for any environmental records pertaining to the subject site as well as any properties situated within the Phase I study area.

The response from the City indicated the no records were identified for the Phase I Property. The HLUI report identified two activities associated with properties within the Phase I Study Area. The first record is for 6544 Silver Maple Lane, located adjacent to the east of the Phase I Property. The record is for a roofing and sheet metal company and dated 2001, 1995-1998 and 2005, based on information obtained from aerial photographs, this property is considered to have been occupied a residential dwelling since c.1991. The second record is for 6298 Emerald Links Drive, approximately 220 m northwest of the Phase I Property was identified. The record is for a general construction company and dated 2001 and 2005, based on information obtained from aerial photographs, this property is considered to have been occupied a residential dwelling since c.1991. These records do not represent an environmental concern to the Phase I Property. A copy of the response has been included in Appendix 2.

## **Environmental Risk Information Service (ERIS) Report**

A database report prepared by ERIS (Environmental Risk Information Services) for the Phase I property and surrounding lands was acquired and reviewed as part of this assessment. It should be noted that the ERIS report includes information that would normally be obtained through the MECP FOI, a TSSA search, MECP well records search, as well as several other records (i.e. incident reports, waste generators, etc.). The complete ERIS report has been included in Appendix 2.

The ERIS report identified five (5) records that pertain to the subject site and 139 records that pertain to properties within the Phase I study area. It should be noted that the majority (132) of these records are Water Well Information System Records.

The five (5) records identified on the subject site all pertain to water well records in the northeast portion of the site. All five (5) well records were for domestic water supply wells installed between 1974 and 1976, it is our opinion that these wells are likely mislocated and do not exist on the subject site as recorded (potential used by property to the northeast). Based on the age of the wells and the installation of municipal water infrastructure since their construction in the area, most are not expected to be in current use.

One (1) Ontario spill and one (1) pipeline incident record were identified for the same off-site property within the Phase I study area. The records refer to a natural gas leak that occurred approximately 180 m north of the subject site at 6542 Golden Ash Lane. Due to the nature of the incident as well as the separation distance from the subject site, it is not considered to pose an environmental risk to the subject site.

The remaining offsite records pertain to well records and a mineral occurrence. According to the well records, the overburden stratigraphy in the general area of the subject site consists of sand and/or sandy clay underlain by dense hardpan with gravel and boulders. Bedrock, consisting of limestone and/or sandstone, was typically encountered at an average depth of approximately 5 m below ground surface. The presence of these off-site well records is not considered to pose an environmental risk to the subject site.

### **4.3 Physical Setting Sources**

#### **Aerial Photographs**

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals, commencing with the earliest available photograph. Based on the review, the following observations have been made:

- 1945 *(Poor Quality)* The subject site and surrounding properties appear to be vacant or used agricultural land. Stagecoach Road is present approximately 210 m east of the subject site.
- 1976 *(City of Ottawa Website)* A dirt road appears to cut through the subject site from the east property boundary to the central portion of the site, other than this dirt road, no other significant changes are apparent with respect to the subject site. Several residential dwellings have been developed east of the subject site.
- 1991 *(City of Ottawa Website)* No significant changes are apparent with respect to the subject site. Further residential development has occurred southeast of the subject site.
- 1999 *(City of Ottawa Website)* No significant changes are apparent with respect to the subject site. Further residential development has occurred south of the subject site.
- 2005 *(City of Ottawa Website)* A small structure has been developed along the westernmost property boundary towards the north of the subject site. Significant residential development has occurred south of the subject site. A golf course has been developed adjacent to the north of the subject site.
- 2011 *(City of Ottawa Website)* No significant changes are apparent with respect to the subject site or the surrounding lands.
- 2019 *(City of Ottawa Website)* A clearing of trees has been made near the building along the westernmost property boundary towards the north end of the subject site. No significant changes are apparent with respect to the surrounding lands.

Copies of selected aerial photographs reviewed are included in Appendix 1.

### **Water Bodies and Areas of Natural Significance**

A small man-made storage pond is present in the northwest corner of the property. The nearest named water body with respect to the subject site is the Rideau River, located approximately 5.7 km to the west.

The Ministry of Natural Resources and Forestry's website was reviewed for the presence of Areas of Natural Significance (ANSI) in the Phase I study area. No Areas of Natural Significance were identified on the Phase I property or within the study area.

## **Topographic Maps**

Topographic information for the subject site was obtained from the Natural Resources Canada – The Atlas of Canada website. The topographic maps indicate that the elevation of the subject site is approximately 100 m above sea level. The regional topography in the general area of the subject site is relatively flat. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

## **Physiographic Maps**

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website, as a part of this assessment. According to the publication and mapping information, the subject site is situated within the St. Lawrence Lowlands. According to the description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.” The subject site is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

## **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the available mapping information, the bedrock within the area of the subject site consists of dolomite of the Oxford Formation, whereas the surficial geology generally consists of nearshore marine sediments (beach formations and reworked glaciofluvial sand deposits) as well as till, with an overburden thickness ranging from 1 m to 5 m.

## **MECP Water Well Records**

A search of the MECPs website for all drilled well records within 250 m of the subject site was conducted as part of this assessment. The search identified 144 well records within the Phase I study area. The records pertain to wells installed between 1963 and 2018 and used for domestic household water supply or groundwater observation purposes.

According to the well records, the overburden stratigraphy in the general area of the subject site consists of sand and/or sandy clay underlain by dense hardpan with gravel and boulders. Bedrock, consisting of limestone and/or sandstone, was typically encountered at an average depth of approximately 5 m below ground surface. Copies of the aforementioned well records have been included in Appendix 2.

## **5.0 SITE RECONNAISSANCE**

### **5.1 General Requirements**

The site inspection was conducted on November 27, 2020 and December 1, 2020. Mr. Jeremy Camposarcone, from the Environmental Department of Paterson Group, conducted the site inspections. In addition to the subject site, the uses of neighbouring properties within the Phase I study area were also assessed at the time of the site inspection.

### **5.2 Personal Interviews**

Mr. Joe Zappia, the current property owner, was available at the time of the site inspection to respond to questioning. According to Mr. Zappia, the property has never been formally developed with a residential or commercial building. Mr. Zappia stated that in the mid 2000's he began to clear some of the trees in the northwest portion of the site, shortly thereafter a small storage building was constructed and has been used for storage of building materials used by Mr. Zappia (primarily lumber). Mr. Zappia stated that the remaining area that had been cleared of the trees in the northwest corner, has been used as a personal garden since the mid 2010's. Mr. Zappia stated that he was unaware of any environmental reports or potential environmental concerns associated with the subject site.

### **5.3 Site Inspection Observations**

#### **Site Description**

The northwest corner of the subject site has been cleared of trees and consists of a storage building, camping trailer, fishing boat, large garden and several areas of piled materials. The camping trailer and fishing boat were noted to be in good condition at the time of the site visit with no signs of leaking or staining in the surrounding area. The camping trailer was not in use and was strictly being stored on site, access to the interior of the motor home was not made available. The various materials stored throughout the cleared area of the property consist of a piles of mulch, topsoil, manure, cut trees, stone, lumber, etc. A man-made storage pond is present in the northwest corner of the subject site, as it is primarily used by the current property owner for the garden.

The remainder of the property surrounding the cleared area in the northwest portion of the site consists of mature trees to the south, east and further north.

The site and regional topography are relatively flat. Water drainage on the subject site occurs via infiltration throughout the property. **The ground was not snow covered during the site visit conducted on December 1, 2020.**

A depiction of the subject site is presented on Drawing PE5114-1 – Site Plan, in the Figures section of this report.

### **Existing Buildings**

The subject site is currently occupied with a small storage building.

The storage structure is a one (1) storey, wood-framed building, constructed with a slab-on-grade concrete foundation. Constructed in the mid 2000's, the storage structure is finished on the exterior with stucco as well as a sloped shingled roof. The structure is used for the storage of primarily lumber and gardening equipment, as well as a minimal amount of tools and cleaning products. The structure has no source of heat, water or electrical power.

### **Underground Utilities**

The subject site has no underground utilities.

### **Potential Environmental Concerns**

#### **Fuels and Chemical Storage**

A plastic tote, with a capacity of 1,000 L, was observed adjacent to the storage structure. The plastic tote was labelled to contain a premium diesel fuel additive, however, upon inspection it was noted to be filled with water. No leaks, stains or odours were observed on the tote or in the surrounding area. Based on visual and olfactory observations as well as the on-site activities (primarily gardening), the presence of the plastic tote container is not considered to be a potentially contaminating activity with respect to the subject site. No environmental concerns were identified with respect to fuel storage practices on-site.

#### **Transformer Oil and Polychlorinated Biphenyls (PCBs)**

No potential sources of PCBs or transformer oils were identified on the exterior of the subject site at the time of the site visit.

#### **Waste Management**

No waste was observed on site at the time of the site visit.

**Hazardous Materials and Unidentified Substances**

No hazardous materials, unidentified substances, or abnormal odours were observed on the exterior of the subject site at the time of the site inspection.

**Fill Material**

No fill material was observed on site at the time of the site visit.

**Interior Assessment**

A general description of the interior of the storage structure is described as follows:

- The floors consists of poured concrete;
- The walls consist of plywood;
- The ceilings consist of plywood and wood joists;
- No lighting is present within the storage structure.

**Potentially Hazardous Building Products**

**Polychlorinated Biphenyls (PCBs) and Transformer Oil**

No concerns with respect to PCBs or transformer oil were identified in the subject structure at the time of the site inspection.

**Other Potential Environmental Concerns**

**Interior Fuel and Chemical Storage**

No vent and fill pipes or signs indicating the presence of aboveground or underground fuel storage tanks were observed within the interior of the subject building at the time of the site inspection.

Chemical products stored inside the subject structure were observed to be limited to domestically available cleaning and gardening products. No environmental concerns were identified with respect to chemical storage practices in the interiors of the buildings on-site.

**Ozone Depleting Substances (ODSs)**

No ozone depleting substances were observed on site at the time of the site visit.

**Wastewater Discharges**

No wastewater is generated on site.

**Neighbouring Properties**

Land use adjacent to the subject site was observed as follows:

*North:* Golf course (Emerald Links Golf and Country Club), followed by residential dwellings;

*South:* Residential dwellings followed by Waddion Drive;

*East:* Residential dwellings, followed by Stagecoach Road;

*West:* Agricultural land and Green Links Way.

No environmental concerns were identified with respect to the current use of the neighbouring properties. Current land use adjacent to the subject site is illustrated on Drawing PE5114-2 – Surrounding Land Use Plan in the Appendix.

## **6.0 REVIEW AND EVALUATION OF INFORMATION**

### **6.1 Land Use History**

Based on a review of available historical information, the subject site has never been developed with the exception of a small storage building circa 2005, situated in the northwest portion of the site.

#### **Potentially Contaminating Activities (PCAs)**

No Potentially Contaminating Activities were identified on the subject site or within the Phase I study area.

#### **Areas of Potential Environmental Concern (APECs)**

No Areas of Potential Environmental Concern were identified on the subject site or within the Phase I study area.

#### **Contaminants of Potential Concern (CPCs)**

No Contaminants of Potential Concerns were identified on the subject site or within the Phase I study area.

### **6.2 Conceptual Site Model**

#### **Geological and Hydrogeological Setting**

Based on the information from NRCAN, the bedrock within the area of the subject site consists of dolomite of the Oxford Formation, whereas the surficial geology generally consists of nearshore marine sediments (beach formations and reworked glaciofluvial sand deposits) as well as till, with an overburden thickness ranging from 1 m to 5 m.

#### **Water Bodies and Areas of Natural Significance**

A small man-made storage pond is present in the northwest corner of the property. The nearest named water body with respect to the subject site is the Rideau River, located approximately 5.7 km to the west.

The Ministry of Natural Resources and Forestry's website was reviewed for the presence of Areas of Natural Significance (ANSI) in the Phase I study area. No Areas of Natural Significance were identified on the Phase I property or within the study area.

## **Existing Buildings and Structures**

The subject site is currently occupied with a small storage building.

## **Drinking Water Wells**

A search of the MECPs website for all drilled well records within 250 m of the subject site was conducted as part of this assessment. The search identified 144 well records within the Phase I study area. The records pertain to wells installed between 1963 and 2018 and used for domestic household water supply or groundwater observation purposes.

According to the well records, the overburden stratigraphy in the general area of the subject site consists of sand and/or sandy clay underlain by dense hardpan with gravel and boulders. Bedrock, consisting of limestone and/or sandstone, was typically encountered at an average depth of approximately 5 m below ground surface. Copies of the aforementioned well records have been included in Appendix 2.

## **Neighbouring Land Use**

Neighbouring land use within the Phase I study area consists mainly of residential properties. No environmental concerns were identified with respect to the current use of the neighbouring properties.

## **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

As per Section 6.1 of this report, no Potentially Contaminating Activities were identified on the subject site or within the Phase I study area.

## **Contaminants of Potential Concern**

As per Section 6.1 of this report, no Contaminants of Potential Concerns were identified on the subject site or within the Phase I study area.

## **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that there are no PCAs or APECs associated with the subject site. This was confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## 7.0 CONCLUSION

### 7.1 Assessment

Paterson Group was retained by 9287043 Canada Corporation. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the property situated to the east of the intersection of Green Jacket Crescent and Green Links Way, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the subject site and study area as well as to identify any environmental concerns with the potential to have impacted the subject site.

According to the historical research, the subject site was first partially developed with a small personal storage building. Constructed circa 2005 in the northwest portion of the site, apart from the personal storage building the property has never been formally developed. Since that time, the subject site has been used for personal agricultural purposes, as well as for the storage of the current owner's building materials (primarily lumber). The remainder of the site has always been vacant land. The neighbouring lands in the vicinity of the subject site have historically been used for residential and agricultural purposes. No environmental concerns were identified with respect to the surrounding land use.

Following the historical review, a site inspection was conducted to assess the current environmental conditions of the subject site. Currently, the subject site is partially used as a personal garden with the storage structure used for the storage of primarily lumber. A camping trailer was present on site; however, it was not in use and was noted to be in good condition at the time of the site visit. The neighbouring lands in the vicinity of the subject site were generally observed to be used for residential and agricultural purposes, with a gold course situated to the north. No environmental concerns were identified with respect to the current use of the neighbouring properties.

### 7.2 Recommendations

Based on the results of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment is not required for the subject site.**

## 8.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of 9287043 Canada Corporation Permission and notification from 9287043 Canada Corporation and Paterson Group will be required prior to the release of this report to any other party.

Dear Jeremy Camposarcone:

RE: ***Freedom of Information and Protection of Privacy Act Request***  
**Our File # A-2020-06263, Your Reference PE5114**

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to Lot 3, Concession 3, Greely, Ottawa.

After a thorough search through the files of the Ministry's Ottawa District Office, Investigations and Enforcement Branch, Environmental Assessment and Permissions Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment. This file is now closed.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Dany Briollais at 416-319-7739 or [dany.briollais@ontario.ca](mailto:dany.briollais@ontario.ca).

Yours truly,

Original Signed by.

# WATER WELL RECORD

County or District Osgood Township, Village, Town or City Osgood

Con. III Lot 305 Date completed 27 May 1969

Address 3rd Concession

## Casing and Screen Record

Inside diameter of casing 2 inch  
Total length of casing 10 feet  
Type of screen  
Length of screen  
Depth to top of screen  
Diameter of finished hole 2 inch

## Pumping Test

Static level 9 feet from surface  
Test-pumping rate 600 G.P.M.  
Pumping level 20 feet  
Duration of test pumping 2 hours  
Water clear or cloudy at end of test Clear  
Recommended pumping rate 600 G.P.M.  
with pump setting of 20 feet below ground surface

Instructions for Completing Form

- For use in the Province of Ontario only. This document is a permanent legal document. Please retain for future reference. All Sections must be completed in full to avoid delays in processing. Questions regarding completing this application can be directed to the Water Well Management Coordinator at 416-235-6203. All metre measurements shall be reported to 1/10th of a metre. Please print clearly in blue or black ink only.

Ministry Use Only

Address of Well Location (County/District/Municipality) Carleton Place, Ontario RR# Street Number/Name 6560 Jack Pine Cres, City/Town/Village GREELY, Site/Compartment/Block/Tract etc. PCL 240

Log of Overburden and Bedrock Materials (see instructions)

Table with columns: General Colour, Most common material, Other Materials, General Description, Depth From, Metres To. Includes handwritten entries: Brown Sandy, Grey limestone, Stony clay, Loose, Hard, 6.11 m of 12.70 cm casing, Drive shoe, well cap, 8 Bags of cement.

Construction Record and Test of Well Yield sections. Includes Hole Diameter, Construction Record (Casing, Screen), Water Record, and Test of Well Yield (Pumping test method, Draw Down, Recovery).

Plugging and Sealing Record section. Includes Depth set at, Material and type (Cement Grout), Volume Placed (62.86).

Location of Well section. Includes diagram showing well location relative to Jack Pine Cres. and a note 'pittless'. Also includes Audit No. 238030 and Date Well Completed 2009/07/19.

Method of Construction, Water Use, and Final Status of Well sections. Includes checkboxes for Cable Tool, Rotary, Digging, etc.

Well Contractor/Technician Information section. Includes Name of Well Contractor (B. Moore Well Drilling Ltd), Well Contractor's Licence No. (6455), Name of Well Technician (Robert Moore), and Well Technician's Licence No. (319).

Ministry Use Only section. Includes Data Source, Date Received (OCT 20 2009), Date of Inspection, and Well Record Number.

Measurements recorded in:  Metric  Imperial

**Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.**

### **NO RECORD FOUND (FUEL STORAGE TANKS ONLY)**

Hello. Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at <https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?mid=392> and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Gaya

**[CAUTION]:** This email originated outside the organisation.  
Please do not click links or open attachments unless you recognise the source of this email and know the content is safe.

Good morning,

Could you please complete a search of your records for **underground/aboveground storage tanks, historical spills, or other incidents/infractions** for the following addresses in Ottawa, Ontario:

Jack Pine Crescent: 6544, 6522;  
Manotick Station Road: 1123, 1295;  
Silver Maple Lane: 5800, 6544;  
White Oak Drive: 1212;  
Green Links Way: 5075;  
Green Jacket Crescent: 1009;  
Golden Ash Lane: 6523.

Best regards,

Jeremy Camposarcone, B.Eng

Dear Jeremy Camposarcone,

**Re: Information Request**

Fox Valley Road at Green Links Way (6544 Jack Pine Crescent), **Ottawa, Ontario (“Subject Property”)**

**Internal Department Circulation**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

**Search of Historical Land Use Inventory**

**This acknowledges receipt of the signed Disclaimer regarding your request for information from the City’s Historical Land Use Inventory (HLUI 2005) database for the Subject Property.**

A search of the HLUI database revealed the following information:

- There are no activities associated with the Subject Property.

The HLUI database was also searched for activity associated with properties located within 250m of the Subject Property. The search revealed the following:

- There are 2 activities associated with 2 properties located within 250m of the Subject Property.

A **site map** and **table** have been included to show the location of the Subject Property as well as the location of all the activities noted above.

Additional information may be obtained by contacting:

### **Ontario's Environmental Registry**

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

### **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.**

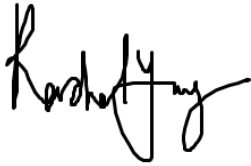

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You**

**may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact Rachel Young at [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca)

Sincerely,

A handwritten signature in black ink, appearing to read "Rachel Young". The signature is fluid and cursive, with the first name "Rachel" and last name "Young" clearly distinguishable.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.
